3. ETA Deutsche Bucht Lightvessel with date 2 figures and time of vessel's arrival 4 figures,
4. draft,
5. vessel's destination,
6. whether a properly marked landing area or marked winching area is available,
7. if yes, whether to starboard or port and on which hatchway or which part of the ship.

(For example: 1. Terre, 2. 104468, 3. ETA Deutsche Bucht 11 1530, 4. 41 ft. 03 in., 5. Brunsbuttel Elbe-Terminal, 6. Landing area available, 7. on port side.)

(b) A corrected ETA should be sent to "Elblotse Brunsbuttel" 6 hours prior to the transfer operation at Deutsche Bucht Lightvessel.

(c) Send the exact time of arrival to "Elblotse Brunsbuttel" 2 hours before arrival at Deutsche Bucht Lightvessel.

In addition to this, vessels should keep watch on *VHF Channel 16, 30 minutes before arrival* so that the helicopter can contact the ship.

After radio contact is established (VHF Channel 9), the vessel shall advise the helicopter pilot of the vessel's position, heading, speed and the actual wind direction and speed over the deck.

It is essential that the vessel transmit direction finding signals on 410 kHz until the helicopter is over the ship. On request of helicopter pilot an uninterrupted (locked key) transmission should be given.

When transferring the Pilot, vessels are restricted in their ability to manoeuvre according to Rule 3(g) (iii) and (iv) and may exhibit the lights and shapes as under rule 27(b) of the International Regulations for Preventing Collisions at Sea. In addition, they may inform shipping of their manoeuvres by VHF.

In cases of defect of helicopter, poor visibility, icing conditions, inadequacy of construction of ships, or no landing or winching area markings, the Pilot will have to be embarked or disembarked by the Pilot boat at the same position.

A sea-going Pilot boat is operating from Heligoland in up to Beaufort Sea Disturbance Nos. 4 – 5 for embarking and disembarking the Pilots, if the helicopter is not available, or if the ship's construction is inadequate for helicopter transfer, or if the helicopter landing or winching area of the ship has no proper marking according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operation. See "Deck-markings and Dimension Plan" in Plan Section.

If due to incomplete or misleading ETA information it is found at the attempted Pilot transfer by helicopter that the vessel is not properly marked and/or fitted for such transfer and the helicopter consequently has to return to base, it will be necessary to send a Pilot by boat from Heligoland, which may involve considerable delay plus the cost of the futile flight.

General: If helicopter operation cannot take place, the ship will be informed of the fact by radio telegraph via Norddeich Radio (DAN). For that purpose a permanent radio watch should be kept on 500 kHz (512 kHz if distress traffic is in progress on 500 kHz) during the approach, starting 2 hours before reaching rendezvous position at Deutsche Bucht Lightvessel.

The Master will receive further instructions by radio message or via VHF on how to proceed, if Pilot transfer is not possible.

The Heligoland Pilot Station can be called on VHF Channel 16 or 13 and should be addressed "Heligoland Pilot".

Vessels expecting a Pilot at Deutsche Bucht Lightvessel will be called on 500 kHz (512 kHz during distress working) or on VHF Channel 16 or 13 for information on transfer details.

RADAR: A continuous and co-ordinated chain of radar stations has been established to cover the traffic flow along the estuary of the River Elbe from a point 4 miles before passing Elbe Lightvessel as far as well into the port of Hamburg.

If visibility drops below 3,000 m. and/or if particular situations arise (e.g. ice floes, withdrawn buoys, pilot vessels leaving their positions, etc.). Masters of inward-bound vessels may request land-based radar monitoring assistance from a point *4 miles* before passing Elbe Lightvessel until receiving a Pilot. This service will be rendered by Elbe Pilots and is available by contacting Elbe Approach Radar Radio, VHFChannel 19.

The same service is extended to outward-bound vessels as far as *4 miles* West of Elbe Lightvessel.

Once the Elbe Pilot has come aboard he will be assisted by his land-based colleagues monitoring the shore-operated radar system.

Radar Stations along the River Elbe: Elbe Approach Radar Radio, VHF Channel 19; Neuwerk Radar Radio 1, VHF Channel 18; Neuwerk Radar Radio 2, VHF Channel 5; Cuxhaven Radar Radio, VHF Channel 21; Belum Radar Radio, VHF Channel 3; Brunsbuttel Radar Radio, VHF Channel 4; Freiburg Radar Radio 1, VHF Channel 18; Freiburg Radar Radio 2, VHF Channel 22; Steindeich Radar Radio, VHF Channel 5; Hetlingen Radar Radio, VHF Channel 21; Hamburg Radar Radio, VHF Channel 3 and 19.

Each station broadcasts periodical reports, in German and English, of visibility, ice, tide, alterations of seamarks, etc. See "Admiralty List of Radio Signals".

ANCHORAGE: A deep-water anchorage for deep-draft vessels, very large crude carriers (VLCC's), and ultra large crude carriers (ULCC's) is located South of "Deutsche Bucht" Lightvessel, approx. position Lat. 54° 05' N., Long. 07° 27' E. Depth of water from about 34 m. to 36 m.

In the vicinity of Elbe Lightvessel (3 miles to the N.E.) for large and deep-draft vessels, North of estuary, approx. position Lat. 54° 03' N., Long. 08° 09' E., depths from about 14 m. to 19 m. below chart zero.

Neuwerk Roadstead, approx. position 53° 58' N., 08° 30' E., depth of water from about 8 m. to 17 m. below chart zero;

Medem Roadstead, approx. position 53° 51' N., 08° 46.5' E., depth of water from about 5 m. to 13 m. below chart zero;

Neufeld Roadstead, approx. position 53° 51.7' N., 09° 00' E., depth of water from about 8 m. to 10 m. below chart zero;

N.E. Roadstead, off Brunsbuttel, permission only for 1 tide, approx. position 53° 53' N., 09° 12' E., depth of water from about 13 m. to 14 m. below chart zero;

Freiburg Roadstead, approx. position 53° 50.6' N., 09° 19.5' E., depth of water about 13 m. below chart zero;

There are further anchorages for small vessels at Sudreede (South anchorage) off Brunsbuttel, Wischhafen, Krautsand, Grauerort – and Twielenfleth Roadstead.

The bottom at all these anchorages consists of sand and mud.

DEEP-SEA PILOTAGE: Ships requiring the assistance of Deep-Sea Pilots in the North Sea, the English Channel, or the Skagerrak shall make use only of the service of Deep-Sea Pilots in possession of a Deep-Sea Pilot Card issued in accordance with the Rules and Regulations for the Good Government of Deep-Sea Pilotage in North Sea.

Ships requiring the assistance of a Deep-Sea Pilot in the North Sea or the English Channel may request the assistance of pilots licensed by the Federal Republic of Germany.

See "Baltic Deep-Sea Pilotage".

Request for Deep-Sea Pilots should be made for vessels berthed in

German North Sea ports	6 – 8 hours before ETD
Continental North Sea ports	24 hours before ETD
UK North Sea and Channel Ports	48 hours before ETD or before passing the local Pilot Station (as appropriate).

Vessels entering European waters through the English Channel usually take their pilots at Brixham 1.5 miles N.E. of Berry Head or at Cherbourg 1 mile North of CH 1 Buoy. Pilots of outward-bound vessels normally disembark at the same stations.

Deep-Sea Pilots (not authorised as dual capacity River Pilots) are not allowed to pilot any vessels (whether subject to compulsory pilotage or not) on the River Elbe from Deutsche Bucht Lightvessel as far as the Port of Hamburg, regardless of whether pilot vessels are on position or not during bad weather conditions or whether or not Pilots can be embarked or disembarked during bad weather at the normal transfer position.

Also see "Brixham"

Extra Service: Inward-bound vessels – especially container vessels – wishing to proceed without delay by gale or fog, etc., regardless of whether pilot vessels are in position or not during bad weather conditions, as may be caused when taking an Elbe Pilot at Elbe Lightvessel or Deutsche Bucht Lightvessel, can request the Elbe Pilot to come aboard at the first Channel or North Sea port of call for approaching the river Elbe and non-stop onward upstream pilotage.

In order to avoid all the disadvantages caused by the forementioned situation – if foreseeable – it is urgently advised to request an Elbe Pilot in time.

Advantages: Assistance of nautical staff in the heavily congested area of the German Bight – especially of the approach of the River Elbe – exact knowledge of local conditions, saving of time, reduced hazards.

Please observe these periods of notice:

Continental North Sea ports:	24 hours prior to ETD
UK North Sea and Channel ports:	48 hours prior to ETD or before passing local Pilot Station.

Coastal Pilotage: Coastal pilotage is available from a position near Lightvessel Borkumriff to the limits of the pilotage districts Ems, Weser II/Jade, and Elbe.

Telegrams: Emslotse Emden via Norddeich Radio/DAN
Telephone: 0492/24000
Telex: 27882 lotsen d

Baltic Pilot – Kiel: Ships requiring assistance of state-licensed Deep-Sea Pilots for the *Baltic Sea* to send their request to

German Deep-Sea Pilots Brake
Cable: "Germanpilots Brake"

or Baltic Pilots Kiel
Cable: Balticpilots Kiel".

or Deepseapilots Busum
Cable: "Contipilot Busum".

or German Deep-Sea Pilotage Joint Service
Cable: "Praconor Travemunde".
or "Praconor Bremerhaven".

or Captain Urmersbach, Brake
Cable: "Urmersbachpilot Radio Unterweser".

The Baltic Pilotage Authorities Commission Recommendation:

The Baltic Pilotage Authorities Commission, recognising that Deep-Sea Pilotage helps to enhace safety of navigation and prevention of pollution of the marine environment, in particular to reduce the risks resulting from the high density of ships carrying dangerous or noxious cargoes and that the presence of a Deep-Sea Pilot on board would strengthen a vessel's navigational team and improve emergency measures in case of incidents and having considered the necessity to establish a certain order in Deep-Sea Pilotage in the Baltic Sea, recommends

A. Masters of ships which are constrained by their draft and
B. Masters of ships other than registered in one of the Baltic states, infrequently sailing in the respective area

coming from or being bound for ports in the Baltic Sea to avail themselves of Deep-Sea Pilots, certified by a competent authority of a Baltic coastal state.

Notice to all Masters Entering the Baltic Sea concerning Deep-Sea Pilotage:

The IMO recommends that ships which wish to avail themselves of Deep-Sea Pilots in the area of the Baltic should only take Deep-Sea Pilots licensed by a Pilotage Authority of a Baltic coastal state, i.e. Denmark, Estonia, Finland, Germany, Latvia, Lithuania, Poland, Sweden and Russia (IMO-Resolution A.480 (XII).

Such licensed Deep-Sea pilots are in possession of a red identity card.

The Pilotage Authorities of the Baltic coastal states draw special attention to the following rule which came into force on 1st January, 1983, but only obligatory for licences issued after that date.

Deep-Sea Pilotage in the Baltic Sea Area shall be performed by Deep-Sea Pilots from the respective ports of departure of the Baltic coastal states only, including the Kiel-Holtenau Locks, the Sound and the Belts. A Deep-Sea Pilot shall disembark from a ship at the first port of call and shall return home as soon as possible.

If the ship wants further advice by a Deep-Sea Pilot it is the responsibility of the local Pilotage Authority of that port to supply such a Deep-Sea Pilot.

Also see "Baltic Deep-Sea Pilotage".

BRAKE: 53.20 N. 08.29 E. (See Plan)

PORT LIMITS: The government-owned piers are the commercial area of the port. A vessel is considered to be an "arrived ship" when she is moored alongside such piers, and the customs formalities are complete. Laytime will commence according to referring charter parties.

Port Authorities distribute the free berthing places in following the "Benutzungsordnung fur den Hafen Brake" which says briefly that a vessel will get a rank position in actual arriving times:

(a) for ships coming from sea: arrival "Weser Lanby" plus 5 hours.
(b) for ships coming from Bremerhaven North Roads and Blexen Roads: departure plus 2 hours.
(c) for ships coming from Bremen: departure plus 3 hours.

DOCUMENTS:
2 Lists Ship's Stores.
2 Crew Lists.
2 Passenger Lists.
Health Certificate (forms obtainable from Pilot).
Ship's Register.

DEEP SEA PILOTAGE: See "General" before first German port and "Baltic Deep-Sea Pilotage".

PILOTAGE: Carried out by Weser River Pilots. The river Pilots also act as docking Pilots. Also see "Bremen" and "Bremerhaven".

ANCHORAGES: No anchorage in vicinity of Harbour. Anchorage in "Blexen Roads". For further details see "Bremen".

RESTRICTIONS: Vessels proceeding to Brake with a draft in excess of 24 ft. will be restricted by the tide.

MAX. SIZE: Max. length 265 m. (869 ft.); no restriction on beam. Max. draft 37 ft. in fresh water.

PRATIQUE: Free Pratique is given by Health and Immigration Officer only. If a case of fever or disease is suspected on board radio the Agent with details before arrival.

RADIO: Cable Agent via Norddeich Radio (Call sign DAN) advising ETA and cash requirements.

RADAR/VHF: Stations from Weser Lanby to Bremerhaven. Radar service between Bremerhaven and Brake. Radar stations have day and night service. If no fog every odd hour radar stations give on VHF or Pilot walkie-talkie report of visibility, defective buoys, anchoring ships, obstructions to navigation, and special occurrences. Direct contact between port and ship is possible on VHF ("Brake Lock Radio" on VHF Channel 10).

TUGS: Available day and night in sufficient number. No extra charge for using tug's lines.

BERTHING: *Inner Harbour with tide-independent lock:* Dimensions: Length 95 m. (311 ft.), width 16 m. (52 ft.) Max. size of vessel to be handled will be a fully loaded vessel of 3,000 d.w.t. with a max. draft of 6.0 m.

Length of dock 1,070 m. (3,500 ft.), width 110 m. (360 ft.). Length of canal 228 m. (750 ft.), width of canal 46 m. (150 ft.), length of quay in canal 228 m. (750 ft.). Depth 4.3 m.

Riverside Berth: Total length 1,852 m. (6,075 ft.), depth at pier 13.6 m. at North end and 14.6 m. at South end at normal low water, tidal amplitude 11 ft. 6 in. Max. draft 37 ft. Max. length of ships not more than 265 m. (869 ft.).

This government-owned pier is divided into 2 areas. The Northern part is the crane-area with a length of 4,510 ft., the Southern part, 1,565 ft. long, is the grain-handling area.

Private Pier of the Fettraffinerie/Unimills has a length of 245 m. (804 ft.) depth 11.0 m.

SPECIALISED CARGO HANDLING FACILITIES:

Inner Harbour:
1 jib crane, capacity 32 ton. Working range 10 m. to 30 m.

South Pier:
3 grain elevators. Total discharging capacity 1,500 t.p.h.
4 lorry and railtruck unloading stations. Total capacity 1,000 t.p.h.
3 ship loading stations. Total loading capacity 1,800 t.p.h.
6 lorry and railtruck loading stations. Total loading capacity 2,600 t.p.h.

North and Middle Pier:
4 luffing jib cranes – 25 tons capacity – max. reach 46 m.
2 Bridge cranes – 80 tons capacity – max. reach 40 m.
Wagon loading station: capacity 300 cu.m.p.h.
Combined ship loader: capacity 1,000 cu.m.p.h.

Fettraffinerie Quay: Loading/discharge points for vegetable and animal oils/grease, mineral oil, molasses and other liquid products.
Discharge capacity: 1,500 t.p.h.

Storage:
Silo installation and storage shed for grain: 360,000 tonnes.
Storage sheds: 55,500 sq.m.
Free storage areas: 105,000 sq.m.
Tank storage for grease, refinery and the S.S. "Elbe" 110,000 tonnes.

The government-owned pier is equipped for containers, but not for Roll-on/Roll-off traffic. The berth does not handle liquid chemicals.

STEVEDORES: ETA has to be reported to the Agent to arrange gangs. Stevedores are working 3 shifts around the clock on working days (Monday to Saturday); on Sundays and holidays 4 shifts are worked around the clock.

MEDICAL: One hospital and several doctors available at Brake. Advance notice to Agent required if medical assistance necessary.

TANKERS: Fettraffinerie Pier: Max. draft 33 ft. Discharging lines: molasses 6 in., fuel oil 8 in., diesel 10 in. and vegetable oil from 4 in. to 8 in.

DENSITY: Brake Port, Fresh water: salinity = 1002–1004.

FRESH WATER: Available both at Riverside Berth and Inner Harbour. Pumping capacity from 18 t.p.h. to 20 t.p.h.

FUEL: All grades available by bunker barges.

FIRE PRECAUTIONS: No smoking in port area. For tankers at Fettraffinerie Pier smoking only in saloon and/or messroom.

CONSULS: Consuls at Bremen.

REPAIRS: All normal ship and engine repairs can be carried out during laytime on board.

DRY DOCKS: One dry dock at Petram Werft, Brake, for ships with a length not in excess of 85 m. (279 ft.), nor wider than 16 m. (52 ft. 6 in.), and a max. draft of (3.98 m./13 ft. 1 in.).

SURVEYORS: Classification Societies not represented but several surveyors available at Brake Port.

GANGWAY/DECK WATCHMEN: Crew's watchmen necessary – strong tides, current-speed 3 knots.

HATCHES: Depends on the different charter parties.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and 2 bottles of wine.

CARGO GEAR: Load/discharge normally effected by shore-gear.

REPATRIATION: Any necessary repatriation and/or crew changes can be effected by Agents at Brake.

AIRPORT: International airport served by regular airlines at Bremen. Brake to Bremen, distance 57 km. (35 statute miles).

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: New Year, Good Friday, Easter Sunday and Monday; 1st May, Ascension Day; Whitsunday and Monday, Penitentiary Day, 2 Christmas Days. Cargo work can be arranged on those days, except on New Year, Easter Sunday (1st Easter day), 1st May, Whitsunday, 1st Christmas Day, and on the days before such days till 1200 and/or 1400 hours.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 19222; Fire 112.

TELEPHONES: No arrangements to place telephones on board.

SHORE LEAVE: Shore passes are required according to customs regulations.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Within the port area, several collection points have been established that may be used for normal ship's garbage, including victual and domestic waste generated during the normal operation of the ship.

After berthing, garbage bags will be delivered on board the ship. All garbage should be collected into these and brought to the container before leaving the port. Further bags can be supplied if needed. There are no charges for the bags or for use of the container.

This service does not include garbage that cannot be placed in the container because of its size. It is also strictly prohibited to place any special waste, such as chemicals, paints, oily residues or batteries, in these containers. The agent will know firms which are able to collect this special waste and remove it. Charges will be for ship's account. For free disposal of solid oily residues such as filters, drums or polishing clothes, a special container is available on the quay.

WASTE OIL DISPOSAL: Service available. Contact Port Authority for details.

SEAMAN'S CLUBS: Seemannsheim, Weserstrasse 1A, 2880 Brake. Tel: 04401-4490.

CURRENCY: Deutsche Mark (DM).

DEVELOPMENTS: Weser fairway depth will be increased to 12 m. (39 ft. 6 in.).

AUTHORITY: Niedersachsisches Hafenamt Brake, Brommstrasse 2, P.O.Box 1262, 26912 Brake, Germany. *Tel:* 04401/9250. *FAX:* 04401-3272. *Contact:* Captain Heiko Uflacker, Harbour Master.

BREMEN (Including Farge): 53.07 N. 08.45 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Provision and Store Lists including fuel oil.
Dangerous Cargo Lists.
Health Declaration.
Ship's Register.
No Customs Papers if vessel laying in Freeports at Bremen.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German port and "Baltic Deep-Sea Pilotage".

PILOTAGE: Compulsory for ships with an overall length of more than 90 m. or beam of 13.0 m. or more, and tankers of more than 300 g.r.t. and for all ships with dangerous goods in bulk and nuclear ships, exemptions possible.

Distance from Weser Lanby to Bremerhaven 36 miles. Distance from Bremerhaven to Bremen 32 miles.

At least 12 hours before arrival at Weser Lanby, Masters should cable messages to "Lotsenbruderschaft Weser zwei Bremerhaven" via Norddeich Radio. Message to include name and g.r.t. of vessel, place where Pilot required to board, day and hour of vessel's arrival, vessel's destination and fresh water draft in metres. Sea Pilots board at Weser seabuoy to Bremerhaven. River Pilots board at Bremerhaven to pilot vessels to Bremen.

Pilot station near Weser Lanby (54° 05' 16" N., 07° 50' 00" E.) black painted motor vessel, black topped funnel, white lettering "Lotse" on hull. In rough weather, pilot boat may be found inside near Buoys 77 and 79. Pilots may be contacted by Norddeich Radio, 2182 or 2614 kHz. or by VHF Channel 16.

River Pilots boarding at Bremerhaven also act as harbour Pilots to all ports above Bremerhaven.

ANCHORAGES:
1. About 1 mile S.W. of Weser Lanby.
2. Hoheweg Road between Buoys 17 and 19.
3. Tanker Road W. of Buoys 27–31.
4. Blexen Roads (South Roads) only for smaller ships.

RESTRICTIONS: Vessels proceeding to Bremen, with a draft in excess of 25 ft. will be restricted by the tide.

MAX. SIZE: Bremen: Length 190 m. with draft 10.7 m., longer ships with restricted draft.

Locks: At the entrance of the Industriehafen: Length 248 m., clear width 33.40 m.

Ships passing with max. length 230 m. and max. breadth 32.30 m. According to tide, docking is possible up to 9.45 m. (31 ft.).

HEALTH: Master has to fill and sign Maritime Declaration of Health which is handed to Health Officer on arrival at Bremerhaven and Bremen. In case suspected disease or fever on board radio details to Port Health Bremerhaven via Norddeich Radio before arrival.

RADIO: Cable Agent via Norddeich Radio, call sign DAN, advising ETA and cash requirements.

Bremen Port Radio VHF station on Channels 3 or 16 to be used for messages to all Port Authorities including Police and Fire Brigade and Port Health in case of emergency. Bremen Lock Radio on Channel 12.

RADAR/VHF: Stations from Weser Lanby to the port area of Bremen. If no fog, every odd hour radar station gives by VHF or Pilot walkie-talkie, report of visibility, defective buoys, anchoring ships, obstructions to navigation and special occurrences.

Ships ordered for Bremen Industriehafen should contact "Oslebshausen Lock" via Channel 12 VHF after passing Bremerhaven.

TUGS: Tugs available at all stations according to ships request. Tugs' lines used (only) without charge.

BERTHING: Berthing at Bremen: The following harbours can be reached:

Harbour name:	*Quay Length* (m.)	*Depth (above chart datum)* (m.)
Europahafen	2,730	3.20 – 8.60
Uberseehafen	2,960	3.20 – 10.20
Werfhafen	700	3.20 – 7.20
Holz–und Fabrikenhafen	2,600	4.20 – 8.50
Getreidehafen	570	4.00 – 11.50
Neustadter Hafen	3,100	4.00 – 11.50
Kap Horn Hafen	725	9.00
Industriehafen	3,060	3.20 – 6.20 (plus harbour water, about 3.80 m., only Industriehafen)

Max. draft is dependent on the prevailing winds

SPECIAL CARGO HANDLING FACILITIES:

Freeports: Neustadter Hafen, Uberseehafen and Europahafen, mainly general cargo.

Quay length: 7,960 m.
Max. draft: 11.50 m.
Shed storage: 532,000 sq.m.
Porterage company: Bremer Lagerhaus-Gesellschaft.

Facilities: Air-conditioned fruit storage, refrigerated storage, consolidated cargo centre, packing centres, Ro/Ro terminals, logistics and information processing on industrial plant transports and grain handling centre.

Container Handling Facilities: Neustadter Hafen Shed 24 is equipped with 3 container cranes, suitable for 40 ft. containers. Max. lifting capacity is 45 tons. The terminal has 116 connections for reefer containers.

Shed 21 is equipped with 2 container cranes, suitable for 40 ft. containers. Max. lifting capacity is 80 tons.

At the end of shed 24 Neustadter Hafen, 1 berth. Max. carrying capacity 60 tons, width 30 m., draft 32 ft.

LASH Terminal: At Bremerhaven. Lash-lighter places: Lankenauer Hoft and Europahaven.

Bulk handling facilities (Industriehafen):

Bulk cargoes such as steel, and steelware, coal, coke and coke breeze, timber, ore, oil, molasses, sand, stones, phosphate and further fertiliser and chemicals are handled by companies under private management.

For entering Industriehafen see "Max. Size – Locks".

Huttenhafen: Weserport Terminal 1 mainly handles ore, scrap, coke and coke breeze, sand, steel and steelware as slabs and coils of Bremer Stahlwerke.

Quay length: 520 m.
3 gantry cranes: 12.5, 15 and 55 tons.
Storage area: 80,000 sq.m.
Discharging capacity ore: 8,000 tons per 24 hours.
Loading capacity coils: 5,000 tons per 24 hours.
Loading capacity slabs: 6,000 tons per 24 hours.

Weserport Terminal 2: Mainly handles provender, coal, coke, minerals, wood products, stones, etc.

Quay length: 450 m.
4 cranes: 25 – 56 tons.
Storage area: 21,000 sq.m.
Loading capacity coils: 6,000 tons per 24 hours.
Loading capacity plates: 5,000 tons per 24 hours.
Loading capacity coal: 6,000 tons per 24 hours.
Quarrier and riddler: 500 tons per 24 hours.

Kohlenhafen: Mibau: Only minerals and self-unloading vessels; no cranes.

Quay length: 750 m.
Storage area: 30,000 sq.m.

Kraftwerk Hafen (Power Station): At this berth only coal cargoes for use by the power station are handled. Discharging rate (1 crane) 8,000 tons to 10,000 tons per 24 hours.

Kalihafen: Anker-Schiffahrt handles all kinds of cargo and is specialised in packing, decantation and sacking of chemical products.

Quay length: 500 m.
2 gantry cranes: 24 tons
4 special loaders
1 bridge for liquids
Storage area: 40,000 sq.m.

Tankfarm Defrol: Storage capacity 48,000 tons fuel.

Hafen E: Hansakai (Klembt) handles all kinds of cargoes and is specialised in coils, pipes, construction parts, heavy lifts, ore and containers.

Quay length: 285 m.
1 gantry crane: 15 tons.
4 cranes: up to 45 tons.
Storage area: 11,000 sq.m.

Wandel & Co: 60,000 sq..m. shed storage for grain and general cargo.

Hafen F: Krages: Timber specialists. No cranes available.

Baltus: Sand specialists.

Hafen A: H. Menke & Co.: Quay length: 250 m. 1 tank for molasses 15,000 tons. Specialises in wine import with storage area for 20 million litres.

Plump: Disposal company with 100 m. of quay space.

Other bulk handling facilities:

Granary (Getreidehafen) *near the Uberseehafen*

No locks, max. draft 35 ft. Lighterage is possible.

Bremer Lagerhaus-Gesellschaft:
Quay length: 300 m.
Storage area: 90,000 sq.m.

Berth "A" 3 elevators with a capacity of 400 t.p.h. max. length 275 m. Silo capacity 150,000 tons.

Kraftwerk Farge (Power Station)

Location: 10 miles downstream from Bremen. Only coal cargoes for the power station are handled.

Max. draft 29 ft. 6 in.
Max. length 200 m. = 656 ft.
Max. beam 25 m. = 82 ft.

3 cranes, total discharging capacity 200 t.p.h.

Rolandmuhle: Tidal basin Holz- und Fabrikenhafen. Grain facility with:

Max. draft 34 ft. at low water.
Max. length 180 m. (591 ft.).
2 stationary elevators 3,000 tons per day
1 conveyor for loading bags only.

J.H. Bachmann/J. Muller/Karl Gross (Holz- und Fabrikenhafen)

Facility for grain and occasionally, general cargo handling.

Max. draft 28 ft. at normal low water.
Quay length 710 m. (2,330 ft.).
Cranes 13 Grain/General cargo
Elevators 4×250 t.p.h. each

Klocknerhafen: Ore handled by Stahlwerke Bremen, Terminal 3.

Quay length 260 m.
Max. draft(Tidal) 37 ft.

General cargo loading installations (Kap Horn) with 2 quays, 1×320 m. long inside Industriehafen and the other 800 m. long (at the riverside). The storage area of 100,000 sq.m. is equipped with gantry crane for handling pipes, construction parts and general.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:

Regular period: 0630–1430 resp.
0600-1400
Free Port
1st shift: 0600-1400
2nd shift: 1430-2230

CRANES: All piers are fitted with cranes 3/7 tons. Floating cranes up to 200 tons available.

MEDICAL: All medical facilities available. Advance notice to Agent required if medical assistance necessary.

TANKERS: Draft in fresh water.

Holzhafen	one berth, max. draft 28 ft. at LW
Osterort I	one berth, max. draft 34 ft. 6 in. at LW
Osterort IV	four berths, max. draft 37 ft. 8 in. at LW
Farge	two berths, max. draft 29 ft. 11 in. at LW

For the following tanker berths see restrictions of the entrance lock Industriehafen.

Huttenhafen:	three berths, max. draft 20 ft. to 30 ft.
Kalihafen	one berth, max. 31 ft. 3 in.

Fina Oil, Einswarden. Max. draft 36 ft. 6 in. Discharging lines crude oil 12 in., fuel oil 10 in., diesel 8 in.

Frisia (Gulf Oil), Einswarden. Berth for tankers up to 250 m. length, max. draft 36 ft. fresh water.

DENSITY: Fresh water.

FRESH WATER: Available by hose and barge.

FUEL: All Grades available.

FIRE PRECAUTIONS: Smoking or use of open fire not allowed all over the Port area. No smoking on deck. Tankers, smoking in saloon or messroom only.

REPAIRS: All repairs possible.

DRY DOCKS: Vulkan-Gravity Dock: Up to 240,000 d.w.t.

Floating Dock: Up to 8,500 d.w.t.

SURVEYORS: All types of surveys possible (Germanischer Lloyd, Kalkstr. 4, D-28195 Bremen. Tel: (0421) 174540. Fax: (0421) 1745499)).

GANGWAY/DECK WATCHMEN: Not considered necessary. But available when ordered.

HATCHES: Opening and closing normally by crew with stevedores assisting.

CUSTOMS ALLOWANCES: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days further same quantities. Wine not restricted. Freeports in Bremen only Europahafen, Uberseehafen and Neustadter Hafen.

CARGO GEAR: No additional requirements. Preventers necessary.

REPATRIATION: Any time.

AIRPORT: Regular national and international flights.

HOLIDAYS: New Year's Day (no work performed); Good Friday; Easter Sunday (no work performed); Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 3rd October; Prayer Day; Christmas Day (no work performed); Boxing Day.

POLICE/AMBULANCE/FIRE: Police help 110; Fire, First aid 112. Pilot Station Bremerhaven: Sea Pilots 4-22-20; River Pilots 4-22-89.

Pilot Station Bremen: 39-40-44.

Port Administration Bremen: 361-0.

Waterway Police: 38-20-31.

Port Medical Services: 361-0.

Immigration: Call Water Police.

Foreign Calls: 0010.

TELEPHONES: It is possible to rent a telephone box from mooring company.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: All ships must deliver all garbage ashore before leaving port. The regulated collection service is operated by one contractor. Call Port Authority, Tel: 0421 361-8504, or contractor Nehlsen, Tel: 0421 391869. Bags and/or skips are provided.

WASTE OIL DISPOSAL: Collection service is available through several contractors. Call Port Authority, Tel: 0421 361-8504.

SEAMAN'S CLUBS: Deutsche Seemannsmission, Jippen 1, 2800 Bremen 1. Tel: 0421 18361.

Stella Maris/Club, Hafenkopf II, Nr. 2, 28217 Bremen 1. Tel: 0421 394789.

CURRENCY: Deutsche Mark (DM).

REGULATIONS: Usual Port Regulations. Special Regulations for dangerous goods and Tankers.

AUTHORITY: Hafenamt Bremen, Hafenstrasse 63, Ueberseehafen, 28217 Bremen, Germany. *Tel:* (0421) 361-8271 (Harbour Master). *FAX:* (0421) 361-8387 (Harbour Master), 361-8688 (Office). *Contact:* Harbour Master on duty. Tel. (0421) 361-8504.

BREMERHAVEN: 53.33 N. 08.35 E. (See Plan)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
3 Provision and Stores List, including fuel oil.
3 Dangerous Cargo List.
Maritime Declaration of Health.
Derat Certificate
Ship's Register.
No Customs Papers if vessel laying in Freeport at Bremerhaven.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German Port and "Baltic Deep-Sea Pilotage".

PILOTAGE: See "Bremen".

Docking Pilots join vessels between Buoys 49 and 51A if bound for Uberseehafen or near entrance of Geeste River if bound for Fischereihafen. Docking Pilots can be requested via Bremerhaven Port Radio on VHF Channel 12.

ANCHORAGE: See "Bremen".

RESTRICTIONS: Vessels proceeding to Bremerhaven with draft in excess of 35 ft. will be restricted by tide.

MAX. SIZE: Length 340 m., draft 41 ft. in fresh water. Draft 42 ft. 8 in. in fresh water, special permission required.

HEALTH: See "Bremen".

RADIO: See "Bremen".

RADAR: See "Bremen".

VHF: "Bremerhaven Port Radio" on Channel 12.

TUGS: Tugs join vessel with docking Pilots. Tug's lines used at no extra charge.

BERTHING: There are two harbour-groups, Uberseehafen North of Geeste River and Fischereihafen South of it.

Uberseehafen:

Along Weser River:	*Depth below Chart Datum*
Columbus Quay	32 ft. – 38 ft. 08 in.
Stromkaje	40 ft. 04 in. – 44 ft. 03 in.
Dock Basins:	*Maintained Depth*
Neuer Hafen	21 ft.
Kaiserhafen I	29 ft. – 36 ft.
Kaiserhafen II	36 ft.
Kaiserhafen III	36 ft.
Verbindungshafen	36 ft.
Nordhafen	42 ft. 09 in.
Osthafen	46 ft.

The dock basins can be reached through 2 locks:

Kaiserschleuse: Length 732 ft., gate width 87 ft. 09 in. without fenders;
including fenders 83 ft. 7 in.
Depth 23 ft. at LW.

Nordschleuse: Length 1,220 ft., gate width 147 ft. without fenders;
including fenders 138 ft.
Depth 35 ft. 03 in. at LW. Max. size of vessel. length 265 m., beam 38 m. (124 ft. 07 in.). Draft 42 ft. 08 in.

With special permission of the port authorities the following maximum FW drafts are allowed.

42 ft. 8 in. = 13.0 m. – max. beam 38 m.
42 ft. = 12.8 m. – max. beam 39 m.
40 ft. = 12.5 m. – max. beam 40 m.
38 ft. = 11.58 m. – max. beam 41 m.

Fischereihafen:

Dock basins:	*Maintained Depth*
Fischereihafen I	25 ft.
Fischereihafen II	25 ft.
Handelshafen	23 ft.

Locks:

Fischereihafen-Doppelschleuse
Small lock: Length 349 ft., gate width 39 ft. without fenders;
including fenders 34 ft. 06 in.
Depth 20 ft. 06 in. at LW.
Large lock: Length 328 ft., gate width 98 ft. without fenders;
including fenders 94 ft.
Depth 20 ft. at LW.

SPECIAL CARGO HANDLING FACILITIES: The port is equipped with modern container, Ro/Ro and general cargo facilities.

4 floating cranes having lifting capacities of 100 tons – 500 tons.

Columbus Quay: Passenger and general cargo facilities.

Quay length 1,020 m. Depth 32 ft. – 38 ft. One shed of 33,000 sq.m. 9 cranes – 8 tons and one heavy lift bridge of 38 tons.

Car loading installations:

A car loading installation is situated in the Nordhafen. Quay length 620 m. Storage area 40,000 sq.m. for about 3,500 cars. The loading is done by ships' ramp.

The Car Terminal Bremerhaven, situated in the Kaiserhafen II, has a quay length of 1,075 m. and a storage area of about 526,000 sq.m.

The Car Terminal Bremerhaven, situated in the Kaiserhafen III, has a quay length of 700 m. and a storage area of 35,000 sq.m.

Container Terminals:

2 container terminals, 1 at Stromkaje and 1 in the Nordhafen, are equipped with 17 container cranes, capacity 41 tons – 75 tons.

Depth alongside in river 44 ft. 03 in. at LW. Depth at Nordhafen 42 ft. 09 in.

Kaiserhafen/Verbindungshafen offers 4 basins for general cargo and fruit handling. Quay length: 3,574 m. Five banana discharging installations have a capacity of over 500,000 tons per year.

LASH Carriers: Special facilities are available.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours: 1st shift: 0600–1400
2nd shift: 1400–2200
3rd shift: 2200–0500 (overtime)

on Saturdays:
1st shift: 0600–1400
2nd shift: 1400–2000 (overtime)
3rd shift: 2000–0200 (overtime)

on Sundays:
as Bremen Freeport.

MEDICAL: Hospital facilities at all Weser ports. No vaccination normally required.

TANKERS: Bominflot KG., Esso Kaje, Verbindungshafen. Max. draft 32 ft. 06 in.

There are several tank-cleaning boats available to receive slops at Bremerhaven.

DENSITY: 1008 – 1010.

FRESH WATER: Available by pipeline at all berths.

FUEL: All grades available.

FIRE PRECAUTIONS: No smoking on deck. Tankers smoking only saloon or messroom.

CONSULS: Barbados, Iceland, Sweden, Senegal, United Kingdom.

REPAIRS: All repairs possible.

DRY DOCKS: There are 2 graving docks and 10 floating docks with max. capacity 75,000 tons.

SURVEYORS: (1) Caleb Brett: In Hamburg. Neustadter Weg 6, 2000 Hamburg 11. Tel: (040) 366286.

(2) Lloyd's Register of Shipping: Am Wall 102, 2800 Bremen. Tel: (0421) 310611. Also at Buckingstrasse 10, 2850 Bremerhaven. Tel: (0471) 45006.

Bureau Veritas, District Hamburg: Spaldingsstrasse 1, 2000 Hamburg 1. Tel: (040) 230801. Telex: 02 154 26.

Germanischer Lloyd, Bartelstr. 1, D-27570 Bremerhaven. Tel: (0471) 92449-0. Fax: (0471) 9244930.

GANGWAY/DECK WATCHMEN: Not considered necessary.

OPENING/CLOSING HATCHES: Normally by crew with stevedores assistance.

CUSTOMS ALLOWANCES: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days, further same quantities. Wine not restricted. Freeports only at Bremen (Europa and Uberseehafen), and at Bremerhaven (Kaiserhafen, Columbus Kaje and Weserport).

CARGO GEAR: No additional requirements. Preventers necessary.

REPATRIATION: Any time.

AIRPORT: About 40 miles from Bremen. Regular airlines.

HOLIDAYS: New Year's Day (no work performed); Good Friday, Easter Sunday (no work performed), Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 3rd October; Prayer Day; Christmas Day (no work performed); Boxing Day.

POLICE/AMBULANCE/FIRE: Accidents, Police 110; Fire 112; Sea Pilots 42220; River Pilots 42289; Waterway Police 9466-7; Port Medical Service 40031.

EMERGENCY CO-ORDINATION CENTRE: Flottenkommando SAR Leitstelle, Meyerweg, 2392 Glucksburg. Tel: (04631) 8625-511 (Ext. 575/6).

Deutsche Gesellschaft zur Rettung Schiffbruchiger, Seenotleitung, Werderstrasse 2, 2800 Bremen 1. Tel: (0421) 504393. Telex: 0244754.

BANKS: (In Hamburg): Bank of America, Barclay's Bank, Citibank, Lloyd's Bank, Bankers Trust.

STORING: See "Prelims".

1. Yes
2. Yes
3. Yes, jetties fitted with cranes, distance to remain approx. 20 ft.
4. Yes
5. Equal to European Community Regulations.
6. Yes.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Garbage disposal is compulsory for seagoing vessels. Containers provided on board 24 hours. Contact Nehlsen, Stadtische Reinigung, Steubenstrasse 7b, 2850 Bremerhaven. Tel: 0471 44030. The number of containers is calculated on the average number of crew in relation to ship size for two days stay in port, and charges are as follows:

(1)	Up to		300 g.r.t.	1 container	DM 13.90
(2)	301	up to	500 g.r.t.	1 container	DM 15.30
(3)	501	up to	1.000 g.r.t.	1 container	DM 25.20
(4)	1.001	up to	1.600 g.r.t.	2 containers	DM 50.40
(5)	1.601	up to	5.000 g.r.t.	4 containers	DM 100.80
(6)	more than		5.000 g.r.t.	6 containers	DM 151.20

Additional containers may be ordered as required, the charge being DM 12.50 each. The loaded containers will be collected before ship sails, or replaced, if stay is more than two days.

Port Regulations require that crewmembers assist when filled containers are collected.

As far as operational waste (residues of cargo, dunnage, protecting and separating material, etc.) is concerned, Port regulations require that these are delivered ashore before the ship leaves the port. The necessary arrangements have to be made with the assistance of the agent. There is a number of private companies available which have the necessary permit for such activities given by the Port Authority. Contact Port Duty Officer, Tel: 9474-635, with any questions.

WASTE OIL DISPOSAL: Service for collection of waste oil available, collection by barges and tanker trucks 24 hours. Disposal of sludge residues according to Marpol Annex II. During a pilot project ending December 1991, service is free of charge.

SEAMAN'S CLUBS: Deutsche Seemannsmission, Seemannsheim, Schifferstrasse 55, 2850 Bremerhaven, Tel: 0471 43013. Facilities available include telephone service, money exchange, minibus service, sightseeing, church services, coffee shop, bar, football matches, darts, billiards and table tennis. Annex available at Container Terminal Gatehouse.

CURRENCY: Deutsche Mark (DM).

AUTHORITY: Hansestadt Bremisches Amt Bremerhaven, Der Hafenkapitan, P.O.Box 100469, Steubenstrasse 7 A, 27568 Bremerhaven, Germany. *Tel:* (0471) 9474-600 Port Captain; (0471) 9474-635/6 Harbour Master. *Telex:* 238564 Hba Hk D. *FAX:* (0471) 9474-699. *Contact:* Port Captain/Harbour Master.

(A) GENERAL/ELBEHAFEN/CANAL BERTH
(B) ELBE TERMINAL
(C) BRUNSBUTTEL OIL PORT
(D) OSTERMOOR

(A) GENERAL/ELBEHAFEN/CANAL BERTH

DOCUMENTS:

Health Certificate forms obtainable from River Pilot.
1 Crew List.
2 Personal Effects Lists.
3 Stores Lists.
Bill of Lading.
Ship's Register.

For ships entering locks of Brunsbuttel for transit traffic through Kiel Canal, only ship's register required.

DEEP SEA PILOTAGE: See "General" before first German port, and "Baltic Deep-Sea Pilotage".

PILOTAGE: *Anchorage River Elbe:* See "General" before first German port.

Pilotage Kiel Canal: Pilotage generally compulsory, vessels exceeding 100 m. LOA, 15.5 m. beam, 6.1 m. draft or 105 m. LOA, 15.0 m. beam, 6.1 m draft must employ 2 wheelmen.

Pilot station, Tel: 04852/8088, VHF Channel 9. Pilot is ordered automatically on passage (No cables necessary).

Brunsbuttel Canal Pilot: Pilot boats are painted black with "LOTSE" in white letters on hull. VHF Channel 9.

ANCHORAGES: Vessels waiting for entrance to the Canal may anchor in N.E. anchorage, South anchorage, or Neufeld anchorage. N.W. anchorage only for vessels bound for the next lock.

RESTRICTIONS: No restrictions imposed on night entry. If draft above 31 ft. 2 in. fresh water, vessels will be piloted to Brunsbuttel with flood-tide.

Dimensions of lock: Length 310 m., beam 42 m.

The Canal can be navigated by vessels up to 235 m. LOA and 32.5 m. beam and draft in accordance with table below.

Length (m.)	*Beam in metres* 20	21	22	23	24	25	26	27	28	29	30	31	32	32.5

Height above water-line transiting Canal must not exceed 40 m.

For Binnenhafen, as far as km. 6.00, vessels not requiring to transit Canal may enter with draft up to 10.40 m.

HEALTH: Pratique automatic for vessels entering harbour for loading or discharging, and ships passing through Canal if required and if Health Certificate form does not show any infectious diseases.

RADIO: All messages to Agents and Pilots etc., through Norddeich Radio, call sign "DAN" on VHF Channels 28 and 61. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Brunsbuttel, VHF Channel 14, safety and calling Channel 16.

RADAR: Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Brunsbuttel. Radar Service in the area of Brunsbuttel available, can be contacted through VHF Channel 4, "Brunsbuttel Radar I".

TUGS: 5 tugs available at Brunsbuttel. Vessel's lines used. Tugs normally join vessels bound for the Elbe Harbour on river in vicinity of Canal locks.

From the approach limit up to entry into the lock, tug assistance is mandatory for vessels in Group 6 and also such vessels which manoeuvre only with difficulty. Tugs assisting ships entering locks join vessels on canal-roads.

BERTHING: Ships lying at terminals situated on Canal bank in Inner Harbour should take into consideration that vessels must moor safely, as suction of passing ships may cause breaking of lines.

Binnenhafen: Comprises the area between lock entrance and km. 5.27.

BRIDGES: Ships transiting canal must have bridge clearance of 40 m. Otherwise no obstructions.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary.

MEDICAL: Port Medical Service by Harbour Doctors. Day and night service. Inoculations have to be ordered 24 hours prior arrival. Hospital available at Brunsbuttel.

TANKERS: Elbehafen – Oil Section:

Location: At the Elbe-River bank, about 0.5 nautical miles upstream from Brunsbuttel Canal Locks.

Depth of Water: Within the approaches, 13.50 m., alongside berth 14.70 m.

Max. Ships Dimension Acceptable: Length about 400 m. Beam unlimited. Draft 12.95 m. (Sea Water).

Dirty Ballast/Slop Disposal: By barges or tank truck.

Max. Slop Quantity Acceptable: Contact Agent.

Elbehafen for VLCC's: The safe mooring of vessels up to 250,000 d.w.t. has been proved and has become a matter of routine. Harbour Authorities have no objections to accept larger vessels but investigations have to be made with regard to safe mooring facilities ashore. Tankers with more than 37 ft. draft must arrive 2 hours prior to highwater at Elbe Lanby, in order to dock at Elbe Harbour with slack water or first ebb-tide. Vessels with draft not exceeding 37 ft. may dock during whole ebb-tide. Pilot vessels to be contacted via VHF radio Channels 13 and 16.

Canal Berth:

Location: Inside Kiel Canal Lock at South bank of the Inner Harbour of Brunsbuttel.

Depth of Water: Within the approaches 11.00 m.

Max. Ships Dimension Acceptable: Length 150 m. Beam unlimited. Draft 6.50 m.

BALLAST:

Dirty Ballast Disposal: By barges or tank truck. Contact Agent.

DENSITY: Brackish at Elbe Harbour and inside locks. Average density 1003.

FRESH WATER: Most berths supply by shore installations. Fresh water also available in the Canal locks.

FUEL: All grades available.

Bunker station on South side of Canal are:

Elf – 4 berths.

and on the North side of Canal:

KuBi – Bunker Station – 1 berth, gas oil only.

FIRE PRECAUTIONS: No specific precautions except in Kiel Canal.

CONSULS: All consulates available at Hamburg.

REPAIRS: Only minor repairs can be effected. Big yards and dry docks available at Hamburg.

SURVEYORS: H.Nickel, Theodor-Heuss-Ring 20, D-25541 Brunsbuttel. Tel: (04852) 6829. Fax: (04852) 54326.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary but available day and night if required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ships entering canal and using terminals must have international ship's register. All other certificates should be valid.

CUSTOMS ALLOWANCES: Tobacco, each crew member 200 cigarettes or 50 cigars or 250 grams of tobacco. Surplus will be sealed up by Customs. Wine and/or spirits 1 bottle of spirits and 1 bottle of wine permitted for each crew member. Beer unlimited. Ships transiting canal are not affected.

REPATRIATION: Crew changes can be arranged in connection with local Immigration Office.

AIRPORT: Nearest airport Hamburg, 90 km. away.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: Cargo work can be arranged on every day.

POLICE/AMBULANCE/FIRE: Police Tel: 110 and 6024. Waterway Guard Police Tel: 900-0. Passport Control Tel: 87.262. Customs Tel: 8555. Hospital Tel: 3901. Fire Tel: 112.

TELEPHONES: Public telephones on locks (cards or coins).

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

DANGEROUS CARGO: Ships with dangerous cargo or tankers not gas free have to be reported to the Port Authority 48 hours before arrival.

GARBAGE DISPOSAL: Open and closed containers from 1.1 cu.m. – 26 cu.m. are available. Contact: Stadtereinigung Tiedemann GmbH and Co.KG. Tel: 2076, 2077.

WASTE OIL DISPOSAL: 2 waste oil barges (100 cu.m. – 400 cu.m.) and 2 road tankers (4 cu.m. – 6 cu.m.) available day and night at all berths. Contact: Hans Schramm GmbH and Co.KG. Tel: 8063, 8064. Fax: 87529.

SEAMAN'S CLUBS: The German Mission to Seamen, Kanalstrasse 8, 2212 Brunsbuttel. Tel: (04852) 87252. Fax: 8596. Accommodation, day trips, book exchange, shopping tours, newspapers.

CURRENCY: Deutsch Mark. No restrictions placed on seafarers.

AUTHORITY: Kiel Canal Authority – Wasser-und Schiffahrtsamt Brunsbuttel, Postfach, 25535 Brunsbuttel, Germany. *Tel:* (04852) 885-0. *FAX:* (04852) 885-407 or 885-408.

Harbour Authority: Hafenbehorde Brunsbuttel, Elbehafen, 25541 Brunsbuttel, Germany. *Tel:* (04852) 87044. *Contact:* Captain Tresselt, Port Captain.

(B) ELBE TERMINAL

LOCATION: Elbe Terminal situated outside of locks, quay length 1,100 m.

PILOTAGE: Elbe Pilots also act as docking Pilots at Elbe Terminal.

RESTRICTIONS: For vessels bound for Elbe Terminal, Brunsbuttel, there are no restrictions with regard to length, breadth and height or with regard to day or night entry. Vessels may berth and unberth day or night.

MAX. SIZE: As the fairway of the River Elbe is being dredged, it is not possible to publish any long-term draft values. The max. admissible drafts of the various sizes of vessels intending to navigate on the River Elbe must be enquired of the authorities. The Elbe Pilots will have updated information on the latest depth and draft values.

Depth of water: Oil section: 14.70 m. below chart zero; dry cargo section: 13.70 m. below chart zero. Minimum keel clearance of 3 ft. required. East Basin 4.70 m. below chart zero.

BERTHING: *Dry cargo section:* One gantry crane for handling of bulk cargoes with a capacity of 25 tons and outreach of 45 m.

3 level-luffing cranes for handling of bulk and general cargoes as well as containers. By means of syncronising 2 cranes, heavy pieces up to 45 tons can be handled.

Capacity of these cranes 12/24 tons with an outreach of 40/20 m.

1 mobile crane with a capacity of 20 tons for handling of general cargo.

4 warehouses with a total floor space of 11,800 sq.m. available.

TANKERS: 2 Mannesmann marine loading and discharging units 20 in. diameter with a capacity of 10,000 t.p.h.

The units are driven hydraulically. Connection to the tanker manifolds by hydraulically operated clamps.

One 30 in. pipeline to DEA Tank Storage. Pressure admissibility of the units up to 19 Atu and a temperature up to max. +50°C (Crude oil).

Liquified Gases (Propane): 1 loading/discharging arm 250 mm. diameter, 25 bar, −50°C. 1 vapour return line 100 mm. diameter.

Also see "Regulations".

Mooring:

1. Tankers must be moored with particular care on account of the current, as handling equipment will be engaged for discharging and loading operations and therefore vessels must be moored safely. All lines must be heaved tight and secured to ensure that vessels will be firmly secured at the pier at all times.
2. Tankers exceeding 35,000 g.r.t. must be moored as shown in *Mooring Plan* (See "Plan") it being understood that these are minimum requirements for normal weather conditions.
3. The cross lines (wire ropes with a breaking strength of 120 tonnes) will be provided from the shore and should be belayed on bollards.
4. If at all possible, an additional two cross lines should be provided by the vessel.
5. All lines must be in perfect condition.
6. The winches to be used must be in perfect working order and capable of holding the tensile forces for which they are rated.
7. The crew must be large enough for efficient handling of the lines according to the standards of good seamanship.
8. The Port Authority may insist on calling in additional personnel for vessels not having a large enough crew to handle lines safely and quickly.
9. The Mooring Plan is based on all line systems. If no cross lines are provided from the shore, at least 1 wire rope each must be provided fore and aft by the vessel.

Fire Warp: Once the mooring operations are completed, a sufficiently strong tow-line (wire rope) must be lowered from bow and stern on the offshore side as far down as to the water surface.

Berthing/Unberthing: Tankers may be berthed if the visibility is at least 1 nautical mile.

Tide: The mean range of the tide at the pier is about 2.66 m. (8 ft.). The max. ebb current is 1.75 m. per second, the max. flood current is 1.5 m. per second.

Important:

1. The shore-side loading/discharge swivel arms are equipped with an automatic drift alarms. Should the vessel drift beyond the safety limit, a loud signal will be sounded and all ship-side pumps must be stopped and the lines must be checked.
2. In case of fire the Ship Fire Alarm is as follows:

1 or more whistle blasts, each to be sounded for at least 10 seconds, in addition to sounding the General Alarm. All safety drills and precautions must be observed.

BALLAST: Ballasting of oil tankers during or after discharging into non-gas-free tanks is allowed only up to a volume of 50% of each tank concerned. This does not apply for inerted tanks.

DENSITY: 1003, brackish water.

FRESH WATER: Available at all berths.

FUEL: By barges. All grades available.

GANGWAYS: Shore gangways available; special gangway at hand for VLCCs.

MINIMUM STAFF: During crude oil transfer a minimum staff shall be assigned for safe handling of cargo transfer. For tankers of 3,000 g.r.t. and more, the minimum staff shall be assigned as follows:

1 Deck Officer, 1 Engineering Officer (both familiar with cargo handling).

2 deckhands.

For tankers of 70,000 g.r.t. and more, 2 additional deckhands are required.

TELEPHONE: Ship telephone connections are available at all berths.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

REGULATIONS: *Special Regulations for Gas Tankers:*

1. Gas must only be imported in bulk in tankers, which are suitable for such traffic from the aspects of type of construction, equipment and operation. Gas tankers must conform at least to the stipulations of the Code for the Construction and Equipment of Vessels for carrying liquid gas in bulk (IMO-Res.A.328 (IX)) in the currently valid manner.
2. Gas tankers must carry a certificate issued by their national Ship Safety Authorities or a recognised classification society in which it must be stated that the vessel conforms to the stipulations in point (1) above. This certificate must be presented to the Port Authorities, if requested.

3. For import and discharge of liquid gas, only sea-going tankers are permitted. In this connection, the following quantity limitations per vessel and per individual tank must be respected:

(a) Gas tanker with deep frozen liquid cargo
(atmospheric tanker)
and
(b) Gas tanker with semi-frozen cargo
(semi-pressure tanker)
Max. load per ship = 15,000 cu. m.
Max. load per individual tank = 6,000 cu. m.
(c) Gas tanker with liquid cargo under pressure
(full pressure tanker)
Max. load per ship = 6,000 cu. m.
Max. load per individual tank = 1,000 cu. m.

4. The quantity limitations quoted in point (3) include amounts to be carried onwards for discharge at further ports. If the cargo volume of the vessel or of a loaded individual tank permits an amount of cargo to be carried which is greater than that stipulated in point (3), the port authority must be presented with a written declaration issued by an independent, sworn competent person of authority to the effect that the stipulation quantity limitations have been upheld.

5. The release of cargo vapours for the purpose of reducing pressures and/or temperature adjustment – except in emergency cases – is forbidden.

6. Whilst gas tankers are on the River Elbe no materials like alkine (acetylene), polyine (polyacetylene), allene, kumulene, MAPP gases, may be carried on board as cargo. ("Rules for the Protection of Nuclear Power Stations against Pressure Waves Resulting from Chemical Reactions" dated 1st August, 1976).

7. Vessels to dock against ebb tide with port side to. In case this requirement cannot be fulfilled due to an eventual delay during the river passage or any other unforeseeable reasons, a turning manoeuvre in a position East of the berth must be prevented (i.e. acceptance of additional tugs).

8. A wireless telephone connection is to be established between the security vessel and the personnel on the jetty, and the fire-fighting centre and the vessel. The wireless telephone connection must secure a duplex communication. Furthermore a wireless telephone communication must be established in good time prior to vessel's berthing.

9. Sufficient and suitable mooring personnel must be arranged for mooring and unmooring. The number of crew must be large enough to secure a quick and safe mooring manoeuvre. The local Harbour Authorities can order the acceptance of additional suitable personnel for this purpose.

10. The vessel must be tied up at the Elbe Harbour in such a way that a parting of the moorings (breaking, melting, burning) may not occur. At least 3 head lines, 3 stern lines, 1 fore spring and 1 after spring are to be made fast. At least 1 head line, 1 stern line and 1 spring MUST be of steel wire construction.

11. For berthing and unberthing at the Elbe Harbour Quay in way of the fire-fighting monitors at least two tugs must be accepted. The engine capacity of the tugs must be sufficient to assist the vessel in all wind, current and ice-conditions. The engine capacity of each tug must be at least 1,600 h.p. Vessels of less than 3,000 g.r.t., equipped with a working bow thruster may unberth with one tug less, weather permitting.

12. While discharging, the passing traffic is to be observed. In case a vessel comes too close, gas discharging/loading is to be stopped.

13. While handling gases, bunkering is not permitted.

14. LPG/Carriers may not be berthed at the Elbe Harbour together with laden or non-gas-free, non-inerted tankers, whose last cargo had a flash-point of below 61°C.

15. No vessels may make fast alongside a gas tanker while handling cargo.

16. During extreme meteorological circumstances (thunderstorms, hurricanes) the handling of liquid gas is to be stopped.

17. The vessel has to leave the berth immediately upon completion of cargo operations.

AUTHORITY: *Port Operator:* Hafengesellschaft Brunsbuttel GmbH, Dr. Pfeiffer Strasse, Elbehafen, 25541 Brunsbuttel, Germany. *Tel:* (04852) 8840. *FAX:* (04852) 88426. *Contact:* Carl Hagemann.
Port Authority: Hafenbehorde Brunsbuttel, Elbehafen, 25541 Brunsbuttel, Germany. *Tel:* (04852) 87044.

(C) BRUNSBUTTEL – Oil Port

LOCATION: Oil Port situated on North side of Kiel Canal at km. 3.5.
PILOTAGE: See Section (a). Canal Pilots also act as Docking Pilots.
ANCHORAGE: Anchoring near the compressed-air barrier is prohibited. The location of the barrier is indicated by rings with the inscription "Preβluftsperre".
MAX. SIZE: Max. allowed dimensions of vessel between the figure values (draft and beam) can be interpolated.

Max. Draft	*Max. Beam*
10.40 m. (34 ft. 2 in.)	27.00 m. (88 ft. 7 in.)
9.50 m. (31 ft. 2 in.)	29.00 m. (95 ft. 2 in.)
8.00 m. (26 ft. 3 in.)	32.50 m. (106 ft. 7 in.)

Max. LOA 235 m. (771 ft.)

Ships passing Kiel Canal: See "Restrictions" Kiel Canal.

BERTHING:
Berths: 3 berths (Nos. 6, 7 and 8) for tankers up to 10.40 m. (fresh water) draft.

2 berths (Nos. 4 and 5) for tankers up to 6 m. (fresh water) draft.
Oil Handling Facilties: Hoses of 6 in., 8 in. and 10 in. for handling of crude oil, diesel oil, gas oil, gasoline, tuluol, xylol and lub oil.
Mooring: Tankers are required to be moored at least by 1 steel wire fore and aft. The steel wire may be covered.
Restrictions: During loading and ballasting operations, it shall be ensured that a vapour/air mixture pressed out of the tanks is no longer flammable or toxic outside the port area. In order to achieve this without continuous checking, the pumping rate is fixed at 800 cu.m./hour maximum. Bridge 8 is equipped with vapour return line. In case of loading benzene, vapour return line must be connected to ship's manifold.
Minimum Staff: During cargo transfer a minimum staff shall be assigned for safe handling of cargo transfer. For tankers of 3,000 g.r.t. and more, the minimum staff shall be assigned as follows:
1 deck officer familiar with cargo handling.
1 engineer officer familar with cargo handling.
2 deck hands.
Fire Precautions: Fire hoses must be laid out and connected to fire line, which has to be under pressure during all cargo operations.

Fire wires must be paid out to the water level fore and aft.

1 lifeboat must be swung out into an embarkation position in order to provide an additional emergency escape.
Dirty Ballast Disposal: By barges or tank truck.
DENSITY: 1003.
FRESH WATER: Available at all berths.
FUEL: By barges. All grades available.
GANGWAYS: Shore gangways available.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.
AUTHORITY: Operator of cargo handling facilities:
DEAA Mineraloel AG, Ostermoorer Str., 25541 Brunsbuttel, Germany. *Tel:* 2011. *Telex:* 028314.

Port Operator: Hafengesellschaft Brunsbuttel GmbH, Elbehafen, 25541 Brunsbuttel, Germany. *Tel:* 8840. *Telex:* 028347 eport d.

Port Authority: Hafenbehorde Brunsbuttel, Elbehafen, 25541 Brunsbuttel, Germany. *Tel:* 87044.

(D) OSTERMOOR

LOCATION: Kiel Canal Km. 5.66 (South Side).
PILOTAGE: See Section (a). Canal Pilots also act as Docking Pilots.
RESTRICTIONS: If passing through Kiel Canal, see "Restrictions" in Section (a).
MAX. SIZE: LOA 235 m. (771 ft.).

Max. draft	*Max. beam*
10.40 m. (32 ft. 02 in.)	27.00 m. (88 ft. 07 in.)
9.50 m. (31 ft. 02 in.)	29.00 m. (95 ft. 02 in.)
8.00 m. (26 ft. 03 in.)	32.50 m. (106 ft. 07 in.)

BERTHING: Berth Nos. 1, 2 and 4: Also see "Table" opposite.
Port Operator: Hafengesellschaft Brunsbuttel (PO).
Operator of Cargo Handling: Norsk Hydro Agrar (NHA).
Immigration Clearance: Will be carried out on board.
Customs Clearance: No freeport. Customs clearance will be carried out on board.
Tug Assistance: According to assignment of Port Authority.
Mooring: The use of constant tension winches is prohibited (Berth Nos. 2 and 4 only). Port Authority will allocate berth where the exact position alongside berth will be advised by NHA. The Master is responsible for safe mooring. Additional mooring may be requested by Port Authority responsible (NHA).
Drinking Water: Available at Berth Nos. 1, 2 and 4 against payment (PO).
Steam and Nitrogen: Steam at No. 2 Berth and nitrogen at No. 4 Berth available from ashore.
Bunker Supply: By barges only. The Port safety regulation must be observed (Northern Basin).
Ship Repairs: Permission of NHA required.
Electricity Supply: No connections available.
Garbage Disposal: Available (PO).
Dirty Ballast Disposal: By barges or tank truck.
Navigating into the North Basin: (Direction by NHA) – only after stop of cargo operations at Berth No. 4.
Gangways: At Berth Nos. 2 and 4 gangways are at hand (NHA). At Berth No. 4 and at waiting place a lifeboat has to be ready at the accommodation ladder on the offside during cargo operations.
Stop of Cargo Operations in Case of Emergency: At the sound of the signal "stay away" (· –) and fire (– – –) by loudspeaker; at the instructions given by telephone or loudspeaker; when the flashing light is in operation; at the release of the disconnection couplings; in case of fire on board.
Fire on board: The Port Supervisor of NHA has to be informed immediately. Cargo operations have to be stopped immediately. Ship has to give usual whistle – Fire signal ("F").
Cargo Stop in Case of Bad Weather: Berth No. 1: rainfall, windspeed greater than 22 m./sec.; Berth Nos. 2 and 4: windspeed greater than26 m./sec. Disconnection at windspeed greater than 22 m./sec.
ETA Messages: 72 hours prior to arrival to NHA via Agent with the following information: (1) Ship's name and call sign; (2) Arrival time; (3) Cargo (product and quantity); (4) Tankers: number and diameter of cargo manifold connections; (5) Any damage to hull, tanks or overboard valves. Vessels are dispatched according to accepted ETA. In any case ETA has to be repeated 48 hours and 24 hours before arrival.
Dangerous Cargoes: Ships with dangerous cargoes or tankers which are not gas-free must be reported to the Port Authority 48 hrs. before arrival.

Ships requested to accomplish the Oil Liability Agreement (more than 2,000 tons oil onboard) must be in possession of a valid Oil Liability Certificate.

Remarks: *reduced discharge rate at higher cargo temperature; †only possible in exceptional cases (discharge); ‡at following conditions: P min=3 bar, T min=+55°C. Viscosity max.=35° E/+55°C; §Compulsory during loading/discharging at Berth No. 4

Regulation Covering the Transport of Ammonia through the Kiel Canal: In the North Sea – Baltic Canal, liquid ammonia (U.N.No. 1005) may be transported in such vehicles as fulfil the following maritime police stipulations:

1. For the vehicle, an IMO suitability certificate for the transport of ammonia must be issued in accordance with the IMO Code, Resolution 328-IX (new vessels), Resolution 329-IX or for existing vessels.
2. The loading system must be so dimensioned that at an outside air temperature of +25° Celsius and 20° Celsius for water the load can be maintained for an undetermined duration without ammonia vapour being blown out via the safety valves.
3. The re-liquefication plant of the vehicle must have available a reserve capacity of at least 50 per cent of the power normally required for ship's operation, in the event that ammonia is being transported, so that in the event of an accident, including damage to the insulation, heavily vapourised contents of a tank can be safely re-liquefied.
4. On vessels with tank insulation which is not of the water repellant kind (e.g. glass or mineral wool), watertight longitudinal bulkheads must be available at a distance of 760 mm. from the outer skin.
5. The loading tanks of available ships must have a clearance of at least 760 mm. from the outer skin side.
6. Vessels with a loading capacity of up to 12,000 cu.m. must be equipped in addition to the requirements of section 1 with independent loading tanks of type B or C (spherical or cylindrical). The adjustment pressure of the safety valves (MARVS) must amount to at least 0.7 bars over pressure.
7. The fulfilment of the stipulations set out in Section 1, numbers 2 to 5 and in Section 2, in so far as they are necessary, must be supported by a certificate issued by a recognised Classification Society.
8. The IMO – suitability indication in accordance with Section 1 and the certificate as per Section 7 must be kept on board the vessel.

Oil tankers of more than 2,000 d.w.t. must be in possession of a valid Oil Liability Certificate.

Cargo Handling at Berth Nos. 2 and 4: Before starting cargo operations following measures are to be taken:

Confirmation of Checklist by vessel's command.
Cargo tank inspection by NHA.
Referring to "Operation plan" by NHA.
Connection of ground-wire.
Emergency towing wires (steel) must be provided at water level (Berth No. 4 only).
Installation of telephones.
Gas detectors handed on board (Berth No. 4 only).
Fire hoses must be laid out and connected to fireline, which has to be under pressure during all cargo operations (Berth No. 4 only).

Connection and disconnection of loading arms will be done by NHA personnel.

Watchmen: During cargo operations a watchman has to be on standby at manifold. In case of an emergency, vessel's pumps and stop valves must be able to be shut down immediately.

Minimum Crew during Cargo Transfer Operation at Berth No. 4:
1 Deck Officer } fully qualified in
1 Ass. Eng. Officer } cargo transfer operations
2 Deckhands
1 Watch Officer for duties other than cargo transfer.

Berth No. 5: *Berth Operator:* Bayer AG.
25536 Brunsbuttel, Post Box 1310. Tel: (04852) 81-01. Telex: 28301. Fax: 813314.

Loading and unloading by day and by night.
Max. permitted draft 7.0 m.

ETA Messages: 48 hours prior to arrival at Bayer AG, the following information is to be reported via the Agent:

1. Ship's name and call sign.
2. Time of arrival.
3. Cargo (product and quantity).
4. Number and diameter of ship's hose connections.
5. Any existing damage to hull, tanks or pipelines.
6. Distance of ship's hose connections from bow and stern.

In each case, ETA must be repeated 24 hours prior to arrival.

Report: Vessels with hazardous cargo or tankers which are not gas-free must be reported 48 hours prior to arrival to the Port Authority in accordance with Sections 8 and 9 of the Port Safety Code (HSVO).

Certificates: Vessels which come under the Oil Liability Agreement (more than 2,000 tons of oil onboard) must carry on board a valid Oil Liability Certificate.

Discharge: Prior to discharge, the following measures are necessary:
Telephones to be handed over.
Inspection of holds and cargo by Bayer AG.
Instructions as to plan of operation by Bayer AG.
Connection of ground wire.
Emergency towing wires to be rigged to the water line, fore and aft.
Adequate firefighting hoses to be laid out on deck and maintained under pressure throughout the discharge operation.
Confirmation of the Check Lists by ship's officers.
Connection and disconnection of hose is carried out by Bayer personnel.

IMPORTANT

During discharge, the hoses at the ship's manifolds must be continuously monitored. In the event of an emergency, the ship's pumps and cut-off equipment must be able to be shut down immediately and closed. On board the vessel, adequate crew members must at all times be present to be able to combat a major accident.

Minimum Crew Required During Discharge (Tankers over 3,000 g.r.t.):
1 Deck Officer } fully qualified in
1 Eng. Officer } cargo transfer operations
2 Deckhands
1 Watch Officer for duties other than cargo transfer.

Port Details:

Passport control:	Carried out on board.
Customs:	No free port facilities. Customs clearance takes place on board.
Tug assistance:	In accordance with the Port Authority Regulations.
Berthing:	Port Authority indicates the berth to be used. Bayer AG indicates to vessels the precise discharge and loading positions. Masters are responsible for carrying out such instructions, and proper mooring. Bayer AG or the Port Authority may call for mooring lines to be strengthened. Where automatically working constant tension winches are concerned, brakes must be fitted.

Bunkers: Only available from bunker barge with due observance of Section 24 of HSVO.

Ship's repairs: Only with permission of Bayer AG and formal approval by the Port Authority (sections 23/2, 26 (1) of HSVO).

Electrical land connections: Not available.

Discharge of dirty ballast water: Not possible in the port.

Quay charges: To be paid by the ship, unless otherwise agreed in the charter party.

Shore leave: Available. Ship's officers are responsible for supervision.

Lifeboat: A lifeboat must be swung out ready for use (Section 25 HSVO)

Loading and Discharging Equipment:

Products: Aniline, formaline, sodium lye and sulphuric acid.

Discharge capacity: 4 × 200 cu.m/hr. (10 bar).

Hose connection: 4 hoses DN 150/PN 40/25-flange with union as per DIN 2556.

For receipt of loading slops/ MARPOL II: 1 hose DN 100/PN 40/25.

Working reach of hose crane: Height in relation to normal water level upwards. ±0 up to 10.0 m.

Crossways in relation to the fender main wall in the direction of water side. 0.0 up to 3.5 m.

Other berth equipment: 6.0 m. aluminium gangway.

Public telephone connection by payment of charges involved. Public call number of the Port Operator is 884 – 0.

Loading of ship's stores possible in accordance with arrangements to be made with Bayer AG using a pier derrick up to a max. of 500 kg. with the ship responsible for charges involved.

Berth No. 6:

Berth Operator: ELF-Bitumen-Werke GmbH & Co., 25541 Brunsbuttel-Ostermoor. Tel: (4852) 8880. Telex: 28313 elfbrb d.

ETA Messages: 72 hours prior to arrival to ELF via Agent with the following informations:

1. Ship's name and call sign.
2. Time of arrival.
3. Cargo (product and quantity).
4. Number and diameter of cargo manifold connections.
5. Any damage to hull, tanks or overboard valves.
6. Distance of manifold connections to bow and stern.

Vessels are dispatched according to accepted ETA.

ETA has to be repeated 48 hours and 24 hours before arrival.

Report: Ships with dangerous cargoes or tankers which are not gas free have to be reported to the Port Authority according to paragraph 8 and 9 of Port Safety Code (HSVO), 48 hours before arrival.

Certificates: Ships requested to accomplish the Oil Liability Agreement (more than 2,000 tons oil onboard) must be in possession of a valid Oil Liability Certificate.

Loading and Discharging Installations:	*Product*	*Crude*
Discharging Rate	—	2,000 cu.m./h. 16 bar
Loading Rate	400 cu.m./h. 16 bar	—
Loading Arm Flange (No. and size) (Loose flange with collar acc. DIN 2656/PN40)	1 hose DN 200/PN25	1 loading arm 3 hoses DN300/250/200 DN200/PN25 DN150/PN25
Working Range of Shiploader/Unloader (Height refers to normal water level upwards)	—	+00.30 m. to +17.00 m.
(Outreach refers from dolphin vanishing line towards ship's offside)	—	00.00 m. to 09.00 m.
Further Equipment at Berth: Service limits of installed gangways (Height refers to normal water level/top edge deck)	12 m. gangway	
Public telephone connection against payment	Public telephone No. (4852) 888 186	
Public telephone No. of harbour 884-0 (PO)		
Delivery of goods from shore possible after request to ELF	By ship's gear	

Depth: Depth alongside Berth No. 6 – 12.0 m.

Cargo handling: Before starting cargo operations following measures are to be taken:

Installation of telephone.

Confirmation of Check list by vessel's command.

Tank and cargo inspection by ELF.

Referring to "Operations Plan" by ELF.

Connection of ground wire.

Emergency towing wires (steel) must be provided at water level.

Fire hoses must be laid out and connected to fireline, which has to be under pressure during all cargo operations.

Connecting: Connection and disconnection of leading arm/hoses will be done by ELF personnel.

Watchman: During cargo operations a watchman has to be on stand-by at manifold. In case of emergency vessel's pumps and stop-valves must be ready for immediate shut down sufficient crew for warding off emergency must be onboard at all times.

Minimum Crew during Cargo Transfer Operation (Tankers 3,000 g.r.t.):

1 Deck Officer } fully qualified in
1 Ass. Eng. Officer } cargo transfer operations
2 Deckhands
1 Watch Officer for duties other than cargo transfer.

Gangways: Available. Supervision on behalf of Master. A lifeboat has to be ready at the accommodation ladder on the offshore side.

Stop of Cargo Operations in Case of Emergency: At the sound of the "emergency-stop" horn. At the instructions given by berth watchman. In case of fire onboard.

Fire Onboard: The berth watchman of ELF has to be informed immediately. Cargo operations have to be stopped immediately. Ship has to give usual whistle – Fire signal ("F").

Cargo stop in case of bad weather: Windspeed greater than 26 m./sec. (Connection and disconnection at windspeed greater than 22 m./sec.

AUTHORITY: Port Authority (PA): Hafenbehorde Brunsbuttel, 25541 Brunsbuttel, Elbehafen. *Tel:* 87044 – Area Code 4852.

Port Operator (PO): Hafengesellschaft Brunsbuttel mbH, 25541 Brunsbuttel, Elbehafen. *Tel:* 8840 – Area Code 4852. *Telex:* 28347 Eport D. *Fax:* 88426.

Operator of the Cargo Handling Facilities (NHA): Norsk Hydro Agrar, 25541 Brunsbuttel, P.O.Box 1268. *Tel:* 82-1 – Area Code 4852. *Telex:* 28360 nagb. *FAX:* 82400.

BUSUM: 54.08 N., 08.51 E.

PORTS LIMITS: The seaward boundary is a line between the Southern extension of the breakwaters.

DOCUMENTS:

1 copy Crew List.
1 copy Provisions and Bonded Stores List.
1 copy Personal Effects List.
1 copy Health Certificate.

APPROACHES: Entry is through "Suderpiep" Ship Channel, marked according to "IALA-Maritime Buoyage System" (Red to port).

The distance from the Fairway Buoy to Busum Port is 19 nautical miles.

The channel into the port is marked by leading lights (ISO, white, 4 sec.), bearing 355.1°.

PILOTAGE: Not compulsory but recommended. To obtain a Pilot, contact vessel's Agent at least 6 hours prior to arrival at Suderpiep entrance.

ANCHORAGES: Anchorage can be obtained in the roadstead South of port entrance.

RESTRICTIONS: Minimum keel clearance at anytime is 0.5 m.

In the port area, anchors are only allowed to be dropped for navigational reasons.

Note: Due to strong tidal streams, care must be taken on arrival when passing breakwater during rising tide. The Inner Harbour is closed by a flood barrier when water level reaches 0.30 m. above high water.

MAX. SIZE: Draft is not to exceed 6.70 m. at H.W. and 3.50 m. at L.W.

The beam of vessels entering the Inner Harbour is not to exceed 21.0 m.

HEALTH: Pratique automatic for vessels entering port if Health Certificate does not show any infectious diseases.

RADIO: Cable Agent via Norddeich Radio (Call sign DAN), and advise ETA 24 hours prior to arriving at port.

VHF: Busum Port Radio, situated at Lock Tower, operates on Channels 16 and 11.

TUGS: Available in Cuxhaven or Brunsbuttel, contact Agent if tug assistance is required.

BERTHING: No particular restrictions except vessels in distress, carrying explosives or not gas-free. In these cases, special permission of Port Authorities required before entering.

Outer Harbour: 175 m. length, 90 m. width and 6.0 m. depth at LW.

Inner Harbour:

Basin I: 160 m. length, 20 m. width and dry at LW.
Basin II: 420 m. length, 50 m. width and 3.0 m. depth at LW.
Basin III: 500 m. length, 80 m. width and 4.0 m. depth at LW.
Basin IV: Contains only a pleasure craft jetty with 150 berths.

CARGO HANDLING FACILITIES: Outer Harbour Basin: One concrete ramp (width 11.5 m. – 4.5 m.) and one movable Ro-Ro ramp (width 6.3 m. – 12.6 m., capacity 100 tons).

Basin II: One shiplift for ships up to 50 m. LOA, 9.0 m. beam, 4.0 m. draft and 400 tons total weight.

One slipway for pleasure craft and 3 coastal passenger berths.

Basin III: One floating dock for ships up to 100 m. LOA, 13.0 m. beam, 5.5 m. draft and a total weight of 2,200 tons.

One grain elevator, capacity 120 t.p.h. and another 200 t.p.h.

Several grain stores with 85,000 tons total capacity.

One icemaking plant for fishing vessels.

One cold store for fishing vessels.

One passenger berth for coastal vessels.

MEDICAL: Doctors and hospital available.

DENSITY: 1019.

FRESH WATER: Available.

FUEL: Fuel oil (MD only) and lub oil available.

REPAIRS: All types of ship and machinery repairs are possible.

All necessary surveys can be carried out.

CUSTOMS ALLOWANCES: The allowance for 3 days is 200 cigarettes and 1 litre of spirits.

REPATRIATION: Repatriation and/or crew changes can be effected.

AIRPORT: International airport at Hamburg is served by regular airlines. Distance 150 km. (80 miles).
SHORE LEAVE: Permitted.
GARBAGE DISPOSAL: Garbage from galley and pantry can be delivered into small containers.
WASTE OIL DISPOSAL: Slop delivery possible, arranged by vessel's Agent.
AUTHORITY: Amt fur Land- und Wasserwirtschaft, Berliner Strasse 19, Postfach 1640, 25736 Heide, Germany. *Tel:* 0481-921, after hours 04834-2183. *FAX:* 0481-92330.

Harbour Master's Office, Am Fischereihafen, 25761 Busum, Germany. *Tel:* 04834-3607, after hours 04834-2183. *FAX:* 04834-2068.

BUTZFLETH: 53.39 N. 09.31 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Bonded Stores Lists.
3 Crew Manifests.
Maritime Health Declaration.
Ship's Register.
Discharge Books.
Passports of Crew.
Gas Free Certificate (OBO-Carriers)

Butzfleth is not a free-port. Customs, Immigration and River Police board on arrival at berth.
DEEP SEA PILOTAGE: See "General" before first German Port, and "Baltic Deep-Sea Pilotage".
PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.
Pilotage River Terminal: Elbe Pilots also act as docking Pilots.
ANCHORAGE: Freiburg Anchorage, approx. position Lat. 53° 50.6' N., Long. 09° 19.5' E., depth of water up to 13 m. below chart zero; there are further anchorages for small vessels at Krautsand – and Twielenfleth Roads. (See "General" before first German Port.)
MAX. SIZE: Berth No. 1 (Inner): LOA 155 m. Max. draft 9.0 m.
Berth No. 1 (Outer): LOA 270 m. Max. draft 14.0 m.
Berth No. 3: LOA 160 m. Max. draft 9.0 m.
Also see "Berthing".
RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port, but no special Port Radar Service for Butzfleth. Radar Service in the area of Butzfleth available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio" and/or VHF Channel 5, "Steindeich Radar Radio".
RADIO/VHF: All messages to Agents and Pilots, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships' reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.

Pilot boat at Elbe Lanby can be contacted on VHF Channels 13 and 16.
TUGS: 4 tugs compulsory for mooring and unmooring. To be ordered from Hamburg and Brunsbuttel through Agent.

A fire fighting tug (1,760 hp) is available 24 hours and can be reached via VHF Channel 16, also available for assistance to vessels.
BERTHING:
Aluminium Oxid Stade GmbH. (AOS): This bauxite/oxide plant, situated on the Westbank of the River Elbe, can be reached by vessels with max. draft of 46 ft. 06 in. FW.

Quay length		*Depth at normal Low water*
Quay outside in total	325 m.	15 m. (49 ft.)
Within reach of crane	205 m.	
Quay inside	200 m.	7 m. (23 ft.)

The oxide produced at this plant, apart from being exported, is used for the mills of V.A.W. Elbewerk GmbH., Stade-Butzfleth and of Hamburger Aluminium Werk GmbH., Hamburg Finkenwerder.

Average discharging/loading rate	
West African bauxite	550–600 m.t.p.h.
Brazilian bauxite	600 m.t.p.h.
Australian bauxite:	
from Gove	550–600 m.t.p.h.
from Weipa	750 m.t.p.h.
Petcoke	100–400 m.t.p.h.
Oxide ("Spout" loading)	500 m.t.p.h.

Ship's telephone connection (4146-1453) at AOS pier.
Dow Deutschland Inc.: This industry, situated close to the AOS plant, offers 2 berths for gas and chemical tankers. The water depth at the outside quay is: 15 m. (49 ft.) and at the inside quay: 9 m. (29 ft. 6 in.), both at MLW.

Restrictions for ships	*Products*	
	Inflammable	*Non Inflammable*
Length at quay outside	270 m.	300 m.
Length at quay inside	155 m.	155 m.
Draft at quay inside (FW)	9.0 m.	9.0 m.
Beam at quay inside	25.0 m.	25.0 m.

No bunkering permitted at the DOW-berths.

Discharging rate liquid gas	approx 200 t.p.h.
Loading rate chemical products	100–800 t.p.h.

Max. Size: Vessels loading/discharging inflammable products: Max. length 270 m. Max. draft 14 m. Also see "Max. size".

Vessels loading/discharging non-flammable products: Length unlimited. Max. draft 14 m.

Vessels with liquid gas and flammable products: Berth 1: Max. length 155 m. Max. draft 9.0 m. Max. breadth 25 m. Berth III: Max. length 160 m. Max. draft 9.0 m. Max. breadth 28.0 m.

Restriction: Mooring prohibited for vessels having IMO Class 2 products (liquid and/or gaseous) on board.

Simultaneous handling of gases inside and flammable products outside not permissible.
Manifolds: Upriver to downriver.

Inside		Outside
Berth I	Berth III	Berth I
Methanol	NAOH	P.O.
Telon/Vidden	Formalin	Per
P.D.C.	Anilin	P.G.I.
P.O.	MDI	Tet
Propylene	Phenol	Chlorothene VG/NU
Ethylene	Tet	EDC
	Chloroform	NAOH
		Methylene Chloride
		Tricholoroethane
		Chloroform/ Methanol
		Beta-Tri (112 TCE)

Supplies: Nitrogen and potable water.
Technical requirements on ships discharging C2/C3:

Ethylene: For loading arm horizontal clearance ships manifold to the nearest structure 2.10 m., vertical clearance from centre of manifold up 0.50 m. and down 0.60 m., flange 6 in. (300 ASA) discharge-temperature of Ethylene minimum −103°C.

Propylene: For loading arm horizontal clearance 2.20 m., vertical up 0.50 m. and down 0.50 m., flange 6 in. (300 ASA), discharge-temperature of Propylene maximum −20°C.

Further on Propylene, vessels to be guaranteed, that the vessels in Summertime are suitable for pump against a back pressure of minimum 13 kg. but preferably it should be 15 kg./16 kg.
MEDICAL: Hospital and doctor available.
FRESH WATER: Available.
FUEL: Supplied by barge from Hamburg or local supplier.
REPAIRS: Minor repairs can be carried out.
SERVICES: Stevedores, hold cleaning, boatmen, mooring gangs, inspectors, fitters and launches.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.
GARBAGE DISPOSAL: Service available. Contact agent or Port Authority for details.
WASTE OIL DISPOSAL: Service available through Glusing Transport GmbH. Tel: 04721 24017. Fax: 04721 61924. Only by barge, capacity 800 tons, at anchorage.
SEAMAN'S CLUBS: Seaman's Club Oase, Tel: 04146 1233. Facilities include shop, telephone service, church service, games, postage facilities.
CURRENCY: Deutsche Mark (DM).
AUTHORITY: Niedersachsisches Hafenamt Cuxhafen, Aussenstelle Butzfleth, 21683 Stade, Germany. *Tel:* (04146) 1436. *Telex:* via 218158 clear d. *Cables:* NHC – A. Butzfleth. *FAX:* (04146) 1036.
Contact: F.W. Bork, Manager. Captain W. Schroeder, Harbour Master.

CUXHAVEN: 53.52 N. 08.42 E. (See Plan)

DOCUMENTS:
Stores List.
Crew List.
Customs Manifest.
Derat Certificate.

Amerikahafen is a Customs free port.
DEEP SEA PILOTAGE: See "General" before first German Port, and "Baltic Deep-Sea Pilotage".
BALTIC PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.
PILOTAGE: Pilot station situated in Old Harbour (Alten Hafen). To obtain Pilot call "Cuxhaven Port", VHF Channel 12. Pilot signal is flag "G" of International Code, or sound signal – 2 long and 1 short blasts.
ANCHORAGE: Available off Cuxhaven Medem Roads, approx. position Lat. 53° 51.5' N., Long. 08° 46.5' E., depth of water about 6 m. – 12 m. below chart zero; further anchorages see "General" before first German Port.
RESTRICTIONS: Vessels can enter by day or night. No tidal restrictions.
Depths: Max. depth of water: 13.5 m. (45 ft.). Mean tide HW: NN+1.40 m. Mean tide LW: NN−1.50 m. Tide range is 3.20 m. (from +1.55 m. to —1.65 m.) (NN = approx. mean sea level).

Water depth in the basins up to 8.5 m. below MTLW. Water depth at the river quays 12 m. and 8 m. below MTLW.
HEALTH: Quarantine clearance effected at Cuxhaven. Only vessels with suspected infectious disease on board are detained.
RADIO: For ETA, etc., use Norddeich Radio, call sign DAN. Closer to port Elbe–Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Cuxhaven, VHF Channel 12, safety and calling Channel 16.

RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Cuxhaven. Radar Service in the area of Cuxhaven available, can be contacted through VHF Channel 21, "Cuxhaven Radar Radio".

TUGS: Tugs available and used depending on ship size and weather conditions. Cost of tugs is Hamburg Tariff plus 20%.

BERTHING:

Fahrhafen and Neue Seebaderbrucke: Modern multi-purpose Ro/Ro terminal for passengers and for handling of motor vehicles and cargo direct at the Elbe River, 300 m. quay with 8 m. depth below MTLW.

Starting point of ferries for the North Sea and the Baltic Sea, for passenger ships to Helgoland.

Ro/Ro linkspans (one of them for axle-loads up to 50 tons and for stern-door width up to 18 m.). Hard-standing and storage area of approx. 60,000 sq.m.

Alter Hafen: Multi-purpose harbour for shipyards and for boats to the seaside resorts and islands.

Alter Fischereihafen: Multi-purpose harbour with transhipment and outfitting quays for fishing cutters, offshore base and emergency port. Fish auction and fish handling sheds, fish industry, equipment firms, deep freeze house for 5,000 tons of goods.

Neuer Fischereihafen: Multi-purpose harbour with transhipment and equipment quays for trawlers and luggers, offshore suppliers, Ro/Ro ships, for ships carrying general cargo and for minor bulk cargo ships. Fish auction and handling sheds, fish industry, equipment firms, deep freeze house for 25,000 tons, ice production, open storage space.

Entrance and exit any time by the sea-lock. Length of lock 190 m., width of lock 24 m. and depth of lock is 9 m. below MTLW.

Amerikahafen: Multi-purpose harbour with transhipment and equipment quays for ships carrying general cargo and for minor ships carrying bulk cargo, emergency port, floating docks, transit shed, deep freeze house, open storage spaces.

Steubenhoft: Multi-purpose facility for big ocean vessels with 400 m. long quay and 14 m. water depth below MTLW. Usable for cargo, repair, trial trip and passenger ships of all sizes.

CRANES:

8 portal cranes	1.5 – 10 tons capacity
1 loading bridge	8 tons capacity
1 crane for heavy loads	50 tons capacity
Various mobile cranes up to	20 tons capacity

Equipment also available to handle containers and Ro/Ro traffic.

MEDICAL: Doctors and hospitals obtainable day and night.

FRESH WATER: Available from shore pipeline up to 50 t.p.h. Small quantities up to 15 tons may be obtained in Roads from bunker barge. There are no water barges.

FUEL: Bunker and gas oil available. Small quantities, up to 150 tons, may be obtained anytime. Otherwise according to conditions of supplying oil company.

FIRE PRECAUTIONS: No special restrictions. Ships with explosive cargo and liquid cargoes of danger Class K1 and K2 not allowed in Cuxhaven Harbour.

CONSULS:

Denmark, Tel: 38021.
Iceland, Tel; 36036/37.
Others at Hamburg/Bremen.

REPAIRS: All deck and engine repairs possible.

DRY DOCKS: Floating dock for vessels up to 140 m. length.

SURVEYORS: Germanischer Lloyd, Leuchtturmweg 3, D-27472 Cuxhaven. Tel: (04721) 36018. Fax: (04721) 36019.

CARGO HANDLING: A harbour for overseas ferries up to 150 m. length with Ro/Ro and container equipment.

GANGWAY/DECK WATCHMEN: Not obligatory, at Master's discretion.

OPENING/CLOSING HATCHES: Normally performed by crew. Stevedores must be paid if required to do this work.

CUSTOMS ALLOWANCES: 40 cigarettes, 1 bottle spirits and 2 bottles wine.

REPATRIATION: All facilities available.

AIRPORT: Hamburg-Fuhlsbuttel, 130 km. away; Bremen, 110 km. away.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: New Year's Day, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day. Loading/unloading can be arranged on these holidays.

POLICE/FIRE/AMBULANCE: Police, Tel: 110; Harbour Police, Tel: 22072; Ambulance, tel 23125; Fire, Tel: 112.

TELEPHONES: At Steubenhoft and in the ferry harbour, telephones can be put on board.

SERVICES: Compass adjusting and radio repairs.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Machulez Transport GmbH, Baudirector Hahn Strasse, D-27472 Cuxhaven, Tel: (04721) 21300, 22095. Fax: (04721) 26131.

Peter Plambeck, Am Lagerfeld 1-3, D-27472 Cuxhaven, Tel: (04721) 21014, Fax: (04721) 25404.

WASTE OIL DISPOSAL: Cuxhavener Schiffs-Entsorgungs-GmbH, Kapitan-Alexander-Strasse 48, D-27472 Cuxhaven, Tel: (04721) 25076, Fax: (04721) 27370.

SEAMAN'S CLUBS: Deutsche Seemannsmission (German Seamen Mission), Gruner Weg 25, D-27472 Cuxhaven, Tel: (04721) 36122.

DEVELOPMENTS: A new multi-purpose terminal is to be available (3 berths for vessels up to 350 m. LOA and 48 ft. draft; 2 smaller berths with 200 tonne Ro/Ro ramps and cranes up to 50 tonnes).

AUTHORITY: Niedersachsisches Hafenamt Cuxhaven, Am Schleusenpriel 2, P.O.Box 526, D-27472 Cuxhaven. *Tel:* (04721) 50140. *Telex:* 232167 Hacux d. *FAX:* (04721) 501488/89.

DUISBURG-RUHRORT: 51.25 N. 06.46 E. (See Plan)

LOCATION: Duisburg-Ruhrort port area, together with Hochfeld, covers a total surface of 870 hectares on the right bank of the river between the Rhine km. 774 and 781, the Ruhr channel – 1 km., and the Rhine-Herne canal km. 1 to 2.

MAX. SIZE: Dimensions of vessels able to use the German inland waterways:

Type	*Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Capacity* (tons)	*h.p.*
Motor dry cargo vessel	38.5 – 110	5 – 11.4	2 – 3.5	300 – 2,500	100 – 2,000
Tanker	50 – 110	6.6 – 11.4	2.2 – 3.5	400 – 3,200	250 – 2,000
Train (Pushing motor vessel and barge)	150 – 186.5	9.5 – 11.4	2.5 – 3	2,530 – 4,400	800 – 2,000
Pusher tug	10 – 35	7.6 – 13.2	1.4 – 2.2		1,000 – 6,000
Dumb barge for pushing	70 – 76.5	9.5 – 11.4	2.5 – 3.7	1,240 – 2,600	

The largest pusher tugs push six barges = 15,600 tons.

RADIO: Duisburg Port Radio, VHF Channel 13.

BERTHING:

Docks	*Theoretical Depth respectively zero level above normal zero*	*Loading Depths (approx. value) Actual water level at Ruhrort water gauge*
(a) Ruhrort. Water gauge zero.	16.09 m.	
Port Entrance, Vincke Canal, Bunker Dock, North Dock, South Dock, Kaiser Dock, Port Canal, Dock A, Dock B, Dock C and Railway Dock	15.40 m.	+ 40 cm.
Werft Dock	17.05 m.	−120 cm.
(b) Duisburg. Water gauge zero.	17.00 m.	
Parallel Dock, Outer Dock, Wood Dock and Inner Dock at Marientor up to km. 3.5	16.10 m.	+ 40 cm.
Inner Dock Eastwards km. 3.5	16.50 m.	± 0 cm.
(c) Hochfeld. Water gauge zero.	17.42 m.	
South and Kultus Dock.	16.45 m.	+ 40 cm.
(d) Canal Dock Meiderich		Loading depths as per inland
Ruhr Dock Neuenkamp		waterways traffic regulations

CRANES: 85 cranes and travelling bridges of up to 40 tonnes lifting capacity for bulk goods and general cargo, as well as for containers. 2 heavy lift cranes with 60 tonnes and 300 tonnes capacity and floating crane with 200 tons capacity.

BULK CARGO FACILITIES: 1 coal mixing and discharging plant with 2 car dumpers and 3 ship loaders, daily capacity up to 26,000 tonnes.

Grain warehouses and silos with approx. 130,000 tonnes capacity, 4 conveyor belts, and 22 discharging plants.

Tank storage 1,300,000 cu.m. Liquid gas tank storage 20,000 cu.m.

SPECIALISED CARGO HANDLING FACILITIES: 2 Container terminals with facilities for all means of transport Roll-on/Roll-off installation. 66 points for handling liquid gas.

Free Port Duisburg: The first inland Free Port for storage and treatment of high-grade export goods.

Handling site for heavy goods and extremely valuable general cargo.

Freight Traffic Centre: Logistic centres for compilation and distribution of all kinds of general cargo.

Combined Traffic Terminal: Parallel tracks for simultaneous despatch of unit trains with gantry cranes with a lifting capacity of 48.5 tons each.

BRIDGES:

Bridge	*Lowest Point of Upper Structure Respectively Zero Level above Normal Zero*	*Correction Value for Calculation of Passage Height*
(a) Ruhrort. Water gauge zero	16.09 m.	—
Bridge over Railway Dock	36.10 m.	19.70 m.
Bridge over Port Entrance	34.20 m.	17.80 m.
Vincke Canal Bridge	33.10 m.	16.70 m.
Kaiser Dock Bridge	32.60 m.	16.20 m.
Port Canal Bridge	33.80 m.	17.40 m.
Bridge over Dock C	38.20 m.	21.80 m.
(b) Duisburg. Water gauge zero	17.00 m.	
Cable Bridge over Outer Dock	37.80 m.	20.90 m.
Road Bridge over Outer Dock	37.00 m.	20.10 m.
Marientorbrudge (clearance between bridge counter bearings 15.80 m.):		
at rest	29.30 m.	12.40 m.
folded	Up to 33.9 m. height	Clear width 15.8 m
	Over 33.9 m. height	Clear width 13.8 m

Bridge	Lowest Point of Upper Structure Respectively Zero Level above Normal Zero	Correction Value for Calculation of Passage Height*
Schwanentor Bridge (clearance between bridge counter bearings 17.90 m.):		
at rest	26.80 m.	9.90 m.
lifted	34.90 m.	18.00 m.

*From the following values, the actual water level at the Ruhrort water gauge is to be deducted.

With water levels over 8.40 m. at the Ruhrort water gauge, the stop gate at the Marientor Lock is drawn in and therefore through passage to the Duisburg inner port/wood harbour is no longer possible.

STEVEDORES: Working hours: 0730 – 1600 hrs., Monday to Friday.

AIRPORT: Dusseldorf (20 km.).

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Collection service available.

WASTE OIL DISPOSAL: Service available.

Bilgenentolungsges. mbH, Konigstrasse 88, Duisburg. Tel: 0 20 66/2 40.

SNW Shipcleaning, Hafenstrasse 67, Duisburg. Tel: 8 20 71.

SEAMAN'S CLUBS: German Seaman's Mission, Dammstrasse 1B, 4100 Duisburg Homberg. Tel; 02066-9918. Open daily, except Saturday.

Services: Telephone, newspapers, library and exchange service, billiards, table tennis, sauna, keep fit, disco (Wednesday 1930 hrs. – 2230 hrs.), rooms for one or two nights, sports games arranged.

AUTHORITY: Duisburg Ruhrorter Hafen A.G., Alte Ruhrorter Strasse 42-52, Postfach (Postbox) 13 02 60, D-47119 Duisburg, Germany. *Tel:* (0203) 8031. *FAX:* (0203) 803232. *Cables:* Hafag. *Contact:* Y. Klaus van Lith or Dr.-Ing. Jochen Muller, Directors.

ECKERNFORDE: 54.29 N. 09.51 E. (See Plan)

DOCUMENTS:

Stores List.
Customs Documents.
Cargo Documents.
Crew List.

Clearance: Customs clearance at any time subject prior notice given. If suspected diseases on board inform Health Authorities.

PILOTAGE: No Pilot Station. No tide. In East winds, water level can increase to 1.50 m. above normal.

ANCHORAGE: Good anchorage in the Roads between N.W. to N.W. by W. bearing from the port, distance 1 to 1.5 miles. Depths 18 m. – 21 m. Anchorage not allowed in harbour area.

MAX. SIZE. In Outer Harbour, up to 5 m. draft; in Inner Harbour up to 3 m. draft.

RADIO: Radio Kiel, call sign DAO, Tel: 39491.

TUGS: No tugs.

BRIDGES: Outer and Inner Harbours separated by bascule bridge, opening to 10.7 m. width at top of bridge.

MEDICAL: Doctors and hospitals available.

FRESH WATER: Available.

FUEL: Diesel oil available.

REPAIRS: No facilities.

WATCHMEN: Not available.

OPENING/CLOSING HATCHES: By ship's crew.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: Work allowed on Sundays and official holidays subject to Harbour Master's permission.

POLICE/FIRE/AMBULANCE: Police Tel: 110. Hospital Tel: 9011. Fire Tel: 112.

TELEPHONES: Public telephones in harbour area. No installation on board.

SERVICES: Other services available from Kiel.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

AUTHORITY: Stadtwerke Eckernforde GmbH, Bornbrook 1-3, 24340 Eckernforde, Germany. *Tel:* (04351) 9050. *FAX:* (04351) 905199. *Contact:* Mr. Wegner, Harbour Master. Mr. Potzch, General Manager.

ELSFLETH: 53.14 N. 08.28 E.

PORT LIMITS: The seaward boundary of the port is the entrance of River Hunte, vessels are considered to be arrived when alongside the berth or waiting berth, and Customs formalities are completed.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
2 Provision and Store Lists.
1 Ship's Certificate.

DEEP SEA PILOTAGE: See "General" before first German port and "Baltic Deep-Sea Pilotage".

PILOTAGE: Pilotage is carried out by Weser River Pilots, no Harbour Pilot available.

ANCHORAGE: No anchorage in vicinity of the harbour, see Blexen Roads.

RESTRICTIONS: Max. draft in the entrance at LW is 3.20 m.

MAX. SIZE: Max. size in daytime, length 80 m. Max. size at night-time, length 60 m., draft depends on the tide.

PRATIQUE: Pratique is given on arrival by the Health Officer. If disease or fever is suspected on board it has to be reported to the Agent.

RADIO: Cable Norddeich (call sign DAN) advising ETA and cash requirements.

RADAR/VHF: No port radar service but river radar can be used for approaching port from Weser Lanby to Bremerhaven. VHF Channel 21 from Bremerhaven to Elsfleth. Channel 19 from Bremen to Elsfleth.

River radar can be used for approaching port from Bremerhaven to Elsfleth (entrance of River Hunte).

Bremen Port Radar Channel 12.

VHF Channel 10 from Elsfleth to Oldenburg.

The 2 railroad bridges over the River Hunte can be called on VHF Channel 19.

TUGS: Tugs have to be ordered from Bremen or Brake, they join the vessel at River Hunte Estuary. If tug lines are used there are no extra charges.

BERTHING: 1 quay with a length of 260 m., depth alongside 4.7 m. 1 waiting berth for small vessel 3 m., 1 private berth (Omni-Pac).

2 waiting berths for vessels in inland trade. 9 vessels with length from 80 m. can use these berths. One waiting berth is by the naval college (3 berths) and the other at km. 23 on the River Hunte.

SPECIALISED CARGO-HANDLING FACILITIES: 1 crane with 6.5 tons, 1 crane with 10.5 tons and 1 crane with 32 tons capacity. Bulk cargo can be handled with grabs, no other special facilities.

BRIDGES: No bridges to reach the port, but all ships bound for Oldenburg are waiting at Elsfleth for opening bridges.

A flood prevention barrier has to be passed to reach the harbour.

STEVEDORES: ETA has to be cabled to the Agents to arrange gangs. Port works 3 shifts around the clock, including Sunday and holidays.

MEDICAL: Medical service is available day and night. Hospital is available at Brake.

TANKERS: No tanker berth.

DENSITY: Fresh water.

FRESH WATER: Delivered from the quay by hose.

FUEL: Fuel is delivered by bunker barges stationed in port.

FIRE PRECAUTIONS: No fire precautions.

CONSUL: None.

REPAIRS: 1 dockyard, all ship and engine repairs can be carried out.

DRY DOCKS: 2 slipways can be used.

SURVEYORS: Classification Societies have to be ordered from Bremen, surveyors available at Elsfleth.

GANGWAY/DECK WATCHMEN: A crew watchman is necessary because of strong tidal streams, 2 – 3 knots.

HATCHES: Hatch-opening/closing to be carried out by crew.

CUSTOMS ALLOWANCES: Quantity permitted for each crew member: 100 cigarettes, 1 bottle of spirits.

CARGO GEAR: Loading/discharging is carried out by shore cranes.

REPATRIATION: Any time. Inform Agent.

AIRPORT: Airport at Bremen (50 km). Regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police: Station 2263, River 2377. Ambulance: Brake Hospital 04401 – 4060. Fire 2333.

TELEPHONES: No ship-to-shore communications.

SHORE LEAVE: Crew members are allowed ashore with valid passports.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

REGULATIONS: No unusual regulations for the port.

GENERAL: All ships bound for Oldenburg have to do clearance in port.

DEVELOPMENTS: A new private berth has been completed for the distillery "Pabst & Richards".

AUTHORITY: Niedersachsisches Hafenamt Brake – Hafenmeister Elsfleth, An der Straatskaje, 2887 Elsfleth. *Tel:* 04404-2202. *Contact:* H. Plaster, Harbour Master.

EMDEN: 53.21 N. 07.12 E. (See Plan)

PORT LIMITS: The vessel is to be considered an "arrived ship" upon having berthed at the designated waiting/loading/discharging berth, depending upon Charter-Party.

DOCUMENTS: Health Declaration (form from Sea-Pilot), Derat Exemption Certificate, Bill of Lading, Cargo Manifest, Certificate of Origin (for gas-tankers only), Certificate of Quality (for gas-tankers only), Certificate of Registry, 5 Crew Lists, 2 Crew Personal Effects Lists, 4 Slop-Chest Lists, Passports/Seamen's Books, 2 German Tanker Check Lists (for tankers and gas-tankers only).

DEEP SEA PILOTAGE: See "General" before first German Port and "Baltic Deep-Sea Pilotage".

PILOTAGE: Compulsory. At least 12 hours prior arrival at Pilot Station, vessel to radio "Emslotse Emden" indicating vessel's name, ETA, destination and draft. Contact pilot vessel on VHF Channels 16 or 9, or 2182 kHz. Tel (and Fax): 49 (0) 161-1416967.

Pilot vessel located near Wester Ems Light Buoy in approx. position Lat. 53° 37' N., Long. 06° 20' E.

Tankers and gas-tankers above 10,000 g.r.t. with dangerous cargo have to pick up the Pilot at the TW/DB Buoy in position: 53° 59' 18" N., 06° 21' 26" E.

During bad weather periods pilot boat is withdrawn and stationed in sheltered area near the Isle of Borkum.

ANCHORAGE: Vessels may anchor in vicinity of pilot vessel in depth of 9.5 fathoms. Sandy bottom.

Further anchorage possibilities in the Ems fairway half way up to Emden at "Moevensteert", 13.7 m. salt water at HW.

RESTRICTIONS: Vessels drawing in excess of 8.0 m. salt water have to wait for high tide to proceed to Emden proper. Tide rise about 3.0 m.

Vessels with LOA/beam over 255 m./35.5 m. respectively enter and leave in daylight only.

The "Great Sea Lock": The "Great Sea Lock" has a length of 260 m. (853 ft.) and a width of 40 m. (131 ft.) restricting vessels' size to 240 m. LOA and 33 m. beam, but upon special permission at about 250 m. LOA and 35 m. beam. Depending upon vessels' constructural shape even longer ships have been accepted in the past upon special application.

MAX. SIZE: Under normal tide conditions, vessels drawing 36 ft. can enter Emden directly.

Length and beam restrictions imposed by locks at Emden: Max. 240 m. length and 33 m. beam. Vessels exceeding these dimensions require prior permission.

HEALTH: Pratique granted immediately on arrival at locks by Doctor or Health Official.

RADIO: Cables should be despatched via Norddeich Radio (DAN).

Gas Tankers: Entry Permission: For each gas–tanker the agent – on behalf of vessel – has to apply for an entry permission with the Lower Saxony harbour office.

Following advanced information required: (1) GRT, (2) Volume cu.m. (3) LOA, (4) Beam, (5) Year of build, (6) ETA, (7) Draft, (8) Port of Departure, (9) Cargo Grade, Quantity, Temperature, (10) Possible Deficiencies of Ship and/or Cargo, (11) Confirmation vessel in accordance with IMO Rules A328 (9) or A 329 (9).

ETA–Notices: Master to keep agents closely advised about vessels ETA at either approach buoy and any change thereof. A 7–days 96–, 48–, 24–, 12–hours notice would facilitate preparational matters with authorities, receivers etc.

VHF: Norddeich Radio (DAN): VHF Channel 16 and all known communication facilities including ship/shore telex.

VTS "Ems Traffic": VHF Channels 18, 20 and 21.

Emden Pilot: VHF Channel 16.

RADAR: Radar service on the river "Ems" from approx. position: Lat. 53° 37.5' N., Long. 06° 23' E. (Westerems) or Lat. 53° 35' N., Long. 06° 23' E. (Hubertgat) up to port entrance. The other range (Borkumradar) works on VHF Channel 18. Further information on this Channel.

TUGS: Sufficient tugs available, stationed at Emden Locks, ranging from 790 h.p. to 3,900 h.p. Usually ship's lines used.

BERTHING: *Outer Harbour:* Quay length 1,539 m. – tidal harbour. Also see "Developments".

New Inner Harbour: Accessible through Sea Lock (260 m. × 40 m.) and Nesserlander Sea Lock (111 m. in length and 14.50 m. width).

INNER HARBOUR:

South Quay:

Commodity: Building materials and other dry-bulk cargoes, also wood, steel, general cargo, containers, etc.

Pier Length: 932 m.

Depth Alongside: 12 m. permanent (salinity about 1.005).

Draft Allowed: 10.67 m.

Number of Cranes: Five.

Lifting Capacity: 2×15 tons, 2×25 tons, 1×40 tons. 4,000 tons/day.

Daily Capacity: 10,000 – 30,000 tons, depending on material.

Outreach of Grabs: 34.5 m. (cranes).

Distance Waterline/Lower Edge Grab: 14 m. (cranes).

Storage Area: About 25,000 sq.m. concrete paved. About 76,000 sq.m. for bulk cargoes. About 4,000 sq.m. of covered storage for general and bulk cargoes.

Loading/Discharging: Ex-vessel onto rail cars, trucks, barges.

Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible.

North Quay and Container Terminal:

Commodity: Containers, steel, wood and general cargo.

Pier Length: 520 m.

Depth Alongside: 11.5 m. permanent (salinity 1.005).

Draft Allowed: 10.67 m.

Number of Cranes: Two cranes and one container bridge.

Lifting Capacity: 53 tons (exceptionally 80 tons) to 15 tons.

Outreach of Grabs: 34.5 m.

Distance Waterline/Lower Edge Grab: 14 m.

Storage Area: About 13,000 sq.m. concrete paved. About 32,000 sq.m. unpaved area.

Loading/Discharging: Ex-vessel onto rail cars, trucks, barges.

Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible. Container Terminal: 24 hours, 7 days a week.

Industrial Harbour:

Commodity: All kinds of dry-bulk commodities in smaller lots, iron and steel, livestock and all kinds of general cargo.

Pier Length: Total about 1,000 m.

Number of Berths: 3.

Draft: Between 23 ft. – 24 ft. permanent (salinity 1.005), depending on berth.

Number of Cranes: 4, and 1 mobile crane.

Lifting Capacity: 1×5 ton, 1×10 ton, 1×10-20 ton, 1×30 ton, 1 mobile crane 30 ton.

Outreach of Cranes: 16 m. – 40 m. depending upon weight of load to be handled.

Distance Waterline/Lower Edge Grab: 18 m. – 20 m.

Storage: About 5,500 sq.m. covered storage space. About 50,000 sq.m. open storage space.

Loading/Discharging: Ex-vessel onto rail cars, trucks, barges.

Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible.

Ro-Ro Berths I and II:

Commodity: Automobiles, paper and other Ro-Ro commodities.

Berthing Length:	Terminal I 325 m.	Terminal II 300 m.
Draft Allowed:	Max. 7.0 m. permanent (salinity 1.005).	Max. 7.0 m. permanent (salinity 1.005).
Number of Ramps:	1 stern ramp. 1 stern or side ramp.	1 stern ramp.
Storage:	About 43,000 sq.m. storage space.	About 31,000 sq.m. storage space

Loading/Discharging: Ex vessel onto rail cars, trucks.

Working Period: Monday 0600 hrs. – Saturday 1400 hrs., overtime possible.

OUTER HARBOUR: This port basin has direct connection to the Ems Fairway, i.e. it is a tidal port area. There are no restrictions as to length or beam.

VW Berth:

Commodity: Mainly used for handling Volkswagen automobiles.

Berthing Length: About 420 m.

Depth Alongside: 9.0 m. at low water (Density 1002 – 1012).

Draft Allowed: 8.5 m. LW.

Tidal Range: About 3.0 m.

Number of Cranes: None.

Cargo Handling: Side door Roll-on/Roll-off or ship's own gear, ex-vessel onto storage, rail, truck.

Loading Rate: Max. 2,000 cars/day.

Granary I and II:

Commodity: All kinds of grain products, feed stuff, etc.

Berthing Length: 450 m.

Depth Alongside: 8.5 m. at LW (Density 1002 – 1012).

Draft Allowed: 8.0 m. fresh water at LW.

Tidal Range: About 3.0 m.

Number of Elevators: 3 shore elevators.

Outreach from Fenderline: 18 m.

Distance Waterline/Hatchcoaming: 11.5 m.

Daily Capacity: About 12,000 tons heavy grain. About 6,000 tons soya meals.

Storage Capacity: About 150,000 tons.

Working Period: Monday 0700 hrs. – Saturday 2200 hrs., overtime possible.

Ems Quay:

Commodity: General, wood, logs, containers, etc.

Pier Length: 271.7 m.

Draft Allowed: 8.5 m. salt water at LW.

Tidal Range: About 3.0 m.

Number of Cranes: None.

Number of Ramps: 1 quarter ramp, 1 stern ramp.

Storage Capacity: About 6,000 sq.m. of covered storage space and 25,000 sq.m. of concrete paved open storage space.

"Nesserland": One mobile, tide-independent, floating Ro/Ro bridge for stern ramps and Ro/Ro cargo up to 100 tons with approximate 5.5 m. breadth.

BULK HANDLING FACILITIES: See "Berthing".

BRIDGES: None.

STEVEDORES: Since main commodities consist of bulk cargoes, such as iron-ore, coal, coke, bauxite, no specific requirements.

MEDICAL: Advance notice only required in urgent cases; hospital available.

TANKERS: Olhafen situated in Inner Harbour. Max. draft 10.22 m.

Slops may only be discharged at the Tank Cleaning installation of Thyssen Nordseewerke GmbH.

Oil Harbour:

Commodity: LPG, chalk slurry, porcelain clay and small shipments of naphtha, condensates, fuel oil, gas oil.

Number of Berths: 4 (2 large and 2 smaller berths).

Docking Length:	No. 1 250 m.	No. 4 150 m.
Draft Permanent:	10.22 m. (salinity about 1.005)	10.22 m. (salinity about 1.005)
Loading Rate:	500 t.p.h. light fuel 750 t.p.h. heavy fuel	500 t.p.h. light fuel 750 t.p.h. heavy fuel
Discharging Rate:	2,500 t.p.h. crude oil	1,500 t.p.h. crude oil
Connections:	2×12 in. max.	1×8 in. max.

Working Period: Around the clock, SHinc.

LPG Terminal:

Commodity: Butane, propane and its mixtures.

Location: Emden oil harbour in the "Inner Harbour" – Oil Harbour separated from the Ems Fairway by the "Great Sea Lock"

Type of Berth: Concrete finger-pier with platform and with 5 dolphins abreast and sufficient mooring bollards ashore. Max. pull 100 tons.

Depth/Tidal Range: 10.36 m. brackish water (approx. 1007). No tidal range.

Restrictions:

LOA : 240.00 m.
Beam : 33.00 m.
Draft : 10.22 m. (dock density)
Distance waterline/manifold : 19.00 m. max.
Distance ship's rail/manifold : 5.50 m. max.
Free space to forward of manifold connection : 1.40 m. min.

Berthing: Vessels berthing with port-side to. Ships being towed backwards into basin. Day and night mooring/unmooring.

Cargo Handling Facilities for Ref. + Semi-Ref. Cargo: 1 free floating discharging-arm, type Wiese 4/350, with one 8 in. 300 ASA liquid connection and one 3 in. 300 ASA flexible vapour return line.

Shore Heat-Exchangers/Shore Booster Pumps: 2 heat-exchangers – able to heat-up from –42°C to minimum of 0°C. 3 booster pumps – max. liquid delivery head 445 m.

Discharging/Loading Rate: Max. 500 cu.m/hr. max. about 200 cu.m/hr.

Distance Berth/Tank Farm: About 4.5 km.

Size of Cargo Line: Average diameter 8 in.

Storage Facilities: 2 buffer tanks at berth – 4,000 cu.m. net. 9 storage tanks at tank farm – 23,000 cu.m. net.

Working Period: Around the clock, SHinc.

Special Vessel's Requirements:

(a) All gas-tankers have to be equipped with 2 VHF wireless stations at the bridge.
(b) All gas-tankers above 30,000 cu.m. cargo tank capacity have to be equipped additionally with:
  2 Radar units
  1 Decca navigator
  1 Electronic speed-recorder
  1 Rate of turn indicator

Required Valid Certificates:

(a) IMO-Certificate of Fitness according IMO-Resolution A 328 (9) or A 329 (9)/Certificate of Compliance.
(b) Cargo Ship Safety Construction Certificate.
(c) Cargo Ship Safety Equipment Certificate.
(d) Cargo Ship Safety Radiotelegraphy Certificate.
(e) Ship Safety Radiotelephony Certificate.
(f) Load Line Certificate.
(g) Classification Certificate.
(h) Oil Liability Certificate.
(i) Oil Record Book filled–in.
(j) Letter of Compliance where available.
(k) Ship's Loading and Stability Manual.
(l) Damage and Survival Stability–information.
(m) Certificate of Safe Manning according IMO A 481 (XII).
(n) Test Certificates for:
  Safety Relief Valves.
  Cargo Tanks.
  Cargo Pipe-lines.
  Instrument Calibration.

Documents for Clearing Purposes: The following documents are also required for clearing purposes:

(a) Health Declaration (form from Sea Pilot).
(b) Derat Exemption Certificate.
(c) Bill of Lading.
(d) Cargo Manifest.
(e) Certificate of Origin.
(f) Certificate of Quality.
(g) Certificate of Registry.
(h) 5 Crew Lists.
(i) 2 Crew's Personal Effects Lists.
(j) 4 Slop chest Lists.
(k) Passport/Seaman's Book.
(l) 2 German Tanker Check Lists

Supplies/Services:

(a) Purging/Gas Freeing	Not allowed within the port area
(b) Coolants (Propane)	Available (pressurised)
(c) Nitrogen, Oxygen, Freon	Available from local Unitor in Bottles/ Cylinders
(d) Bunkers	All grades available from majors and some outsiders ex-barge prior to or after cargo operations

Lightening of Tankers: There is also a tanker lightening/anchoring place at the "Dukegat" anchorage at the location of Buoys "A10" – "A12" with an allowable draft of 41 ft. SW, dimensions 1,200 m. long and 800 m. wide.

However, lightening of tankers is not customary and has not been performed recently.

DENSITY: Inner Harbour: 1003 – 1007. Outer Harbour: 1002 – 1012 (depending on tide).

FRESH WATER: Available.

FUEL: All grades available, delivered by barge by major oil companies and others.

FIRE PRECAUTIONS: All common fire precautions to be obeyed.

CONSULS: Finland (Vice-Consul), Tel: 28800, Norway, Tel: 8907-29, Sweden, Tel: 21904, Netherlands, Tel: 21404.

REPAIRS: All kinds of repairs possible.

DRY DOCKS: 1 dry dock 218 m. × 30 m., 1 floating dock 176 m. × 27 m., 1 floating dock 130 m. × 15.8 m., 1 floating dock 116.4 m. × 21.3 m., 2 floating docks 92 m. × 16.2 m.

SURVEYORS: German Lloyd, Lloyd's Register, Norske Veritas, Bureau Veritas, Panama Bureau of Shipping Inc.

Germanischer Lloyd, Schweckendieckplatz 3, D-26721 Emden. Tel: (04921) 23439, 23354. Fax: (04921) 33431.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: To be performed by crew.

CUSTOMS ALLOWANCES: 40 cigarettes per day/person, 0.25 litre spirits per day/person (at "Outer Harbour" and "Old Inner Harbour").

REPATRIATION: Nearest airport to Emden is Bremen (about 150 km.). There are good train connections to and from Emden. Car transportation can also be arranged upon request to Agent. A small airport is available at Emden for domestic flights and charter flights.

AIRPORT: Nearest airports Bremen and Hamburg, about 2 – 3 hours drive from Emden. World-wide connections. Flight Emden to Bremen or Hamburg possible by air-taxi.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in October).

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; October 3rd; Prayer Day; Christmas Day; Second Christmas Day (December 26th). No work on New Year's Day, Easter Sunday, Whit Sunday, May 1st and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 22222; Fire 112.

EMERGENCY CO-ORDINATION CENTRE: Local Water Police, Tel: 04921-891558.

TELEPHONES: Telephones can be placed on board if vessel berthed at Outer Harbour, Northquay, Southquay or Thyssen Nordseewerke shipyard. Public telephone boxes are available close to the berths.

SERVICES: Tank cleaning installation for slop disposal available. Oil pollution service available.

BANKS: German banks, such as Deutsche Bank, Commerzbank.

STORING: See "Prelims".

1. Yes.
2. Throughout loading operations, except for gas tankers.
3. Mainly yes.
4. Mainly yes.
5. Stores have to be cleared through Customs.
6. Yes.

SHORE LEAVE: Shore leave possible.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Collection service available, for ship's account only. Contact agent or Port Authority for details. Smaller quantities may be disposed of in waste containers, distributed about port area, free of charge.

WASTE OIL DISPOSAL: Oil residues, etc., can be collected by tanker trucks, free of charge. If required, a special berth is available for this service. Contact Agent or Port Authority for details.

SEAMAN'S CLUBS: German Seamen's Mission Emden, Am Seemannsheim 1, 26723 Emden, Germany. Tel: (04921) 23551. Facilities include telephone and shopping, books, newspapers, T.V., billiards, table tennis, overnight stays for seamen and families, meals, port service, church services on Sundays, information and advice.

REGULATIONS: None unusual, but tankers and especially gas tankers have to apply for a special entry permission through the Agents.

DELAYS: Normally, none.

DEVELOPMENTS: In the Western part of the Northquay in the New Inner Harbour is the container terminal, enabling transhipment of up to 100,000 TEU per year. One berth with 1×53 ton container crane is already available in the first stage, and an additional berth with 1 crane will be available in the second stage.

AUTHORITY: Niedersachsisches Hafenamt Emden, Friedrich-Naumann Str. 7-9, 26725 Emden, Germany. *Tel:* (04921) 897-0. *Cables:* Hafenamt Emden. *FAX:* (04921)897-137. *Contact:* Port Manager: G. Frerichs, Tel: 897-100. Harbour Masters: Captain A. Brinkmann, Tel: 897-120. Captain F. Herbig, Tel: 897-119.

FLENSBURG: 54.48 N. 09.26 E. (See Plan)

PORT LIMITS: The seaward boundary is the line between two special boundary-stones on the West and East side of the port entrance.

DOCUMENTS: 2 Crew Lists, 2 Passenger Lists, 2 Stores Lists (bonded stores), Cargo Lists, Bills of Lading, General Declaration, Ship's Certificates.

PILOTAGE: Pilot Station Flensburg, Schiffbrucke 12, D-2390 Flensburg, Tel: (0431) 362858. Advance notice 5 hours before arriving Buoy "Flensburger Foerde" by Kiel Radio or Agent (5 hours before leaving port). Pilot boards at Buoy "Flensburger Foerde". Pilot will board in all weather if possible, otherwise pilot-boat will lead vessel to that position where Pilot can board. Not necessary to anchor. Pilot-boat is a fishing-boat with "Lotse" written in white letters on both sides. Boat will show lights prescribed by international regulations and is fitted out with VHF Channels 6, 10, 16, 25, 26, 27.

ANCHORAGES: Just outside harbour entrance, N.E. of Mittelgrund and West of Kielseng leading lights. Depths of water between 12 m. and 19 m. muddy ground; same position for Quarantine Anchorage.

The other anchorage is at Buoy "Flensburger Foerde", depth of water between 20 m. and 27 m. Bottom is mud and sand.

RESTRICTIONS: No specific restrictions; no tide, water-level variations depending only on the wind.

MAX. SIZE: Max. draft up to 7.0 m. at normal water-level.

HEALTH: Generally Free Pratique for ships in the North Sea and Baltic Sea trade, ships coming from overseas ports pratique granted on arrival. Inform Pilot if any suspected diseases on board. He will make necessary arrangements. A valid Derat Exemption Certificate has to be on board.
RADIO: Ruegen Radio.
VHF: Not available at Flensburg Port.
RADAR: There is no Port Radar Service.
TUGS: One harbour tug of 2,300 h.p. is available. If required, local shipping agency makes arrangements, provided at least 3 hours notice given in normal working hours, otherwise 24 hours.
BERTHING: Powerstation-Quay length 210 m. depth of water 7.30 m. Harnis Quay length 470 m. depth of water 6.00 m. Harnis Quay length 240 m., depth of water 7.0 m. Schiffbrucke Quay length 170 m. depth of water 6.50 m. Schiffbrucke Quay length 130 m., depth of water 5.0 m. Depths of water refer to normal water-level.
CRANES: Powerstation Quay: 1 crane 10 tons lifting capacity and 1 ship-unloader, max. discharging rate 600 t.p.h.

Harnis Quay: 4 cranes 3 – 5 tons lifting capacity. All cranes are usable for general and bulk cargo.
BULK CARGO FACILITIES: One elevator for feedstuff and 1 elevator for coal.
SPECIALISED CARGO-HANDLING FACILITIES: Not available.
BRIDGES: There are no bridges at Flensburg Port.
STEVEDORES: Agents make all arrangements. Unloading rates depend on type of cargo. Bulk cargo discharge up to 160 t.p.h. per gang.
MEDICAL: Doctors, hospitals, ambulances available day and night.
TANKERS: One berth for tankers up to 1,000 g.r.t. with depth of water 5.70 m.; diameter of discharge lines are NW 200; average discharge of fuel and gasoil 300 cu.m. per hour.
DENSITY: Winter-time 1015; Summer-time 1012.
FRESH WATER: Available at all berths, delivery rate about 20 cu.m./hr. from shore hydrants.
FUEL: Diesel available in any quantity. Fuel oil subject to 5 hours advance notice from tank lorries.
FIRE PRECAUTIONS: No specific precautions.
CONSULS: Denmark, Nordergraben 19; others at Hamburg.
REPAIRS: No facilities.
DRY DOCKS: None.
SURVEYORS: All main Classification Societies are present at Hamburg.
GANGWAY/DECK WATCHMEN: No watchman service available.
HATCHES: Opening/closing normally done by crew. Stevedores will perform this for additional payment.
CUSTOMS ALLOWANCES: For consumption on board merchant vessels for each crew member per day 40 cigarettes or 20 whiffs or 10 cigars or 50 grams tobacco *and* 0.25 litre spirits *and* 3 litres wine are duty-free. If the ship stays for 3 days or longer it is usual to allow threefold of the mentioned quantity. For shore leave 20 cigarettes are permitted for each person only. If a crew member leaves the ship for at least 3 days the regulations for tourists are applicable.
CARGO GEAR: All loading and discharging done by shore cranes, except elevator-work.
REPATRIATION: Possible at any time without difficulties.
AIRPORT: Hamburg-Fuhlsbuttel, 175 km. distant; 2.5 hours by train.
TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).
HOLIDAYS: See "Hamburg". No work on official holidays.
POLICE/AMBULANCE/FIRE: Police Tel: 110, Fire/Ambulance Tel: 112.
TELEPHONES: Installation on board ships possible at Harnis Quay.
SERVICES: Tank cleaning and slop disposal services available. Compass adjusting possible, advance notice necessary.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.
GARBAGE DISPOSAL: Agent can arrange collection of garbage.
WASTE OIL DISPOSAL: Various collection services available. Contact agent for details.
SEAMAN'S CLUBS: None.
CURRENCY: Deutsche Mark (DM).
REGULATIONS: No particular or unusual regulations.
DELAYS: Normally no delays.
AUTHORITY: Stadt Flensburg Hafenamt, P.O.Box 2742, Batteriestrasse 48, D-24939 Flensburg, Germany. *Tel:* (0461) 4871301. *FAX:* 49-461-487660. *Contact:* T. Lauritzen, Harbour Master.

GLUCKSTADT: 53.45 N. 09.25 E.

PORT LIMITS: Line drawn between seaward ends of North and South moles.
DOCUMENTS:
Ship's Papers.
Cargo Papers.
Despatching Papers.
Crew Lists.
PILOTAGE: Pilot to be ordered via Agent.
MAX. SIZE: Outer Harbour: Max. length 150 m.; max.breadth 18.0 m.; max. draft at MTHW 6.0 m. (South side), 5.50 m. (North side).
Inner Harbour (Max. size to pass lock to inner harbour): Max. length 90 m.; max.breadth 12.5 m.; max.draft at MTHW 4.5 m. (recommended max. 4.2 m.).
BERTHING: Outer Harbour: South side 220 m. quayage, North side 250 m. quayage (110 m. crane area).
CRANES: 1×45 tons jib crane, 1×14 tons jib crane and 1×18 tons mobile crane.
STEVEDORES: Working Hours: Monday to Friday 0700 – 1200 hrs., 1230 – 1600 hrs. Overtime to be agreed.
DRY DOCKS: 1 slipway for inland waterway vessels up to 500 d.w.t.
AIRPORT: Hamburg.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.
GARBAGE DISPOSAL: Available, contact Hafengesellschaft for details. Tel: (04124) 3095.
WASTE OIL DISPOSAL: Available, contact Hafengesellschaft for details. Tel: (04124) 3095.
SEAMAN'S CLUBS: None.
CURRENCY: Deutsche Mark (DM).
AUTHORITY: Hafengesellschaft Gluckstadt mbH & Co.KG., Aussenhafen-Sud, D-25348 Gluckstadt, Germany. *Tel:* 04124-3095. *Telex:* 218322. *FAX:* 04124-3097. *Contact:* Harbour Master.

HAMBURG: 53.33 N. 09.59 E. (including Altona, Harburg and Wilhelmsburg) (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
2 Provisions and Stores Lists, including Fuel Oil.
3 Dangerous Cargo Lists.
Health Certificates (forms obtainable from Pilot).
General Cargo Declaration.
Ship's Register.
Oil Liability Certificate for more than 2,000 tons of oil.
Shipmaster's Report: October 1988.
Customs: No documents required as port is a Free Port.
Water Police: 2 copies Crew List.
1 copy Maritime Declaration of Health.
Agent: 1 copy Crew List.
DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German port and "Baltic Deep-Sea Pilotage".
PILOTAGE:
Pilotage-Anchorage River Elbe: See "General" before first German port.
Pilotage Port of Hamburg: Harbour Pilots board the ships close to the Seemannshoft Station. Harbour Pilots can be called by VHF, Channel 9, call "Hamburg Pilot", morse or sound signal "G" (2 long and 1 short) or flag "G". Pilotage is compulsory for vessels with dangerous cargo and vessels over 90 m. LOA or 13.0 m. beam.
Exceptions: Pilotage is not compulsory for vessels up to 120 m. LOA, if: (1) the Master has called at the Port of Hamburg with his ship 6 times within the last 12 months, and (2) he speaks German fluently. Advisable to use Pilots in port.
ANCHORAGE: Available at several places between Elbe Lightvessel and Hamburg. See "General" before first German port.
RESTRICTIONS: No restrictions imposed on night entry for any vessels.
MAX. SIZE: *Inward Bound:* Vessels allowed max. draft of 14.2 m. in salt water on arrival Elbe Lightvessel, may enter only on rising tide under normal weather and tide conditions.

Container ships exceeding 12.0 m. draft in salt water on arrival Elbe Lightvessel may enter only on rising tide.
Outward Bound: Vessels up to 12.0 m. draft in fresh water on departure from Hamburg may leave at any time.

Vessels exceeding 330 m. LOA or 45 m. beam on departure from Hamburg-Finkerwerder Port Pilot Station may not leave 3 hours before H.W. until following H.W., when a tide restricted vessel is inward bound on the river.

Container ships and LASH carriers up to 12.0 m. draft in fresh water on departure from Hamburg may leave at any time.

Container ships up to 12.3 m. (FW) draft may leave from Port Pilot Station from time of L.W. until 3 hours after L.W. (Up to 12.5 m. until 2 hours after L.W. and up to 12.8 m. until 0.5 hours after L.W.). No anchoring at Brunsbuttel is required.
Inward Bound: Vessels exceeding 330 m. – 340 m. length or 45 m. breadth allowed max. draft to 13.7 m. (340 m. – 350 m./13.2 m. and 350 m. – 360 m./12.7 m. draft) in salt water on arrival Elbe Lightvessel, may enter only on rising tide.
Outward Bound:
LOA 330 m. – 340 m., max. draft 12.0 m.
LOA 340 m. – 350 m., max. draft 11.5 m.
LOA 350 m. – 360 m., max. draft 11.0 m.
Underkeel clearance of 10% of draft required.

Vessels demanding the rising tide will proceed according to tidal conditions in order to reach Finkerwerder Pilot Station 1 – 1.5 hours before HW.

The following Harbours can be reached:
Note: All water depths refer to medium low water level. Water depths can change from berth to berth, and all Masters are advised to obtain the necessary information regarding their berth, either from their Agent or the Port Authority (Tel: 740.31.51 or VHF Channel 14 "Hamburg Port Traffic").

Harbour Name	*Max. draft subject to tide and berth (m.)	At any time up to (m.)
Dradenau Hafen	12.5	9.3
Petroleum Hafen	11.0	7.8
Waltershofer Hafen	11.5	12.0
Kuhwerder Hafen	14.3	11.9
Oderhafen	11.4	8.2
Rethe Neuhof NHG	14.3	11.6
Kattwyk Hafen	13.2	10.0
Neuhofer Hafen	13.0	9.8
Rethe Van Ommeren	13.2	10.0
Rethe Kruse	13.2	10.0
Rethe Mackprang	12.8	9.6
Rethe Stroh	12.4	9.2
Schluisgrove Hafen	11.2	8.0
Hansaport	14.5	12.0
Harburg Seehafen 4	11.9	8.7
Harburg Seehafen 3	10.4	7.2
Harburg Seehafen 2	12.5	9.3
Harburg Seehafen 1	9.2	6.0
Blumensandhafen	13.2	10.0

* Max. draft with 10% underkeel clearance.

The max. draft is dependent on the prevailing Easterly or Westerly winds.

Also see "Shipmaster's Report".

HEALTH: Master required complete health certificate when Pilot boards. Only vessels with infectious diseases are subject to detention.

RADIO: All messages to Agents, etc., through Norddeich Radio, call sign "DAN". Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting stations are on permanent duty:

Cuxhaven: Call "Cuxhaven Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Brunsbuttel: Call "Brunsbuttel Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Stadersand: Call "Stadersand Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Hamburg: Call "Hamburg Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Hamburg Port Traffic (Port Authority): VHF Channels 14 and 16.

TUGS: Normally join incoming vessels at Harbour Pilot Station at Finkerwerder. Tugs lines used at no extra charge.

RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port.

Hamburg Radar Service "Hamburg Radar Radio", VHF Channels 3 and 19 at the lower end of Seemannshoeft, VHF Channels 80 and 7 at the Western and Southern part of harbour, VHF Channels 63 and 5 at upper part East of Koehlbrand.

ETA: Master's telegrams via Norddeich Radio, call sign DAN, are passed on to Agent 24 hours a day, week-ends and holidays inclusive. For this reason it is advisable that Masters communicate with Agent via Norddeich Radio.

In order to avoid delay and extra charges Masters should cable their ETA at least 12 hours prior to arrival at Elbe Pilot Station to "Elbelotse Brunsbutelkoog" via Norddeich Radio, stating the following details:

1. Name of vessel.
2. Gross register tons.
3. Date (2 figures).
4. Time (4 figures).
5. Place where Pilot is required.
6. Place of destination.
7. Draft in metres (4 figures).

For example:

Eta Fjordaas	41079	12	1600	Elbeone	Hamburg	1214
(1)	(2)	(3)	(4)	(5)	(6)	(7)

1 hour before arrival at Elbe Lightvessel Masters are advised to contact the pilot cutter by VHF Channel 13 or 16.

CONTAINER HANDLING FACILITIES: See "Table" on Page 806.

BULK HANDLING FACILITIES:

Grain	*Maximum Draft*	*Maximum Length*	*Number of elevators*	*Capacity total/hour*
Hamburg-Kuhwerder Hafen	10.8 m.	180 m.	4	750 tons
Hamburg-Rethe/Stroh	12.4 m.	300 m.	3	1,000 tons
Hamburg-Rethe/Kruse	13.2 m.	272 m.	3	770 tons
Hamburg-Rethe/Makprang	12.8 m.	290 m.	11	1,200 tons
Hamburg-Neuhof	14.3 m.	272 m.	4	1,660 tons

	Quay length (m.)	*Max. safe draft (F.W.)*	*Max. height discharging gear above high water level (m.)*
Coal and Minerals:			
Hamburg-Harburg II	524	9.3 m.	20.1
Elbehafen Brunsbuttelkoog Gmbh	600	10.7 m.	29.8
Coal:			
Hamburg-Strand Quay	220	7.6 m.	No restriction
Hamburg-Wedel	320	13.9 m.	No restriction
Fertilisers:			
Neuhof-Kalikai	370	10.0 m.	18.3
Minerals:			
Hamburger-Stahlwerke	408	9.3 m.	25.0
Hansaport	563	14.3 m.	No restriction
Petcoke/Oxide:			
Hamburger Aluminium Werk Gmbh	183	9.0 m.	No restriction
Bauxite/Oxide:			
Aluminium Oxid Stad Gmbh (AOS)	329	12.5 m.	18.9

BRIDGES: To be passed by vessels bound for basins South of Kohlbrand.

Bridge	*Situated*	*Max. breadth* (ft.)	*Height above normal H.T.* (ft.)	*Depth at normal H.T.* (ft. in.)
Kohlbrand Brucke (a high-bridge)	across the Kohlbrand near Neuhof	558	167	55 04
Kattwyk Brucke (a drawbridge)	across the Suder Elbe, before Harburg	328	167	48 05
Rethe Brucke (a drawbridge)	across the Rethe, near Reiherstieg	164	167	50 03

STEVEDORES: Ordered by Agents, no additional ETA's required.

Working hours

Monday to Friday	First shift 0650 to 1500 hrs. Second shift 1500 to 2310 hrs. Third shift 2310 to 0650 hrs.
Saturdays, Sundays and holidays	First shift 0700 to 1300 hrs. Second shift 1300 to 1900 hrs. Third shift 1900 to 0100 hrs. Fourth shift 0100 to 0700 hrs.

Work performed after 1500 hrs. Monday to Friday, on Saturdays after 1300 hrs., on Sundays and holidays is at overtime rates.

TANKERS:

	No. of berths	*Max. Draft (FW)*
Kohlfleethafen (Esso/B.P.)	2	12.5 m.
Petroleumhafen (B.P.)	7	11.0 m.
Kattwyk Hafen (Shell)	2	13.2 m.
Kattwyk Hafen	1	12.7 m.
Blumensandshafen	1	13.2 m.
Neuhof (Van Ommeren)	4	13.2 m.
Neuhof (Oiltech)	1	13.0 m.
Harburg Seehafen 4 (Esso and Holborn)	1	11.9 m.
Tankerlager Moorburg	1	12.2 m.
Stadersand (Lower Elbe)	1	10.6 m.

Tanker cleaning and gas freeing facilities at Neuhof Van Ommeren, Kattwyk Hafen (Shell) and some dolphin berths by boats.

Koehlfleethafen Terminal: Cautionary Advice: Ships approach the berth at HW or shortly before. At any other time, it is very difficult to enter the harbour due to the current conditions at the entrance. The ship's speed at the entrance should be as low as possible.

Berthing Procedure: Tankers for the North Berth are berthed starboard side to and at the South Berth port side to. The ship's approach on a heading parallel to the berth. Usually the spring lines are run out first.

Moorings: All lines are secured on quick release hooks. Average tidal range at berth is about 3.4 m.

Harburg, Seehafen IV, Berth 6: Cautionary Advice – Approaches: All ships approaching or leaving Harburg IV have to transit the narrow Kohlbrand Fairway. The ship should manoeuvre at reduced speed. A good helmsman and quick response of the engine are important.

Cautionary Advice – Manifold Connections: Due to the design of the loading arms, care must be taken that the ship's lines are tight and the ship is not allowed to make any movements alongside the berth during cargo handling operations.

Restrictions: There is a lifting bridge crossing the Kohlbrand. This bridge will open for every ship which is tide bound. Other ships and all ships sailing from Harburg IV have to pass the bridge on scheduled opening times at all even hours from 0600 hrs. – 2200 hrs. and at 0530 hrs.

There are numerous berths at the banks which have to be passed at slow speed.

Tugs: 4 tugs will normally make fast after the Pilot has boarded. The tugs should be fast before entering into the Kohlbrand. They tow "on the hook." It is recommended to use tugs lines at no extra charge.

Berthing: Deep-drafted vessels berth at HW only. Caution should be exercised when turning from Kohlbrand into the Seehafen IV Basin.

Berth No. 6 is the first T-head jetty on the starborad side when entering Seehafen IV. Loading vessels berth port side alongside.

The berth has wooden breasting dolphins and care should be taken to land parallel to the fender face with minimum approach speed.

Kattwykhafen, Shell Terminal: Cautionary Advice – Approaches: All ships approaching or leaving Kattwykhafen transit the narrow Kohlbrand Fairway and have to pass through the Rethe Harbour. Ships should proceed with reduced speed. A good helmsman and quick engine response are of importance.

Restrictions: There are numerous berths in the Rethe Harbour which have to be passed at slow speed.

Tugs: 4 tugs will normally be made fast after Pilot has boarded. The tugs should be fast before entering into the Kohlbrand. The tugs, 2 forward and 2 aft are made fast "on the hook." It is recommended to use tugs lines at no extra cost.

Berthing: Deep-drafted vessels berth at HW only. Vessels should be almost stopped in the water when swinging into Kattwykhafen. Tugs will assist in controlling vessel's speed and swing.

When close to and parallel to the berth, the 2 inside tugs will let go and push on the outside until vessel is alongside. Maximum approach speed at impact is 10 cm./sec. for a 100,000 d.w.t. vessel landing on both breasting dolphins.

Moorings: The mooring lines are taken ashore by 2 mooring boats and lifted to the dolphins by hand. Only 2 head lines are secured on quick-release-hooks.

Van Ommeren, Berth Nos. 1, 2, 3 and 4: Cautionary Advice – Approaches: Ships approaching or leaving the Van Ommeren Berths have to transit Kohlbrand Fairway and have to pass through the Rethe Harbour. Ships should proceed at reduced speed. A good helmsman and quick engine response are of importance.

There are numerous berths in the Rethe Harbour which have to be passed at slow speeds.

CONTAINER HANDLING FACILITIES:

	Burchardkai	*Tollerort Terminal* *(SHED 90/91)*	*Africa Terminal*	*Euro-Kai KG aA*	*Terminal Kuhwerder* *(SHED 63/73)*	*Unikai-UCT. Container Terminal*

Tugs: The number of tugs used is according to the Master's request and Pilot's advice. The tugs should be fast before entering into the Kohlbrand. The tugs will be made fast "on the hook." It is recommended to use tugs lines at no extra charge.

3 tugs are normally used for vessels of less than 20,000 d.w.t., and 4 for all other vessel's except VLCCs.

Berthing: Berth No. 1 is located on the North bank of the Rethe. Ships are towed stern first into the berth. The spring lines will be run out first. Maximum draft ships should arrive with HW. Due to the narrow manoeuvring area at Berth No. 1, the approach speed of the ship should be minimal.

Berth No. 2 is located on the North bank of the Rethe. The ships are manoeuvred close to the berth, and the spring lines will be run out first. Max. draft ships should arrive with HW.

Berth No. 3 is located on the North bank of the Rethe. Ships up to 250,000 d.w.t. are berthed for tank cleaning purposes. The draft should be confirmed by the Pilots before arrival at the Sea Buoy. The ship manoeuvres close to the berth, and the spring lines will be run out first. Max. draft vessels should arrive with HW.

Berth No. 4 is located on the East side of the Neuhofer Harbour. Ships of up to 100,000 d.w.t. may berth with part cargo or for tank cleaning. Ships arriving for this berth will turn in the Rethe heading to the South and will then be towed stern first into the berth. Spring lines will be run out first. Max. draft vessels should arrive with HW.

DENSITY: Fresh water.

FRESH WATER: Available from shore at most berths. Also supplied by barge.

FUEL: All grades available from oil berths, or supplied by barge.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyards at Hamburg. Underwater repairs and cleaning can be effected by divers with special equipment.

DRY DOCKS: *Blohm and Voss,* Tel: 31190: 4 floating docks with lifting capacities up to 52,000 tons. 1 dock up to 20,000 tons. Graving dock, capacity up to 320,000 d.w.t.

Norderwerft, tel. 311000: 2 docks, for vessels up to 5,700 d.w.t. and 12,000 d.w.t.

There are other shipyards providing floating docks with lifting capacities of up to 5,000 tons.

SURVEYORS: Cargo inspectors available, contact Agent.

Lloyd's Register, American Bureau, Bureau Veritas and Salvage Association are represented.

WATCHMEN: Available for all purposes. Normally arranged by Agent.

OPENING/CLOSING HATCHES: Normally by crew with the assistance of stevedores; otherwise, according to charter party.

CUSTOMS ALLOWANCES: No restrictions in the freeport area on board a ship. While not on board the ship in the freeport area or outside the freeport during shore leave or temporary leaving the ship up to 3 days, each Crew member allowed 20 cigarettes, 5 cigars and 50 grams tobacco. These quantities change when paying off – up to 200 cigarettes or 50 cigars or 250 grams tobacco.

SURVEYORS: Germanischer Lloyd, Rodingsmarkt 33, D-20459 Hamburg. Tel: (040) 36149302. Fax: (040) 378470. Telex: 212828 glhh d.

REPATRIATION: Crew changes and repatriation can be carried out without difficulty.

AIRPORT: Distance 15 km., served by Lufthansa with flights worldwide.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Day (October 3rd); Prayer Day; Christmas Day; Boxing Day. No work on New Year's Day, Easter Sunday, May 1st, Whit Sunday and Christmas Day.

POLICE/FIRE/AMBULANCE: Police 110; Fire 112; Ambulance 110; Port Medical Service 321021 (or call Hamburg Port Radio on VHF Channel 14).

TELEPHONES: Telephones can be placed onboard at some berths. No telephone connections for vessels at dolphins.

EMERGENCY CO-ORDINATION: Call Police (Tel: 110) or Hamburg Port Traffic on VHF Channel 14.

BANKS: Deutsche Bank, Adolphsplatz 7, 20457 Hamburg. Tel: 040-37011. Telegraphic Address: Deutbank Hamburg. Telex: 212535.

Commerz-Bank AG, Ness 7, 20457 Hamburg. Tel: 040-361311. Telegraphic Address: Commerzbank Hamburg. Telex: 212391.

Dresdner Bank AG, Jungfernstieg 22, 20354 Hamburg. Tel: 040-3581. Telegraphic Address: Dreba Hamburg. Telex: 212098.

And others.

STORING: See "Prelims".

1. Vessels can be stored by barge or truck.
2. Vessels can store from barge during loading or discharging, except on tanker berths.
3. The truck can proceed alongside at the berths.
4. Fork lift trucks can be used for handling stores.
5. No Customs regulations in the Freeport area, outside the Freeport arranged by Agent.
6. Local riggers can be employed, arranged by Agent or ship chandler.

SHORE LEAVE: No restriction.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Service is available from various local suppliers listed below using garbage launches, only during normal working hours.

Johannis M. Pahl, Hermann Blohm Str. 26, 20457 Hamburg, Tel: 312046.

Heinrich C.Vogler, Kugelfang 24, 22297 Hamburg, Tel: 5110249.

Stella Maris, Reimarisstr. 12, 20459 Hamburg.

CURRENCY: Deutschemark(DM).

SHIPMASTER'S REPORT: 1978 (Updated 1996).

Vessel called at Hamburg to load a full load of steel beams for Iran under Time Charter. Originally charterers had asked me to calculate the full load with maximum S.W. draft of 38 ft. 00.875 in. with 10.5 in. F.W.A. and the weight came to more than 39,000 long tons. But later when we arrived at Hamburg, while checking with Port Authorities it was learnt that though vessels are allowed to come in with 42 ft. – 43 ft. (14.5 m. in 1996) drafts fresh water, no vessels excepting, at times fast container vessels are allowed draft more than 36 ft. (12.0 m. in 1996) fresh water. This is generally not known to many operators even in Hamburg.

Note: The above does not apply to large vessels over 330 m.

AUTHORITY: Freie und Hansestadt Hamburg, Amt fur Hafen, Schiffahrt und Verkehr Hafendirektion – Oberhafenamt, Baumwall 7, 20459 Hamburg, Germany. *Tel:* 3504-1327/1326 (office hours), and 740 3151 (day and night). *Telex:* 02174999 OHHH D. *Cables:* Mercurbehoerde Hamburg. *FAX:* (040) 3504-1859. *Contact:* Captain J. Pollmann, Harbour Master (Tel: 7403151. Fax: 7403179).

HOLTENAU, Kiel Canal: 54.22 N. 10.09 E. (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

LOCATION: Holtenau is a part of the town of Kiel, it is located on the Northern side of the entrance to the Kiel Canal.

BERTHING: The outer harbour of Kiel-Holtenau (Lat. 54° 22.2' N. Long. 10° 09.2' E.) in the N.E. part of the old lock fore port, with water depths of 3.5 to 4.5 m. and 280 m. long quay location serves vessels up to 3.5 m. draft, 85 m. long and 13 m. beam as a berthing point. At the quay not more than 3 ships with a total beam of 28 m. can lie next to each other. To the West of this, is a 125 m. long berthing pier, known as Kumobrucke, with 4.5 m. draft alongside for vessels up to 3 m. draft, 40 m. long and 8.5 m. beam. No more than 2 vessels may lie alongside each other.

Between this pier and the shore is a yacht harbour for pleasure craft.

The inner harbour, to the East of the Holtenau Road-bridge, can only be reached through the lock of the Kiel Canal. From the berths in the inner harbour, vessels may not enter the locks without a Pilot if they are obliged to take on a Pilot for the Kiel Canal.

The Gasworks quay, just to the West of the New Locks, has a length of approx. 210 m. and a nominal depth of 10.4 m. The quay has cranes with a lifting capacity up to 8.5 tons. Vessels up to 160 m. in length and up to 9.7 m. draft can tie up at the Gasworks quay (when coming from the Baltic, because of permitted draft in Kiel Canal, draft must not exceed 9.5 m.). To the West of it, is a landing place for Wik-Holtenau passenger ferries.

To the East of the Holtenau Road-bridge is an approx. 536 m. long quay belonging to Zerssen and Co. This location is used mainly for fitting out and bunkering of vessels. On the North side of the inner harbour ships with dimensions permissible for the Kiel Canal can tie up at the dolphins but only with special permission of the Kiel Canal Authority.

SERVICES: In Holtenau are a Service Station of the German Hydrographic Institute, a Pilot Station, a border police station, a water police station, Customs control, Port Doctor, Sailors' Central Control, Sailors' engagement office, and a sailors' hostel.

An office for marine charts and nautical publications is located at the lock; good facilities exist for the quick supply of ships' equipment, victuals and fuels. Repairs to machinery installations, radar and wireless apparatus, supply of spare parts, and also the exchange of crews can be arranged without long voyage delay virtually whilst a vessel is passing through the canal. Shipbrokers' services are available.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: Wasser-und Schiffahrtsamt Kiel-Holtenau, Schleuseninsel 2, P.O.Box 8068, 2300 Kiel 17. *Tel:* (0431) 385-1. *Telex:* 02-92836. *FAX:* (0431) 385-414. *Contact:* Port Captain, Tel: (0431) 385-450.

ITZEHOE: 53.56 N. 09.33 E. (See Plan)

DOCUMENTS:
2 Bonded Stores Lists
2 Crew Manifests
2 Crew Lists

PILOTAGE: Pilot available. Pilot boards at the entrance to the River Stor.

RESTRICTIONS: Entering River Stor at HW only. Proceeding to Itzehoe during daylight only, or up to Pilot. Departure from Itzehoe about 1 hour prior to HW.

MAX. SIZE: Length: 80 m. due to bends in river. Beam 12 m. Airdraft 18.50 m. due to height of Stor bridges. Draft 3.80 m. – 4.0 m.

RADIO/VHF: Elbe-Weser Radio on VHF Channel 16.

RADAR: *Radar Chain River Elbe:*

From Elbe Lanby to entrance River Stor:
Elbe – Ansteuerung-Radar VHF Channel 19
Neuwerk – 1-Radar VHF Channel 18
Neuwerk – 2-Radar VHF Channel 5
Cuxhaven – Radar VHF Channel 21
Belum – Radar VHF Channel 3
Brunsbuttel – Radar VHF Channel 4
Freiburg – 1-Radar VHF Channel 18
Freiburg – 2-Radar VHF Channel 22

Also see "General" before first port.

BERTHING: Total length: 420 m.

Depth alongside: At HW 4m.; at LW 1.90 m. (tidal range 2.20 m.). Bottom consists of soft mud.

CRANES: 2×3.5 tons lifting capacity and about 13 m. outreach and 1×5 tons lifting capacity and 12.5 m. outreach are available.

BULK HANDLING FACILITIES: *Grain:*

Loading: By conveyor-belt about 40 – 50 t.p.h. for heavy grain.

Discharging: By suction with 1 elevator pipe about 35 – 40 t.p.h. heavy grain. By grab/conveyor-belt 50 – 60 t.p.h. heavy grain. 100 – 120 t.p.h. fertiliser.

Grain silos of 35,000 tons capacity.

STEVEDORES: Cargo service, 2212 Brunsbuttel. Tel: 04852-87077. Telex: 28383 HTKB D.

Ahlmann – Transport GmbH, 2370 Rendsburg. Tel: 04331-5311. Telex: 29447. Cables: Ahltraship.

MEDICAL: Medical, hospital and dental facilities available.

DENSITY: Fresh water.

FRESH WATER: Available.

FUEL: All grades available by road tanker.

REPAIRS: Radio, radar, nautical equipment, engine, electrical and minor hull repairs possible.

SURVEYORS: Caleb Brett and SGS available from Hamburg.

Independent Marine Surveyors available at Brunsbuttel and Hamburg.

CUSTOMS ALLOWANCES: Customs allow each crew member 200 cigarettes and 1 bottle of spirits for consumption onboard.

OPENING/CLOSING HATCHES: Usually by crew.

REPATRIATION: Possible.

AIRPORT: Nearest airport at Hamburg.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: 1st January, Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, 17th June, Prayers Day, 25/26th December.

POLICE/AMBULANCE/FIRE: Police Tel: 110. Fire and Ambulance Tel: 112.

SERVICES: Provisions, stores, nautical publications and charts available.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: Stadthafen Itzehoe, Gasstr. 18, 25509 Itzehoe, Germany. *Tel:* 04821-774-409. *Telex:* 28107 SWIZ D. *FAX:* 75710. *Contact:* Mr. Besel.

KAPPELN: 54.40 N. 09.56 E.

PILOTAGE: Pilot station at Kiel Lighthouse.

RESTRICTIONS: Depth of water between Schleimunde and Kappeln from 4.5 m. to 14 m. at normal water level. Distance from Schleimunde to Kappeln about 3.5 nautical miles.

Passage width of the swing bridge is 22.5 m.

MAX. SIZE: *North Harbour:* Max. LOA 90 m., max. beam 18 m., max. draft 4.5 m.

South Harbour: Max. LOA 90 m., max. beam 18 m., max. draft 4.5 m.

BERTHING: *North Harbour:* There is 1 grain silo available with a storage capacity of 4,500 tons. The loading/discharging rate is 40 t.p.h. – 100 t.p.h. 1 quay for discharging/loading cargo.

South Harbour: One grain silo available with a storage capacity of 4,000 tons. Loading/discharging rate 40 t.p.h. – 100 t.p.h. One quay for loading/ discharging cargo.

CRANES: *North Harbour:* One hydraulic mobile crane available with capacity of 5 tons.

South Harbour: One hydraulic mobile crane available with capacity of 5 tons.

STEVEDORES: *Working Hours:* Monday to Friday 0700 – 1800 hrs. Saturday 0700 – 1200 hrs.

BULK HANDLING FACILITIES: See "Berthing" and "Cranes".

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Possible. Contact Alfred Eberhardt, Langestr. 2341 Arnis.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: Shipbroker Artur Koch, Dehnthof 21, P.O.Box 1131, 2340 Kappeln. *Tel:* (04642) 2354 and 4154. *Telex:* 22681 Koch D. *Cables:* Arturkoch Kappeln. *FAX:* 04642-3184. *Contact:* H.A. Koch, Harbour Master.

KIEL: 54.19 N. 10.10 E. (See Plan)

DOCUMENTS:

Stores List.
Bills of Lading.
Manifest.
Crew List.
Health Declaration.
Derat Certificate.
If loading/unloading cargo, following also required:
Ship's Stores List.
Crew Possessions List.
Cargo Manifest.
Bills of Lading.
Customs Declaration.
Local Agents will advise Master on board regarding these Clearance Documents.

DEEP-SEA PILOTAGE: See "Baltic Deep-Sea Pilotage".

PILOTAGE: Pilotage compulsory for vessels with LOA in excess of 90.0 m. or beam in excess of 13.0 m., oil, gas and chemical tankers.

Vessels proceeding in the approach area or through the Kiel Canal are obliged to take on a Pilot.

Vessels and push-type trains, as well as tug trains, having the greatest possible max. draft of 3.1 m. and belonging to traffic group 1 are exempted from the obligatory pilot service. Vessels with a breadth in excess of 15 m. or with a gross tonnage of over 2,500 tons (maximum tonnage) must take on recognised helmsmen (canal helmsmen) for the canal passage. Pilot station, tel. 362858. ETA required in advance. Pilot boat can be found near Kiel Lighthouse and also off the entrance to Kiel Canal. Pilot boats are white with red superstructure with "Lotse" painted on both sides. Signal for Pilot is flag "G" over numeral pennant 1. Pilots for Kiel Harbour also available and recommended if port is not familiar. Also see "Shipmaster's Report".

ANCHORAGE: Safe anchorages at Holtenau-Reede and at Heikendorf-Reede for vessels up to 9.7 m. draft.

RESTRICTIONS: Non gas-free tankers must give advance notice of arrival and will require chemist's certificate before entering harbour area. Max. LOA for Kiel port is 245 m. Special permission may be granted for greater lengths.

Speed limit 10 knots South of line Bulk/Ehrenmal Laboe. Also see "Shipmaster's Report".

MAX. SIZE: For Nordhafen and ships passing Canal, 235 m. length, 32.5 m. beam and 40 m. above the water level. For vessels up to 160 m. in length, the max. permitted draft is 9.5 m. In the case of vessels with length in excess of 160 m. and over 20 m. breadth, the max. permissible draft are shown in the following table (draft data in dm.).

Vessel Length (m.)	*Vessel's Breadth (m.)* *20*	*21*	*22*	*23*	*24*	*25*	*26*	*27*	*28*	*29*	*30*	*31*	*32*	*32.5*

Depth at harbour quays: Binnenhafen 10 m.; Scheerhafen, 10.00 m.

HEALTH: If suspected infectious disease on board, inform harbour authorities by radio in advance.

RADIO: Kiel Radio, call sign DAO. Tel. 39491.

VHF: Kiel Port radio on continuous watch during office hours on Channel 16, working on Channel 11.

Office hours are Monday to Thursday 0730 hrs. – 1600 hrs., and Friday 0730 hrs. – 1500 hrs. After office hours: Tel: 0171-6497373.

TUGS: If required tugs normally join vessel just off berth. Can be ordered by Kiel Radio or through Agents.

BERTHING: No particular restrictions except for vessels in distress, or carrying explosives or tankers not gas-free. In these cases special permission of Harbour Authorities required for berthing.

Commercial Harbour:

Depth of water up to 11.0 m.; quay lengths 4,080 m.; open storage areas of 176,950 sq.m.; covered shed space of 54,530 sq.m.; silos of 270,000 tons overall capacity; fuel depots; 16 cranes up to 45 tons lifting capacity; siding tracks; 12 Ro/Ro piers.

Binnenhafen Ports:

Osteseekai: The terminal is for the exclusive use of passenger and car ferries. Depth of water 7.5 m. Quay length 500 m. Ro/Ro Piers No. 3-6.

Sartorikai: Depth of water 7.0 m. (Southern part) and 5.5 m. (Northern part); quay length 200 m.; open storage areas of 1,000 sq.m.; covered shed space of 15,000 sq.m.; 2 cranes of up to 10 tons lifting capacity.

Schweden-Kai: The terminal is for exclusive use of passenger and car ferries. Depth of water 10.0 m.; quay length 180 m.; Ro/Ro Pier No. 7.

Bollhornkai Nord: Depth of water 10.0 m.; quay length 270 m.; 2 cranes of up to 24 tons lifting capacity; Ro/Ro Piers No. 8 and 9.

Bollhornkai Sud: Depth of water 10.0 m.; quay length 300 m.; open storage areas of 7,750 sq.m.; Ro/Ro Pier No. 10.

Bahnhofskai: Depth of water 6.0 m.; quay length 400 m.; open storage areas of 1,000 sq.m.

Scheerhafen: Depth of water 10.0 m.; quay length 300 m.; open storage areas of 8,000 sq.m.; covered shed space of 1,000 sq.m.; private fuel depots of 36,000 cu.m; private tanker discharging bridge and facilities for receiving dirty ballast; 2 cranes of 10 tons lifting capacity.

Nordhafen: Situated in the Kiel Canal. Depth of water 11.0 m.; max. draft 9.5 m.; quay length 1,030 m.; open storage areas of 15,550 sq.m.; covered shed space of 28,530 sq.m.; 77,000 ton silo with elevator of 200 t.p.h. loading/unloading performance; oil seed mill 6 cranes of 25 tons lifting capacity; 1 mobile crane of 45 tons capacity; Ro/Ro Pier No. 1.

Ostuferhafen: Depth of water up to 10.0 m.; quay length 1,300 m.; open storage areas of 150,000 sq.m.; covered shed space of 20,000 sq.m.; 177,000 ton silos; 2 cranes 40/45 tons lifting capacity; Ro/Ro Piers No. 11, 12, 13 and 14.

MEDICAL: Doctors, hospitals, ambulances available. Advance notice to Agents recommended if medical assistance required. Vessels coming from European ports need Derat Certificate. Vessels from other ports need in addition International Vaccination Certificates.

For all cases of poisoning needing special and urgent treatment telephone 597 4268, Medical University Clinic, Schittenhelmstrasse.

TANKERS: Unloading/Loading/Bunkering berths operated by private companies; slop discharge facilities available.

DENSITY: 1013 - 1015.

FRESH WATER: Available at all quays and in Holtenau Locks. Cost per ton: Up to 100 tons = DM 6.70; over 100 tons = DM 4.00.

FUEL: All grades available. Preferable to order in advance through Agents.

FIRE PRECAUTIONS: Tankers should be prepared to leave port at any time. To be berthed with bow heading seaward. A valid Gas-free Certificate given by chemist in Kiel district is required before entering harbour area.

CONSULS:

Austria	tel. 552505	Finland	tel. 9810

Many Consulates in Hamburg.

REPAIRS: All types of repairs possible.

DRY DOCKS: Floating Dock. No. 2, 22,500 tons.

Dry Docks: No. 5, 794 ft. long, 95 ft. wide; No. 6, 661 ft. long, 95 ft. wide; No. 7, 1,018 ft. long, 164 ft. wide; No. 8, 951 ft. long, 144 ft. wide. No. 8A, 1,395 ft. long, 292 ft. wide.

SURVEYORS: Germanischer Lloyd, Sophienblatt 1, D-23103 Kiel. Tel: 0431-675066. Fax: 0431-673235.

Lloyd's Register of Shipping, Wikengerstrasse 11, Kiel 14. Tel: 0431-74050. Fax: 0431-734715.

Berufsgenossenschaft, Preusserstrasse 1, Kiel 1. Tel: 0431-561023.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally by ship's crew. Can be arranged by stevedores if required.

CUSTOMS ALLOWANCES: 200 cigarettes (250 grams tobacco), 1 bottle of spirits and 1 bottle of wine.

REPATRIATION: No restrictions. Can also be arranged in the locks of Kiel Canal by local Agents. Valid passports required.

Bus and coach station: At Kiel, near Bollhornkai. Coaches to Hamburg Airport and other destinations.

Railway Station: Near bus and coach station. Trains to Hamburg, Lubeck, Berlin, Bremen, Hannover and other destinations.

AIRPORT: At Kiel, local flights to Berlin, Cologne and Frankfurt. Nearest international airport at Hamburg, about 90 km. away.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: New Year's Day, Good Friday, Easter (2 days), Ascension Day, Whitsun (2 days), Atonement Day, May 1st, October 3rd, Christmas (2 days). Work can be arranged on above holidays.

POLICE/FIRE/AMBULANCE: Police, Tel: 110; Harbour Police 579320; Ambulance 112, alternative 19222; Fire, Tel: 112.

TELEPHONES: Installed at ferry terminals and available on board ships. Public phones near quays.

SERVICES: All services available.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Garbage service provided alongside. It is ordered from Hafen und Verkehr. Tel: 0431-9822-152.

Charges: 1.1 cu.m. container DM 135.70/provision. 5 cu.m. container DM 418.60/provision. Collection is arranged when necessary.

WASTE OIL DISPOSAL:

1. H.Stallzus GmbH, Kiel. Tel: 0431-30901. Fax: 0431-338161. Location Scheerhafen, Tankerloschbrucke. Barges and tanker trucks.
2. E.Nohren GmbH, Kiel. Tel: 0431-321032. Fax: 0431-321051. Tanker trucks with maximum capacity 200 cu.m.
3. Arge Schiffsentsortung. Tel: 0431-782030. Fax: 0431-787702. Barges and tanker trucks, maximum capacity 400 cu.m.

SEAMAN'S CLUBS: Seaman's Home and Mission: Kanalstr. 64, D-2300 Kiel 17. Tel: 361206. International telephone connections in every room, church services, books and games available.

IDENTIFICATION CARDS: Not required.

GENERAL: *Garbage/Sewage Removal:* No discharge overboard of black and/or grey water permitted. Shore facilities available at Schwedenkai, Bollhornkai Nord and Sud, and Ostuferhafen. For all other quays, mobile units (tanks lorries) available.

DEVELOPMENTS: New "3rd" Ferry Terminal "Norwegenkai" on East bank opposite Bollhornkai Sud under construction and be completed by early 1997, to be used by passenger ferries, Ro-Ro cargo ferries and cruise vessels. Two Ro-Ro piers available.

SHIPMASTER'S REPORT: 1980.

"KIEL PILOTS" can be contacted on VHF Channel 16 and Channel 14, 2 hours before arriving at Kiel Lighthouse, for a Pilot for Kiel Harbour.

For vessels intending to transit the canal, send a message at least 3 hours in advance to "FORDE LOTSE – KIEL" by radio giving ETA, draft, g.r.t. and destination. Any request to arrange a Pilot at the other end of the canal may also be included in the message.

The maximum air draft allowed in the canal is 40 m. (from water line to highest point of the ship).

AUTHORITY: Hafen und Seemannsamt der Landeshauptstadt Kiel, Bollhornkai I, P.O. Box 2367, 24103 Kiel, Germany. *Tel:* 0431-901 1073. *FAX:* 0431-94477. *Contact:* Captain J. Morgenroth, Harbour Master (radio telephone 01611403705).

Wasser-und Schiffahrtsamt Kiel-Holtenau, P.O.Box 8068, 24103 Kiel. *Tel:* 0431-36030. *Telex:* 02-92836. *FAX:* 0431-3603454.

KIEL CANAL: (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

DEEP SEA PILOTAGE: Baltic Pilots Kiel ("Uberseelotsen Ostsee Kiel-Holtenau e.V.") is the address for ships entering the Baltic Sea via Kiel-Canal or from ports of the Federal Republic of Germany which require a Deep Sea Pilot for the Baltic Sea

The Baltic Pilots Kiel have 48 members. All members carry the "Red Licence" of BPAC which is the only licence acknowledged by all Baltic Governments.

Baltic Pilots Kiel: Tel: 0431-36 28 58 (24 hours a day). 0431-3 68 68 (office hours). Cables: Balticpilots Kiel. Telex: 299 857 bwki d. Postal Address: Uberseelotsen Ostee e.V. Schleuseninsel 6 D-2300 Kiel 17.

Also see "General – Deep-Sea Pilotage" before first port and "Baltic Deep-Sea Pilotage".

RADIO: Advise ETA at Elbe Lanby (or Kiel Lighthouse). Confirm ETA 12 hours before arrival at Pilot Station.

VHF: Approaching from the Baltic Sea, Kiel Radio listens on Channel 16 VHF and will notify the Kiel Pilot.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Not available in the locks of Kiel Canal.

WASTE OIL DISPOSAL: Not available in the locks of Kiel Canal.

SEAMAN'S CLUBS: Seamans Mission, Kanalstrasse 64, 2300 Kiel. Tel: 0431/361206 or 331492. Accommodation available.

CURRENCY: Deutsche Mark (DM).

GENERAL:

Additional information required prior to Kiel Canal transit: As a result of security regulations which became effective in 1978, the following regulations issued by the competent Authorities must be complied with when transiting the Kiel Canal.

Vessels which are potentially dangerous, which include pushing and towing units, carrying material listed in the special material list in bulk (See "Wilhelmshaven"), or after discharging mineral oil or petroleum products with a flash point below 35°C and still not gas free or inert, including Reactor vessels, must report as follows:

1. Coming from the North Sea or from a port within the River Elbe District or when transiting the Kiel Canal.

24 hours before entering the River Elbe, in writing, at the latest after clearing the last port:

to the Wasser-und Schiffahrtsamt Cuxhaven,
Am Alten Hafen 2, 24472 Cuxhaven. Telex: 292836.

With the following information:

1. Name and Call Sign of vessel. Estimated arrival time at first reporting position (day, date, local time).
2. Nationality of vessel.
3. Overall length and draft of vessel.
4. Port of departure and destination port.
5. Details and quantity of cargo with particulars of the stated dangerous cargo according to the special material list.
6. If chemicals are carried, a declaration that the vessel is in possession of a certificate as required by the IMO code for Chemical Tankers as "New Ship".
7. A declaration of any known defect in the vessel or its cargo.
8. Name of the Owners of the vessel.

2. Coming from the Baltic Sea and transiting the Kiel Canal as well as the River Elbe

24 hours before entering Kiel Bay, in writing, at the latest after clearing the last port:

To the Wasser-und Schiffahrtsamt Kiel-Holtenau,
Schleuseninsel 2, 24159 Kiel. Telex 292836.

giving the same information as required in 1. (above) for vessels entering the River Elbe.

3. Coming from a port within the Kiel Canal Range

Reports as per 1 and 2 have to be given.

To conform with the pilotage regulations for Kiel Bay and the River Elbe, the above mentioned vessels which are potentially dangerous are obliged to engage the services of a Pilot.

Further instructions are in force for above mentioned vessels when navigating within the River Elbe and Kiel Bay, as well as when transiting the Kiel Canal, or passing certain points. Pilots will advise the Masters of vessels of the relevant regulations and assist.

The Port Authorities at Cuxhaven and Kiel will inform each other about arrival of vessels with dangerous cargoes.

Potentially dangerous sea-going vessels of up to 300 g.r.t. should contact the relative Port Authority.

AUTHORITY: Wasser-und Schiffahrtsamt Kiel-Holtenau, (P.O.Box 8068, 24154 Kiel) Schleuseninsel 2, 24159 Kiel, Germany. *Tel:* (0431) 3603-0. *Telex:* 02-292836. *FAX:* (0431) 3603-454. *Contact:* H. Meinert, Port Captain, Tel: (0431) 3603-450.

STEVEDORES: Cargo service, 2212 Brunsbuttel. Tel: 04852-87077. Telex: 28383 HTKB D.

Ahlmann – Transport GmbH, 2370 Rendsburg. Tel: 04331-5311. Telex: 29447. Cables: Ahltraship.

MEDICAL: Medical, hospital and dental facilities available.

DENSITY: Fresh water.

FRESH WATER: Available.

FUEL: All grades available by road tanker.

REPAIRS: Radio, radar, nautical equipment, engine, electrical and minor hull repairs possible.

SURVEYORS: Caleb Brett and SGS available from Hamburg.

Independent Marine Surveyors available at Brunsbuttel and Hamburg.

CUSTOMS ALLOWANCES: Customs allow each crew member 200 cigarettes and 1 bottle of spirits for consumption onboard.

OPENING/CLOSING HATCHES: Usually by crew.

REPATRIATION: Possible.

AIRPORT: Nearest airport at Hamburg.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: 1st January, Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, 17th June, Prayers Day, 25/26th December.

POLICE/AMBULANCE/FIRE: Police Tel: 110. Fire and Ambulance Tel: 112.

SERVICES: Provisions, stores, nautical publications and charts available.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: Stadthafen Itzehoe, Gasstr. 18, 25509 Itzehoe, Germany. *Tel:* 04821-774-409. *Telex:* 28107 SWIZ D. *FAX:* 75710. *Contact:* Mr. Besel.

KAPPELN: 54.40 N. 09.56 E.

PILOTAGE: Pilot station at Kiel Lighthouse.

RESTRICTIONS: Depth of water between Schleimunde and Kappeln from 4.5 m. to 14 m. at normal water level. Distance from Schleimunde to Kappeln about 3.5 nautical miles.

Passage width of the swing bridge is 22.5 m.

MAX. SIZE: *North Harbour:* Max. LOA 90 m., max. beam 18 m., max. draft 4.5 m.

South Harbour: Max. LOA 90 m., max. beam 18 m., max. draft 4.5 m.

BERTHING: *North Harbour:* There is 1 grain silo available with a storage capacity of 4,500 tons. The loading/discharging rate is 40 t.p.h. – 100 t.p.h. 1 quay for discharging/loading cargo.

South Harbour: One grain silo available with a storage capacity of 4,000 tons. Loading/discharging rate 40 t.p.h. – 100 t.p.h. One quay for loading/ discharging cargo.

CRANES: *North Harbour:* One hydraulic mobile crane available with capacity of 5 tons.

South Harbour: One hydraulic mobile crane available with capacity of 5 tons.

STEVEDORES: *Working Hours:* Monday to Friday 0700 – 1800 hrs. Saturday 0700 – 1200 hrs.

BULK HANDLING FACILITIES: See "Berthing" and "Cranes".

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Possible. Contact Alfred Eberhardt, Langestr. 2341 Arnis.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: Shipbroker Artur Koch, Dehnthof 21, P.O.Box 1131, 2340 Kappeln. *Tel:* (04642) 2354 and 4154. *Telex:* 22681 Koch D. *Cables:* Arturkoch Kappeln. *FAX:* 04642-3184. *Contact:* H.A. Koch, Harbour Master.

KIEL: 54.19 N. 10.10 E. (See Plan)

DOCUMENTS:

Stores List.
Bills of Lading.
Manifest.
Crew List.
Health Declaration.
Derat Certificate.
If loading/unloading cargo, following also required:
Ship's Stores List.
Crew Possessions List.
Cargo Manifest.
Bills of Lading.
Customs Declaration.

Local Agents will advise Master on board regarding these Clearance Documents.

DEEP-SEA PILOTAGE: See "Baltic Deep-Sea Pilotage".

PILOTAGE: Pilotage compulsory for vessels with LOA in excess of 90.0 m. or beam in excess of 13.0 m., oil, gas and chemical tankers.

Vessels proceeding in the approach area or through the Kiel Canal are obliged to take on a Pilot.

Vessels and push-type trains, as well as tug trains, having the greatest possible max. draft of 3.1 m. and belonging to traffic group 1 are exempted from the obligatory pilot service. Vessels with a breadth in excess of 15 m. or with a gross tonnage of over 2,500 tons (maximum tonnage) must take on recognised helmsmen (canal helmsmen) for the canal passage. Pilot station, tel. 362858. ETA required in advance. Pilot boat can be found near Kiel Lighthouse and also off the entrance to Kiel Canal. Pilot boats are white with red superstructure with "Lotse" painted on both sides. Signal for Pilot is flag "G" over numeral pennant 1. Pilots for Kiel Harbour also available and recommended if port is not familiar. Also see "Shipmaster's Report".

ANCHORAGE: Safe anchorages at Holtenau-Reede and at Heikendorf-Reede for vessels up to 9.7 m. draft.

RESTRICTIONS: Non gas-free tankers must give advance notice of arrival and will require chemist's certificate before entering harbour area. Max. LOA for Kiel port is 245 m. Special permission may be granted for greater lengths.

Speed limit 10 knots South of line Bulk/Ehrenmal Laboe. Also see "Shipmaster's Report".

MAX. SIZE: For Nordhafen and ships passing Canal, 235 m. length, 32.5 m. beam and 40 m. above the water level. For vessels up to 160 m. in length, the max. permitted draft is 9.5 m. In the case of vessels with length in excess of 160 m. and over 20 m. breadth, the max. permissible draft are shown in the following table (draft data in dm.).

Vessel Length (m.)	*Vessel's Breadth (m.)*													
	20	*21*	*22*	*23*	*24*	*25*	*26*	*27*	*28*	*29*	*30*	*31*	*32*	*32.5*

Depth at harbour quays: Binnenhafen 10 m.; Scheerhafen, 10.00 m.

HEALTH: If suspected infectious disease on board, inform harbour authorities by radio in advance.

RADIO: Kiel Radio, call sign DAO. Tel. 39491.

VHF: Kiel Port radio on continuous watch during office hours on Channel 16, working on Channel 11.

Office hours are Monday to Thursday 0730 hrs. – 1600 hrs., and Friday 0730 hrs. – 1500 hrs. After office hours: Tel: 0171-6497373.

TUGS: If required tugs normally join vessel just off berth. Can be ordered by Kiel Radio or through Agents.

BERTHING: No particular restrictions except for vessels in distress, or carrying explosives or tankers not gas-free. In these cases special permission of Harbour Authorities required for berthing.

Commercial Harbour:

Depth of water up to 11.0 m.; quay lengths 4,080 m.; open storage areas of 176,950 sq.m.; covered shed space of 54,530 sq.m.; silos of 270,000 tons overall capacity; fuel depots; 16 cranes up to 45 tons lifting capacity; siding tracks; 12 Ro/Ro piers.

Binnenhafen Ports:

Osteseekai: The terminal is for the exclusive use of passenger and car ferries. Depth of water 7.5 m. Quay length 500 m. Ro/Ro Piers No. 3-6.

Sartorikai: Depth of water 7.0 m. (Southern part) and 5.5 m. (Northern part); quay length 200 m.; open storage areas of 1,000 sq.m.; covered shed space of 15,000 sq.m.; 2 cranes of up to 10 tons lifting capacity.

Schweden-Kai: The terminal is for exclusive use of passenger and car ferries. Depth of water 10.0 m.; quay length 180 m.; Ro/Ro Pier No. 7.

Bollhornkai Nord: Depth of water 10.0 m.; quay length 270 m.; 2 cranes of up to 24 tons lifting capacity; Ro/Ro Piers No. 8 and 9.

Bollhornkai Sud: Depth of water 10.0 m.; quay length 300 m.; open storage areas of 7,750 sq.m.; Ro/Ro Pier No. 10.

Bahnhofskai: Depth of water 6.0 m.; quay length 400 m.; open storage areas of 1,000 sq.m.

Scheerhafen: Depth of water 10.0 m.; quay length 300 m.; open storage areas of 8,000 sq.m.; covered shed space of 1,000 sq.m.; private fuel depots of 36,000 cu.m; private tanker discharging bridge and facilities for receiving dirty ballast; 2 cranes of 10 tons lifting capacity.

Nordhafen: Situated in the Kiel Canal. Depth of water 11.0 m.; max. draft 9.5 m.; quay length 1,030 m.; open storage areas of 15,550 sq.m.; covered shed space of 28,530 sq.m.; 77,000 ton silo with elevator of 200 t.p.h. loading/unloading performance; oil seed mill 6 cranes of 25 tons lifting capacity; 1 mobile crane of 45 tons capacity; Ro/Ro Pier No. 1.

Ostuferhafen: Depth of water up to 10.0 m.; quay length 1,300 m.; open storage areas of 150,000 sq.m.; covered shed space of 20,000 sq.m.; 177,000 ton silos; 2 cranes 40/45 tons lifting capacity; Ro/Ro Piers No. 11, 12, 13 and 14.

MEDICAL: Doctors, hospitals, ambulances available. Advance notice to Agents recommended if medical assistance required. Vessels coming from European ports need Derat Certificate. Vessels from other ports need in addition International Vaccination Certificates.

For all cases of poisoning needing special and urgent treatment telephone 597 4268, Medical University Clinic, Schittenhelmstrasse.

TANKERS: Unloading/Loading/Bunkering berths operated by private companies; slop discharge facilities available.

DENSITY: 1013 - 1015.

FRESH WATER: Available at all quays and in Holtenau Locks. Cost per ton: Up to 100 tons = DM 6.70; over 100 tons = DM 4.00.

FUEL: All grades available. Preferable to order in advance through Agents.

FIRE PRECAUTIONS: Tankers should be prepared to leave port at any time. To be berthed with bow heading seaward. A valid Gas-free Certificate given by chemist in Kiel district is required before entering harbour area.

CONSULS:

3. Arge Schiffsentsortung. Tel: 0431-782030. Fax: 0431-787702. Barges and tanker trucks, maximum capacity 400 cu.m.

SEAMAN'S CLUBS: Seaman's Home and Mission: Kanalstr. 64, D-2300 Kiel 17. Tel: 361206. International telephone connections in every room, church services, books and games available.

IDENTIFICATION CARDS: Not required.

GENERAL: *Garbage/Sewage Removal:* No discharge overboard of black and/or grey water permitted. Shore facilities available at Schwedenkai, Bollhornkai Nord and Sud, and Ostuferhafen. For all other quays, mobile units (tanks lorries) available.

DEVELOPMENTS: New "3rd" Ferry Terminal "Norwegenkai" on East bank opposite Bollhornkai Sud under construction and be completed by early 1997, to be used by passenger ferries, Ro-Ro cargo ferries and cruise vessels. Two Ro-Ro piers available.

SHIPMASTER'S REPORT: 1980.

"KIEL PILOTS" can be contacted on VHF Channel 16 and Channel 14, 2 hours before arriving at Kiel Lighthouse, for a Pilot for Kiel Harbour.

For vessels intending to transit the canal, send a message at least 3 hours in advance to "FORDE LOTSE – KIEL" by radio giving ETA, draft, g.r.t. and destination. Any request to arrange a Pilot at the other end of the canal may also be included in the message.

The maximum air draft allowed in the canal is 40 m. (from water line to highest point of the ship).

AUTHORITY: Hafen und Seemannsamt der Landeshauptstadt Kiel, Bollhornkai I, P.O. Box 2367, 24103 Kiel, Germany. *Tel:* 0431-901 1073. *FAX:* 0431-94477. *Contact:* Captain J. Morgenroth, Harbour Master (radio telephone 01611403705).

Wasser-und Schiffahrtsamt Kiel-Holtenau, P.O.Box 8068, 24103 Kiel. *Tel:* 0431-36030. *Telex:* 02-92836. *FAX:* 0431-3603454.

KIEL CANAL: (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

DEEP SEA PILOTAGE: Baltic Pilots Kiel ("Uberseelotsen Ostsee Kiel-Holtenau e.V.") is the address for ships entering the Baltic Sea via Kiel-Canal or from ports of the Federal Republic of Germany which require a Deep Sea Pilot for the Baltic Sea

The Baltic Pilots Kiel have 48 members. All members carry the "Red Licence" of BPAC which is the only licence acknowledged by all Baltic Governments.

Baltic Pilots Kiel: Tel: 0431-36 28 58 (24 hours a day). 0431-3 68 68 (office hours). Cables: Balticpilots Kiel. Telex: 299 857 bwki d. Postal Address: Uberseelotsen Ostee e.V. Schleuseninsel 6 D-2300 Kiel 17.

Also see "General – Deep-Sea Pilotage" before first port and "Baltic Deep-Sea Pilotage".

RADIO: Advise ETA at Elbe Lanby (or Kiel Lighthouse). Confirm ETA 12 hours before arrival at Pilot Station.

VHF: Approaching from the Baltic Sea, Kiel Radio listens on Channel 16 VHF and will notify the Kiel Pilot.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Not available in the locks of Kiel Canal.

WASTE OIL DISPOSAL: Not available in the locks of Kiel Canal.

SEAMAN'S CLUBS: Seamans Mission, Kanalstrasse 64, 2300 Kiel. Tel: 0431/361206 or 331492. Accommodation available.

CURRENCY: Deutsche Mark (DM).

GENERAL:

Additional information required prior to Kiel Canal transit: As a result of security regulations which became effective in 1978, the following regulations issued by the competent Authorities must be complied with when transiting the Kiel Canal.

Vessels which are potentially dangerous, which include pushing and towing units, carrying material listed in the special material list in bulk (See "Wilhelmshaven"), or after discharging mineral oil or petroleum products with a flash point below 35°C and still not gas free or inert, including Reactor vessels, must report as follows:

1. Coming from the North Sea or from a port within the River Elbe District or when transiting the Kiel Canal.

24 hours before entering the River Elbe, in writing, at the latest after clearing the last port:

to the Wasser-und Schiffahrtsamt Cuxhaven,
Am Alten Hafen 2, 24472 Cuxhaven. Telex: 292836.

With the following information:

1. Name and Call Sign of vessel. Estimated arrival time at first reporting position (day, date, local time).
2. Nationality of vessel.
3. Overall length and draft of vessel.
4. Port of departure and destination port.
5. Details and quantity of cargo with particulars of the stated dangerous cargo according to the special material list.
6. If chemicals are carried, a declaration that the vessel is in possession of a certificate as required by the IMO code for Chemical Tankers as "New Ship".
7. A declaration of any known defect in the vessel or its cargo.
8. Name of the Owners of the vessel.

2. Coming from the Baltic Sea and transiting the Kiel Canal as well as the River Elbe

24 hours before entering Kiel Bay, in writing, at the latest after clearing the last port:

To the Wasser-und Schiffahrtsamt Kiel-Holtenau,
Schleuseninsel 2, 24159 Kiel. Telex 292836.

giving the same information as required in 1. (above) for vessels entering the River Elbe.

3. Coming from a port within the Kiel Canal Range

Reports as per 1 and 2 have to be given.

To conform with the pilotage regulations for Kiel Bay and the River Elbe, the above mentioned vessels which are potentially dangerous are obliged to engage the services of a Pilot.

Further instructions are in force for above mentioned vessels when navigating within the River Elbe and Kiel Bay, as well as when transiting the Kiel Canal, or passing certain points. Pilots will advise the Masters of vessels of the relevant regulations and assist.

The Port Authorities at Cuxhaven and Kiel will inform each other about arrival of vessels with dangerous cargoes.

Potentially dangerous sea-going vessels of up to 300 g.r.t. should contact the relative Port Authority.

AUTHORITY: Wasser-und Schiffahrtsamt Kiel-Holtenau, (P.O.Box 8068, 24154 Kiel) Schleuseninsel 2, 24159 Kiel, Germany. *Tel:* (0431) 3603-0. *Telex:* 02-292836. *FAX:* (0431) 3603-454. *Contact:* H. Meinert, Port Captain, Tel: (0431) 3603-450.

KREFELD: 51.20 N. 06.34 E.

BERTHING: Depth at entrance 4.0 m. at MLW. There is over 11 km. of quays.

CRANES: Port Authority: 4×3/6 tons electric cranes, 1×8/20 tons bridge crane.

Private: 2×6/12 tons bridge cranes. 1×200 tons crane for bulk goods. 3 electric cranes.

BULK CARGO FACILITIES: Facilities for handling dry bulk cargoes.

STEVEDORES: *Working Hours:* Monday – Thursday: 0730 hrs. – 1630 hrs. Fridays: 0730 hrs. – 1530 hrs.

TANKERS: Petroleum and bunkers handled.

FRESH WATER: Available.

FUEL: Available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

AIRPORT: Dusseldorf 26 km.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day, Easter Day, Labour Day (1st May), 3rd October, Christmas Day. In case of emergency, work can be performed on these days.

AUTHORITY: Hafen und Bahnbetriebe der Stadt Krefeld, Oberstrasse 13 (Postfach 268), 47829 Krefeld, Germany. *Tel:* 02151-492715. *Contact:* Mrs. Lehnen.

LUBECK (including Travemunde): 53.52 N. 10.40 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
1 General Declaration for Arrival and Departure.
1 Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
1 Ship's Particulars form.
Crew Manifest.
Bills of Lading.
Customs Declaration.
Derat Certificate.

PILOTAGE: Compulsory for vessels over 55 m. LOA or 8.0 m. beam. Pilot station situated at Travemunde, near foot of Nordermole. Pilots board vessels in anchorage area. International signals used by Pilots and by vessels requiring a Pilot. Contact by VHF Channel 13 and 20.

RESTRICTIONS: Channel from Lubeck "A" buoy to Stadthafen is well lit and navigable by vessels fitted with radar in all weathers.

Depths: from "A" buoy to Travemunde (Nordermole) 10.5 m.; from Nordermole to Siechenbucht, 10 m.; channel to NWK power station, 9.5 m.; channel to Stadthafen 9.5 m. The river Trave narrows from 130 m. at seaward end to 80 m. at Stadthafen.

MAX. SIZE: Dependent on berth depth and approaches. Vessels up to 15,000 d.w.t. can reach Stadthafen. Also see "Restrictions".

HEALTH: Radio Pratique possible. Pilot will ask Master to complete Health Declaration.

RADIO: Lubeck Radio, VHF Channel 27. Harbour Radio service used by Pilots, tugs, and other vessels.

TUGS: At Stadthafen vessels over 90 m. LOA require 1 tug and vessels over 100 m. LOA require 2 tugs.

BERTHING:

Travemunde: Passenger ferry harbour. North side river Berths I and II, 7.5 m. depth; Kaiserbrucke, 100 m. length, 8.0 m. depth; Ostpreussenkai, 190 m. length, 7.0 m. depth; Priwall (South side), 180 m. length, 5 m. depth. 8 berths for Roll-on/Roll-off and passenger traffic each 140 m. – 220 m. length, 7 m. – 9.5 m. depth.

2 berths with railway connection, (Berths No. 6 and 7).

Industriehafen: Depth alongside 7.8 m. – 9.5 m.

Stadthafen: 27 km. from sea. Total length of quays 7.6 km. The harbour depth is 6 m. – 9.5 m.

Elbe Lubeck Canal: Navigable by barges up to 1,200 tons.

CRANES: 1×200 ton floating crane, 1×40 ton, 1×25 ton, 1×12 ton, also 3 ton cranes.

BRIDGE: Herrenbrucke is 56 m. wide and 22 m. above water level. Can be opened for vessels requiring higher clearance.

MEDICAL: All facilities available. Hospital near docks at Travemunde, and at Lubeck (Medical University).

TANKERS: No facilities.

FRESH WATER: Available by barge at any location.

FUEL: Fuel available at berth at Scandinavia Kai in Travemunde and by barge from Hamburg.

CONSULS: Austria, Finland, Iceland, Norway and Sweden.

REPAIRS: Several shipyards available for deck and engine repairs.

DRY DOCKS: Floating docks for vessels up to 13,500 tons (45,000 tonnes d.w.t.).

SURVEYORS: Addresses of inspectors and classification society representatives can be obtained from the Chamber of Commerce and Industry at Breite Strasse 6 – 8, Lubeck.

Germanischer Lloyd, Unter der Herrenbrucke 2.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: All facilities available.

AIRPORT: Hamburg, 1 hour by bus or train.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: 1st January, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 3rd October, Atonement Day, Christmas Day, Boxing Day.

POLICE: Lubeck River Police, tel. 3 34 40; Travemunde River Police, tel. 74141.

BANKS: *Lubeck:* Commerzbank, Breite Strasse 52/54. Dresdner Bank, Breite Strasse 83/87. Deutsche Bank, Kohlmarkt 7 – 15.

Lubeck-Travemunde: Commerzbank, Vorderreihe 50. Deutsche Bank, Vorderreihe 35. Deutsche Bank, Vorderreihe 62.

STORING: See "Prelims".

1. Vessels can be provisioned by lighters and lorries at all berths.
2. No limitation of time for provisioning.
3. Lorries can go right alongside vessels, provided the loading and unloading operations permit.
4. At virtually all berths (with exception of the Wood Pier at Lubeck-Travemunde) fork lifts can be used.
5. Customs procedure as in all German ports.
6. There is always the possibility of obtaining riggers.

TELEPHONES: Ship telephone connections at Ro/Ro berths.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Service available. Containers of 1.1 cu.m. and 4.4 cu.m. capacity placed on board and alongside. Garbage collection on Fridays 0700 – 1500 hrs. Tel: 0451-12-27040 for details.

WASTE OIL DISPOSAL: Service available by tanker trucks or barge. Tel: 0451-401011 or 0451-2112 for details.

SEAMAN'S CLUBS: Deutsche Seemannsmission, Tel: 72991 for details.

CURRENCY: Deutsche Mark (DM).

SHORE LEAVE: Allowed.

AUTHORITY: Hafenkapitan, (Port Captain), Wielandstrasse 14, 23558 Lubeck, Germany. *Tel:* 0451-12-28600. *FAX:* 0451-12-28690.

NEUSS: 51.12 N. 06.41 E. (See Plan)

RESTRICTIONS: No restrictions, vessels may enter the harbour day or night.

MAX. SIZE: Inland waterway craft and sea-going ships (usual Rhine dimensions).

VHF: Channel 10.

BERTHING: 5 berths available.

Facilities: Waterway area 72 ha. with 17.5 km. of quayage.

Ro-Ro Terminal, container station, KLV Terminal, coastal traffic, hazardous cargoes, scrap metal.

Storage:

Open storage: 250,000 sq.m.
Covered storage: 140,000 sq.m.
Grain capacity: 160,000 tons.
Tank capacity: 120,000 tons.

CRANES: 36 electric cranes with 30 tons capacity. 1 electric crane with over 30 tons capacity.

BULK CARGO FACILITIES: The port handles chemical products, mineral oil and oil products, cement, coal, lime, general cargoes, grain.

MEDICAL: Full hospital facilities available in the city.

FRESH WATER: Available in every berth.

FUEL: All grades available.

REPAIRS: No facilities.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: No requirement, except for special vessels as determined by the port.

AIRPORT: Dusseldorf (all international destinations), 10 km.

HOLIDAYS: New Year's Day, Easter Sunday, Easter Monday, Whit Sunday, 1st May and Christmas Day.

POLICE/AMBULANCE/FIRE: Police, Tel: 110. Ambulance, Tel: 112. Port, Tel: (02131) 908220.

TELEPHONES: Public telephones available.

BANKS: All major banks have branches in the city.

GARBAGE DISPOSAL: Garbage disposal available at every berth.

GENERAL: Railways and road transport in all directions.

AUTHORITY: Staedtische Hafenbetriebe Neuss, Hammer Landstrasse 3, D-41460 Neuss, Germany. *Tel:* (02131) 908200. *FAX:* (02131) 908282. *Contact:* Ludwig von Hartz, Harbour Director.

NORDENHAM: 53.29 N. 08.29 E. (See Plan)

(Also see Bremen and Bremerhaven)

DOCUMENTS:
Cargo Papers and Ship's Certificates.
1 Stores List.
3 Crew Lists.
2 Personal Manifests.
Derat Certificate.

DEEP SEA PILOTAGE: See "General" before first German port and "Baltic Deep-Sea Pilotage".

PILOTAGE: Pilot boards off the Weser Lanby. Docking Pilot will board off Bremerhaven.

ANCHORAGE: Sea anchorage off Weser Lanby or the Hoheweg Light for all types of vessels. River anchorage off Blexen, 1 mile above Bremerhaven for vessels up to 120 m. LOA.

RESTRICTIONS: No restriction except vessels with a length exceeding 260 m. and a draft of 38 ft. Vessels with a draft exceeding 30 ft. will be controlled by tidal conditions. Controlling depth in channel 11 m. MLW. In the port 9 m. to 12 m. at MLW (Midgard Pier).

MAX. SIZE: (The max. drafts are estimated).

Midgard Pier: (a) Bulk cargo berth, total length 1,068 m. Max. LOA 270 m. max. draft 42 ft. 08 in. (FW), to be increased to 44 ft.

(b) Oil Berth No. 1 (combined with Southern part of 'a'), max. length 850 ft., beam 120 ft., draft 42 ft. 08 in.

(c) Oil Berth No. 2, max. draft 42 ft. 08 in. (FW).

(d) Granary, quay length 188 m., draft 38 ft. – 40 ft. (FW) weather permitting.

Midgard Terminal (Blexen): Max. length 820 ft. (250 m.) up to a draft of 12.60 m. (FW).

Guanowerk, max. length 550 ft., max. draft 30 ft. (FW) (approx.).

Metaleurop, max. length 550 ft., draft 27 ft.

Also see "Tankers".

HEALTH: Pratique granted immediately on arrival in port by Health Official.

RADIO: Norddeich Radio (DAN) or Elbe-Weser Radio (VHF Channel 16).

RADAR: No port radar available. Radar for entrance see "Bremerhaven".

TUGS: Ample available from Bremerhaven. Tug's lines used.

BERTHING: The following industrial works and companies within the port area of Nordenham possess a berth each for sea-going vessels which serve only their private supplies and requirements. These berths are situated North of Midgard Pier.

1. Norddeutsche Seekabelwerke Aktiengesellschaft, (production of cables).
2. Felten & Guilleaume Schatanlagen GmbH (production of electric appliances, motors, etc.).
3. Metaleurop. Length of quay 230 m., depth of water 32 ft. 10 in. (approx.) 2 cranes of 10 and 5 tons. Capacity 200 t.p.h. and 90 t.p.h. respectively. Storage capacity, 50,000 tons (coal or ore). 10,000 tons (metal blocks), 5,000 cu.m. (sulphuric acid).
4. Erdolwerke Frisia Aktiengesellschaft (tanks for the storage of mineral oils).
5. DASA-Deutsche Aerospace (production of airplanes).
6. Weser Tanklager Gesellschaft GmbH (storage of mineral oils, bunker oil station of BP).
   Connections: Gas oil 2×8 in., fuel 1×8 in.
7. Titangesellschaft GmbH (production of titandioxide).

SPECIAL CARGO HANDLING FACILITIES:

Midgard Pier:

No. 1. Bulk cargo berth for discharging and loading. Length of quay 710 m. Depth 12 m. Four bridges with a lifting capacity up to 22 tons. Max. outreach 27 m. One jib crane up to 65 tons capacity, max. outreach 46 m. Capacity: 30,000 tons ore per 24 hours. 25,000 tons of coal per 24 hours. Connections for mineral oil and molasses.

No. 2. Oil berth. Length of quay 170 m. Depth 9.5 m. Three pipelines 10 in. to 12 in. diameter for fuel oil, diesel oil and gas oil. No shore steam or facilities for dirty ballast available.

No. 3. Granary. Length of quay 188 m. Depth 12 m. Two elevators with a total discharge capacity of 700 t.p.h. Loading rate to vessels 300 t.p.h. Storage capacity of 46,000 tons.

No. 4. Midgard Terminal (Blexen): Length 210 m. Extra mooring dolphins North and South of wharf 50 m. from each end of wharf. Depth alongside 12.5 m. at MLW. 2 mechanical unloaders for discharge. Special storage facilities for bulk cargoes. The berth can accept vessels up to 80,000 d.w.t. fully laden or up to 125,000 d.w.t. with a part cargo.

STEVEDORES: 24 hours' notice required. Notice required Friday morning for week-end work.

1st shift: 0600 – 1400 hrs.
2nd shift: 1400 – 2200 hrs.
3rd shift: 2200 – 0600 hrs. (overtime).

On Saturdays:
1st shift: 0600 – 1400 hrs.
2nd shift: 1400 – 2200 hrs. (overtime).
3rd shift: 2200 – 0600 hrs. (overtime).

On Sundays:
1st shift: 0600 – 1200 hrs. (overtime).
2nd shift: 1200 – 1800 hrs. (overtime).
3rd shift: 1800 – 2400 hrs. (overtime).
4th shift: 2400 – 0600 hrs. (overtime).

MEDICAL: Hospital available; advance notice only required if urgent cases.

TANKERS: Diameter of lines 8 in.

Shell Berth: Max. draft 34 ft.

Weser Tankerlager: Max. size 200 m., length 32 ft. draft at LW. T-shaped mooring lines attached to pontoons fore and aft, middle lines are attached to the shore. Length of lines 100 m.

Also see "Special Cargo Handling Facilities".

DENSITY: Average density of water 1005 – 1012.

FRESH WATER: Fresh water available at a rate of 15 t.p.h. per hose price DM 6.30 per ton.

FUEL: All grades available; delivery by barge; 2 days' notice required.

FIRE PRECAUTIONS: Special regulations for vessels loading or discharging explosives.

CONSULS: See "Bremerhaven".

REPAIRS: Minor repairs can be carried out. Ample facilities for major repairs at Bremerhaven.

DRY DOCKS/SURVEYORS: See "Bremerhaven" or "Bremen".

WATCHMEN: Not necessary but available if required by Master.

OPENING/CLOSING HATCHES: Normally by crew but if by stevedores extra charges will apply.

CUSTOMS ALLOWANCES: Each crew member 200 cigarettes or 30 cigars or 30 grammes of tobacco and 1 bottle of spirits for a running period of 3 days.

CARGO GEAR: In most cases loading and discharging is effected with shore gear. Special equipment can be ordered from Bremerhaven.

REPATRIATION: Possible by air via Bremen or Hamburg.

AIRPORT: Bremen, distance 70 km., 1 hour by car. Hamburg, 200 km., 2 hours by car.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 2052; Fire 112.

TELEPHONES: Available on request.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Available.

REGULATIONS: Port regulations for the Midgard Pier including special regulations for handling of explosives.

DELAYS: None except waiting for high tide (See "Restrictions").

AUTHORITY: "Midgard" DSAG, Midgardstr. 50, 26954 Nordenham (Postal Address: P.O.Box 1452/1453, 26944 Nordenham), Germany. *Tel:* 4731/810. *Telex:* 238317. *FAX:* 4731/88564. *Cables:* Midgard Nordenham. *Contact:* Mr. Werner, Chairman. Mr. Gocht, Pier Inspector.

PAPENBURG: 53.06 N. 07.23 E. (See Plan)

LOCATION: Papenburg is 20 nautical miles above Emden on the Ems seaway at km. 0.0 and on the inland waterway Dortmund – Ems canal at km. 225.82.

PILOTAGE: The Sea Pilot is taken on board from the pilot cutter at Westerems and the district and Port Pilot at the Emden Pilot Station. All vessels over 1,000 g.r.t. (sea-going), and all oil, gas and chemical tankers require a Pilot.

RESTRICTIONS: *Lock operating times:* From 1st April to 30th September, Monday to Saturday, from 0600 to 2000 hrs.

From 1st October to 31st March, Monday to Saturday, from 0700 to 1800 hrs.

Lockings outside operating times, and on Sundays and Holidays must be promptly reported, at the latest half an hour prior to normal lock operating times, by telephone 04961/2640 or via VHF Channel 13.

Also see "Bridges".

MAX. SIZE: Vessels with a max. draft of 5.8 m. can reach the port during MHWST. Vessels with a greater draft must discharge at Leerort.

VHF: Communications with the lock-keeper are on Channel 13. Bridges are on Channel 15.

BERTHING: The port is connected to the Ems by a lock 26 m. wide and 152 m. long. Ships with a beam greater than 26 m. can reach the port by a lock 40 m. wide. The port has a foreport (300 m. long and 80 m. wide), the sluice canal (1,900 m. long and 65 – 90 m. wide), the Southern Industrial Port (500 m. long and 100 m. wide), the Northern Industrial Port (600 m. long – 80 m. wide), the Dever Port (450 m. long and 80 m. wide), the railway dock (300 m. long and 50 m. wide), the Werft Port 200 m. long and 100 m. wide), the Turm Canal (300 m. long and 35 m. – 60 m. wide, which can be reached through a 11.0 m. wide steel bridge), and the yacht marina. Depths vary from 3.5 m. to 6 m.

Of the 3,700 m. of the Spundwand Quay, 2,500 m. are devoted to cargo handling.1,200 m. of this is provided with railway lines. The total length of the port railway facility is 6,700 m. 40,000 cu.m. of open free storage space can be used for bulk cargo accommodation. Further open and covered storage areas, together with silo facilities, for approx. 11,000 tonnes cargo are available through companies operating within the port.

CRANES: In the port area there is one heavy lift crane up to 120 tons capacity, 1 heavy lift crane 140 tons, 1 heavy lift crane 50 tons, 7 jib cranes 3 – 15 tons, 1 gantry crane 6 tons with a 52 m. long traverse, 1 crane 6.5 tons, 1 crane 5 tons, 2 cranes 1 ton, 2 mobile cranes 11 tons and 40 tons, 1 floating crane 6 tons, 1 mobile conveyor belt 100 t.p.h., 2 grain handlers 30 t.p.h. and 40 t.p.h.

BRIDGES: At Ems km.15.02 the Leerort road bridge has to be passed; 44 m. passage width. Opening times from sunrise to sunset and after prior report by telephone 0491/2992 and VHF Channel 15.

At Ems km.6.9, the railway folding bridge has to be passed (Weener). The passage width is 24 m. Opening times are as per the current traffic plan. The bridge is manned daily, also Sundays and holidays, from 0400 to 2200 hrs. Telephone 04951/2065 and VHF Channel 15.

Both bridges have a passage height when closed of 3.50 m. at MHWST.

FRESH WATER: Available.
FUEL: Available.
REPAIRS: Vessels up to 30,000 tons, length 250 m. and width 35 m. can be repaired at the local shipyards.

Shipbuilding dock: A covered building dock with length 350 m. and width 39 m.

DRY DOCKS: A drydock of 250 m. length and 36 m. width is available.
POLICE/AMBULANCE/FIRE: Water Police Tel: 04961/4144 or 04961/72982 (After hours).
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: Garbage can be delivered to garbage-drum in the lock.
WASTE OIL DISPOSAL: Waste oil disposal is available by tanker trucks only.
SEAMAN'S CLUBS: None.
CURRENCY: Deutsche Mark (DM).
DEVELOPMENTS: The port installations are currently being extended by the Industry Port – North which will be approximately 1,000 m. long (300 m. finished) and 100 m. wide.
AUTHORITY: Hafenamt Papenburg-Ems, P.O.Box 1755, 26871 Papenburg, Germany. *Tel:* 04961-821.

Hafenamt Papenburg, An der Seeschleuse, 26871 Papenburg, Germany. *Tel:* 04961-2640. *FAX:* 04961-234. *Contact:* Captain W. Hermanns, Harbour Master. (A.O.H. *Tel:* 04961-3169).

RENDSBURG: 54.18 N. 09.40 E. (See Plan)

SHIPMASTER'S REPORT: June 1988.

DOCUMENTS:
2 copies Crew List.
1 copy Stores List (including tea, coffee, tobacco, spirits, cigarettes, wine).
1 copy Crew Personal Effects List (to be completed on special Customs form supplied by the Agent).

PILOTAGE: When coming from the Baltic, vessel takes a Lock Pilot and a Docking Pilot. If arriving from Brunsbuttel, Docking Pilot boards the vessel at Nubbel, a few miles from Kreishafen.
RESTRICTIONS: Maximum draft 9.5 m., air draft 40 m. The maximum draft is also controlled by Navigation Rules of the Kiel Canal and varies according to vessel's LOA and breadth.

There is no restriction on beam except when discharging into barges overside, when the maximum beam permitted is 15.0 m.

TUGS: 2×300 h.p. and 1×700 h.p.
BERTHING: The total length of Kreishafen Wharf is 750 m. The berth was rebuilt and dredged to 10.0 m. in 1986.
CARGO HANDLING FACILITIES: Daily discharge rate for fertiliser 700 tonnes – 2,500 tonnes, depending on quality of fertiliser.

Four bulldozers of 3 tons each are available to assist when discharging.

CRANES: 7×2 tons – 18 tons. Four of the cranes are suitable for grab discharge.
DENSITY: Brakish water.
STEVEDORES: ETA notice to stevedores should be sent through the vessel's Agent. Stevedores require 14 days, 10 days, 7 days, 5 days, 4 days, 2 days and 1 days notice.

Working hours are from 0600 hrs. – 1800 hrs. on Mondays to Fridays. Work carried out after 1800 hrs. weekdays and all weekend work is on overtime rates.

MEDICAL: There is a hospital available. Specialist doctors also available.
TANKERS: Esso Berth for handling chemicals, length 70 m., depth alongside 6.0 m. BP Berth for bunkering, length 80 m., depth alongside 8.0 m.
FRESH WATER: Available at the berth.
FUEL: Not easy to obtain and only available in small quantities by truck. Fuel is very expensive.
CONSULS: Nearest Consuls at Kiel and Hamburg.
REPAIRS: Facilities available.
DRY DOCKS: 2 dry docks available, Dry Dock No. 1: 155 m.×22.7 m.×5.80 m. Dry Dock No. 2: 193 m.×32 m.×6.3 m.

There is a floating dock with capacity 4,400 tons, length 120 m., breadth 22.0 m., maximum draft 5.5 m. (forward) and 5.8 m. (aft). The floating dock has one crane with capacity 10 tons.

SURVEYORS: Germanischer Lloyd based at Kiel. Lloyd's and ABS based at Hamburg.
GANGWAY/DECK WATCHMEN: Ship's crew are required to attend moorings as passing traffic sometimes not proceeding at low speed. Moorings should consist of 3 head and stern lines and 3 spring lines fore and aft.
OPENING/CLOSING HATCHES: Ship's crew open and close hatches.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottles of spirit allowed every 4 days.
REPATRIATION: Possible via Hamburg.
TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).
HOLIDAYS: All normal German holidays.
POLICE/AMBULANCE/FIRE: 110, 110 and 112 respectively.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

ROSTOCK: 54.09 N. 12.08 E. (See Plan)

DOCUMENTS:
Health Declaration.
6 Crew Lists.
2 Passenger Lists.
2 Currency Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory. Contact by VHF Channel 16, working Channel 12. Pilot boards at Warnemunde Light Buoy. International code signals used. Also see "Baltic Deep-Sea Pilotage".
ANCHORAGES: In Warnemunde Roads, off port entrance, in depths of 48 ft.
RESTRICTIONS: Entrance channel from Warnemunde Light Buoy to Overseas Port at mouth of River Warnow, depth 13.0 m.
MAX. SIZE: For Overseas Port: length 230 m., beam 32 m., draft 11.58 m. (38 ft.). For City Docks: 142 m. length, 21 ft. draft. Also see "Tankers".

Berth No.	*Max. Draft* (m.)	(ft. in.)	*Remarks*
03	9.45	31 0	Max. LOA 215 m.
04	11.58	38 0	(37 ft. for turbine vessels)
05	11.58	38 0	Max. LOA 190 m.
07	9.02	29 7	
12	10.36	34 0	Max. LOA 210 m.
16	10.36	34 0	Max. LOA 180 m.
17	11.58	37 0

64	8.10	26 1	
65	9.45	31 0	(Ferry)
66	9.45	31 0	(Ferry)
67	10.36	34 0	(Ferry)

HEALTH: Pratique given on arrival. In case suspected disease or fever on board, radio details to Agent before arrival. Complete Declaration of Health required.
RADIO: Rugen Radio, call sign "Y5M".
TUGS: Available. Use of at least 1 tug is compulsory for vessels of more than 100 m. LOA berthing and unberthing.

Sufficient number of tugs available, from 300 h.p. to 1,200 h.p. Tugs normally join vessel in front of the mole.

BERTHING: *Overseas Port:* Situated in Lower Warnow River about 3.8 miles from Warnemunde Sea Buoy.

Pier No. 1: 13 berths. West: Ro-Ro and Ferry Terminal.
East: General goods, depth 30 ft. to 34 ft.
Pier No. 2: 13 berths. General goods, depth 30 ft. to 33 ft.
Pier No. 3: 4 berths. Bulk cargoes, depth 30 ft. to 38 ft.
Pier No. 4: 3 berths. Grain, Feedstuffs, Fish Meal. Depth 37 ft., berth Urea, Potash.
Oil Pier: 3 tanker berths, depth 34 ft. to 38 ft.

Chemical Port: 1 berth. Depth 29 ft. 7 in. Products Handled: Ammonia, Methanol and Butane.

Warnemunde: Port for passenger service. Quay length 270 m. Depth alongside 27 ft. 06 in.

Port Control to be contacted through VHF Channel 73.

Roll-on/Roll-off terminal with facilities for 20 ft. and 40 ft. containers. Max. draft 31 ft.

There are 4 ferry terminals (Berths No. 64 – 67).

CRANES: *Overseas Port:* 35 cranes and 5 crane-bridges with capacities from 3.2 – 63 tons. Container facilties and container gantry crane available.

City Docks: Crane capacities 2 – 10 tons.

BULK HANDLING FACILITIES: 18 berths, length of quay 2,000 m. 3 bridges with 20 tons capacity and outreach of 40 m. 2 unloaders 1×500 t.p.h. and 1×2,000 t.p.h. Storage area 270,000 sq.m. for bulk cargo.
MEDICAL: Doctors available. Advance notice to Agent required if medical assistance necessary.
TANKERS: 3 berths available. Max. size 50,000 d.w.t. Max. length 230 m., Max. draft 38 ft.

Berth No. 03, 31 ft. (max. LOA 215 m.)
Berth No. 04, 38 ft. (max. LOA 230 m.)
Berth No. 05, 30 ft. (max. LOA 215 m.)

Storage capacity of 260,000 cu.m. Max. discharge rate 2,900 cu.m.p.h.

FRESH WATER: Available ex-shore hydrants.
FUEL: Available all grades fuel and gas oil by barge. Vessels calling for bunkers only, pay no harbour dues, and other fees are reduced.
REPAIRS: All repairs possible. Neptun Shipyard and other repair shops situated at City Docks and Warnemunde.
Tank cleaning, boiler cleaning and repairs.
SURVEYORS: Germanischer Lloyd, Doberanerstr. 44-47, D-18057 Rostock. Tel: (0381) 492880. Fax: (0381) 4928830.
REPATRIATION: Can be arranged if identification papers in order.
TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours (24th March – 26th October).
HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; Ascension Day; 3rd October; Christmas Day; 26th December.
AIRPORT: Berlin and Hamburg. Rostock-Laage (internal flights).
TELEPHONES: Ship-to-shore connections available.
POLICE/AMBULANCE/FIRE: Ambulance 0115; Police 0110; Fire 0112.
SHORE LEAVE: Crew members permitted ashore.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.
Shore passes issued to passengers are chargeable.
GARBAGE DISPOSAL: Contact Fa.Nehlsen, Port Service. Tel: Rostock 670074246.
WASTE OIL DISPOSAL: Service available for ballast water, slops and bilge water (capacity 10,000 cu.m.). Telephone 350-3600 for service.
SEAMAN'S CLUBS: German Seaman's Mission - Rostock (Near Ferry Terminal). Tel: (0381) 6700431. Fax: (0381) 6700432. Hours: 1700 – 2200. Facilities: Shop, refreshments, games, postal service, money exchange, minibus and church services.
CURRENCY: German Mark (DM).
DEVELOPMENTS: Direct connection motorway A19 to Ferry Terminals. A 6th tanker berth with depth 13.5 m. (44 ft.) and length 260 m. (in connection with deepening of entrance channel up to 14.5 m. by 1998).

SHIPMASTER'S REPORT: September 1980 (Updated 1996).
VHF: While the vessel is in port, telephone calls to anywhere inside or outside Germany can be made most conveniently through "Rostock Radio" on VHF Channel 16. The working Channel is 26.
Customs: The Customs only seal the cigarettes and coffee. Spirits are not sealed. Each crew member is allowed 200 cigarettes.
Immigration: Immigration formalities are in accordance with international regulations. On arrival, the Master has to present a Crew List as well as the Seaman's Books, for checking by Immigration Authorities for validity on board of the vessel.
Identity control will be affected on the spot.
Crew members will receive shore passes.
All supernumeries on board from countries with visa obligations have to obtain a visa against a fee of DM 20.00. On departure no control will be necessary except questioning of Master about any changes in Crew List.
Density: The density of the water at the berth varies from 1000 to 1010 ozs./cu.ft.

AUTHORITY: Seehafen Rostock, Amt fur Hafenwirtschaft und Verwaltung, Hafen und Seemannsamt, P.O.Box 481046, 18132 Rostock, Germany. *Tel:* 0381-6703103. *FAX:* 0381-6703101. *Contact:* Captain S. Rathmanner, Harbour Master. H. Werner, Port Director (Administration). W. Pinnow, Port Director (Cargo Handling).

STADERSAND: 53.37 N. 09.32 E.

Oil Terminal in Elbe River operated by PreussenElektra Aktiengesellschaft.
DOCUMENTS:
3 Crew Lists.
2 Personal Effects Lists.
1 Stores List.
1 Tobacco List.
Cargo Documents.
Ship's Register.
DEEP SEA PILOTAGE: See "General" before first German port and "Baltic Deep-Sea Pilotage".
PILOTAGE: See "General" before first German Port.
RESTRICTIONS: Draft calculated by adding 31 ft. to height of tide and allowing 3 ft. underkeel clearance.
MAX. SIZE: Max. LOA 230 m. Max. beam 32 m. Max. draft (M.H.W.) 11.50 m. Max. size 60,000 d.w.t.
HEALTH: Health Certificate brought on board by River Pilot for Master to complete.
RADIO: All messages to Agents, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.
Ships' reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.
RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German Port, but no special Port Radar Service for Stadersand. Radar Service in the area of Stadersand available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio".
TUGS: Available. Meets vessel off the berth.
BERTHING: 1 tanker berth at T-head jetty. 1 pipeline × 300 mm. diameter, 2 hoses × 200 mm. diameter, permissible pressure 12 bars. Max. discharge rate 1,200 t.p.h.
DENSITY: Brackish.
FRESH WATER: Only obtainable by barge from Hamburg. Minimum quantity supplied is 200 tons.
FUEL: Only obtainable by barge.
CUSTOMS ALLOWANCES: 100 cigarettes and 1 bottle wine/spirits per man.
CONSULS AND GENERAL INFORMATION: Refer to "Hamburg".
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.
Shore passes issued to passengers are chargeable.
AUTHORITY: *Operator:* Preussen Elektra Aktiengesellschaft, Tanklager Stadersand, P.O.Box 1769, 21657 Stade, Germany. *Tel:* (04141) 7990. *FAX:* (04141) 799313, 799588. *Contact:* Mr. Ehlers.

STRALSUND: 54.19 N. 13.06 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Stores List.
Cargo Documents.
Ship's Certificates.
PILOTAGE: Compulsory. Contact Pilot by VHF Channel 12. Pilot stations are at Barhoeft and Thiessow.
Pilot boarding positions:
1. "Gellen 1" – Lat. 54° 34.3' N., Long. 13° 03.5' E.
2. "Landtief B" – Lat. 54° 18' N., Long. 13° 47' E.
3. "Osttief 2" – Lat. 54° 12' N., Long. 13° 52' E.

Also see "Baltic Deep-Sea Pilotage".
ANCHORAGES: In the roads clear of the fairway, depths 26 ft. to 30 ft.
RESTRICTIONS: Northern entrance between breakwaters is 12 ft. depth, used by smaller vessels only. Eastern entrance, depth 17 ft. MLW passing railway bridge, which is opened about every 5 hours.
MAX. SIZE: Vessels up to 17 ft. draft.
RADIO: Rugen Radio, call sign "Y5M".
HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.
TUGS: Available and compulsory for vessels of over 1,000 g.r.t. berthing and unberthing.
BERTHING: Depth alongside quays up to 17 ft. maximum. Length of quays 1,500 m.
CRANES:

4 cranes	10 tons capacity, reach 32 m. (heavy lifts up to 20 tons, reach 16 m.)
2 cranes	10 tons capacity; reach 20 m.
2 cranes	5 tons capacity; reach 22 m.
6 elevators	Capacity 75 t.p.h. each.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.
FRESH WATER: Available from shore ex pipeline and by barge.
FUEL: Gas oil and lub oil available by barge.
REPAIRS: All deck, hull and machinery repairs by local shipyards.
SURVEYORS: Germanischer Lloyd, Philipp-Julius-Weg 1, D-18437 Stralsund. Tel: (03831) 47340. Fax: (03831) 4733412.
REPATRIATION: All facilities exist for changing crews.
AIRPORT: Berlin and Barth.
TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours (Last Sunday in March – Last Sunday in September).
HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; Easter Monday; 1st May; Whit Sunday; Whit Monday; 3rd October; Christmas Day; 26th December.
SHORE LEAVE: Crew members permitted ashore.
IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.
Shore passes issued to passengers are chargeable.
GARBAGE DISPOSAL: Service available by barge. For service call Sundtank GmbH, Tel: 280380.
WASTE OIL DISPOSAL: Service available. See "Sundtank" above.
SEAMAN'S CLUBS: None at present.
AUTHORITY: Stralsunder Hafen und Lagerhaus GmbH, Hafenstrasse 20, D-18439 Stralsund, Germany. *Tel:* 0-3831-254215. *FAX:* 0-3831-254298. *Contact:* Wolfgang Ostenberg or Manfred Moller, Port Managers.

WILHELMSHAVEN: 53.31 N. 08.10 E. (See Plan)

DOCUMENTS: Tanker Check List with statement of vessel's deficiencies to be provided and delivered to the Sea Pilot before commencing pilotage.

Oil Port	2 Crew Lists. 1 Health Declaration (Form supplied by Pilot). Derat Exemption Certificate. Passports/Seamen's Books. Vaccination List. Tanker Check List
Harbour Docks	2 Crew Lists. 1 Health Declaration. 2 Cargo Manifests. 2 Stores Lists.

PILOTAGE: There is a central Pilot Station near "German Bight" Light Vessel, where certain large vessels (see below) embark or disembark Jade, Weser and Elbe Pilots from/to helicopter or, weather permitting, boat.

Jade (and Weser) Pilots are on board a 2-masted pilot vessel with yellow funnel with black top and white letters "LOTSE" (=Pilot) on black hull, flying the flag "H" of International Code.

Pilot vessel is usually stationed near Buoy "3/Jade 2".

To call Jade Pilot, following signals are to be used:

- By day: flag "1" below flag "G" of International Code;
- By night: the foregoing signals, given by morse lamp and/or whistle;
- In bad visibility signals by whistle;
- In all cases advance VHF contact is recommended.

(a) When the pilot vessel is moved up the River Weser due to bad weather, embarking or disembarking of sea pilots takes place
  - on the Weser in area between light buoys "17/4-Reede" and "19/H-Reede";
  - on the Jade in area "Minsener Oog" by pilot vessel operating from Wilhelmshaven.

(b) Pilots are to be ordered as follows:
Inward Bound Vessels:
24 hours prior arrival Pilot Station at "German Bight" Light Vessel or 12 hours prior arrival Pilot Station at Buoy "3/Jade 2".
Outward Bound Vessels:
1. At least 2 hours prior to ETD.
2. For departures between 1900 hrs. and 1000 hrs. the Pilot has to be ordered by 1700 hrs.

(c) Pilot order must contain following items:
1. Name and gross tonnage of vessel.
2. Intended embarking position.
3. Time of arrival at embarking position.

Short Extract from Pilot Ordinance Weser/Jade, dated 15th July 1994:

Type of Vessel: LOA = length overall Beam = max. breadth	PILOTAGE COMPULSORY		
	Pilot Vessel (PV) on boarding position (outer position of PV)		PV on inner position (Weser) due to bad weather.
	From outer position PV (buoy "3/Jade 2") Inward bound (Jade or Weser).	LV "German Bight" to outer position PV (e.g. Weser estuary).	From PV or from Minsener Oog (islet) to outer pos. PV.
1. Tankers according to 30 (1) SeeSchStrO (National Traffic Regulations)			
LOA < 130 m. Beam < 21 m.	Yes	No	No
LOA > 130 m. Beam > 21 m.	Yes	Yes	Yes
2. Sea-going vessels (above named tankers excluded – see above)			
LOA < 90 m. Beam < 13 m.	No	No	Omissible
LOA > 90 m. (-170 m.) Beam > 13 m. (-28 m.)	Yes	No	No
LOA > 170 m. Beam > 28 m.	Yes	No	Yes
LOA > 330 m. Beam > 45 m.	Yes	Yes	Yes
3. Bulk carriers			
LOA > 250 m. Beam > 40 m. Draft > 13.5 m.	Yes	Yes	Yes
4. Ro-Ro vessels and car carriers (special regulations when PV on inner position)			
LOA > 140 m. (-330 m.) Beam > 23 m. (-45 m.)	Yes (see 2.) Yes (see 2.)	(> 330 m.: yes, see 2.) (> 45 m.: yes, see 2.)	Yes (only outward)

Key: < = less than
> = more than

Vessels exceeding:
- Length 250 m. and/or beam 40 m. and/or draft 14 m. take Shore Based Pilotage (radar assistance).

Vessels exceeding
- Length 260 m. and/or beam 40 m. and/or draft 16 m. take Shore Based Pilotage and 2 sea pilots.

Helicopter pilot service is available for vessels above 50,000 g.r.t. at "German Bight" Light Vessel.

DEEP SEA PILOTAGE: See "General" before first German port and "Baltic Deep-Sea Pilotage".

ANCHORAGE:

1. Deep water Roads for deep draft vessels South of "German Bight" Lightvessel.
2. Roads for large and deep-draft vessels East of Buoy "3/Jade 2".
3. Tanker Road Schillig for tankers not exceeding 250,000 d.w.t. and/or 13.5 m. draft.
4. Schillig Roads for all vessels – tankers exempted – not exceeding 13.5 m. draft.
5. Quarantine anchorage for vessels under quarantine. Max. draft 13.5 m.
6. Explosives anchorage for vessels carrying more than 100 kg. of explosives or ammunition. Max. draft 13.5 m.
7. Tanker Roads–North, for tankers which are loaded or waiting for berth. A safety distance of at least 300 m. between vessels at anchor has to be maintained. Max. draft 13.5 m.
8. Tanker Roads–South, for tankers being unloaded and not yet gas free and not exceeding 280 m. length. Max. draft 13.5 m. When anchored vessels are turning with the tide, measures like tug assistance against covering the Arngast light sector or drifting to the West side of the fairway to diminish time and circle of turning are to be taken.
9. Wilhelmshaven Roads, usually for smaller vessels waiting for sea lock passage.
10. Road for small vessels up to 20 m. in length.
11. Actual sounding plans are to be observed because changes of depths are possible. (Contact "Jade Traffic" or pilot).

Transhipment of goods according to IMDG Code Nos. 1 (explosives), 2 (gases) and 3 (inflammable liquids) is prohibited on the Jade including Roads.

Request for bunkering permit is to be addressed to "Wasser- und Schiffahrtsamt Wilhelmshaven" (Waterways and Shipping Board) via radio station "Jade Traffic" on VHF Channels 16, 63 and 20.

RESTRICTIONS: No restrictions on night entry. Unless notified by waterway and shipping authority. Vessels draft exceeding 54 ft. 02 in. (16.5 m.), will be controlled by tidal conditions and vessels navigate according to specified schedule.

Also see "General".

Traffic Safety Measures for Large Vessels:

Vessels with draft exceeding 17 m. will be guided by police vessels showing quick flashing blue light when navigating the TSS Jade Approach Southward between Buoy "Jade-Weser" and the Jade entrance. All other vessels are requested to give way to these vessels restricted by their draft.

During the navigation of a vessel, restricted in her ability to manoeuvre due to her draft, in the TSS Jade Approach, the radio station "German Bight Traffic" transmits navigational warnings every 15 minutes on VHF Channel 80 in German and English language. Warnings will be announced on VHF Channel 16.

Compulsory Reporting System in the Inner German Bight: (Extract from Common Proclamation of the Waterways and Shipping Directorates Nord and Nordwest).

All vessels, towing and pushing units included, exceeding 50 m. in length must report as follows:

(A) Shipping Police Reports:

(1) Reports as detailed hereunder shall be made to VTS Centre specified for this purpose by competent Shipping Police Authority, such reporting duty applying to any person in command of a vessel or composite unit, whether pushed or towed, which exceeds the dimensions and tonnages specified by Competent Shipping Police Authority as well as to any person in command of a vessel of one of the categories listed in Section 30(1) (See "Bans and Restrictions Affecting Navigation") below.

1. In good time before entering any one of the navigable waterways specifically designated by the Competent Shipping Police Authority – provided that the particulars listed hereunder have not yet been reported under the provisions of Section 1(1) above in conjunction with Item 2.6 of the Annex to the Internal Waters (Entering Requirements) Ordinance of 23rd August 1994 (promulgated in the Federal Law Gazette I, p. 2246) as last amended by Article 6 of the pertinent Ordinance of 7th December 1994 (promulgated in the Federal Law Gazette I, p. 3744) – the following particulars shall be reported:
   (a) name, call sign and type of the vessel;
   (b) position of the vessel;
   (c) length, breadth and draft of vessel;
   (d) vessel's port of departure and port of destination;
   (e) a statement indicating whether vessel carries liquefied gases, chemicals or oil/petroleum products in bulk and, if so, specification of type and quantity (types and quantities) of any such bulk cargo (cargoes) including respective UN number (numbers), respectively, whether any such bulk cargo (cargoes) has (have) been carried and tank (tanks) has (have) not been cleaned and de-gassed or completely been inerted afterwards;
   (f) statement indicating whether there are any deficiencies with regard to the vessel or her cargo;
   (g) name(s) of the vessel's owner(s) or of his (their) authorised representative(s).
2. As vessel proceeds en route past the designated reporting positions, the following particulars shall be reported:
   (a) name and call sign of the vessel;
   (b) position of the vessel;
   (c) speed of vessel;
   (d) time of vessel's passage.
3. Any discontinuation and subsequent resumption of vessel's voyage shall be reported.

(2) Format of reports giving particulars mentioned in preceding paragraph shall conform to reporting format referred to in Appendix I to the Annex to Internal Waters (Entering Requirements) Ordinance, which relates to Item 1.9 of said Annex.

(3) Having transmitted Initial Report via VHF radiotelephone, the person in command of a vessel in terms of paragraph (1) above shall keep a continuous listening watch on the VHF channels specified for that purpose and, when technically feasible, also on VHF Channel 16, so that the Competent Shipping Police Authority can at all times address the vessel in question.

(B) The provisions of the German Ordinance on Particular Requirements for the Entry of Foreign Vessels into German Internal Waters are to be observed.

2. Reports to be made and listening watches to be kept:

2.1 The Operator of any vessel bound for the internal waters of the Federal Republic of Germany and carrying dangerous or polluting goods, whether in bulk or in packaged form, shall forward, by facsimile or similar electronic data transmission, the following particulars to the Central Reporting Point ("Zentrale Meldestelle") – address: Am Alten Hafen 2; D-27472 Cuxhaven, facsimile number +(4721) 106 393 or 106 394 – on such vessel's departure from a port located outside the European Union, provided that the vessel's first port of call, or her first mooring or anchoring site, will be located in the Federal Republic of Germany, or when the intention is to pass through the Kiel Canal:

(a) name, distinctive number or letters and type of the vessel;
(b) flag of the vessel;
(c) length, beam and draft of the vessel (in metres);
(d) port of destination of the vessel;
(e) estimated time of arrival at the port of destination/estimated time of departure;
(f) intended route;
(g) the correct technical names of the dangerous or polluting goods, complete with their UN Numbers and Classes in accordance with the IMDG, IBC and IGC Codes, as appropriate, the quantities of such goods and their location on board and, if in portable tanks or freight containers, their identification marks (e.g. the container's distinctive letters and number);
(h) confirmation that a list or manifest or appropriate loading plan, giving details of the dangerous or polluting goods carried and of their location on the vessel, is kept on the navigating bridge or in the vessel's operations centre.

The obligation to forward the particulars referred to in Item (g) above shall be deemed to have been fulfilled when these particulars have been made available to the competent port authority, or to the agency designated by such authority, and can be transmitted from there to the Central Reporting Point, upon the latter's request, at any time. (A list of such port authorities and designated agencies shall be made known to the public by the competent Waterways and Shipping Directorate). This exemption shall not apply when the intention is only to pass through the Kiel Canal.

2.2 The operator of any vessel carrying dangerous or polluting goods, whether in bulk or in packaged form, and leaving a German seaport shall, prior to leaving, forward the particulars referred to in Item 2.1 above tot he Central Reporting Point. The obligation to forward the particulars referred to in Item 2.1 (g) above shall be deemed to have been fulfilled when these particulars have been made available to the competent port authority, or to the agency designated by such authority, and can be transmitted from there to the Central Reporting Point, upon the latter's request, at any time. (A list of such port authorities and designated agencies shall be made known to the public by the competent Waterways and Shipping Directorate).

2.3 When a vessel bound for, or leaving, the internal waters of the Federal Republic of Germany is involved in a marine casualty or in any other incident or cicumstance from which actual damage to the German coastline or related interests arises or is threatening to arise, the vessel's Master, with a view to preventing pollution, shall forthwith forward the particulars of such marine casualty or other incident or circumstance, complete with the particulars referred to in Item 2.1 above, to the Central Reporting Point which, in turn, shall forward them directly to the competent VTS Centre. This provision shall apply, in particular, to cases involving

(a) the loss overboard of dangerous goods;
(b) the discharge (in terms of the MARPOL Convention) of polluting goods;
(c) the imminent threat of such loss overboard or discharge.

The obligation to forward the particulars referred to in Item 2.1 above shall be deemed to have been fulfilled when the Master discloses which authority of a Member State of the European Union is holding these particulars. In the event that such vessel's report is incomplete or unavailable, or that the vessel has been abandoned, the discharge, to the fullest extent possible, of the above obligation shall fall upon the vessel's operator.

2.4 Notification of the particulars referred to in Item 2.1 to 2.3 above shall be effected in the format set out in Appendix I to the present Ordinance. Reports made in accordance with the provisions of Items 2.1 and 2.2 above shall be made in writing and shall contain the operator's name, address, telephone and facsimile numbers.

2.5 Regular scheduled services with a crossing time not exceeding one hour shall be exempt from the obligations set out in Item 2.1 respectively 2.2 above. Regular scheduled services with a crossing time exceeding one hour may, upon application by the vessel's operator and following consent by the European Commission, be exempted by the competent Waterways and Shipping Office from the obligations set out in Item 2.1 respectively 2.2 above. In this event, the vessel's operator shall ensure that the particulars referred to in Item 2.1 above can be forwarded, upon request, to the Central Reporting Point in writing and in accordance with Appendix I to the present Ordinance.

2.6 The Master of a vessel or of a composite unit, whether pushed or towed, of more than 50 m. in length proceeding en route from a Westerly or Northerly direction and heading for the inner German Bight shall – in the case of navigating in the traffic separation scheme "German Bight Western Approach", when sailing past Lightbuoy "GW 7", or, in the case of proceeding en route from a Northerly direction and heading for a position to the West or to the East of Helgoland Lighthouse, prior to crossing the seaward delimitation of the German territorial sea – transmit by VHF radiotelephony to the VTS Centre a report giving the following particulars:

(a) vessel's name and distinctive letters or number;
(b) vessel's position;
(c) vessel's length, beam and draft (in metres);
(d) port of departure and port of destination;
(e) a statement to the effect whether liquefied gases, chemicals or petroleum/petroleum products are carried in bulk and, when this is the case, information on the type, the quantity and the UN Number of each cargo, respectively, a statement to the effect that such cargoes have been carried and the tanks have not been cleaned and de-gassed or completely been inerted afterwards;
(f) a statement to the effect whether there are any deficiencies with regard to the vessel or her cargo;
(g) names of the vessel's owners or of the latters' agents.

The format of reports giving the above particulars shall be in accordance with the reporting format reproduced at Appendix I to the present Ordinance.

Having transmitted such particulars, the vessel concerned shall keep a continuous listening watch on VHF Channel 79, 80 or 16. In addition, any vessel navigating in the traffic separation scheme "German Bight Western Approach" shall, when passing Lightbuoy "GW 9", transmit to the VTS Centre, her name and call sign, position and passing time.

Bans and Restrictions Affecting Navigation:

(1) Following categories of vessels shall not navigate on Rivers Jade, Weser, Hunte, Elbe and Trave, nor in Kiel Canal or Kiel Fjord, nor in approaches to ports of Wismar, Rostock (including Lower River Warnow), Stralsund and Wolgast, except upon fulfilling the preconditions listed in paragraph (2) below:
   1. tankers and composite units, whether pushed or towed, carrying any one or more of the substances listed in Annex III to the present Ordinance;
   2. empty tankers and composite units, whether pushed or towed, after discharging any one or more of the substances referred to in Items 2 and 3 of Annex III to the present Ordinance in any case where the flashpoint of the cargo last carried was below 35° C. and where the tanks have not been cleaned and de-gassed or completely inerted; however, this provision shall, not apply when only such residual quantities are left as cannot be pumped off any more, although the vessel's discharging arrangements function properly;
   3. empty tankers and composite units, whether pushed or towed, as referred to in sub-paragraph 2 above, in any case where the flashpoint of the cargo last carried was 35° C. or over whereas, before that cargo, some other cargo with a lower flashpoint had been carried and where the tanks have not been cleaned and de-gassed or completely inerted;
   4. nuclear ships.

(2) The preconditions to be fulfilled by any vessel wishing to navigate on the waterways referred to in paragraph (1) above shall be as follows:
   1. At the point of the vessel entering the waterway, respectively leaving a mooring site, the prevailing range of visibility exceeds 1,000 m.;
   2. an effective radar is in operation and a person conversant with radar observation observes the radar image at all times as long as visibility is restricted.
   3. the vessel's automatic pilot may only be used upon fulfilling the preconditions defined by the Competent Shipping Police Authority; however, the provisions of Section 42(5) and (6) below shall remain unaffected by the present provision;
   4. tank lids are kept closed.

The provisions of sub-paragraph 1 above shall not apply

(a) to vessels navigating on the Kiel Canal (except for vessels leaving berth in a port) nor to vessels directly entering or leaving the Kiel Canal;
(b) to vessels as referred to in sub-paragraphs 1 to 3 of paragraph (1) above navigating at a range of visibility exceeding 500 m. in waters designated by the Competent Shipping Police Authority, provided that such vessels – in addition to complying with the preconditions mentioned in sub-paragraphs 2 to 4 above – are fitted with a gyro-compass or with a tested and calibrated magnetic compass and, in the case of a vessel of a deadweight capacity of 2,000 tonnes or more, the Competent Shipping Police Authority, acting on the merits of the particular case in question, and bearing in mind the interests of the safety and easy flow of traffic, has permitted such vessel to proceed.

(3) The Competent Shipping Police Authority may impose upon vessels as referred to in paragraph (1) above, as well as upon other vessels, as it may specify, any preconditions to be fulfilled prior to being permitted to sail on a navigable waterway; such preconditions say, in particular, concern the use of tugs.

(4) Vessels of types or sizes designated by the Competent Shipping Police Authority may, in certain waters designated by the Competent Shipping Police Authority, navigate only upon prior reporting to such authority and upon compliance with such traffic control measures as may have been imposed.

(5) Navigating shall be prohibited in certain waters within such periods of time, at such water levels, or in such weather conditions as may be specified by the Competent Shipping Police Authority. This provision shall not apply to such categories of vessels as may be specified by the Competent Shipping Authority.

2. All vessels specified exceeding 50 m. in length have to report to radio station "Jade Traffic" on VHF Channel 16/63/20 when passing the following positions:

(a) Light buoy "JW5/Jade 1",
(b) before entering and when leaving the waterway Jade inward Light buoy "JW5/Jade 1",
(c) on arrival or departure from anchorage or jetty and when entering or leaving a harbour area.

Reports must contain ship's name, position, speed and passing time.

Lock Restrictions:

The sea lock opening times (normal service hours) for No. 4 Dock are announced in daily maritime bulletins. Coastal radio station "Wilhelmshaven Lock" working on Channels 16 and 13 VHF during official service hours.

Dimensions of lock: 390 m. long, 57 m. wide and depth of 11.47 m. MLW. However, only smaller vessels use dock harbour as bollards for mooring larger ships not yet available.

See "Annex No. 2" before "Authority".

MAX. SIZE: Max. size fixed for navigating the Jade:

(a) Draft, entering: 20 m. (65 ft. 07 in.)
leaving: 19 m. (62 ft. 04 in.)
(b) Length: 350 m.
(c) Beam: 52 m.

Vessel exceeding these dimensions must apply for a permit of navigation to "Wasser- und Schiffahrtsamt Wilhelmshaven".

See "Annex No. 3" before "Authority".

Keel clearance of at least 8.5% (See "Annex No. 3") of draft required. Also see "Tankers".

HEALTH: Radio Pratique possible. Sea Pilot will hand Health Declaration to Master. If one of the questions is answered "Yes", Pilot will advise Port Health Officer. A valid Derat Exemption must be produced.

RADIO: Norddeich Radio, call sign DAN. Elbe-Weser Radio can be contacted by VHF Channel 16.

Radio advice prior to arrival: Advise Agent 7 days before arrival:

1. Ship's name and call sign, ETA in GMT.
2. Nationality.
3. Draft forward and aft.
4. Cargo on board and slop information.
5. Number and diameter of cargo manifold connections.
6. Discharge rate per hour.
7. Loading rate per hour.
8. Quantity of ballast on board.
9. Ballasting rate per hour.
*10. Leaks in the hull or overboard valves, if any.
*11. Inert or non inert gas report.
*12. Request for crude wash.
*13. Request for repairs.
14. Valid oil liability certificate.
15. Heli-landing/winching area.
16. VHF Channel 20 in good working order.

*Details must be with Agent at least 48 hours before arrival.

ETA to be confirmed 72 hours before arrival, and whenever ETA changed by more than 30 minutes.

Notify Agents of tug requirements.

VESSEL TRAFFIC SYSTEM: Shore based Radar Assistance and shipping police:

VTS Centre Wilhelmshaven.

This Station of the Waterways and Shipping Administration is operated continuously and performs radar surveillance and information services as follows:

1. *Jade Radar Chain:*
(a) Extension from light buoy "TG19/Weser 2" to light buoy "58".
(b) Call names
"Jade Traffic",
"Jade Radar", concerning radar services.
(c) VHF Channels: 16/63/20.
(d) Shore based radar assistance is available to all vessels.
(e) Situation reports (traffic movements, dredging activities, disturbances, tidal and weather conditions, etc.) are broadcasted
every even hour (H + 11 minutes) on VHF Channels 63/20 (in German language),
on request (also in English language).
(f) Traffic information/traffic assistance/traffic instructions:
observation of traffic with concern to national and international traffic regulations;
information, advice and (binding) instructions addressed to vessels (shipping police);
navigational warnings (strategical assistance);
receiving of ships reports (initial and passage reports);
identification and recording of vessels.
(g) Handling of all other shipping affairs on the navigable waters of the Jade (e.g. casualties, distress situations, oil pollutions).

2. *German Bight Radar Surveillance Area (VTS):*
(a) Extension: Area within a radius of 48 km. around Heligoland Lighthouse.
(b) Call name: "German Bight Traffic".
(c) VHF Channels: 16/79/80.
(d) Shore based radar assistance is available.
(e) Situation reports (special traffic movements, disturbances, weather conditions, events important to navigators) are broadcasted in German and English language
every even hour (H + 00 minutes) on VHF Channels 80/79,
on request, and under certain conditions (No. 79-92).
(f) Special aims:
Observation of traffic with concern to national and international regulations,
information, advice, and (binding) instructions addressed to vessels (shipping police),
navigational warnings (strategical assistance),
receiving of ships reports (initial and passage reports),
identification and recording of vessels,
handling of all other shipping affairs on the navigable waters within the appropriate area.

All orders issued by this Shipping Police Authority Station must be observed (Remarks: Offences against international and national rules will be prosecuted. Inner German Bight is under surveillance by radar and patrol vessels).

TUGS: Compulsory. Tankers normally require at least 4 tugs of minimum 1,500 h.p. for berthing. Tugs meet tankers at anchorage near Buoy "43". Only tug lines are used, charge inclusive.

VLCCs meet the tugs at Buoy "41", when they are bound for NWO.

BERTHING: *Wilhelmshaven Inner Port:*

The following berths can be reached:

Harbour Name	*Max. draft*		*Quay length*
Handelshafen	16 ft. 05 in.		600 m.
Grosser Hafen	20 ft. – 26 ft.	Bontekai about	500 m.
Verbindungshafen	18 ft.	Sudwestkai	400 m.
Nordhafen			
Hannoverkai	38 ft. (11.6 m.)		312 m.
Luneburgkai	33 ft. (10.0 m.)		205 m.
Braunschweigkai	36 ft. (11.0 m.)		270 m.
Ausrustungshaven (Lay-up berth)	19 ft.		140 m.

2 lay-up berths (dolphins) for vessels up to 30,000 d.w.t.

CRANES:

Braunschweigkai	1×45 ton mobile crane
Sudwestkai:	1×45 ton mobile crane.
Luneburgkai:	2×15 tons – 18 tons portal cranes.
Handelshafen:	1×15 tons – 18 tons portal crane. 1 crane for scrap iron.

A floating crane of 100 tons capacity is available on request from the Navy yard.

SPECIAL CARGO HANDLING FACILITIES: There is no Container traffic at Wilhelmshaven. One Ro-Ro ramp available at Luneburgkai and one Ro-Ro ramp available at Nordwestkai.

BULK HANDLING FACILITIES: Figdor is the operator of cargo handling in the Handelshafen with its connection to railway, road and canal-system.

Equipment: One modern gantry crane of 8 – 15 tons and efficient mobile cranes. Storage facilities for bulk cargo to an amount of 70,000 tons, 1 silo with a capacity of 720 cu.m. and 2,000 sq.m.

Niedersachsenbrucke: The facility accommodates vessels up to 190,000 d.w.t. and 47 ft. draft at the outer berth. A bulk discharge unit with an hourly capacity of 1,200 tons delivers coal to a nearby power plant by a conveyor belt.

The inner berth has a depth of 12.0 m. There are discharging installations for fuel oil and loading installations for caustic soda solution.

Transhipment of bulk cargo is possible.

TANKERS: Nord-West Oelleitung Terminal: Position Lat. 53° 33' N., Long. 08° 08' E. Distance from Weser Pilot Station, 24 miles. Type of Berth, Finger Pier "T" head. Density 1025. Current velocity, 3-4 knots. Mean tidal range, 12 ft. 08 in. Nature of bottom, sand and mud.

1. Berthing Schedule:

Size	*From*	*To*
Up to 30,000 d.w.t.	Anytime	
30,001 – 50,000 d.w.t.	3 hours before LW	HW
50,001 – 85,000 d.w.t. or less than 43 ft. draft	6 hours before LW or HW	LW or HW
over 85,000 d.w.t. or over 43 ft. draft	2 hours or 1/2 hour before LW or HW	
over 55 ft. draft only with rising tide	2 hours or 1/2 hour before HW	

Notes: NWO Terminal is a port with strong tidal currents, running nearly parallel to the jetties.

The vessels are always berthed with the bow in the current.

Example: If a vessel is at the tug position, 2 hours before HW, the vessel has to turn in a safe distance off the jetty to berth with port side to, against the flood tide.

If a vessel is at the tug position 30 minutes before HW, the vessel will berth with starboard side to against the ebb tide which has just started.

Tug position:	At Buoy No. 41	for vessels bound for Jetty No. 4, or gross tonnage 60,000 tons and over.
	At Buoy No. 45	for all other vessels.
Distance:	Buoy No. 41 to Jetty No. 2: 4.7 nautical miles.	
	Buoy No. 45 to Jetty No. 2: 2.3 nautical miles.	

2. *Berth Dimensions:*

Berth (No.)	Max. D.W.T. (tonnes)	Max. Displacement (tonnes)	Max. Draft (m.)
1	130,000	140,000	15.40
2	130,000	142,500	15.40
4	260,000	350,000	20,00

Note: It is possible to berth tankers up to 400,000 tonnes d.w.t. with part cargo, but the actual displacement on arrival must not exceed 350,000 tonnes and max. draft not to exceed 20.0 m.

3. *Restrictions:*

Berth No. 1: Maximum height/elevation of vessel's manifold: 16.0 m.* all the time.

Berth No. 2: Maximum height/elevation of vessel's manifold: 19.0 m.* all the time.

Berth No. 4: Minimum draft at forward dolphin (approximately 55 m. ahead of centre of manifold) has to be 3.0 m.* all the time. Minimum BCM/SCM: 120 m./125 m.

* According to the height of tide under normal circumstances.

4. *Laser Docking System:*

A laser docking system is installed at each berth to indicate approach velocity and vessel's distance to the dolphins to Docking Pilots.

The rate of approach velocity is indicated by signal lamps:

slow flash green	0 – 3 cm./sec.
quick flash green	3 – 6 cm./sec.
slow flash yellow	6 – 7 cm./sec.
quick flash yellow	7 – 8 cm./sec.
slow flash red	8 – 10 cm./sec.
quick flash red	over 10 cm./sec.

The deflection of the dolphins is recorded on a chart.

5. *Pipelines Handling Rates, Hoses and Maximum Pressures:*

Berth No.	Grades handled	Pipelines (in.)	Length (ft.)	Discharge Rate (cu.m./hr.)	Maximum Pressure (Bar)	Hoses (in.)
No. 1	Crude Oil	1×30	4,920	10,000	15	4×12
No. 2	Crude Oil	1×30	4,595	9,000	15	3×12
No. 2	Gasoline	1×30	4,595	3,000	15	1×12
No. 4	Crude Oil	1×40	5,500	18,000	15	4×16

Maximum loading rate at each berth for all grades is 3,000 cu.m./hr.

Fuel Oil and Marine Diesel Oil is only available by barge and is arranged by ship's Owner or Agent.

6. *Radio:* All vessels bound for NWO Terminal should pass following information soonest:

AA ETA German Bight Lightvessel.
BB Arrival draft (m.).
CC Arrival displacement (tonnes).
DD Kind of cargo and Bill of Lading figures, if heated advise average temperature.
EE Free water below cargo after loading (Yes/No), quantity.
FF Any separate slop to discharge (Yes/No,) kind and quantity.
GG Estimated time for discharging, including COW.
HH COW (Yes/No).
II Ballast time (hours).
JJ Disposal of residues according to MARPOL I (Yes/No), kind and quantity, pumpable at normal temperature, estimated pumping rate.
KK Disposal of garbage according to MARPOL V (Yes/No), kind and quantity.

Terminal does not accept any mixture of residues according to MARPOL I and garbage according to MARPOL V.

Different kind of waste, like unpumpable residues, oily rags scrap or batteries, etc., have to be collected, each in separate bags, drums or containers. Each unit has to be labled with vessel's name and date of delivery.

Terminal does not accept any solvents, paints or chemicals. These kinds of special garbage must be discharged separately, arranged by Agent.

LL Confirm number, size and material of mooring-wires/ropes.

Tankers bound for NWO-Terminal must be equipped forward and aft at least with 2 breast wires and 2 spring wires, provided with corresponding synthetic tails. Four head and 4 stern ropes are accepted also in other approved material, but wires with tails are recommended.

Tankers above 100,000 d.w.t. must be equipped forward and aft at least with 4 breast wires and 2 spring wires provided with corresponding synthetic tails. Two head-and 2 stern ropes are accepted also in other approved material, but wires with tails are recommended.

MM Confirm all moorings, winches and winch brakes are in good condition according to OCIMF standard (Yes/No).
NN Vessel's hull and shell plating has to be smooth in order to avoid any damage at the terminal's dolphins.
OO Deficiencies on board (Yes/No).
PP Various.

7. *Dirty Ballast:* There are no shore facilities to receive dirty ballast.

8. *Services:* Fresh water is available, except during freezing periods. Bunkers and diesel are not available from NWO. It is necessary to order a bunker barge in advance, please contact Agent. A shore gangway is available.

Stores and luboil must be taken on board from a barge at vessel's seaside.

9. *Operator:* North-West Oelleitung GmbH, Postfach 2061, 26360 Wilhelmshaven, Germany. Tel: (04421) 620. Fax: (04421) 62381. Telex: 253348.

Beta Oil Terminal:

Berths No. 1 and No. 1A: Position Lat. 53° 37' 28" N., Long. 08° 08' 30" E. Distance from "Weser" Lanby, 20 miles.

Berths No. 2 and No. 3: Position Lat. 53° 37' 12" N., Long. 08° 07' 36" E. Distance from Weser Pilot Station, 20 miles.

Description of the Port Area: The jetty facilities consist of:

1. Two offshore terminals without permanent shore connection for handling of crude oil, gasoline, middle distillate and HFO.

Sizes of Ship – Jetty 1:
DWT: 20,000 to 250,000.
Length: 165 m. to 350 m.
Draft: 18.0 m. maximum (Also see "Water Depths and Ships Drafts" and "Arrival, Mooring and Unmooring – No. 1").

Sizes of Ship – Jetty 1A:
DWT: 5,000 to 45,000.
Length: 100 m. to 230 m.
Draft: 11.5 m. maximum.

2. Two onshore terminals for LPG, gasoline, middle distillate and HFO.

Sizes of Ship – Jetty 2:
DWT: 300 to 11,000.
Length: 50 m. to 135 m.
Draft: 6.5 m. maximum.

Sizes of Ship – Jetty 3:
DWT: 300 to 8,300.
Length: 50 m. to 120 m.
Draft: 6.5 m. maximum.

Notes: Ships for Jetty 1 with a draft greater than 17.0 m. (18.0 m. maximum) depend on the tide when using the entrance (Also see "Arrival, Mooring and Unmooring – No. 1").

Bunkering:	Possible at Jetty 1 and 1A only through the appropriate loading arms without viscosity blending. Possible at Jetty 2 and 3 only through the appropriate loading arms without viscosity blending.
Ballast Water:	Ballast water can be discharged at each jetty. The onshore ballast water unit has a capacity of 17,000 cu.m. The ballast water is not allowed to be contaminated with chemicals.

3. Water depths and ship drafts: The table "Water Depths and Ships Drafts" shows the water depths for each jetty related to chart datum and the maximum permissible ship drafts.

WATER DEPTHS AND SHIP DRAFTS:

Water depths in meters according to chart datum:

Jetty	Berth	Access	Jade
1	19.5	18.5	18.5
1A	12.5	12.5	18.5
2	7.5	7.5	18.5
3	7.5	7.5	18.5

Under-keel clearance in meters.

Jetty	Port Area	Mean Tidal Range	Maximum Draft
1	1.5	3.2	18.0
1A	1.5	3.2	11.5
2	1.0	3.2	6.5
3	1.0	3.2	6.5

4. Tidal currents and flow angles – Jetty 1 and 1A: The flood current runs at an offshore angle of 10° to 12° towards Jetty 1, and the ebb current has an angle of 3° to 4° (See "Plan").

The maximum tidal current velocity near Jetty 1/1A is 4 knots. In the vicinity of Jetty 2 and 3, it is 3.5 knots.

5. Loading and unloading rates on Jetty 1: Also see Plan "Schematic Diagram of the Loading Arm on Jetty 1".

Import:
Crude:
4 loading arms 16 in.
4,000 cu.m./hr. per loading arm.
15,900 cu.m./hr. maximum discharge rate.
Ballast water:
2 loading arms 16 in.
800 cu.m./hr. maximum ballast water rate.
Middle distillate:
1 loading arm 16 in.
1,200 cu.m./hr. discharge rate.
Export:
HFO:
2 loading arms 16 in.
3,200 cu.m./hr. maximum loading rate.
1 loading arm 10 in.
800 cu.m./hr. maximum loading rate.
Middle distillate:
1 loading arm 16 in.
2,400 cu.m./hr. maximum loading rate.
1 loading arm 10 in.
400 cu.m./hr. maximum loading rate.

6. Loading and unloading rates on Jetty 1A: Also see "Plan" "Schematic Diagram of the Loading Arms on Jetty 1A".

Import:
Ballast water:
1 loading arm 12 in.
800 cu.m./hr. maximum discharge rate.
Gasoline and Gasoline Components:
1 loading arm 10 in.
550 cu.m./hr. maximum discharge rate.
1 loading arm 12 in.
550 cu.m./hr. maximum discharge rate.
HFO:
1 loading arm 12 in.
2,600 cu.m./hr. maximum discharge rate.

Export:
- Middle distillate:
  - 2 loading arms 12 in.
  - 1,200 cu.m./hr. per loading arm.
  - 2,400 cu.m./hr. maximum loading rate.
  - 1 loading arm 8 in.
  - 300 cu.m./hr. maximum loading rate.
- HFO:
  - 2 loading arms 12 in.
  - 2,600 cu.m./hr. per loading arm.
  - 3,200 cu.m./hr. maximum loading rate.
  - 1 loading arm 8 in.
  - 300 cu.m./hr. maximum loading rate.
- Gasoline/Naphtha:
  - 1 loading arm 10 in.
  - 950 cu.m./hr. maximum loading rate.
  - 1 loading arm 12 in.
  - 1,200 cu.m./hr. maximum loading rate.

7. Loading and unloading rates on Jetty 2: Also see "Schematic Diagram of the Loading Arms on Jetty 2".

Import:
- Ballast water:
  - 1 loading arm 10 in.
  - 800 cu.m./hr. maximum discharge rate.
- Gasoline and Gasoline Components:
  - 1 loading arm 10 in.
  - 800 cu.m./hr. maximum discharge rate.

Export:
- Middle distillate:
  - 2 loading arms 10 in.
  - 1,200 cu.m./hr. per loading arm.
  - 2,400 cu.m./hr. maximum loading rate.
  - 1 loading arm 10 in.
  - 475 cu.m./hr. maximum loading rate.
- Gasoline Components:
  - 1 loading arm 10 in.
  - 550 cu.m./hr. maximum loading rate.
- HFO:
  - 2 loading arms 10 in.
  - 1,300 cu.m./hr. per loading arm.
  - 2,600 cu.m./hr. maximum loading rate.

8. Loading and unloading rates on Jetty 3: Also see "Schematic Diagram of the Loading Arms on Jetty 3".

Import:
- Ballast water:
  - 1 loading arm 8 in.
  - 500 cu.m./hr. maximum discharge rate.
- Gasoline Components:
  - 1 loading arm 8 in.
  - 550 cu.m./hr. maximum discharge rate.
- Middle distillate:
  - 1 loading arm 8 in.
  - 550 cu.m./hr. maximum discharge rate.

Export:
- Gasoline:
  - 1 loading arm 8 in.
  - 550 cu.m./hr. maximum loading rate.
  - 1 loading arm 10 in.
  - 950 cu.m./hr. maximum loading rate.
- LPG:
  - 1 loading arm 6 in.
  - 250 cu.m./hr. maximum loading rate.
- Middle distillate:
  - 2 loading arms 8 in.
  - 550 cu.m./hr. per loading arm.
  - 1 loading arm 10 in.
  - 950 cu.m./hr. maximum loading rate.
- HFO:
  - 1 loading arm 8 in.
  - 475 cu.m./hr. maximum loading rate.

Authority of BETA to Issue Instructions:

1. Access to the port area is permitted to authorised persons only.
2. Representatives of authorities in the exercise of their official duties are entitled to enter the jetties upon submission of their duty passes. They must observe the safety and security instructions.
3. Masters are obliged to comply with BETA's instructions as regards loading and unloading and safety regulations in the port area.
4. All persons entering the port area must follow BETA's instructions.

Transit of Persons:

1. All persons entering the port area whilst exercising their duties must wear safety helmets.
2 Crew members are not allowed to leave, and visitors are not allowed to enter the ship berthed at the BETA Jetty until it has been cleared by the authorities.
3. BETA employees and representatives have at all times access to the ship for the performance of their duties. The Master or his deputy shall give them all the information necessary for operations. They shall be allowed to inspect all safety equipment and all mooring and handling facilities.
4. Crew members and their relations with a valid permit are entitled to enter the jetty. The permit must be issued by the Master, the Agent or the gatekeeper.
5. Visitors and passengers with a valid BETA permit are allowed to enter the ship. The permit must be approved by the responsible Agent and issued by the gatekeeper at the access to the jetty.
6. All other persons who wish to enter the port area must possess a valid BETA permit, with the exception of persons under §5, para 2, with duty passes.
7. Transfer of persons between ship and shore is effected by BETA jetty bus or boat.
8. Only BETA vehicles are allowed to drive on the access jetty and to park in the marked parking areas. Any other vehicles may only drive on the access jetty with a valid BETA approval. Vehicles are not allowed to drive on the loading and unloading Jetties 2 and 3. All exceptions require the special BETA approval.
9. The maximum permissible speed on the access jetty is 30 km./hr. The regulations under the Road Traffic Act apply on the BETA jetty facilities.

Arrival, Mooring and Unmooring:

1. Entering the port area and mooring at the loading and unloading jetties and berths requires BETA approval. BETA will allocate an adequate berthing place with due consideration of safe and orderly handling of cargo.

   Ships for Jetty 1 with a draft greater than 17.0 m. (18.0 m. maximum) depend on the tide when using the entrance.

   Unless otherwise provided in the charter contract, BETA is not liable for any costs for lay-days in the roads.
2. Ships which have suffered damage during the voyage must be announced to BETA in good time before entering the port area.

   Ships which in the dutiful opinion of BETA are not suitable for cargo handling operations at the loading and unloading jetties must be refused even after commencement of loading or unloading, or may only be allowed for cargo handling operations under certain conditions.
3. Within the port area, ships may only be moved without tow lines with the navigational aid of a Pilot. All exceptions require the BETA approval.

   The individual conducting a ship is always obliged to use sufficient tug assistance when manoeuvring at the offshore terminal.
4. The number of tugs available are quoted under "Minimum Number of Tugs for Manoeuvring" (See below).
5. BETA is not responsible for mooring and unmooring or for towage operations of the ship.
6. In the presence of a gas tanker at Jetty 3, no other tank vessel, which has not been properly degassed and which is carrying or was carrying loads as under IMDG-Code 3.1 or 3.2, is allowed to moor at Jetty 2, unless the ship's tanks are fitted with quick acting ventilation valves. The loading pressure safety valves shall be activated before entering the BETA port area, in order to relieve the pressure in the ship's tanks to atmosphere level. When mooring and unmooring the ship, the gas loading respectively unloading at Jetty 3 shall be suspended and both the jetty's valves and the ship's valves shall be closed.

Minimum Number of Tugs for Manoeuvring:

Jetties 1 and 1A:

	Mooring		Unmooring	
d.w.t.	without MA	with MA	without MA	with MA
less than 15,000	2	1	2/1 *2	1
15,001 – 35,000	3	2 *1	3/2 *2	1
35,001 – 100,000	4	3 *1	3/2 *2	2
100,001 – 150,000	5	4 *1	4/3 *2	2
150,001 – 250,000	6	5 *1	5/4 *2	3

Requirement: Normal weather and current conditions.

Notes:

MA = Manoeuvring Aids (i.e. bow thruster and c-p propeller).

*1 If equipped with either bow and stern thruster and c-p propeller or bow thruster and 2 c-p propellers and Becker rudder, then the number of tugs may be reduced by 1.

*2 The stern position relative to the tide/current has been considered in the smaller number of tugs.

Jetty 2:

	Mooring		Unmooring	
d.w.t.	without MA	with MA	without MA	with MA
0 – 500	0	0	0/1	0
501 – 5,000	0	0	0/2	0
5,001 – 7,500	1	0	1/0 *1	0
7,501 – 11,000	2	1	2/1 *1	1

Notes:

MA = Manoeuvring Aids (i.e. bow thruster and c-p propeller).

*1 The stern position relative to the tide/current has been considered in the smaller number of tugs.

Jetty 3:

	Mooring		Unmooring	
d.w.t.	without MA	with MA	without MA	with MA
0 – 500	0	0	0	0
501 – 5,000	1	1	1	1
5,001 – 7,500	1 *1	1	1 *1	1
over 7,500	2	1	2 *2	1

Notes:

MA = Manoeuvring Aids (i.e. bow thruster and c-p propeller).

*1 Ships over 5,001 d.w.t. must accept the assistance of 2 tugs for the respective manoeuvre, in case they have to be turned in the flood tide current and if they are not equipped with manoeuvring aids.

*2 All ships moored with the starboard side at flood tide current – 1 tug.

These regulations are valid for all jetties:

The number of tugs must not fall short of the number shown in the respective category. The number of tugs may only be exceeded in exceptional cases upon the Master's and/or the Pilot's decision to ensure safe manoeuvring (e.g. wind).

The smaller number of tugs is only permitted if the ship is equipped with manoeuvring aids and
- (a) if the Pilot is well acquainted with the respective ship, and
- (b) if the Master/Agent prior to the arrival of the ship has expressly confirmed that the shipboard manoeuvring aids are in working order.

Mooring:

1. Mooring Advisor: Prior to mooring of the ship at Jetty 1, the BETA Mooring Advisor shall check both the winch assembly and the lines. BETA may refuse any ship which he considers not suitable for cargo handling operations.

   Spliced lines are not allowed. Exceptions need to be approved by BETA. In these cases, the ship has to accept a "Note of Protest" and alternative action.

   Because of the conditions prevailing at Jetty 1, the BETA Mooring Advisor is entitled to call tug assistance for the safe mooring of the ship at the ship's expenses.
2. Jetty 1:
   Four mooring posts serve to take fore lines, aft lines and breast lines. Every mooring post is fitted with 3 slip hooks with a tensile capacity of 125 tons each. Another 2 slip hooks with a tensile capacity of 100 tons, which take the spring lines, are available on each corner of the platform (See "Mooring plan for ships over 200 m." and "Mooring plan for ships under 200 m." in "Plan Section").

   The offshore terminal is additionally fitted with wire lines with polyprop tails to be fastened on the ship. The correct mooring and handling of these additional wire lines is the responsibility of the ship.

   Jetty 1 is fitted with an approach monitoring system. The approach speed of ships over 80,000 d.w.t. may not exceed 5 cm./sec.

   Panels on the Northern and Southern bollard mooring posts indicate the distance between ship and fender post (range 30 m. – 0 m.).

   The approach speed is indicated by lights in different colours as follows:

   Less than 5 cm./sec.: Green light = safe approach speed.
   Less than 10 cm./sec.: Orange light = unsafe approach speed.
   More than 10 cm./sec.: Red light = dangerous approach speed.
3. Jetty 1A: Four mooring posts serve to take fore lines, aft lines and breast lines. Every mooring post is fitted with 2 slip hooks with a tensile capacity of 75 tons each. Another 2 slip hooks, with a tensile capacity of 50 tons which take the spring lines, are available on each corner of the platform (See "Plan").
4. Jetty 2 and 3: Four mooring posts serve to take fore lines, aft lines and breast lines. Two mooring posts are fitted with slip hooks with a tensile capacity of 75 tons each. The other mooring posts are fitted with slip hooks with a tensile capacity of 50 tons (See "Plan").
5. BETA directs the ships to their loading and unloading positions.
6. Masters are responsible for the safe and proper mooring of their ships in accordance with BETA's instructions. They shall consider tidal range, wind and current conditions. Readjustment of lines is only permitted if wind and current conditions are favourable. Loading/unloading must be interrupted if the wind and/or current conditions are unfavourable. Under adverse weather conditions and floating ice, Masters are also responsible for safe and strengthened mooring.

   The cables shall only be made fast to the appropriate mooring facilities. Only those mooring facilities appropriate for the ship's size are to be used (See "Plan").

   Fore and aft lines, spring lines and breast lines with identical strain and direction must be made of the same material. Spring lines and breast lines shall preferably be made of steel cable. All exceptions require BETA's approval. Excluded is the landline material.

   Each ship lying alongside a BETA jetty shall bring out fire wires, fore and aft, on its seaward side, the eyes of which must be permanently on the water surface level. The fire wires must be properly fastened at the bitts.

   Besides that, the Master must ensure that the lines are always sufficiently tight and his ship is safely moored and that all measures are taken to keep his ship in its position.

   If the ship is fitted with automatic constant tension winches, automatic must be switched off and the brakes must be switched on. The Master is obliged to strictly follow the Mooring Advisors Instructions.
7. The access from the jetty to the ship is provided by the BETA gangway. In exceptional cases, a safe gangway may be provided by the ship. This must comply with the applicable international regulations and the regulations of the German Marine Employer's Liability Insurance Association, insofar as these are applicable to the ship.

   The ship shall be moored before the gangway is lowered. The connection between gangway and ship's deck must be secured on the ship's side.

Lay-Days at the Berths:

1. Unless otherwise provided in the freight contract, the lay-days start with mooring the first line and end with casting-off the last line.
2. The Master shall ensure that gasoline loading is to be reduced or suspended if the wind speed is too low and if
   (a) any other ship is mooring or unmooring at the parallel berth,
   (b) any other ship is lying within the danger zone of the parallel berth.

   BETA shall not be liable for any costs for lay-days as regards 2(a) and 2(b), unless otherwise provided in the freight contract.
3. When ballasting cargo tanks contain hydrocarbons, it is within the Master's responsibility to ensure that the following ballasting rates are strictly observed in due consideration of the respective wind speeds:

Top Ballast Rate (cu.m./hr.)	Minimum Wind Speed (m./sec.)	Beaufort Scale
1,500	0 – 1	0
3,000	2	1
4,000	3	2 – 12

The Master or his representative must use the wind speed indicator on the jetties for the determination of the wind speed.

Higher quantities of ballast water require the approval of BETA. The quantities depend on the wind direction, wind strength and loading/previous loading of the ship's tanks.

4. The entire fire fighting system must be kept on stand-by during lay-days of the ship, and a sufficient number of fire hoses must be uncoiled near the ship's manifold. Additionally, 2 hand fire extinguishers must be kept ready.

   The Master must ensure that there are always enough hands onboard to start firefighting in case of fire, and to unberth the ship in case of emergency.
5. After finishing of cargo handling or ballasting operations, the ship shall unberth and leave the port area. All exceptions require BETA's approval.

Areas exposed to the Wind and Freeboard Limits: In adverse weather conditions, special measures must be taken to ensure the safe mooring of the ship and to avoid damage to ship and to the jetty. Please ask for assistance of BETA's Mooring Advisor when mooring.

1. In addition to the ship's mooring cables and lines shore-side, breast lines are available to prevent the ship from moving off the jetty due to wind or current forces. The Master is responsible for the correct mooring and unmooring and handling of these wire lines during lay-days.
2. The breast wires from land have an extra safety function and are not an integral part of the ship's mooring.
3. Cargo handling operations will be suspended and the loading arms drained when the wind speed exceeds 8 on the Beaufort Scale (38 knots or 19 m./sec.) (Westerly directions of the wind: 350° through 270° to 155°).

Cargo and Ballast Handling, Tank Cleaning and Slop Discharge:

1. BETA will provide the connection between ship and jetty. The ship's crew is obliged to make the relevant preparations in good time and to offer usual assistance.
2. Manning of the jetty and additional TV-monitoring:

   One member of the BETA jetty personnel must always be on duty on the jetty which is being operated. One camera is focused on the platform, and transmits pictures on a monitor in the control room of the relevant jetty. The lighting conditions on the platform and in the jetty house must be sufficient to allow TV-monitoring. If the operating ability of the TV-system is limited due to fog or adverse weather conditions, the cargo handling operations either have to be suspended or have to be observed directly from the platform.
3. The number of crew provided for the cargo handling must be sufficient. In case of emergency or if instructed by BETA, the Master is obliged to ensure the immediate interruption of the ship's discharge pumps. In case of emergency, the BETA control pump room personnel are entitled to activate the pump emergency shut-down. Members of the crew shall be permanently stationed, both at the ship's manifold and in the pump control room. The Master shall ensure that the crew members on duty are furnished with operative BETA walkie-talkies. Cargo handling shall be suspended if the crew members on duty leave the visual range of the ship's manifold.
4. Prior to commencement of cargo handling operations, the Master or his deputy is obliged to fill in the Safety Check List for the ship and to return it to the BETA personnel responsible. Cargo handling operations may not be started without approval of the responsible BETA supervisor.
5. Prior to commencement of cargo handling operations, all sea valves connected with the loading and discharge system shall be shut and sealed, and shall be checked by the BETA personnel responsible after completion of the cargo handling operations.
6. In order to avoid pressure surges, all valves and gates on the ship and in the product lines shall be closed slowly. This applies in particular for the last part of the valve travel. Topping-off shall be reported timely to the responsible BETA pier operator. During cargo handling operations, the valves in the product lines shall only be closed in case of emergency, which must immediately be reported to the responsible BETA pier operator.
7. For the duration of cargo handling operations and ballasting, all venting and pressure surge valves, peepholes and tank dipping holes, must be fitted with flashover protectors.
8. All peepholes and tank dipping holes of tankers, which are carrying or have been carrying loads as under IMDG Code 3.1 and 3.2, shall remain open only for the duration of the tank dipping.
9. Other tank holes, which open to the atmosphere, must be securely closed. Any access between cargo deck and accommodation area must also remain securely closed.
10. Any cargo handling operations shall be stopped during thunderstorms, as agreed between BETA and the Master of the ship.
11. The grade and the amount of the product to be handled shall be announced to BETA prior to cargo handling operations. After completion of the cargo handling operations, BETA will only accept those quantities which have been taken from calibrated cargo tanks, or have been determined by means of calibrated meters.
12. Crude oil and ballast water must be discharged without interruption. During discharge operations of crude oil, the pressure in the 44 in. crude oil line on the offshore terminal shall not exceed 8 bar. All discharge operations shall be suspended in case of a tanker pump failure during the discharge of crude oil, and shall not be continued until BETA's representative grants permission.

    The product line must be filled and pressurised prior to commencement or continuation of discharge operations.

13. BETA will accept limited quantities of ballast water which must be free of lead and detergents. BETA will also accept tank washing water and bilge water. This must be biodegradable *lead free*. Detergent containing water may not be discharged into the Jade Bay. Masters are responsible for any subsequent damage ensuing from non-observance of these instructions. Prior to any discharge, the waters are subject to laboratory analyses.

    The pressure in the 20 in. ballast water line shall not exceed 8 bar.
14. Completion of the cargo handling operations shall be ascertained by BETA and the Master or his deputy.
15. Tankers which were carrying crude oil or product as under IMDG Code 3.1, and which are to be loaded with products as under IMDG Code 3.2 and 3.3, should arrive with cleaned tanks.
16. If slop oil must be discharged, the grade and the quantity must be announced to BETA prior to the arrival of the ship. BETA reserves the right to refuse poor grade slop oil.

Special Incidents during Lay-Days:

1. Special incidents like fire and major accidents which affect the safety of operations shall be immediately reported to BETA.

    Fire on board must be immediately reported to the pier operator by means of the ship's typhoon or walkie-talkie. The Master or his deputy are obliged to pass information concerning location and type of support required.
2. Masters shall ensure that the cargo handling operations are immediately suspended and the discharge pumps are stopped in the case of fire alarm in the port area, overflow of mineral oil from their ships or other ships, or in the case of any gas escape.
3. In case of emergency, BETA is entitled but not obliged to take suitable measures to prevent damage at the expense of Masters or Charterers.
4. In case of danger, or if the circumstances require to do so, BETA is also entitled to stop the cargo handling operations, and to order to arrange for the ship to clear the jetty respectively. In these cases, BETA shall not be liable for any compensation of damages.
5. On request, a practitioner is available for the medical treatment of the crew. The BETA first aid post is found in the main building of the refinery.
6. The special vehicles of the Wilhelmshaven fire brigade are available for ambulance services. In general, the ambulance shall arrive at Jetty 2 or 3, or at the house on the corner, within 20 minutes.
7. Telephone Jetty 1/1A: In case of emergency, a non-public telephone is available in the Jetty house. A ship's telephone is available on request and at the expense of the ship.
8. Telephone Jetty 2/3: In case of emergency, a non-public telephone is available in the Jetty house. A ship's telephone is available on request and at the expense of the ship.

    An international pay telephone is installed in the house on the corner of Jetty 2/3.

Prohibition of Pollution and Environmental Protection:

1. Pollution of the port area by oil, oil polluted bilge or ballast water, refuse, etc., is prohibited.

    The Agents are responsible for the disposal of oil polluted refuse. The amount of solid refuse shall be announced in good time. Solid refuse may not be oil polluted and must be dumped into the containers, which are provided on the jetty.
2. Soot emissions and every avoidable excessive emission from the funnels or exhaust lines are prohibited.
3. When discharging steam or water or when using the ship's lavatories, suitable measures must be taken to avoid pollution or damage of the jetty and ships and persons in the close vicinity.
4. All pipes, valves, connections, fittings, etc., used for cargo handling operations must be kept free from leakages.
5. Drip trays must be provided for all connections of product lines.
6. All oil leakages, whether onto the ship's deck or overboard, must immediately be reported to the BETA personnel, who will then notify the responsible department. All possible measures must be taken both on the ship and on the jetty to stop the leakage and to prevent it from spreading.

Safety Precautions:

1. Each jetty is equipped with remote controlled and hand-operated water/foam monitors. In addition, there is a dry powder system installed both at the Jetty 1 and 1A gangway tower.

    Water supply of the monitors is effected by 2 pumps with a capacity of 500 cu.m./hr. each and a 16 in. water main. In case of pump failure, there is a possibility that tugs are used to pump the water in the jetty pipeline system.

    In addition, there is a movable water/foam monitor provided on the access jetty.
2. Escape routes on Jetty 1/1A: The mooring post gangway serves as an escape route for Jetty 1 and 1A, firstly in Southern direction towards the jetty and, secondly in Northern direction to the lifeboat hanging on a swing-out davit at the end of the gangway. In addition, the mooring post gangway provides a number of descents for individuals to be picked-up by life boats.
3. Escape routes on Jetty 2/3: The access jetty serves as a main escape route for Jetty 2 and 3. In case this main escape route is impassable, the following escape routes may be used as alternatives:
    (a) Gangway at the house on the corner.
    (b) Mooring post gangway in the Northern direction to the lifeboat hanging on a swing-out davit at the end of the gangway.
    (c) Pipe bridge to the South of the building on the corner leading to the shelter.

    In addition, the mooring post gangway and the shelter provide a number of descents for individuals to be picked-up by lifeboats.
4. Emergency Shut-Down Systems: Prior to commencement of cargo handling operations, the following emergency shut-down systems will be explained to the responsible loading officer of every ship:
    (a) Automatic "tanker pump shut-down signal" via Redbox.
    (b) Automatic "tanker pump shut-down signal" via walkie-talkie.
    (c) Optical and acoustical alarm on the jetty.

    The HBTRO (BETA operating instructions for the port area) deals in detail with the safety interventions of BETA personnel.

Preventive Fire Protection:

1. Smoke and the use of smouldering and/or burning objects, as well as the use of open fire and detonating agents, is not permitted in the BETA port area. All exceptions require either BETA's approval or approval by the respective authorities.
2. Instruments which are likely to cause sparks, or parts of which heat up to such an extent that they may cause fire, shall not be used.
3. The ship's funnel and exhaust lines must be fitted with spark catchers to avoid emission of sparks and soot.

Stand-by Operation:

1. During the lay-days, the ship's main engines, rudder system and all accessory instruments necessary to maintain manoeuverability, must always be ready for operations.

Bunkering:

1. The BETA Jetty Regulations apply also to ships which are just mooring at the jetty for bunker operations or any other reasons.
2. Prior to commencement of bunker operations, all scuppers shall be closed and sealed in such a way that they are oil-tight.

Special Services: BETA's special services will be charged to the Agents.

Take-Over, Fresh Water and Bunkering:

1. If possible, onshore bunkering will be carried out by BETA in the course of the cargo handling operations.
2. Take-over of stores and provisions shall only be carried out from the seaward side of the ship by means of barges. Barges are not allowed to lay alongside during cargo operations of product as under IMDG Code 3.1, 3.2 and 3.3 and during ballasting operations. Should it become necessary for any reason whatsoever to take stores aboard during cargo handling or ballasting operations, these activities must be suspended for the duration of take-over.
3. The following provisions apply for the take-over of stores and goods:
    (a) BETA's permission must be procured by the Master or his deputy prior to taking any goods aboard.
    (b) Take-over at Jetty 1 and 1A is only possible from the seaward side. Shore side supply is possible at Jetty 2 and 3 as agreed with BETA.
    (c) All instruments which are likely to cause sparks may not be used on the ships and vehicles involved.
    (d) All tank holes must be kept closed while goods are being taken aboard.
    (e) All handling operations which may cause gas escapes must be suspended; this also includes stripping and repumping operations.
    (f) All instruments which are likely to cause sparks must be put down on rubber or other suitable mats.
    (g) All gas bottles whether filled or emptied must be carefully handled.
4. Fresh water is not available at the jetty; it must be supplied by the Wilhelmshaven water barge. Requests shall be timely submitted via the Agent.

Operator: BETA Raffineriegesellschaft Wilhelmshaven mbH.

Voslapper Groden Jetty (ICI-Jetty):

Position: Lat. 53° 37' 59" N., Long. 08° 05' 46" E.

Traffic Bridge of 1,346 m. length ends in L-shaped cargo handling pier of 675 m. length. Traffic bridge is fitted with two tracks of 5.5 m. and 3.5 m. width, all cables and pipes are led lengthwise upon the bridge to the pier connections.

Berth No. 1 at the seaward end is provided for 1 tanker of 20,000 d.w.t. – 60,000 d.w.t., but not yet in operation. Berths No. 2 and 3 (inner side) are provided for tankers of 400 d.w.t. – 12,000 d.w.t., limited by a maximum depth of 8.5 m. at MLW.

Use of Berth No. 2 is only allowed for transhipment of ethylene (class 2, UN No. 1038).

Use of Berth No. 3 is only allowed for transhipment of vinyl chloride monomer (class 2, UN No. 1068) and its residue LE and HE or ethylene dichloride (subclass 3.2, UN No. 1184).

Under following conditions Berths No. 2 and 3 can be used by ships from 7,000 – 12,000 d.w.t.:

Ship's length not more than 137 m.

Single tank size of ship:

(a) with Ethylene dichloride cargo not more than 3,100 cu. m.

(b) with vinyl chloride monomer cargo and ethylene not more than 2,900 cu. m.

Ships of more than 120 m. length must be berthed with 1 additional Atlas-spring line fore and aft. The lines are available from shore, if the ship does not have her own.

Berths may only be used by gas and chemical tankers which conform with IMO recommendations and which have a valid certificate to that effect as follows:

1. Resolution A 328 (IX) Code for the Construction and Equipment of Ships carrying liquefied Gases in Bulk,
2. Resolution A 329 (IX) Recommendations concerning Ships not covered by the Resolution 328 (IX),
3. Resolution A 212 (VII) Code for the Construction and Equipment of Ships carrying dangerous chemicals in Bulk.

All stores, fresh water exempted, must be taken onboard from seaward side. These activities are prohibited during cargo handling or taking ballast.

Also see under "General".

Harbour areas (NWO, BETA and ICI) may be exceptionally navigated by auxiliary and supply vessels if this is absolutely necessary for the transhipment or ship operations according to Port Regulations, providing these vessels comply with the safety requirements. All other vessels are excluded.

At the "Niedersachsen Bridge" it is necessary to order a bunker vessel in advance.

Also see "Developments".

Report: *Berth Approaches:* The main affect on ships approaching the berth results from the flood or ebb current setting South or North nearly parallel to the berth.

It is of extreme importance that a ship which has to turn before berthing reduces speed in ample time and does not commence turning until its speed over the ground is reduced to zero. Ships scheduled to berth port side to NWO Berth No. 4 should start the turning manoeuvre in the fairway about 800 m. North of the berth.

NWO-Terminal (Nordwest-Olleitung): Cautionary Advice: Due to the strong current at the berths of up to 4 knots, extreme care should always be taken to keep the ship moored safely alongside the berth with all mooring lines tight. Especially during off-setting strong winds and with the tide changing, the moorings must be watched carefully. Shore wires are available.

Berthing Procedures: Berth No. 4: All max. sized ships planned for this berth will run on a time schedule without anchoring from German Bight Lightvessel to the berth. Ships are normally scheduled to arrive at the turning position about 800 m. North of the berth 2 hours/30 minutes before Slack High Water, then turned if flood tide manoeuvre, then turned and backed up to the berth mooring port side to. It is emphasised that the ship should be stopped over the ground before commencing the turn and ships must not be turned off the berth itself. If the ship is behind schedule and the ebb current has started to run, the ship will then berth without turning and moor starboard side to.

The angle of approach should be as small as possible.

DENSITY: Brackish water.

BRIDGES: 3 swing bridges affect entering inner harbour; these are opened to coincide with lock opening times.

STEVEDORES: 24 hours' notice required. Bulk cargo discharge rate about 150 t.p.h.

MEDICAL: All medical facilities available.

FRESH WATER: Available by pipeline.

FUEL: All grades available. 2 days' notice required.

CONSULS: Denmark Tel: 41061. Sweden Tel: 26266. Finland Tel: 8021.

REPAIRS: Facilities available for all deck and engine repairs. Repairs affecting main engine or steering gear intended to be carried out at the berths or at Wilhelmshaven Anchorage, must be authorised by NWO, BETA and Port Authorities, when sufficient security tugs will be ordered to stand by. No additional charge for tugs if ordered before arrival. Permission for repairs depends on prevailing weather conditions and should be requested before arrival.

DRY DOCKS: One slipway at Neue Jade Werft, lifting capacity about 1,000 tons. Floating docks at Arsenal (navy yard), only for navy purposes.

GANGWAY/DECK WATCHMEN: Shore watchman recommended to attend telephone.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: Oil port is Customs free port. In dock harbour each man allowed 5 cigars or 40 cigarettes, or 50 grams tobacco and 50 pieces of cigarette paper; 1 unopened bottle wine/spirits.

REPATRIATION: All facilities available.

AIRPORT: Local airport at Wilhelmshaven-Mariensiel, available for helicopters and small aircrafts. Nearest international airport at Bremen, distance 102 km.

TIME: GMT plus 1 hour. GMT plus 2 hours (last weekend in March to last weekend in September).

HOLIDAYS: 1st January; Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whit Sunday; Whit Monday; 3rd October; Christmas Day; Boxing Day. Work may be arranged on all days.

Not observed in oil ports.

POLICE/AMBULANCE/FIRE:

Police: Tel: 110.
NWO Oil Port: Fire/Ambulance Tel: 621.
ICI: Jetty Operator Tel: 882 460.
Fire/Ambulance Tel: 882 310.
Niedersachsen Bridge: Fire/Ambulance Tel: 112.
Dock Harbour: Tel: 112 or 26121.

TELEPHONES: May be placed on board all tankers in oil port. At some locations in dock harbour, installation by Post Office, who require 2 days' notice.

SERVICES: All services available including tank-cleaning, diving, compass adjusting, etc.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

GARBAGE DISPOSAL: All berths are fitted with garbage containers for the disposal of "normal" garbage; no charges. All garbage due to cargo handling or any special garbage such as paint drums, batteries etc., has to be removed on ship's request and account. For further detailed information contact Port Authority.

WASTE OIL DISPOSAL: All residues coming under Marpol 73/78, Annex I, may be delivered ashore free of charge. 24 hours advance notice to Port Authority is necessary. Wastes must not be mixed inadmissibly; available capacity approx. 800 cu.m. For further information contact Niedersachsisches Hafenamt Wilhelmshaven (Captain Boge or Captain Pape).

SEAMAN'S CLUBS: No Seamen's Club in the port of Wilhelmshaven. "Seemannsheim" (kind of hotel) offers bed and meals for seamen awaiting vessels. Church services, coach tours, etc., may be arranged on request. Address: Deutsche Seemannsmission, Hegelstrasse 11, 2940 Wilhelmshaven. Tel: (04421) 404610.

GENERAL: *Federal Republic of Germany – Jade.* On the River Jade from the sea to Wilhelmshaven all vessels are to observe the following regulations.

1. Absolute prohibition of head-on passage and overtaking for vessels confined to the dredged channel with each other.
2. Local prohibition of head-on passage for vessels amongst themselves with
   (a) draft exceeding 13.5 m.,
   (b) length exceeding 250 m.,
   (c) extraordinary pushing and towing units
   within following fairway areas:
   - between buoy pairs 15/16 and 19/20 (circumnavigation Minsener Oog)
   - course change areas at buoy pairs 3/4 (channel entrance), 33/34 and 45/46.
3. Vessels confined to the dredged channel may navigate with the same tide phase only when keeping a longitudinal distance of 5 nautical miles amongst each other within the channel.
4. Prohibition of head-on passing and over-taking for tankers carrying cargoes as per No. 1 of Annex 1 (list of subtances) i.e. gases, ethylene dichloride or vinyl chloride monomer with each other and with all other vessels exceeding 3,000 d.w.t. within following navigation stretches:– between buoy pairs 15/16 and 19/20.

4.1. Vessels confined to the dredged channel, i.e. constrained by their draft, have right of way on the above mentioned stretches.

5. The observance of these directions will be controlled and, if necessary, regulated by the VTS-Centre, whose instructions are to be followed.

Urgent shipping police measures may also be executed by Water Police (blue hulled vessels with inscription "WASSERSCHUTZPOLIZEI" within the Territorial waters of the Federal Republic of Germany).

6. Continuous radio contact with radio station "Jade Traffic" must be made
   - between buoy "JW5/Jade 1" or river entrance inward and buoy pairs 33/34 on VHF Channel 63;
   - between buoy pairs 33/34 and all waterway areas inward of this position on VHF Channel 20.
   Remark: Shore based radar assistance will be given on the respective VHF channels.
7. When vessels are meeting on reciprocal or nearly reciprocal courses each shall alter her course to starboard.
   During the passage of vessels carrying cargoes as per No. 1 of Annex 1 (list of substances) with each other or with other vessels the greatest possible lateral distance has to be kept.
8. Vessels proceeding within the fairway have right of way against vessels which
   (a) enter the fairway,
   (b) cross the fairway,
   (c) turn within the fairway,
   (d) leave their anchorages.
9. Particular attention is drawn to the observance of the instructions given by the shipping authorities prescribed as per Section A, Part II, No. 3 of the additional regulations to the traffic regulations for waterways navigable by seagoing vessels in the Federal Republic of Germany of the Wasser- und Schiffahrtsdirektion Nordwest.
10. Inward of Jade Buoy No. 33 (Turning area for large vessels), entering tankers with draft exceeding 16.50 m. must be escorted by tugs with total minimum bollard pull capacity of 45 tons.

Regulations Within the Entrance to the Sea Lock – New Outer Harbour – (Neuer Vorhafen) and the Sea Lock in Wilhelmshaven (extract of rules):

1. Areas within the Outer Harbour and the Sea Lock belong to the safety zone of Naval Base.
2. Port Authority within these areas is the Naval Port Captain. Port Captain is attainable on working days between 0700 hrs. – 1530 hrs. via Wilhelmshaven Naval Port Radio on VHF Channel 11.
3. Traffic direction inward and outward Sea Locks is performed by Wasser- und Schiffahrtsamt Officials (Lock Masters).
4. Use of port facilities may be restricted or refused in consequence of certain reasons if deemed necessary by Port Authorities.
5. Vessels with dangerous cargoes have to obtain special authorisation issued by Port Authorities and civil permission before entering.
6. Between breakwater (harbour entrance) and locks, non-military vessels have to navigate within a 100 m. wide sector to both sides of leading line.
7. Vessels exceeding 150 g.r.t. may be obliged to take a Harbour Pilot.
8. Vessels are obliged to give notice to the radio station "Wilhelmshaven-Lock" on VHF Channels 16/13 before entering. Naval radio station is operating on VHF Channels 16/11.
9. Lock signals and preliminary lock signals are to be observed. This applies also to signals given by Naval Authorities.
10. Military safety zones must be passed at reduced speed but without delays. Bow anchors must be kept ready to drop.
11. Sport vessels may not hamper other vessels.
12. Only in cases of distress is it allowed to go alongside within the Outer Harbour.
13. Bathing, diving and use of pyrotechnics are not allowed.
14. Pollution of water within harbour areas is prohibited.

DEVELOPMENTS: *Liquid Gas Berth:* To the North of Beta Oil Terminal.

The existing ICI Terminal (See "Tankers") is planned to be extended for transhipment of L.N.G.

"Lower Saxony Bridge" (Niedersachsen Bridge): The "Niedersachsen Bridge" is to be extended. It is planned to provide facilities for the loading and discharge of large vessels up to 250,000 d.w.t. with dry and liquid bulk cargoes.

Dredging: Maintenance dredging in progress.

ANNEX NO. 1:

(List of dangerous substances which have to be reported) Annex III to the traffic regulations for waterways navigable by seagoing vessels in the Federal Republic of Germany:

1. Liquified Gases	*IMDG Code No.*
Acetaldehyde	1089
Ammonia, anhydrous, liquified or ammonia	1005
Butadiene, inhibited	1010
Butane or butane mixtures	1011
Butylene	1012
Chlorine	1017
Dimethylamine, anhydrous	1032
Ethyl chloride	1037
Ethane, refrigerated liquid	1961
Ethylamine (monoethylamine)	1036
Ethylene, refrigerated liquid	1038
Ethylene oxide	1040
Methane, refrigerated liquid or Natural Gas, refrigerated liquid	1972
Methyl acetylene and propadiene mixtures, stabilized	1060
Methyl bromide	1062
Methyl chloride	1063
Propane	1978
Propylene	1077
Sulphur dioxide, liquified	1079
Vinyl chloride, inhibited	1086

2.Chemicals	*IMDG Code No.*
Absorbent A 1	1992**
Absorbent A 2	1993**
Absorbent A 3	1993**
Acetic acid, glacial or Acetic acid solution, more than 80% acid, by weight	2789
Acetic anhydride	1715
Acetone	1090*
Acetone cyanohydrin	1541
Acetonitrile	1648
Acrylic acid, inhibited	2218
Acrylonitrile, inhibited	1093
Adiponitrile	2205
Alcohol, denatured	1986/1987**
Alcohol, industrial	1986/1987**
Allyl alcohol	1098
Allyl chloride	1100
Aminoethylethanolamine	–
Aniline	1547
Benzene	1114
Benzyl chloride	1738
Isobutyl acrylate, inhibited	2527
Butyl acrylate, inhibited	2348
Butyl alcohol	1120*
Butyl ether	1149
Normal butyl methacrylate	2227
Isobutyraldehyde	2045
n–Buthyraldehyde	1129
Camphor oil	1130
Carbolic oil	–
Carbon disulphide	1131
Carbon tetrachloride	1846
Chlorobenzene	1134
Chloroform	1888
Chlorohydrines, crude	–
Chloroprene, inhibited	1991
Chlorosulfonic acid with or without sulphur trioxide	1754
Coal tar naphtha	2553
Cresols (ortho–, meta–, para)	2076
Crotonaldehyde, inhibited	1143
Cyclohexanone	1915
Cyclohexylamine	2357
Di–(normal – butyl)amine	2248
1.1–Dichloroethane	2362
1.2–Dichloroethane	1184
Dichloroethyl ether	1916
Dichloromethane (Methylene chloride)	1593*
1.1–Dichloropropane	**
1.2–Dichloropropane	1279
1.3–Dichloropropane	–
1.3–Dichloropropene	2047
2.3–Dichloropropene	2047**
Diethylamine	1154
Diethyl ether (Ethyl ether)	1155
Dimethylamine, solution	1160
Dimethyl ethanolamine	2051
Dimethylformamide	2265
1.4–Dioxane	1165
Diisopropylamine	1158
Epichlorohydrin	2023

2.Chemicals (continued)	*IMDG Code No.*
Ethyl acrylate, inhibited	1917
Ethyl alcohol	1170*
Ethyl benzene	1175*
Ethylene chlorohydrin	1135
Ethylmethacrylate, inhibited	2277
Ethylene cyanohydrin	–
Ethylene diamine	1604
Ethylene dibromide	1605
Ethylene glycol monoethyl ether acetate	1172**
Formaldehyde solutions (45 % or less)	1198
Formic acid	1779
Furfural	1199
Gascondensate	1993**
Heptane, and its isomers	1206*
Hexane, and its isomers	1208*
Isoprene, inhibited	1218
Lignite tars	1999**
Mesityl oxide	1229
Methylacrylate, inhibited	1919
Methylalcohol (methanol)	1230*
Methyl isocyanate or methylisocyanate solutions	2480**
Methyl methacrylate, monomer, inhibited	1247
Methylstyrene	2303
Monoethylamine solutions (72 % or less)	2270
Nerozene	1993**
Nitrobenzol	1662
Morpholine	2054
Motor fuel anti-knock mixtures	1649
Nitric acid (70% and over)	2031/2032
1– or 2–Nitropropane	2608
Nitrotoluenes (ortho–, meta–, para)	1664
Oleum	1831
Paraldehyde	1264
Pentachloroethane	1669
Phenol, molten	2312
Phenylisocyanate	2487**
Phosphorusoxychloride	1810**
Phosphorustrichloride	1809**
Phosphorus, white, molten	2447
Phosphoric acid, liquid	1805
Propionic acid, solution containing no less than 80 % acid	1848
iso–Propylalcohol	1219*
iso–Propylamine	1221
n–Propylamine	1277
iso–Propylbenzene (Cumene)	1918*
Propylene oxide	1280
Pyridine	1282
Pyrocondensate	1992**
Sodium hydroxide, solution	1824*
Sulphuric acid	1830
Styrene monomer, inhibited	2055
Turpentine	1299*
1.1.2.2–Tetrachloroethane	1702
Tetrachloroethylene (Perchloroethylene)	1897*
Tetrahydrofuran	2056
Toluene (Methylbenzol)	1294*
Toluene diisocyanate	2078
Trichloroethylene	1710
1.1.1–Trichloroethane	2831
Triethylamine	1296
n– and iso–Valeraldehyde	2058
Vinyl acetate, inhibited	1301
Vinyl ethyl ether, inhibited	1302
Vinylidene chloride, inhibited	1303
Vinyl toluenes, inhibited	2618
Xylenes (Dimethylbenzene)	1307*

3. *Mineral (crude) oil and mineral oil products.*
4. *Remarks:*
   - * Substances listed in IMO Code for Gas and Chemical Tanker for which the Code does not apply.
   - ** Substances not listed in IMO Code for Gas and Chemical Tankers.

ANNEX NO. 2: *Data of Wilhelmshaven Sea Lock:*

Operation hours of Wilhelmshaven Sea Lock:

Monday-Friday	0600 – 1830 hrs.
Saturdays	0630 – 1600 hrs.
Sundays and holidays	0800 – 1600 hrs.

Beyond these hours the lock will be operated only for commercial shipping when service is ordered to the Lock Master on VHF Channel 16/13 (call "Wilhelmshaven Lock") or telephone (04421) – 304084/26311 as follows:

1. Lockage between 0000 hrs. and commencement of normal operating hours to be ordered on the day before up to 1200 hrs.
2. Lockage between termination of normal operating hours and 2400 hrs. to be ordered on the same day until 2 hours before end of operations.

Dimensions of Wilhelmshaven Sea Lock:

Length between gates	390 m.
Length usable	360 m.
Breadth between lock-basin walls	60 m.
Breadth between fenders	57 m.
Depth (above mean high tide)	14.75 m.

(Vessels in ballast up to 250,000 d.w.t. have passed without difficulties.)

In case of doubt, German text of lock regulations is authoritative.

ANNEX NO. 3

Following events shall require a prior permit, which must have been granted by the Waterways and Shipping Office competent under the provisions of Section 55(2):

1. Navigation of extraordinarily large vessels as well as of air cushion vehicles and high-speed craft;
   (Jade: Vessels exceeding
   - length 350 m., beam 52 m. and/or
   - draft inward 20 m./outward 19 m.)
2. Navigation of extraordinary composite units, whether pushed or towed, and the towing of extraordinary floating objects.

SHIPMASTER'S REPORT: Beta Sea Island (Platform): (Updated 1996).

Position: Between Jade River Buoy Nos. 18 and 19.

Pilotage: Sea Pilots (2) board/leave at German Bight Lightvessel by helicopter.

Berthing Pilots (2) board/leave about 2 to 3 miles North of Sea Island by launch.

Pilotage straightforward to "Weser Pilot Station" where river passage begins.

Two bad bends here make strict attention to steering and helmsman necessary.

Passage Time:

Inward (VLCC – half cargo)	
Sea Pilotage	3 hours 50 minutes
Berth Pilotage	54 minutes
Mooring	57 minutes
Pilotage distance	41 miles
Outward (VLCC – Ballast)	
Berthing Pilotage	39 minutes
Sea Pilotage (to 8 miles South of Light Vessel)	2 hours 24 minutes
Pilotage distance	31 miles

Helicopters: Base for the 3 German rivers at Wilhelmshaven.

First contact 1 to 2 hours before arrival at Deutsche Bucht Light Vessel via Norddeich Radio Channel 16-27 when ETA confirmed and that vessel is familiar with helicopter procedures.

Thereafter continuous watch on Channel 16 VHF until helicopter contact will require continuous calling on 410 kHz and listening out on Channel 9 VHF until operation completed.

Berthing/Unberthing: Carried out at slack water only. Deep laden VLCCs on HW only. Ballast or half-loaded VLCCs on either slack water. Deep laden VLCCs can only proceed inward on flood tide.

River passage at Buoy No. 3 begins about 4 hours before local HW at Wilhelmshaven and is proceeding according to fixed tide schedule.

Minimum underkeel clearances to be observed:

1. Inward bound:
   (a) From Buoy No. "1b/Jade 1" to Buoy No. "23": 1.97 m.
   (b) From Buoy No. "23" to Buoy No. "45": 1.93 m.
   (c) From Buoy No. "45" to NWO Jetties: 1.75 m.
2. Outward bound:
   jetties to sea: 15%.

Tugs: Six tugs used for any VLCC movement, 1 forward, 1 aft and 4 "pushers". Additional tugs have to be ordered well in advance.

Moorings: Standard VLCC mooring arrangement. Springs run out first.

Cargo: 4×16 in. Chicksan booms available. Discharge rates compatible with modern VLCC facility. Official outturn figures average 1.5% less than ship figures.

Crude Oil Washing: Subject prior permission this is allowed.

Air Pollution: Monitoring of gas emission from tank venting system carried out during ballasting. If readings high, ballasting rate must be adjusted to keep readings within set parameters (parameters not known).

Documentation: As per "Guide". *Important that Certificate of Financial Responsibility is on board otherwise vessel fined (up to a maximum of D.M. 10,000).*

Shore Leave: Permitted. Ferry is on call when required from Island to mainland berth. Refinery jeep is then on call from Gate House. It is forbidden to walk in Refinery area. Taxis can be called from Gatehouse.

General: The Sea Island is in the "free port" area, therefore, no personal effects lists or other customs problems. Authorities inflexible if certification problems arise (Certificate of Financial Responsibility).

SHIPMASTER'S REPORT: April 1988 (updated 1990).

Chart: B.A. Chart No. 3669.

Pilotage: Pilot boards by motor boat from the seagoing Jade/Weser Pilot Cutter which is stationed about one mile S.E. of "Weser" Lanby. On boarding, the Pilot requires the Tanker Check List.

Pilots change just North of the berth on entering and leaving. Time from pilot vessel to ICI Berth is about 2 hours.

Tugs: Tugs are not used by small vessels but standby astern whilst vessel alongside.

Berth: The ICI Berth is 5 miles North of Wilhelmshaven and extends for approximately 0.75 miles. There are 3 berths (Nos. 1, 2 and 3), but only Berths No. 2 and No. 3 are used and these are inside of the 'L' shaped section. Maximum depth at Chart Datum on Berths No. 2 and No. 3 is 8.5 m.

Berth No. 2 (North) is for Ethylene and Berth No. 3 is for VCM and EDC. Vessels normally berth port side to heading South.

Mooring at each end consists of 7 lines (3 head/stern lines, 2 breast lines and 2 springs). Mooring and unmooring is carried out quickly with the use of a mooring boat.

Fire wires must be tended at all times and must be between 1.0 m. and 2.0 m. above the water.

Cargo: Berth No. 2 (Ethylene): Liquid and vapour return are 6 in. Chicksans. Vapour line not normally connected during discharge. Normally warmest temperature accepted is −101° C. Shore can accept vessels maximum pumping rate in the daytime but is reduced at night. We averaged 149 t.p.h. with the maximum being 175 t.p.h.

On completion the arms are cleared with ship's hot gas for about 20 minutes.

Berth No. 3 (VCM and EDC): Separate lines are provided for each product. The liquid loading line is 8 in. and the vapour return line is 4 in.

Due to shore power difficulties the pumping rate is reduced after dark when the shore lighting is on. This is due to Grid distribution which entails the shore booster pump being shut down. This in turn reduces the pumping rate by half. On occasions ships are not berthed at night as it is not worth accepting the low pumping rate.

In Winter discharge can be prolonged to 36 hours whereas in Summer it is normally 12 hours.

The surveyor handles most of the paper work, except Notice of Readiness, which is accepted by the Loading Master.

Documentation: The berth is within a free trade area, therefore no Crew Declaration or Stores Lists required. The Immigration Officer boards on arrival and on departure in order to check all non-EEC passport holders. Shore passes are issued to non-EEC passport holders and must be handed in prior to departure.

Facilities: Fresh water is available from the pier and is metered.

There is a telephone at the control pier which is metered.

Lorries delivering stores are permitted to within 100 m. of the ship's side. Berth crane available.

A shore gangway is available and is landed on the forecastle on small ships.

No barges allowed alongside during cargo operations.

The Water Police board the vessel on arrival and check all certificates and the Oil Record Book. The Oil Record Book must be completely up-to-date and carefully compiled and signed by both the Master and the Chief Engineer. For gas vessels Cargo Oil Record Book not required. The Water Police required a copy of the Tanker Check List.

AUTHORITY:

1. Waterway Authority: (Competent for nautical affairs and concerns of waterway maintenance, traffic directions and surveillance, aids to marine navigation, shipping police, marine casualties within or with effect to Federal Waterways):

Wasser- und Schiffahrtsamt (Waterways and Shipping Board) Wilhelmshaven.

Address: Mozartstrasse 32, 26382 Wilhelmshaven, Germany.

Tel: (04421) 186-0 (Operator), 186-335 (Nautical Office), 186-336 (Nautical Office). (04421) 489-381, 489-382 (VTS-Centre, day and night).

Telex: 253407 Wsa W. (VTS-Centre).

FAX: (04421) 186-308 (Office), 489-408 (VTS-Centre).

Contact: Captain K.J.Stockhorst (Office). Captain D.Szech (VTS).

2. Port Authority: Niedersachsisches Hafenamt Wilhelmshaven, Neckar Strasse 10, 26382 Wilhelmshaven. *Tel:* (04421) 4800-0. *FAX:* 04421-480099. *Contact:* Captain Boege or Captain Pape.

3. Municipal Port Authority: (Competent for harbour affairs within municipal harbour limits) Stadt Wilhelmshaven, Rathausplatz, 26382 Wilhelmshaven. *Tel:* (04421) 297256. *Contact:* Captain Arndt.

WISMAR: 53.54 N. 11.27 E. (See Plan)

DOCUMENTS:

Health Declaration.
3 Crew Lists.
3 Passenger Lists.
Bonded Stores List.
Crew Personal Effects List.
Cargo Documents.
Ship's Certificates.

On arrival Master to complete Master's Declaration and Master's Report.

PILOTAGE: Pilot Station at Timmendorf on West coast of Poel Island for pilotage to Fairway Buoy at Wismar. Call "Timmendorf Pilot" on VHF Channel 12, 2 hours before arrival at "Wismar" Buoy, and inform "Wismar Traffic" on VHF Channel 14 at the same time. Pilot is compulsory for all tankers with oil, gas or chemicals, and all other types of ships of 500 g.r.t. and more.

Also see "Baltic Deep-Sea Pilotage".

ANCHORAGES: Anchorage in Outer Roads, North of "Hannibal" Shoal in the following positions:

(a) 54° 06' 26" N., 11° 20' 54" E.
(b) 54° 06' 26" N., 11° 25' 24" E.
(c) 54° 04' 56" N., 11° 25' 24" E.
(d) 54° 04' 56" N., 11° 20' 54" E.

The depths are 10.0 m. – 16.8 m. The bottom is sand and stones.

Good anchorages and safe shelter can be obtained at the Inner Roads.

Anchorage at the Inner Roads, South of "Platte" and East of "Mittelgrund" Shoal in the following positions:

(a) 53° 59' 50" N., 11° 20' 36" E.
(b) 53° 59' 31" N., 11° 21' 45" E.
(c) 53° 59' 02" N., 11° 21' 47" E.
(d) 53° 58' 22" N., 11° 21' 00" E.
(e) 53° 58' 30" N., 11° 20' 42" E.

The depths are 6.0 m. – 9.0 m. The bottom is sand and stones.

RESTRICTIONS: The Bay is sheltered from all winds. From the Fairway Buoy "Wismar" to harbour entrance is about 16 miles (29.5 km.) and is well marked with buoys and landmarks.

IALA System "A" is used.

In brackish water and with normal water level (5.0 m. on the water gauge), vessels piloted by day and night with max. LOA 140 m., beam 21 m. and draft 8.0 m. can safely enter.

All ships with greater dimensions need permission for the Fairway from the Wasser- und Schiffahrtsamt Lubeck, and a permission for the Harbour from the Port Authority Wismar. Please request your Agent to make the application.

All ingoing ships bound for Wismar with an LOA of 17 m. and more have to call "Wismar Traffic" on VHF Channel 14, if passing Fairway Buoy "Wismar" or the Buoy "Offentief". Give the next report, if you passed the Buoy 9, and Buoy 21 if you go alongside the quay with the ship.

Between the Isle "Walfisch" and the harbour entrance at Wismar the max. speed is 8.1 knots. From the harbour entrance at Wismar to the quay, the max. speed is not more than 5 knots.

Note: The Fairway "Offentief" is for ships with max. draft 3.10 m., and the Fairway "Flaggtief" is for ships with max. draft 3.00 m.

MAX. SIZE: Length up to 205 m., breadth up to 28.0 m. and draft up to 7.65 m. with normal water level (5.0 m. on water gauge).

HEALTH: Pratique given on arrival. In case suspected disease or fever on board, radio details to Agent or Harbour Master before arrival (Tel: 03841-262423).

RADIO/VHF: Lubeck Radio and Rugen Radio Stations keep a constant watch on Channel 16.

VHF: "Timmendorf Pilot" on VHF Channel 12 (24 hours).

"Wismar Traffic" on VHF Channel 14 (24 hours).

"Wismar Port" on VHF Channel 11, Monday – Friday 0700 hrs. – 1530 hrs., Saturday watch only 0800 hrs. – 1200 hrs.

TUGS: 1 tug of 750 h.p. available in the port. However, it is possible to order more tugs through the Agent if sufficient notice given.

Tug requirements:

LOA up to 89.99 m.	none
90 m. – 119.99 m.	1 tug
120 m. – 169.99 m.	2 tugs
170 m. and more	3 tugs.

Exemptions are possible. Please contact Agent.

BERTHING: The harbour is on the East side at the inner end of the entrance channel.

Quay No.	*Length* (m.)	*Max. Draft* (m.)	(ft.)	*Cargo handled*
1	158	7.62	25	Dangerous goods, Timber, Pulpwood, Grab cargo.
2	146	7.62	25	
3	100	5.80	19	
4	172	8.23	27	General cargo.
5	179	8.23	27	
6	130	8.23	27	
7	160	8.23	27	General cargo.
8	182	8.23	27	
9	60	8.23	27	
10	127	8.23	27	Fertiliser, Potash
11	135	8.23	27	
12	92	8.23	27	
13	120	8.23	27	Tankers
14	169	8.23	27	Grain
15	149*	6.10	20	Waiting Berth
16	149*	6.70	22	No cargo operations
Baumhaus	88	4.88	16	Passenger ships
Querkai	67			
17	273	4.88	16	Sport boats
18	153	5.30	17 ft. 5 in.	Chemicals
19	116	8.23	27	Ro-Ro
20	132	8.23	27	Grain, grab cargo

* Max. length of the ship 135 m.

CARGO HANDLING FACILITIES: Shore cranes of 6, 12, 16 and 45 tons.

1 mobile crane of 50 tons.

3 mechanical loaders for potash with a capacity of 9,500 tons per day.

STEVEDORES: *Working Hours:*

Monday – Saturday (1st shift): 0600 hrs. – 1400 hrs.
Monday – Friday (2nd shift): 1400 hrs. – 2200 hrs.
Meal breaks: 1000 hrs. – 1030 hrs. and 1800 hrs. – 1830 hrs.
Overtime by agreement.

MEDICAL: Medical station with doctor in Old West Port and local hospital. Advance notice to Agent required if medical assistance necessary.

FRESH WATER: Available from shore hydrants at all berths.

FUEL: Diesel oil and fuel oil available by barge or truck.

REPAIRS: Repairs can be effected at Flottenservice Wismar GmbH, Kopenhagener Strasse, 23966 Wismar. Tel: 03841-250141. Fax: 03841-250142. One floating crane of 100 tons capacity, which is also employed for operations in the port.

SURVEYORS: Germanischen Lloyd, c/o MTW Schiffswerft GmbH Wismar, Wendorfer Weg 5, D-23966 Wismar. Tel: (03841) 704609. Fax: (03841) 704604. Telex: 318821 for dsrk.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours. (25th March – 30th September).

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whit Monday (May 23rd); Day of German Unity (October 3rd); Reformation Day (October 31st); Prayer Day (November 18th); Christmas Day (December 25th) and 2nd Christmas Day (December 26th).

AIRPORT: Lubeck (Blankensee) 50 km.; Hamburg (Fuhlsbuttel) 100 km.; Berlin-Schonefeldt 250 km. It is possible to arrange a helicopter service direct from Wismar.

TELEPHONES: No ship to shore communications.

SHORE LEAVE: Crew members permitted ashore.

IDENTIFICATION CARDS: Shore passes are only issued for crew members and passengers of those nationalities that normally require a Visa to enter the Federal Republic of Germany. No shore passes are issued for crew members and passengers who do not require a Visa to enter the Federal Republic of Germany, Seaman's Book or Passport is sufficient.

Shore passes issued to passengers are chargeable.

AUTHORITY: *Authority for the Wismar-Fairway:* Head Office: Wasser- und Schiffahrtsamt Lubeck, Moltkeplatz 17, 23566 Lubeck, Germany. *Tel:* 0451-6208-0. *FAX:* 0451-6208-190.

NOTES

Please also advise Shipping Guides Ltd.

Ghana

GENERAL:

DOCUMENTS: On 15th November 1988 the Ghana Ports and Harbours Authority announced that all Cargo Manifests must be received by the GPHA 7 days prior to the arrival of vessel, failing which there will be no berthing for the vessel.

HEALTH: *Pratique Procedure:*

1. The Port Health Officer or authorised officer shall grant Pratique to a ship as soon as the following conditions shall have been properly complied with:
   (a) The Master shall complete accurately to the best of his knowledge and belief a Maritime Declaration of Health Form.
   The Declaration shall be countersigned by a ship's surgeon if one is carried and shall be delivered to the Port Health Officer or authorised officer.
   (b) The answers to the questions in the Declaration shall clearly indicate the absence of any infectious disease on board during the voyage or on arrival of the ship, and that the ship has not called at any infected area or had direct contact during the voyage with any ship from any infected area or having on board any case of infectious disease, and shall satisfy that Port Health Officer or authorised officer that the granting of Pratique shall not be attended by any danger.
   (c) The Master or any other person on board including a ship's surgeon, if one is carried, shall accurately and, completely answer any other questions put to him by the Port Health Officer or authorised officer in regard to the sanitary condition of the ship, the health of the passengers and crew or of any ship with which there has been direct contact during the voyage, and shall furnish any such officer with all such information and assistance as he may reasonably require.
2. In the event of any suspected disease or fever on board a ship before arrival at the port and any other circumstances requiring the attention of the Port Health Officer, the Master shall:
   (a) If the ship is equipped with a suitable radio transmitting apparatus and is due to arrive at a radio receiving port, send before arrival, either directly to the Port Health Officer or through an Agent approved by him, a radio message to that effect.
   (b) If the ship is not so equipped or is due to arrive elsewhere than at a radio receiving port, notify the Port Health Officer immediately on arrival of the presence on board of such infectious disease, or suspected conditions.
   Any radio message sent shall:
   (a) embody such of the items of information as are applicable;
   (b) be sent so as to reach the Port Health Officer not more than 12 hours, and not less than 4 hours, before the expected arrival of the ship;
   (c) if it is in code, conform with the section relating to standard quarantine messages of the International Code of Signals.
3. Any ship arriving at its first port of call in Ghana from a foreign port shall be deemed to have come from an infected local area, and shall be required to comply with the provisions as to flags and signal lights as prescribed until granted Free Pratique by the Port Health Officer or authorised officer.
   The following signals are to be shown on arrival within 3 miles of land, by vessels requiring or required to show their state of health:
   (a) in the daytime i.e. during the whole of the time between sunrise and sunset.
      (i) "Q" flag signifying "my ship is 'healthy' and I request free Pratique" or;
      (ii) "Q" flag over first substitute ("QQ") signifying "my ship is 'suspect', i.e. I have had a case or cases of infectious disease more than 5 days ago, or there has been unusual mortality among the rodents on board my ship" or;
      (iii) "Q" flag over "L" flag ("QL") signifying "my ship is infected" i.e. I have had a case or cases of infectious disease less than 5 days ago.
   (b) by night i.e. during the whole of the time between sunset and sunrise, a red light over a white light, the lights being not more than 6 ft. apart shown at the peak or where the signal can best be seen from the shore, and exhibited only when the ship is within the presence of a port signifying "I have not received Free Pratique".
   (c) Any ship displaying the appropriate signal in accordance with the provisions of paragraph (3) above shall, as soon as practicable, be visited by the Port Health Officer or authorised officer, who shall grant Pratique or take such other steps as may be necessary before granting Pratique.
4. A ship which has been granted Free Pratique at its first port of call in Ghana which has not been declared an infected area shall not be required to obtain further Pratique at another port in Ghana.

Vaccination requirements in respect of persons arriving in Ghana

All officers, crew and passengers of every ship arriving at any port in Ghana shall be in possession of valid Certificates of vaccinations against yellow fever and cholera.

Where a person arrives at any port in Ghana and is unable to produce a valid Certificate as required, the Port Health Officer or the authorised officer shall require such person to be vaccinated on the spot or to present himself at a place or places for the purposes of being vaccinated.

Under no circumstances should any officer, crew or passenger disembark if he is not in possession of any valid Certificate against yellow fever and cholera.

CUSTOMS REGULATIONS: *Pre-Entry System:*

Customs Authorities have introduced a 'Pre-Entry System' whereby importers are expected to process their Customs Bills of Entry in advance, at least 7 clear days prior to vessel's arrival, failing which a penalty is imposed by Customs on importer/consignee. To avoid a situation where importers will hold Agent/Owners responsible for refund of penalties for late submission of Manifest with Customs, it is essential that shipowners are requested to let Agent receive all cargo manifests at least 10 days prior to vessel's arrival in order for Agent to lodge with Customs Authorities advance manifest for the benefit of importers. Recently, most cargo documents have been received late and in some cases manifests have been received when vessel is in port. It is suggested that manifests are airfreighted to ensure early receipt.

SALTPOND (Bonsu): 05.05 N. 01.00 W.

LOCATION: 9 km. South of Saltpond village in position Lat. 05° 04' 47" N., Long. 01° 00' 25" W.

TUGS: One tug available to assist with berthing and connecting hoses.

BERTHING: Ship to ship transfer through 1,200 ft. floating hose. Depth of water 85 ft.

The platform "Agpi" is permanently moored. The storage vessel is named "Farmer". Loading time for 20,000 tons is 24 hours. Product is named "Saltpond Crude" or "Bonsu Crude".

OPERATOR: Agripetco Ghana Inc.

TAKORADI: 04.53 N. 01.45 W. (See Plan)

PORT LIMITS: Are shown on Admiralty Chart 3102 and covers an area of about 1.5 miles to 2 miles outside harbour entrance.

DOCUMENTS:

Customs:

2 Stores Lists.
2 Lists Crew Personal Effects.
1 Bill of Health.
6 Crew Lists with dates of yellow fever inoculations (use Ghanian Form No. 62 which is supplied by Agent).
6 Passengers Lists or 'Negative'.
6 Vessel's Itinerary Lists.
1 Freighted Cargo List.
1 Unfreighted Cargo List.
1 Set Bills of Lading.
1 Clearance from last Port.
1 List of Narcotics.
1 List of Stowaways (state 'Nil' if so).
1 List of Arms and Ammunition (state 'Nil' if so).
1 List of Mail (state 'nil' if so).
1 List of Animals on board (state 'Nil' if so).

Immigration Officer:

1 Crew List (Ghanian Form No. 62).
1 List Ports of Call.
1 List of Passengers, if any.
All crew and Passengers' Passports.
Advice to Immigration of any stowaway.

PILOTAGE: Pilotage compulsory. Pilot boards within port limits. International code signals used. Vessels to call "Takoradi Port Control" on VHF Channel 14 when about 30 miles off, to confirm ETA.

ANCHORAGES: Vessels may anchor outside the harbour without Pilot. Depth at moorings 22 ft. to 35 ft.

RESTRICTIONS: Depth at harbour entrance 35 ft. MLW.

MAX. SIZE: Up to 28 ft. draft for berthing alongside. Up to 33 ft. at buoys. Also see "Tankers".

HEALTH: See "General" before first Ghana port.

RADIO: Radio Takoradi. The station is a Coast Station and only operates on HF and MF equipment. The call sign for this station is 9GA.

VHF: Signal station Channel 14. 24 hour service for all information with regard to Pilots, berthing, etc.

RADAR: No radar services available.

TUGS: 3 tugs available. Tugs usually join the vessel outside port entrance. Tugs' assistance is compulsory. Usually one tug is assigned to vessels with a bow thruster.

BERTHING:

Berth	*Length of Berth* (m.)	*Max.Draft* (m.)	
Manganese	157 (Max.LOA)	8.6	
2 (Ro-Ro)	169	F=6.0	A=7.5
2	153	8.0	
3	153	8.0	
4	183	8.6	
5/6	225	9.5	
Oil	183 (Max.LOA)	8.9	
Buoys:		Forward	Aft
1	195 (Max.LOA 180 m.)	10.36	10.97
3	193	9.2	9.6
4	181	8.4	9.0
5	176	7.7	8.7
6	174	7.5	7.9
7	150	7.0	7.0
8	91	6.0	6.5

CRANES: There are 9 portal cranes at the Port after the restoration. Of these, 2 cranes of 15 tons each lifting capacity are at the main wharf for loading and discharging of vessels. 4 cranes of 3 tons each lifting capacity are placed at the West Wharf to cater for loading and discharging cocoa, cocoa products and other commodities. 3 cranes of 15 tons are available at the Log Wharf for discharging lorries and wagons of logs and sawn timber from the countryside and loading same on to pontoons and into lighters for vessels loading at the buoys. There are no cranes at the Cargo Platform. Instead, a mobile crane of 14 tons is used. Forklifts are used to load and discharge cargoes. In addition there are 20 gantries for loading and discharging sawn timber. There are no cranes at the buoy berths and ships are expected to use their own gear. Also there are no floating cranes at this Port.

BULK CARGO FACILITIES: There are 2 berths for the loading of dry-bulk cargo – manganese ore and bauxite. In the case of grain, coal, fertilisers, sulphurs, copra, etc., discharge can be done at any of the wharf berths. The loading rate of manganese ore is approximately 333 long tons per hour; and the loading rate of bauxite is 330 long tons per hour.

SPECIALISED CARGO HANDLING FACILITIES: Vessels usually use their own derricks for loading and discharging containers. The Port's Mafi trailers handle the containers on the quay.

Ro/Ro vessels with their own specialised cargo gear are handled.

BRIDGES: There are no bridges at the port.

STEVEDORES: Berthing meetings are held daily between the Port Authority and all Port Operators with the view to determining ETA and ETD of vessels to enable the stevedoring companies to arrange for gangs and determine the relevant rates and charges.

Normal working hours: weekdays 0700 hrs. to 1200 hrs. and 1400 hrs. to 1700 hrs. Saturdays 0700 hrs. to 1200 hrs.

Gangs required for Sunday work should be ordered before 1130 hrs. previous day. For weekday work, gangs should be ordered before 1500 hrs. previous day.

MEDICAL: It is absolutely necessary for the Agents to be notified in advance of the required medical attention so that necessary arrangements for medical exercise be carried out immediately on the vessel's arrival. Also see "General – Health".

TANKERS: Oil tankers moor on the North side of Lee breakwater. 1 berth suitable for ships of 183 m. length, draft 8.9 m.

Pipeline: 805 m. long, pipe size 8 in. for all grades of petroleum and Bitumen.

Discharge Rate:

Petroleum	–	Premium Mogas	150 t.p.h.
		Regular Mogas	150 t.p.h.
		A.G.O.	200 t.p.h.
		Kerosene	200 t.p.h.
Bitumen	–	80/110–142 cu.m./hr.	
		60/70 –154 cu.m./hr.	
		12/18 –337 cu.m./hr.	

DENSITY: Salt water.

FRESH WATER: Delivery at berths and buoys is by means of water barge of 448,000 gallons capacity. The rate of delivery is 11,000 g.p.h.

FUEL: 2 grades available, fuel and gas oil. Advance notice is necessary.

Fuel – supplied through pipelines.
Gas Oil – supplied by mobile tanker.

FIRE PRECAUTIONS: 6 firemen ordered to standby with fire engine. "No Smoking" notices are posted at considerable distances from the tankers.

CONSULS: Italian Consul only. High Commissioners and Ambassadors are in Accra.

REPAIRS: Minor repairs can be effected, slipway for vessels up to 500 tons. Small dry dock for vessels up to 100 ft. length.

DRY DOCK: There is no large dry dock in this port but there is 1 small dry dock capable of accommodating vessel of 100 ft. long, 25 ft. wide and 8.5 ft. draft.

SURVEYOR: Lloyd's, ABS, GL, BV, Panama Bureau of Shipping and Bureau of Maritime Affairs (Liberia) represented by Wiltex Ltd. (consulting engineers and marine surveyors).

GANGWAY/DECK WATCHMEN: Provision of Gangway, Deck and Hatch Watchmen is absolutely necessary to prevent stealing, pilferage and smuggling on board ships.

HATCHES: Hatches are normally opened and closed by the stevedoring gangs or, at times, by the ship's crew.

CUSTOMS ALLOWANCES: Quantity permitted for each member of the crew to be held Out of Bond is as follows: Tobacco 100 grammes; Spirits 0.75 litres; Wine 0.75 litres.

CARGO GEAR: Load/discharge is affected by the Port Authority's shore gear. There is 1 heavy lift crane of 15 tons capacity which is used for heavy lifts. Where the cargo exceeds the lifting capacity of the shore crane, the ship's jumbo derrick is sometimes used.

REPATRIATION: The Immigration Department is responsible for signing on and off on the advice of the shipping company.

AIRPORT: The airport, approximately 5 km. from the Port, is now exclusively used by Ghana Air Force. The commercial airport is located at the Capital city of Accra – some 232 km. from Takoradi.

TIME: The Greenwich Meridian Time is applied to this Port as the Greenwich Meridian passes through this country.

HOLIDAYS: The holidays at the Port are as follows; New Year's Day (1st January); Redemption Day (13th January); Independence Day(6th March); Good Friday (non-working day); Holy Saturday; Easter Monday; Republic Day (1st July); Christmas Day (25th December) (non-working day); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Telephone 999 for all 3 services.

TELEPHONES: Presently no arrangements exist for installing telephone on board ships.

SERVICES: There is no special service for tank cleaning, tank-washing or compass adjustment.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes.

IDENTIFICATION CARDS: Seamen's Book or Passport is sufficient to identify any seaman. Also see "Shore Leave".

GARBAGE DISPOSAL: Vessels must provide their own drums.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Seafarer's Centre, P.O.Box 71, Takoradi, (adjacent to harbour entrance), Tel: 2228. Facilities include swimming, snooker, table tennis, bar, transport, mailing, darts and bowling alley.

CURRENCY: Cedi.

REGULATIONS: Ship's are not allowed to discharge on board explosives or petroleum without prior approval of the Port Manager. Ships are not allowed to berth after 1800 hrs.

DELAYS: None.

DEVELOPMENTS: Rehabilitation work which is underway includes paving, fender replacement, refurbishment of jetties and quayside buildings. Electrical systems are being brought up to date to allow for the installation of new port equipment, which includes a 35 tonne multi-purpose crane, a 15 tonne general cargo crane and a 15 tonne crane for log handling.

CARGO SUPERINTENDENT'S REPORT: September 1993.

Tugs: Only two tugs available.

Berthing: Harbour has been dredged in 1992, and maximum allowed draft at the buoys has to be increased by 3 feet.

Bulk Cargo Facilities: The portal cranes are being overhauled from September 1993 onward.

The logpond cranes are in poor state of maintenance, and are breaking down 30% of the time.

Working Hours: Round the clock work with exception of meal hours. Gangs to be ordered well in advance for Saturday and Sunday.

Water: Fresh water by 150 ton barge.

Bunkers: No supply on the buoys. Only available alongside.

Developments: Rehabilitation work is underway on jetties and buildings, financed by the World Bank. The progress is very slow.

Stevedoring: Allocated by Ghana Ports and Harbour Authority. Stevedores for log shipments are very good. Watchmen service is very poor.

Stowaways: Careful check-ups must be undertaken by Europe bound vessels.

Information to Crew: This port is a very safe place to go ashore. Port area and centre of the city can be walked safely at night. The local people are very friendly. The local current is the Cedi (U.S.$ 1.00 = 650 – 700 Cedis).

The launch service to and from the ships is very flexible. Well run by the Ghana Ports and Harbour Authority.

Taxis from the main gate are plentiful and cheap. Before entering the taxi, the price has to be negotiated. To town 800 Cedis, to Atlantic Hotel 500 Cedis and to Westline 800 Cedis. The taxi takes 4 adult passengers.

The Seaman's Mission is 100 m. from the main gate. Apart from a bar and a pool table, the Mission has a very good souvenir shop. A car can be arranged for church or round trip tours. The Padre will visit the vessel at any time upon request.

In the port area are good reasonable priced restaurants (Atlantic Hotel and Harbour View Hotel). European and Chinese restaurants also available.

A visit to Sekondi is worthwhile (20 minutes by car) or European Town. This is the old natural harbour. Now this port is the Ghana Navy Base and also serves as supply base for the offshore oil exploration. The fishing boats come on the beach in the morning and late afternoon. The fresh fish is sold on the beach. Many old colonial buildings can be seen in Sekondi. "Fort Orange" was built by the Dutch in the year 1840 and is worth visiting.

The Harbour View Hotel Terrace overlooks the whole harbour and all the hustle and bustle can be seen, photographed and painted (20 minutes walk from the main gate). Rooms in the Harbour View cost U.S.$ 30.00 per night, all overlooking the harbour. Other hotels charge from U.S.$ 10.00 – 80.00.

The market in Takoradi is a typical market, fish, vegetables, fruits and many shops. Everything is for sale in the market. Bargaining is essential.

Woodcarving shops are in the back alleys of the market. A Government-owned souvenir shop (Ghana Industries) at Liberation Road sells souvenirs (carvings, paintings) at fixed prices. International telephone calls can be made from the main post and telegraph office (open 24 hours). Cost to Far East is U.S.$ 13.00 for first 3 minutes and U.S.$ 3.00 for each additional minute.

The post office in the port area is open daily on weekdays from 0800 hrs. – 1700 hrs. (Mail to Far East takes 10 days).

Many courier services available (DHL).

Train station in the port area, train goes daily to Accra. Plenty of local buses inland to all destination.

AUTHORITY: Ghana Ports and Harbours Authority, P.O.Box 249, Takoradi, Ghana. *Tel:* (031) 22252, 24073. *Telex:* 22614. *Fax:* (031) 22814. *Cables:* Harbours Takoradi. *Contact:* Captain J. E. Quansah, Acting Port Director.

AGENT: Scanship (Ghana) Limited, Amanful Road, P.O.Box 329, Takoradi, Ghana. Tel: (233) 31223531/2/3. Fax: (233) 324164. Telex: 2182 Scanship. Cables: "Scanship Takoradi". Radio: Contact possible after leaving Tema on R/T 6,500 kHz and VHF all Channels.

TEMA: 05.38 N. 00.01 E. (See Plan)

PORT LIMITS: A vessel is considered "arrived" when it is within 2.4 km. distance of the port.

DOCUMENTS:

Port Health:

Maritime Declaration of Health.
Valid Certificates for Cholera and Yellow Fever.
Derat Certificate.
1 copy Crew List.
1 copy Ports of Call List.
1 copy Passenger List.

Immigration:

1 copy Passenger List.
1 copy Crew List.
1 copy Ports of Call List.

Customs:

2 copies Manifest.
Dangerous Cargo List.
1 copy Crew List.
1 copy Ports of Call List.
1 copy Passenger List.
Port clearance, visaed by Customs at last port of call.

Shipmaster's Report: April 1992.

Customs:

1 copy Personal Effects List.*
1 copy Stores List.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.**
1 copy Animal List.
1 copy Parcel List.
1 copy Arms and Ammunition List.

* Crews effects must be declared on Ghana Customs Form C62 obtainable from the Agent. They will not accept IMCO FAL Form 4.

** Must have arrival and departure dates.

Customs require original signature on all forms, i.e. no photocopies of Master's signature.

Immigration:

1 copy Crew List.
1 copy Stowaway List.
1 copy Ports of Call List.
1 copy Arms and Ammunition List.
1 copy Passenger List.

Port Health:

1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
Port Health did not examine the Vaccination Certificates.

Total Documents Required:

6 copies Crew List.
5 copies Passenger List.
5 copies Ports of Call List (Arrival and departure dates).
2 copies Arms and Ammunition List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
1 copy Stores/Bonded Stores List.
1 copy Parcel List.
1 copy Stowaway List.
1 copy Animal List.
1 copy Personal Effects/Crew Declaration List (on Form C62).

PILOTAGE: For Main Harbour, pilotage is compulsory for all vessels of more than 60.9 net tonnes, when arriving or leaving harbour, or shifting berth, but for both Fishing Harbours obtainable on request.

Time of pilotage – Main Harbour:

(a) Dry cargo vessels: Arrivals 0600 – 1800 hrs. (up to 2000 hrs. on special request); departure 0600 – 2300 hrs.
(b) Tankers: Arrivals daylight only; sailings 0600 – 2300 hrs.
(c) Valco-Carriers: All handling, during daylight only.

Vessels arriving or wishing to enter harbour must await Pilot between E. and S.W. off Fairway Buoy, up to 2.4 km. distance. Ships embarked by Pilots from 0600 hrs., according to time of arrival Quarantine Anchorage.

ANCHORAGES: Safe anchorage, three-quarters to two miles from E.N.E. to S.W. off main entrance with depth 30 m. – 60 m., with good holding ground. Eastern area of anchorage is more comfortable, without additional swell reflected from main breakwater.

RESTRICTIONS: Entrance to main harbour is 240 m. wide. Approaches have a minimal depth of 10.6 m. Ships entering harbour may roll heavily, up to 8°, during some seasons when 2-3 cables before entrance.

Ships deeper than 9.1 m. enter only during high tide with maximum possible draft limit of 9.75 m. during neap tides.

Bottom of harbour consists of sand and mud with frequent hard rocky ground. Depth increases in direction of main breakwater.

Inside harbour alongside the breakwater are dolphins for tankers with depth of 10.3 m.

MAX. SIZE: Restricted to 198 m. length, 9.7 m. draft and 60,000 tonnes. Also see "Shipmaster's Report" dated April 1994.

HEALTH: All crew require valid certificates of vaccination against yellow fever which are inspected by Port Health Authorities. In case of any suspected disease or fever on board, agent of the vessel should be notified in advance by radio. Also see "General" before first Ghana Port.

VHF: The port is equipped with VHF radio Channels 14 and 16. Channel 16 is the international listening channel and Channel 14 is the port working channel.

Under certain conditions, vessels are able to contact the Signal Station at 200 miles.

TUGS: 4 tugs available with capacity of 1,320 h.p. Minimum of 2 tugs for berthing and unberthing. Tugs join vessels at entrance of harbour when berthing and join vessel alongside when leaving. Usual for ships' lines to be used.

BERTHING:

Berth No.	*Max. LOA* (m.)	*Max. Draft* (m.)
1	183	9.6
2	183	8.6
3	146	7.6
4	183	7.6
5	183	7.5
6	183	7.2
7	183	7.25
8	183	7.25
9	183	7.25
10	183	7.4
11	183	7.6
12	183	7.65
Valco	175	9.6
Oil	244	9.8

Usually ships moor starboard side to Berths No. 1, 2, 6-9 and portside to Berths No. 3, 4, 5, 10-12.

Buoy Berths:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)
1	46	4.3
2	91	6.4
3	131	9.8
4	153	9.8

CRANES: 2×40 tonne portal cranes at Quay No. 2.

SPECIALISED CARGO HANDLING FACILITIES: Valco Berth for handling bulk cargoes such as alumina, pitch/coke and aluminium.

Specialised facilities apart from the Valco Berth are the oil berth for handling oil and other petroleum products and grain conveyor belt, and grain conveyor belt serving the Ghana Agro Foods Company (GAFCO). These facilities serve specific industries.

STEVEDORES: Two private stevedoring companies and the GPHA perform shipboard stevedoring, while GPHA solely does shore operations.

Working Hours: The port is currently operating a two-shift system for cargo work, i.e. 0730 hrs. – 1700 hrs. and 1930 hrs. – 0700 hrs., including overtime. Marine operations are also round the clock.

MEDICAL: No advance notice except in cases of serious illness. Advice should be sent with arrival cable. Ample hospital facilities available. The Port Authority operate a 24 hour clinic.

TANKERS: Tankers always moored starboard side to dolphins, and ropes to breakwater. Distance between dolphins is 49 m. Distance between extreme bollards is 229 m. Crude oil pumped to refinery, by ship's pumps, a distance of 4,572 m.

	Pipeline Size (in.)	*Capacity* (cu.m.)	*Pumping Rate* (t.p.h.)
Crude oil	24 – 16	1,567,130	1,000
Fuel oil	14	51,400	600

DENSITY: 1025.

FRESH WATER: Available. Rate is between 20 t.p.h. and 45 t.p.h., depending on the local water pressure and the height of the vessel's water tanks.

At times a limited supply is available.

FUEL: Fuel and diesel-oil available by tanker-trucks only. No coal-bunkers available.

FIRE PRECAUTIONS: Oil tankers when moored alongside must have "Fire Wires" hanging over the bow and stern on the outboard side of the vessel. These must be lowered to the water's edge and securely made fast on board so that they can be used to tow the ship away if necessary in an emergency. Two large fire fighting pumps and "snorkels" are mounted at the oil wharf. A floating boom to prevent the spread of oil spillage must be put in position around tankers loading and discharging. The Master of the ship should be warned to lower the guy ropes securing the boom to the ship, so that the boom is afloat at all times and not lifted up as the vessel's draft changes.

REPAIRS: Marine workshop for deck and engine repairs.

DRY DOCKS: There are 2 drydocks.

Drydock No. 1: Serviced by 60 tonnes and 20 tonnes travelling cranes. Capacity: 100,000 d.w.t. Length: 277.4 m. Width (entrance): 45.4 m. Width (inside wall): 47.2 m. Depth: 8.2 m. on the sill. Flooding time: 4 hours (approx.). Dewatering time: 4 hours (approx.). Vessels with 6.5 m. draft can enter at HW.

Drydock No. 2: Serviced by 45 tonnes and 25 tonnes mobile cranes. Length: 350 ft. (106.7 m.). Width: 44 ft. (13.4 m.). Draft (entrance): 18 ft. (5.5 m.). Flooding time of empty dock: 4 hrs. (approx.). Dewatering time: 4 hrs. (approx.).

Fitting out quay: 182.9 m. Draft: 4.3 m. to be deepened. Crane: 15.2 tonnes travelling crane.

SURVEYORS: Lloyd's, NKK and Bureau Veritas are represented at the port.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary and compulsory.

HATCHES: Opening/closing of hatches is carried out by stevedores or crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and wine and beer in reasonable quantities.

CARGO GEAR: Apart from using 2 portal cranes at Berths No. 10 and 11, all other loading and discharging has to be done by ship's gears.

REPATRIATION: Facilities exist for effecting crew changes through the Shipping Master's Office and the Ministry of Transport and Communications.

AIRPORT: Situated 28.8 km. from the port.

TIME: GMT. No alterations during the year.

HOLIDAYS: New Year's Day (January 1st); Independence Day (March 6th); Good Friday; Holy Saturday; Easter Monday; Labour Day (May 1st); PNDC Government (June 4th); Republic Day (July 1st); Christmas Day (December 25th); Boxing Day (December 26th). Cargo work can be arranged, except for Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Tel. Nos: Police: 2936; Fire: 2822-12.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes.

IDENTIFICATION CARDS: Shore passes issued are sufficient.

GARBAGE DISPOSAL: Service available upon request.

WASTE OIL DISPOSAL: Service available on request if drums are sealed.

SEAMAN'S CLUBS: Mariner's Club, P.O.Box 528, Tema. Tel: 0221/2452. Facilities: Games, hockey and table tennis, swimming pool, post cards and stamps available. Minibus collection available.

CURRENCY: Cedi (C).

REGULATIONS: No refuse or waste material of any description allowed to be pumped or thrown overboard from vessel into the sea.

No person shall load or discharge explosives without the consent of the Port Operations Manager.

It is strictly forbidden to undertake main engine work without prior permission of the Port Operations Manager.

DELAYS: Delays not expected for berthing, loading or discharging, except for natural occurrences such as heavy storm or heavy downpour of rain.

GENERAL: Recommended to send ETA message as early as possible in advance. Essential that ETA message reaches Agent's office before 1430 hrs. Monday-Thursday or before 1000 hrs. Friday for weekends because of booking of gangs. Ships from Abidjan should also send 48 hours ETA message.

Tides: Maximum tide rise 1.8 m., minimum tide rise 0.91 m.

Prevailing Winds: Light to fresh breeze from W. and S.W. during all year, except December to February when N.E. Harmathan is dominating with poor visibility. Dangerous winds are tornadoes from East, May to July, but occasionally isolated tornadoes are to be expected from January to December. There is a swell in harbour, especially after tornadoes, when lying alongside the berths.

DEVELOPMENTS: Rehabilitation of the port includes:

Repair and rehabilitation of existing infrastructure and facilities.

Removal of sunken vessels and other wrecks.

Provision of container and Ro/Ro facilities.

Provision of modern cargo handling equipment, communication and floating crafts.

SHIPMASTER'S REPORT: April 1994.

The maximum LOA is 230 m. not 198 m. This vessel has a length overall of 226.25 m., and we experienced no problems.

The tanker berth consists of 3 concrete dolphins faced with rubber fenders and handles crude oil, fuel oil and LPG. It is in good condition. Tankers are moored starboard side to, with ropes ashore to the breakwater. The vessel lay alongside very quietly, and the harbour appeared well protected from any swell. There are reportedly 4 tugs available at Tema. However, when we arrived there were only two, one of which had machinery problems, and we berthed with assistance from one tug only.

It was dark when we arrived, and we had to wait until approximately 0630 hrs. before the Pilot came to us, i.e. after daylight. There were numerous small open fishing boats and trawlers operating off the port, some of which had very poor lights and were quite difficult to detect either visually or on radar.

AUTHORITY: Ghana Ports and Harbour Authority, P.O.Box 150, Tema, Ghana. *Tel:* 2631-9. *Telex:* 2108 (Gh) Ports. *FAX:* 0221/2812, 021/772448. *Contact:* R.U. Kumedzro, Port Director. Captain E.D. Ziem, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Gibraltar

GIBRALTAR: 36.08 N. 05.21 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
Arrival Report, to be completed when receiving Pratique.
International Maritime Declaration of Health.
Ship's Register.
Load Line Certificate.
Derat Certificate.
Certificate of Insurance in respect of Civil Liability for Oil Pollution Damage.
Stowaway Report.

PILOTAGE: Pilotage compulsory for all navigation (except direct *departure* from anchorage). Give notice of arrival through Agents 24 hours in advance furnishing maximum draft. Ships approach off Rosia Bay where Pilot (available day and night) boards vessel. Pilot boat painted black and flies international Pilot flag. To call Pilot: sound, and fly flag "G" or call Gibraltar Port on VHF Channel 16 and pass message on Channel 12.

ANCHORAGES: In open bay, good safe anchorage, depths vary from 5 to 40 fathoms. Vessels normally anchor in area West of Harbour Moles.

RESTRICTIONS: *Note:* British waters in the Bay of Gibraltar extend to the Median Line drawn in accordance with the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone (see Admiralty Chart D 1448). However, part of those waters are considered by the Spanish Authorities to be within the limits of the Puerto Bahia de Algeciras (Spanish Notice to Mariners 49/1563/67 of 9 December 1967), and the Spanish Authorities have claimed Spanish port dues in respect of vessels anchoring Northwards of a line drawn Westwards of the British Lines (shown on B.A.Chart No. 1448).

The waters in dispute form only a small part of the anchorages available to shipping calling at Gibraltar.

MAX. SIZE: If anchoring in bay, any size. Max. draft alongside, 31 ft. 6 in.

HEALTH: Vessels are usually boarded by Port Authorities off the Southern end of the Detached Mole: if everything found satisfactory Pratique is granted immediately. Masters should advise Agents by radio before arrival of any illness on board so that Port Doctor may board vessel with Port Authorities.

RADIO: Gibraltar Radio (British Telecom), call sign ZDK.

VHF: Communicate with Port Authorities by VHF international calling Channel 16, pass message on Channel 12, many other channels available (24 hour service).

TUGS: 8 tugs, 500 h.p. – 2,600 h.p. When required for berthing alongside, tugs meet vessels off Mole. Ship's ropes sometimes used.

BERTHING: Cruise Liners and vessels calling for bunkers or water can be berthed on both sides of Western Arm. Outer side is 490 m. long with draft up to 9.60 m. The inner side is 450 m. long and max. draft is 8.53 m. Ships of deeper draft can be accommodated on half tide basis according to tide. Vessels calling for repairs or lay up can be berthed at the Detached Mole. There are also 3 berths of 100 m. in length available to vessels discharging general and bulk cargoes.

Masters required to advise ship's draft when giving ETA. Cruise ships are only charged 13.3% of normal berthing charge.

Ships calling for bunkers and/or fresh water and not conducting operations involving passengers or cargo are only required to pay 6.6% of the normal berthing charges. Such vessels may, at the discretion of the Captain of the Port, be allowed to be berthed for a period not exceeding 8 hours whilst such vessel is not bunkering or taking on supplies or fresh water.

Vessels coming in solely for bunkers are exempted from tonnage dues.

CARGO HANDLING: Container berth at No. 2 Jetty available for vessels up to 350 ft. in length, max. draft 24 ft. 6 in. Containers are also discharged at No. 1 Jetty.

STEVEDORES: Agents automatically advise stevedoring company on receipt of ETA from ship.

MEDICAL: Masters should advise Agents when giving ETA if medical attention is required on board. Adequate hospital facilities available.

TANKERS: Max. draft at discharging berths 31 ft. 06 in. Diameter of discharging lines 14 in. fuel oil, 10 in. diesel oil and gas oil.

DENSITY: 1025.

FRESH WATER: Available at Mole from pipelines, delivery rate 60/80 t.p.h. Water can also be delivered at anchorage from barge, delivery rate 40/50 t.p.h.

FUEL: A quick and efficient bunkering service is provided on a 24-hour basis at alongside and anchorage berths. Ships arriving at night are required to give prior notice before 1600 hrs. on the day of arrival. The requirement is the same on Sunday and weekdays.

Fuel of various grades is supplied to shipping throughout the year from piped installations at all alongside berths (with the exception of the Detached Mole) using the latest metered bunkering techniques. The grades include marine fuel, thin, fuel, marine diesel fuel and gas-oil. Ships at the Detached Mole and in the Commercial Anchorage are serviced by lighters. This supply to ships is handled as a joint venture by the Shell International, Mobil, Chevron, Texaco and B.P. oil companies and is managed by the Shell Company of Gibraltar Limited, who own the main share of the installations.

The bunkering installation at Gibraltar, which was the first in the world to provide metered deliveries at shipside, includes 2 Fisher-in-Line blending units to ensure rapid delivery of fuel oils of any viscosity. Oil bunkers are normally delivered at 200 – 250 t.p.h. per connection subject to the ship's acceptance capacity. Similar rapid bunkering is provided in the anchorage by a lighter of 880 tons fuel capacity and a total capacity of 1,000 tons including bulk lubricants.

International Direct Dialling (I.D.D.) in operation.

REPAIRS: Deck and engine repairs possible. Underwater operations including repairs and cleaning of vessel's hull.

DRY DOCKS: 3 dry docks available. Largest 871 ft.×125 ft. Max. vessel size 245 m.×36 m. Dry docks operated by Gibraltar Shiprepair Ltd.

GANGWAY/DECK WATCHMAN: Not necessary but available if required.

OPENING/CLOSING HATCHES: Normally effected by stevedores.

CUSTOMS ALLOWANCES: No restriction whilst on board. Crew members may bring ashore small quantity for their immediate personal use.

REPATRIATION: Facilities exist for repatriating Crew members.

AIRPORT: Regular flights to London (Gatwick). Distance to airport about one mile.

TIME: GMT plus 1 hour in Winter, plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; May Day; Commonwealth Day (24th May); Spring Bank Holiday; Summer Bank Holiday; Queen's Birthday; Christmas Day; Boxing Day. Cargo work can be effected at overtime rates on these holidays except on Good Friday and Christmas Day when no cargo work is carried out. Bunkering is effected on any of these holidays except on Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police and Ambulance 199; Fire 190.

TELEPHONES: Telephone can be placed onboard at cruise ship berth. Telephones can also be placed on vessels under repair at the Detached Mole, through Admiralty Telephone Exchange, cost about £10.

IDENTIFICATION CARDS: Not required.

GENERAL: Advisable that vessels calling for bunkers and only stopping in port for few hours should radio their requirements prior to arrival to ensure avoiding delay.

SHIPMASTER'S REPORT: Offport Call. (Updated 1988).

VHF: Lloyd's on Channels 16 and 14. Port and Pilots on Channels 16 and 12.

Pratique: Cable for Free Pratique 18 hours ahead. Standard message. Do not expect reply.

Pilot: Boards from small black hulled motor boat off Rosia Bay. Good lee required. Contact when South of Europa Point.

Anchoring: Not necessary for offport call with under 1 hour's wait. One anchor required ready with forecastle party on stand-by.

Agent/Quarantine Officer: Board off South end of Detached Mole.

Procedure: Require 5 Crew Lists and 1 Health Declaration. They also look at Ship's Papers, Register and Derat Certificate.

For British crew joining and leaving ALC3 and ALC5 are required to be filled in, so joining members must sign on immediately.

Time: Depends on numbers and ranks joining and leaving, but in October 1980, 9 officers left and 6 joined, procedure took 30 minutes with total off hire of 1 hour and 32 minutes.

General: Money: Sterling easily available in all denominations but make sure you cable in for Agent to arrange during bank hours.

Films: Walport from 'Restano' films and Vidpak – 48 hours' notice.

Agent: Very efficient, on prior request supplied British newspapers and up-to-date Lloyd's Index.

Anchorage: Northern limit of tanker anchorage – East to West line 1 cable South of North End Detached Mole (Qk. Fl. G.), ("C" Head) – good anchorage 3–5 cables off mole – single anchor good holding.

For ships awaiting repairs or orders, North limit – East to West line North End South Mole (Fl. 2 sec.) – "A" Head.

Current: (From Pilot). Strong Southerly setting current up to 4 knots, with East wind, off moles.

Lloyd's signal station: Approaching Gibraltar, will pass all messages to Pilots and Agent.

Port expenses: Agent quoted total off port (including Pilot) £650.

AUTHORITY: Captain of the Port, Port Office, North Mole, Gibraltar. *Tel:* 77254/78134. *Telex:* 2130 Gibpor Gk. *FAX:* 77011. *Cables:* Gibport. *Contact:* Captain J.W. Prior, Captain of the Port.

Greece

ACHLADI: 38.53 N. 22.50 E. (See Plan)

DOCUMENTS: See "Stylis".
PILOTAGE: Compulsory for all vessels arriving at and leaving the berth. Pilots available through Volos Pilot Station.
ANCHORAGES: The waters which surround the port are free from dangers. Good holding ground with depths from 25 to 30 fathoms.
MAX. SIZE: Max. draft alongside is 15.0 m.
VHF: Port Authority on Channels 7 and 12.
TUGS: Tugs must be ordered from Volos or Chalkis.
BERTHING: Achladi port is a new construction belonging to the factory of Agroinvest S.A. It is a private berth about 200 m. in length standing about 3 m. above sea level and is well protected by rubber fenders. It was constructed in order to serve factory for loading and/or discharging their products, such as animal food, flour, wheat, maize, etc. Maximum permissible draft along the pier is 15.0 m.

The factory is visible just after passing Akra Tapia. It is a conspicuous building due to the height of silos and warehouses. Three fixed red lights (East) and 3 fixed green lights (West) show the ends of the berth.

Agroinvest S.A., 49 Vas. Sofias Avenue, 106 76 Athens, Greece. Tel: (1) 7214430. Fax: (1) 7249907. Telex: 210422 Agro GR. Contact: Captain George Siainis, Shipping and Port Manager.

Factory: Agroinvest S.A., Fthiotis 35103, Greece. Tel: (0238) 31313, 31532, 31602. Telex: 0296186 Agro GR. Fax: (0238) 31940.
CRANES: Loading/discharging by ship's gear for cargoes other than grain. 1×100 tonne mobile crane (factory property) available at the port.
STEVEDORES: Loading and unloading carried out throughout 24 hours.
BULK CARGO FACILITIES: There is a flat silo of 40,000 tonnes capacity and a grain silo of 100,000 tonnes capacity with a travelling shiploader/unloader of 500 t.p.h. for loading, and 600 t.p.h. for unloading.
TANKERS: Facilities available for loading and discharging oil seed tankers.
FRESH WATER: Available at the pier.
FUEL: Not available.
REPAIRS: Minor repairs can be carried out in Stylis or Lamia.
GENERAL: Stores or provisions available from Volos and/or Stylis.
AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329.

AGHIOS NIKOLAOS (St. Nikolo-St. Nicholas), Crete: 35.12 N. 25.43 E.

DOCUMENTS:
4 Crew Lists.
2 Passenger Lists.
1 Cargo Manifest.
1 Spares List.
1 Stores List.
1 List Crew Personal Effects.
Maritime Health Declaration.
1 Provisions List.
PILOTAGE: Not compulsory. No Pilot station. Private Pilot who can be used if needed. However, not always available. Area of Pilot's boarding is N.E. or S.E. of Aghioi Pandes Islet, depending weather conditions. Anchorage waiting place in same area. Call Pilot with signal "G". Small fishing vessels (length 13.0 m.) fitted with VHF can indicate position of anchorage if advised by Agent.
ANCHORAGES: (a) Harbour of Aghios Nikolaos, depth 3 – 5 fathoms. (b) Usual anchorage for vessels over 500 tons gross, South or S.E. of Nikolo Islet (Admiralty Chart No. 2536 B) and at a distance of 0.5 – 1.0 miles from the mainland, depth 10 – 40 fathoms respectively. (c) Poros Bay for small and large vessels, only when North and N.W. fresh gales, depth 16 – 27 fathoms.
RESTRICTIONS: Care to be taken off North entrance to port owing to rocky shoals, depth 5 m. Entrance from the S.W. is free of obstructions.
MAX. SIZE: Vessels of up to 100 m. length and 9.0 m. draft can enter the port. At oil bunkering installation outside the port, vessels of any size can be accommodated.
HEALTH: If from another Greek port free pratique is automatic and access to and from vessel granted on permission of Port Authorities. Port doctor visits all other vessels.
RADIO: No local radio station. Cables to Agent or Port Authority through "Athinai Radio", "Heraklion Radio" or "Rhodes Radio".
TUGS: One tug available.
BERTHING: Berthing position designated by Port Authority.
STEVEDORES: 10 permanent port stevedores available, but further 5 men can be engaged. Cargo worked by vessel's own gear.
MEDICAL: No advance notice of medical attendance required. Medical attention by town doctors available. Government hospital with all facilities.
TANKERS: No tanker berths. Vessels moor to buoys. Oil line 6 in. diameter.
DENSITY: 1025.
FRESH WATER: At new pier 3 hydrants, hose diameter 2.5 in. for supplying water. At the bunkering installation at Katsini Bay there is water storage tank capacity 500 cu. m. for supply to deep-sea vessels. Loading rate about 49 t.p.h. Delivery by flexible hose connection from the mooring buoys. Fresh water not available at the present time at the bunkering installation as they have ceased operating.
FUEL: Small quantities transported by tank truck are available from the pier.
HATCHES: Opened/closed by stevedores.
CUSTOMS ALLOWANCES: 2 packets cigarettes per crew member per day.
CARGO GEAR: No shore facilities. All cargo worked with ship's own gear.
CONSULS: None.
REPAIRS: Only minor repairs.
SURVEYORS: None.
REPATRIATION: Crew replacement and repatriation available.
AIRPORT: At Iraklion distance 66 km. 2 or 3 flights per day to Athens.
TIME: GMT plus 2 hours. GMT plus 3 hours late March to late September.
HOLIDAYS: In addition to standard Greek holidays, local holidays are Ascension Day (date not fixed), and St. Nicholas Day (6th December).
POLICE/AMBULANCE/FIRE: St. Nicholas Police tel. 100. State Hospital, tel. 22369. Fire tel. 22674 or 28905. Port Police tel. 22312. Area code for St. Nicholas 0841.
TELEPHONES: Available for yachts only.
SERVICES: Tank cleaning and hold cleaning.
SHORE LEAVE: Permitted with Port Authority pass.
STORING: Possible by truck or barge. Trucks may proceed alongside. No fork lift trucks available. Riggers available.
REGULATIONS: *(a)* Vessels are not allowed to approach Aghioi Pandes (goat reserve). *(b)* No refuse or other waste matter of any description allowed to be thrown overboard from vessel. *(c)* No visitors permitted without Port Authority permission.
DEVELOPMENTS: During next 5 years *(a)* deepening of Port Basin, *(b)* Provision of 1 shore crane, *(c)* construction of breakwater – length 200 m.
AUTHORITY: Port Authority of Agios Nikolaos, Akti Coundourou, Agios Nikolaos, Crete, P.N. 72.100 Greece. *Tel:* 0841-22312. *Telex:* 026103. *Contact:* Ioannis Papadomichelakis, (Lieut-Commander), Harbour Master.

AGIA MARINA: 38.54 N. 22.36 E.

DOCUMENTS: See "Stylis".
PILOTAGE: Compulsory. Pilot can be boarded at Stylis Anchorage or Agia Marina. Pilot and pilot boat is the same as for the port of Stylis.
VHF: Stylis Port Authority on Channels 7 and 12.
TUGS: See "Stylis".
BERTHING: Agia Marina Port is an open port on the North side of Maliakos Kolpos. It is a private port belonging to Metalia Voxitou Elefsinos A.E. (Skalistiris Enterpr. S.A.).

The Port of Agia Marina is visible just after passing Akra Drepanon and is 2 miles West of the main port of Stylis. A red fixed light shows the head of the elevator.

The berth, consisting of poles only, can accommodate cargo vessels up to 30 ft. draft for loading bauxite and/or chrome ore in bulk, cargoes come from the mines of Mount Parnassos and Mount Iti. Vessels calling at Agia Marina have to make fast to poles and are secured alongside the poles. Communication with the shore is effected only by motor boat which can be hired through local Agents. The loading takes place using an electric elevator and the rate is about 1,000 tons daily.

The port is lee to the wind and it has been reported that even with a Force 8-9 wind, vessels can stay in position without any difficulty. The vessel has to drop anchor in order to facilitate shifting(s) as elevator is immovable, also for better securing. The waters around are clear, with good holding bottom, the depth of which varies from 7 to 13 fathoms.
STEVEDORES: Working hours – 24 hours daily.
FRESH WATER: Not available. Can be obtained at Stylis, where max. draft allowed is 18 ft. 6 in.
FUEL: Not available. See "Stylis".
REPAIRS: Minor repairs can be carried out at Stylis or Lamia.
GENERAL: Stores and provisions available in limited quantities.
AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329.

AGIOI THEODOROI: 37.55 N. 23.05 E. (See Plan)

PORT LIMITS: At anchorage area North of Lat. 37° 54' N. and between Long. 23° 03' 24" E. and 23° 07' E.
DOCUMENTS:
7 copies Crew Lists (European and Asian) (IMO Standard Forms).
2 copies Dates of Vaccinations/Inoculations.
1 copy Cargo Manifest.
2 copies List of Provisions and Stores (these are supplied on forms issued by Agent printed in Greek/English).
2 copies Officers'/Crews' personal declaration, on forms supplied by Agent in Greek/English, covering all high duty items, radios cameras, etc.
1 copy Declaration of ships' cash on board, form supplied by Agent in Greek but made out in front of Master.
2 copies of Masters' Declaration that all high duty goods have not been put under seal, and that he is responsible for any loss or landing of same without proper authority.
All passports and/or Seamen's Books to be produced *if* requested by Immigration.

On completion of loading, documentation takes about 2 hours.

PILOTAGE: Compulsory. Pilot boards S.S.E. of port, about 1 mile off the outer jetty at Lat. 37° 54' N., Long. 23° 06' E. The Oil Company has its own private Pilots. There are 4 Pilots stationed at Terminal, of which one is on call 24 hours. Pilot comes out by tug. There is no direct radio contact between vessel and Pilot Station.
ANCHORAGES: There is a reasonable safe anchorage about 0.5 miles off the outer jetty, located North of Lat. 37° 54' N. and between Long. 23° 03' 24" N., and 23° 07' E. The depth is 15 – 100 fathoms with a sandy bottom. Waiting at anchorage without loading/discharging instructions is prohibited.
MAX. SIZE: Vessels with unlimited deadweight and max. draft 72 ft. are permitted. No length and beam limitation.
HEALTH: Normal procedure takes place on arrival at Terminal.
RADIO: Communications via "Athina Radio". Telex 232141 (Fax: 48973) available in Terminal and at Head Office Telex 21-8245/9.
VHF: At least 4 hours prior to arrival, vessels have to start calling "Motor Oil Refinery" on VHF Channel 14. Refinery will give any information available about berthing and/or anchoring.
TUGS: 4 tugs are available, and they are used according to the size of the vessel.
BERTHING:

Berth	*Max. D.W.T.* (tons)	*Max. Draft* (m.)	*Max. Length* (m.)	*Max. Beam* (m.)	*Max. Pressure* (p.s.i.)	*Normal Side Berthing*
A	unlimited	21.95	No limit	No limit	12.0	Port
B (N.W. side)	40,000	13.4	200	No limit	10.0	Port
B (S.E. side)	80,000	13.4	240	No limit	10.0	Starboard
C (N. side)	5,000	7.5	100	No limit	10.0	Port
C (S. side)	3,000	5.5	100	No limit	10.0	Starboard
Stern to	6,000	8.5	No limit	15.5	8.0	Stern

Nature of bottom is sand. Vessels can berth at any time day or night. Connections range from 6 in. to 16 in. Connection and disconnection is done by shore crew.
MOORINGS: Standard moorings on to dolphins which are well fendered and hold the vessel clear of the manifold complex. Vessels require their gangway and derricks to be available on arrival.
CRANES: Not available.
BALLAST: *Slops/Dirty Ballast Facilities:* 48 hours notice required for delivery up to a maximum of 5,000 tonnes, provided no lead content.
MEDICAL: Full hospital/medical facilities are available in Corinth, which is located about 15 km. from Refinery.
DENSITY: About 1028.
FRESH WATER: Fresh water is only available for delivery alongside by pipeline at about 30 cu.m./hr. Maximum quantity 200 cu.m., subject to relevant advance notice.
FUEL: All kinds of bunkers/lubricants are available, only supplied alongside.
REPAIRS: No repairs are permitted at berth or at anchorage. Nearest port for repairs is Piraeus.
SURVEYORS: All surveying firms are available.
CUSTOMS ALLOWANCES: Bond locker is sealed. Allowance 200 cigarettes or equivalent in tobacco or cigars per man (7 days) and a part bottle of wine and spirits is permitted per man (7 days). All Tobacco/cigars/ cigarettes placed under seal. Crew excess must be declared on Provision List in separate column for same.
REPATRIATION: Change of crew takes place via Athens Airport.
TIME: GMT plus 2 hours (Summer time plus 3 hours).
HOLIDAYS: Refinery works all days of the year.
STORING: All kinds of stores can be delivered to the vessel, but only by tug.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Passes are issued on arrival and must be handed in prior to sailing.
DELAYS: No delays anticipated.
GARBAGE DISPOSAL: Daily collection service by barge is available.
CURRENCY: Drachmas.
GENERAL: *Chart:* B.A. Chart No. 1657.
Visitors: Acceptable, provided 24 hours notice is given to the Refinery.
AUTHORITY: Motor Oil (Hellas) Refineries. *Tel:* 0741-48080. *Telex:* 232141. *FAX:* 0741-49001.

AGENT: Mylaki Shipping Agency Ltd., 43 Iroon Polytechniou Str., Piraeus 185 35, Greece. *Tel:* (01) 4296684, 094-320909 (Mobile), (01) 4522608 (after office hours). *Telex:* 212653 Mlki Gr. *Cables:* Mylanav - Piraeus/Greece. *FAX:* (01) 4296602.

ALEXANDROUPOLIS: 40.51 N. 25.54 E.

DOCUMENTS:
4 Crew Lists.
2 Ship's Stores Lists.
2 Crew Effects Declarations.
2 Master's Personal Declaration that all stores not held in bond will remain on board (Forms supplied by Agent).

All ship's certificates will remain at Port Authority from time of arrival until vessel sails.
PILOTAGE: Pilotage is compulsory for foreign vessels larger than 500 g.r.t. and vessels under Greek flag larger than 1,000 g.r.t.
The fully independent Pilot is "Neptun" Independent Pilot Services, 2 Philippoupoleos Street, 68100 Alexandroupolis, Greece. Tel: (551) 31015. Telex: 466177 Pesa. Fax: (551) 20449. VHF: Channel 12 (Call "Alexandroupolis Pilots").
Pilot boarding position is 0.5 miles South of the port entrance.
Pilotage is during daylight only.
ANCHORAGES: Depth inside port 18 ft. 06 in., mud bottom. Depth increases outside port to about 10 m. at distance of 1 nautical mile.
Area around port subject to strong S.E./S. winds especially during Winter. During strong winds vessels can seek shelter off Samothraki Island. In strong winds port is considered safe but because of occasional large waves loading is stopped. Winds from other directions do not affect port work.
MAX. SIZE: Vessels with draft not exceeding 19 ft. can enter safely.
Vessel with LOA up to 200 m. may berth for part loading, with good weather.
HEALTH: Vessels from foreign countries can enter harbour and obtain Free Pratique during the period from sunrise until 2200 hrs. Vessels having suspected contagious disease on board should remain outside harbour until visit of medical officer, and await further instructions.
TUGS: Compulsory. 1×700 h.p.
BERTHING: Port Authority allocates the berthing place.
At least 24 hours notice of ETA to be passed to Agent in order to organise loading/discharging.
STEVEDORES: Prior notice to be passed to Agent order arrange gangs. Rate of cargo working: General cargo about 100 tons per gang every 8 hours. Bagged cargo about 100 tons per gang every 8 hours. Coal about 80 tons per gang every 8 hours. Timber about 120 cu.m. per gang every 8 hours. Vessels must use own gear for loading/discharging, except bulk cargoes.
Bulk cargoes handled by screw pipes at the rate of 1,500 tonnes per day.
The new silo not delivered yet.
For heavy cargoes, there are 4 mobile cranes with lifting capacity of 10 tons – 80 tons.
MEDICAL: No advance notice required. 1 Government General Hospital, 3 clinics. Doctors' services readily available.
TANKERS: There is a floating pipeline. Tankers with a draft of 18 ft. can discharge diesel oil and gasoline.
FRESH WATER: 10 hydrants available. Delivery rate about 5 t.p.h. (each), but delivery rate reduced when 2 or more hydrants in use.
FUEL: No Bunker C fuel available. Supplies of diesel oil possible from road tankers.
FIRE PRECAUTIONS: No port fire brigade. In emergency fire brigades must be called from Alexandroupolis.
CONSULS: Consul-Agent of France Tel. 26–720. Consul-Agent of Italy Tel: 28–384.
REPAIRS: Only minor repairs available.
WATCHMEN: Not available, and if required must be supplied by vessel.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 1 packet cigarettes allowed out of bond for each crew member, for each day in port. Wine/beer no restrictions. Spirits, Master allowed 1 bottle.
REPATRIATION: Facilities for crew changes and repatriation.
AIRPORT: 5 km. distant. 2 daily flights to and from Athens.
TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.
HOLIDAYS: 1st January; 6th January; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; 14th May (local); 15th August; 28th October; 6th December; 25th December; 26th December, and all Sundays. Cargo work can be arranged on these days, subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Police station, 26352; Security Police, 26220; Ambulance, 25272; Fire, 26222. Port Police, 26468 (VHF 12).
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Shore pass issued against Crew List and Seaman's Book. Passes obtainable from Port Authorities.
DEVELOPMENTS: (a) Supplementary works are being performed outside along the West breakwater.
(b) Dredging works has begun inside the port.
AUTHORITY: Port Authority of Alexandroupolis, 68100 Alexandroupolis, Greece. *Tel:* 26468 (VHF Channel 12). *Contact:* Commander N. Papanikolopulos, Harbour Master.

AGENT: Mylaki Shipping Agency Ltd., 7 Vizils Str., Alexandroupolis 681 00, Greece. Tel: (0551) 33935, 093-283882 (mobile). Telex: 212241 MLKI GR. Fax: (0551) 33936. Cables: Mylanav - Alexandroupolis - Greece.

ARGOSTOLI, Cephalonia: 38.12 N. 20.29 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Customs Clearance.
2 Cargo Manifests.
Bills of Lading (copy).
4 Ship's Stores List.
4 Lists of Crew's Personal Effects.
Ship's Papers.
Crew Vaccination List.

PILOTAGE: No Pilot station.
ANCHORAGES: Vessels anchor in roads 0.5 miles N.N.W. from Entrance light. Max. channel draft 19 ft.
MAX. SIZE: Up to 19 ft. draft.
HEALTH: Free Pratique given by Port Health doctor.
RADIO: Patras Radio. No VHF.
TUGS: None available.
MEDICAL: Advance notice not required except in urgent cases. For vessels arriving from foreign countries crew require vaccination certificates.
TANKERS: Small tankers discharge at DEH Power Terminal.
FRESH WATER: Can be supplied from the pier using ship's hoses.

FUEL: Small quantities available, but only for yachts.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCES: 50 cigarettes allowed for each crew member.
CONSULS: No local representation.
REPAIRS: Only minor machinery repairs can be carried out.
REPATRIATION: By air to Athens (once daily) or by ferry-boat.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.
HOLIDAYS: Local holidays are 21st May, 16th August and 20th October, in addition to national holidays. Work may be arranged at double rates.
POLICE/FIRE/AMBULANCE: Police 22200; Ambulance 22515; Fire service available.
TELEPHONES: Can be connected on board vessels without charge.
SHORE LEAVE: Allowed.
AUTHORITY: Cephalonia Harbour Office.

9 Crew Lists
2 Vaccination Certificates
Cargo Manifest
List of Spares
Maritime Declaration of Health
1 Vaccination List
4 Crew Effects Declarations
Passenger List
Cargo Documents
2 Special Customs Forms in triplicate
2 Stores Lists
PILOTAGE: Compulsory for vessels over 150 g.r.t. Piraeus pilots board one mile off the breakwater.
APPROACHES: Two approach channels lead to the Gulf of Eleusis. The "W" Entrance, Poros Megaron is dredged to 7.9 m. (26 ft.) over the bottom width of 180 m. and is passable for vessels up to 183 m. LOA (600 ft.). The "S.E." Entrance, through Strait of Salamis, is dredged to a depth of 10.89 m. (35 ft. 09 in.) over a width of 240 m., max. speed 6 knots. Both channels are buoyed and lighted, but there are some restrictions concerning night navigation in the "E" Channel.
ANCHORAGES: See "Eleusis" and "Piraeus".
RESTRICTIONS: Draft restriction for Poros Megaron Channel is 7.9 m. (26 ft.) and for Strait of Salamis Channel 10.89 m. (35 ft. 09 in.).
MAX. SIZE: See "Berthing".
HEALTH: No restrictions, except quarantine, Free Pratique according to international regulations. Free Pratique not required if arriving from another Greek port.
RADIO: Athens Radio (SVA).
VHF: Piraeus Pilot Station on Channels 16, 12 and 6. Station operates throughout 24 hours. Aspropyrgos Refinery on Channel 8.
RADAR: None.
TUGS: A large number of tugs are available. Tug escorts are compulsory in daytime for vessels over 120 m. (394 ft.) LOA, and during night for vessels over 75 m. (246 ft.), when passing through Strait of Salamis. Ship's lines always used.
Fire Fighting Tugs: The employment of fire fighting tugs or similar for tankers during loading/discharging is compulsory.
BERTHING: See "Tankers".
MEDICAL: Advance notice not required. Full hospital facilities available in town of Eleusis. Refinery provides ambulance in case of accident.
TANKERS: A jetty extends 170 m. West from the shore, near the refinery, and provides 2 berths with depth of 11.80 m. (38 ft. 09 in.) alongside (See "Restrictions" for max. draft passing through Strait of Salamis).

The Eastern Berth is equipped with 3×8 in. mechanically operating arms for crude oil and oil products.

The Western Berth is equipped with 4×8 in. mechanically operating arms for oil products.

Vessels always using their gangway rigged in the middle of the vessel. Jetty accepts vessels of no more than 220 m. LOA, and deadweight of no more than 60,000 metric tons.

At the same jetty, there is also a possibility of bunkering (fuel oil and gas oil). Permanent refinery's personnel keeping watch 24 hours near the vessel for safety and communications. Max. discharging pressure 9 kg./sq.cm. (127 psi).

Another jetty provides 2 berths with 7.2 m. and 7.9 m. depth alongside (LOA 100 m./5,000 d.w.t.). The berths are equipped with 6 in. hoses for small tankers (coasters) and shipment of refined products.

An LPG berth midway between the two oil jetties has a depth of 7.2 m. (LOA 115 m.) for loading LPG and refined products.

Ballast: All dirty ballast must be pumped ashore. Refinery has facilities to receive up to 8,000 cu.m. of contaminated ballast. Refinery requires notice of 24 hours before vessel's arrival.
DENSITY: 1025.
FRESH WATER: Available 24 hours a day. Quantity may be limited due to seasonal shortage in area.
FUEL: Available at all piers except LPG Pier.
FIRE PRECAUTIONS: Fire wires rigged fore and aft on outboard side of vessel. Deck scuppers plugged. Spark arresters to be fitted on tank openings. Earth connections made. Patrols made by Port Officers.

In the case of a storm, the Dock Master can stop discharge of vessels. The refinery fire fighting procedure is followed.
CONSULS: None locally. Consuls in Athens and Piraeus.
REPAIRS: While alongside, maintenance of any kind on board is strictly prohibited. In case of an emergency, the issuing of a special written "cold or hot work" permit is necessary.
DRY DOCKS: See "Eleusis".
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle of wine/spirit allowed per crew member.
REPATRIATION: All facilities available for crew changes and repatriation.
AIRPORT: Direct overseas flights available via Athens Airport at Hellinicon (35 km.).
TIME: GMT plus 2 hours; Summertime (March to September) GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: All emergency services are available through the terminal office. Fire alarms are installed throughout the jetty. Refinery's internal numbers: Fire Tel: 2300. Ambulance Tel: 2311, Police Tel: 2353, Terminal Office Tel: 2351.
TELEPHONES: Not supplied on board vessels.
SERVICES: Compass adjusting. Electronic equipment services.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Shore passes issued by Port Authority.
GARBAGE DISPOSAL: Not available from refinery. This facility can be arranged, with charges for ships account, with Limberis Group,Tel: 01-4127543/5545841, who are authorised by the Eleusis Harbour Master.
WASTE OIL DISPOSAL: Available direct from refinery installation. Shore tank capacity 8,000 cu.m.
SEAMAN'S CLUBS: No club but usual local facilities.
CURRENCY: Greek Drachma (GDR). U.S.$ 1.00 = 245.0 GDR (1.7.96).
AUTHORITY: *Port Authority:* Eleusis Port Authority, 10 Kanelopoulou, Eleusis 19200, Greece. *Tel:* 5543504.

Refinery: 170 km. National Road Athens – Korinthos, 19300 Aspropyrgos. *Tel:* 5578200. *Telex:* 215442, 215443, 215489 Ref Gr. *FAX:* 5570990, 5577901.

CHALKIS: 38.27 N. 23.35 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores and Spares Lists.
2 Crew Personal Effects Lists.
Health Certificate.
PILOTAGE: Pilotage is compulsory for all foreign vessels and Greek vessels over 1,000 g.r.t.

Application for Pilot to be made by radio through Agent to Chalkis Port Authority. ETA required at least 24 hours before arrival. 2 hours notice of departure required.

Apply for Pilot through VHF Channel 12, or through radio/telephone on 2364 kHz calling Harbour Master, Chalkis.

Pilot boards from black motor-boat with white horizontal stripes, about 10 m. length, in a position about 1 mile – 1.5 miles North of the light buoys of the Northern Port.

The pilotage area extends from 1 mile North of red and green light buoys, North of Evripos Bridge, and to the South of Euboea, 2.5 miles from Bourtzi Point.

The anchorage for vessels coming from the North of Euboea and awaiting Pilot is at the centre of the Euboean coast off Lighthouse Kakokefali, North of the 2 light buoys and outside the bearing 020°/200° which is the axis of vessels passing in and out of Evripos Strait.

Safe anchorage for vessels coming from South of Euboea and awaiting Pilot is 1 nautical mile South of Bourtzi Point.
ANCHORAGES: Good anchorages in both harbours, well clear of the fairway, 2 miles S.S.W. of the green Fairway Buoy of the South entrance, and 1.5 miles North of the green and red buoy of the North entrance.
ENTRANCE: The South entrance has 2 narrow passages. The Southernmost is the 3 cable wide Dhiavlos Avlidos with 6.4 m. (21 ft.) depth, which leads to the outer harbour. Three miles further N.W., the one cable wide Dhiavlos Peramatos connects the outer and the inner harbours, depth 6.4 m. (21 ft.) over a width of 90 m.
RESTRICTIONS: Vessels with a draft of 18 ft. – 21 ft. and LOA 110 m. – 178 m. pass through Dhiavlos Steno in daytime only, and are to be accompanied by a tug.

Full details in Evripos Straits Operations Regulations.

There is also a restriction in Steno Straits, where there is an overhead cable 37 m. (121 ft.) above sea-level. Max. air draft 32 m.
Swing Bridge: Passage through swing bridge only possible from 2300 hrs. – 0500 hrs. Call Chalkis Port Control on VHF Channel 12. Max. LOA 105 m. and max. draft 5.5 m. (18 ft.). Width of channel 39 m.
Tides/Currents: In Avlidos Steno the tidal stream is normally up to 4 knots – 5 knots, North of the swing bridge. The spring range is about 0.8 m. (2.6 ft.) and neap range about 0.2 m. (0.6 ft.). South of the bridge the currents and tides are small. Moreover H.W. is 1 hour 12 minutes later in the North harbour than in the South harbour, which causes streams of 7 knots – 9 knots at Springs.
MAX. SIZE: Max. draft 21 ft. in daytime and 19 ft. at night for vessels entering port. For vessels navigating Evripos Strait, max. length 110 m., max. draft 19 ft., breadth 20 m. and subject to local regulations.
HEALTH: Pratique not required if coming from another Greek port. Otherwise International Pratique regulations are applied.
RADIO: No local radio, all messages should be passed through Athinai Radio.
TUGS: 3 tugs available, join vessel off the berth. Ship's tow lines used. Tug is compulsory for vessels over 1,000 g.r.t. Tug used only for berthing and unberthing.

BERTHING: *South Outer Harbour:*
(1) A pier of Interchem Chemicals factory with a channel with 18 ft. max. draft.
(2) Avlis Shipyard with 2 floating docks.
(3) A cement factory with docks, with max. draft 21 ft., with piers for loading cement and discharging coal (South Inner Harbour).

On the Eastern shore the old quay has a length of 150 m. and a depth of 6.0 m. (20 ft.) alongside. The new quay has a length of 430 m. and a depth of 5.0 m. – 7.0 m. (17 ft. – 24 ft.) alongside.

Berthing at slack water or when stream is South to North.

Also see "Ship's Officer's Report" dated August 1995.

BRIDGES: Passage above Evripos Bridge can only be effected at slack water or with following tide.

CRANES: Mobile cranes available.

STEVEDORES: Loading, discharging, carried out with ship's gear. Notice must be given by Agent to stevedores not less than 6 hours before vessel's arrival.

Cargo working rates: General cargo 80 tons – 100 tons every 8 hours. Bagged cargo 100 tons – 150 tons every 8 hours. Timber 70 cu.m. – 90 cu.m. every 8 hours.

MEDICAL: Agent should be advised beforehand if medical assistance required on arrival. Clinic facilities available. Vaccination certificates required.

DENSITY: Average 1025.

FRESH WATER: Drinking water can be supplied in small quantities by tanker lorry or water barge. Available alongside at the South Pier.

FUEL: Can be supplied in small quantities by tanker lorry.

CONSUL: France, Tel: 2574.

DRY DOCKS/REPAIRS: Avlis Shipyards S.A., P.O.Box 18, Chalkis, Greece. Tel: (0221) 31502, 31512. Telex: 272143, 272180.

Shipyard has 2 floating docks (max. size 48,000 d.w.t.) and a lay-by berth for major repairs.

WATCHMEN: Not compulsory.

HATCHES: Opening and closing hatches can be effected by ship's crew or by workers if requested.

CUSTOMS ALLOWANCES: Crew members each allowed 1 packet of cigarettes per day. Only the Master is allowed 1 or 2 bottles of alcohol while vessel in port.

REPATRIATION: No difficulties as there are excellent communications with Piraeus. Also see "Shipmaster's Report".

AIRPORT: Nearest is Athens International Airport (90 km.).

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: 1st January; 6th January; 25th March; 21st April; Good Friday; Easter Monday; Easter Sunday; 21st May; 15th August; 28th October; 6th December; 25th and 26th December. Local holidays: St. Paraskevi (July), St. Nicholas (6th December).

POLICE/FIRE/AMBULANCE: Port police 22580; Fire 23333; Ambulance 22282.

TELEPHONES: Cannot be connected on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are issued by Port Authorities.

GARBAGE DISPOSAL: Service is available by barge both alongside and while at anchor. Garbage is collected each morning and charges vary with g.r.t. and distance from Chalkis Port.

WASTE OIL DISPOSAL: No slops reception facility exists but oil residue from vessels are disposed of using tanker trucks.

SEAMAN'S CLUBS: None.

CURRENCY: Greek Drachma (DRC).

DELAYS: Only waiting for suitable tides.

SHIPMASTER'S REPORT: June 1981.

The name appears to be pronounced Halkis but according to local people the spelling can be Chalkis, Khalkis, Halkis or Kalkis.

To repatriate Indian crew, Agent requires names of those persons leaving at least 48 hours in advance. Crew usually cleared through Immigration 48 hours beforehand and through Customs when they leave the vessel. Immigration office closes at 1300 hrs. and all day Sunday. For British personnel, Immigration can be arranged 24 hours beforehand. All personnel must ensure that anything declared on the manifest such as cameras, radios, etc., are crossed off on being taken ashore otherwise vessel will be fined if these items not sighted by Customs when vessel sails.

The bridge lowers and retracts under the road on the South side.

According to the Pilot the maximum tidal rate is 4 knots, although it does appear faster at times.

SHIP'S OFFICER'S REPORT: August 1995.

Berth: Psakhna Soya Terminal (See "Plan").

Pilots: Pilot boards from grey wooden motor-boat with white superstructure, length about 10 m., in a position about 0.5 – 1.0 miles S.W. of Soya Terminal.

Chalkis Pilot Station on VHF Channel 12.

Anchorage: Await berth (daytime) in a position with Ak. Mina bearing 313° at a distance of 2.2 miles.

VHF: Contact Psakhna Soya Terminal on VHF Channel 77.

Tugs: Two tugs used for berthing and unberthing.

Berthing: Daytime only. Contact Port Control after 0700 hrs. local time.

The head lines to mooring buoy will be run out first. An anchor must be used when approaching the berth. Berth has breasting dolphins.

Garbage: Service is available by barge. Garbage is collected each morning.

Telephones: Local telephone is available on berth (For shore operator only).

AUTHORITY: Chalkis Port Authority, 1 Athens Street, 34100 Chalkis, Greece. *Tel:* 28888, 28055. *Telex:* 272197. *Contact:* Commander George Papanicolaou, Harbour Master.

CORFU (including Kalifoka and Kefalomandouko): 39.37 N. 19.56 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Maritime Declaration of Health.
3 Stores Lists.
3 Spares Lists.

PILOTAGE: At least 24 hours before arrival ETA should be passed to Port Authority on 2182 kHz, answering on 2830 kHz also VHF Channels 7 or 12 and Telex No. 33111. Vessels requiring Pilot during daytime should hoist letter "G" of international code, and sound letter "G" in the morse code on ship's whistle at intervals. Vessels should await Pilot in position Lat. 39° 38' N., Long. 19° 57' E. nearest to the coast of Ptychia Island (Vido) and Corfu, depending on weather conditions.

ANCHORAGES: Safe anchorages in the area between Vido Island and coasts of Corfu, depth about 30 m. During strong N.W. winds there is safe anchorage in the roadstead at Garitsa Bay at a distance of 0.5 miles from the shore where depth in excess of 20 m.

RESTRICTIONS: Only during unfavourable weather conditions or lack of berthing space.

MAX. SIZE: Draft 7.0 m.

HEALTH: Port Health Officer boards vessel on arrival and examines health declaration. In cases of suspected disease or fever on board the Health Officer will examine entire crew and passengers.

RADIO: Radio Kerkyra. 2182 and 2830 kHz.

VHF: Radio Kerkyra on Channel 26. Port Authority on Channels 7 and 12.

TUGS: One tug – "Hermes".

BERTHING: Vessels should prepare fenders prior going alongside berth.

STEVEDORES: At least 24 hours advance notice of ETA required order arrange gangs. There are 2 silos for the discharge of bulk grain at Mandouki.

MEDICAL: Agent should be advised in advance of any medical requirements. Medical clinics available.

DENSITY: 1025.

FRESH WATER: Available through 2 in. hoses.

FUEL: For yachts in the new harbour there is a diesel-oil tank, capacity 10 tons. Also available from road tanker for all vessels alongside.

FIRE PRECAUTIONS: Loading/discharging of inflammable liquids and explosives generally forbidden without permission of Port Police. The anchorage for vessels carrying inflammable liquids or explosives is between Lazareto Islet and N.W. of breakwater point.

CONSULS:
Belgium: S. Savanis, 44 Alexandras Av. Tel: 33788.
Brazil: K. Palatianos, 124 Kapodistriou St. Tel: 30767.

Sweden: Adam Bogdanos, 5 Donzelot St. Tel: 29469.
United Kingdom: I. Karidi-Patrikioy, 11 Alexandras Av. Tel: 30055.

REPAIRS: Facilities for minor repairs only.

DRY DOCK: Largest dry dock 20 m. length, 2 m. depth.

WATCHMEN: Required.

HATCHES: Opened and closed by stevedores. Hold cleaning service available.

CUSTOMS ALLOWANCES: Crew of Greek vessels are not allowed more than immediate requirements out of bond. Seamen signing off and passengers leaving the vessel are allowed 200 cigarettes.

REPATRIATION: Facilities for crew changes and repatriation available.

AIRPORT: 2 km. from port. During Winter 2 flights daily to Athens. During Summer frequent daily flights to Athens, Thessalonika and abroad.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Local holidays are 21st May, 11th August and 12th December. In addition Corfu observes standard Greek holidays.

POLICE/AMBULANCE/FIRE: Port Police, tel: 32655, 30481; Police, tel: 38661; Ambulance, tel: 39403, 30033, 30562; Fire, tel: 39533.

TELEPHONES: Telephones only available for placing onboard for special cases.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

REGULATIONS: Forbidden to approach Lazareto Islet.

GENERAL: Prevailing wind is from the N.W. Anchorage in the new harbour unsatisfactory due to mud bottom.

AUTHORITY: Port Authority of Corfu, Xenofontos Stratigoy 2, GR 491 00 Corfu, Greece. *Tel:* 32655, 39513, 30481. *Telex:* 33111. *Contact:* Harbour Master.

ELEUSIS (including Skaramanga): 38.02 N. 23.33 E. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Bill of Lading.
2 Lists of Stores and Provisions.

PILOTAGE: Piraeus Pilot Station regulations are operative.

ANCHORAGES: Port offers safe anchorage. Bottom mud and sand.

RESTRICTIONS: After sunset and for vessels intending to enter Eleusis port through Salamis Channel, it is imperative to give 6 hours notice of expected time of arrival to Port Authorities of Eleusis, in order to obtain special permission from the naval yard of Salamis.

MAX. SIZE: No limitations to length and breadth at the installations or at the main port. Max. permissible draft of vessel entering Eleusis Bay is 35 ft. Max. draft at berths is 33 ft. Also see "Tankers".

HEALTH: For vessels arriving from other Greek ports, Pratique is automatic. Vessels arriving from foreign ports boarded by Health Officer who grants Free Pratique.

RADIO: Athinai, 2182 kHz.

TUGS: Join vessel outside Piraeus Harbour and formalities much same as Piraeus.

BERTHING: Overall length of jetties and quay at Eleusis 715 m. Max. depth over 80 m. of jetty length is 33 ft. with depths of 26 ft. elsewhere.

SPECIALISED CARGO-HANDLING: Loading/discharging of iron ore is carried out by *(a)* Holivourgiki Co., (See "Shipmaster's Report" - August 1985) which owns a pier of 180 m. long and from 26 ft. to 36 ft. depth, equipped with 4 cranes with average discharge rate of 6,000 t.p.h., and *(b)* by Metallia Voxitou Elefsinos Co., which offer a special anchorage with buoys. Loading is effected by means of silo.

Loading/discharging of fluid chemicals or liquid gas are carried out by Petrogas Co. to their private pier of 35 m. long and 15 ft. depth.

MEDICAL: Advance notice not required. Clinic available in town of Eleusis if required.

TANKERS: Operating companies supply reducing pieces. No facilities for residue discharge. *(a)* Esso Pappas: length 160 m.; breadth 30 m.; depth at pier 30 ft. *(b)* Greek Refineries: length 93 m.; breadth 12.70 m.; depth 7 m. *(c)* Texaco: length 80 m.; breadth 6 m.; draft 4.50 m. *(d)* Mamidakis: length 40 m.; breadth 5 m.; draft 27 ft.

Shipmaster's Report: June 1981.

Petrola Petroleum Harbour just West of Elefsis town.

Petrola is owned by John Latsis Co. The terminal has their own VHF Channel 66 Alpha, also use Channel 12 but this usually congested.

Moorings: Normally 3, 2, 1. Normally 2 tugs. Pilots employed by Petrola and come on board after Sea Pilot has taken vessel through the Bay. Fresh water available from jetty.

FRESH WATER: Barge delivery available.

FUEL: Available ex-wharf at tanker installations subject advance notice. Can be supplied by barge at other locations.

FIRE PRECAUTIONS: The usual precautions applicable to oil installations. During operations of white liquid (petrol, spirits, etc.) regulations require a tug to be standing by.

HATCHES: Usually opened and closed by crew and subject additional payment by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed per Crew member out of bond.

CONSULS: None.

REPAIRS: All grades of repairs can be carried out at Eleusis Shipyard, and also at Skaramanga (See "Dry Docks").

DRY DOCKS:

Hellenic Shipyards Co.

Skaramanga Shipyard: Situated on the coast between the Port of Piraeus and Eleusis Bay. Shipyard is 8 miles by road from Athens and 7 miles from Piraeus; driving time 25 and 20 minutes respectively.

Mailing address: Hellenic Shipyards Co. Athens: 4 Academias St. Tel: 36.11.142. Cables: Shipyard, Athens. Telex: 215123.

Skaramanga: Tel: 55.73.351, 55.73.471. Cables: Shipyard, Athens. Telex: 215293, 215396.

Office hours at Skaramanga: 0815 hrs. to 1715 hrs. (weekdays), 0815 hrs. to 1345 hrs. (Saturdays).

Floating Docks

Main Particulars	*Dock No. 1*	*Dock No. 2*	*Dock No. 3*
Lifting capacity	30,000 tons	22,000 tons	25,500 tons
Docking capacity (d.w.t.)	72,000 tons	37,000 tons	60,000 tons
Length overall	826 ft.	673 ft.	760 ft.
Length on keel blocks	760 ft.	605 ft.	693 ft.
Breadth inside banks	121 ft.	105 ft.	111 ft.
Breadth outside banks	147 ft.	129 ft.	136 ft.
Ht. of WL above keel blocks	28 ft.	28 ft.	28 ft.

Skaramanga Yard's 3 floating docks have been designed in such a way as to eliminate delays of any kind in the raising of large vessels and to ensure that the work is carried out in minimum time and with the least possible inconvenience to the crew living on board.

The basic equipment of the docks is the following; 2×5 ton cranes, 2 fire extinguishing pumps 120 cu.m. per hour at 90 m. WC, DC current supply to ships 1200 A 220 V, AC current supply to ships 600 A 440 V 60 cycles, multipoint welding rectifier 2500 A, 2 oil pumps for supply of fuel oil from the dock to the vessel 60 cu.m. per hour at 50 m., 2 compressors 17 cu.m. per minute at 7 atu, emergency diesel generator set 200 KVA, foam fire extinguishing system, steam boiler and water distilling plants.

Shipmaster's Report: 1978.

Tankers may discharge residue at the deballasting station of Hellenic Shipyards, max. output 500 cu.m./hour.

Graving Docks

1. Capacity 500,000 tons. Length 420 m., breadth 75 m., depth 9.5 m.
2. Capacity 250,000 tons. Length 327 m., breadth 53.6 m., depth 9.25 m.

Ships are manoeuvred at the dock entrance with the assistance of 2×5-ton capstans situated on each side of the entrance gate. They are then shifted inside the docks by 2×15 ton auto-tensioning winches and hauling-in trolleys (mules) running on tracks on each side along the dock subway.

The dock floor is fitted with specially designed keel blocks for easy fitting and removal and with electrically operated side blocks.

The Graving Dock is served by 2×100 ton cranes, 1×50 ton crane and a small 5 ton crane.

A fleet of 5 powerful tugs is on hand at Skaramanga Yard to assist docking and undocking operations of all vessels calling at the yard.

Eleusis Shipyards S.A. is located 27 km. outside Athens. The site was chosen on account of the several advantages it presents. The bay is well protected from strong winds, sources of raw materials are available in the vicinity of the yard, and adequate transportation, power, and telecommunication facilities can service the needs of yard.

Athens Office: 67 Athinas Street, Athens 112. Tel. 349 053. Cables "Helnafel Athinia". Telex 215215 Esc Gr.

Yard: Eleusinia, Eleusis. Tel. (01) 5535111. Cables "Helnafel Eleusis". Telex 215684 Yard Gr and 215690 Yard Gr.

Floating Docks: Three floating docks are available with the following specifications:

	No. 1	*No. 2*	*No. 3*
Length	162 m.	227.5 m.	252 m.
Breadth at entrance	23 m.	33 m.	41 m.
Draft over keel blocks	6.30 m.	8 m.	9.40 m.
Lifting capacity	11,500 m. tons (20,000 d.w.t)	20,000 m. tons (60,000 d.w.t.)	30,000 m. tons (115,000 d.w.t)
Cranage	5 t at 15 m.	12 t at 20.6 m.	12 t at 20 m.

Quay Wall: The 640 m. long quay wall is equipped with 40 and 15 ton cranes, range 30 m.; power 220 volts DC 100 amp. – 42 volts DC 25 amp. – 280 volts AC 630 amp. Floating crane, 50 tons capacity.

Tugs: Available for manoeuvring purposes at all times.

AIRPORT: Athens Airport. Regular international flights.

HOLIDAYS: Cargo operations can be effected during usual Greek holidays, following submission of application to Harbour Workers' Union and subject cost increase of 75% above normal.

POLICE/AMBULANCE/FIRE: Eleusis Police Station 46674; Ambulance 46503; Fire Brigade 0199.

SPECIAL PRECAUTIONS: See "Piraeus".

GARBAGE DISPOSAL: Garbage reception barge "Dimitrios G II" owned by Hellenic Express M.C., Tel: 4127543, available from 0800 hrs. to 1500 hrs. Charges as follows (35% surcharge at weekends):

Foods/operational waste	up to	1 cu.m.	2732 Drs.
	over	1 cu.m.	2049 Drs./cu.m.
Dunnage/tank cleaning, etc.			4782 Drs./cu.m.
Sediments			1212 Drs./barrel.

WASTE OIL DISPOSAL: An O.W.S. barge "Alexia L" is available to receive oily/water mixtures. Operators are Hellenic Express M.C., Tel: 4127543. Charges as follows (35% surcharge at weekends):

Passenger and dry cargo vessels	up to	300 tonnes	27324 Drs.
	over	300 tonnes	27.5 Drs./tonne
Tankers	up to	600 tonnes	40986 Drs.
	over	600 tonnes	48 Drs./tonne.

Oil refineries operate their own service.

SEAMAN'S CLUBS: None

CURRENCY: Greek Drachma (Drs.).

SHIPMASTER'S REPORT: August 1985.

Berth of Chalivourgiki S.A.

Vessel: 20,500 d.w.t.

Max. Size: LOA 165 m. max. draft 39 ft.

Products Handled: Steel.

Anchorage: Eleusis Roads.

Pilotage: Pilot boards and disembarks at Piraeus.

Tugs: From Piraeus only.

Cranes: 2×20 tons.

Fresh Water: Available alongside.

SHIPMASTER'S REPORT: October 1987.

Documents:

9 copies Crew List.

2 copies Crew Declaration (to include radios, cameras,cassettes, etc.).

2 copies Manifest (including ship's stores, bond, ship's fixtures, etc.).

1 copy Health Declaration.

2 copies Drugs List.

6 copies Cargo Manifest.

Pilotage: The Pilot for Eleusis boards from a black and white launch off Piraeus Breakwater (Molos Themistokleous). There is deep water close into the breakwater.

The Pilot can be contacted by telex No. 00601-212187, answerback OLPGR.

Pilots should be contacted on VHF Channel 12, 2 hours before arrival off the breakwater and again when 3 miles from the breakwater. When berthing at Eleusis oil piers or quays, the Refinery Pilot boards and departs off the pier.

Normally only daylight transit and berthing and unberthing for tankers proceeding through Ormos Keratsiniou and Stenon Navstathmou Straits which lead to Kolopos Eleusinas Bay.

Under special circumstances and by prior arrangement with the Agent and authorities, transit is possible at night.

At the Western end of Eleusinas Bay, Prosmegaron Channel can be transitted without Pilot by prior arrangement through the Agent. If required, a pilot will board/depart from vessel South of Makronisos Island. At least 6 hours notice of arrival is required by the Agent and Piraeus Pilot Station by telex.

Passage: The channel into Eleusinas Bay from Piraeus is very crowded with repair yards, naval base, laid-up vessels and small craft.

The Pilot advised that the maximum draft allowed through Yeoryios Channel is 39 ft. 6 in. (BA. Chart No. 894 indicates 36 ft.). On the North and South bound transits using echo soundings, we found a depth of 38 ft. 6 in. This should therefore be closely checked beforehand if transitting in a deep draft vessel.

The Pilot advised that the maximum draft allowed through West passage of Prosmegaraon was 26 ft.

Anchorage: The vessel used Piraeus Anchorage Area No.1 (BA. Chart No. 894 and 1520) to the West of the line 232° from AK. Aminiou lighthouse. This is a slightly different anchorage area than that shown on BA. Charts.

The anchorage is often very crowded. No Pilot required.

Anchorage is also possible in Eleusinas Bay under Pilot's direction. This bay can also be very crowded with laid-up vessels.

Tugs: There are very many tugs available in the area. The refinery has special tugs of up to 5,000 h.p. available.

It is compulsory for small vessels to use at least 1 tug when berthing. Tugs secure alongside when berthing and unberthing.

Max. Size: Maximum size of the vessel is restricted by the size that can pass through Keratsiniou Passage.

Tanker Berths: 3 piers and 1 quay are used by the refinery.

The long pier in position 38° 09.95' N.,23° 30.55' E. (See B.A. Chart No. 1513) is used by crude carriers on the East side and by chemical carriers on the West side (Chicksan arms).

LPG is loaded at quay (38° 02.2' N., 23° 30.56' E.) to the East of the long pier. A depth of 38 ft. was found alongside the quay. Other products are also handled. The vessel moored with 2 head/stern lines, 2 breast lines and 1 spring forward and aft. Vessels can berth either side to at the LPG quay, depending on ship's requirements. Maximum length allowed at the LPG quay is 150 m.

Cargo: LPG storage at ambient temperature (very hot in Summer) in 4 spheres, 2 with capacity of 3,000 cu.m. and 2 with capacity of 4,000 cu.m. These spheres are situated close to the quay. A Butane and LPG mix is handled. The liquid Chicksan is 6 in. 300 ASA and the vapour return line which is attached to the liquid arm is 2 in. 300 ASA.

The maximum Butane loading rate is 250 cu.m.p.h. In October 1987 the average rate was 180 cu.m.p.h. at +30°C. The surveyor strongly advised us not to use the vapour return line due to the large difference between ship and shore figures in the past (vapour does not go back to the same tank).

There is no facility to flare cargo return vapours, or vent inert gas.

Butane density 0.582 at 15°C. Apparently maximum oxygen level allowed in ship's tanks is 1%, this was not checked.

The shore tank figures were used for Bill of Lading.

Fresh water supplied through shore hydrant and meter at a cost of U.S. $3.00 per cu.m. The ship's hoses were used and the rate of delivery was high. There is waterman available.

General: It is very difficult to take any stores or supplies over the quay through the terminal due to numerous Customs and Port Regulations. If possible it is best to take stores at Piraeus anchorage or before the Pilot boards. The charge for launch service at Eleusis is £100 per trip and at Piraeus £20 per trip.

For personnel leaving vessel, luggage is in bond until it reaches the airport.

Pilot advised that there is a large tanker sea-buoy discharge terminal at N. Revithousa Island in position 37° 57.8' N., 23° 23' E. (B.A. Chart No. 1513).

Public correspondence is through Hellas Radio but due to the amount of traffic the quality of the service/reception was poor.

AUTHORITY: Eleusis Port Authority.

AGENT: Mylaki Shipping Agency Ltd., 1 Kannelopoulu Str., Eleusis 192 00. Tel: (01) 5561654. Mobile 093-585122. Telex: 211048 MLKI GR. Fax: (01) 5561655. Cables: Mylanav - Eleusis/Greece.

IRAKLION (Heraklion), Crete: 35.20 N. 25.10 E. (See Plan)

DOCUMENTS:
4 Cargo Manifests.
4 Crew Lists.
4 Passenger Lists.
Declaration of Crew's Personal Effects.
List of Stores and Provisions.
Maritime Declaration of Health.
Vaccination Certificates.

PILOTAGE: Pilotage area extends 0.5 to 1 mile N.E. of breakwater. Advance notice of ETA should be passed to Agents order arrange Pilot. Contact may be made with Pilot station on VHF Channel 12 during daylight, also when within distance of 3 – 12 miles, and subject prior agreement of calling time, communication can be effected by radio-telephone via Radio Iraklion – Pilot station telephone 225326. International pilotage signals apply. Pilot boat is wooden boat 12 m. length, hull colour black, with white deckhouse, carrying black board with word "Pilot" in white letters. In bad weather vessels should proceed close to entrance of port for Pilots boarding.

A cement pillar has been installed on the end of the extension of the North breakwater. Fl. G. every 3 seconds, visible 9 miles. The pilot boat is equipped with VHF, range 50 miles.

ANCHORAGES: Anchorage East of port entrance is forbidden owing to numerous underwater cables. In good weather conditions anchorage to be found 0.75 mile Northwards of North breakwater with Enetic Castle bearing 180°. In bad weather conditions, best anchorage is at a distance of about 5 nautical miles to the W. of the North breakwater and at a distance of 3 miles from the coast (Linoperamata Bay); depth of water requires a big scope of anchor chain.

MAX. SIZE: Max. length 250 m., draft 29 ft. – 29 ft. 6 in. Usual rise and fall of tide 1 ft. but increasing with South winds and decreasing with North winds.

HEALTH: International regulations apply for obtaining Free Pratique. In the event of suspected disease vessel will remain under quarantine until cleared. Pratique is automatic if arriving from another Greek port.

RADIO/VHF: Iraklion Radio, call sign SVH, keeps watch on 2182 kHz and replies on 2799 kHz.

Iraklion Central Port Authority (Port Police) maintain 24 hour VHF watch on Channel 12.

TUGS: Two tugs available.
"Captain Gianis", 1,780 h.p., owned by Tsainis Kir (Tel. 081-222312).
"Minotavros", 960 h.p., owned by Minos Shipping Co. (Tel. 081-283180).

BERTHING: Pilot will advise Master of berthing position.

CRANES: 1 × 40 tonnes for containers, 2 × 12.5 tonnes and 4 × 6.5 tonnes.

STEVEDORES: Cargo operations usually conducted by use of ship's own gear. Discharge rates per gang in 8 hours: Bulk cargo 200 tons, bagged cargo 500 tons, timber 200 cu.m. and containers 2,000 tons.

MEDICAL: Advance notice should be passed to Agents if requiring medical attention. Clinics and medical treatment available.

TANKERS: Only very small tankers discharge in Iraklion Port and Linopermata Bay. At Iraklion, tankers discharging liquid fuel are required to berth at East breakwater (fuel pier), Pier No. 6 or North Breakwater. Attendance of fire brigade and 1 tug standing by is compulsory.

DENSITY: 1020.

FRESH WATER: Available ex-berth or ex-barge. Rate of delivery ex-berth about 500 tons per 24 hours.

CONSULS:

Austria	Tel. 223379, 222213, 222339 and 222902.
Belgium	Tel. 283820, 284820 and 285607.

France	Tel. 227510, 225425, 284463 and 242352.
Germany	Tel. 226288, 287235 and 222227.
Italy	Tel. 224797, 821236, 285225 and 288126.
Netherlands	Tel. 283820, 222303 and 224130.
Norway	Tel. 288348, 220536 and 288289.
Sweden	Tel. 226254 and 233504.
U.K.	Tel. 224012 and 284425.

REPAIRS: Minor repairs available by machine shops in town of Iraklion. No facilities for deck repairs.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 2 packets of cigarettes per day per crew member allowed out of bond, and one 500 ml. bottle wine/spirits for whole time of vessel's stay in port. Goods to the value of 7,500 dr. for E.E.C. citizens and 3,000 dr. for other countries.

AIRPORT: Distance 5 km. Now an international airport with numerous flights.

TIME: GMT plus 2 hours, GMT plus 3 hours end March – end September.

HOLIDAYS: Usual Greek holidays plus local holidays of 25th August and 11th November. Cargo work can be arranged on holidays subject additional costs.

POLICE/AMBULANCE/FIRE: Police, tel. 100, 282243, 282430, 282316; Ambulance, tel. 222222; Fire, tel. 225048, 282333.

IDENTIFICATION CARDS: Shore passes issued by Port Authorities.

DEVELOPMENTS: Dredging of some berths to 12.5 m. expected, from present depth of 10.0 m.

A jetty with length 300 m. and depth of 13.0 m. is to be constructed for use by 3rd Generation Container Vessels.

AUTHORITY: Iraklion Central Port Authority, 71110 Iraklion, Greece. *Tel:* 081-244912. *Contact:* Captain Bilias Savas, Harbour Master.

ISTHMIA, Corinth Canal (including Sousakion and Corinth): 37.55 N. 23.00 E. (See Plan)

DOCUMENTS: (For Sousakion only).
Port Authorities
Crew List.
Passenger List.
Ship's Certificates.
Health Certificates.
Certificate of Anchorage Dues.
Customs
Customs papers and declarations.
Cargo Papers.
List of Stores and Provisions.
List of Crew's Personal Effects.

PILOTAGE: There are 10 Pilots for the Corinth Canal. Cables: "Corinth Canal", tel: 0741-37372, telex: 232164 Dico Gr. Master of vessel must give at least 4 hours' notice of ETA in order to avoid delay. For Pilot signals, etc., see Article 7 of the New Company of the Corinth Canal "Regulation of Navigation and Tonnage".

ANCHORAGES: Open anchorage in Isthmia Bay.

RESTRICTIONS: Corinth Canal closed every Tuesday from 0600 hrs. to 1800 hrs. in order for maintenance work to be effected.

MAX. SIZE: The max. draft of ships negotiating the Canal, in relation to their width, is defined as below, assuming normal water level and normal weather conditions.

Width	*Maximum draft*
16.0 to 16.5 m.	6.2 m.
15.5 to 16.0 m.	6.2 m.
15.0 to 15.5 m.	6.6 m.
14.5 to 15.0 m.	6.8 m.
14.0 to 14.5 m.	7.0 m.

The max. draft for vessels of less than 14.0 m. width is 7.0 m. The max. width must not exceed 18.3 m. (60 ft.).

Special instances will be examined by the Master and the Canal Service in collaboration.

HEALTH: (For Sousakion only). Pratique effected by health department of the Port Authority assisted by temporarily engaged doctor. In cases of suspected contagious disease vessel will be held under quarantine and if necessary fumigation will be conducted at Piraeus.

VHF: Corinth Canal Pilots on VHF Channel 11. Harbour Master at Isthmia on Channel 19. Harbour Master at Corinth on Channels 19 and 12.
TUGS: Join vessel near Canal entrance at Isthmia and Possidonia. Ship's lines always used.
BERTHING: In Sousakion at private factory pier. No berths at Isthmia.
MEDICAL: Agent should be advised in advance of number of crew needing medical assistance, also information of any vaccination required.
FRESH WATER: Not available either at Sousakion or in the Canal.
FUEL: No fuel available at Corinth.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes out of bond and 1 bottle wine/spirits.
CARGO GEAR: Loading/discharging by ship's gear.
AIRPORT: 100 km. distance.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
POLICE/FIRE/AMBULANCE: Telephone Harbour Master of Isthmia No. 37555, 37777.
GARBAGE DISPOSAL: No facilities.
WASTE OIL DISPOSAL: No facilities.
SEAMAN'S CLUBS: None.
CURRENCY: Drachma.
DELAYS: Possible delay up to 1.5 hours in transiting Canal if another vessel already transiting canal from opposite direction.
GENERAL: Passage via the Corinth Canal is a *Transit.*

SHIPMASTER'S REPORT: (Corinth) 1977.
Vessel: 5,700 g.r.t., 9,200 d.w.t., Summer draft 24 ft. 07 in., LOA 409 ft. 05 in.
Documents: No special entry papers required and if anchoring to await the berth Customs and Immigration will usually board at anchorage.
Port of Corinth: The port has no VHF communications but messages can be passed through the Corinth Canal Pilot Station on Channel 11. Pilot will then telephone Agents.

Anchoring off the port in the case of delay is possible but cannot be described as safe due to the close proximity of land or shoal water. Holding ground, however, is good. This vessel anchored with Corinth Breakwater light bearing 248° in about 16 fathoms of water using 6 shackles of cable. Vessel rode out a Force 7/8 gale from the North without dragging but with the cable fully stretched the bridge was only 2.3 cables from the breakwater and too close for comfort. A second anchorage was used with the breakwater light bearing 232° and the ship's bridge 5.6 cables from the breakwater in about 18 fathoms of water. Again with the cable fully stretched this gave a clearance off the nearest shoal water of 3 cables, 6 shackles of cable being used. This is a slightly more comfortable position and again gale force winds were experienced without dragging. The vessel did drag in this position but not until winds were gusting to Force 9 as a prelude to very severe storm conditions in which no anchorage of this nature would have been satisfactory. The bottom is stiff grey mud and care must be taken when anchoring not to impede the traffic approaching the canal entrance. Anchoring further to the Westward in order to increase the clearance from shoal water, etc., is not recommended as in addition to the much greater depth of water the holding ground deteriorates, becoming crumbly mud.

A boat can be provided by the Agents for use as a liberty boat when at anchor and there is no objection on the part of the Authorities to using the ship's boats for runs ashore.

A first examination of the chart (B.A. Chart No. 1600) will not indicate anywhere to berth a vessel of this size. However, dredging work has been carried out and the berth is on the S.E. side of the breakwater where there is room for a vessel of this size and for one small coaster in addition. The breakwater itself is slightly different in shape from that shown on the chart and building and dredging work are still in progress at its seaward end. The green flashing buoy shown on the chart is no longer in position but a light of similar characteristics is now shown from a structure on the breakwater end.

Maximum draft for berthing is 6.7 m. (22 ft.) and on this vessel's first call soundings between ship and quay when alongside indicated depths of between 24 ft. and 26 ft., depths outside the ship being some 5 ft. greater.

A Pilot is available, and is of great assistance. He is an experienced shipmaster and has very good local knowledge. A small tug is presently employed shifting barges and cranes employed in harbour works and it is sometimes possible to use his services. This is dependent upon the tugmaster. He is particularly useful when undocking to hold the stern off the quay.

Initial approach to the berth is bow on until the starboard anchor has been let go which should be done at such a distance from the berth so as to allow 4 shackles of cable in the water when the vessel is alongside. Vessel is gradually swung on the anchor, long head and stern ropes are run by boat, and vessel is so brought alongside port side to.

The undocking operation is straightforward, the bow being pulled off the quay by means of the anchor. The only danger is that of the propeller coming into contact with the quay and here the services of the tug are valuable.

Docking and undocking in strong winds from any direction would be hazardous and in many cases impossible. Docking is always done in daylight and I do not recommend undocking at night either although this would be possible under calm conditions. An added disadvantage of undocking in evening time would be that the vessel would arrive at the Narrows ferry crossing in the dark.

The Pilot agrees with this appraisal of the situation.

The quay itself is smooth concrete usually well fendered with rubber tyres and with good mooring posts. Vessel should be well secured as strong winds from a Northerly direction are experienced particularly in Winter.

There is a concrete apron some 3.0 m. wide alongside the ship and clear of this a considerable unsurfaced area on to which cargo is discharged. This area is very wet and dirty during rain.

Fresh water is available but 7 lengths of ship's hose are necessary to reach the outlet. A permanent water main is in the process of being laid alongside the ship.
Cargo operation: This is controlled by the 'Carton Pack' Plant Manager, there being no stevedore as such. Ship's gear is used and normally 3 gangs of stevedores.

The working day is from 0800 hrs. to 1700 hrs., evening overtime being unusual. Seven day working is possible but all overtime is subject to the plant working to receive the cargo.

Stevedores can discharge rapidly from the ship lifting 2 rolls of linerboard at a time but there are frequent stoppages due to congestion on the quay which reduces the overall discharge rate to about 25-27 rolls per gang hour. Although head and end clamps are provided by Charterers (carried on board) stevedores refuse to use these and all discharge is by rope sling. Rolls are landed on wooden platforms (timber supplied by Charterers) and then rolled by hand clear of the concrete apron. Two or possibly 3 fork lifts are used to load rolls from here onto lorries for transportation to the plant a short distance away.

Damage rate is high due to rolls becoming wet and dirty on the unsurfaced quay with bands being broken and outer layers torn. Further damage is caused by the fork lifts when loading the lorries.

No improvement in discharging conditions can be seen unless the quay is surfaced with proper drainage and unless Charterers are prepared to provide clamp machines for handling the rolls on the quay. Care should be taken when signing final outturn report as of course damages are written up to make it appear that they took place before discharge.

Weyerhaeuser are fully conversant with the situation.
Agents: Situated in Piraeus which is some 90 km. away. They use sub-Agents in Corinth.

The sub-Agents are not geared for handling a foreign-going ship. To obtain action on major items it is best to telephone Agent in Piraeus direct.
Bunkers: Basically not available but diesel oil has been taken, having been brought from Piraeus by road tanker and with ten days ordering notice.
Repairs: These cannot be carried out except by bringing repairers from Piraeus at very high cost.

Lloyds' Surveyor is obtainable from Piraeus, this being best arranged directly by the ship.
Provisions: These can be obtained locally and are of acceptable quality. There is no ship chandler as such and the system is for the Catering Officer to visit various suppliers with the Agents, pick his purchases and then leave Agents to collect and deliver to the ship.
Shore Leave: Passes are required and are renewed each visit. They should be available for return to Immigration on departure.
Corinth Canal: This vessel passed through the canal on the 4th November, 1977 on a draft of 3.6 m. forward and 4.74 m. aft.

Application should be made in advance to the Canal Authority quoting the minimum draft obtainable.

The transit presented no difficulties.

SHIPMASTER'S REPORT: (Corinth) December 1984.
Pilotage: One private Pilot.
Restrictions: Berthing daytime only. Unberthing anytime day or night.
Loading/Discharging: Vessel loaded iron pipes, rate 600 tons to 700 tons per gang, per 8 hour shift by ship's gear. Working only during daytime (never night-time).

Vessel discharged iron plate in coils, rate 600 tons per gang, per 8 hour shift by shore crane.
Cargo Handled: Vessel loaded iron pipes, porcelain in powder and fruit in boxes. Vessel discharged iron plate in coils and paper for boxes in rolls.

ITEA: 38.26 N. 22.25 E.

DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
Cargo Manifest.
Bills of Lading.
2 Lists of Ship's Stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: Vessel should advise ETA at least 24 hours before arrival through the telegraphic office of Itea. Pilots are called with the assistance of the Port Authority on VHF Channel 12.

Pilot boards 1 mile S.E. jetty lighthouse. Pilot boat painted black with white deckhouse, the word "Pilot" is painted in white letters on both sides. On the bow is painted "PY36".

In bad weather vessel should enter harbour without Pilot and anchor using both anchors.
ANCHORAGES: Available inside the harbour and in Aggolis Gulf. Safe anchorage in the vicinity of the jetty head in depths of 8 m. – 10 m.
RESTRICTIONS: Vessel may enter harbour day or night. Harbour anchorage suitable for vessels up to 60 ft. draft.

MAX. SIZE: Max. LOA 130 m., Max. draft 6.0 m. Also see "Berthing."
HEALTH: Pratique is given on arrival by the port medical officer.
RADIO: Contact possible through Hellas Coastal Radio.
VHF: Contact with Port Authority and Pilot made on Channel 12.
TUGS: None available.
BERTHING: One pier. East side can accommodate one vessel with max. LOA 83 m. and draft 6.0 m. West side can accommodate one vessel max. LOA 130 m. and draft 6.0 m.
Parnassos: Bauxite loading facility. Max. size 30,000 d.w.t. Loading by conveyor.
Elefsinos: Bauxite loading facility. Max. size 10,000 d.w.t. with tide of 25 cm. – 60 cm. Loading by conveyor.
STEVEDORES: Gangs should be ordered in advance by Agents on basis of Master's ETA. Loading and discharging is effected by ship's gear.
MEDICAL: 24 hours' notice preferred if any medical requirements. Vaccination can be arranged within 24 hours. Hospital in Amfissa, 13 km. from the port.
TANKERS: There are no special installations for loading/discharging tankers.
FIRE PRECAUTIONS: There are no specific precautions.
GANGWAY/DECK WATCHMEN: Required, Master to appoint crew member.
CARGO GEAR: Loading/unloading by ship's gear.
AIRPORT: Nearest airport at Athens, distance approximately 210 km.
DENSITY: 1025.
FRESH WATER: Available. Cost is 770 Dr./cu.m.
FUEL: Not available.
CONSULS: No local representation.
REPAIRS: No facilities for repairs.
HATCHES: Hatches are opened and closed by ship's crew.
CUSTOMS ALLOWANCES: As per Customs Regulations.
REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours. End March to end September GMT plus 3 hours.
HOLIDAYS: Cargo work can be effected on all holidays on payment of overtime.
Official Holidays: January 1st; January 6th; Holy Monday; First Monday of Lent; Good Friday; Easter Sunday; Monday after Easter; 25th March; 1st May; Ascension Day; 6th August; (Local Holy Day); 15th August; 28th October; 6th December; 25th December; 26th December.
POLICE/AMBULANCE/FIRE: Police: Tel. 32222; Ambulance: Tel. 28400; Fire: Tel. 28199.
TELEPHONES: Not available.
BANKS: National Bank, Ionian and Popular Bank, Morgate Bank and Agricultural Bank. Hours: 0800 – 1400 Monday to Thursday, and 0800 – 1330 on Friday.
IDENTIFICATION CARDS: Needed for crew men going ashore.
REGULATIONS: There are general and specific regulations for the Port of Itea.
DELAYS: Delays in loading can seldom be expected.
DEVELOPMENTS: Extension and widening of the existing breakwater and the construction of a second breakwater.
AUTHORITY: Port Authority of Itea, Itea Harbour, Itea, Greece. *Tel:* 0265-32319, 32100. *Telex:* 299638. *FAX:* 0265-32100.

KALAMAKI: 37.52 N. 23.01 E. (See Plan)

SHIPMASTER'S REPORT:

DOCUMENTS: See "Piraeus".
PILOTAGE: Arranged by Agent.
MAX. SIZE: Max. draft 38 ft. (Additional 1 ft. of draft by arrangement).
TUGS: Berthed without tug. Agent can arrange small tug from Corinth Canal.
BERTHING: Berth for discharging soya beans at Kalamaki Soya Mills (Refinery).

Bulk Handling facility: Fixed steel tower with 2 suction pipes capable of a total of 250 tonnes/p.h. but generally slower. Vessel to shift from hatch to hatch. Outreach of arms about 16 m.

The berth is not marked on the chart – B.A. 1600 and U.S. D.M.A. 54289. It is situated on the North shore of the Sarnikos Kolpos near the Eastern entrance to the Corinth Canal (Dhiorix Korinthou). When alongside, the Canal Breakwater Lt. Ho. was bearing 253°×0.64 miles and Akra Sofia 195°×1.14 miles. Starboard side to.

Mooring bollards are adequate, there being 4 suitable for backsprings on the short face (about 64 m.) of the 'T' jetty and 1 on shore for the headlines. At the Eastern side of the berth there is a new berth set in from the line of the jetty consisting of 4 concrete dolphins each with a bollard and 3 of our sternlines were made fast to these. Between this new berth, which is for discharging logs, and the leg of the 'T' jetty there is a facility for loading the products of the Soya Oil refinery into coasters. Tyre fenders on the 'T' jetty are few.

On approaching the berth from Eastwards it is recognisable by the dark grey ribbed metal silos and the lattice steel tower of the discharging unit.

FRESH WATER: Obtainable by truck 15 tonne capacity or by barge from Piraeus. Pipe for loading water from trucks will have to be extended by ship's hoses particularly if working cargo in forward hatches. Cost per truck about 3,000.00 Drachmas. Agent says price for barge supply is comparable to truck if a large quantity is required.
STEVEDORES: *Working Hours:* Continuous – Workers supplied by plant.
AGENT: *Sub-Agents:* G. Karagiorgis of Corinth. Cables: "Kaskoutas Corinth".

SHIPMASTER'S REPORT: April 1988.

The Kalamaki Private Pier is 2 miles E.N.E. of Corinth Canal. This dock belongs to the Murikis Wood Factory which is 500 m. from the Dock. The Berth is used for small vessels of 2,000 d.w.t. loading plywood from the Murikis factory. Loading is by ship's gear or mobile cranes. Every sling of wood is from 800 kg. – 1,100 kg. Cargo is loaded by factory personnel. Small vessels lie alongside the pier where the depth is 16 ft. – 18 ft. Overall length 120 m.

Large vessels lie alongside blocks with depth of 30 ft. – 32 ft. Overall length 160 m. Discharging of logs is by ship's gear into the sea on the offside.

Repatriation is possible via Athens which is 80 km. away.

Berthing only possible during daylight hours. On arrival, contact the Isthmia Harbour Master or Corinth Canal on VHF Channel 16.

KALAMATA: 37.02 N. 22.07 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived vessel" and (subject to Charter-Party Terms) laytime commences to count is 0.5 mile from the breakwater red light, where Pilot boards.
DOCUMENTS:
3 Crew Lists, plus 3 additional for passenger vessels.
3 Crew personal effects lists, plus 3 additional for passenger vessels.
3 Deck, Engine and Steward department Store Lists.
1 Cargo Manifest.
All ship's official documents.
2 Crew Vaccination Lists, plus 2 additional for passenger vessels.
1 Health declaration.

The above are not necessary for incoming vessels from Greek ports.
PILOTAGE: Notice of ETA required 48 hours before arrival. There is VHF listening and transmitting on Channel 12 on continuous basis. Range 30 miles.

Pilot boards 0.5 miles S.E. of the breakwater red light, weather permitting.
ANCHORAGES: Vessels awaiting Pilot may anchor 0.75 miles East of the breakwater red light.
MAX. SIZE: Vessels up to 250 m. LOA, 50 m. beam and 30 ft. draft may enter harbour, for berthing alongside.
HEALTH: Port Health doctor boards vessel on arrival or alongside the berth. Master required to produce Fumigation Certificate, vaccination list and Declaration of Health. Health visit not necessary for vessels coming from a Greek port or West European ports.
RADIO: Athens Radio, call sign SVA, on R/T which covers the Kalamata region also R/T stations of Patra Kerkyra and Hiraklion.
TUGS: No tugs available.
BERTHING: Agents require details of vessel's draft in advance to get berthing permission from Harbour Authorities. Total length of piers – 1,200 m. Covered storage: 2,000 sq.m. Open storage: 22,000 sq.m.
SPECIALISED CARGO-HANDLING FACILITIES: There is a silo for grain. 2 electric pumps for liquids; 2 mobile cranes, lifting capacity 40 tons and 200 tons; 3 forklifts.
STEVEDORES: Number of gangs required to be advised Agent in good time.
MEDICAL: Doctors and medical assistance available. Also private and public hospitals.
FRESH WATER: Available in any quantity at berths. No barges.
FUEL: Can only be supplied by road tankers and by bunker tankers from Piraeus.
CONSULS: France, Finland and Sweden.
REPAIRS: Minor repairs can be effected in shore machine shops. No dry docks.
DENSITY: 1025.
WATCHMEN: If required can be arranged from shore.
HATCHES: Can be opened and closed either by crew or by stevedores subject to regulation payments for this work.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
REPATRIATION: Can be arranged by car, train or air.
AIRPORT: Situated 6 miles away. Flights to Athens 1/2 times a day.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer (end March – end September).
HOLIDAYS: Additional local holidays are Ascension Day and St. Dionysio's Day.
POLICE/FIRE/AMBULANCE: Police tel. 22218 and 24720; Fire tel. 199; Ambulance tel. 25555/27420; Tourist Police tel. 23187. District Code Number 0721.
GARBAGE DISPOSAL: Drums are available and are collected by the city services without any extra charge. No special collection service is available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Greek Drachma (DRC).
SHORE LEAVE: Allowed. Shore passes issued by Harbour Authorities.
DEVELOPMENTS: In the near future a Free Zone will exist.

Additional open storage to be available.
AUTHORITY: Port Authority of Kalamata, Port Office, Custom House Square, 24101 Kalamata, Greece. *Tel:* 0721/22-218. *Telex:* 2252211 Lcal Gr. *Cables:* "Kalamata Port Authority". *FAX::* 0791-96220. *Contact:* Commander N. Papanikolopoulos, Harbour Master.

KALI LIMENES, Crete: 34.56 N. 24.49 E. (See Plan)

DOCUMENTS: Vessels may arrive for bunkering without obtaining free pratique. However, if pratique is effected, vessels should have ship's papers ready for inspection, also 4 Crew Lists, 4 Passenger Lists, Cargo Manifest and a List of Stores and Provisions.
PILOTAGE: 1 private Pilot employed by the bunkering company SEKA who undertakes pilotage for vessels calling for bunkers. Pilot boat is a small boat equipped with signal lamp. Pilot boards about 1 to 2 miles S.S.E. of Aghios Pavlos (St. Paul) Islet. Vessels awaiting Pilot may anchor 1.5 miles East of Aghios Pavlos Islet.
ANCHORAGES: (See "Pilotage") Vessels may anchor in area between Aghios Pavlos Islet and Mavronissi, which is a safe anchorage.
MAX. SIZE: Vessels in ballast of up to 280,000 d.w.t. and max. draft 12.80 m. can enter port.
HEALTH: Vessels arriving from foreign ports wishing to obtain free pratique should cable Agents to arrange for boarding of Health Inspector. Free pratique automatic if arriving from another Greek port.
TUGS: There is 1 tug, but it is seldom used.
MEDICAL: Agent should be advised well in advance if medical assistance required. There are no hospitals or other local facilities and doctor has to be called from nearest town. Hospitals at Iraklion, 75 km. distant.
TANKERS: 3 berths North of Aghios Pavlos Islet (position Lat. 34° 55' 45" N., Long. 24° 48' 30" E.), max. draft 12.80 m.
FRESH WATER: Unlimited supplies available at 48 hours' notice.
FUEL: Unlimited supplies, all grades of fuel (1,000 cu.m.p.h.), diesel (200 cu.m.p.h.) and luboils available subject adequate advance notice. Supplied by Seka S.A. Telegraphic address: Seka Kalilimenes. Telex: 0262180 Vila GR.
Piraeus Address: Seka S.A., 53–55 Akti Miaouli, 18536 Piraeus, Greece. Tel: 4293160. Telex: 212172, 241717. Fax: 4293345. Contact: Costas Zacharopoulos, Managing Director.
FIRE PRECAUTIONS: Portable foam fire extinguishers.
CONSULS: None.
REPAIRS: None.
CUSTOMS ALLOWANCES: 200 cigarettes permitted to each crew member to be held out of bond, and 1 bottle of wine/spirits.
AIRPORT: At Iraklion, 75 km. distant.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
SHORE LEAVE: Permitted if Free Pratique requested and granted.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Greek Drachma.

SHIPMASTER'S REPORT: 1976. (Updated 1984).
Pilotage: Pilot boards about 1 mile South of Aghios Pavlos.
Anchorage: Half a mile E.S.E. of Mavronissi, depth of water 30 ft.
Max. Size: According to Pilot; 300,000 d.w.t. in ballast and max. draft 42 ft.
Pumping Rate: Fuel 1,000 t.p.h., diesel – 200 t.p.h.
ETA: Send ETA 48 hours in advance through Radio Athens. The bunker station can be reached direct on VHF Channels 16 – 14.

KATAKOLON: 37.39 N. 21.20 E. (See Plan)

DOCUMENTS:
Maritime Health Declaration.
Usual Ship's Certificates.
3 Crew Lists.
3 Passenger Lists.
2 Lists of Stores and Provisions.
2 Lists of Crew's Personal Effects.
PILOTAGE: Not compulsory. Port has 1 private Pilot whom vessel may use provided sufficient advance notice passed through Agent.
ANCHORAGES: Vessels can anchor at a distance of 2 cables from the head of the breakwater (bearing 300°). Safe anchorage for vessels of up to 30 ft. draft between positions Lat. 37° 40' N., Long. 21° 19' E. and Lat. 37° 40' N., Long. 21° 20' E.
MAX. SIZE: Max. safe draft 24 ft.
BERTHING: One pier. Length 204 m. Depth alongside 26 ft. Berthing possible on both sides of the pier.
STEVEDORES: No advance notice required. No shore facilities. Vessels load/discharge with own gear.
MEDICAL: No medical assistance in Katakolon, but facilities exist at the town of Pyrgos 13 km. distant.
FRESH WATER: Available. Capacity 20 cu.m./hr.
FUEL: Not available ex-berth, but can be delivered by tank truck from Patras or Kalamata.
CONSULS: None.
REPAIRS: Not available in Katakolon. Small quantities of engine spares available in Pyrgos.
HATCHES: Usually opened and closed by crew but this work can be carried out by stevedores subject consent of Port Authority. Cost as agreed between Master and stevedores.
AIRPORT: Andravis Airport 26 km. distant. Flights to Athens twice weekly.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Usual Greek holidays plus local holidays of 6th December and 17th December.
POLICE/AMBULANCE/FIRE: Police and Immigration, Tel: 41202; Fire Brigade (Pyrgos), Tel: 22633; Ambulance (Pyrgos), Tel: 22344.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Passes issued by Port Authority.
AUTHORITY: Port Authority of Katakolon.

KAVALLA: 40.55 N. 24.25 E.

DOCUMENTS:
5 Crew Lists.
2 Lists of Foreign Currency.
4 Passenger Lists.
2 Cargo Manifests.
2 Lists of Crew Personal Effects.
Copies of Bills of Lading and usual Ship's Certificates.
PILOTAGE: Compulsory. 24 hours' notice of ETA to be passed to Agents or direct to Port Authorities. Vessels requiring Pilot should contact Harbour Master/Pilot on VHF Channel 12 (24 hour service). Pilot usually boards about 0.5 mile from breakwater light from new 14 m. length pilot boat. If strong South or S.W. winds prevailing, vessels recommended take refuge Eleftheron Bay. Vessels awaiting a Pilot may anchor 0.5 mile South of Kavalla Lighthouse and stand-by on VHF Channel 12.
ANCHORAGES: 0.5 to 2 miles South of Kavalla Lighthouse, depth 30 m. to 40 m. Bottom sand and mud.
RESTRICTIONS: Berthing during daytime. Unberthing possible anytime.
MAX. SIZE: Max. length 200 m. with proportionate breadth. Max. draft 27 ft. 06 in. Tidal range 2 ft.
HEALTH: Doctor boards vessel with Port Officer. Maritime Declaration of Health and Derat Certificate required. In case suspected disease or fever on board, Master should radio Port Authorities in advance. Pratique is automatic if arriving from another Greek port.
RADIO: No local radio station. Cables may be routed through Athinai Radio.
VHF: Harbour Master's office equipped with VHF Channel 12 and 16 (24 hour service).
MEDICAL: Advance notice of medical requirements necessary. General hospital in Kavalla and numerous private clinics.
TANKERS: See "Prinos".
DENSITY: 1025.
FRESH WATER: Available at berth.
FUEL: Small quantities available by truck.
CONSULS:

France	Tel: 3163	Netherlands	Tel: 3265
Finland	Tel: 3467	Sweden	Tel: 3669

REPAIRS: Minor repairs available.
HATCHES: Opened and closed by crew.
CARGO GEAR: Vessel should have cargo gear ready on arrival in order to avoid delay.
AIRPORT: Distance 30 km. One or two flights daily to Athens.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Standard Greek holidays. Local holiday: 29th June.
POLICE/FIRE: Police, Tel: 3291; Fire, Tel: 1999.
AUTHORITY: Kavalla Port Authority, Kavalla, Greece. *Tel:* 051-223716. *Telex:* 045 2140 LIKA. *Contact:* P. Zachariou, Harbour Master.

KYMASSI: 38.49 N. 23.32 E. (See Plan)

LOCATION: Lat. 38° 48.6' N., Long. 23° 31.5' E.
The port is on the Northern part of Nissos Evvoia. Vessels load magnesite in bulk, and firebricks on pallets.
DOCUMENTS: Crew List and usual documents for Greece.
APPROACHES: See "Shipmaster's Report".
PILOTAGE: Pilot boards about 5 cables off the berth.
RESTRICTIONS: No berthing during night-time.
RADIO: ETA and other relevant information sent by radio to the Sub-Charterer's Agents, Financial Mining Industrial and Shipping Corp., in Athens. Cable Address: "Epichiris, Athens".
VHF: Approaching Kymassi VHF contact only with Harbour Master's Office on Channel 12 during working hours (and Channels 14 – 16).
TUGS: There are no tugs in the area, except pilot boat.
BERTHING: Safe draft alongside is 26 ft. 6 in., salt water. Ship berths alongside 2 dolphins which are very well fendered with numerous rubber tyres. On approach the port anchor is let go and as the ship snubs round to port an off-shore mooring line is run by the pilot boat aft to the off-shore mooring buoy, to which the ship's line is made fast. The next line is run to inshore mooring buoy the same way. Then vessel is made fast to strong bollards.
LOADING: Carried out via a sophisticated conveyor system, the main tower of which is on curved track, thus allowing flexibility in loading either forward or aft for all the length of the vessel without any shifting, this is necessary only when loading palletised cargo. Also see "Shipmaster's Report".
EMERGENCY CO-ORDINATION CENTRE: Nearest at Chalkis 60 km.
BANKS: National Bank of Greece in Mandoudi. Foreign banks in Chalkis.
STORING: See "Prelims".
1. Yes.
2. Yes, vessel can store from barges during loading.
3. Trucks can proceed alongside.
4. Yes.
5. Declaration to Customs.
6. No.

SURVEYORS: Cargo inspectors and surveyors come from Piraeus.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: March 1979.

The port is on the Island of Nissos Evvoia. Vessel loaded a cargo of bulk magnesite ore (deadburned).

Documents: Crew List. Usual documents for Greece. However, as the ship had already cleared into Greece at Corinth, the Bond had to remain sealed from that port to Kymassi. Leaving Corinth a photo-stat copy of all papers handed in at that port was placed on board duly stamped by Customs for production at Kymassi. Register and usual certificates were taken by Agent to authorities and returned with Pilot plus clearance before sailing.

Pilotage: Pilot boards about 5 cables off the berth. He gave advance advice about the time the other ship was to sail and when he expected to board.

Approaches: Although no large scale British Admiralty Chart of the area or port on board, the approach was made without any difficulty. The 100 fathom line runs approximately 1 to 1.5 miles off the land. The ore loading berth is on the South side of the Bay with fairly steep to land on the Northern side. As ship has to swing to lie head out to sea, it is better according to the Pilot to approach keeping towards the North side of the Bay. Anchoring is not advised unless very good weather due to depth of water and poor holding ground. The Pilot, via VHF, advised us to lie off as the berth was occupied when we arrived. The ship berthed was due to sail around 1200 hrs., we arrived at 0900 hrs.

Radio: ETA and other relevant information was sent by radio to the Sub-Charterer's Agents, Financial Mining & Industrial Corp., in Athens. Cable address 'Epichiris – Athens'. There were no problems clearing messages.

Approaching Kymassi there was no response on VHF until the ship was within 4 miles of the port, when the Pilot answered on Channel 16 and we worked on Channel 12.

Berthing: Ship heads towards the loading jetty, a high concrete structure of "Y" shape with the ship berthing against the two arms. Both these are well fendered with numerous rubber tyres. On approach the port anchor is let go and as the ship snubs round to port an off-shore mooring line is run by the boat aft to the off-shore mooring buoy. This buoy has a slip toggle arrangement to which the ship's line is made fast. The next line run is the inshore after line which is taken to a mooring buoy inside the line of the berth. A head rope was then run to the pier and to a strong bollard.

The anchor cable was slacked and ship hove alongside by the head and stern ropes, the offshore stern rope being slacked as required. Back-spring was led to a bollard on the jetty as was the spring from aft. A further headrope was run to the bollard on the pier and aft a second rope to the inshore buoy plus a bight to a bollard on the pier.

Loading: Carried out via a sophisticated conveyor system, the main tower of which is on a curved track, thus allowing flexibility in loading either forward of aft in a hatch. It is necessary to shift ship to load each hatch.

Two grades of magnesite were loaded. One grade in No. 2 hatch, (first loaded), then the other grade between No. 1 and No. 3 hatches. When No. 2 was completed it was necessary to warp the ship astern to load No. 1 and later warp ahead to load No. 3 hatch.

Loading commenced at 1540 hrs. on the 17th and was completed at 0650 hrs. on the 18th. Allowing for shift ship plus change of gangs ashore it averaged out at a loading rate of 556 tonnes per hour.

The loader has an adjustable spout which ensures that the cargo can be readily trimmed to ensure a good flat stow on completion of space without any need for trimmers. The loader is operated with regard to the spout and slewing from a control box situated on the draw-bridge section of the loader. A very dusty cargo.

General: Whilst the vessel was alongside a small ship berthed using a Mediterranean moor, two anchors down and stern moored to a buoy. This berth is further inside the Bay. The vessel loaded her cargo from lighters.

Agents: The Agent from the Financial, Mining and Industrial Corp. was most helpful and attentive to his duties. He appears to work long hours as he also supervises the loading and works continuously. He also attends to advising when it is necessary to shift ship.

AUTHORITY: Harbour Master of Kymassi, Mandoudi, Evia Island, Greece. *Tel:* 0227-22020. Also VHF Channels 12, 14 and 16. *Contact:* George Sakalis, Harbour Master.

LAVRION: 37.42 N. 24.04 E. (See Plan)

DOCUMENTS:

Maritime Declaration of Health with Crew's Vaccination Cards.

Cargo Manifests.

4 Crew Lists.

PILOTAGE: Pilotage is compulsory in the port of Lavrion, except for Greek ships not exceeding 500 g.r.t. Address of Pilot Station, Port Authority of Lavrion. Pilot boat is a motor launch 13.2 m. long, black hull, white superstructure, flying code flag "H".

It is necessary for all vessels to give 24 hours notice of ETA, by telex or telegraph. This is to be followed by a second notice, in case of change of ETA.

Pilot boards about 0.5 miles from white flashing light of Ak. Ergastiria. In the event of bad weather, boarding position should be arranged after communication with Pilot on VHF Channel 12.

ANCHORAGES: See "Pilotage".

MAX. SIZE: Max. length 130 m. (approx.), max. draft 21 ft.

HEALTH: Health Officer and Port Officer board vessel on arrival. Maritime Declaration of Health should be submitted to Health Officer who examines any sick crew. Free Pratique is not automatic.

VHF: Port Authority keeps watch on Channel 12 throughout 24 hours.

BERTHING: Harbour open to S.E. winds, but otherwise sheltered and safe. There are two quays: one 330 ft. length, depth alongside 20 ft., and one of 260 ft. length, depth alongside 13 ft.

Mining company owns bridge elevator with capacity of 700 tons per day.

CRANES: No shore cranes in the port, but 3 truck cranes are available in the area.

STEVEDORES: Advance notice required in order to arrange gangs.

MEDICAL: Medical assistance available.

FRESH WATER: Available to vessels alongside. Ships at anchor can be supplied by water barge.

FUEL: Available by tanker trucks from Piraeus or by fuel barges from Piraeus.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a bottle of spirits per crew member out of bond.

REPAIRS: Minor repairs only.

SURVEYORS: Available from Athens or Piraeus.

REPATRIATION: Facilities exist for repatriation of crew.

AIRPORT: Athens Airport, distance 45 km.

EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Co-ordination Centre of Hellenic Coast Guard on VHF Channel 16, 2182 kHz and 500 kHz.

SERVICES: All services are available from Piraeus.

BANKS: National Bank. Tel: 0292-25372. Fax: 210910.

Commercial Bank. Tel: 0292-25593. Fax: 210466.

STORING/SHIP SUPPLY SERVICE: Available from Piraeus.

SHORE LEAVE: Crew members are allowed ashore with dock pass, issued by Port Authority.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

POLICE/AMBULANCE/FIRE: Police, Tel: 22100; Ambulance, Tel: 22222; Fire, Tel: 22199.

HOLIDAYS: Local holiday: 26th July.

GARBAGE DISPOSAL: Drums provided alongside.

DEVELOPMENTS: Construction of South breakwater (260 m.) under way.

AUTHORITY: Port Authority of Lavrion, T.K. 19500 Lavrion, Greece. *Tel:* (0292) 25249-22188. *Telex:* 217669 Lila. *Contact:* Harbour Master.

AGENT: Mylaki Shipping Agency Ltd., Iroon Polytechniou Sq., Lavrion 195 00, Greece. Tel: (0292) 27175, 093-263190 (mobile), (0292) 25355 (after office hours). Telex: 241429 MLKI GR. Fax: (0292) 27164. Cables: Mylanav - Lavrion / Greece.

MEGARA (Agia Trias): 37.58 N. 23.24 E. (See Plan)

DOCUMENTS: See "Aspropyrgos".

PILOTAGE: Compulsory. Pilot boards S.W. of N.Pachi Island.

APPROACHES: From the passage between the East end of Revithousa Island and Cape Karas, the pier is approached on a N.W. course.

ANCHORAGE: S.W. of N.Pachi Island in a depth of about 30 fathoms.

RESTRICTIONS: No night time berthing or unberthing.

MAX. SIZE: With suitable fendering, the berth can accommodate vessels up to 75,000 d.w.t., and max. draft 40 ft. (12.19 m.).

HEALTH: Free Pratique according to international regulations.

RADIO: Athens Radio (SVA).

VHF: Pilots and traffic on Channels 6, 12, 14 and 16. Refinery working on Channels 14 and 8.

TUGS: Compulsory.

TANKERS: The pier projects 205 m. from the shore with berthing head 63 m. long (Agia Trias Berth). Depth 12.8 m. (42 ft.).

The pier is equipped with fenders. On reaching the pier, vessel drops port anchor and moors alongside starboard side to, assisted by tugs. Head and stern lines are sent to mooring buoys. The pier is equipped with 3×8 in. flexible hoses, which have to be lifted with vessel's derrick.

There are no facilities for discharging ballast.

MEDICAL: Facilities available at Megara Town (7 km.) and Eleusis.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: See "Piraeus" and "Eleusis".

GANGWAY: Always use vessel's gangway rigged starboard side at the middle of the vessel.

AIRPORT: Athens International Airport (60 km.).

TIME: GMT plus 2 hours. Summertime (March to September) GMT plus 3 hours.

GENERAL: *Weather:* During Winter, prevailing winds are North and some times they are Force 7 – 8. During Summertime, prevailing winds are variable, and at other times wind is from the West.

Tide: Tidal range is about 0.3 m. (1 ft.).

GANGWAY: Ship's gangway to be rigged on starboard side.

GARBAGE DISPOSAL: Not available from refinery.

WASTE OIL DISPOSAL: Available direct from refinery installation. Shore tank capacity 8,000 cu.m.

SEAMAN'S CLUBS: No club but usual local facilities.

CURRENCY: Greek Drachma (GDR).

AUTHORITY: *Operator:* Hellenic Aspropyrgos Refinery S.A. See "Aspropyrgos".

MILAKI (Aliveri Bay): 38.22 N. 24.04 E **(See Plan)**

SHIP'S OFFICER'S REPORT: December 1985.

LOCATION: Aliveri Bay is about 2 km. N.N.E. of Karavos in position Lat. 38° 22' 30" N., Long. 24° 04' 10" E. Milaki is the name of the berthing facility.

PILOTAGE: Pilot boards 1 nautical mile S.W. of the berth. Pilot boat painted white. Call "Katerina" on VHF Channel 14 to make contact, also works on Channel 12.

ANCHORAGE: Vessels may anchor in Aliveri Bay.

MAX. SIZE: Vessels up to 120,000 d.w.t. and 240 m. LOA handled.

VHF: See "Pilotage".

TUGS: One tug "Achileus", 1,200 h.p. Additional tugs available from Khalkis (Chalkis).

BERTHING: Berthing instructions obtainable from "Katerina" on VHF Channels 14 or 12.

One pier, length 300 m. and width approximately 50 m.

Depths alongside: North side: 18 m. at seaward end and 14.9 m. at inner end.

South side: 23 m. at seaward end and 13 m. at inner end.

The North side is for unloading coal and slag and the South side for loading coal and cement.

Cargo discharged by grab (gantry) and loaded by pipe.

MEDICAL: There is a small hospital in Aliveri.

FRESH WATER: Available by truck.

REPAIRS: Facilities available at Khalkis.

AIRPORT: Athens International Airport.

GENERAL: *Publications and Charts:* B.A. Mediterranean Pilot Volume 4 and B.A. Chart No. 1597.

Note: The pier and light on N.W. corner (OQ(R)) of pier not marked on Chart No. 1597, edition 1983, with corrections done for 1983 and 1985.

SHIPMASTER'S REPORT: April 1987.

LOCATION: In Aliveri Bay, on the Western shore of the Island of Evia (Euboia).

DOCUMENTS:
2 copies Crew Effects Declaration.
2 copies Ship's Stores, including Narcotics.
2 copies Stores not Sealed in Bond (Master's Responsibility).
4 copies Crew List.
1 copy Maritime Declaration of Health.
2 copies Vaccination List.

PILOTAGE: Sea Pilot can be arranged by prior notice to Agents. Boarding position is off Dipsa Rock.

Harbour Pilot boards at the anchorage or close to the jetty.

ANCHORAGE: In position Lat. 38° 22' N., Long. 24° 02' E., about 1 mile West of the Jetty head in over 28 fathoms of water.

HEALTH: Radio Pratique not available.

Maritime Declaration of Health required. Pratique is granted after berthing.

VHF: Terminal Heracles II and agent maintain watch on Channel 14.

TUGS: 3 tugs available from Chalkis.

BERTHING: *Coal Discharging Berth – Heracles II:* Berth is located on the Northern side of a Jetty extending about 300 m. out in a 280° direction from the coast. The Jetty head is in position Lat. 38° 22.5' N., Long. 24° 03.1' E., about 5 cables South of Southern Breakwater light of Karavos Port.

The terminal is controlled by the cement factory, which is situated just across the road from the Jetty. The reported depths of water in this berth (See "Plan") were prepared by Gold Divers Underwater Services Co. of Piraeus in April 1986.

One travelling bridge crane serves the ships. The discharging rate is between 500 t.p.h. and 600 t.p.h. Permissible airdraft is 19.00 m. maximum. Recommended arrival draft is 15.20 m. forward and 17.70 m. aft.

With the above recommended draft the vessel can tie up starboard side alongside using about 200 m. length of the jetty with the remaining length of the vessel overhanging. All the after mooring ropes lead forward to the knuckle. Vessel can however, be warped ahead after lightening from forward holds.

MEDICAL: Facilities available at Aliveri.

DENSITY: 1028 – 1029.

REPATRIATION: Possible, but with difficulty.

AIRPORT: Nearest airport at Athens, 3 hours by road.

GENERAL: *Customs:* For issue of bonded stores contact Karavos.

For clearance of stores and spares contact Chalkis.

Immigration: At Chalkis.

Supplies: Provisions and stores are ordered from Piraeus/Athens.

AUTHORITY: Port Authority of Karavos. *Tel:* 0223-22318.

AGENT: Mylaki Shipping Agency Ltd., 18 A.Nika Str., Aliveri 345 00, Greece. Tel: (0223) 23692, 093-264402 (Mobile, (0221) 85373 (after office hours). Telex: 272253 Mlki Gr. Fax: (0223) 23789. Cables: Tsalaship - Aliveri/Greece.

MILOS ISLAND (Adamas, Voudia Bay): **(See Plan)**

LOCATION: Adamas Harbour: Lat. 36° 42.5' N., Long. 24° 26.5' E.

Voudia Bay: Lat. 36° 44.6' N., Long. 24° 32.8' E. (on the N.E. side of Milos Island).

A vessel is considered to be an "arrived ship", when at and/or anchored close to the above positions.

DOCUMENTS:
4 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
4 Personal Effects Declarations.
2 Cargo Manifests.
Ship's Gear Book.
Vaccination Certificates.
Derat Certificate.
Certificate of Registry.
Load Line Certificate.
Safety Equipment Certificate.
Radio-telegraphy Certificate.
Certificate of Measurement.

PILOTAGE: No Pilot Station. Vessels requiring a Pilot should make contact with Adamas Harbour Control by VHF Channel 12. Vessels calling at Voudia Bay can make contact on Channel 8 VHF during office hours (0700 – 1500 hrs.local time) for general information and Pilot arrangements. Pilot arrangements are generally done through Agent's who may contact Pilot in advance by telephone. Pilot boards from a small motor-boat.

ANCHORAGES: Safe anchorage in all parts of Milos Bay, where Adamas port is situated. Main anchorage in Milos Bay is on E.S.E. side of Bombarda Cape, which has a lighthouse showing a Fl. R. 4.5 secs. light.

The Voudia Bay Anchorage is located 6 cables S.E. of Voudia Light within a circle of 3 cables radius. Ship's calling to Voudia Bay should use this anchorage.

MAX. SIZE: Any size vessel may enter Adamas Port, but berthing alongside the Ore Loading Berth at Kanaba or the private Ore Loading Berth of Mycobar Ore Mining Co. is restricted for vessels of more than 26 ft. draft.

Ore loading berth at Voudia Bay (Privately owned by Messrs. Silver and Baryte Ore Mining Co.) is able to facilitate berthing of vessels of up to 185 m. long (610 ft.) and max. draft 33 ft. Restriction exists for this berth, also for the height of vessel's freeboard. (The highest point of the vessel's side along the deck including rails or any other fixed constructions, must not exceed the 10.9 m. (36 ft.) from the sea level).

Loading-discharging dock at Voudia Bay with installations for mechanical loading of cargo in bags. This dock has a length of approximately 75 m. and the max. draft of the vessel alongside cannot exceed more than 6 m. (20 ft.).

No facilities for tankers.

HEALTH: Authorities require 24 hours' notice of arrival in order to grant Free Pratique to vessels arriving from a non-infectious country. Free Pratique cannot be granted at Milos to vessels having disease on board nor to those arriving from an infected area. Such vessels are required to proceed to a main Greek port (Piraeus, Syros, etc.) to obtain health clearance.

RADIO: Athens Radio and Heraklion Radio.

TUGS: Not available.

STEVEDORES: Loading/discharging at Adamas Port (Kanaba) is by means of ship's gear, reaching a loading rate of 1,000 – 1,300 tonnes per working day. At the private berths of Mycobar Ore Co. in Adamas and Silver and Baryte Ore Co. at Voudia Bay the bulk ore is loaded by means of a conveyor belt at a rate of 500 tonnes p.h. maximum.

MEDICAL: One small public hospital. There are 3 doctors and 2 dentists resident on the Island. There is an airport on the Island with daily services to Athens. Also in case of illness, the possibility of an emergency service.

FRESH WATER: Available to vessels alongside using ship's hoses. Delivery alongside up to 30 cu.m. in 12 hours.

FUEL: Small quantities of lubricants available.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: Customs Office at Adamas Harbour. Tel: 0287-22.282.

(a) Vessel arriving from European Common Market Ports: 300 cigarettes, or 150 small cigars, or 75 big cigars, or 400 gm. tobacco. 1.5 litres of spirits of 22° vol. or more, or 4 litres of wines of less than 22° vol. Perfumes 75 gm.

(b) Vessel arriving from any other port: 200 cigarettes, or 100 small cigars, or 50 big cigars, or 250 gm. of tobacco. 1 litre of spirit of 22° vol. or more, or 2 litres of wines of less than 22° vol.

REPAIRS: Minor oxy-acetylene repairs possible.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Saturdays, Sundays and excluded holidays. Cargo work can be arranged on these days at 75% increase on tariff rates.

TELEPHONES: Police: 0287-21.204. Port Authority: 0287-22.100. Agent of Silver and Baryte Ores Co.: 0287-41.277. Pilot: 0287-22.265 or 22.086.

SHORE LEAVE: Permitted.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

DELAYS: Strong Southerly winds may delay berthing, or force vessel to leave loading berth at Voudia Bay.

DEVELOPMENTS: Intentions to construct a conveyor belt for ore cargo loading on the Kanaba Dock (Adamas).

SHIPMASTER'S REPORT No. 1: *Voudia Bay:* Fresh water is available using vessel's own hoses. Limited quantity of provisions are available. Hire of polypropylene ropes of 150 m. length is possible.

It is advisable to close ventilators before loading due to excessive dust.

Pilot remains on board during loading.
Cargo: Perlite.
Loading rate for bulk: 250 t.p.h.
Loading rate for bags: 18–20 t.p.h.

SHIPMASTER'S REPORT No. 2: *Voudia Bay and Milos Island:* Situated on the N.E. corner of the island of Milos. When approaching from the S.E. the most prominent features are the scarred terrain, the factory building and the silo which is situated just above the berth. The loading gantry has both fixed red and white lights on it and is conspicuous.

Anchorage: The vessel anchored in a position with the loader bearing 302° T. distance 7.5 cables in 48.5 m. of water using 5 shackles of cable, the holding appeared to be good. The recommended anchorage is in a position with the loader bearing 328° distance 5 cables where holding is reported to be good. There was another vessel in that position at the time.

Caution: This anchorage is not recommended in strong South to S.E. winds due to the seas that build up in the Bay. Vessels are recommended to go to the North of Pilonisi Island and anchor in a position N.W. of the North West point, a distance of not less than 3 cables. This island is now joined to the main island by rubble from the factory, this is not shown on the Chart (1832).

Method of Berthing: (See "Plans"). Approach to the berth is made heading in a N.W.'ly direction, keeping the Northernmost buoy (A) close to the starboard side and when the bow is passed about a third of the ship's length, the starboard anchor is let go and let run until about 4 shackles on deck, then it is checked, in the meantime a boat will take a breast rope from for'd, run from the port shoulder lead (1). Once this is ashore and the vessel begins to cant to starboard, the bow is worked into position by heaving on the breast rope and slacking the cable until there is about 6 shackles on the latter. Meanwhile, a line is run from the starboard quarter (2) to buoy (B). A word of caution here, the berth is designed to take vessels up to 23,000 tons, so for a small vessel it will be necessary to have 2 ropes joined together for moorings (2), (4) and (5). The next line sent away is one from the Port Quarter to ashore as a breast rope (3), the stern is then brought into position in a similar manner to the bow. As the prevailing wind is from ahead usually, the next rope sent away is the head line (4) and finally the stern line (5). The latter two are used for shifting the vessel under the loader. Directly under the loading gantry, there is a dolphin arrangement to keep the vessel off the cliff, but on completion of mooring, the vessel should end up about 6 ft. to 10 ft. off this.

Caution: In strong South to S.E. winds, the berth becomes dangerous and vessels have to leave and go to anchor and it is often necessary to leave the ropes on the buoys etc. as it is not possible to let them go. It is also advisable to retain some ballast on board for berthing.

There are 2 Pilots, both speaking English, the younger, an ex-Chief Officer has the better command of English and was the source of a lot of this information.

On leaving the berth, the last rope to be let go is (2) and with a smaller vessel, this can safely let go while weighing anchor. Vessel will then proceed to another anchorage close to, to secure, obtain clearance and clean up.

Loading Procedure: Loading is done by a chute and at an approximate rate of 300 tonnes per hour. The cargo is very dusty and everything should be securely battened down and it is strongly advisable to wear goggles and protective masks on deck as the dust is choking and if it gets in the eyes, they should not be rubbed as it is abrasive and can cause permanent damage. Eyes should be washed out. The ship will advise what weight she can take, and as the weighing procedure ashore is liable to break down after the first 500 tonnes, vessel is loaded according to draft, which has to be carefully checked, as when stipulating amounts required per hatch, they will not necessarily keep to this unless told. A boat is available for checking the draft, 1 blast on the whistle will summon it. Only method of getting ashore is by boat, so it is necessary to have the starboard gangway down. Both foreman and boatman have a fair knowledge of English, but foreman does not come aboard but stays on the loader, so it is necessary to shout instructions, etc. The foreman will advise on shifting for position required, this is done with the aid of frequent blasts on a pocket whistle. Only one man comes aboard and that is to tend the chute.

There appears to be a continual short swell which makes draft reading a little difficult.

Entry and Clearance: Agent, Doctor, Customs and Harbour Master boarded the vessel at anchor and entered her there. Forms on board were not acceptable, but they transferred them to their own. I understand that the only acceptable forms are the standard IMO forms, and if there are any of these on board they should be used.

Forms required:
2 Crew Declarations.
3 Crew Lists.
2 Bonded Stores List.
2 Stores Lists.
1 Vaccination list (Including Cholera).

There are various other forms to sign, but these are prepared by the Agent. The Health Declaration is made out by the doctor in his book. The Agent, who is from the Mining Company, spoke very good English.

Weather: Northerly winds predominate during the Summer and can become quite strong during September, mainly from midnight to noon.

AUTHORITY: Port Authority of Milos, Adamas Harbour, Milos Island, Greece. *Tel:* 0287-22100.

Silver & Baryte Ores Mining Co. S.A., 21a Amerikis Street, Athens 10672, Greece. *Tel:* 3690330 or 3690111. *Telex:* 215189 elio gr.

Local: Silver & Baryte Ores Mining Co., Voudia Bay, Cyclades, Milos 84800, Greece.

MITILENE (incl. Geras Bay and Pamfyllon): 39.06 N. 26.35 E. **(See Plan)**

PORT LIMITS: A vessel is considered to be an "arrived ship" and laytime will commence at the working hours that follow the delivery of the Master's Notice of Readiness.

DOCUMENTS:

Quarantine:
Maritime Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.

Customs:
2 Crew's Effects Declarations.
2 Ship's Stores Declarations.
2 Bonded Goods Declarations.
2 Crew Lists.

Immigration:
1 Crew List.

Port Authority:
1 Crew List.
1 Passenger List.
Ship's Certificates or Memorandum.
Ship's Papers.

PILOTAGE: It is not compulsory, but, if required, the services of experienced Mercantile Marine officers, having knowledge of the port, can be obtained.

ANCHORAGES: Off the Outer Port, in depths of about 18 m.; extreme end East of Kastro Peninsula (or Fokiotrypa) light, bearing due North.

RESTRICTIONS: Entry is not allowed after sunset.

MAX. SIZE: Length 120 m. – draft 17 ft. at Inner Port; length 160 m. – draft 28 ft at Outer Port.

HEALTH: The Authorities must receive a 24 hour advance notice for the ETA of the vessel with information about the port of origin, the cargo, the number of crew and passengers and the port of destination; details of any suspected disease or fever on board must be included in that notice. Pratique is automatic only for vessels entering after calling at another Greek port.

RADIO: "Athinai (Athens) Radio", "Limnos Radio", "Chios Radio". Call signs SVA, SVL, SVX respectively.

VHF: Port Authority's VHF radiocommunication; Channel 12 for calling.

BERTHING: See "Plan". For drafts see "Max. Size".

STEVEDORES: At least 8 hours' advance notice for the number of stevedores required.

MEDICAL: In case of illness on board the Master should cable details prior to arrival. Hospital and dental facilities are available. Vaccination cards required.

TANKERS: At Geras Bay (Mamidakis) and Pamfila (Purfina).

FRESH WATER: Available from the quay through pipes. Cost per ton about 600 Drs.

FUEL: Supplied by tanker trucks only; advance notice required.

FIRE PRECAUTIONS: No more than the usual ones.

CONSULS:

Belgium	Tel. 28494
France	Tel. 28151
Netherlands	Tel. 28760
Sweden	Tel. 28494

REPAIRS: Local machine shops undertake very minor repairs.

SURVEYORS: Lloyd's Register and Hellenic Register of Shipping.

HATCHES: Opening and closing is normally carried out by crew.

CUSTOMS ALLOWANCES: For each member of the crew: tobacco, 50 grams; cigarettes, 40 pieces; small cigars, 20 pieces. Wines, 2 litres. Spirits, 0.75 litre.

CARGO GEAR: Load/discharge effected by ship's own gear.

REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation.

AIRPORT: Distance 8 km. It is regularly served by "Olympic". Flights to Athens and Thessaloniki.

TIME: GMT plus 2 hours. GMT plus 3 hours during Summertime from April to September.

HOLIDAYS: January 1st, New Year's Day; January 6th, Epiphany; Ash Monday; March 25th, National Holiday; Good Friday; Easter Monday; May 1st, Labour Day; Whit Monday; August 15th, Assumption; October 28th, National Holiday; December 25th, Christmas Day; December 26th, Boxing Day.

Cargo work can be arranged on these days after consultation with the union of stevedores.

POLICE/AMBULANCE/FIRE: Police, Tel. 100 and 22021; Hospital, Tel. 28412 and 22005; Fire Brigade, Tel. 199 and 22055.

EMERGENCY CO-ORDINATION CENTRE: Hellenic Coast Guard Emergency Co-ordination Centre (S.A.R. Chamber) in Piraeus. Telephones: 4112500 and 4173238. Telex: (021) 2022, 2273 and 2239 Yen Gr.

BANKS:
Bank of Greece, Prokymaia Telex: 297110 Bngr Gr.
National Bank of Greece, Prokymaia. Telex: 297106 Nbg Gr.
General Hellenic Bank, Prokymaia.
Commercial Bank of Greece, Prokymaia. Telex: 297103 Cbmy Gr.

Agricultural Bank of Greece, Vournazon 2. Telex: 297108 Ate Gr.
Credit Bank, P. Kountouriotou 33. Telex: 297151 Ccb Gr.

STORING: Vessel can be stored by truck only. Trucks can proceed alongside at the berth.

SHIP SUPPLY SERVICE: Ant. Picoulos Shipping Agency, Prokymaia, Mitilene. Office Tel: 23720, 27000, 24933. Home Tel: 22341. Telex: 297120.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Shore passes are issued.

DELAYS: Normally there are no delays.

AUTHORITY: Hellenic Coast Guard, Island of Lesbos Port Authority, Mitilene Port Authority, Prokymaia, Mitilene 81100, Greece. *Tel:* 28827, 28888, 24115. *Telex:* 297142 LXM GR. *Cables:* Limenarchio, Mytilene. *FAX:* 0251-28888. *Contact:* Commander Apostolakis Christos, Harbour Master.

MYKONOS: 37.26 N. 25.25 E.

Vessels in excess of 22,000 d.w.t. have been accommodated. Loading of Barytes ore at rates up to 5,000 tons per day. In Winter when North winds prevail conditions are satisfactory for loading: however, loading position considered unsafe when S.W. or West winds prevailing. When sufficient cargo is available vessels can load in 2 days.

PACHI: 37.58 N. 23.23 E. (See Plan)

DOCUMENTS: All usual certificates including Registry, Safety, Cargo Gear, Radio, Derat, Last Port of Clearance and:

9 copies Crew Lists.
2 copies Vaccination Certificates.
1 copy Cargo Manifest.
1 copy List of Spares.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
4 copies Crew Effects Declaration.
1 copy Passenger List.
1 copy Cargo Documents.
2 Special Customs Forms in triplicate.
2 copies Stores Lists.

PILOTAGE: Compulsory. Pilot boards S.W. of N.Pachi Island.
ANCHORAGES: S.W. of N.Pachi Island in depth of 30 fathoms.
RESTRICTIONS: The berths operate throughout 24 hours.
MAX. SIZE: Pachi Oil Terminal is able to accept vessels for discharging crude oil from 20,000 d.w.t. to 600,000 d.w.t., max. draft 29 m. The depth at the head of the pier is 31 m.
HEALTH: Pratique is in accordance with International Regulations. Pratique not required if arriving from another Greek port.
RADIO: Athens Radio (SVA).
VHF: Piraeus Pilots and Eleusis Coastguard operate a 24 hour service on Channels 16, 6, 12 and 14. Hellenic Refinery operates on Channels 14 and 8.
RADAR: None.
TUGS: Usually join vessel near anchorage. Ship's lines always used.
MEDICAL: Medical facilities available at Megara and Eleusis.
TANKERS: Location of berth: Lat. 37° 58' 25" N., Long. 23° 22' 50" E.

Pilot will advise Master of berthing place in accordance with Port Authority instructions. Always berthing with starboard side alongside with 3 head lines, 4 breasts, 2 springs, 3 stern lines, 4 breasts and 2 springs.

There is one berth with 4 unloading arms 16 in. diameter each. The maximum and minimum height of the manifolds to the ship is 35.5 m and 2 m. respectively above sea level.

The maximum accepted pressure is 11 bars (150 p.s.i.) and the maximum accepted flow rate through each unloading arm is 4,000 cu.m./hr.

Echo Distance Device: Available at the berth is a distance and speed device. Prior to berthing, but before approaching, obtain indications from terminal that device is in good order.

Ballast: No facilities for discharging ballast.
DENSITY: 1025.
FRESH WATER: Not available at present.
FUEL: Not available.
FIRE PRECAUTIONS: Fire wires rigged fore and aft on outboard side of vessel. Deck scuppers plugged. Spark arresters to be fitted on tank openings. Earth connections made. Safety Tug standing by during discharging, according to Port Authority instructions.

In the case of a storm, the Dock Master can stop discharge of vessels.
CONSULS: None locally. Consuls at Athens and Piraeus.
REPAIRS: While alongside, maintenance of any kind on board is strictly prohibited. In case of an emergency, the issuing of a special written "cold or hot work" permit is necessary from the Port Authorities.
DRY DOCKS: See "Eleusis".
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle of wine/spirit allowed per crew member.
REPATRIATION: All facilities available for crew changes and repatriation.
AIRPORT: Athens International Airport at Hellinicon (60 km.).
TIME: GMT plus 2 hours. Summertime (March to September) GMT plus 3 hours.
HOLIDAYS: None affecting cargo operations.
POLICE/AMBULANCE/FIRE: All emergency services are available through the Terminal Office. Eleusis Coastguard (01) 5547711, 5546671.
TELEPHONES: This service is available aboard ship by prior arrangement through the Agents. Standard rates apply.
SERVICES: Compass adjusting. Electronic equipment services.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by Port Authority.
GARBAGE DISPOSAL: Not available from refinery. Barges not allowed alongside vessel at the terminal.
SEAMAN'S CLUBS: No club but usual local facilities.
CURRENCY: Greek Drachma (GDR). U.S.$ 1.00 = 241.0 GDR (20.2.96).
AUTHORITY: *Operators:* Hellenic Aspropyrgos Refinery, S.A., 54 Leoforos Amalias Street, Athens 10558, Greece. *Tel:* 5578200, 5533229. *Telex:* 215489, 215443, 215442. *FAX:* 5570990. *Contact:* Manolis Lembidakis.

PATRAS (including Rio): 38.14 N. 21.45 E. (See Plan)

DOCUMENTS: Port Authorities: 2 Crew Lists, Customs: Declaration of Cargo and Passengers.
PILOTAGE: Compulsory. Advance notice of ETA to be passed to Agents who arrange Pilot. Vessels without Agents should advise authority of ETA through Athens Radio, or on arrival outside harbour make International Code sounds and signals for vessels requiring a Pilot. Pilot boat is small boat carrying pilot flag. Pilot usually boards less than 1 mile outside harbour entrance. VHF contact possible with Port Authority and Pilot on Channel 12.
ANCHORAGES: Patras Roads are usually safe; when very strong W./N.W. winds blow, vessels may anchor at Nafpaktos Roads.
RESTRICTIONS: Port entrance has depth of 34 ft. At main harbour vessels having draft in excess of 28 ft. cannot berth. The limit at the new berth is 34 ft. draft. There are 2 red buoys at the entrance to the port.
MAX. SIZE: Vessels of less than 34 ft. draft. No restrictions on length or breadth. Height of tide, max. 0.55 m., does not affect size of vessel.
HEALTH: Pratique in accordance with International Regulations.
RADIO: Athens Radio.
TUGS: Two tugs, 900 h.p. and 1,200 h.p. Use of tug compulsory for all vessels over 1,000 tons gross. Joins vessel at entrance to harbour. Ship's lines used.

Tugs also available on request to Nicolas E. Vernicos. Tel: Piraeus 4527812-4522337 (24 hours).
BERTHING: In accordance with allocation given by Port Authority. See "Plan" for lengths and depths.
STEVEDORES: Advance notice of ETA required in order to arrange berth and order number of gangs to commence work immediately. General cargo rate about 80 – 100 t.p.h./gang, bulk cargoes 75 – 90 tons. 7 mobile cranes, capacity up to 25 tons available. One mobile crane capacity 118 tonnes with container handling facilities.
TANKERS: No facilities at Patras, but Texaco-Restis Berth at Rio for vessels up to 18 ft. and 2,500 tons alongside. No residue discharge facilities.
FRESH WATER: Supply line connected to all berths. Rate 30 t.p.h.
FUEL: Deliveries by tank trucks at Patras. Available at Texaco-Restis Berth at Rio.
FIRE PRECAUTIONS: Vessels refuelling or discharging explosives or flammable materials must apply to Port Fire Brigade to stand by.
CONSULS:

Belgium	France	Netherlands
Denmark	Germany	Sweden
Finland	Italy	Switzerland

REPAIRS: Very minor repairs only.
WATCHMEN: Advisable to employ night-watchmen on large vessels.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed out of bond for each Crew member.
REPATRIATION: All facilities for crew changes and repatriation.
AIRPORT: None.
TIME: Summertime GMT plus 3 hours end March to end September, otherwise GMT plus 2 hours.
HOLIDAYS: In addition to general Greek holidays and Sundays, local holidays are 8th September, 30th November. Work can be arranged on these days subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Port Police, tel. 341–002; Patras Police Station, tel. 100; Ambulance, tel. 166; Fire Brigade, tel. 199. The port has a fireboat.
TELEPHONES: Facilities for connecting on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Crew are supplied with passes by Port Authority.
GARBAGE DISPOSAL: Service available. Garbage must be packed in bags. Contact Tel: 61-336700.
WASTE OIL DISPOSAL: Service available by tanker truck. Contact Tel: 1-4130027.
SEAMAN'S CLUBS: No club. Facilities for games and sea sports are available locally, as are Greek Orthodox and Catholic churches.
CURRENCY: Greek Drachma (DRC).
DEVELOPMENTS: *(a)* Outer breakwater has been extended by 90 m. at South end.

(b) New quay with length of 220 m. to the North of the main installation to be constructed.
AUTHORITY: Port Authority of Patras, Building of Port Authorities, Patras, Greece. *Tel:* 061-322024. *Telex:* 312120 LTPA GR. *FAX:* 061-331997, 061-344860. *Contact:* P. Bousbouras, Technical Manager.

PIRAEUS: 37.57 N. 23.38 E. (See Plan)

(Including AGHIOS GEORGIOS 37.57 N. 23.36 E.; DRAPETSONA 37.56 N. 23.37 E.; and PERAMA 37.58 N. 23.35 E.)

DOCUMENTS: All usual certificates including Registry, Measurement, Inspection, Load Line, Fumigation, Passenger Safety, Cargo Gear and Radio.

9 Crew Lists.
2 Vaccination Certificates.
Cargo Manifest.
List of Provisions and Stores.
List of Spares.
Maritime Declaration of Health.
1 List of Vaccination Dates.
1 Crew Effects Declaration.

Customs:
2 Special Forms in Triplicate.
1 Stores List.
Master's Declaration of typewriters and adding machines, etc.
Crew Passports, or Seamen's Books.
Passenger Passports.

PILOTAGE: Cable Agent well in advance advising ETA. Agent informs pilot office of vessel's arrival time.

Pilots can be contacted on VHF Channel 16 for calling, Channels 7 and 12 for communication. Pilot boat is a wooden vessel about 10 m. length with black-painted hull, word "Pilot" painted in white.

Vessels requiring Pilot should signal letter "G" by morse light or by ship's whistle. Pilot boards vessel about 1.5 miles off entrance to harbour, except when very strong South winds prevailing, in which case vessel advised by VHF or by signal light that conditions impossible for Pilot boarding, and whether vessel permitted enter harbour at Master's risk.

If awaiting Pilot, anchorage is possible inside pilotage area of Piraeus – Aghios Kosmas – Piraeus Anchorage – Perama Anchorage – Megara Anchorage (Pachi).

ANCHORAGES: As above. Depths between 8.0 m. and 16.0 m.

RESTRICTIONS: No restrictions for Aghios Georgios Harbour or Drapetsona excepting draft. Harbours open throughout 24 hours for entry and departure subject prevailing weather conditions. No tidal restrictions.

MAX. SIZE: Aghios Georgios: Max. draft 32 ft. Drapetsona: Max. draft 38 ft. Piraeus: Max. draft 36 ft. (Also see "Tankers")

RADIO: Athinai Radio – SVA.

TUGS: Use of tugs compulsory for vessels over 1,000 g.r.t. Usually join vessel outside harbour, always using ship's lines. Over 30 tugs available. 10 of less than 1,000 h.p. and remainder over 1,000 h.p.

Nicolas E. Vernicos Shipping Co. Ltd., operate 10 tugs, 500 – 4,000 h.p. Available for towage and salvage. Tel: 4527812, 4522337 (24 hours). Telex: 212450 Vern Gr. VHF Channel 6.

BERTHING: Agent must advise Piraeus Harbour Authorities in order to secure berth allocation. 20,000 m. of quay space. 9 Ro/Ro ramps available.

CRANES: 6 container cranes, lifting capacity 41 tons.

56 electric wharf cranes with capacities of 2 to 27 tons installed along the wharf of the main port and at the dry and floating docks.
51 mobile cranes with capacities of 3 to 20 tons.
40 Straddle-carriers for containers, capacity 30 tons each.
4 floating cranes with capacities of 15, 30 and 2×100 tons.
34 tractors.
20 forklifts.
280 reefer plugs.

BULK HANDLING FACILITIES: Silo suction-duct installations capable of moving grain at up to 130 t.p.h. and storage facility for 40,800 tons, as well as 2 mobile suction-duct units for bulk grain-cargoes.

One gantry crane lifting capacity 10 tons, used for coal and bulk cargoes installed at Hercules Port. Pier length 200 m., max. LOA 160 m., max. beam 17 m., max. draft 10 m. Average daily rate for coal 1,000 – 1,200 tonnes.

STEVEDORES: Agent must submit letter of application to Piraeus Port Authorities for number of gangs required also time required to commence cargo work. Discharge usually effected with ship's own gear.

Normal work on loading/discharge of goods in the port is carried out by 2 regular shifts, the morning shift (0800 – 1400 hrs.) and the afternoon shift (1500 – 2100 hrs.). Likewise, upon application of the interested parties (ship-owners, Agents, consignees, shippers, etc.), and provided approval of the competent P.P.A. Service is obtained, a third, night shift can be assigned to the job if the necessary workers and operators are available. This shift is again of 7 hour duration, from 2100 – 0330 hrs. or can be extended to the morning hours if necessary. Exceptionally in the case of work on refrigerator vessels, on which work during the Summer period is limited to the afternoon hours, the Service can assign workers and operators of loading/discharge machinery, starting from 1630 hrs., for a 7 hour period which can be extended, if conditions warrant, to the morning of the next day. Loading/discharge work may also be undertaken on Sundays and other non-working days (holidays) such work being considered as totally extra, being burdened with extra charges accordingly.

MEDICAL: All medical and hospital facilities available. No advance notice required except in special cases.

TANKERS: Discharging effected at private installations.

Shell	Max. draft 32 ft.	Petrolles	Max. draft 29 ft.
B.P.	Max. draft 36 ft.	Fina	Max. draft 28 ft.
Elvyn	Max. draft 26 ft.	Mobil	Max. draft 48 ft.

D.E.H. Max. draft 36 ft. (outside steam generator factory, no facilities for going alongside).

DENSITY: 1025.

FRESH WATER: Available alongside berths. For vessels at anchor, water can be delivered by barges (capacity 150 – 240 tons) belonging to Piraeus Harbour Authority at 50% additional cost.

FUEL: Gas oil, fuel oil and mixtures of both to a certain viscosity available. Advance notice of requirements should be sent to Agent order complete customer's requirements.

MYKONOS: 37.26 N. 25.25 E.

Vessels in excess of 22,000 d.w.t. have been accommodated. Loading of Barytes ore at rates up to 5,000 tons per day. In Winter when North winds prevail conditions are satisfactory for loading: however, loading position considered unsafe when S.W. or West winds prevailing. When sufficient cargo is available vessels can load in 2 days.

PACHI: 37.58 N. 23.23 E. (See Plan)

DOCUMENTS: All usual certificates including Registry, Safety, Cargo Gear, Radio, Derat, Last Port of Clearance and:

9 copies Crew Lists.
2 copies Vaccination Certificates.
1 copy Cargo Manifest.
1 copy List of Spares.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
4 copies Crew Effects Declaration.
1 copy Passenger List.
1 copy Cargo Documents.
2 Special Customs Forms in triplicate.
2 copies Stores Lists.

PILOTAGE: Compulsory. Pilot boards S.W. of N.Pachi Island.
ANCHORAGES: S.W. of N.Pachi Island in depth of 30 fathoms.
RESTRICTIONS: The berths operate throughout 24 hours.
MAX. SIZE: Pachi Oil Terminal is able to accept vessels for discharging crude oil from 20,000 d.w.t. to 600,000 d.w.t., max. draft 29 m. The depth at the head of the pier is 31 m.
HEALTH: Pratique is in accordance with International Regulations. Pratique not required if arriving from another Greek port.
RADIO: Athens Radio (SVA).
VHF: Piraeus Pilots and Eleusis Coastguard operate a 24 hour service on Channels 16, 6, 12 and 14. Hellenic Refinery operates on Channels 14 and 8.
RADAR: None.
TUGS: Usually join vessel near anchorage. Ship's lines always used.
MEDICAL: Medical facilities available at Megara and Eleusis.
TANKERS: Location of berth: Lat. 37° 58' 25" N., Long. 23° 22' 50" E.

Pilot will advise Master of berthing place in accordance with Port Authority instructions. Always berthing with starboard side alongside with 3 head lines, 4 breasts, 2 springs, 3 stern lines, 4 breasts and 2 springs.

There is one berth with 4 unloading arms 16 in. diameter each. The maximum and minimum height of the manifolds to the ship is 35.5 m and 2 m. respectively above sea level.

The maximum accepted pressure is 11 bars (150 p.s.i.) and the maximum accepted flow rate through each unloading arm is 4,000 cu.m./hr.

Echo Distance Device: Available at the berth is a distance and speed device. Prior to berthing, but before approaching, obtain indications from terminal that device is in good order.
Ballast: No facilities for discharging ballast.
DENSITY: 1025.
FRESH WATER: Not available at present.
FUEL: Not available.
FIRE PRECAUTIONS: Fire wires rigged fore and aft on outboard side of vessel. Deck scuppers plugged. Spark arresters to be fitted on tank openings. Earth connections made. Safety Tug standing by during discharging, according to Port Authority instructions.

In the case of a storm, the Dock Master can stop discharge of vessels.
CONSULS: None locally. Consuls at Athens and Piraeus.
REPAIRS: While alongside, maintenance of any kind on board is strictly prohibited. In case of an emergency, the issuing of a special written "cold or hot work" permit is necessary from the Port Authorities.
DRY DOCKS: See "Eleusis".
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle of wine/spirit allowed per crew member.
REPATRIATION: All facilities available for crew changes and repatriation.
AIRPORT: Athens International Airport at Hellinicon (60 km.).
TIME: GMT plus 2 hours. Summertime (March to September) GMT plus 3 hours.
HOLIDAYS: None affecting cargo operations.
POLICE/AMBULANCE/FIRE: All emergency services are available through the Terminal Office. Eleusis Coastguard (01) 5547711, 5546671.
TELEPHONES: This service is available aboard ship by prior arrangement through the Agents. Standard rates apply.
SERVICES: Compass adjusting. Electronic equipment services.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by Port Authority.
GARBAGE DISPOSAL: Not available from refinery. Barges not allowed alongside vessel at the terminal.
SEAMAN'S CLUBS: No club but usual local facilities.
CURRENCY: Greek Drachma (GDR). U.S.$ 1.00 = 241.0 GDR (20.2.96).
AUTHORITY: *Operators:* Hellenic Aspropyrgos Refinery, S.A., 54 Leoforos Amalias Street, Athens 10558, Greece. *Tel:* 5578200, 5533229. *Telex:* 215489, 215443, 215442. *FAX:* 5570990. *Contact:* Manolis Lembidakis.

PATRAS (including Rio): 38.14 N. 21.45 E. (See Plan)

DOCUMENTS: Port Authorities: 2 Crew Lists, Customs: Declaration of Cargo and Passengers.
PILOTAGE: Compulsory. Advance notice of ETA to be passed to Agents who arrange Pilot. Vessels without Agents should advise authority of ETA through Athens Radio, or on arrival outside harbour make International Code sounds and signals for vessels requiring a Pilot. Pilot boat is small boat carrying pilot flag. Pilot usually boards less than 1 mile outside harbour entrance. VHF contact possible with Port Authority and Pilot on Channel 12.
ANCHORAGES: Patras Roads are usually safe; when very strong W./N.W. winds blow, vessels may anchor at Nafpaktos Roads.
RESTRICTIONS: Port entrance has depth of 34 ft. At main harbour vessels having draft in excess of 28 ft. cannot berth. The limit at the new berth is 34 ft. draft. There are 2 red buoys at the entrance to the port.
MAX. SIZE: Vessels of less than 34 ft. draft. No restrictions on length or breadth. Height of tide, max. 0.55 m., does not affect size of vessel.
HEALTH: Pratique in accordance with International Regulations.
RADIO: Athens Radio.
TUGS: Two tugs, 900 h.p. and 1,200 h.p. Use of tug compulsory for all vessels over 1,000 tons gross. Joins vessel at entrance to harbour. Ship's lines used.

Tugs also available on request to Nicolas E. Vernicos. Tel: Piraeus 4527812-4522337 (24 hours).
BERTHING: In accordance with allocation given by Port Authority. See "Plan" for lengths and depths.
STEVEDORES: Advance notice of ETA required in order to arrange berth and order number of gangs to commence work immediately. General cargo rate about 80 – 100 t.p.h./gang, bulk cargoes 75 – 90 tons. 7 mobile cranes, capacity up to 25 tons available. One mobile crane capacity 118 tonnes with container handling facilities.
TANKERS: No facilities at Patras, but Texaco-Restis Berth at Rio for vessels up to 18 ft. and 2,500 tons alongside. No residue discharge facilities.
FRESH WATER: Supply line connected to all berths. Rate 30 t.p.h.
FUEL: Deliveries by tank trucks at Patras. Available at Texaco-Restis Berth at Rio.
FIRE PRECAUTIONS: Vessels refuelling or discharging explosives or flammable materials must apply to Port Fire Brigade to stand by.
CONSULS:

Belgium
Denmark
Finland
France
Germany
Italy
Netherlands
Sweden
Switzerland

REPAIRS: Very minor repairs only.
WATCHMEN: Advisable to employ night-watchmen on large vessels.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed out of bond for each Crew member.
REPATRIATION: All facilities for crew changes and repatriation.
AIRPORT: None.
TIME: Summertime GMT plus 3 hours end March to end September, otherwise GMT plus 2 hours.
HOLIDAYS: In addition to general Greek holidays and Sundays, local holidays are 8th September, 30th November. Work can be arranged on these days subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Port Police, tel. 341–002; Patras Police Station, tel. 100; Ambulance, tel. 166; Fire Brigade, tel. 199. The port has a fireboat.
TELEPHONES: Facilities for connecting on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Crew are supplied with passes by Port Authority.
GARBAGE DISPOSAL: Service available. Garbage must be packed in bags. Contact Tel: 61-336700.
WASTE OIL DISPOSAL: Service available by tanker truck. Contact Tel: 1-4130027.
SEAMAN'S CLUBS: No club. Facilities for games and sea sports are available locally, as are Greek Orthodox and Catholic churches.
CURRENCY: Greek Drachma (DRC).
DEVELOPMENTS: *(a)* Outer breakwater has been extended by 90 m. at South end.

(b) New quay with length of 220 m. to the North of the main installation to be constructed.
AUTHORITY: Port Authority of Patras, Building of Port Authorities, Patras, Greece. *Tel:* 061-322024. *Telex:* 312120 LTPA GR. *FAX:* 061-331997, 061-344860. *Contact:* P. Bousbouras, Technical Manager.

SPECIAL PRECAUTIONS:
Ship's Speed in Port: Incoming or outgoing vessels must keep speed steady, provided weather conditions and vessel's manoeuvrability allow to do so, but never to exceed 5 knots.
Pollution in the Harbour: Throwing overboard of ballast, objects of any kind, oil, food rejects, and dirt in general is strictly prohibited. All such rejects can be jettisoned after ship's exit from the harbour and at a distance not less than 16 miles from the nearest coast. Alternatively, all such rubbish can be thrown in a special rubbish-collecting vessel in the port.
Sea Pollution by Bunker Oil or Sediments: The jettisoning of oil products generally in any port or roadsteads less than 50 miles from the coast is strictly prohibited. Similarly prohibited is the pollution of the sea by jettisoning of oil-sediments during dry-docking or repairs of vessels.
Pollution of the Air: Strictly forbidden is the de-sooting of boilers of all vessels at Greek ports. Similarly prohibited is the exit of gases in the form of smoke, which poisons the atmosphere and endangers public health.
Overloading: If upon arrival or sailing the Port Authorities ascertain overloading of the vessel, heavy fines are imposed.
DEVELOPMENTS: The project "Construction and Equipment of Pier II of the P.P.A. Container Terminal at N. Ikonio" forms part of the total Master Plan for the development of the Port of Piraeus which, in general, provides for:

1. Land planning, administrative and organisational segregation of the 3 port activities, namely commerical, passenger and ship-repairing.
2. Dedication of the Central Port to passenger and coastal traffic.
3. Concentration and augmentation of container service activity to N.Ikonio area.
4. Construction of a road axis, which will connect the port area with the national North – South road axis.
5. Railway link of N. Ikonio Container Terminal with the national railway network at Thriassio Pedio.

The above mentioned Master Plan is already underway, since the projects in No. 1, 2, 3 and 4 have, in their major part, been auctioned, while for the project in No. 5 the relevant studies are elaborated.

Among the numerous investments provided by the P.P.A. Master Plan, special emphasis is given to investment connected, directly or indirectly, with the N. Ikonio Container Terminal.
Completion of the Pier II of the Terminal at N. Ikonio: The project consists of the completion of the design, construction and putting into service of the Container Terminal Ikonion II in Piraeus Port.

The works comprise:

1. The construction of a quay wall in concrete 700 m. long to the West of the Ikonion II and 110 m. long to the South, to give a depth of water of up to 16.5 m. The construction of a further 120 m. of quay wall for Ro-Ro traffic with a depth of water of 14.0 m. to the N.W. of the Terminal.
2. Infilling, surfacing and the provision of essential services over an area of 7 ha. on the Container Terminal and infilling and surfacing of 6 ha. behind the quay for parking.
3. The purchase of:
   4×50 ton post-Panamax gantry cranes.
   40 straddle carriers, capacity 4 tons.
   30 tractors, capacity 1×40 ft. container or 2×20 ft. containers.
   8 forklift trucks, of which 6 capacity 7 tons lift and 2 capacity 25 tons lift.

The project is estimated to be completed by the end of 1998.
AUTHORITY: Port of Piraeus Authority, 10 Akti Miaouli (next to the Exhibition Centre), 185 38 Piraeus, Greece. *Tel:* 4520911-9. *Telex:* 212187 Olp Gr. *FAX:* 4520852. *Contacts:* George Prassianakis, President (Tel: 4520942); Spyros Stalias, General Manager (Tel: 4520944); Kyriakos Perimenis, Stevedoring Operations Manager (Tel: 4520928).

PRINOS: 40.56 N. 24.31 E.

SHIPMASTER'S REPORT: May 1984.

ANCHORAGE/PILOTAGE: Tankers using this terminal are required to anchor approximately 0.5 miles South of the breakwater at Kavalla town if a waiting period is involved but other than that vessels pick up the Pilot and Loading Master in the vicinity of the berth. Vessels which have had to anchor off Kavalla pick up the Pilot and Loading Master from Kavalla and proceed to the berth with them.
TUGS: Two tugs are available to assist with mooring operations.
BERTHING: B.A. chart No. 1086 shows a tanker mooring of superbuoy size which is incorrect. Actual berthing arrangement is an open sea moor using both anchors forward run out to about 9 shackles on each anchor and aft making fast to 3 buoys using 3 lines to each buoy. The buoys are orange in colour exhibiting an orange light flashing every 5 seconds.
LOADING: Product is stabilised crude. API 31.12. Average temperature 72°F. Loading rate approx. 1,700 t.p.h. Manifold connection 1×10 in. hose. There are no dirty ballast facilities. At the end of loading there may be a delay of up to 3 hours whilst waiting for cargo papers.

PYLOS (including Sfaktiria and Navarino Bay): 36.55 N. 21.42 E.

DOCUMENTS:
For Port Authorities
1. For ships under the Greek flag and foreign flag vessels of Greek ownership.
   Inspection of all Ship's Papers.
   7 Crew Lists with full details of crew members' home addresses.
   For passenger vessels – 6 Passenger Lists including passport details, that is, number, date of issue and nationality.
2. Foreign Flag Vessels.
   Inspection of all Ship's Papers.
   3 Crew Lists.

For Customs
Crew Personal Effects List.
1 Crew List.
Passenger List.
Lists of goods or effects to be sent ashore.
3 Lists of Stores and Spares.
Bills of Lading.
Cargo Manifest.

PILOTAGE: Pilot station established on 1st January 1991. Pilotage is compulsory and available around the clock. Master should advise Agent of vessel's ETA 24 hours prior arrival. On arrival vessel should call Pilot on VHF Channel 12.
ANCHORAGES: Safe anchorage may be made in all areas of Navarino Bay except within red sector of Helonaki Islet light.
MAX. SIZE: Any size vessel can enter and anchor in Navarino Bay. The small harbour of Pylos is only suitable for small vessels.
HEALTH: Doctor visits vessels that require Free Pratique, and those coming from infected ports. Master and Health Officer together sign Maritime Declaration of Health. Free Pratique continues when vessel arrives from another Greek port. A vessel in transit must have Free Pratique if remaining in port more than 24 hours. Infected vessels or suspected vessels remain under quarantine in accordance with existing health regulations.
RADIO: Athinai Radio.
TUGS: Tug "Nestor" 600 h.p. available, but only in an emergency.
BERTHING: Pylos Harbour Pier 215 m. length, 20 m. width, and 15 m. depth at head of pier. Depth inside pier to be 10 m.
STEVEDORES: Labour requirements passed by radio at least 24 hours prior arrival. No shore loading/discharging facilities and this work effected by ship's gear. Average rate load/discharge 100 tons per gang every 8 hours.
MEDICAL: Agent should be advised by cable prior arrival of medical and medicant requirements. There are two chemists and a Red Cross hospital. Yellow-fever and cholera vaccination certificates required.
TANKERS: At Pylos small harbour there is a jetty 100 m. length, the head of which is reserved for small tankers carrying wine and spirits, which moor stern to quay. At head of pier, depth of water about 4 m., but within short distance from pier, depth increases to 10 m. Only 1 vessel of 12 ft. to 15 ft., draft can moor stern to quay at any time. Loading/discharging is effected through flexible and portable pipelines belonging to Gialovi Wine Factory at Pylos, and cargo is transported by special tank trucks.
DENSITY: 1023 in harbour basin and whole of Navarino Bay.
FRESH WATER: Master or Agent must apply in writing to Customs Authority, and application is to include notice from water supplier giving quantity to be supplied and cost of supply. Water barge capacity 200 tons. Rate of supply 160 t.p.h. by canvas hoses. Barge belongs to Maritime Agency I. Vrettakos, Pylos. A second water barge with 100 tons capacity is owned by Maritime Agency G. Andreas Zervakis Ltd. Water also available alongside Pylos harbour quay.
FUEL: Bunker suppliers supply vessels with F.O. and D.O. by small tankers, coming from other ports.
FIRE PRECAUTIONS: No unusual fire precautions at Sfaktiria Installations, but at main port of Pylos authorities do not allow loading/discharging of 2 vessels at same time, as the only 2 berths available are very close to each other.
REPAIRS: 3 workshops for minor repairs. Major repair teams available from Piraeus shipyards.
WATCHMEN: Usually not necessary to employ watchmen, but if required, available.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 2 packets of cigarettes per crew member/day allowed out of bond according to duration in port and this quantity to be declared on Stores List. Store orders for supply of additional quantities are allowed on the basis of the number of crew and the length of voyage, basis 2 packets per day per crew member. 1 opened bottle wine/spirits allowed out of bond.
REPATRIATION: Crew changes and repatriation facilities available.
AIRPORT: Kalamata Airport, 40 km. from Pylos. Kalamata/Athens flights every day at 17.50 hrs. Athens/Kalamata every day flights at 19.10 hrs.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: *(a)* Standard Government Holidays; *(b)* Local holidays: 9th May (St. Nicholas) holiday for port workers; 24th September; 20th October (Anniversary of Battle of Navarino). During these holidays, cargo work can be arranged subject overtime payment.
POLICE/AMBULANCE/FIRE: Police (Pylos) 223-16; Greek Red Cross Hospital Pylos 223-15; Kalamata Fire Brigade 28373.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Shore leave allowed if vessel has Free Pratique.
IDENTIFICATION CARDS: Shore passes issued against submission of seamen's books.
GARBAGE DISPOSAL: No special collection service available, however the local agents can arrange for garbage collection.
GENERAL: Very severe fines imposed on oil pollution.

SHIPMASTER'S REPORT: July 1981 (Updated 1992).

Time: GMT plus 2 hours Winter, plus 3 hours Summer as per A.L.R.S. Vol. No. 5.

Chart: Pilos/Navarine Bay – BA 211.

General: Pilos: A fairly busy port for ships taking stores and water and changing personnel.

Navarine Bay is well sheltered and generally deep.

Bay can be entered and left with safety as long as vessels keep well up to Pilos Island (Baba Island) off Cape Kypri, shoals exist on the Southern shore.

Pilot: Advise Agent 24 hours in advance. Pilot boards about 1 mile outside heads in calm weather, otherwise inside, from slow motorboat.

Pilot speaks English.

VHF: Pilos Port Authority and Pilot on Channel 12 when expecting vessels.

Anchorage: In area 8.5 cables N.W. of Pilos Jetty (5 shackles).

Bay: Navarine Bay is good and sheltered. An 8 fathom patch in centre as per BA Chart 211.

Agent says 300,000 d.w.t. tankers drawing up to 15 m. draft have anchored in Bay.

New jetty for small craft at Pilos.

Current: Outside Heads generally South going at rate of 0.5 knots.

Tug: 1 tug (1,000 h.p.) owned by principal Agency, called "Nestor", sometimes not at Pilos but at Karamata.

Services/Supplies: Pilos: Two cranes on jetty (30 tons – 4 tons).

Water: Fresh Water is plentiful at $4.00 per tonne minimum 20 tonnes in Navarine Bay.

Supplies: Generally good, although advance notice required. If frozen provisions required this must be stipulated.

Unitor Gas: Limited range held by Agents. Oxygen/acetylene, R22/12 has to come from Athens area (2 days' notice).

International Paint: From Piraeus full range (2 days' notice).

Lub Oil: Most brands including Chevron from Piraeus in drums (2 days' notice).

Repairs: Very limited at Karamata about one hour away, otherwise full range at Piraeus. Parts for repair can be sent by truck to Piraeus and return the next day if an emergency, but generally allow three days.

Fuel: Very limited supply H.O. and D.O. in Pilos but negotiations under way to expand local facility.

Walport Films: By arrangement with Agency in Skaramanga (2 days' notice).

Airport: At Karamata – local airport one hour away. Olympic Airways daily flight from and to Athens. Arrives at 1800 hrs. and leaves at 1900 hrs. (40 minute flight).

International flights from Athens. To catch internal flight to Karamata you must land in Athens not later than 1600 hours.

Communications: Roads poor, takes 4 hours to get to Athens. Telephone services reasonable.

Boat Service: From anchorage to town in Navarine Bay easily arranged at $5.00 per ship per trip.

Customs/Immigration: Customs available during working hours. Basic issue only allowed but best take out for all crew members. Immigration check all crew books inward and outward. Greek shore passes required with crew members photo attached. Forms: All on Greek Papers.

1 copy Ship's Particulars.
2 copies General Stores Declaration.
2 copies Bond Store Declaration.
1 copy Crew Declaration.
6 copies Crew List (U.S.A. style).

AUTHORITY: Port Authority of Pylos, 24001 Pylos, Greece. *Tel:* 0723-22225. *Telex:* 0252101. *Contact:* Theodoros Kakalis (Lieutenant Commander H.C.G.), Harbour Master.

RHODES (including Akantias): 36.25 N. 28.17 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Cargo Manifest.
1 Stores and Provisions List.
Usual Ship's Documents.

PILOTAGE: 24 hours' notice required by Rhodes Port Authority. Pilot boards 1 mile from port.

ANCHORAGES: Suitable anchorage up to a distance of 300 m. from the port East of the pier extension.

RESTRICTIONS: Port entry can be difficult and sometimes impossible with strong North or N.E. winds.

MAX. SIZE: Up to 24 ft. draft.

RADIO: Rodos Radio, 2182 kHz.

BERTHING: Pilot will advise Master of berthing place in accordance with Port Authority instructions.

2 diesel motor-driven cranes capacity 2 tons and 3 tons available for discharging. No facilities for containers.

STEVEDORES: 24 hours advance notice required in order to arrange gangs.

MEDICAL: General hospital and private clinics available.

FRESH WATER: Available – supplied by canvas hoses.

FUEL: Deliveries only by tank trucks.

CONSULS:

France	Tel. 2318	Sweden	Tel. 3379
Germany	,, 7479	Turkey	,, 3362
Italy	,, 7432		

REPAIRS: Minor repairs only.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 60 cigarettes per day per crew member and 1 bottle wine/spirits per crew member allowed out of bond.

AIRPORT: Distance 15 km. During Winter, flights twice daily to Athens, and during Summer, flights 5 times daily.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: 1st January, 6th January, 7th March, 25th March, Good Friday, Easter Monday, 21st May, 15th August, 28th October, 8th November, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police, tel. 7690 or 2220; Ambulance, tel. 2555; Fire Brigade, tel. 3333.

DELAYS: Sometimes necessary to remain outside harbour up to 3 hours to allow coastal passenger vessels to berth if other berths are full.

DEVELOPMENTS: Extension of the Merchant Port Pier by 110 m. to North and 140 m. to S.E. Also an extension of the new harbour (Akantias) pier, to the East of the Marine Harbour. Length to be 480 m. with a depth of 6.5 m. alongside.

AUTHORITY: Central Port Authority of Rhodes.

STYLIS: 38.55 N. 22.37 E.

DOCUMENTS: The usual Documents for all Greek Ports are required i.e. Cargo Manifest, Crew List, Stores Lists, Personal Effects, Ship's Certificates, Oil Book, Cargo Gear Book, Exchange Declaration.

PILOTAGE: Compulsory. Pilot can be boarded at Stylis anchorage which is half a mile South of the Island of Kaloyiros. Pilot is a practical seaman who has experience and knowledge of local waters.

Vessels entering Stylis port must pass through the channel of 2 flashing green and 2 flashing red sea buoys and be in the line with the main light situated on the pier, flashing orange.

There is a pilot boat painted white flying the international Pilot's letter "H". VHF is installed and the working frequency is Channel 12.

There are 4 white launches available for hire (capacity 10 – 20 passengers). VHF is installed and the working frequency is Channel 10. These are for Pilots and Crew Members of anchored vessels.

ANCHORAGES: See "Pilotage".

The Gulf of Maliakos is a safe anchorage for laid up vessels. Position should be given upon request to the Ministry of Merchant Marine, Piraeus.

MAX. SIZE: Max. draft 18 ft. 6 in.

VHF: Port Authority on Channels 7 and 12.

TUGS: No tugs are available. For large vessels being laid up at Maliakos Kolpos tugs and Pilot must be ordered from Volos.

BERTHING: Stylis port is an open port on the North side of Maliakos Kolpos and consists of berths on the North side and of shallow waters on the South side which break at low tide. The berths total about 450 m. in length, forming the Greek letter π. The draft varies along the 3 berths with a max. of 18 ft. 6 in. at HW and 17 ft. at LW.

CRANES: No crane railway system is installed. Loading and/or discharging operations take place only by ship's gear or by mobile cranes which can be hired through the local Agents from Stylis/Lamia and/or Volos.

STEVEDORES: Working hours: 0800 hrs. – 1700 hrs. daily.

FRESH WATER: Fresh water available 24 hours. Rate 30 cu.m.p.h. Vessels must use their own hoses.

FUEL: No bunkers available. Vessels can be supplied only by barge and/or trucks ordered from Volos/Athens/Salonica.

REPAIRS: Minor repairs can be carried out.

HOLIDAYS: Aghios Athanassios on January 18th, Aghios Nikolaos on December 6th.

STORING: A limited quantity of stores and provisions are available in Stylis. Transit stores are not available.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Greek Drachma (DRC).

GENERAL: No warehouses are available on the docks.

The main exported goods are olives and olive oil in tins/drums, reels of cables, cotton, etc. The imported goods are timber, machinery, paper, etc.

DEVELOPMENTS: A dredger is widening the channel and deepening the Harbour in order to accommodate vessels up to 20 ft. draft.

AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329. *Telex:* 296803 YSI GR. *Contact:* Lieutenant Commander John Kioupis, Harbour Master.

SUDA BAY, Crete: 35.29 N. 24.09 E. (See Plan)

PORT LIMITS: Suda Bay.

DOCUMENTS:

3 copies Crew List.
Cargo Manifest.
Agency Manifest.
Transit Manifest.
Ship's Stores or Instruments Manifest.
Clearance from the last Port of Call.
All the necessary certificates according to International Laws and Conventions.

PILOTAGE: Pilots available, call Suda Port Control on VHF Channel 12.

ANCHORAGES: Safe anchorage area in the Port of Suda according to the Port Authority instructions.

RESTRICTIONS: Permission for departure or arrival after sunset is given by the Suda Navy Base.

Entry and departure only through existing channel in Suda Bay.

MAX. SIZE: Permissible length 200 m. for berthing. No restrictions for anchoring.

HEALTH: Pratique is compulsory for all ships coming from ports outside Greece, except EEC ports.

RADIO: Athens Radio, call sign SVA.

VHF: Suda Port Control on Channel 12.

TUGS: None.

BERTHING: Cargo pier, depth up to 32 ft. Grain silo with similar depth alongside. Also see "Plan".

CRANES: None.

BULK CARGO FACILITIES: Bulk cargo discharging gear available.

SPECIALISED CARGO-HANDLING FACILITIES: Fork lift trucks available.

BRIDGES: None.

STEVEDORES: Available.

MEDICAL: Hospital facilities available.

TANKERS: There are no oil discharging installations or facilities for tankers.

DENSITY: Salt water.

FRESH WATER: Installations for the supply of fresh water available.

FUEL: Available in limited quantities.

FIRE PRECAUTIONS: Fire brigade service at Chania.

CONSULS: Germany and France.

REPAIRS: Limited facilities.

DRY DOCKS: None.

SURVEYORS: Creta Shipcare Co., Marine Surveyors and Consultants (Cargo-Hull-Machinery). Cooperate with most P&I Clubs for Crete Island. Surveyors to Hellenic Register of Shipping and International Naval Surveys Bureau. Authorised to survey and issue ship's Certificates for many flags. Captain Ant. Tzagarakis, Mar. Ch. Eng., Emm. Michelioudakis 68 Dimokratias Street, 73100 Chania, Crete. Tel: 30-821-54580/97677/50770. Fax: 30-821-54580.

WATCHMEN: Services of watchmen are not necessary and are non existent.

HATCHES: Opening/closing is carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits.

CARGO GEAR: Only with ship's gear.

REPATRIATION: Two/three flights Winter/Summer and one passenger ship daily for Athens/Piraeus.

AIRPORT: Airport 15 km. from Suda Bay.

TIME: In Winter GMT plus 2 hours, in Summer GMT plus 3 hours.

HOLIDAYS: January 1st (New Year's Day); January 6th (Epiphany); Shrove Monday (variable); March 25th (Feast of the Annunciation/ Independence Day); May 1st (Labour Day); Orthodox Easter Monday (variable); August 15th (Assumption Day); October 28th (National Day); November 21st (Local Holiday (Chania)); December 6th (St.Nicholas/ Souda local port holiday/Seamen's Holiday); December 25th(Christmas Day); December 26th (Boxing Day).

POLICE/AMBULANCE/FIRE: Police 100 or 89316. Ambulance 166 or 22666. Fire 199 or 92410.

EMERGENCY CO-ORDINATION CENTRE: The Port Authority of Chania.

TELEPHONES: Arrangements do not exist for placing telephones on board.

BANKS: National Bank of Greece, Suda Square. Tel: 0821-89650. Fax: 0821-89650. Telex: 0291-240.

Souda Port Authority. Tel: 0821-89240.

SYROS: 37.26 N. 24.56 E.

DOCUMENTS: *Ships under the Greek flag* – documents required are:

Ship's Register.
Seaworthiness Certificate.
Log Books and Ship's Papers.
Load Line Certificate.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
1 Passenger Lists.

Ships under foreign flag, Greek owned – documents required are:

Ship's Articles.
Load Line Certificate.
Seaworthiness Certificate.
Ship's Papers.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
1 Passenger List.

Ships under foreign flag – documents required are:

Seaworthiness Certificate.
Fumigation Certificate.
Load Line Certificate.
Radio Station Licence.
2 Crew Lists.
1 Passenger List.

PILOTAGE: Pilot to be ordered by ship's Agent at least 24 hours before arrival notifying approximate ETA. Pilot boards from private motor launch, about 0.5 miles off the port, weather permitting. In bad weather Pilot boards in harbour entrance.

ANCHORAGES: Vessels awaiting Pilot anchor outside the harbour South of a line between the green breakwater light and the North end of Gaidaros Island. Anchorage in the Southern part of the harbour in depths of 20 m. – 30 m.

MAX. SIZE: Length 200 m. Vessels of shallow draft may go alongside the Neorion Pier or moor stern to the pier. Deeper-draft vessels remain at anchor in the harbour.

HEALTH: Free Pratique is given when ship's declaration of health has been endorsed by a Health Officer.

RADIO: Loutsa Radio.

TUGS: 2 tugs available (no tugs available in March 1994). Tugs usually join vessel 1 mile from harbour entrance. Payment for use of tug's line is obligatory.

STEVEDORES: At least 1 day's notice required to arrange gangs.

MEDICAL: No advance notice required if medical assistance needed. Hospital and general clinic available.

TANKERS: Discharge alongside terminal of A. E. Seka at Lazareta, near the entrance to the harbour.

DENSITY: 1026.

FRESH WATER: Limited quantity can be supplied by private company. Delivered by barge.

FUEL: Can be supplied by A. E. Seka alongside concrete dolphins inside the harbour.

CONSULS: France – Tel: 3–62. Netherlands – Tel: 7–20.

REPAIRS/DRY DOCKS: Neorion Syros Shipyards (Privatisation underway) can undertake any kind of engine and hull repairs and alterations. Holds LTC licence for piston reconditioning.

	Floating Dock 1	*Floating Dock 2*
Capacity	75,000 d.w.t.	40,000 d.w.t.
Lifting Capacity	25,000 tons	15,000 tons
Length Overall	230 m.	195 m.
Width between sidewalls	35 m.	33.5 m.
Pumping Time	160 minutes	100 minutes
Cranes	2×10 tons	1×15 tons 1×10 tons
Quay Space	1,800 m.	
Floating Cranes	1×70 tons capacity and 1×200 tons capacity	
Travelling Cranes	Up to 40 tons capacity	

Tank cleaning station with storage capacity of 7,000 tons and separator capacity of 3,000 tons of dirty ballast and slops per hour.

4 tugs of which one is an ocean going salvage tug.

Machine shop, plate shop, foundry containing the most modern equipment.

Gritblasting.

Service Agency for Sulzer Bros. Ltd., Lister Ltd., B+W, Caterpillar SA, SKL Ltd., MWM, MAN.

Resident Classification Surveyors: Lloyd's Register of Shipping, American Bureau of Shipping.

Neorion Shipyards Syros Ltd., Syros, Greece. Telex: 0293123 Neorion Syros. Tel: 010-281 22001.

WATCHMEN: Not required.

HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: Each man allowed 40 cigarettes per day for period not exceeding 5 days. Each man allowed 1 opened bottle of spirits. No restrictions for wine.

REPATRIATION: Can be arranged.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Work may be arranged on all holidays on payment of 75% additional to tariff.

POLICE/FIRE/AMBULANCE: Police 6-10; Fire 3-33; Ambulance 5-55.

TELEPHONES: Cannot be connected on board.

SHORE LEAVE: Crew may go ashore after pratique is given, carrying shore leave passes issued by Port Authority.

IDENTIFICATION CARDS: Shore passes are issued on production of Seamen's Books or Passports.

REGULATIONS: Port Captain should be contacted for any queries not covered by lists of regulations provided on arrival.

DEVELOPMENTS: Port being dredged to permit entry of larger vessels. Shipyard installing facilities for building vessels up to 15,000 tons.

SHIPMASTER'S REPORT: February 1983 (Updated 1994).

Vessel called for bunkers only.

Documents: Not required for bunker call.

Pilotage: Recommended, not known whether compulsory or not. Vessel could undock without Pilot, however, Pilot necessary for docking.

Pilot boards 1 mile East of harbour entrance.

Chart: B.A.1833 – Plans in the Kirkladhes.

Restrictions: No restrictions on night berthing at bunker dolphin. No tidal restrictions.

Radio: Limnos and Athens. Cable address "Sekavin Syros" for bunkers.

VHF: Pilot and Bunker Agent operate on Channel 12.

Tugs: One medium size tug used aft for mooring and unmooring. Vessel cannot moor/unmoor without aid of tugs.

Berthing: 'Seka' bunker dolphin 214°T×3 cables from Fl.G. 3s. breakwater light. Berth is 2.5 cables from harbour entrance.

Vessel berthed head 040°T, with 7 shackles out on each anchor. Bunker dolphin just forward of bridge, starboard side. 4 mooring lines run from main deck and 1 spring from poop. All short nips from main deck.

Berth appears unsafe but we found that vessel remained alongside in strong winds.

Soundings taken at stern when moored gave 13 m. of water.

Vessel is restricted by draft, and distance from manifolds to dolphin.

Density: 1025.

Fuel: Bunker fuel oil and diesel available. Rate 200 t.p.h.

Shore installation used 6 lengths of hose (6 in. diameter) which were lifted aboard by shore derrick from bunker dolphin. The hoses were manhandled forward to the vessel's midship manifold. Same hoses used for both products.

No lighters available for bunkering.

Repairs: Facilities available.

Dry Docks: Available.

Airport: Local airport available.

Authority: No authorities boarded.

Agent: No Agent in attendance for bunker call.

AUTHORITY: The Harbour Office of Syros. *Tel:* 0281-22690. *Telex:* 029-3119. *FAX:* 0281-22633.

THESSALONIKI (Salonica): 40.38 N. 22.56 E.

(See Plan)

PORT LIMITS: A vessel is considered as an "arrived vessel", when she has passed the line connecting the Small Kara Point and Paliomanna light buoy.

DOCUMENTS: The following documents should be available for Free Pratique:

10 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Ship's Stores List.
2 copies Narcotics List.
4 copies Arms and Ammunition List.
2 copies Currency List.
1 copy Vaccination List.

Dry Cargo Vessels only:

Certificates of Nationality, Measurement, Construction, Load Line, Safety Equipment, Safety Radio, Cargo Gear, etc.

PILOTAGE: Apply for Pilot through VHF Channel 12 or by international code signals. Pilot meets vessel about 1,000 m. S.E. of breakwater light (white). Pilot boat is small motor-boat carrying pilot flag.

ANCHORAGES: The anchorage is 0.75 miles South of the East end of the breakwater in a depth of 8.5 fathoms.

RESTRICTIONS: Conventional vessels berth between 0700 hrs. and 2030 hrs. in Summer and between 0700 hrs. and 1800 hrs. in Winter.

Container vessels berth throughout 24 hours.

Unberthing of all vessels throughout 24 hours.

Vessels carrying explosives must advise the Port Authorities in advance, and are only allowed to load/discharge cargo from/to lighters at anchor outside the port.

MAX. SIZE: See "Berthing".

HEALTH: Health Officer boards vessels from foreign ports to grant Free Pratique.

RADIO: Athens Radio, or others in Greece. 24 hours notice of ETA required to obtain berth and stevedores.

VHF: Operative throughout 24 hours on Channel 12, Central Port Authority. Tugs on Channel 8. Pilots on Channels 12 and 7.

TUGS: 12 tugs from 375 h.p. – 3,120 h.p., owned by N. Vernicos, Gigilinis, Portolos and Zouros, also available for salvage and towage contracts.

BERTHING:

Pier No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	1,080	5.5 – 8.0	Pier area 30,000 sq.m.
2	800	8.0 – 10.45	Pier area 50,000 sq.m.
3	803	10.45	Pier area 30,000 sq.m.
4	1,034	10.45 – 12.0	Pier area 55,000 sq.m.
5	1,115	10.45 – 12.0	Pier area 60,000 sq.m.
6	1,312	12.0	Under construction. Container terminal. 400,000 sq.m. Pier area available, remainder under construction.

CRANES:

Electric cranes: 39×3 tons to 32 tons. 4×25 tons to 40 tons.

Mobile cranes: 2×60 tons to 90 tons. 14×11 tons to 32 tons.

Floating cranes: 1×60 tons capacity.

BULK CARGO FACILITIES: Grain Silos of capacity 20,000 tons at Pier No. 4. Loading – Unloading capacity 150 t.p.h.

AGET Installation: 1 berth for discharging cement in bulk by specially constructed ships equipped with automatic discharging gear. Max. draft 30 ft.

SPECIALISED CARGO HANDLING FACILITIES: *Container Terminal:* Located at Pier No. 6. Berth of 1,312 m. length and 12.0 m. depth with 1 railmounted transtainer of 50 tons capacity, 2 container bridge-cranes of 40 tonnes and 45 tonnes lifting capacity under spreader, 10 straddle-carriers of 35 tons capacity, 2 front lifts with 34 tons capacity under spreader, 3 fork lifts for empty containers, 4 tractors and 20 trailers. 100 reefer points. Two Ro/Ro ramps available.

Shifts: 0800 hrs. – 1530 hrs.
1600 hrs. – 2230 hrs.
0000 hrs. – 0730 hrs.

Terminal operates 365 days a year.

BRIDGES: No bridges.

MEDICAL: Advance notice not required. All facilities available.

TANKERS: *E.K.O. Installations:* (a) Sea Island berth capable of accommodating 2 vessels of 24,000 tons and 14,000 tons respectively. Max. draft 32 ft.; 8 lines, 1 × 16 in., 3 × 10 in., 3 × 4 in. and 1 × 6 in.

(b) 7 buoy mooring for vessels of up to 80,000 tons. Max. draft 44 ft. Submarine pipeline of 34 in. for crude oil discharge, 2 flexible discharge lines of 10 in. diameter. Also see "Shipmaster's Report".

Mamidakis Installation: Stern discharge berth. Max. draft 32 ft. 2 submarine lines enable 2 grades of cargo to be discharged through 8 in. line at 200 t.p.h. and 6 in. line at 160 t.p.h.

DENSITY: 1025.

FRESH WATER: Unlimited supplies available alongside berths. 2 water barges also available (150 cu.m. and 40 cum.).

FUEL: Unlimited quantities available. Usual notice required. Suppliers B.P., Shell, E.K.O. and Mamidakis.

FIRE PRECAUTIONS: One firefighting launch of 2 × 480 h.p. and one fire fighting station.

CONSULS:

Austria
Belgium
Bulgaria
Chile
Denmark
Finland
France
Germany
Italy
Japan
Mexico
Netherlands
Norway
Peru
Serbia
South Africa
Spain
Sweden
Switzerland
Turkey
U.K.
U.S.A.

REPAIRS: Only minor repairs.

DRY DOCKS: None.

WATCHMEN: If required, cost by private negotiation.

HATCHES: Opened/closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed out of bond for each crew member.

CARGO GEAR: Adequate shore gear available.

SURVEYORS: Lloyd's Register, A.B.S., B.V., etc.

REPATRIATION: Facilities for crew changes and repatriation available.

AIRPORT: Distant 12 km. S.E. of town. 6 flights daily to Athens.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: (National): 1st January, 6th January, 25th March, Good Friday, Easter Monday, 1st May, 15th August, 28th October, Christmas Day, Boxing Day. (Local): 26th October. Work may be arranged on holidays at double costs.

POLICE/AMBULANCE/FIRE: Port Police, tel. 531-502; Ambulance, tel. 531-531; Fire, tel. 111.

TELEPHONES: Facilities available for placing on board.

BANKS: National Bank of Greece, Bank Macedonia – Thraces, Citibank, etc.

SHORE LEAVE: Permitted without restriction. For tankers, the Master should arrange transport with Agent for seamen to the landing pier in Thessaloniki Harbour. Seamen will not be permitted to pass through refinery area.

IDENTIFICATION CARDS: Passes issued to crew of foreign vessels.

GARBAGE DISPOSAL: A full collection service for garbage disposal is operated by the Port Authority. Garbage is collected by truck or barge between 0800 hrs. and 1500 hrs. Charges: For ships alongside 2.80 Drachmas per day for every foot of length. For ships at anchorage 8.00 Drachmas per day for every foot of length.

WASTE OIL DISPOSAL: A collection service is operated by the Port Authority. It is collected by barge or road tankers.

SEAMAN'S CLUBS: There is no Seaman's club operating in the port. The town of Thessaloniki is next to the port and it has a full range of facilities (International telephone service, church services, postage facilities).

CURRENCY: Local currency is Drachma.

DEVELOPMENTS: 6th Pier under construction. An area of 350,000 sq.m. will be available with quay length of 1,860 m. and depth 12.0 m. A second gantry crane of 45 tons will also be available.

SHIPMASTER'S REPORT: August 1987.

Berth: Sea Island

Documents:

8 copies Crew List.
2 copies Crew Declaration.
3 copies Manifest (including ship's stores, bond, ship's fixtures, etc.).
1 copy Health Declaration.
2 copies Currency List.
1 copy Arms & Ammunition List.
1 copy Drugs List.
1 copy Passenger List.
3 copies Cargo Manifest.

Shore passes issued. They have to be returned before departure.

Ship's papers and Oil Record Book taken ashore for inspection.

List of Ship's fixtures - Radios, Computer, Photocopier, etc. is required.

Anchorages: The anchorage is 0.75 miles South of the East end of the breakwater in a depth of 8.5 fathoms.

Pilotage: The Pilot boards at the anchorage or 1 mile from the Sea Island. VHF Channel 12 is used for communications.

On departure we left without tugs and pilot, with the Terminal's approval, as the pilots were engaged elsewhere.

Restrictions: Berthing and unberthing at Sea Island is carried out in daylight hours only between 0700 hrs. and 2030 hrs. in Summer and between 0700 hrs. and 1800 hrs. in Winter.

Tugs: The use of 2 tugs is compulsory for berthing and unberthing. Ship's lines are used.

Berthing: Vinyl Chloride Monomer (VCM) is discharged at the Sea Island (Lat. 40° 38.1' N., Long. 22° 53.3' E.). Vessel berthed on the shore side of the Sea Island platform, port side to.

The platform handles vessels up to 20,000 d.w.t. Depth alongside 10.0 m.

Products are handled on the North side and crude oil is handled on the South side.

The platform used to be owned by Esso but Esso is now nationalised and the platform is falling into disrepair. However the fendering on the berth is good.

Pilots advise that great care should be taken when berthing and unberthing in order to avoid damage claims.

Moorings at the berth were 2 head/stern lines, 1 breast line and 2 springs fore and aft. It is advisable to have a good spread of moorings as the vessel overhangs the flat fendering aft at about half length.

Cargo is not worked if the wind speed is over 30 knots.

The pipelines from the shore are not buried, they lay on the seabed.

Ship's gangway used.

Cargo: The rate of discharge is about 140 t.p.h. with 10 Bar back pressure. The maximum line pressure allowed is 12 Bar.

The discharge temperature is usually 0°C. A heater may be required.

Time for sampling is about 3 hours.

The vessel used an 8 in. Chicksan (the most northerly one on the Sea Island).

Hot gas is blown through the cargo lines upon completion.

Shore personnel connect and disconnect lines.

General: No fresh water available on pier. By barge the cost is 260 Drachmas per ton for 50 tons. The quality of the water is good.

Stores are only available by launch.

There is a launch service to the city between 0800 hrs. and 2300 hrs. The cost of this service is 2,500 Drachmas on weekdays and 3,500 Drachmas on weekends. The Agent or the terminal can arrange this service.

The Customs Officers in the freight section at the airport work between 0800 hrs. and 1600 hrs. on Monday to Thursday and between 0800 hrs. and 1400 hrs. on Friday. There is no Saturday or Sunday work. Outside these hours no spares can be cleared.

The airport at Thessaloniki is about 30 minutes South of the city.

During late Summer and Autumn violent wind shifts and squalls suddenly occur and sometimes reach 60 knots. The squalls are generally from the North, funnelling down the mountains. If there is thunderstorm activity take great care.

Mount Oros Khortiatis is 8 miles East of the city and is very conspicuous with radar domes on top.

AUTHORITY: Port Authority of Thessaloniki, P.O.Box 10467, T.K.54110 Thessaloniki, Greece. *Tel:* 031-593911. *Telex:* 412536 Thpa Gr. *FAX:* 510500. *Contact:* Peter Papoutsidis, Director of Development. Demetrios Papadopoulos, Deputy General Manager. John Zovelakis, Director of Free Zone.

VOLOS: 39.21 N. 22.56 E. (See Plan)

DOCUMENTS:

Nationality Certificate.
Measurement Certificate.
Crew Lists (5 copies).
Derat Certificate.
Health Documents of Crew.
Cargo Gear Book.
Safety: (a) Passenger Ship Safety Certificate.
(b) Cargo Ship Safety Construction Certificate.
(c) Cargo Ship Safety Equipment Certificate.
(d) Cargo Ship Radiotelegraphy or Radiotelephony Certificate.
(e) Exemption Certificate.
(f) Nuclear Passenger Ship Safety Certificate.
(g) Nuclear Cargo Ship Safety Certificate.
International Load Line Certificate (1966).
Certificate for Inspection of Life Raft.
Oil Book and International Sewage Pollution Prevention Certificate (1973).
Shipboard Oil Pollution Emergency Plan (S.U.P.E.P.).

PILOTAGE: Compulsory. Pilot boards about 1 mile outside port. Pilot boat is small launch coloured grey and black.

ANCHORAGES: Suitable anchorage situated 1–2 miles outside harbour in depths of 14 m. to 20 m.

RESTRICTIONS: Vessels in excess of 10,000 tons unable enter at night.

MAX. SIZE: Max. draft 30 ft., no limitation on length or breadth.

HEALTH: Port Officer acts as Health Officer and Pratique effected on doctor's advice. If arriving from another Greek port, Pratique automatic.

VHF: Port Authority on Channel 12.

TUGS: Join vessel at entrance to harbour. 7 tugs, 280 h.p., 380 h.p., 465 h.p., 480 h.p., 640 h.p., 860 h.p. and 1,080 h.p.

BERTHING: Ro/Ro facilities available.

Dock	*Length*	*Depth*
K	600 m.	8.0 m.
1	1,000 m.	9.7 m.
2	980 m.	9.7 m. (under construction)
R	270 m.	7.0 m. (under construction)

CRANES:	1 Mobile crane (For containers)	—	Capacity 140 tons
	1 Mobile crane	—	Capacity 35 tons
	3 Mobile cranes	—	Capacity 10 tons
	3 Crawler cranes	—	Capacity 4 tons
	1 Rail mounted crane at Dock I	—	Capacity 27 tons at 17 m. and 16 tons at 30 m.
Dock I	6 Rail mounted cranes	—	Capacity 8 tons at 20 m. and 6 tons at 25 m.
Dock II	2 cranes	—	Same capacity as Dock 1
	1 crane	—	Capacity 25 tons at 20 m. and 16 tons at 32 m.
	1 crane	—	Capacity 40 tons at 25 m. and 32 tons at 32 m.

1 Straddle carrier for lifting 20 ft. and 40 ft. container 3 high.

BULK HANDLING FACILITIES: 2 silos, capacity 15,000 tons, loading ability 370 t.p.h. Discharging ability 250 t.p.h.

STEVEDORES: Advance notice required order arrange gangs. Cargo operations handled with ship's gear and with 14 shore cranes.

MEDICAL: Advance notice of required medical attention is necessary. Hospital and medical facilities available.

TANKERS: One berth, depth alongside 27 ft.

DENSITY: 1025.

FRESH WATER: Available at all the piers of the harbour. Also available from special barge (capacity 300 tons).

FUEL: Order through Agent. Oil delivered by small tanker "KEA" at all berths capacity 182 tons fuel.

CONSULS: Germany, Tel: 25379, France, Tel: 25070, Sweden, Tel: 22611, Italy Tel: 38565, Belgium Tel: 23318, Netherlands Tel: 24356.

REPAIRS: Minor repairs can be effected.

GANGWAY/DECK WATCHMEN: Ship's gangway used. Usually ship's crew.

HATCHES: Usually opened and closed by crew, but if by stevedores, additional costs apply.

CUSTOMS ALLOWANCES: 1 to 2 packets cigarettes allowed per crew member per day. 1 bottle wine/spirits allowed out of bond.

SURVEYORS: Cargo inspector: Hellenic Register of Shipping.

REPATRIATION: Crew changes and repatriation can be carried out.

AIRPORT: No airport locally.

TIME: GMT plus 2 hours, Winter. GMT plus 3 hours in Summer.

HOLIDAYS: Usual Greek holidays. Local holiday 6th December; cargo work can be arranged subject to additional cost with the exception of 6th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 23652; Ambulance, Tel: 27531; Fire, Tel: 33191.

EMERGENCY CO-ORDINATION CENTRE: Ministry of Mercantile Marine (Piraeus) Tel: 1/4121211-19.

SERVICES: Divers available for surveys and underwater repairs.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Shore passes are required.

GARBAGE DISPOSAL: There is a vehicle with a small crane, which collects the garbage in drums from the ship's stern. Telephone for service: 0421-22422. Collection time 0700 hrs. – 1900 hrs.

WASTE OIL DISPOSAL: A vehicle with hoses comes close to the ship to collect waste oil. There are various companies available.

SEAMAN'S CLUBS: None. There is only one cafeteria shop with international telephone.

CURRENCY: The local currency is Drachmas.

DEVELOPMENTS: Construction of a new dock at the grain silo.

SHIPMASTER'S REPORT: 1977. (Updated 1984).

Restrictions: Draft restrictions on new quays subject to maximum depth of water of 32 ft. and on the original town quays a maximum depth of water of 28 ft. East side, 26 ft. West side, 26 ft. Head. (Thus draft will have to be about 2 ft. less than depth.)

Stevedores: Working hours 0730 hrs. – 1400 hrs. and 1400 hrs. – 2100 hrs. on overtime.

Berths: Town quay (K) with approx. 800 ft. frontage on each side and cross berth approx. 385 ft. on end. No. 1 quay – "L" shaped berths with base to the shore with frontages approx. 600 ft. on North side, 1,570 ft. on East side, 505 ft. on head and 1,210 ft. on West side.

No. 2 quay – "L" shaped berths with base to the shore with frontages approx. 500 ft. on North side, 1,385 ft. on East side, 330 ft. of head and 1,520 ft. on West side (Not yet finished, see plan).

Pollution: Port regulations prohibit the scraping and scaling of ships side and the pollution of sea or port area by painting.

AUTHORITY: Volos Central Port Authority, Central Pier, 38001 Volos, Greece. *Tel:* 0421-28888, 38888, 24758. *Telex:* 282170. *FAX:* 0421-20115. *Contact:* D. Geogakopoylos, Harbour Master. T. Pissias, Port Director.

YALI ISLAND: 36.40 N. 27.08 E. (See Plan)

DOCUMENTS:
5 Crew Lists.
2 Passenger Lists.
Cargo Manifest.
Bills of Lading.
List of Ship's Stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: A Mooring Master is available from Piraeus. Mooring Master boards at the anchorage.

ANCHORAGES: Safe anchorage in the roads (36° 39' N., 27° 09' 30" E.) except in strong Southerly winds.

Area to be Avoided for Anchoring: Power Cable – "See Plan".

West Portion of the Zone:
(1) 36° 40' 04" N. 27° 07' 30" E.
(2) 36° 39' 30" N. 27° 08' 24" E.
(3) 36° 37' 30" N. 27° 08' 24" E.
(4) 36° 36' 52" N. 27° 08' 37" E.

East Portion of the Zone: E.
(5) 36° 40' 07" N. 27° 07' 54" E.
(6) 36° 39' 36" N. 27° 09' 00" E.
(7) 36° 36' 50" N. 27° 08' 53" E.

MAX. SIZE: Max. LOA 190 m., max. beam 24 m., max. draft 33 ft.

HEALTH: Port Authorities will board by launch from Nissyros to arrange Free Pratique. Any sick crew members will be disembarked to Nissyros by the same launch.

VHF: Contact Yali Quarry on Channel 6 and Harbour Master's office on Channel 12.

TUGS: Available.

BERTHING: The vessel is moored at loading berth on 8 buoys in addition to port anchor. During loading operations vessels have to be shifted from hatch to hatch.

BULK CARGO FACILITIES: Loading Berth is located at the end of the conveyor belt shiploader. The shiploader is on a cement construction, about 500 m. offshore. The cargo is carried by conveyor belt to the spout. The raising and slewing of the spout is controlled by the operator from the control desk to allow trimming of the cargo.

STEVEDORES: Workers are employed by Lava Mining and Quarrying Co.

MEDICAL: Nearest medical and hospital facilities are at the island of Kos, 7 miles North of Yali.

DENSITY: 1028 – 1030.

FRESH WATER: None available.

FUEL: Not available.

CONSULS: No local representation.

REPAIRS: No facilities exist.

HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of spirits are allowed for each man.

AIRPORT: Nearest at Kos with 2-3 flights daily to Athens during the Summer and a daily flight in Winter.

HOLIDAYS: Saturday, Sundays and Public Holidays.

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

GENERAL: *Pilots Recommendations for Mooring:*

1. Pilot's motorboat at position P1 (See "Plan").
2. Vessels are always berthed with starboard side towards the loading station.
3. Have ready following moorings:
   (a) Fore – Portside 1 × 200 fathoms manila or nylon ropes – Starboard side 2 × 200 fathoms manila or nylon rope and
   (b) Aft – Portside 2 manila or nylon ropes (should be 200 fathoms long) – Starboard side 2 × 200 fathoms manila or nylon rope.

Note: The 200 fathoms aft starboard side ropes are required only in the initial stage of mooring to bring the ship in her final position.

4. Secure lines as follows:
   (a) Nylon ropes to each of Buoy Nos. 3, 4, 5, 6, 7, 8.
   (b) Nylon rope(s) to either Buoy No. 1 or No. 2 according to ship's size.
5. Vessel to have portside anchor chain lowered (1.5 shackles) when vessel is about 400 yards away from anchoring point.
6. On arrival have portside gangway ready for immediate use.

Expedite Loading:

1. As a rule loading commences from midship holds. Vessel to be ready to shift back and forth at all hours of day and night for loading of other holds on 30 minutes' notice.
2. Have all hatches open.
3. Broom swept and washed clean holds, hold ladders and supporting beams.
4. Arrive at Yali fully ballasted.
5. An early morning arrival is recommended.
6. Shipper intends to work around the clock.
7. In case of tween decker, before arrival, remove all tweendeck hatch beams also 2 or 3 adjacent beams from the centre of Nos. 2, 3 and 4 main deck hatches.

NOTES

Please also advise Shipping Guides Ltd.

Greenland

GENERAL:

CUSTOMS: The Master and the crew are not to distribute anything tax-free in a Greenland port.

DOCUMENTS: Following documents must be on board:
Speed Certificate.
Crew List.
Radio Station Certificate.
Safety Equipment Certificate.
Clearance Certificate.
Health Declaration.
Tonnage Certificate.
Certificate of Registry.
Derat Certificate.
Sailing Orders.

PILOTAGE: Attention is drawn to the fact that any person who is assigned to act in Greenland waters as "kendtmand" (i.e. a ship's guide with local knowledge) is not considered to be a Pilot in the sense of the word normally used in International shipping.

While serving on board he is to act exclusively in an advisory capacity, and the navigation of the vessel is at no time to be entrusted to him.

RESTRICTIONS: Foreign-flag vessels have access to Greenland ports. The crew may go ashore subject approval of Port Authorities.

All vessels arriving at ports must give a 24 hour ETA to Port Authority and Master should immediately after arrival make a presentation of Health Certificate and allow a medical check on board.

All ships have to pay harbour dues.

ICE INFORMATION: Ice Centre Narssarssuaq (Tel: 35244. Telex: 90332 iscent gd. Fax: 35344.) transmits daily at 1200 hrs. 1400 hrs. and 2200 hrs. GMT the latest information of the ice in Southern Greenland Waters. Information is transmitted in Facsimile (Mufax) on frequency 125.00 kHz, drum speed 120. Ships can, free of charge, request telegraphic ice information from following coastal radio stations:
OZL—Ammassalik
OXF—Qaqortoq

Ice information also transmitted in Facsimile (Mufax) on frequency/time (GMT) as follows:

9,360 kHz	0003-0025 GMT.
5,850 kHz	0028-0050 GMT.
5,850 kHz	0943-1005 GMT.
9,360 kHz	1008-1030 GMT.
13,855 kHz	1218-1240 GMT.
9,360 kHz	1243-1305 GMT.
13,855 kHz	1308-1330 GMT.
17,510 kHz	1333-1335 GMT.
13,855 kHz	1803-1825 GMT.
9,360 kHz	1828-1850 GMT.

RADIO: In ports where there is a local radio station, vessels are prohibited from using ship's station for sending messages.

HEALTH: Before commencing voyage to Greenland, at the port of departure, Master is required to obtain a Health Certificate from an authorised medical practitioner, stating that there are no dangerous or contagious diseases on board, such as pest, cholera, yellow-fever or typhus. The crew list is to be included in this certificate stating that there are no venereal or other contagious diseases amongst the crew members. The Health Certificate is only valid if it has the stamp and signature of the Royal Danish Consul or Vice-Consul of the district in which the port of departure is situated. On arrival at the first Greenland port, the Master is to present the Health Certificate to the Port Authorities. Health Certificate may also be issued by a doctor in the first Greenland port of call.

STEVEDORES: Contact Authority.

MEDICAL: Dental facilities available in all ports, but only in emergencies. Hospitals available in all ports, but only in emergencies. The only large hospital is in Nuuk/Godthaab.

FRESH WATER: Available in larger ports.

CONSULS: Iceland, Sweden, Norway, Canada and Great Britain have representations in Nuuk/Godthaab and Iceland has representation in Qaqortoq/Julianehaab.

WATCHMEN: Ship is required to appoint a crew member as ship's guard on board.

TIME: GMT minus 3 hours. Permanent. Except at Thule Air Base and N.E. Greenland.

HOLIDAYS: As applicable to Denmark.

WORKING HOURS: Normally from 0800 hrs. to 1700 hrs. with 2 meal breaks. Possible to increase the working hours if necessary.

REPORT: Immediately upon arrival of a vessel in Greenland, the Master must report to the Port Authorities.

WASTE DISPOSAL: It is forbidden to throw waste material of any description overboard into port waters.

AUTHORITY: Greenland Trade (KNI), P.O. Box 608, Dk-3900 Nuuk/Godthaab, Greenland. *Tel:* 25211. *FAX:* 25311. *Telex:* 90401 trasys gd. *Cables:* Trafikkontoret, Nuuk.

AASIAAT (Egedesminde): 68.43 N. 52.53 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Roadstead, Inner Port (inside Bay), Anchorage, Boat Port, and Atlantic Quay.

DAYLIGHT: Polar darkness from 2nd December to 11th January, and midnight sun from 22nd May to 23rd July.

CONDITIONS: (a) Current: Flows Eastwards between the islands at Aasiaat from 3 hours before, to 3 hours after high water, following which, current flows Westwards for 6 hours. *(b)* Ice: Winter ice normally occurs from mid-December to early May, but can occur earlier, in November. New ice in the port can be up to 60 cm. thick; 1st January covering ice up to 30 cm and by 1st February about 45 cm. Icebergs sometimes enter port area and stop all shipping movement. *(c)* Tide: High tide height 2.6 m. (max. 3.1 m.). Low tide height 1.5 m. Direct West wind causes 0.3 m. rise above tidal height, and South or S.E. wind about 0.5 m. below.

PILOTAGE: No official port Pilot, but assistance arriving and sailing may be obtained from a local seafarer having good knowledge of the area. This local assistance should be ordered if required in ETA cable to Port Authority at least 24 hours prior arrival. The Port Manager usually acts as local expert as part of his normal duties.

There is VHF radio installation in office of Port Authority and it is usually possible to obtain VHF contact within 30 miles of Aasiaat.

Local area expert will board vessel from port boat at meeting place usually arranged just outside entrance to port.

No special pilotage regulations and no Outer Anchorage where Pilot may be taken on board. However, in waters North and N.E. of port entrance vessels may stop or proceed at very slow speed in order to embark local expert (Max. speed 3 knots).

ANCHORAGES: No special anchorages, and vessel is only allowed to anchor for a short period at the entrance to port subject permission of Port Authority.

MAX. SIZE: Largest vessel to berth alongside Atlantic Quay was length 136 m., breadth 20 m., draft 7.5 m.

ENTRY: Day or night.

RADIO: Local radio station "OYR". RDF station beacon East of the town. Radio link between Aasiaat and Transitoen, and between Transitoen and Roeveo.

BERTHING: Atlantic Quay: Length 103 m., depth alongside 9.4 m. at medium high tide. Height of quay at medium tide about 1.5 m., above w/l. 1×10 ton mobile crane and forklift trucks used in discharging.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available at Atlantic Quay.

FUEL: Only gas-oil available for local fishing vessels from the tank-station and tanker lorries.

REPAIRS: Shipyard for repairs to steel fishing vessels. Machine shop also available. Slip for small vessels (250 tons).

AIRPORT: Heliport.

SALVAGE: Salvage-station in the area.

AUTHORITY: Royal Arctic Line A/S, P.O.Box 219, 3950 Aasiaat, Greenland. *Tel:* (299) 42033. *Cables:* Handelchefen Aasiaat. *FAX:* (299) 42132. *Contact:* Harbour Master.

FAERINGEHAVN (Polaroil): 63.41 N. 51.34 W.

(Also see "General Information" at beginning of Greenland Section).

DOCUMENTS: Bill of Health: Doctor's Certificate mentioning each member of crew by name to be free of contagious diseases. This document to be signed by Consulate in the port of delivery to be prepared by competent authority, passengers excluded. One Manifest with Bill of Lading. Ordinary Ship's Papers.

PILOTAGE: As a rule Pilot can be ordered in the months May-October, 12 hours' notice before arrival is required.

ANCHORAGE: Inside fjord area.

RESTRICTIONS: None.

MAX. SIZE: Oil-carriers about 26,000 d.w.t., draft 40 ft. General cargo-ships 20 ft.

HEALTH: Master to apply with documents at harbour office for Free Pratique.

RADIO: Nuuk Radio: OXI, connected Faeringehavn by Telex and Telephone.

VHF: Oil company and fishing company are listening on VHF during working hours.

TUGS: None. 1 harbour boat for assisting with mooring and taking lines.

BERTHING: Natural port, anchorage for the largest vessels. Wharf, 225 m. with 5 m. at L.W.

STEVEDORES: None.

MEDICAL: For medical service, apply to Nuuk.

TANKERS: Load/discharge lines 6 in. and 8 in. Smaller diameters for bunkering when necessary.

FRESH WATER: Not available.

FUEL: Available. Light fuel, gas oil, aviation turbine fuel A1, gas oil, oct. 97. But only with permission of Polaroil.

CONSULS: None.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not required (ship's crew).

OPENING/CLOSING HATCHES: Must be carried out by ship's crew.

REPATRIATION: Available, via Nuuk by air to Copenhagen.

AIRPORT: Nearest airport is Nuuk distance 35 miles regular airlines.

TIME: GMT minus 3 hours.

HOLIDAYS: Danish holidays and Greenland holidays.

POLICE/AMBULANCE/FIRE: Police tel. Nuuk 21448.

TELEPHONES: Not available on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

DELAYS: Bunker station closes for arrivals between 2200 hrs. and 0600 hrs. local time.

GENERAL: Bunker station open all year; during Winter-time sometimes difficulties caused by ice.
AUTHORITY: Polaroil, 3900 Nuuk, Greenland. *Tel:* 009-299 22527. *Telex:* 90600 Polaroil. *FAX:* 009-299-23783. *Cables:* Polaroil.

ILULISSAT (Jakobshavn): 69.13 N. 51.06 W.

(See Plan)

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is a narrow open bay, entrance to the N.W., having outer port and inner port. In outer port is Atlantic Quay and bunkering station, and inner port has another quay and a fishing harbour.
CONDITIONS: *(a)* Tide: Height of average high tide 2.8 m. (max. 3.3 m.) low tide 1.6 m.
(b) Wind: Usually East to N.E. In Autumn winds are strong especially in the morning.
(c) Ice: Impression can be gained when approaching port that port is closed due to icebergs. On closer approach channels between icebergs will be found but if these openings appear too narrow a wider passage should always be found to the North.
(d) "Kanele": A natural phenomenon that occurs at this port causing regular and heavy swell, height up to 2 m. Wave characteristic, long and flat, frequency about 6 minutes. Pilot should be consulted for full information.
ENTRY: Port usually open day and night, from mid May to end November.
DAYLIGHT: Polar darkness between 1st December and 12th January and midnight sun between 21st May and 24th July.
PILOTAGE: A local Pilot (Kendtmand) should always be used by larger vessels and request made to Port Authority in ETA cable. Pilot boarding place to be agreed with Authority.
MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 110 m., draft 6.8 m.
RADIO: Aasiaat Radio, call sign "OYR".
VHF: Port radio on Channels 16, 9 and 13.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Outer port depth 6.5/7 m., inner port 5.5/6 m. Atlantic Quay length 100 m. Depth alongside Atlantic Quay 8 m. at average low tide. Height of quay about 1.1 m. above w/l. Permission to enter port should be obtained prior arrival from Royal Arctic Lines. Fork-lift trucks available.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable alongside Atlantic Quay.
AIRPORT: STOL airstrip available for internal flights.
REPAIRS: Machine workshop. Crane for lifting small vessels, capacity 50 tons.
GENERAL: Police, Fire Brigade, Port and cable office.
AUTHORITY: Royal Arctic Line, P.O.Box 400. DK-3952 Ilulissat, Greenland. *Tel:* (299) 43533. *FAX:* (299) 44532. *Contact:* Harbour Master.

IVIGTUT: 61.12 N. 48.10 W.

Mining in the area has stopped. The Port has closed down.

(Also see "General Information" at beginning of Greenland Section)
CONDITIONS: *(a)* Current: Strongest about 3 hours before and 3 hours after high water, and vessels arriving and sailing should take this into consideration. *(b)* Tide: Height of average high tide 3 m. (max. 3.4 m.), low tide 1.6 m. *(c)* Wind: Calm for about half the year otherwise winds are usually from South or S.E. The dangerous winds for moored ships are the infrequent storms from North or N.E.; these storms seldom occur but if they do occur they do so in the Autumn. *(d)* Ice: Winter ice usually occurs from December onwards in the fjord outside Ivigtut and disappears in the beginning of April. Outside Ivigtut Winter ice always occurs, sometimes reaching a thickness of about 1 m. Information concerning ice conditions always obtainable on telegraphic request to GLK.
ENTRY: Day and night and usually all year round.
PILOTAGE: No official Pilot but an acting Pilot can be arranged through connection with Port Authority at least 24 hours prior arrival.
MAX. SIZE: Largest vessel to have berthed at Pier was length 102 m., breadth 14 m., draft 6.2 m.
RADIO: Qaqortoq Radio "OXF" or Gronnedal Radio "OVC".
VHF: Gronnedal Radio listens on VHF 24 hours (Channels 16 and 12).
TUGS: None. Motor-boat will assist mooring.
BERTHING: Depth alongside about 7 m. height of pier about 2 m. above w/l. Berthing during daylight only. Crane capacity 3 tons.
Note: Kryolitselskabet Oresund A/S ceased operating at the port in December 1987.
FRESH WATER: Available.
FUEL: Deliveries of small quantities of gas-oil for local vessels only.
REPAIRS: No facilities.
MEDICAL: Doctors available in Gronnedal.
AUTHORITY: Hjemmestyret for Gronland, P.O.Box 1015, 3900 Nuuk, Greenland.
Ivigtut Kommune, 3930 Gronnedal, Greenland. *Tel:* 10177. *FAX:* 10173. *Contact:* J. Pinnerup-Lauritzen, Port Director.

KANGERLUSSUAQ (Sondre Stromfjord): 66.58 N. 50.57 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is used for the support of Greenland's International Airport and the community in connection with Kangerlussuaq Airport (Soendre Stroemfjord Airport).

The port operates as a normal port with a quay and a sea terminal for tankers. But the quay is only 20 m. long, so stevedore/discharging and loading of heavy cargo vessels will be operated on roads by military-landing crafts and barges.
DAYLIGHT: The port is situated South of the border for polar darkness but has a midnight sun from 15th June to 1st July.
CONDITIONS: *(a)* Current: The current at entrance and at the West of Sondre Stromfjord is N.E. at flood tide, and S.W. at ebb tide, and can reach a speed of 7 knots. *(b)* Tide: High water at Camp Lloyd is about 3 hours later than at the entrance of Sondre Stromfjord. Height of average high tide 3 m. (max. 3.6 m.). Low tide 1.6 m. *(c)* Ice: Sondre Stromfjord is frozen during winter throughout whole of inner harbour, but about 55 miles from Camp Lloyd, ice thickness varies from 5 cm. to 90 cm. *(d)* Winds: Strong winds can occur from East and S.E.
ENTRY: On account of ice, the fjord is closed from beginning of December to end-June, but can be used day or night from beginning of July to end-October.
PILOTAGE: No authorised Pilot, but Harbour Master will assist berthing.
ANCHORAGES: Good anchorages about 2 miles S.E. of Emmons Pynt in depth of about 40 m. Great care should be taken in anchoring, since sea bottom is shelving.
RADIO: ETA should be given well in advance to Kangerlussuaq Airport, Port Operations.

The arrival should be reported at least 24 hours in advance through Island Commander of Greenland G.L.K.

Port Master can be contacted on 2726 kHz., and contact should be established at least one hour prior to expected time of arrival.
VHF: Airport and Port Master's office on VHF Channel 16.
BERTHING: *(a)* A quay which is located North of Emmons Pynt, depth alongside only 3 m. *(b)* Tanker sea terminal about 700 m. S.S.E. of Emmons Pynt where there is mooring with discharge lines. Depth of water 24 m. – 26 m. on the South side of the mooring position; 15 m. at the mooring, and 10 m. on Northern side of mooring with rapid shelving to the North.

The Port Authorities should be contacted before mooring at the sea terminal. There are mobile cranes with lifting capacity up to 5 tons, and fork-lift trucks.
MEDICAL: Hospital and medical staff available. Dentist available, but not on a regular basis.
AIRPORT: The airport has international connections to Europe via Copenhagen, and to U.S.A. and Canada. Distance to airport 8 miles.

International Airport ICAO, Danish Civil Aviation Agency, Flight Information Centre, Heliport.
REGULATIONS: Kangerlussuaq Port is a civil Greenland Home Rule owned/administrated port with no restrictions except those given by the Port Operations and the Port Master.

Greenlandic and Danish supply ships have preference in mooring at all installations.
AUTHORITY: Greenland Home Rule, Kangerlussuaq Airport, Port Operations Department, P.O.Box 1006, 3910 Kangerlussuaq, Greenland. *Tel:* 299-11300 or 11244. *Telex:* 90838. *FAX:* 299-11039. *Contact:* Hans J. Schioldan, Airport-Operations Manager.

MANIITSOQ (Sukkertoppen): 65.25 N. 52.54 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour situated on S.E. side of Maniitsoq Island, and has Atlantic Quay.
CONDITIONS: *(a)* Tide: Height of average high water 4.2 m. (max. 4.8 m.), low water 2 m. *(b)* Ice: Winter ice occurs from December to April. *(c)* Wind: Advisable not to enter harbour area if winds are strong. Most obstructive winds are storms from South or S.W.
ENTRY: Port open day and night, normally all year round.
PILOTAGE: Pilot is arranged by cable to Nuuk Radio when giving ETA, which should be sent well in advance. Pilot will meet vessel as arranged outside the harbour, or at Faltings Skoer.
MAX. SIZE: Largest vessel that can berth at Atlantic Quay is length 100 m., draft 6 m. Vessels up to 4,000 tons have used the port.
RADIO: Extended from Nuuk "OXI".
TUGS: None. Port motor-boats assist mooring.
BERTHING: Depth in harbour is about 27 m. and alongside Atlantic Quay. Length 60 m. with depth of about 8.2 m. Height of quay is about 2 m. above w/l. Cranes up to 5 tons capacity and fork-lift trucks.
MEDICAL: Hospitals, doctors and dentist available.
FRESH WATER: Available at quay.
REPAIRS: Repair workshop for repairs to wooden fishing vessels. Machine shop available. Slip for small vessels (225 tons).
AIRPORT: Heliport.
GENERAL: Telex, telephones, Police, Fire Brigade.
AUTHORITY: Kalaallit Niuerfiat, A. W. Nielsensvej, 3912 Maniitsoq, Greenland. *Tel:* 13244. *Telex:* 90701. *Cables:* Handelchefen Maniitsoq. *Contact:* Handelchefen.

Royal Arctic Line A/S, Box 288, 3919 Maniitsoq, Greenland. *Tel:* 13633. *FAX:* 13832. *Contact:* Pavia Biilmann.

MARMORILIK: 71.07 N. 51.17 W.

The mining operations ceased in December 1990.

NARSSARSSUAQ (Isrecognosceringsstation): 61.08 N. 45.26 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Ice outlook station, with quay.
CONDITIONS: *(a)* Current: Occasional strong N.W. current.
(b) Tide: Average height of HW 3 m. (max. 3.6 m.) LW 1.6 m.
(c) Wind: S.E. wind sometimes reaches typhoon strength.
(d) Ice: In Winter ice thickness sometimes reaches 1 m. Ice breaker not available.
PILOTAGE: Not available. Base representative should be advised of ETA well in advance of arrival.
MAX. SIZE: Largest vessel to berth at quay was length 130 m., draft 8 m.
ENTRY: Open season from mid-May to mid-October. During season, port open day and night.
RADIO: Qaqortoq Radio "OXF".
VHF: Extended from Qaqortoq.
TUGS: None.
BERTHING: Quay length 140 m., depth alongside (West) 6 m. – 11 m. (East) 5 m. – 8 m. Height of pier 2 m. above w/l. 2 vessels may berth, 1 on either side of quay. Heavy mooring equipment on the quay, and should be used by larger vessels. Mobile cranes capacity up to 4 tons, and fork-lift trucks.
FRESH WATER: Obtainable at quay, about 80 tons per single off-take.
AIRPORT: Landing-strip for aircraft. Ice station usually uses Twin Otter aircraft and S61 Helicopter.
AUTHORITY: Greenland Homerule, Box 1015, 3900 Nuuk. *Tel:* 2-3000.
Station Manager, 3926 Narssarssuaq, Greenland. *Tel:* 35266.

NORTH STAR BUGT (Thule Air Force Base): 76.36 N. 68.52 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Supply port for the Thule Air Force Base. Port is operated by and belongs to the U.S. Air Force.
DAYLIGHT: Polar darkness from 1st November to 10th February and midnight sun from 23rd April to 20th August.
CONDITIONS: *(a)* Ice: Port is frozen over from end October to beginning July. From beginning of November, large areas of compact ice appear, and these can sometimes be up to 20 miles wide. During May, compact ice areas commence breaking up; however, large quantities of drift ice remain along the coast until end July. Winter ice is normally about 180 cm. thick. *(b)* Temperature: In January and February average temperature is 29° below zero. In June, July and August, average temperature is usually above freezing-point, but for the rest of the year it is below freezing. *(c)* Tide: Mean Spring tide is 3 m. (max. 3.4 m.). Mean neaptide 1.7 m.
ENTRY: Normally, port is open early July depending upon ice situation.
PILOTAGE: No authorised Pilot, but American Port Authority assists in mooring and should be advised of ETA well in advance.
ANCHORAGE: Good holding ground in depth between 20 m. and 40 m., but anchoring should only be carried out following advice of Port Authority.
MAX. SIZE: Largest vessel to berth alongside quay was length 130 m., and draft 7 m.
MEDICAL: Hospital, doctor and dentist available.
TUGS: None. Port boats assist mooring.
BERTHING: 2 vessels may berth at the quay. Depth alongside about 7 m. Height of pier about 2 m. above MHW. Mobile cranes and forklift trucks; however, equipment varies from year to year and Port Authorities should be contacted well in advance. 3 amphibious craft for vessels discharging in the roadstead.
FRESH WATER: Available alongside quay.
AIRPORT: Two rescue helicopters stationed at this base.
REGULATIONS: The area is a Military Defence area and special permission is necessary to enter the port. Shore leave is prohibited.
AUTHORITY: U.S. Air Force, North Star Bugt, Greenland. *Tel:* 50091.

NUUK (Godthab): 64.10 N. 51.44 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Narrow entry to port, but well protected, with good modern berths and anchorages.
CONDITIONS: *(a)* Current: Sometimes strong between anchorage and the berths. *(b)* Ice: Only very occasional large quantities of ice reach the port and into the fjord. If ice in area South of Nuuk, S.W. storms force drift ice into the fjord. In recent years the port has begun to freeze over in Winter, and small vessels have at times become icebound. *(c)* Wind: S. and S.W. storms spring up suddenly but only last for brief periods. *(d)* Tide: Height of high water 4.4 m. (max. 5.1 m.); low water 2.1 m.
ENTRY: Port open day and night all year round.
DAYLIGHT: Nuuk situated South of the border for midnight sun and Polar darkness.
PILOTAGE: Port Manager will arrange non-authorised Pilot. Pilotage may be arranged by VHF contact with Authority during normal working hours with 24 hours notice.
ANCHORAGES: Good anchorages available inside fjord. Larger vessels should anchor close to Rypeo and in Malene Bugt.
MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 135 m., breadth 17 m., and draft 7 m.
RADIO: Local radio station "OXI". 24 hours notice of ETA should be passed to Authority, cable address "Havnechefen Nuuk". Radio beacon at Kookoerne.
TUGS: 2 tugs available. 1 port boat to take lines and assist mooring.
BERTHING: Larger vessels should contact Port Authority before approaching port at night-time. Atlantic Quay, length 170 m., has a depth alongside 7 m., approx. for the most Northerly 120 m., and between 4.5 m. – 5 m. at MLWS for the most Southerly 50 m.

Vessels normally berth port side alongside. Mobile cranes capacity 30 tons.

Schooner Quay is 50 m. long, with a depth of 4.0 m., approx. Vessels normally berth bow Westward.

On the Coastal Passenger Quay length 40 m., depth 5.4 m., vessels usually berth with bow to the North.

There are several other small quays for the use of trawlers, and cutters, and a sand discharging berth length 30 m., depth 5 m.
MEDICAL: Hospital, doctors and dentists available.
TANKERS: Tankers can anchor and stern moor out from the gas installations, using an oil pipeline connection. A mooring arrangement has been established for tankers of 25,000 – 30,000 d.w.t. below the tank and gas farm on the hillside.
FRESH WATER: Available at all berths.
FUEL: Small quantities gas-oil available at Atlantic Quay after receiving permission from Port Authority.
REPAIRS: Slip for small vessels (40 tons) and minor repairs. Slip for vessels up to 1,860 tons, repairs possible for steel and wooden ships.
AIRPORT: Runway 950 m. × 30 m.
GARBAGE DISPOSAL: Service available alongside.
WASTE OIL DISPOSAL: Service available only for small quantities by special arrangement with Port Authority.
SEAMAN'S CLUBS: No club in port. Local hotel provides telephone facilities and other services are available locally.
CURRENCY: Danish Kroner(DKr). U.S.$ 1.00=DKr 7.00 (approx.)
GENERAL: Police, Fire Brigade, radar and radio technicians, radio station post, and cable office.
AUTHORITY: Royal Arctic Line A/S, P.O.Box 1059, DK-3900 Nuuk, Greenland. *Tel:* 299-23833. *FAX:* 299-23332. *Contact:* John Rasmussen, Port Manager.

PAAMIUT (Frederikshab): 62.00 N. 49.41 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: The port is in the inner part of a small bay.
DESCRIPTION: Atlantic Quay; fishing quay; anchorage.
CONDITIONS: (a) Current: None. *(b)* Ice: Big ice reaches to the North of the port; smaller ice reaches the port especially to the North, but South of the port it is usually ice-free. The best period of finding the port ice-free is between March/April and the end of August. *(c)* Tide: Height of average high water is 3.8 m., low water 2.0 m. (max. 2.4 m).
PILOTAGE: Pilot should be requested in ETA cable via Nuuk Radio. Pilot will meet vessel at Satuarssugssuaq (Fyroen).
ANCHORAGE: S.E. of Skarvo. Holding ground is not good and anchoring should be carried out at very slow speed and only in good weather conditions.
MAX. SIZE: Length 100 m., draft about 6 m.
ENTRY: Day or night.
RADIO: Radio station Nuuk "OXI". RDF station beacon East of the town.
TUGS: None. Port boats assist in mooring.
BERTHING: Atlantic Quay. Length 90 m., depth alongside at average low tide, 7 m., depth in harbour about 10 m. Cranes up to 5 tons capacity and fork-lifts trucks used in discharging.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available alongside Atlantic Quay.
FUEL: Refuelling quay, depth about 5 m., Gas-oil and diesel oil available for small vessels.
REPAIRS: Workshop for repairs to wooden fishing vessels. Machine shop available. Slip for small vessels (250 tons).
AIRPORT: Heliport.
GENERAL: Police Station, Fire Brigade.
AUTHORITY: Kalaallit Niuerfiat, Poul Ibsensvej 1, P.O.Box 222, DK 3940 Paamiut, Greenland. *Tel:* 17244. *Telex:* 90503. *Cables:* Handelchefen Paamiut. *Contact:* Handelchefen.

QAQORTOQ (Julianehab): 60.43 N. 46.02 W.

(See Plan)

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is an open bay, facing South with Atlantic Quay.
CONDITIONS: *(a)* Current: Flows N.W., but in Southern part of port from little current effect. *(b)* Tide: Average height of high tide 2.8 m. (max 3.2 m.); low tide 1.4 m. *(c)* Ice: Drift ice between January and July occasionally fills whole port. *(d)* Wind: The most frequent wind is from East or N.E., normally occurring as storms during Winter months and as strong winds in Summer. Winds can be violent and cause rapid rise in temperature. Very secure moorings are advisable.

PILOTAGE: Port office is equipped with VHF which should always be used to contact Port Authorities before arrival, and to arrange Pilot's boarding position.
MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 110 m. and draft 7 m.
ENTRY: Port open day and night normally throughout year.
RADIO: Local radio station (call sign OXF). Radio beacon station at Simiutaq about 10 miles West of entrance to Julianehab Fjord.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Atlantic Quay – length 100 m., depth alongside between 7/9 m. on average high tide and 1 quay, length 60 m., depth alongside 4.8 – 7.2 m. for small vessels. Height of quay is 1.3 m. above w/l. Mobile cranes, lifting capacity up to 5 tons.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available at Atlantic Quay by tanker trucks.
FUEL: Gas-oil available at Atlantic Quay.
REPAIRS: At repair quay there is a stationary crane lifting capacity 35 tons. Slip for small vessels (250 tons) and minor repairs. Machine shop available.
AIRPORT: Heliport.
GARBAGE DISPOSAL: No regular garbage collection service possible. Make arrangements with the Harbour Master.
WASTE OIL DISPOSAL: Not possible.
SEAMAN'S CLUBS: In Greenland, seaman's hotels serve tourists, visitors and local people. Alcohol is forbidden in the hotel. In Qaqortoq, the seaman's hotel can be contacted on (299) 38678.
AUTHORITY: Kalaallit Niuerfiat, Torvevej, P.O.Box 500, 3920 Qaqortoq, Greenland. *Tel:* 38244. *FAX:* 38316. *Cables:* Handelschefen Qaqortoq. *Contact:* Isak Trolle or Claus J.Clausen.

QEQERTARSUAQ (Godhavn): 69.14 N. 53.32 W. (See Plan)

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port consists of a mooring inside a bay and a 12 m. quay with depth 4 m.
DAYLIGHT: Polar darkness from 25th November to 15th January, and midnight sun between 19th May and 26th July.
CONDITIONS: Ice: Winter ice is fast from November–December until end May or beginning of June. Thickest observed Winter ice is about 100 cm.
ENTRY: Day or night. Port is open from May to November. Between mid-April until May the port can only be used by specialised tonnage.
PILOTAGE: Boarding point arranged with Port Authority in ETA advices.
ANCHORAGE: Good anchorage in the bay – outer port.
MAX. SIZE: Largest vessel to date length 100 m., draft 6.5 m. at quay with length 60 m. and depth 4 m.
RADIO: Extended from Aasiaat "OYR". RDF Station beacon.
TUGS: None. Port boats assist with mooring.
BERTHING: Quay length 12 m. depth alongside 4.0 m. at MLWS. Vessel moors to 2 anchors and stern-lines to the shore. Mobile cranes on shore capacity up to 5 tons. Depths in bay about 6.82 m.
MEDICAL: Hospital. Doctors and dentist available.
GENERAL: Arctic Scientific Station, Fire Brigade, Cable Office.
AUTHORITY: Kalaallit Niuerfiat, Holten Mollersvej 3/C, 3953 Qeqertarsuaq, Greenland. *Tel:* 47244. *Telex:* 91401. *FAX:* 47400. *Cables:* Handelchefen Qeqertarsuaq. *Contact:* Handelchefen.

SISIMIUT (Holsteinsborg): 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour is situated on Northern side of Tommermandsoen.
CONDITIONS: *(a)* Tide: Average height of high tide 3.5 m. (max. 4.4 m.) low tide 2 m. *(b)* Ice: Winter ice up to 1 m. thick. Ice normally occurs from December to March or April.
ENTRY: Port open day and night, and normally all year round.
PILOTAGE: Arrange with Authority through Aasiaat Radio, cable address "Director of Commerce Sisimiut". Pilot meets vessel at Jakobs Skaer, 2 miles S.W. of Mollersoe.
ANCHORAGE: Large vessels can anchor outside port and discharge into barges.
MAX. SIZE: Largest vessel that can berth alongside Atlantic Quay, length 136 m., breadth 20 m., draft 7.2 m.
RADIO/VHF: Radio station extended from Aasiaat "OYR". VHF connection in Port Director's office. Radio technicians available, cable address "Polar Radio".
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Atlantic Quay, length 60 m., depth alongside 7.8 m., at average low water. Height of quay 2 m., above w/l. If berth occupied, loading/discharging of larger vessels at anchorage with barges. At Atlantic Quay there is a mobile crane with capacity of 10 tons and forklift trucks.
Offshore Quay: Length 20 m. with depth of 6 m. at LW.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable at Atlantic Quay.
FUEL: Arctic Grade obtainable at Atlantic Quay and Offshore Quay.
REPAIRS: Slip for small vessels (250 tons). Repairs possible to wooden ships. Machine shop available.
AIRPORT: Heliport.
GARBAGE DISPOSAL: Waste container available alongside. Emptying fee approx. DKr 538. Disposal arranged through Port Office.
WASTE OIL DISPOSAL: Not possible.
SEAMAN'S CLUBS: All seaman's homes in Greenland are open to seamen, tourists and local people alike. Alcohol is forbidden. The Sisimiut Seamen's Home can be contacted on Tel: 14150.
GENERAL: Post and cable offices. Telephones not normally available for connection on board, but vessels at anchor can call Port Director's office on VHF during daytime.
AUTHORITY: Kalaallit Niuerfiat, Frederiks den 9 Plads I, 3911 Sisimiut (Holsteinsborg), Greenland. *Tel:* 14044. *Cables:* Handelchefen Sisimiut. *FAX:* 14981. *Contact:* Handelchefen.

NOTES

Grenada

ST. GEORGE'S: 12.02 N. 61.46 W. (See Plan)

DOCUMENTS:

Port Authority: Arrival Report (Ship's Particulars).

Health Authority: Health Declaration, 1 Crew List.

Customs: Cargo Vessel:

Arrival Report.
Clearance from Last Port.
1 copy Crew List.
Crews Effects Declaration.
Ships Stores.
2 copies Cargo Manifest.

Passenger Vessel:

All of the above, except Cargo Manifest, plus Passenger List.

Immigration: Cargo Vessels:

2 copies Crew List.

Passenger Vessels:

2 copies Crew List.
2 copies Passenger List.
1 copy Nationality Breakdown List.
1 copy Information Sheet (Arrival Report).
2 copies Disembarkation List.

PILOTAGE: Compulsory for anchoring and berthing for vessels over 200 g.r.t. Notice must be given before 1500 hrs. for vessels requiring berthing between 1600 hrs. and 0800 hrs. the following day.

Pilot boards at Pilot Station 0.5 miles N.W. of the red flashing buoy.

ANCHORAGE: Vessels anchor in position 12° 03.3' N., 61° 46' W. or as designated by the Pilot/Port Authority.

RESTRICTIONS: Vessels are normally berthed between 0500 hrs. and 2300 hrs. Berthing and unberthing may be done in certain circumstances outside of the above hours.

MAX. SIZE: Single screw vessels up to 600 ft. LOA, approximately, depending on type and machinery equipment of the vessel, this size may be increased. Max. draft 28 ft.

VHF: 25 Watt base station – Grenada Ports Control (J3YA) Channel 16. Hours: 0800 – 1600 hrs., Monday to Friday.

Mobile station(J3YA) 5 Watt, Channel 16. Hours flexible but mainly limited from 0600 to 2200 hrs. Monitors Channel 16.

St. Georges Pilot (J3YB) Channel 16.

TUGS: Not available.

BERTHING: Length of berth 800 ft. Depth alongside 30 ft. (minimum). Berth owned by the Grenada Port Authority.

Berthing in hours of darkness is carried out if advice received before 1500 hrs. Palletised and container cargoes are loaded and unloaded by ship's gear.

CRANES: None.

STEVEDORES: Available.

MEDICAL: Doctor and general hospital available.

TANKERS: A tanker berth exists at the bulk storage terminal at Grand Mal, approximately 1.5 miles North of St. George's. Another terminal, Queens Park Terminal, exists 100 yards South of Green Bridge at the Northern limit of the town of St. George's. A minimum depth of 26 ft. exists between the mooring buoys at this Terminal.

Due to shallows, manoeuvring in the area of the Grand Mal Terminal is difficult and is not carried out during the hours of darkness. It is also not recommended to attempt berthing at the Queens Park Terminal during the hours of darkness due to lack of navigation ranges.

FRESH WATER: Available at an approximate cost of U.S.$5.0 per ton. Rate 10 t.p.h. (approx.).

FUEL: This can be arranged with sufficient notice (not less than 24 hours). Grade – Gas Oil 45 Cetane. Minimum supply 300 gallons.

SURVEYORS: Michael Forshaw and Allan C. Hooper, Windward Island Surveys, Tel: 440-2881 and 440-2444 respectively. Both act for Panama Bureau of Shipping.

AIRPORT: Air services provided by Leeward Island Air Transport (LIAT), British West Indian Airways (BWIA) and British Airways(BA). Daily flights by LIAT and BWIA and twice a week by British Airways and American Airlines to and from San Juan.

HOLIDAYS: New Year's Day, Corpus Christi, Independence Day (February 7th), Good Friday, Easter Monday, Labour Day (May 1st), Whit Monday, August Bank Holiday (Monday and Tuesday), Thanksgiving Day (October 25th), Christmas Day, Boxing Day.

TELEPHONES: Dock side telephone available on request from Grenada Telephone Company.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

CURRENCY: Eastern Caribbean Dollar (E.C.Dollar).

GENERAL: *Charts:* B.A. Chart No. 2830 (B.A. 799, B.A. 797 (Metric)).

SHIPMASTER'S REPORT: December 1989 (Updated 1996).

Charts: BA. Charts No. 2830 and 2821.

Berths: Texaco and Shell Oil Terminals.

Documents:

2 copies Crew Manifest.
2 copies Bonded Stores List.
6 copies Crew List.
3 copies Cargo Manifest.
1 copy Maritime Declaration of Health.

The port officials and the Pilot boarded off Fort St. George and leave the vessel at the berth. Ship's own forms are accepted. We tried to obtain Grenada forms for next visit but these were not available. The bond was not sealed.

Pilotage: Pilotage is compulsory for berthing at all berths and all oil moorings. Vessels are allowed to unberth from the oil moorings without a Pilot.

Pilotage normally available between 0600 hrs. and 2000 hrs., however the Pilot will berth vessels at night at Grand Mal and Kings Bay by special arrangement, in which case an early booking should be made through the Agent in order to avoid delays. The Pilot boards off Fort St. George or at Fort St. George Anchorage, from a launch with a blue hull and white superstructure.

Anchorage: Vessels anchor off Fort St. George in a depth of 5 – 7 fathoms with Fort St. George bearing 118° at a distance of 0.5 miles. There is often a large swell in this area.

Approaches: There is a shoal patch of 8.0 m. at low water on the approach to the Grand Mal moorings in position Lat. 12° 04.4' N., Long. 61° 45.2' W. (See "Plan").

Max. Size:

Grand Mal Mooring: Max. LOA 300 ft. Max. draft 22 ft. The depth at the mooring is 24.0 m.

Berthing:

Grand Mal: At Grand Mal, vessels with cargo for Shell and Texaco moor using the port anchor and stern lines to 2 mooring buoys. When the vessel is in the correct position she will be equidistant between white marker buoys on the port beam and the starboard beam. When moored, the vessel had 4 shackles out on the port anchor and the ship's head was 250°. In this position the port quarter buoy is abeam of the stern and the starboard quarter buoy is astern of the vessel, both buoys being 15 m. from the stern.

It is recommended that the vessel is heaved into position as close to the buoys as possible in order to reduce the length of hose required to reach the ship. The shore connection is approximately 210 m. from the stern.

A blue hulled boat with a powerful outboard assists with mooring and when not in use is normally secured at the Texaco landing stage.

Kings Bay: Shell operate a terminal at Kings Bay. The mooring consists of 2 stern mooring buoys. The mooring is just South of St. John's River and has a minimum depth of 6 fathoms. Ship's hoses are used at this terminal.

Loading:

Grand Mal: Texaco have facilities for LPG and white oils. The Texaco LPG capacity at Grand Mal is 100 tonnes in 4 tanks (2 × 694 bbls. and 2 × 534 bbls.). There are also tanks for propane (100 tonnes) and butane (116 tonnes). Gas oil, kerosene, aviation jet fuel and motor spirit are also handled.

Shell handle white oils but have no facilities for LPG.

Kings Bay: Used by Shell for the handling of white oils only.

Hoses: There is one undersea hose for LPG. The undersea hose for white oils at Grand Mal Bay is not used.

The ship's hose, with a length of 280 m. is run ashore to the connection between the Texaco and Shell facilities.

For communications whilst loading, Texaco use Channel 12 and Shell use Channel 9.

The rate of discharge for products is governed by the maximum rate possible for the ship's hoses.

General: The boatman was very helpful with running of stores and personnel from ship to shore.

Most U.S. and European food products and goods are obtainable.

The Airport (Point Salines) at Saline Point, on the South West tip of the island, handles both international and inter-island traffic.

SHIPMASTER'S REPORT: March 1990 (Updated 1996).

Berth: Shell Oil Offshore mooring at Queen's Park, St. George's.

Chart: British Admiralty Chart No. 797 (Metric).

Pilotage: Compulsory. Pilot boards off St. George's and is available during daylight hours only. If the conditions are good and the vessel is a regular trader, night time berthing may be considered.

If vessel shifts from Grand Mal to Queen's Park or vice-versa a pilot is required by legal by-laws.

Mooring: The mooring is located in position Lat. 12° 03.48' N., Long. 61° 45.43' W., off the entrance to St. John's River.

The vessel moors to 2 buoys aft and uses the vessel's starboard anchor with 4 shackles in the water. The vessel should be as close as possible to the port quarter buoy (South buoy) as there is less water near the starboard quarter buoy on account of silt from the river. The depth of the water at the stern is approximately 6.5 m.

The vessel sends a line to each buoy but if a heavy swell is running an additional line may be required to each buoy.

Cargo Operations: The mooring is used exclusively by Shell to supply gas oil to the Power Station, which is located in position Lat. 12° 03.9' N., Long. 61° 45.2' W. The connection is on the road side just North of the river mouth near the road bridge. The ship's floating hose is used to make connection and the pumping rate is approximately 650 bbl./hr. The capacity of the tanks at the Power Station is 6,000 bbls.

If VHF Channel 9 is not available on the ship, vessel is to land 2 sets of walkie-talkies for communications whilst discharging. One set is used at the road side connection and the other at the Power Station.

A representative of Shell boards at commencement and completion of operations.

Launch: Shell have their own safety launch which also serves Shell at Grand Mal. The launch acts as a mooring boat and will run crew to the nearest point ashore but will not run crew into town.

AUTHORITY: Grenada Ports Authority, P.O.Box 494, St. George's, Grenada, West Indies. *Tel:* 440-3439 440-3013, 440-3015. *Telex:* 2132 Min. *Cables:* Grenada Port Authority. *FAX:* 440-3418. *Contact:* Ambrose Phillip, General Manager. Ian Evans, Port Manager.

Guadeloupe

BASSE TERRE, Basse Terre: 15.59 N. 61.44 W.

(See Plan)

PORT LIMITS: 1 mile from pier.
DOCUMENTS:
6 Crew Lists.
6 Manifests.
Health Declaration Form.
6 Lists of Stores on board.
Passenger List.
6 Inward Declarations.
Clearance from Last Port.

PILOTAGE: Compulsory for vessels over 120 m. for entry, and over 160 m. for entry and leaving.

No Pilot Station in Basse-Terre. Pilot will come from Pointe-a-Pitre, so when vessel arrives, call "Basse-Terre Port Control" on Channel 16 or 12, and the Port Officer will give you instructions to follow. Vessels must wait for a Pilot about 1 mile from the pier. Pilot usually comes on board on the port side.

ANCHORAGE: On an 18 fathom bank North of the pier, 2 cables from the shore.

RESTRICTIONS: Vessel can berth and unberth at any stage of the tide, but if vessel's first call, recommend berthing during daylight only.

MAX. SIZE: Max. LOA 300 m. Max. beam 30 m. There is 32 ft. – 36 ft. alongside but an allowance should be made for a 3 ft. swell, therefore would suggest max. draft approx. 29 ft.

HEALTH: Authorities require 24 hours notice of the vessel's arrival.

RADIO: Fort-de-France, call sign "FFP" (high frequency).

VHF: Port Authority on Channels 16 and 12.

TUGS: Not available, however a small boat will assist in running lines if the Port Authority is advised in sufficient time on VHF Channel 16.

BERTHING: The extension is in operation. The old S.E. arm of the quay and was badly damaged in a hurricane of 1979.

The new quay is solid-filled and extends to a reclaimed shore thus providing considerable container stacking area. The berth is approximately 300 m. long and is well fendered with rubber fenders. Depth alongside 8.6 m. – 11.1 m.

Ro-Ro berth: Length 48 m., depth 5.5 m. – 8.0 m.

CRANES: 30 ton mobile crane available.
BULK CARGO FACILITIES: None.
STEVEDORES: Working hours: 0700 – 1100 hrs. and 1300 – 1700 hrs. Extension possible.
MEDICAL: Doctors and hospital available.
DENSITY: 1025.
FRESH WATER: Available. Rate 15 cu.m./hr. Cost 12.15 F./cu.m.
CONSUL: None, nearest consuls at Pointe-a-Pitre.
SURVEYORS: Bureau Veritas at Pointe-a-Pitre.
HATCHES: Opened and closed by crew.
REPATRIATION: Arranged by Agent.
AIRPORT: 60 km. Daily flights to Paris.
TIME: GMT plus 4 hours.
BANKS:
Credit Agricole, Cours Nolivos, 97100 Basse-Terre. Tel: 81.68.68.

Guam

GUAM (Apra Harbour): 13.26 N. 144.39 E. (See Plan)

DOCUMENTS: Guam is a United States Territory in the Western Pacific and official documentation is as for mainland U.S. ports, including visaed Crew List completed at port of departure prior to Guam. Vessels should have a stock of American Crew Lists Form I-148 and Form I-95A. The American Alien Crewman Landing Permit is acceptable and preferred. This is the plastic identification card previously issued on the U.S. coast.

Required on arrival:

Vaccination Cards.
Visaed Immigration Crew List.
4 Crew Lists.
4 Passenger Lists.
1 Stores List.
Clearance from last port.
Cargo Papers.

Have ready Immigration Form I-94 for each passenger and Form I-95 for each alien unless they have I-184 plastic Identification Card. Shore Passes not required. Crew Customs Declaration not required.

APPROACHES: Make for the unmarked approach point designated "AH" (Alpha Hotel) 2 miles from entrance at 13° 26' 8" N., 144° 34' 09" E. where Pilot boards, weather permitting. From position AH, the entrance range line is 084° with the leading marks in line. Because of depths, anchoring outside the harbour is impossible. If vessel must wait for the Pilot cruise back and forth in this area.

Port entry: On occasions, weather and sea conditions are considered unsuitable for Pilots to board outside. Under such circumstances vessel may be requested to proceed inwards and pick up the Pilot in the harbour area. The Harbour Master's permission for vessel to enter is mainly based on the traffic situation and does not necessarily take into account whether it is actually safe for vessel to enter under such conditions.It is not advisable to enter without a Pilot due to strong cross currents.

Pilots are very willing to assist arriving tankers and whenever the weather situation at point AH is prohibitive for boarding, they may request the Master to proceed Southwards in Agat Bay to look for a more sheltered boarding ground.

Before entering, the Harbour Master and the Pilot should be consulted to ensure that no outgoing traffic will be encountered in the harbour entrance. It is also advisable to obtain from the Harbour Master the positions of vessels which may be anchored in the harbour area.

Under the influence of N.E. Trades the prevalent set of the current (reaching 3 knots) off the entrance is to the South or S.W. regardless of the tidal currents. During the Summer months, when Westerly winds prevail occasionally, a Northerly set may be experienced (reaching 1.5 knots). The current velocity fluctuates during a daily period under the influence of tidal currents. Entry should be made during periods when cross currents are expected to be at a minimum. The Pilot should be consulted on this matter.

Strong cross currents may require an approach speed of up to 8 knots. In view of the relatively short distance from the entrance to the berth, the speed must be substantially reduced as soon as the influence of the cross current has subsided. In relation to this, the manoeuvring characteristics of vessel should be carefully taken into consideration.

Notice:

Issued by: Commander, U.S.C.G., Marianas Section.
Dated: 17th October, 1986.
Subject: SECURITY ZONE.

The Coast Guard has directed Naval Prepositioning Ships mooring in Apra Harbour to use Buoy 702* in Outer Apra Harbour and is establishing a security zone around this buoy and Naval Prepositioning Vessels moored thereto effective 17th October, 1986.

A 100 yard security zone has been established in all directions around Buoy 702 and Naval vessels moored there. When no vessels are moored to Buoy 702, a 50 yard security zone will remain in effect around the buoy itself.

The zone is established to safeguard Naval Maritime Preposition Ships against any possible destruction from sabotage or other similar causes.

Entry into the security zone is prohibited unless authorised by the Captain of the Port. Any person or vessel that enters the security zone without the permission of the Captain of the Port is subject to boarding search and removal from the area. Criminal penalties can be pursued against those on board.

*Buoy 702 is approximately 3.3 cables N.E. of the General Anchorage.

PILOTAGE: It is advisable to have on board U.S. charts for Guam: C & GS 4197 Apra Harbour. 4196 Guam Approaches.

Pilots are available 24 hours and are required on all vessels over 500 g.r.t. Pilots will board and disembark 2 miles West of harbour entrance at Point "Alpha Hotel".

ANCHORAGE: Harbour – range 084° True, 2 green lights. Strong set across harbour entrance, Navy recommends 10 knots entering. Quarantine Anchorage at Middle Ground, Outer Harbour, depth 45 ft.

Inner Anchorage: Tidal range in the harbour is about 2 ft. Currents are weak. Deep drafted vessels should exercise caution as to the patch indicated as "Middle Ground" and the 42 ft. patch situated Westward of "Middle Ground". On rare occasions vessels may be requested to anchor. In these instances, deep drafted vessels may use the Naval Anchorage between and to the North of Buoys 951 and 704. Officially, this anchorage is reserved for Navy vessels, however, the Navy has not objected to commercial vessels using this anchorage occasionally. Smaller vessels should have no difficulties in finding anchorage. In each case, anchorage location is determined by the Harbour Master in consultation with the Pilots. The bottom is mainly coral and is not a good holding ground.

MAX. SIZE: Max. LOA 230 m. (Berths "F4", "F5" and "F6"). Depth alongside Berth "F5" – 10.97 m. at HW.

Berth "F3". Max. LOA 182.80 m. Depth 9.75 m. at HW.

Max. beam for container vessels is 33.55 m.

RESTRICTIONS: The Harbour Master of the Port Authority of Guam, is in complete control of the approaches to Guam and it is essential to obtain clearance and permission to enter Guam from "Harbour Master" Port Authority, call sign KUF-810 at least 24 hours prior to arrival. Permission is readily granted with the condition to request permission again 2 hours prior to arrival at Guam. This time from Guam Control, call sign KUF-810 and NRV (USCG).

HEALTH: If from suspect port, Inspector boards at anchorage or at pier for thorough check. Inspector grants Pratique.

RADIO: Harbour Master Radio Station, call sign KUF-810 ship/shore watching 24 hours. Use of USCG Station "NRV" for best service if unable to reach KUF-810 due to limitation of range.

Notice to Ship's Agents: (20th August, 1980)

The Harbour Master's Control Tower is operating on a 24 hour basis. The following VHF frequencies are guarded and monitored:

156.8 MHz – Channel 16
156.6 MHz – Channel 12
156.65 MHz – Channel 13

In addition, Control Tower personnel will be monitoring S.S.B. with the following procedure:

2182.0 kHz continually.

4143.6 kHz – (4B). Every hour on the half hour for a period of 5 minutes.

8291.1 kHz – (8A). Every hour at 35 minutes after the hour for a period of 5 minutes.

12432.3 kHz – (12B). Every hour at 40 minutes past the hour for a period of 5 minutes.

The Port Authority solicits your co-operation in the matter of keeping the Harbour Master advised of all arrivals, departures, and other pertinent information whereby we may best serve the maritime industry.

VHF: Masters of vessels approaching should keep watch on Channels 12, 13 and 16.

TUGS: 6 tugs (1,200 h.p.) from 2 private companies available throughout 24 hours. Tugs can be contacted direct on VHF Channels 16, 13 and 19.

BERTHING: Vessels may berth port or starboard side upon request of the Master or Agent at "F3", "F4", "F5" except "F6" port side to, 1 large tug and 1 small tug normally used. Ship's gangway is required. Local information from Pilots states that after completion of Berth F-1 (Shell Oil Berth), a submerged wreck was discovered, said to be a 500 ft. long cargo vessel, and lies across and below the vessel in this berth, on the Eastern side of the jetty. It is advisable not to drop anchors – should they have to be used – until vessel has passed over the wreck. There have been instances of forward springs or breastlines becoming fouled in this wreck during operations.

Restricted Area: 800 ft. of berth space is temporarily unavailable at the F-5 and F-6 Piers.

"No lines allowed in fenced-in area between Red Tie Downs. F-4 Pier is the only available berth for all container vessels".

Note: Damage sustained to these two berths resulted from the 9th August 1993 earthquake that reached 8.1 on the Richter Scale. Repairs are scheduled to start in Summer 1996.

CRANES: 1 (Grove) × 140 ton, 1 (Hitachi) gantry crane × 40 ton, 1 (P&H) × 40 ton and 1×35 ton.

2 Paceco rail mounted container gantry cranes for handling 20 ft., 27 ft., 40 ft. or 45 ft. containers. 30 forklifts, capacity 3 – 20 tons, including a Hystainer with special spreader for handling containers.

TANKERS: *Mobil Pier:* Berth "G". Depth alongside 39 ft.

The terminal consists of a T-head pier, with 2 breasting dolphins. Head and stern lines are secured to shore-based bitts. No breast lines can be used. Therefore, caution should be exercised when off-berth winds occur.

The pier is within the blast zone of the Navy ammunition pier. When a vessel is working ammunition, or when ammunition is on that dock, U.S. Coast Guard will not ordinarily permit a vessel to lie at the Mobil Pier. If U.S. Coast Guard does give permission, U.S. Navy authorities require a "Hold Harmless" agreement before permitting vessel to berth at the Mobil Pier. To this effect the Agent assists and offers guidance.

Berthing: Vessels usually berth on port side. There are no particular difficulties with berthing a vessel but approach speed and impact on the dolphins should be kept to a minimum. 2 mooring launches are utilised. There are no capstans for hauling mooring lines.

Beam winds may affect vessels when alongside. Because of the lack of breasting lines, Northerly winds tend to push the vessel off the berth. Southerly winds cause excessive pressure on breasting dolphins when the vessel is in a light condition. Ballasting while discharging should be considered and Terminal operators will advise the Master on this. In case ballasting is necessary prior to completion of discharge, U.S. Coast Guard permission must be obtained.

Cargo Handling: Only refined petroleum products are handled at this pier.

Flexible rubber cargo hoses are used. No shore crane is available. Ship's manifold is to be ready with blanks removed and reducers rigged if necessary. Cargo booms should be operational prior to arrival, in order to lower the ship's gangway as soon as the vessel is secured to the pier. Different grades can be discharged simultaneously.

Shell Berth: Berth "F1". Depth alongside 55 ft.

The terminal consists of a T-head pier with 2 breasting dolphins at each end and 2 mooring dolphins on the West side.

On the East side there are quick-release hooks along the shore line. All mooring points are provided with quick-release hooks and capstans for hauling the mooring lines.

Berthing: Ships always berth port side to. Vessel is to proceed at slow speed towards the berth passing North of Buoy No. 2 (on some charts designated as Buoy RB "A") and East of the patch of 57 ft. reported in 1970. Tugs are in attendance. 2 mooring boats strong enough to handle (100,000 d.w.t.) wire ropes are available. Some difficulties have been reported when running lines ashore at the Eastern side since the mooring launch, because of shallow water, cannot get close to shore and rope pick-up winches at times are malfunctioning. Additional messenger lines are normally required from the vessel. The use of wires as headlines should be avoided.

Cargo Handling: Both crude oil and petroleum products are handled at this pier. For crude discharge 4×10 in. ASA hoses are used. Distance to tanks 7 miles. Ship's port side manifold to be ready with blanks removed and adaptors fitted if necessary.

Ballast/slop facilities are available and consists of 1×12 in. line of about 1,000 ft. long with a tank capacity of 80,000 bbls. The maximum acceptable quantity, however, is restricted to 50,000 bbls.

IMMIGRATION:

1. *Prior to Departure for Guam:*
   A. Visaed Crew List: Prepare 1 Crew List on U.S. Form I-418 and have it visaed by a U.S. Consulate at a port prior to Guam. Without this, crew shore leave may be denied.
   B. Passengers must have a valid Passport and also must have an appropriate U.S. Visa whether landing or not on Guam.
   C. Intransit passengers do not need U.S. visa if the Owners of the vessel have signed a contract called "Immediate and Continuous Transit Agreement" with the Commissioner of Immigration at Washington, D.C.
2. *Prior to Arrival at Guam:*
   A. Passenger List, Form I-418 prepare 3 copies of Passenger List on U.S. Form I-418 (for Immigration, Customs and Agent).
   B. Passenger Landing Card: Form I-94. Prepare or have on hand, 1 U.S. Form I-95A for each alien crew member. Not required if crew member is a permanent resident with U.S. I-184 laminated "Crewman's Landing Card". Not required of U.S.A. Citizens. Please present form I-95A in appropriate Seaman's Passport or Identification Book. Form I-95A can be used repeatedly for future arrivals of same crewman on same ship at any United States Port.
3. *Upon Arrival at Guam:*
   A. U.S. Federal Immigration Inspector boards upon arrival at pier, must see all passengers with their Passport and Form I-94 and all crew members with their passport or Identification Books and Form I-94A or Form I-184.
   B. Passengers and crew are required to be ready for inspection immediately upon docking at Guam.
   C. No shore leave and no visitors or stevedores may board until this Immigration inspection is complete. The Inspector will advise Master when he has completed his inspection of passengers and of crew.
4. *Prior to Departure from Guam:*
   A. Intransit Passengers: Pick up from intransit passengers the Form I-94 and hand to Agent before departing from Guam. These must be returned by Agent to U.S. Immigration as passenger departure records.
   B. Alien crew member joining at Guam: Pick up from them the Form I-94 which they used to enter the U.S.A. These must be returned to U.S. Immigration by Agent as permanent records.

SECURITY: Guam Government Official usually boards at pier, examines vaccination cards and inspects Steward's stores and slop chest. Also represents U.S. Customs. Requires 1 Crew List, 1 Passenger List, 1 Stores List, Clearance from last port, later issues new clearance from Guam which Agents bring to ship. Normally does not seal stores or slop chest.

MARINE GUARD: Required when docked at Ammunition Pier, requires 1 Crew List.

MEDICAL: Foreign ships use Guam Memorial Hospital or other clinics in town. American ships use U.S. Naval Dispensary in Harbour area, or in emergency U.S. Naval Hospital near Agana, 10 miles distant. Certificates required signed by Master. Patient returns to vessel by taxi at vessel's expense. Dispensary hours for merchant seamen Monday to Friday 0800 – 1200 and 1300 – 1600 hrs. At other times, if emergency, use the U.S. Navy Hospital. Doctors will not normally visit ships.

Dentists: Private dentists only. Usual hours 0900 – 1700 hrs., Saturday to 1200 hrs.

FRESH WATER: Very good, available any quantity, meter service.

FUEL: Marine Diesel Oil available by truck at any pier and by pipeline at Berth "F3". Black oil available by pipeline at Berth "F6". Both products also available by pipeline at Berth "F1" (Shell Pier) and the Mobil Pier. The distribution companies are Exxon, Shell and Mobil. Infrequent fuel delivery restriction occurs when ammunition vessel working.

REPAIRS: Commercial Yard and Casamar Yard available. Navy Yard, repairs by U.S. Naval Ship Repair Facility (SRF), subject to prior Navy commitments, and requires cash deposit in advance. Payment to be made for work done successfully or not. "No Cure No Pay" does not apply.

STORES: Available but considered expensive. Produce from U.S.A.; meats from U.S.A. and N.Z.; milk is recombined in quart cartons, white, chocolate or buttermilk. Order milk day prior to delivery; tropical fruits seldom available; ice in blocks or cubes. Prices wholesale, except under 1 case lots when at retail. Delivered to ship's gangway or hook.

LAUNDRY: Also dry-cleaning available 3 days service at U.S.A. prices. 1-day service extra. Delivered to ship's gangway or hook.

TIME: GMT plus 10 hours.

POLICE/FIRE/AMBULANCE: Ambulance U.S. Naval Dispensary, Harbour Area, Tel: 344-9351. Guam Civilian Fire, Tel: 911. Police – Guam Civilian Police, Tel: 472-8911. Port Authority Police, Tel: 477-2683. Naval Station Security (U.S. Naval Detachment) Tel: 339-4283.

BANKS: Bank of Guam, Bank of Hawaii, Citibank, First Hawaiian Bank, Hong Kong and Shanghai Banking Corp., Oceanic Bank and Union Bank.

GARBAGE DISPOSAL: Commercial Sanitation Services, P.O.Box 7243, Tamuning, Guam 96931. Tel: 646-1925/8642. Fax: 646-0120.

Regulated waste containers/dipsy dumpster.

WASTE OIL DISPOSAL: Energy Recovery Corp., P.O.Box 1265, Agana, Guam 96910. Tel: 472-2845. Fax: 477-8706. Collection/testing/disposal.

Unitek Environmental Services, P.O.Box 24607 MPO, Barrigada, Guam 96921. Tel: 565-3151. Fax: 565-3391.

SEAMAN'S CLUBS: United Seaman's Service, 695 Cabras Highway, Piti, Guam 96910. Tel: 477-6858. Fax: 472-2370.

CURRENCY: United States Dollars.

WEATHER: *Tropical Typhoons:* The Navy Fleet Weather Centre of Guam broadcasts typhoon warnings. Weather forecasts are good and reliable; however, due to the particular geographical position of Guam it is impossible to definitely determine the track of approaching turbulence. These turbulences usually generate a few hundred miles South or S.E. and may easily divert when passing near Guam. There are four typhoon warning conditions.

Condition 4:
Typhoon winds possible within 72 hours;
Condition 3:
Typhoon winds possible within 48 hours;
Condition 2:
Typhoon winds possible within 24 hours;
Condition 1:
Typhoon winds possible within 12 hours.

Typhoon season is June – December, but Condition 4 exists year-round.

In case of a typhoon warning, (condition 2) the U.S. Navy invites all Masters for a meeting to discuss the action plan for evacuating the port.

It is considered very dangerous to remain alongside or anchored within the port when a typhoon is approaching Guam.

SHIPMASTER'S REPORT: April 1987.

I was advised that Agents can obtain permission to enter Guam on behalf of the Master. If a ship is fitted with telex this saves time and money over the U.S.C.G. Station NRV.

On this occasion, the vessel was unable to raise KUF-810 until within VHF range. It was also noted that the Agency offices are in the same building as the Harbour Master. This Port Services Building also houses the U.S.C.G. and the Customs.

I was also advised that Daylight Saving Time is not being used by the present Administration, however the situation may change when a new Governor is appointed.

The 3 tugs in use are diesel electric, built in 1944 and estimated to be about 800 h.p. maximum. A tug of 1,700 h.p. is being sought at present.

This vessel used all 3 tugs when laden on a draft of 11.02 m. at the Mobil Pier - Berth "G". This pier is being renewed. At present the berth consists of 2 breasting dolphins only. The vessel used 3 × 6 in. floating hoses to discharge. No crew boats were available and a ship's lifeboat was used as a liberty boat. The new jetty should be in use in June 1987 according to the U.S.C.G.

Agent's name & address: Ambyth Shipping & Trading Inc., 1026 Cabras Highway, Suite 205, Piti, Guam 96925. Telex: (721)6405 AMBYTH GM. Fax: (671) 472 1264.

SHIPMASTER'S REPORT: June 1992.

A standard U.S. port complete with normal U.S. Immigration formalities. Wives of crew members are excluded from the visaed Crew List dispatched from loadport, and are treated as passengers.

Vessel's T.V.E.L. was valid and Coast Guard did not pay a visit. If requested, the pilot boards 2 miles outside the harbour entrance via tug. This is recommended, as there are strong cross currents running past the entrance from North to South. No real problems inside, except that for Shell "E" class size ships, the main part of the jetty is too long, inhibiting the putting out of standard moorings. The position of the spring hooks is too close to the position of the winches on board. Therefore springs had to be run from the forecastle and poop. The aft maindeck ropes were virtually useless, as they could not be led aft to the next dolphin along, due to the walkway linking the dolphins being in the way. Thus extra soft lines had to be put out from the poop.

Vessel discharged 3 grades concurrently, using 10 in. connections for D.P. Avtur and Premium U.L.G., and 8 in. connection for gas oil. The shore lines were 16 in. for D.P. Avtur and Premium U.L.G., and 24 in. for gas oil, all 6.5 miles long. Overall discharge rates achieved were approx. 650 cu.m./hr. for D.P. Avtur, 600 cu.m./hr. for Premium U.L.G. and 900 cu.m./hr. for gas oil.

AUTHORITY: Port Authority of Guam, Government of Guam, 1026 Cabras Highway, Suite 201, Piti, Guam 96925. *Tel:* (671) 477-5931/35. *Telex:* (721) 6689 Paggum. *FAX:* (671) 477-2689. *Contact:* Eulogio C. Bermudes, General Manager. Frank G. Santos, Harbour Master.

Guatemala

GENERAL

DOCUMENTS:

Consular Documents:

Masters are required to:

1. Obtain a health and clearance permit, issued by the competent authority at the last port of call, and certified by the Guatemalan Consul, and;
2. Submit 5 copies of a general manifest of articles carried to each port of the country, approved by the Guatemalan Consul at the port of loading, and also, separate copies of the manifest for in-transit articles unloaded.

If no articles bound for the country are carried, a ballast manifest should be submitted.

Prior to Arrival:

Arrival Notice:

There is no minimum period for advance notice of the vessel's arrival, because Authorities exercise a degree of flexibility. However, it is recommended that notice be submitted in writing to the following sometime in advance: The Captain of the Port, Customs Administration and Customs Supervision of Unloading, Migration Delegate, Maritime Health, Plant Health Delegate and Port Watch. Notification must also be sent to the following agencies of the Port Authority: Port Administrator, Office of the Chief of Operations, Office of the Chief of Docks, Import Division, Export Division, Invoicing Division, Container Section (if any) and Pilots Division.

Information on Cargo for the Port:

If the vessel carries cargo to be discharged at the port, the following information will be submitted to the Port Authority:

Stowage Plan.
Cargo Distribution List.
Heavy Cargo List.
Amount of Exports.

If containers are carried to the port, 8 copies of the list of container contents and 8 copies of the list of complete shipments and of mixed shipments (for more than one consignee) are to be submitted to the Container Section.

This information may be submitted upon the vessel's arrival, so that no delays in the work will be experienced for that reason.

On Arrival:

Type of Documents	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*Security*	*Maritime Health*	*Immigration*	*Plant Health*	*Port Authority*

(a) Delivered to Post Office.
(b) According to the number of stevedores requested, more than 2 copies.

Other Requirements:

Requests for permission to load and unload are submitted to Customs, each on stamped paper and also, when appropriate, a request for overtime work.

Prior to Departure: The clearance permit is requested from the Captain of the Port 4 hours in advance, after obtaining clearance from Customs, on a clearance permit application, which is submitted on stamped paper.

UNIFORMS: Vessels have been fined when officers have not been wearing uniforms when boarded by officials for clearance inward.

CHAMPERICO: 14.17 N. 91.55 W.

DOCUMENTS:

Clearance from Last Port.
Travel Memorandum (original and 4 copies).
Declaration of Maritime Health.
Derat Exemption Certificate.
5 Crew Lists.
5 Passenger Lists or "No passengers" Declaration.
5 Provision Lists.
5 Dangerous Cargo, inflammable or explosives declaration.
5 Mail Lists or "No Mail" Declaration.
Manifests of Cargo from each port (original and 11 copies).
Bills of Lading from each port.
Vaccination Certificates for whole crew.
12 Ballast Manifests, if no cargo on board.

PILOTAGE: None.

ANCHORAGES: Without limit but recommended *not to anchor* less than 1 km. from beach.

MAX. SIZE: Vessels work cargo at anchorage in depth consistent with vessel's draft.

HEALTH: Give notice of any suspicious illness or fever on board when the doctor comes for official visit.

RADIO: ETA cables through Cristobal (Panama).

VHF: Channel 16.

TUGS: No tugs required.

STEVEDORES: No advance notice necessary. Possible to arrange gangs within an hour.

MEDICAL: Adequate advance notice required depending on gravity of case. Hospital 30 minutes away and possible to arrange transport for patient, also to arrange for doctor on board. Crew must have current International Vaccination Certificates.

TANKERS: No facilities for tankers.

DENSITY: Changes from 1022 in October to 1027 in April.

FRESH WATER: Free within port limits.

FUEL: No facilities.

CONSULS: None.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available upon request.

OPENING/CLOSING HATCHES: Either by crew or by stevedores.

CUSTOMS ALLOWANCES: Without limit on board. Prohibited to take tobacco, wine or spirits ashore.

CARGO GEAR: Ship's gear used for loading/discharging.

REPATRIATION: All facilities available.

AIRPORT: International airport 3 hours distant with regular flights all over world.

TIME: GMT minus 6 hours. No alterations to clock during year.

HOLIDAYS: No work on 1st January, Maundy Thursday and Good Friday, 1st May and 25th December. The rest of the year work day and night.

POLICE/AMBULANCE/FIRE: All available.

TELEPHONES: Cannot be placed on the vessels.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

DELAYS: Some days in April and October the surge is very strong and work has to be suspended.

GENERAL: Possible to supply provisions, especially vegetables and shell-fish at good prices.

DEVELOPMENTS: Project to build a modern port with an entrance channel, artificial bay and capacity for 8 merchant vessels and facilities for fishing ships and tourist ships.

AUTHORITY: Empresa Portuaria Nacional de Champerico, 10A Calle 3-31, Zona 1, Guatemala City, Guatemala. *Tel:* 25-4-47, 85-2-16, 53-54-57. *Cables:* Epnac. *Contact:* Cnel. Antonio Batres Barreda, President. Gregorio Cifuentes, Administrator.

PUERTO BARRIOS: 15.44 N. 88.36 W.

DOCUMENTS:

Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List, 1 legalised and 7 copies or negatives.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List, 3 copies.
Voyage Memorandum, 4 copies.
Bills of Lading, 2 sets.
Declaration of Health.

PILOTAGE: Pilot boards 2 miles off Puerto Barrios, from small unmarked launch. If awaiting Pilot, vessel may anchor about 3 miles North of Puerto Barrios, keeping port entrance clear. No VHF.

ANCHORAGE: In Santo Tomas Bay, depths up to 6 fathoms.

MAX. SIZE: Length 600 ft., draft 30 ft.

HEALTH: Advise Agent in advance if any fever or contagious disease suspected on board. Otherwise Pratique granted on arrival. Officials board only between 0600 hrs. and 1800 hrs.

RADIO: Coastal radio in Costa Rica, call sign TIM operating on 8485 kHz.

TUGS: No tugs available.

BERTHING: One pier owned by International Railway used to discharge fuel oil. 1,000 ft. berthing length on each side. A flag is shown on the pier to indicate where vessel will berth. Berthing recommended during daylight hours only. Tankers discharge on South side of the pier.

See "Shipmaster's Report" at Santo Tomas de Castilla.

MEDICAL: Doctor available. All crew require International Vaccination Certificates.

FRESH WATER: Available at the pier.

FUEL: Not available.

CUSTOMS ALLOWANCES: Normal daily consumption on board. No tobacco, wine or spirits to be taken ashore.

TIME: GMT minus 6 hours; no alterations during the year.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

SHIPMASTER'S REPORT: March 1991.

Vessel: 27,500 d.w.t.

Pilotage: Pilot boards 4.5 miles off Puerto Barrios from a white pilot boat. Pilot ladder should be about 1.00 m. above water level. If awaiting Pilot, vessel may anchor about 5 miles North of Puerto Barrios, keeping port entrance clear.

Max. Size: Vessel touched bottom in the channel when proceeding to berth. Max. draft of the vessel was 27 ft. 11 in. in density 1014. Bottom was soft mud, and no apparent damage occured to vessel. Charterers had declared 28 ft. draft. Even while alongside, vessel was about 10 ft. off the jetty.

VHF: Santo Tomas Port Control on Channel 16.

Tugs: Two tugs available for berthing.

Berthing: At North and South Quay. White flags are still used to indicate berthing position. Vessels berth and unberth day and night, but with deep draft vessels, it is better in daytime only.

Fresh Water: Only available by trucks.
Density: Varies from 1000 – 1016.
Cargo Gear: No shore cranes available. Vessel had 22,000 tonnes of bulk fertiliser, and used her own cranes for discharge. Shore mechanical grabs were connected with cranes. Stevedores labour very careless in gear operation, so care should be taken.
Currency: U.S.$ 1.00 = 5 Quetzels.
Agents: Our Agent "Centrans" was very co-operative.

AUTHORITY: Commandante del Puerto.

PUERTO QUETZAL: 13.55 N. 90.47 W. (See Plan)

DOCUMENTS:

17 copies Cargo Manifest.
17 copies Cargo List.
17 copies Container List.
1 copy Clearance from Last Port.
7 copies Crew List.
6 copies Passenger List or "Nil".
5 copies Last 5 Foreign Ports of Call.
5 copies Stores List.
2 copies Arms and Ammunition List or "Nil".
5 copies Crew Effects Declaration.
2 copies Ship's Register.
2 copies International Displacement Certificate.
1 copy Health Certificate.
1 copy Vaccination List.
1 copy Derat Certificate.
1 copy Voyage Memorandum.
1 copy Notice of Arrival.

Also see "Regulations".

PILOTAGE: Pilotage is compulsory for all vessels berthing and sailing, but not for shifting.

Pilot Office: Tel: 0841-205. Fax: 0841-102.

ANCHORAGE: A vessel approaching from sea is permitted to anchor in front of the harbour not closer than 1 nautical mile without using a Pilot.

RESTRICTIONS: *Safe draft over the bar and channel:*

Maximum safe draft is 10.5 m. (34 ft.), the width of the channel is 210 m. (689 ft.).

Depth in channel and turning basin is 39 ft.

Docking of vessel at any time of the day: Docking is permitted by the Port Authority when the required documents have been presented and provided the vessel is to commence work. Vessels may dock at any time, but such movements are normally scheduled to fit in with time of granting of Free Pratique and of commencement of work.

Clearance of a vessel outward: This is normally signed by the Port Captain during hours prior to completion of work.

Restriction on sailing time: No restriction.

MAX. SIZE: LOA 210 m. Beam 32 m. Max. draft 10.5 m.

HEALTH: Free Pratique is normally granted all day, including Sundays and holidays.

Free Pratique at anchorage or at the wharf: Free Pratique is given either at the anchorage or after berthing. Where wharf space is available and vessels' documents have been presented, she would normally dock on arrival or at scheduled time for clearance, and receive Free Pratique at the wharf.

Free Pratique in Puerto Quetzal is granted when the party of officials visit the vessel to clear her inwards. These officials represent:

Port Captain
Customs Administrator
Port Health Authority
Quarantine Officer
Port Authority
Customs Guard (Guarda Hacienda).

A representative of the vessel's Agent is present and the offer of refreshments or soft drinks assists things along.

Where a vessel is cleared at anchorage, every effort should be made to lower a gangway, rather than expect the officials to use a pilot ladder.

In case the vessel does not have a Guatemala national flag aboard, a vessel would be well advised to cable his Agent to bring one to the vessel on arrival.

VHF: Channels 16 and 66 for Port Authority, Channel 16 for Pilots and Channel 8 for weather information.

TUGS: Tugs are compulsory for berthing and sailing, but not when vessel under 500 g.r.t. 1×650 h.p. and 1,260 h.p. tugs available.

BERTHING: Berthing facilities in Puerto Quetzal consist of one wharf of 800 m. (2,624 ft.) of length, 56 m. (184 ft.) width including a ramp of 30 m. (98 ft.) length and 25.5 m. (84 ft.) width for Ro-Ro vessels. Depth alongside 11 m.

Fenders: The 800 m. wharf has rubber fenders with approximately 2×1.2 m. (4 ft.) diameter, spaced at 20 m. (66 ft.)

CARGO OPERATIONS: Average outturn per hour based on modern type vessels with large hatches, good winches/cranes:

Containers 20 ft. or 40 ft.	12/15 units/hr.
Iron & Steel products	80 tonnes
Cement (bulk)	150 tonnes
Bagged sugar (conveyor belt)	430 tonnes
Grain	70/150 tonnes
General cargo	15 tonnes

These figures are subject to many variables, e.g. size of parcel, stowage, separation of marks, etc. Also when working iron and steel products pre-slinging would do much to assist.

Gear supply for handling cargo: The stevedore firms supply all necessary gear such as rope and wire slings, nets, forklifts of different sizes. Presently following forklifts in good condition exist: 14×2.5 tons, 11×5 tons, 1×10 tons, 1×14 tons, 1×36 tons, 1 for empty containers. 1×32 ton transtainer. 1×6 ton crane. 2×28 ton cranes (Caillard 400). 1×90 ton mobile crane. Many wagons and lorries also available.

STEVEDORES: Normal working hours 0600 – 1700.

Labour: Presently there are about 1,200 stevedores in the City of San Jose which is always sufficient.

The average gang has the following personnel:

General Cargo:		Containers:	
	14 stevedores		8 stevedores
	1 hatchman		1 hatchman
	1 winchman		1 winchman
	1 foreman		1 foreman

Change of gangs: The first shift of labour works from 0700 hrs. to 1430 hrs., the second shift from 1430 hrs. to 2130 hrs. and the third shift from 2130 hrs. to 0700 hrs. At midnight, there is a break of 30 minutes for meals (also 1200 hrs. – 1245 hrs. and 1800 hrs. – 1845 hrs.).

Advance notice to call a gang for commencement of work:

1. For the morning shift – Recommended to advise the night before, latest 2000 hrs.
2. During the day – 3 hours advance notice.
3. At night – Advise before 1700 hrs.

MEDICAL: Hospital facilities in Esquintla (54 km.) and Guatemala City (100 km.).

FRESH WATER: Available.

FUEL: Fuel oil, kerosene, diesel oil and gas oil available by road tanker from Esso and Texaco.

REPAIRS: Minor repairs possible.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register: Franklin Ltda. 12 Calle "A" 2-34, Zona 1, Guatemala City. Tel: 8-32-33, 53-68-26.

General Superintendence Co.: Centrans S.A. 6a. Ave 20-25, Zona 9. Attention: Mr. H. Preuss. Tel: 370134/35.

P & I Club's Representation: Ing. Jack Sigal, Torre Professional No. 1, Guatemala City. Tel: 531452.

Ing. G. Alvarado, American Bureau of Shipping, 9 Av. 12-53 Zona 1, Guatemala City. Tel: (502) 2-414457, 534438.

GANGWAY/DECK WATCHMEN: Private watchmen are available but are not compulsory for either on board or ashore.

Uniformed guards of the Customs Police (Policia de Hacienda) are stationed at the gangway free of charge.

However, it is recommended to keep vigilance to prevent cabins and storerooms, etc., being entered.

Vessels at anchor (however, presently there is no port congestion nor is any expected in the near future) should also keep a strict watch for boarders.

No meals are required to be supplied by vessels in Puerto Quetzal to Customs, guards or any other persons.

AIRPORT: Distance to local airport 8 km. Distance to international airport La Aurora in Guatemala City is 98 km.

HOLIDAYS: *Legal and Local Holidays:*

New Year's Day, from December 31st, 1430 hrs. until January 2nd, 0700 hrs.

Easter, from Thursday, 2130 hrs. until Saturday, 0700 hrs.

Labour Day, from May 1st, 0000 hrs. until May 2nd, 0700 hrs.

Christmas, from December 24th, 1430 hrs. until December 26th, 0700 hrs.

Due to the present situation (being a new harbour), the port works 365 days per year, however, this could change later.

GARBAGE DISPOSAL: Private contractor may be arranged through ship's agent.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No club but usual local facilities.

CURRENCY: Guatemalean Quetzales (Q).

GENERAL: *Charts:* B.A. Chart No. 659. Guatemala Charts No. 04 and 05.

REGULATIONS: The following is a translation from Spanish.

Operation Regulations for the Provision of Services in the Port of Quetzal:

Article 4: Programming Arrivals:

Eight (8) days prior to the end of the month, Ships' Agents must present in writing or by telex to the Commercial Department a programme with the approximate date of arrival of vessels for the coming month, and keep this programme up to date.

Article 5: Request for Guarantee Deposit:

Ships' Agents must request the Commercial Department for the amount of the guarantee deposit as established by Article 5 of the Government Agreement 469 – 90.

Article 6: Guarantee Deposit:

In exceptional cases, the guarantee deposit can be lodged at the Fiscal Treasury Office of the Port Services Division in Puerto Quetzal.

Article 7: Request for Services:

Ships' Agents must present to the Port Services Division the request for services 24 hours in advance of the arrival of the vessel, when she is coming from Acajutla or Champerico. When the vessel is coming from other ports, the Agent must comply with Article 6 of the Government Agreement 469-90, by means of the General Request for Services form. In both cases, Authority must be requested to contract a specific stevedoring concern.

Article 8: Authorisation of Request for Services:

The Request for Services will be authorised after it has been verified that the corresponding regulations have been complied with.

Article 9: Confirmation of Arrival:

Ships' Agents must submit in writing to the Port Services Division confirmation of arrival of their vessels 12 hours in advance, with the exception of vessels coming from Acajutla or Champerico, in respect of which confirmation may be given 6 hours in advance.

Article 10: Documents required prior to the provision of services:

Ships' Agents must provide in advance to the Port Services Division the following documents in an accurate and legible form:

(a) For imports of general cargo:
- 2 Stevedoring Stowage Plans
- 2 sets of Bills of Lading
- 2 Tally Books for each hold of the vessel to be worked and 2 for the office
- 5 sets of Cargo Manifests, 4 Lists of Direct Cargo.

(b) For imports of solid bulk cargo:
- 2 sets of Bills of Lading
- 5 sets of Cargo Manifests, 1 Stevedoring Plan, 2 sets of Tally Books per hold.

(c) For imports of containers and lorries:
- 2 Stowage Plans
- 2 sets of Bills of Lading
- 4 Container Listings (sequency lists)
- 1 Packing List per container
- 5 sets of Cargo Manifests

(d) Imports of Vehicles:
- 2 Stowage Plans
- 2 sets of Bills of Lading
- 4 Tally Books
- 5 sets of Cargo Manifests

(e) For exports:
- Complete Shipping Lists authorised by the Customs, 1 set per hold and 3 additional sets
- 4 sets of Export Manifests
- Container Lists – 1 set per hold and 3 additional sets.
- 1 Packing List per container.

Article 11: Period for delivery of documents:

Import documentation must be presented at least 3 days prior to the arrival of the vessel, the order for shipment and the list of containers to be loaded 12 hours prior to commencement of the operation, and the export manifest within 12 hours after sailing.

Article 12: Goods not covered by the manifest:

Discharge of goods which are not on the Manifest is not permitted without due written authorisation from Customs. Once discharge operations have been completed and not later than 12 hours afterwards, the Ship's Agent must present the corresponding additional manifest to the Port Services Division.

Article 13: Letter of Correction:

Where there are discrepancies between the Bill of Lading and the Cargo Manifests, the Ship's Agent must present to the Port Services Division a letter of correction within a period not longer than 24 hours after delivery of the documentation indicated in Article 10 of these regulations.

GENERAL: *Authorisation of lowering boat:* Lowering of boats requires permission which is normally granted by the Port Captain.

Regulations regarding explosives and ammunition at Puerto Quetzal:

Explosives and ammunition are only allowed to be discharged on a scheme whereby they leave the port area immediately and a notice of 24 hours should be given prior to arrival.

Cargoes remaining on board are not covered by any particular regulations.

Local guidance on stores and availability of items:

Deck Stores: The few available items are expensive.

Engine Room spare parts: Even well-known makes are almost non-available.

Lubricating Oils: The commonly used ones are available in small quantities, but special ones are not obtainable.

Stewards Department: Most dry stores are expensive with few exceptions and quantities are limited.

Fresh fruits, vegetables, seasonally available in moderate quantities, at reasonable prices, likewise fish, poultry, fresh beef and pork. (Beef bought in Guatemala is accepted as safe in the U.S.A., but not so the pork – confirm with respective Authorities.)

Laundry service: Available at a reasonable cost.

Radio/Navigational Aids: Spares are not generally available and service of a very limited nature only. Better service can be obtained in Guatemala City. (Each case should be investigated by Agent.)

Important: Ship's spare parts can be sent to a vessel calling at Puerto Quetzal by air – or by sea freight but care must be exercised in their addressing and marking, as otherwise local import duties may be imposed. All such items should be clearly addressed to the vessel, in care of the vessel's Agent, and must say the Spanish for "in transit", the phrase "EN TRANSITO". This ensures that the goods can be treated and may be exported on the receiving ship without problems.

Any such movement should always be co-ordinated with the local Agents, who should be kept fully advised of same.

SHIPMASTER'S REPORT: December 1984 (Updated 1996).

Limited operations commenced on 18th March, 1983.

Currently, services are provided with the following minimum organisation:

Port operations.

Maritime and Communication operations.

Financial and Administrative Services, and the additional personnel to provide other support services.

These offices operate in module buildings constructed for this purpose in the port area.

Services to Vessels:
- Right to berth.
- Aids to navigation.
- Service of pilot launch.
- Pilotage.
- Mooring, berthing, and vice versa.
- Stay in port.
- Anchorage.

Protection Works: The sheltered area is formed by a major (West) breakwater 1,140 m. long, the minor (East) breakwater 307 m. long, and a secondary North Dock with a length of 367 m. These works ensure a minimum of rough water inside the port and maximum safety for vessels.

Access Channel: The access channel to the dock provides safety and facilitates entry and leaving of vessels to and from the sheltered area. It has a minimum width of 210 m. and a depth of 12 m. at the lowest tide.

Manoeuvring Basin: This offers safety and facilitates manoeuvring of vessels. It is circular with a diameter of 400 m., and a depth of 12 m. at the lowest tide.

Berthing: The main quay, situated in the Eastern part, was planned as a multi-purpose terminal. It has a length of 800 m., and a free platform of 56 m. width. It includes a ramp 30 m. long and 25.5 m. wide, provided with two mooring devices at the sides with capacity of 100 tonnes, and with a predominant slope of one in ten for serving Ro/Ro vessels. It is located at the Northern extremity.

The whole quay is provided with rubber defences and bitts for mooring vessels. Its crown dimension is +4.5 m., and a depth of −11 m., giving a total of 15.5 m.

The South Quay has a length of 170 m., for berthing smaller ships. Its crown dimension is +4.5 m. and its depth is −5.2 m., giving a total of 9.7 m.

The Service Quay is 50 m. long and is for servicing small craft. Its crown dimension is +4.5 m. and its depth is −5 m.

Types of vessels handled:
- General cargo.
- Solid bulk cargo.
- Containers.
- Ro/Ro.
- Barges.
- Tourist passenger vessels.

Stevedores: Cargo handling services are provided by private concerns duly authorised by the Port Authority.

Ship's Agents and brokers arrange cargo handling with the stevedoring companies who in turn are authorised to provide such services.

The following services and direct cargo handling are available:
- Receipt and clearance.
- Loading and unloading.
- Handling on quay.
- Storage in the open.

Storage: It has been planned to place at the disposal of users a multiple use warehouse 90 m. long and 80 m. wide. This warehouse will have an area covered by metal structures and concrete walls, and fitted with fire-fighting equipment.

Attached to the warehouse will be a module housing the warehouse guard, Customs inspection, port checkers and wharfingers.

Airport: There is an airport with capacity to receive any type of commercial aircraft 8 km. away.

There is also the runway of the Aeroclub de Guatemala and the installations of the Tourist Complex of Likin.

General: Puerto Quetzal is a terminal of the system of inter-ocean communication with the ports of the Atlantic, which are 406 km. distant by road and 443 km. by rail.

The new port is reached by land via the asphalted highway CA9 at a distance of 110 km. from the capital. There is also rail connection, and both means of communication connect with the country's network of roads and railways. The motorway from Escuinta to Puerto San Jose has yet to be built.

SHIPMASTER'S REPORT: November 1990 (Updated 1994).

Tugs: There are 2 tugs. The "Santa Rosa" 800 h.p. and the "Contigo II" 600 h.p. They are included in the port charges. In effect, you pay for them even if you do not use them.

Fresh Water: Available alongside the pier at 25 t.p.h. (Cost U.S.$ 0.87 per ton). The connections are 2.5 in.

AUTHORITY: Empresa Portuaria Quetzal, 7A Avenida 3-74, Zona 9 (6o. Nivel), Ap. Postal 206-A , Guatemala City, Guatemala, C.A. *Tel:* 347101, 348133, 344859, 344860. *Telex:* UNECPU-GU 6134 Cuidad Guatemala. UNECPU-GU 6315 San Jose, Escuintla. *FAX:* 348152. *Contact:* Captain Mario Garcia Regas, General Manager.

SAN JOSE: 13.55 N. 90.50 W. (See Plan)

NOTE: Very little cargo handled. Vessels now proceeding to Puerto Quetzal.

DOCUMENTS:
- Clearance from Last Port.
- Crew List, 1 legalised and 4 copies.
- Passenger List, 1 legalised and 7 copies.
- Passengers in Transit List, 4 copies.
- Cargo Manifest, 1 legalised and 19 copies.
- Stores/Provisions List, 3 copies.
- Voyage Memorandum, 4 copies.
- Cargo Check Lists, 18 copies.
- Mail List, 7 copies.
- Bills of Lading, 2 sets.
- Baggage Declaration, per passenger, 4 copies.
- Declaration of Health.

PILOTAGE: Not required and no resident Pilots available, except for Tankers where services of a Pilot could be made available upon request.

ANCHORAGE: San Jose is a lighter port (open roadstead). Vessels anchor about 0.25 mile from pierhead in 8–9 fathoms of water.

RESTRICTIONS: Normally no pratique granted after 1900 hrs., although in some instances and if prior arrangements made, vessels could be received by Port Authorities up to 2300 hrs. Tankers moor in daylight only.

MAX. SIZE: Size immaterial since no docking facilities. Cargo transported from vessel to pier and vice-versa by means of steel lighters or barges of 35 tons capacity each. This applies to dry cargo only. Bulk, liquid cargo at respective terminals (oil and oil by-products, imports, and molasses export), where vessels proceed after pratique.

HEALTH: Pratique automatic (0700 hrs. to 1900 hrs.), irrespective of previous port of call. Master's obligation to notify Authorities on arrival of any suspected disease and/or fever on board, in order that adequate precautions taken.

RADIO: Messages should be routed via Guatel.

TUGS: None available or required for manoeuvring vessels.

BERTHING: New port 2 miles East of San Jose Pier (See "Puerto Quetzal.")

STEVEDORES: No gangs available after 2100 hrs., unless another vessel is working in port. Rate of discharge/loading – Dry cargo: 15-20 tons per gang hour. Max. gangs available: 3. Bulk cargo handled ten times faster.

MEDICAL: Hospital available. No vaccination/fever certificates required.

TANKERS: 2 buoy berths for tankers. Discharging lines 8 in. diameter. Esso Terminal: Mooring Master assists berthing. IRCA Terminal: Stern discharge. Also see "Shipmaster's Reports".

FRESH WATER: None available.

FUEL: None available.

CONSULS: All Consulates located in Guatemala City, where vessels' Agents, when and if required, have special documents legalised. Normally, however, Agents can take care of regular certifications required, through port officials, who are authorised to certify documents in absence of a consul of a particular nation.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: None required or necessary.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: On board, no restrictions; no crew member allowed to bring ashore more than amount required for personal use.

CARGO GEAR: Ship's gear used for loading and discharging dry cargo. Vessels must bring own lines to tie lighters alongside.

REPATRIATION: Possible. Usually arranged by Agents in cooperation with vessel's Agent in Guatemala City.

AIRPORT: Nearest airport Guatemala City, 108 km. due North of San Jose. Daily flights to and from all parts of world.

TIME: Central Standard Time, GMT minus 6 hours. No changes during year.

HOLIDAYS: January 1st; Holy Thursday; Good Friday; Easter Saturday; March 19th; May 1st; June 30th; July 25th; September 15th; October 20th; November 1st; December 24th; December 25th; December 31st.

POLICE/AMBULANCE/FIRE: These can be contacted through Agent at San Jose and/or Guatemala City.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Necessary for those on shore leave.

DELAYS: Only 2 dry-cargo vessels can work simultaneously. A third vessel must await departure of 1 of the first 2. Only 1 tanker can work at each bulk liquid cargo terminal.

SHIPMASTER'S REPORT: September, 1978.

Approach was direct from the Pacific. A good landfall was made. San Jose main Light was observed to be Isophase, rather than Occulting, every 20 seconds.

Anchorage: Vessel anchored in a position with the head of the Iron Wharf bearing 011°(T) – 8 cables. We lay to 4 shackles of cable on the starboard anchor, in 13 fathoms of water. Despite a considerable swell at times, the vessel did not drag her anchor. If anchoring, vessels do not take a Pilot.

Berthing: Ocean-going vessels and at times, due to the swell, almost any vessel, cannot berth alongside the wharf. While we were at San Jose a tanker of about 20,000 d.w.t. berthed stern-on with both anchors down, to load molasses.

I understand that, if no tanker is expected, general cargo ships are sometimes berthed in this manner. The tanker employed a Pilot.

Communications; If at anchor, it is best to keep radio watches and maintain long-range communications in this way. When working cargo, the Supervisor is in VHF communication with the Agents, but this facility is not available outside of working days.

Documents: As per "Guide to Port Entry". It was not possible to get any documents legalised prior to arrival, but this was arranged by Agents, as also was legalisation of documents for subsequent Central American ports.

Cargo Work: Continuous, weather and the supply of lighters permitting. There are only 3 general cargo gangs in the port and only 2 ships can be worked at a time. The first ship gets 2 gangs, the second ship 1 gang.

Many delays were experienced waiting for lighters, and 2 full days discharging time were lost due to the size of the swell.

This is not a very serious problem alongside the ship, but makes discharge of the lighters at the wharf impossible.

Rate of discharge of coiled steel rods was 55 tons per gang-hour, net of delays awaiting barges.

Pratique: Granted on arrival.

Provisions: Not purchased.

Fresh Water: Unobtainable at the anchorage.

Shore Leave: Permitted, but one has to take one's chances of getting a ride to and fro on the lighters. Not many people went ashore and fortunately none were stranded when work was suspended.

SHIPMASTER'S REPORT: February 1995.

Charts: B.A. Charts No. 659 and 1050.

Sailing Directions: NP 8, 4.73 et seq. and Guide to Port Entry 93/94, Page 784 and Plan P542.

Light List: NP 80 (3390).

Radio Signals: NP 286(3) (G1505).

Approaches: Straightforward. New harbour at Puerto Quetzal shows well on radar and tank farm (Shared by Texaco and Exxon) about 2 miles West of Puerto Quetzal is conspicuous. On this visit, none of the hills behind the coast were visible.

Agents advised by telex that the Pilot would board 1 mile off Puerto Quetzal.

Pilot was contacted on VHF at 30 miles.

On arrival, ship was boarded by a 9 men official party for clearance, which was accomplished in about 20 minutes. As the officials left, the Pilot boarded from a fast, new outboard motor launch, painted grey.

Pilotage: Straightforward. Molasses berth (Melazas Esquintla) is the one described in "Guide to Port Entry" and this description needs no additions. Ship was moored with 6 to 7 shackles on each anchor cable with 3 lines to each quarter buoy and one to the centre buoy.

Ship's crew connected hose.

4,000 tons of molasses was loaded at a rate of 745 tonnes/hr.

On departure, the Pilot was willing to leave the berth while cargo calculation was underway, which saved a little time.

Agent met the ship with documents during unberthing, and surveyors left while ship moved slowly towards Puerto Quetzal.

There are three other buoy berths one or two miles along the coast. One owned by Texaco, using 3 buoys; one by Exxon, using 5 buoys for larger ships; and one by Melasses de Pacifico. All are operated and equipped in a similar manner.

Additional Information: New port breakwater has disturbed the current along the coast and a development of new appartments (to the East) has been undermined by severe erosion of the beach and they are toppling into the sea.

There are occasional shipments of molasses out of Puerto Quetzal, loaded from trucks, with a consequent low load rate.

Operations were efficient and quick.

SANTO TOMAS DE CASTILLA: 15.42 N. 88.37 W.

(See Plan)

APPROACHES: As aids to navigation, there is a lighthouse at Cabo Tres Puntas, Ox-Tongue Lighthouse, Heredia Lighthouse, Villedo Lighthouse, the access channel together with the manoeuvring basin being marked by light buoys, driven by batteries recharged by solar energy.

Note: The channel buoys have been changed to the International Rules (Inbound starboard - green) with radar-reflectors placed on them (7 buoys).

Lighthouse: A radio-tower is located in Pto. Barrios with a visibility of approximately 20 miles (Fl. 10 sec.), well marked on the chart.

Chart: Approach to Santo Tomas de Castilla – U.S. Chart GUA 03 28165. 1st Ed. Jan. 84.

DOCUMENTS:

The following are the documents required from each port at which cargo is loaded for discharge in Guatemala, all to be in the Spanish language.

	In Advance	*On Board*	*Consularised*
Consular Clearance	—	—	—
Cargo Manifests, copy	—	35	1
Cargo Manifests, freighted	—	1	—
Copy Bills of Lading (not freighted)	—	3	—
Cargo Plans	—	3	—
Hatch List	—	3	—
Crew List	—	8	1
Stores Lists	—	8	1
Passenger Declaration*	—	8	1
Arms Declaration*	—	8	1
Mail Declaration*	—	8	1
Clearance from Last Port	—	1	—
Maritime Declaration of Health	—	1	—
Crews Personal Effects Lists	—	4	—

* Where these are negative, may be combined in one form.

Consularised documents may be put aboard the vessel, or sent with advanced documents. Above requirements do not include the Agents need such as distribution of Bills of Lading to customers and his own needs for accounting and files purposes. *Consularised documents are not necessary as the fine imposed locally consists of maximum quezales 40.00 per port,* as Guatemalen Consulates may not be at a specific port of loading or their offices are closed.

PILOTAGE: Compulsory for all vessels arriving, leaving and manoeuvring within the port limits and available 24 hours a day. Pilot is taken on board 3 miles off the quay.

The Pilot Station and the Control Office of Maritime Traffic of the Navy maintains listening on R.T. frequencies 2738 kHz, and Channel 16 VHF.

The pilot craft are painted white, flying a red and white flag by day, and red and white lights by night, they have VHF radio, but no radar.

The pilot craft base is the Santo Tomas de Castilla Quay, as well as the Pilot Station, and they will proceed to provide service once requested by the Ship's Agents.

The ladder for the Pilot to board must be positioned on the lee side of the vessel 1 m. above the water, but any alternative may be agreed between the Pilot and the Master of the vessel.

ANCHORAGE: Vessels with a draft up to 24 ft. can anchor about 1 mile to the North of Villedo Lighthouse, leaving the main channel free, but vessels drawing more water should anchor a little further away from the lighthouse.

The Pilots will anchor vessels with less than 24 ft. draft in the inner bay, i.e. nearer to the port, depending on the position of vessels anchored.

RESTRICTIONS: The channel has a depth of 30 ft., at the marginal quay there is a depth of 33 ft.

Docking/Undocking: Docking is permitted by the Port Authority when the required documents have been presented and provided the vessel is to commence work. Vessel may dock at any time, but such movements are normally scheduled to fit in with time of granting of Free Pratique and of commencement of work.

Once docked a vessel can stay at the wharf waiting for cargo during a longer period of time, for example overnight. However if space is needed to work another vessel with cargo available then the vessel losses its dock space.

There is no restriction on time of sailing.

Clearance is normally signed by the Port Captain during hours prior to completion of work.

MAX. SIZE: Max. draft 27 ft. – 30 ft. Max. LOA 750 ft.

HEALTH: Free Pratique is normally granted all day, including Sundays and Holidays.

Free Pratique is given either at the anchorage or after berthing. Where wharf space is available and vessels' documents have been presented, she would normally dock on arrival or at scheduled time for clearance and receive Free Pratique at the wharf.

Free Pratique in Santo Tomas is granted when the party of officials visit the vessel to clear her inwards. These officials represent:

Port Captain
Customs Administrator
Port Health Authority
Quarantine Officer
Port Authority
Customs Guard (Guardia Hacienda)

A representative of the vessel's agent is present and the offer of refreshments or soft drinks assist things along.

Where a vessel is cleared at anchorage, every effort should be made to lower a gangway, rather than expect the officials to use a pilot ladder.

In case the vessel does not have a Guatemala national flag aboard, a vessel would be well advised to ask his Agent to bring one to the vessel on arrival.

RADIO: ETA cables to Agent and Receiver made through Lantana Radio, Florida (WDE) in the U.S.A.

VHF: The distance at which VHF communication can be established with the Santo Tomas de Castilla Pilot Station is 16 nautical miles, i.e. the distance at which Cabo Tres Puntas (Cape Three Points) is from the port.

When the Pilot is manoeuvring, communication with the tugs is via Channel 12 VHF.

TUGS: It is compulsory to use at least 1 tug for any type of manoeuvre; depending on the size, structure, location where the manoeuvre is being executed, and the state of the weather, the Pilot will decide upon the use of a second tug. The port currently has available 3 tugs - 1×1,200 h.p., 1×1,100 h.p. and 1×700 h.p.

BERTHING: The quay is marginal with a length of 914.51 m., being divided into 6 berths of 152.40 m. (approx.) each. The depth of water alongside the quay is 33 ft., the water is saline, and for discharge and loading of goods, facilities are available for day and night work. The vessel's own gear and equipment is used, and in special cases shore equipment. It is necessary that prior to the arrival of the vessel's relevant and general information be provided regarding the cargo carried by the vessel, so as to allocate the corresponding berth, as well as equipment and storage warehouses.

CRANES: The port currently has 3 mechanical scoops (type P&H), 2 with a lifting capacity of 35 tons and 1 with a capacity of 7.5 tons. A mobile jib crane on rails capable of covering a distance of 400 m. approx., and with a lifting capacity of 30 tons. There is also a fixed crane with a lifting capacity of 50 tons. The Authority has no floating cranes.

The port can work conventional vessels, container and Ro/Ro ships, solid and liquid bulk carriers, and for operating solid bulk carriers, the Authority has a Buhler unit with a capacity of 100 t.p.h. discharge and mechanical scoops with grabs. Liquid bulk carriers visiting the port discharge and load products via tubes and hoses, conveniently installed along the quay.

SPECIALISED CARGO HANDLING FACILITIES: There are 4 berths for Ro/Ro vessels operation.

For handling container ships there is 2 Straddler carriers with a lifting capacity of 40 tons and stowage at 3 high, 2 Raygo-Wagner fork-lifts with 40 tons lifting capacity and stacking height to 3 high, 2 spreaders, 1 for 40 ft. and 1 for 20 ft. containers, 9 winches and 8×40 ft. platforms. 79 forklift trucks up to 8,000 lb. capacity. 15 reefer points available.

STEVEDORES: The Port Authority provides the stevedoring service in accordance with the applications for service submitted by port agents.

Labour:

(a) Amount of gangs available to work:
Presently there are about 2,000 stevedores in the City of Puerto Barrios (5 km. from Santo Tomas) which is always sufficient.

(b) Amount of stevedores employed in a ship's gang:

General Cargo:	14 stevedores
	1 hatchman
	2 winchman (even if only one is required)
	1 foreman

Container and Trailer vessels:
Same amount of men per gang, which can be used for different cranes/hatches at the same time.

(c) Change of gangs:
The first shift of labour works from 0700 to 1700 hours, the second shift from 1800 until 0600 hours.

Breaks for meals are as follow:

Breakfast	0600 - 0700 hrs.
Lunch	1200 - 1400 hrs.
Supper	1700 - 1800 hrs.
Break	0000 - 0100 hrs.

(d) Advance notice to call a gang for commencement of work:
1. For the morning shift - the day before lastest 1700 hrs.
2. During the day - 3 hours advance notice
3. At night - advise before 1530 hrs.

(e) Average outturn per hour based on modern type vessels with large hatches, good winches/cranes:

Containers 20 ft. or 40 ft.	8 units/hr.
Iron & Steel products	25-30 tonnes/p.h.
Iron & Steel Products pre-slung	60 tonnes/p.h.
Bagged cargo	20-25 tonnes/p.h.
Drums	20-25 tonnes/p.h.
General cargo	15 tonnes/p.h.

These figures are subject to many variables, e.g. size of parcel, stowage, separation of marks, etc. Also when working iron and steel products pre-slinging would assist.

MEDICAL: No advance notice necessary. Hospital facilities and ambulance service available. International vaccination certificate required.

TANKERS: Diameter of pipelines 16 in. and load/discharge lines 14 in. No slop discharge facilities. Only 1 mooring berth for tankers and max. draft permitted 30 ft. Also see "Shipmaster's Report".

DENSITY: 1015.

FRESH WATER: Pipe-lines alongside quay. Delivered by hoses belonging to port. Rate 15 t.p.h.

FUEL: Available by lorry no advance notice required. Products available: Fuel oil, kerosene, diesel and gas oil.

FIRE PRECAUTIONS: No specific precautions for tankers. Hydrants and fire brigade available to combat fires, besides tug's services and Coast Guard ships of Navy. Dangerous areas to be clearly signposted.

CONSULS: El Salvador, Germany, Honduras, Italy, Mexico, Netherlands and Sweden.

REPAIRS: Only minor deck and engine repairs.

SURVEYORS: Lloyd's Register in Guatemala City. Tel: 8-32-33, 53-68-26.

General Superintendence Co. Tel: 370134/35.

Jack Sigal (P&I Representative) Tel: 531452 in Guatemala City.

GANGWAY/DECK WATCHMEN: Private watchmen are available but are not compulsory. The cost is approximately Quetz. 1.50/hr. during the day and Quetz. 2.25/hr. at night.

Uniformed guards of the Customs Police (Policia de Hacienda) are stationed at the gangway free of charge.

However it is recommended to keep vigilance to prevent cabins and storerooms etc. being entered.

Vessels at anchor should also keep a strict watch for boarders.

No meals are required to be supplied by vessels in Santo Tomas for Customs, guards or any other persons.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No definite quantity and usually regulated by the Master.

REPATRIATION: Possible.

AIRPORT: In Puerto Santo Tomas de Castilla there is no airport. There is an airport at Puerto Barrios 8 km. away, and flying time from there to the capital, Guatemala City, is 45 minutes. There is no regular airline, but it is possible to hire air taxis.

TIME: GMT minus 6 hours.

HOLIDAYS: *Legal and local holidays:*
December 31st 1800 hrs. until January 2nd 0700 hrs. (New Year's Day); March 23rd 0000 hrs. until March 24th 0700 hrs. (Dignidad Nacional); Wednesday 1200 hrs. until Saturday 0600 hrs. (Easter); May 1st 0000 hrs. until May 2nd 0700 hrs. (Labour Day); June 30th 0000 hrs. until July 1st 0700 hrs. (Revolution 1871); September 15th 0000 hrs. until September 16th 0700 hrs. (Independence Day); October 20th 0000 hrs. until October 21st 0700 hrs. (Revolution 1944); November 1st 0000 hrs. until November 2nd 0700 hrs. (Saints Day); December 24th 1200 hrs. until December 26th 0700 hrs. (Christmas).

No work on Good Friday from 0600 hrs. until Saturday 0700 hrs. and December 24th from 1200 hrs. until December 26th 0700 hrs. with exception of perishible goods when the port can work on December 24th until 1800 hrs.

On all other holidays work can usually be arranged, with advance notice, and at overtime rates.

TELEPHONES: No facilities for placing telephones on board.

BANKS: Central Bank of Guatemala.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Passes issued to each crew member.

DELAYS: Maximum delays 3-4 days could occur at most 5 times during a year. Container vessels and reefer vessels have preference if they carry perishible cargo, same as vessels which carry coffee or load coffee with limitations in their sales-terms (L/C) such as 15th and end of a month.

GENERAL: *Dunnage Wood:* Dunnage wood is not available in the port however with enough advance notice it can be brought from Zacapa, approximately 150 km. (94 miles).

Local guidance on stores and availability of items:

Deck stores: The few available items are expensive.

Engine room spare parts: Even well-known makes are almost non-available.

Lubricating oils: The commonly used ones are available in small quantities, but special ones are not obtainable.

Stewards department: Most dry stores are expensive with few exceptions and quantities are limited.

Fresh fruits, vegetables: Seasonally available in moderate quantities, at reasonable prices, likewise fish, poultry, fresh beef and pork. (Beef bought in Guatemala is accepted as safe in the U.S.A., but not so the pork – confirm with respective authorities).

Laundry service: Available at a reasonable cost.

Radio/Navigational aids: Spares are not generally available and service of a very limited nature only. Better service can be obtained in Guatemala-City. (Each case should be investigated first by Agent).

IMPORTANT: Ships spare parts can be sent to a vessel calling at Santo Tomas de Castilla by air or sea freight but care must be exercised in their addressing and marking, as otherwise local import duties may be imposed. All such items should be clearly addressed to the vessel, in care of the vessel's Agent, and important to state the Spanish for "in transit" the phrase "EN TRANSITO". This ensures that the goods can be treated and may be exported on the receiving ship without problems.

Any such movement should always be co-ordinated with the local Agents, who should be kept fully advised on same.

Regulations ruling explosives and ammunition at port:

Explosives and ammunition are only allowed to be discharged on a scheme whereby they leave the port area immediately and a notice of 48 hours should be given prior to arrival.

Cargoes remaining on board are not covered by any particular regulations.

Before working a vessel the Port Authority requests a deposit from the Agent, based on a Proforma. This is calculated by the manifest of inbound cargo and the expected exports. Without this deposit the vessel is not allowed to work.

SHIPMASTER'S REPORT: 1976

Approaches: No difficulty once position is ascertained approaching the Gulf of Honduras. The Pilot boarded 3 miles North of the Villedo Shoal Beacon. Pilots have VHF Channel 16 call Porto Barrios Pilots. Only 1 pilot speaks English so if he is on duty there is no difficulty in communications.

The lights on the approach beacons are said to be unreliable but all were found to be good radar targets.

At the present time a dredger is working on a new approach channel to give a 32 ft. buoyed channel past Puerto Barrios up to Santo Tomas de Castilla.

General: The area is still recovering from the severe earthquake some 8 months ago in which the finger pier at Puerto Barrios was destroyed. This now constitutes a submerged hazard while in the channel on the approaches to Santo Tomas de Castilla. The channel is poorly marked and at present there are numerous survey buoys which can be confusing.

The berth is stern to at the Eastern end of the cargo jetty at Santo Tomas using 2 anchors and backing up to 10 ft. off the jetty from where the hose is passed up to the stern line by a mobile crane. The connection is made by the ship's crew. There is a 1 × 8 in. hose for all grades into a 10 in. shore line which is approximately 5 km. long. The requested back pressure of 8.5 kg. was easily maintained using 2 pumps.

AUTHORITY: Empresa Portuaria Nacional – Santo Tomas de Castilla, *Tel:* 0480060, 0480611, 0480588, 539098. *Telex:* Stomas GU 719. *Contact:* Dollfus O. Sagastume, Director – Port Administration.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Guinea

CONAKRY: 09.31 N. 13.43 W. (See Plan)

DOCUMENTS:
6 copies Crew List.
6 copies Passenger List.
2 copies Stores List.
2 copies List of Medicines and Drugs.
2 copies List Crew Declaration (personal effects).
7 copies Manifest of Cargo (if any).
Port Clearance from last port of call.
2 copies List of Dangerous Cargoes (if any).
3 copies of Bills of Lading for LCL - Containers.
2 copies of Loading Plan.
1 copy Derat Certificate.
3 copies List of Weapons and Ammunition (if any).

Documents to be presented on request:
Log Book
International Health Certificate.
Seamen's Books.
References for Port State Control.

PILOTAGE: Compulsory for all vessels over 20 m. in length. Pilot meets vessels at Conakry Buoy (Lat. 9° 27.3' N., Long. 13° 44.05' W.).
Advise Port Captain of ETA by Telex No. 22276 PAC GE.

ANCHORAGE: Safe deep anchorage in inner and outer roads.

RESTRICTIONS: Tankers taken in/out during daytime only. Exceptions during night-time are considered on special application, to be rendered to Port Captain.
The entrance channel is 150 m. wide and has a depth of 9.5 m. (LLW).

MAX. SIZE:

Bulk carriers for alumina:	518 ft. length.
Bulk carriers for bauxite:	655 ft. length.
Tanker for crude oil:	655 ft. length.
Tankers for light fuel:	518 ft. length.
Other vessels (Ro/Ro, Container, Conventional, etc.):	655 ft. length.

HEALTH: Valid yellow fever inoculation certificates.

RADIO/VHF: Conakry Radio 2182 kHz and 2586 kHz and VHF Channel 16.

TUGS: 2×1,400 kW. tugs (27 tons bollard pull). Tugs are compulsory for all vessels over 50 m. LOA. Tugs normally connect to starboard side. Ship's lines used.

BERTHING:

Berth No.	Length (m.)	Dredged Depth (m.)	Priority Use
Container Terminal	269	10.5	Container Vessels
00-01	350	10.0	Alumina/Refrig.
02-05	480	8.0 - 8.5	Commercial Piers
06	155	7.0	Barge Landing
07	160	8.0	Fish Jetty
08-09	300	11.0	Bauxite (OBK)
10	190	10.0	Oil Jetty

Note: Depths refer to Port Zero (lowest low water).

STEVEDORES: *Working Hours:*
1st shift: 0800 hrs. to 1800 hrs.
2nd shift: 2000 hrs. to 0600 hrs.
Overtime: Any work on Saturdays, Sundays and Holidays are subject to following overtime surcharges:
1st shift: 0800 hrs. to 1800 hrs. + 60%.
2nd shift: 2000 hrs. to 0600 hrs. + 100%.

MEDICAL: Advance notice recommended. Medical service and hospital facilities available.

TANKERS: Berth No. 10: Length 190 m. Depth 10.0 m. Berth is being equipped with new shore connections.

DENSITY: 1016 in the port with particular relation to state of tide.

FRESH WATER: Available.

FUEL: Light diesel available, subject to prior arrangement.

FIRE PRECAUTIONS: Special fire service for tankers and ships carrying IMDG – goods..

United Kingdom

REPAIRS: Minor repairs possible.

DRY DOCKS: One floating dock with lifting capacity of 700 tons.

GANGWAY/DECK WATCHMEN: Compulsory and arranged by vessel's Agent.
Note: The port employs a large number of trained security personnel which is partly uniformed. In case of need Master may contact the Co-ordinator of the "C.U.S.P.".
Piracy: Despite efforts undertaken by the Port Authority and other local authorities to eliminate piracy, Masters are well advised to protect their vessels and cargoes against attempted theft.

OPENING/CLOSING HATCHES: Normally by crew. Stevedores if requested by Master.

CERTIFICATES: Derat Certificate, Log Book, International Health Certificates of Crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes out of bond. Wine and/or Spirit, 1 litre of spirit and 1 litre of wine per day out of bond.

REPATRIATION: All facilities exist for effecting crew changes and arranging repatriation to Europe and other places.

AIRPORT: International airport Gbessia about 15 km. distance from port. International connections via Air Afrique, Aeroflot, KLM, Sabena and UTA. Local connections are offered by Air Guinee and others.

TIME: GMT.

POLICE/AMBULANCE/FIRE: Contact Harbour Master.

TELEPHONES: Not possible to place telephones on board except at Berth No. 9.

SERVICES: None.

HOLIDAYS: New Year's Day (1st January); Easter Monday; Labour Day (1st May); Anniversary of 2nd Republic (3rd April); Liberation Day (25th May); Assumption (15th August); Independence Day (2nd October); Christmas (25th December).

Varying holidays which depend on the position of moon: Ramadan – End of fasting; Tabaski – Pilgrimage Day at Mecca; Mahouloud – Day after Prophet Mahomed's Birthday.

Work during holidays available, but subject to negotiation with stevedores.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Seaman's Book necessary.

CURRENCY: Franc Guineen.

SHIPMASTER'S REPORT: February/March 1992.
Agent: Office hours: 0800 – 1200 and 1300 – 1630.

The Agents will occasionally use the Port Control VHF to contact vessels at anchor.

Weekends: From 3rd February 1992 official weekends are from 1200 hrs. on Friday to 0800 hrs. the following Monday.

Currency: The Guinee Franc, exchange rate in February 1992 was quoted by the Agent as 800 = U.S.$ 1.00. Rates of between 750 and 900 can be obtained ashore, and the U.S. Dollars are generally acceptable.

U.S. Dollars were obtainable from the Agents, but were a long time in coming forth.

Communications: Generally poor. The local coast radio station operates infrequently. The vessel was answered by Port Kamsar Radio, but they will accept messages for that port only. VHF communication with the Port Control is possible, but often it takes a long time to get a reply. The Port Control and Pilots will often request vessels at anchor to contact vessels approaching the port for ETA.

The Pilots work on VHF Channels 10 and 12, but do not have a very good transmitter, and messages may be relayed through the Port Control.

Approaches: B.A. Charts No. 601 and 395.

Approaching from the South, Iles de Loos are easily identified on radar, and in clear weather Boulbinet Lighthouse, white tower with red top, is conspicuous by day, but at night is not easily seen against the background lights when close to the 014° bearing, and it was noted as occulting 20 seconds in early February and occulting (2) 10 seconds in late February and March. Except for the 014° bearing, the red and white sectors were not verified.

Ile Tamara Light was as charted.

The beacon on Pte. du Tonnelier was not seen.

The light fl. 6 short and 1 long has been re-sited on the end of the South Breakwater, and has a period of 15 seconds. This light is shown from a lattice tower with topmark 2 cones point down and a yellow and black square at half height of the tower.

The works in progress at the South Breakwater head do not seem to have progressed, except for re-siting the light, and if anything has been done, it is all below water.

Buoys: The buoys were found to be generally within one cable of the charted positions and all are fitted with lights, the characteristics were not verified.

On berthing, Buoy No. 8 was missing, but had been replaced out of position, closer to mid-channel.

Buoy No. 5 was towed in damaged and replaced by an unlit float.

By departure in mid-March, Buoys No. 5 and 8 had been replaced in position, but the Fairway Buoy had been towed in for repair and was replaced by the unlit float.

The Southerly BYB Buoy in the harbour was unlit.

All buoys are pillar buoys, red to port and green to starboard inbound.

The work of replacing the buoys was carried out by the contractors who are carrying out works in the port.

Anchorage: Vessel anchored with Pte. du Tonnelier bearing 340°×2.25 miles, in company with other vessels in the general vicinity and lay comfortably with 5 shackles in 17.0 m.

Anchorage was changed at the request of the Port Control, shortly before berthing to be ready for the Pilot, and a position 3 cables S.W. of the Fairway Buoy was chosen. In this position, there was 4.0 m. underkeel clearance at low water with a draft of 8.8 m.

Later the vessel was anchored by the Pilots, 3 to 4 cables S.W. of Buoy No. 4 and had 2.0 m. underkeel at 7.3 m. draft, although there would appear to be more water to the West of the buoyed channel than charted, it is not recommended to anchor here without local knowledge.

Pilotage: The Pilot boards from a large launch in the vicinity of the Fairway Buoy, and will board at anchor if the vessel is close to the buoy.

Communications are not the best, and the vessel was advised that we would take the Pilot after a ship had sailed. However two vessels sailed before the Pilot boarded, and a third vessel sailed before we were able to pick-up the anchor. It is as well to remain anchored until the Pilot boards, as there is not room to pass in the channel.

Pilotage is on a 24 hour basis and not restricted to daylight hours. The Pilot will leave on departure at a convenient position in the channel.

The Pilots request meals.

Depths: The Pilot confirmed that the depth was as charted, and a minimum sounding, at high water on a 3.3 m. tide with a draft of 8.8 m., of 3.0 m. was obtained in the buoyed channel.

Berths: The area noted on the chart as being reclaimed has almost been completed as a container berth, some work remains to complete the paving at the landward side. This new berth has good fendering on the face and a bollard spacing of approximately 15.0 m., except at the Southern end, where there is a large gap in the bollards after the first two for Ro/Ro stern ramp.

This berth was due for completion in March 1992 and is not yet in use although to all appearances is completed.

Berth No. O is reserved for loading alumina. The dust from this berth, when a vessel is loading, is very heavy, and with the wind off shore will obscure the port entrance. When this vessel berthed with a Southerly wind blowing, it was not possible to see the forecastle from the bridge at 147.8 m. Alumina pollution covers the dock in a decreasing quantitiy up to Berth No. 4, as it indeed also covers most of the city, including the tourist hotel and Government buildings.

Berth No. 1 is used for discharging bulk cargoes, mainly cement clinker, and also for general cargo and containers. There is a conveyor system on this berth for carrying cement clinker direct to the storage shed, and cement vessels take priority.

Berths No. 2 to 4 are for general cargo and containers, on this occasion Berth No. 4 was occupied by the mission vessel "Anastasis".

Berths No. 5 to 7 are for small crafts, fishing vessels, etc. with a small area reserved for naval gun boats and repairs with a small floating dock for fishing vessels.

Berth No. 8 is for loading bauxite, and Berth No. 9 for tankers.

Bollard spacing on Berths No. 0 to 4 is approximately 24.0 m. with some removed for Ro/Ro ramps. Fendering is poor with an occasional old tyre hanging from the odd bollard.

There are no cranes on the berths and no provision for cranes on the new berth.

Berth numbers are taken from the B.A. Chart and may not be the same numbers as used by the Port Authority.

Port Congestion: Of a total of approximately 1,550 m. of deep water berth, 320 m. are not due for use until March 1992, 200 m. are reserved for alumina loading and the amount of alumina on the dockside makes this berth unsuitable for any other cargo. 180 m. are given priority for cement clinker discharge and 300 m. are reserved for bauxite and tankers. The remaining 370 m. are available for other cargo vessels, with container vessels taking priority, and vessels already on the berth are required to move off to accommodate them.

Inevitably there is a considerable amount of delay time involved for general cargo working.

Port Officials: Customs, Immigration, Port Health and Port Authority (10 or more persons) board the vessel on berthing. Soft drinks and beer are required by all.

Formalities are generally easy going and informal provided the entertainment is acceptable, and searches were not carried out.

It is as well to have a supply of cigarettes on hand for Port Officials, Port State Inspectors and Radio Inspectors, who will board the vessel during the first working period after berthing.

Port State Inspectors require all certificates including Officers Certificates of Competancy and query any minor differences in documents.

The Radio Inspector requires all publications to be up to date including the I.T.U. Manuals.

Pirates: Whilst at anchor, a number of traders approached during daylight, but did not attempt to board, and went away when given no encouragement to do business.

At night two of the occupants of a canoe boarded by climbing the anchor cable and unscrewing the hawse pipe cover, but left empty handed when challenged by the ship's watchmen, and a second canoe left when ship's staff appeared above them.

Storerooms were welded up on arrival, and after the first boarding, hawse pipe covers were welded in place.

Alongside the Berth: During cargo working of any vessel and particularly rice vessels, a large amount of traders gather round the discharged cargo and in spite of watchmen employed by the stevedores and port police, a good quantity is spirited away. It is not uncommon for the police and watchmen to be mobbed by the crowd and even man-handled when they attempt to stop some of the thieves.

Theft in the docks is considerable and especially when the small local ferries, which attract an even larger crowd than other vessels, are alongside, it is not safe to walk on the dock if one is carrying anything worth stealing.

At night when no cargo is being worked, it is fairly safe to go ashore to the gate to take a taxi into town, but there will always be some risk.

It is also unsafe to walk in town, even in daylight.

Shore Passes: The practice is for crew members to take their passports ashore and exchange them with the officials at the gate for shore passes.

This was not explained to the vessel on arrival, as when passes were requested we were told that they were unnecessary. This appeared to be the case until after a month in the port, with crew members regularly going ashore without being stopped, a group of four seamen were stopped returning to the vessel, and when requested, handed over their passports to the Officials who then refused to give them back until some money had changed hands.

This is the practice for most minor infringements of regulations with always the threat of long delays if the official channels are followed.

Fresh Water: Available from the dock, but the pressure is very low and, I feel, that only the threat, that the vessels would be unable to move off the berth if required, provided any water at all.

Deep sea vessels provided with fresh water were supplied through a meter, whilst regular small fishing vessels and ferries were supplied direct from a stand-pipe which would indicate that if water is required, some money should change hands. No guidance was given on this point by the Agents. Quality is poor and not recommended.

Garbage Disposal: This service is available and generally unofficial. At a cost of U.S.$200.00, the vessel was kept garbage-free and sanitary for the 39 days stay by the same man who was able to supply only a small quantity of fresh water.

Pollution: During the dry season all berths are subject to a considerable quantity of dust from the alumina berth and the cement clinker berth.

Throughout the vessel's stay there was a continuous heavy oil slick on the surface of the water.

This oil slick may have come from a vessel which was reported to be a fishing vessel, which was lifted from the water on the corner of Berths No.7/8 in the hours of darkness, by an extremely large floating crane, as after this had left, the quantity of oil seemed to be reduced.

No attempt had been made to contain or clean up the slick.

Cargo Working: Discharging 10,900 metric tonnes of bagged rice was intermittent as vessel had to wait for Bill of Lading to be produced.

Normal working hours are from 0800 – 1800, and on a good day it would be possible to obtain 37.5 tonnes per gang hour. In practice a rate of 25.34 tonnes per gang hour was achieved.

Rice is an important commodity in Conakry and everyone considers it their right to take some.

In spite of port watchmen and watchmen employed by the stevedores, a considerable quantity is lost, and it would appear that there is a well organised system for stealing loose rice. Every endeavour was made to stop the theft of complete bags and mostly only loose rice was lost.

General cargo and bulk vessels do not appear to be worked during the hours of darkness, but container vessels are worked round the clock.

Ship Chandlers: There are 2 chandlers in the port and although the price list for the one used was lower than the other, service was not particularly good.

Prices of all stores and provisions are high and quality is not very good.

Deck and engine stores are available but prices are very high for these items and should be avoided.

SHIPMASTER'S REPORT: December 1994.

Anchorage: The anchorage is near the Fairway Buoy. At night-time, vessel should weigh anchor and proceed 20 miles offshore and drift with only navigation lights on.

Watchmen: When alongside, vessel should employ 10 watchmen. All doors should be locked and welded where possible. All lifeboat equipment and electric plugs and anything else that is moveable should be locked away.

Berthing: No fenders at Alumina Berth (Berth No. 0-1).

Radio: No communication with Conakry Radio. Only the Pilot's VHF is operating (occasionally).

Cargo: Discharged 15,000 tonnes of caustic soda at maximum pressure of 3 kg. – 4 kg. The hose was in bad condition.

Note: The shore personnel have to be very careful because if the caustic soda comes into contact with their skin it will bleach it.

AUTHORITY: Port Autonome de Conakry, B.P. 805, Conakry, Republic of Guinea. *Tel:* (224) 44.27.37. *Telex:* (0995) 22276 PAC GE. *FAX:* (224) 44.45.64. *Contact:* Bangaly Camara, Director General. Captain Sayon Oulare, Port Captain.

AGENT: Socopao Guinee, Immeuble Zeidan, Boulevard du Commerce, Quartier Almanya, B.P. 3339, Conakry 1, Guinea. Tel: (224) 444233, 414313, 413401. Telex: (0995) 22131 Freight. Fax: (224) 412803, 413764. Cables: Freight Conakry.

PORT KAMSAR: 10.39 N. 14.37 W. (See Plan)

DOCUMENTS:

2 copies Narcotics List.
1 copy Vaccination List.
6 copies Crew List.
6 copies Passenger List.
1 copy Crew Declaration (Personal effects) List.
1 copy Stores List.
3 copies Last Ports of Call List (Inward cargo vessels only).
12 copies Manifest of Cargo (Inward cargo vessels only).
2 copies Bill of Lading (Inward cargo vessel only).
Notice of Readiness (Ore Carriers only).

To ensure the best possible turn-round for general cargo vessels complete sets of the required cargo documents should be made available to the authorities by hand of the Master. Delays have been occasioned by the late arrival of documents sent by post. It would be of help for the Master to send hatch distribution and the amount of refrigerated cargo if any, at the same time as ETA.

Quarantine, Immigration and Customs: Representatives of the departments board after the vessel has been made fast alongside. The Quarantine Flag "Q" should be flown by arriving vessels.

ARRIVAL ADVICE: Masters are required to send ship's ETA, addressed to Port Kamsar Agent and/or Shipping Superintendent C.B.G., through Port Kamsar Satellite Station, 7 days, 5 days, 3 days and 1 day before arrival at Port Kamsar.

APPROACHES:

Approaches to Rio Nunez: Port Kamsar formerly known as Kakande is located on the East bank of the Rio Nunez river and is approximately 17 km. from the sea.

Vessels bound for Port Kamsar will find there are few natural features to aid a landfall. The most prominent feature is Cape Verga situated to the Eastward of the Rio Nunez entrance. This cape can be observed by radar at a distance of approximately 30 miles. At present the light on Cape Verga is unreliable.

To the Westward of the Rio Nunez entrance are the Company Shoals and Conflict Reef. These are screened by a series of light buoys and vessels approaching from the West should keep them well on the port hand. (See "Buoyage System" below and "Plan Section").

Another prominent feature is Gonzales Rock on the starboard side close to the entrance to Rio Nunez. A light buoy is positioned screening the rocks and is identified as Buoy No. VII.

Vessels proceeding to Port Kamsar should anchor and await the arrival of the Pilot in the area bounded by Latitudes 10° 26' N. and 10° 28' N. and Longitudes 14° 44' W. and 14° 46' W.

Kamsar Buoyage System: Approaches to Rio Nunez – Sea Buoys

No.	*Shape–Colour*	*Position* *N.*	*Position* *W.*	*Characteristic*	*Visibility (miles)*
II	Red cylindrical	10° 12.3'	15° 25.5'	FL. 10 secs	5
III	Black Platform	10° 09.4'	15° 12.1'	GP. FL 4 Ev. 15 secs	7
IV	Red cylindrical	10° 13.5'	15° 01.5'	GP. FL. 2 Ev. 10 secs	5
V	Red cylindrical	10° 19.2'	14° 52.5'	GP. FL. 3 Ev. 10 secs	5
VI	Red cylindrical	10° 25.5'	14° 47.5'	FL. 5 secs	5
VII	Green conical	10° 23.5'	14° 44.5'	GP. FL. G 4 Ev. 10 secs	2.6
VIII	Red cylindrical	10° 29.5'	14° 43.9'	FL. 10 secs	5

Charts of the area are as follows:

British Admiralty:
600 Cacheo River to Iles des Los.
1560 Approaches to Rio Nunez.
1562 Port Kamsar and Approaches.
United States Naval Oceanographic Office:
51580 Ponta Caio to Cap Verga.
Service Hydrographique de la Marine:
5931 Du Rio Grande Aux Iles des Los.
6148 Embouchure du Rio Nunez.
6228 Acces au Rio Nunez.
6288 Rio Nunez abords de Port Kamsar.

Rio Nunez Transit: The channel from the mouth of Rio Nunez to the bauxite loading wharf at Port Kamsar is 17 km. in length and 120 m. wide and is well marked by 23 light buoys. The channel is subdivided into an inner and outer channel, the bottom of which consists of mud and sand.

The outer channel which extends from Buoys No. 1 and 2 up to Buoys No. 8 and 9, has a depth from 9.0 m. below reference datum level (R.D.L.) which is defined at + 0.15 m. above the lowest water registered (British Admiralty Tables LLWS = 0.00).

The inner channel extends from Buoys No. 8 and 9, to the bauxite loading wharf and is dredged to 8.25 m. and 8.50 m. below Reference Datum Level (R.D.L.).

The turning, waiting basin for inbound vessels is dredged to a minimum of 7.00 m. below R.D.L. and extends Westward, 360 m. from the bauxite loading wharf. The bottom is mainly mud and has good holding ground.

PILOTAGE: Pilotage service is compulsory for all vessels over 150 ft. LOA. Vessels under 150 ft. LOA will also be required to have a Pilot aboard on their first calls, but may be exempt thereafter by consent of the Harbour Master and approval of the Port Director.

Pilots are supplied from the Director's Office. Pilots board vessels in the designated waiting area (See "Approaches"). When conditions are unfavourable for a Pilot to board the vessel at the designated area, the Pilot will pass instructions by VHF radio, and the vessel will follow the pilot boat in until conditions are suitable for boarding.

Pilot boats are fitted with VHF radio and can be contacted on Channel 16.

ANCHORAGE: See "Approaches".

RESTRICTIONS: Pilots are now berthing ore carriers of any size (up to 229 m. LOA, which is the largest size of ship calling at Port Kamsar) during flood tide.

MAX. SIZE: Max. LOA 229 m. Max. draft 10.0 m. for entering.
Note: Departure with maximum draft is one hour before H.W.

HEALTH: Authorities board when vessel is alongside the berth. Yellow fever and Cholera vaccination certificates required.

RADIO: Contact Port by Fax: (871) 1632117 or Telex: (581) 1632116.
Note: The port radio station is no longer working.

VHF: Pilot station on VHF Channels 16 and 12. Watchkeeping hours: 0800 – 1200 and 1330 – 1730 on working days.

TUGS: Two tugs in service (1×2,896 h.p., 1×2,850 h.p.).

BERTHING: Located 17 km. from the channel entrance is the bauxite loading wharf.

The area alongside the wharf has been dredged to a depth of 13.5 m. below R.D.L. Fendering is separate from the wharf proper, and consists of a number of single and double flexible steel dolphins which protrude 4 m. from the face of the wharf.

A vessel proceeding to the bauxite wharf will normally swing off the berth and make fast port side to, heading seaward, during the flood tide. If the berth is occupied the vessel will be anchored in the turning basin to await the berth.

There is a single loading berth at the wharf. The longest vessel berthed had a LOA of 229 m., which is considered to be the maximum length permissible.

The mobile shiploader has a travel of 165 m., and an outreach of 21 m. from the outside face of the fendering. It is rated at about 4,000 tonnes/hour.

A vessel's air draft, i.e. distance from the waterline to the top of the hatch coaming, must not exceed 19.52 m. minus height of H.W. for the day.

Weight of bauxite is determined at Port Kamsar:

1. By the ship deadweight only, if:
(a) there is no weightometer available or,
(b) there is material on the ship loading conveyor before or after loading; or
2. If a weightometer available:
(a) By the weightometer reading if it differs by less than 0.5% from the ship deadweight survey;
(b) By the average between ship's deadweight survey and weightometer reading if the difference is between 0.5% and 2% or,
(c) By the ship's deadweight survey if the difference is more than 2%.

Stowage factor of the bauxite is about 28 cu.ft./long ton or 0.79 cu.m./tonne.

Bauxite vessels sail from Port Kamsar during the flood tide. Maximum departure draft is regulated according to tidal conditions.

There are 2 small general cargo wharves located at the entrance to the Dougoufissa Creek. One, called "Quai Francais", where vessels of up to 100 m. LOA with a maximum draft of 6 m. may berth. As there is only 3.5 m. at Lowest Low Water, these vessels will be aground at low water periods.

"Quai Francais" is equipped with a heavy lift crane/derrick with a maximum S.W.L. of 110 tonnes.

Safe Working Loads are as follows:

Radius of derrick	*Lifting capacity*	*Height under hook*
18 m.	110 tonnes	27 m.
26 m.	75 tonnes	23 m.
32 m. maximum	45 tonnes	11 m.

The derrick is also equipped with a secondary hook with a capacity of 20 tonnes.

One 200 ton barge is available for loading and discharging in midstream.

MEDICAL: Hospital facilities at Port Kamsar are available only on an emergency basis.

TANKERS: Facilities for the discharge of petroleum products are also available on the bauxite wharf.

This operation is done with sets (4 sections of 8 m. long) of removable 8 in. flexible hoses. For the unloading of the 3 products (Bunker "C", Diesel Oil and Gasoline), 4 sets of hoses are foreseen and of the four, two are used only for the unloading of the Bunker "C", one for the unloading of the Diesel Oil, and the other for Gasoline.

The Bunker "C" hoses feed a 16 in. line, the Diesel Oil hoses an 8 in. line and the Gasoline hoses a 6 in. line. Back pressure on the above lines 10 bars for the bunker "C" and 9 bar for the others..

Storage facilities on site: 1×7,000 cu.m. and 3×10,000 cu.m. Bunker "C" tanks.
3×3,000 cu.m. Diesel Oil tanks.
2×1,400 cu.m. Gasoline (petrol) tanks.

DENSITY: 1007 – 1028, depending on season.

FRESH WATER: Available in limited quantity on an emergency basis.

BALLAST: For any vessel, only clean ballast to be discharged. No tank cleaning or pumping of bilges whilst the vessel is in port or its approaches, all the way from Sea Buoy No. 2 to berth.

CONSULS: See "Conakry".

AIRPORT: Conakry Airport is about 280 km. from Kamsar (about 3 hours by road).

There are daily services to/from Europe.

TIME: GMT.

HOLIDAYS: New Year's Day (1st January); Second Republic Day (3rd April); Labour Day (1st May); Assumption Day (15th August); Independence Day (2nd October); Christmas Day (25th December); Easter Monday (variable date); Tabaski (variable date); Ramadan (Id il Fitri) (variable date); Maouloud (variable date).

All Sundays are also declared Public Holidays. The President may also, at his discretion, declare any other day to be a Public Holiday.

The loading of bauxite is generally continued without stoppage for Public Holidays.

General cargo will not, except in special circumstances, be worked on any of the above named Public Holidays. All other Public Holidays are normally worked.

SHORE LEAVE: Crew members are granted shore leave. Shore leave passes are issued by Immigration Officer on ship's arrival.

PIRACY: Acts of piracy have taken place at Conakry.

GARBAGE/WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Guinean Franc (GF).

WIND/WEATHER/TIDE: In the Rio Nunez approach area waves up to 4 m. can be encountered. At the entrance to the fairway or channel they are generally less than 1 m. high during the rainy season, and less than 0.5 m. high in the dry season. Waves and swell in the inner channel and harbour area are generally very moderate.

The tide, in the the proximity of the buoyed channel, runs N.N.E. and S.S.W. at 2.5 knots under normal conditions, but can reach 4.5 knots during Spring tides in the rainy season.

The flood tide runs parallel with the line of the bauxite loading wharf at a speed of up to 4 knots. The ebb tide, augmented by water coming out of the Dougoufissa Creek, runs through the bauxite wharf at an angle of approximately 20° at a speed of up to 7 knots on spring tides in the rainy season, tending to set the vessel off the wharf. It is therefore absolutely essential to tend moorings to an even tension, particularly on the stern of a loading vessel.

The density of the Rio Nunez at the bauxite loading wharf varies between 1007 (rainy season) and 1028 (dry season) at high water.

Port Kamsar has a typical tropical climate, which is characterised by two separate seasons.

Rainy season from June to October

Maximum rainfall	is during July and August, mainly at night.
Relative humidity	is 70% to 80% during the day and 90% to 95% at night.
Temperatures	range from 17°C to 38°C, with an average of between 22°C to 28°C.
Wind conditions	Variable from between South and West, Force 3 to 6 Beaufort Scale. Possible tornadoes from between North and N.E. with wind reaching Force 10 Beaufort Scale for short periods.

Dry season from November to May

Little rainfall.	
Relative humidity	is 30% to 50% during the day, and 80% to 90% at night. There is often coastal fog in the mornings.
Temperatures	range from 15°C to 42°C, with an average of between 20°C to 35°C.
Wind conditions	Light breezes from the Southwest to West, Force 1 to 3 Beaufort Scale.

GENERAL: Stores: Provisions are scarce and therefore not available to calling vessels.

Gangways: Every vessel alongside any wharf must provide and tend a safe gangway provided with guide ropes and safety net. Such gangway should be effectively illuminated during the hours of darkness. At the top of the gangway a lifebuoy with a rescue line must be available.

For vessels berthing at the bauxite loading quay, the gangway must be swung out and ready to lower on the jetty as soon as the ship is fast alongside, so as to be clear of the loader rails and to allow unrestricted travel of the loader.

Port Director's Office: The office of the Port Director is solely responsible for the operation of Port Kamsar, which includes the provision of Pilotage, tugs and launches.

The Office acts as sole Agent for all vessels calling at Port Kamsar, including the normal ships business functions performed by Agents.

NOTICE: From Port Management, Port Kamsar.
To: All Masters.
Date: December 1994.

Dear Captain,

In order to help you understand the various formalities and Government Officals boarding your vessel, please find the following information:

On your berthing at Kamsar, the following Officials will come onboard:

(A) 2 Agents from OFAB Agency (Port Authority)	They are your Agent, acting to protect your interest. They are identified by an OFAB badge with their names, number and photograph.
(B) 1 Policeman (Immigration)	Identified by his dark blue uniform, no badge. He checks Passports and Crew List. Crewmen leaving to go ashore will leave their Passports with the policeman, who will give them a shore pass. Crew members must have their shore passes in their possession when ashore.
(C) 1 Gendarme	Identified by his khaki uniform. He does the same job as the police, but also checks for firearms. The gendarmerie is generally responsible for port security, as well as installations and personal safety.
(D) Quarantine:	Dr. Macauley issues Free Pratique Certificate.
(E) Coast Guard:	Identified by a khaki uniform. He inspects engine room cleanliness, oil debris and issues a certificate.
(F) Customs (2 persons)	Identified by a khaki uniform. They inspect provisions, bonded stores and ship's accommodation.
(G) CBG Shipping Department	He wears a CBG badge. He handles loading program and N.O.R. acceptance.

After this group, at boarding, you will also receive the following Officials:

(H) 2 Merchant Marine Inspectors (ANAM)	They will be identified to you by your OFAB Agent. They inspect ship's certificates (including liferafts) and will deliver an inspection certificate.
(I) Telecommunication Inspector (PTT)	He inspects telecommunication equipment and certificates. He will give you a permit, allowing you to use your Radio/Satcom station during your stay in port.

After the first group of Officials leaves your ship, they will appoint 3 representatives (One Customs Official, one Police Official and one Gendarme), who will stay on board, at the gangway, until departure.

For these 3 Officials only, you are kindly requested to furnish a clean cabin, where they can have their meals and rest during time off.

Should you receive anybody after that, who claims to be Government Officials, please call your Agent immediately on Channel 16, or the Harbour Master or the Port Management. We are all on Channel 16, and we will send you somebody to help clarify the purpose of the Official's visit.

In any case, if you are in doubt of anything or you receive any demand which you do not like, please call us on VHF Channel 16, we are here to serve you.

Stowaways: With the refugee situation, and to help the local authorities and Government departments, we are asking your cooperation in the following manner:

1. Whether at anchor or at berth, do not leave your pilot ladder or any rope hanging over the side. We have noted some stowaways climbing on board on the anchor chain.
2. Do not allow fishermen, visitors or salesmen on board, have a crew member as guard at your gangway all the time.
3. Make regular inspections of your ship, by your crew.
4. Your Agent will delivery a Register to the policeman, the Customs office and Gendarme at the gangway. In this Register, please verify that the names of the Officials on duty are clearly identified, if they are relieved, have the fact recorded and new names written down. If they are absent, please inform your Agent, so he can record this absence in the Register. All visitors onboard must register their names and functions.
5. Before sailing time, please have one of your officers conduct a search inspection of your ship with one or two of those Officials, and record this fact in the Register, as well as the result of this inspection.

We hope that these recommendations and explanations help you, and we wish you a pleasant stay at our port.

Signed: Port Technical Director Port Director

SHIPMASTER'S REPORT: August 1983 (Updated 1986).

Documents:

1 Vaccination List.
1 Maritime Declaration of Health.
6 Crew Lists.
1 Crew Declaration.
6 Passenger Lists (If any onboard).
6 Ports of Call Lists.
12 Manifests of Cargo (Cargo ships only).
2 copies Bills of Lading (Cargo ships only).
1 Stores List.

Agent, Doctor, Customs, Immigration, Navy Officer and Shipper's Representative board on arrival alongside to clear vessel. Later during office hours a gentleman from the Maritime Inspection Department will board to inspect vessel's certificates etc. On ship's first visit he will issue a numbered chit which should be *retained* for future visits. A shippers' representative will board on arrival to carry out a deadweight survey. He usually accepts Chief Officer's figures for ballast, bunkers, fresh water, etc., which he should have ready. 2 Immigration and 1 Customs Officer live on board for the duration of vessel's stay alongside.

Approaches: Are fairly straightforward following the pecked line route on Charts B.A. 600 and 1560, however this with the benefit of a 'Satnav'. Currents in that area were found over several voyages to be unpredictable and at times quite strong. No. III Buoy is equipped with a Racon which can be detected at distances of between 13 and 18 miles and should be passed keeping it to the South, thence inwards keeping to the South likewise of Nos. IV and V Buoys (also pecked line route) proceeding to the anchorage after passing Buoy V, or if entering port directly from sea to the Pilot Station usually about 1 mile South of No. 8 Buoy. Here the pecked line (Charts B.A. 1560 & 1562) should be adhered to in order to avoid the shoal patch S.S.W. of No. 8 Buoy.

Buoy III appears to be about 3 miles South of charted position and Buoy IV even further out of position. At the time of writing the light on Buoy III is extinguished, however the Racon is working well. Ile Binari and Ile Gonzales show up well on the radar. Rocher Gonzales upon which lies a conspicuous wreck, shows on the radar as a double blip and has been found most useful for obtaining fixes. Unfortunately neither the light or Racon on the reef work. Most of the buoys show up well on the radar and are visible for about 6 miles (conditions allowing). Off the river mouth flood tide sets Northeasterly and the ebb Southwesterly.

Pilotage: 3 pilots available. Pilots should be called on VHF Channel 16 about one and a half hours before arrival, they are supposed to keep a 24 hour watch, however if many vessels are waiting at anchor this is not always the case.

If berth is unoccupied, Pilot will meet vessel 1 mile South of No. 8 Buoy and conduct vessel through an 8.25 mile channel, well buoyed, 120 m. in width with a least depth of 8.25 m. to the inner anchorage and turning basin dredged to 10.0 m. Both anchors should be run out ready and a man standing by them for the channel passage. If entering on the flood tide (on which vessels must berth) immediately on entering the basin, vessel is swung to port and port anchor let go to one shackle (in water) until vessel has swung to flood, she is then dredged astern to a position N.W. of and handy to the berth, when anchor is weighed and vessel proceeds to berth. An adequately powerful tug assists in the operation. On weighing port anchor the starboard anchor must be ready in case of need on berthing.

If berth is occupied but no other ships waiting, vessel will enter as above, but when in position pay out cable and come to anchor. Holding ground is reputed good. As vessels of or near this size must sail one hour before high water Pilot rejoins about 1.5 hours before high water, cable is shortened and vessel dredged astern as above to await the sailing of berthed ship.

Anchorages: As will be seen on the charts the anchorage and Pilot Station area indicated is close to shoal water. I therefore found it preferable to anchor about 5 miles West of Rocher Gonzales. The holding ground is reputed to be good though I have never had opportunity to put this to the test.

Radio: Early ETAs have to be sent via Portishead Radio, however as these have to pass through Conakry and overland communications are poor, it is not unusual for these to be lost or badly delayed. It is therefore important to establish communication via Kamsar Radio as early as possible. Our earliest has been about 3 days from the port, when I have considered it worthwhile to repeat the 3 day ETA direct. The evening watch hours seem to be the best. Agents do not reply to requests for 'prospects'. First advice therefore is from the Pilots.

VHF: See "Pilotage".

Tugs: See "Berthing".

Berthing: If more than one vessel, waiting turn, order is: Vessel berthed next on turn at inner anchorage, the rest anchored outside awaiting turn. Turns are not necessarily in order of arrival. If a ship is without laydays she must wait until laydays are allotted or until ships within laydays have loaded even though may have arrived later.

Bauxite Berth: An L shaped jetty extending about 6.25 cables from shore it is well fendered with modern sprung fenders, depth alongside 13 m. Vessel berths port side to the quay head to flood. Tie up, forward 6 head ropes and 2 springs, aft 6 stern/breast ropes and 2 springs. On Spring tides and particularly during the rainy season, a very strong ebb sets at an angle across vessel's stern setting it off the quay. If need be the tug 'Dougoufissa' can be called on VHF Channel 16, either direct or via Pilots (depending on one's French) to stand by and/or assist by pushing vessel to quay.

There is no shore gangway. Ship's gantry must be landed on quay. As usual the space for it to run is restricted and it must be carefully kept out of the way of the loader.

Berth is equipped with a travelling loader with an outreach of 21 m. Max. airdraft to coamings (hatchcovers for siderollers) is 45 ft. Loading rate is up to 60,000 tons per day working around the clock. However during the rainy season and particularly if there is a run of ships, loading rate is limited by the capacity of the driers, about 1,500 t.p.h. for ships loading dry ore.

Max. sailing draft varies with height of tide and river, and will be calculated by the Pilot before he leaves the ship on berthing.

On sailing, Pilot will board 1.5 hours before high water (day or night) at which time vessel should be ready to single up as she must leave the berth promptly 1 hour before high water.

Fresh Water: Available in limited quantities and on an emergency basis only.

Repairs: No facilities for repairs.

Shore Leave: Permitted.

Crew Mail: Mail left with Agents is forwarded to Brussels direct by air every Monday.

SHIPMASTER'S REPORT: July 1991.

Approaches: When the vessel is in the River Nunez approaches care should be taken as the Racon on Gonzalez Rock does not work at night.

Vessels enter on the flood tide until 1 hour before H.W.

Pilotage: There are 3 pilots available and in our case the same pilot was used for entering and sailing. The pilot was very competent and spoke good English.

Once the vessel is berthed the pilot will determine the sailing draft.

Berthing: When the vessel arrives at the turning basin it is turned to port and the port anchor is let go. The vessel is berthed port side alongside (head out) with the assistance of a powerful tug.

When mooring, it is necessary to use many lines, especially aft, due to the strong ebb tide (5 knots) during the rainy season (June to November).

The tide sets at an angle across the vessel's stern, thereby setting the vessel off the quay.

Due to tide changes, mooring lines must be tended carefully at all times. The pilot advised that a vessel broke her lines and drifted to the middle of the river because they were not tended properly.

Loading: There is one bauxite berth with good fenders.

Due to the fast rate of loading (about 3,000 tonnes/hr.), it is necessary for the vessel to deballast quickly. Vessels must enter with maximum ballast onboard and airdraft must not exceed 13.5 m.

Vessels sail one hour before H.W.

In addition to the bauxite berth there is a small commercial berth with a crane of 125 tonnes capacity.

Quantity loaded is determined as follows if a weightometer is available:

(1) By weightometer reading if the ship's figures and shore figures differ by less than 0.5% from the ship's deadweight survey.

(2) By the average between ship's deadweight survey and weightometer if the difference is between 0.5% and 2%.

(3) By the ship's deadweight survey if the difference is more than 2% (in our case the difference was 4.5%).

Fresh Water: Fresh water is not available.

Stores: It is possible to obtain fresh tropical fruits, vegetables and fish.

Republic of Guinea-Bissau

BISSAU: 11.51 N. 15.34 W.

DOCUMENTS:
Entrance Declaration.
Clearance from the last Port of Call.
List of all Passengers on Board, either in transit or disembarking in Bissau.
Provisions List.
List of the Crew Members' Effects.
2 Lists of Passengers' Baggage.
List of Cargo to disembark in Bissau, Baldeade (Bolama) or otherwise in transit to be disembarked in another port.
List of Cargo (inside sealed envelope).

PILOTAGE: Pilot's base and radio beacon located at Caio Point, (small island at the entrance of Geba's Channel). To call the Pilots and/or the radio beacon, send telegram to Servicosmarguine, informing of the ETA at Caio; pilotage is compulsory.

ANCHORAGE: Between Bissau and the Ilheu do Rei.

MAX. SIZE: Draft 26 ft.

HEALTH: Visit of Port Doctor compulsory if ship has no doctor, or if permission for exemption has not been requested; permission can be requested by radio. When needed, the health services in Bissau can be used by passengers or crew members. Yellow fever vaccinations required.

RADIO: Station call sign CQF weekdays on at 0900, 1300, 1600, 1800 hrs. GMT. Sundays 0900 and 1100 hrs. GMT. Frequency 500 kHz, CW.

TUGS: 1 tug of 320 h.p. and 1 of 800 h.p. available.

BERTHING: Ponte, Cais de Bissau, length 131 m., width 25 m., depth 8 m.

Equipment: 4×6 ton cranes; 2×12 ton stacker trucks; 2×4 ton stacker trucks; 4×2 ton stacker trucks; 2×6 ton towing tractors 16×6 ton trucks; 1×35 ton towing tractor; 1×25 ton platform; 1×50 ton towing tractor; 1×50 ton platform; 2 suction machines for 80 t.p.h.; 2×35 m. conveyor belts; 1×40 m. conveyor belt.

STEVEDORES: 1,500 stevedores available for loading and unloading cargo.

FRESH WATER: Available; pumping rate, 10 t.p.h.

FUEL: Diesel available; pumping rate, 6 t.p.h.

CONSULS: Algeria, Brazil, China, Cuba, Egypt, France, Germany, Democratic Republic of Korea, Lebanon, Libya, Netherlands, Nigeria, Portugal, Russia, Sweden, U.S.A.

REPAIRS: Small repairing work can be done on machinery or ship's hull.

AIRPORT: 7 km. from Bissau; 2 flights to Lisbon per week, 1 flight per week to Moscow, 1 flight per week to Algiers and 4 flights per week to Conakry.

TIME: GMT minus 1 hour all year round.

HOLIDAYS: *National Holidays:* 1st January; 20th January; 8th March; 1st May; 3rd August; 24th September; 14th November; 25th December, Days of Ramadan and Tabasky.

POLICE/AMBULANCE/FIRE: Police, tel. 213957; Fire, tel. 118.

TELEPHONES: Line connection land-ship, if requested to the Post Office Authorities.

DEVELOPMENTS: "T" shaped general cargo pier length 290 m. with head length 260 m. under construction.

SHIPMASTER'S REPORT: November 1979.
Vessel from Dakar; bound for Bissau. Speed 14 knots, draft 6.10 m.
Report on the River Entrance to Bissau:
The vessel was proceeding on course 172° (T) and positions taken at various intervals as follows:

0920 hrs.: Cabo Roxo Lt. Ho. Brg. 054° (T) × 20.5 miles
0930 hrs.: Cabo Roxo Lt. Ho. Brg. 047° (T) × 22.0 miles

At 0920 hrs. minimum sounding was taken at 4.0 m. under the keel and Westerly set was applied.

At 0930 hrs. the vessel altered course to 137° (T).

1025 hrs.: Pta. Cabaceira Pt. Brg. 081° (T) × 31 miles
1145 hrs.: Pta. Cabaceira Pt. Brg. 057° (T) × 26.1 miles
1210 hrs.: Pta. Cabaceira Pt. Brg. 048° (T) × 21.5 miles

From 0930 hrs. onwards, poor fixes due to poor radar targets of land points.

From 1020 hrs. the vessel steered various courses to the Fairway Buoy at Lat. 11° 47.3' N., Long. 16° 41.8' W., due to strong currents.

At 1145 hrs. Fairway Buoy was found not in position and the vessel altered course and steered heading for Pilot Station at Caio Island. Caio Island Western Point was picked up on radar at about 16 nautical miles.

Visibility throughout was hazy and poor, about 3-4 nautical miles due to sand dust. Radio beacon at Caio Island was not working. Aero Radio Beacon at Bissau appeared to be unreliable.

1345 hrs.: Vessel anchored South of Caio Island awaiting Pilot.
1415 hrs.: Pilot onboard.

Pilot station at Caio Island had no VHF or other possible means for communication with the vessel. Vessel had to anchor and await Pilot. The Pilot boat is small with a weak engine and at times not working. The Pilot may have to be picked up by own lifeboat. The River Pilot did not speak any English, only Portuguese and was unable to give proper orders to the helmsman. Navigation in River Geba to Bissau was mostly done by the vessel's officers. Entrance and departure from Bissau cannot be done during the night, as most lights and buoys are unlit. On arrival at Bissau the vessel has to anchor 4 cables N.E. of the jetty and await Harbour Pilot.

1808 hrs.: Vessel anchored at Bissau, 4 cables N.E. of jetty.
1900 hrs.: Vessel berthed at Bissau, starboard side alongside the jetty.

The Harbour Pilot was able to communicate in English. Berthing and unberthing is preferred on flood tide. Current alongside berth up to 3.5 knots. Maximum depth alongside at low water was 20 ft. 3 soundings were taken at low water alongside the wharf: West end: 7.40 m., middle: 6.10 m., East end: 9.30 m., length of wharf 131 m.

Discharging was slow. The vessel stayed 4 days in port to discharge 1,364 tonnes flour in bags of 50 kg. Cargo worked from 0800 hrs. to 2300 hrs. daily. No cargo work at night due to heavy pilferage from the cargoes, ship's watchmen were kept in all hatches during discharging.

Day of Departure:
0715 hrs.: Vessel left berth.
1210 hrs.: Vessel anchored at Caio Island.
1220 hrs.: Pilot disembarked by ship's lifeboat.
1305 hrs.: Vessel continued voyage.

On departure the pilot boat at Caio Island was not working and the vessel had to use her own lifeboat to disembark the Pilot.

Max. Size: LOA 131 m.
Anchorage: Good anchorage 4 cables N.E. of the wharf. Depth 6 – 7 fathoms, holding ground was good.
Pilotage: Pilot station on Caio Island which is 50 nautical miles West of Bissau. Request for pilotage is compulsory, via Agent.
Restrictions: Entry by night is difficult as most lights are unlit and the current rises at up to 3.5 knots on the flood and ebb tides, also the navigation aids are poor.
Tugs: Not available.
Berthing: Length of wharf 131 m., depth alongside at LW 20 ft. (FW).
Cargo Handling Facilities: General cargo only handled, there are no lighters, container or Ro/Ro facilities.
Cranes: 2 mobile cranes, maximum capacity 15 tonnes.
Repairs: Not possible.
Fuel: Not available.
Fresh Water: Supply to the wharf is unreliable.
General: Provisions not available.
Medical: No services available.
Airport: There is a twice weekly air service from Bissau to Europe. Distance to airport 7 km.

SHIPMASTER'S REPORT: December 1988.
Vessel proceeded from Las Palmas to Bissau. Speed 13 knots. Draft 5.8 m.
Report on the River Entrance to Bissau: Steer true course 177° until vessel crosses the 100 fathom line at position Lat. 12° 26' N., Long. 17° 30' W. From this point steer true course 148° until the vessel again crosses the 100 fathom line at position Lat. 12° 11' N., Long. 17° 20' W. From this position steer true course 124° to Buoy Geba-A (Fairway Buoy).

From position Lat. 12° 11' N., Long. 17° 20' W. vessel's position was ascertained by radar, using Cabo Roxo which was visible on the radar up to 40 miles; the Baixos do Rio Grande light, which was visible on radar up to 30 miles; Ilha da Jeta which was visible up to 30 miles and the Buoy Geba-A (Fairway Buoy) which was visible on radar at 12 miles.

On reaching the Fairway Buoy, vessel alters course towards the Pilot Station at Caio Island. The minimum depth by echo sounder under the keel was 4.5 m. Strong currents of up to 5.5 knots were experienced.

The Pilot Station at Caio Island has no means of communication with either the vessel or the Port of Bissau. River Pilots are therefore never advised of vessel's arrival in advance.

When the vessel arrives at the Pilot Station, the vessel's lifeboat/rescue boat, is to be used to pick-up the pilot as the pilot boat has frequent engine breakdowns. The approach to Caio Island is very dangerous due to many breakers, wrecks and strong currents.

The River Pilot only speaks "Crioulo" (Creole), which is a local dialect, and a very few words of Portuguese. He is therefore unable to give proper orders to the helmsmen.

All navigation in the Canal do Geba has to be done by the ship's Master. The pilot does not assist in any way.

Entry and departure from Bissau is dangerous, especially at night, as the East Cardinal buoy off Banco do Meio is missing and most other buoys are unlit.

On arrival, vessels anchor at Bissau Inner Roads, which are 4 cables Northeast of the jetty, and await the harbour pilot.

The harbour pilot was able to communicate in English but was unable to show on the chart where the vessel was to berth.

Berthing/unberthing is preferred on the flood tide.

Vessel anchored in the Roads at 1930 hrs. and berthed alongside at 2300 hrs.

All jetties are unlit, so vessel had to use Suez Canal searchlight when approaching the berth.

Minimum depth under the keel when approaching the berth was 2.0 m. Currents alongside the berth are up to 3.5 knots and range of tide up to 5.0 m.

The vessel has to provide a cabin for the River Pilot as he stays on board the vessel during the whole time alongside.

When vessel was due to leave, the Harbour Pilot was standing-by on another vessel so we left port without a Harbour Pilot. On approaching Caio Island we again had to use our lifeboat/rescue boat to land the River Pilot.

Pilotage: Compulsory. Request for pilot to be made to the vessel's local agent. The Pilot Station is located at Ilheu do Caio which is about 50 nautical miles West of Bissau.
Anchorage: The Canal do Geba has good holding ground and plenty of room.
Restrictions: Night navigation is not recommended as most of the lights are either missing or unlit.
Tugs: None available.
Berthing: The old cargo jetty is 131 m. in length and has a minimum depth alongside of 6.3 m.

The new cargo jetty, which is soon to be operational, has a length of approximately 280 m.

Cargo Handling Facilities: Ship's cranes or derricks are to be used. 1 forklift of low capacity available. General cargo can be loaded on t the quay but all containers must be loaded direct on to trucks.

NOTES

Please also advise Shipping Guides Ltd.

Stevedores: The working hours are from 0800 hrs. to 2300 hrs. Night work is possible, but pilferage increases considerably during night time.
Repairs: Not possible.
Agent: Messrs. Guinemar S.A., Rua Guerra Mendes 4/4a, Bissau. Tel: 213022/3. Telex: 0969-276.
Note: Only the agent has VHF in Bissau (range up to 30 nautical miles).

SHIPMASTER'S REPORT: September 1994.
Pilotage: Pilot has to be arranged by Agent.

The Pilot Station on Caio Island has no means of communication with vessel. No pilot boat available.

Vessel's lifeboat has to be used to pick-up Pilot on East side of Caio Island.

Great care has to be taken due to many breakers and strong current. It is not recommended to try it in bad weather.

Pilot speaks no English.

All navigation has to be done by ship's Master.
Radio/VHF: Bissau Radio only equipped with VHF Channel 16.
Tugs: No tugs available.
Berthing: New cargo pier (length 290 m.) completed and in use.
Holidays: August 3rd is also a national holiday.
Telephones: No ship-to-shore telephone available.

AUTHORITY: Junta Autonoma dos Portos da Guine-Bissau, P.O.Box 382, Bissau, Guinea-Bissau. *Tel:* 2797 (Administrator's Office), 2783 (Secretariat). *Cables:* Porto, Bissau. *Contact:* Port Director.

Secretario de Estade dos Transportes, C.P. 306, Bissau, Guinea-Bissau. *Tel:* 212583. *Telex:* 263 MTT BI.

Guyana

ESSEQUIBO RIVER (Bartica): 06.24 N. 58.37 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot Station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

Essequibo Light (steel framework tower with red and white horizontal bands) marks seaward end of Essequibo Main Ship Channel. Vessels in vicinity of Demerara Pilot Station should listen for pilot boat on VHF Channel 16.
RESTRICTIONS: The Essequibo Bar is composed of hard mud and sand. The least depth of water is 3 ft. less than for Demerara Bar. Vessels should not attempt to cross the Essequibo Bar drawing more than 3 ft. less than that predicted for the Demerara Bar.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
MEDICAL: Hospital at Georgetown and Bartica.
DENSITY: 1000, fresh water.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: At Georgetown.
REPAIRS: Government dry dock situated at Mazaruni, approximately 40 miles up river at junction of Essequibo and Mazaruni Rivers. Extreme dimensions: 160 ft. by 35 ft.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown, Guyana. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

GEORGETOWN: 06.49 N. 58.10 W. (See Plan)

PORT LIMITS: Seaward by an arc of a circle with radius 1 nautical mile, with the Georgetown Lighthouse as centre.
DOCUMENTS:
Certificate of Registry.
8 Crew Lists.
8 Provisions and Stores Lists.
4 Passenger Lists.
Customs Documents:
2 Reports of Ship's Stores (Form C1).
2 Lists of Crew Personal Effects (Form C2).
1 List of Unmanifested Cargo (Form C3).
12 Health Declaration Forms (W.H.O.2)
Health Documents for Crew (1 copy for each crew member).
5 Cargo Manifests.
5 Bills of Lading.
PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at Pilot Station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in Northwestern quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 60 ft. in length.
ANCHORAGES: There are 5 with a least depth of approximately 20 ft. MLWS named A to E from North to South. Vessels are safely anchored at any of the above anchorages 1.5 cables to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.
RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.
MAX. SIZE: Draft 30 ft. 08 in.
HEALTH: Radio Pratique is not given, and Pratique is only given at Georgetown. This normally involves a visit from the Health Authorities if the vessel is clear. If a vessel is "suspect" or "infected", Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Buoy as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.
RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kHz., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF Channel 16, HF 2738 and SSB 8281.2 kHz.
RADAR: No service available.
TUGS: At present, vessels dock stem on to the tide without aid of tugs. However, tugs could be provided if urgently required.
BERTHING: There are 6 main wharves privately and government owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 ft. to 20 ft. at LWS, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.
CRANES: Heavy lift cranes of 25 tons available. Ship's gear has to be used. No floating cranes.
BULK HANDLING FACILITIES: The sugar berth is 416 ft. in length with least depth alongside of 18 ft. MLWS and can accommodate vessels up to 530 ft. in length. Loading rate is 500 t.p.h. using 2 chutes. Vessels should not be more than 63 ft. beam.
BRIDGES: Demerara Harbour Bridge: Floating bridge with retractor span situated 4.2 miles from mouth of river. Arrangements for passing are made by Agents. Bridge operators keep radio watch on VHF Channel 16.
STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 1600 and 1900 and they earn time-and-a-half or double time on public holidays according to which one of the 12 public holidays they work.
MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available.
TANKERS: There are no residue discharge facilities at this port. There are 4 tanker berths in the Georgetown area.
Rome Terminal (Shell) – depth alongside 18.5 ft.
Ramsburg Terminal (Esso) – depth alongside 16 ft.
Ramsburg Terminal (Texaco) – depth alongside 18 ft.
Providence (Guyoil) – depth alongside 8.5 ft.
Size of pipelines: 6 in.
DENSITY: Average density in port is 1015, though during the rainy season (March-May; October-December) density of water may be as low as 1000 at LW in the harbour.
FRESH WATER: Fresh water is available, and is delivered alongside. The ship is required to pay for labour, overtime, etc., involved in the delivery.
FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before HW and leave not later than 1 hour after HW at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.
FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload and/or proceeding up river.
CONSULS: (and Embassies)
Belgium
Brazil
Canada
China
Colombia
Costa Rica
Cuba
Denmark
Egypt
France
Germany
India
Italy
Jamaica
Japan
Korea
Libya
Mexico
Netherlands
Norway
Panama
Sweden
Trinidad & Tobago
United Kingdom
U.S.A.
Venezuela
Yugoslavia
REPAIRS: Every type of deck or engine repair is undertaken at Guyana National Engineering Corporation (GNEC) Dry Dock. Above waterline and engine-room repairs of any type are undertaken on vessels exceeding the dimensions mentioned below while vessel is anchored in the stream. Also see "Dry Docks".
DRY DOCKS: GNEC Dry Dock: A graving dock 210 ft. × 37 ft. 9 in. at entrance situated South of GNEC No. 2 Wharf, which is State owned and operated on normal commercial lines. 198 ft. length of dry dock is on blocks. Breadth: top 46 ft. 4 in., bottom 40 ft. 9 in., depth on sill at HWOST 92 ft.

Government Dry Dock: Situated at Mazaruni approx. 40 miles upriver at junction of Essequibo and Mazaruni rivers is a graving dock and has extreme dimensions of approx. 160 ft. × 35 ft.
SURVEYORS: Lloyd's and Bureau Veritas. No cargo inspectors available.
GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and are obtained through a watchman's pool by ships' Agent.
PIRACY: Armed gangs of robbers have boarded vessels from shore and from canoes and stolen quantities of ship's stores.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of half-a-pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*
CARGO GEAR: Ship's gear.
REPATRIATION: Arrangements normally made through ship's Agents.
AIRPORT: Timehri International Airport is situated approx. 30 miles South of Georgetown with highway connection and is served by many intercontinental airlines.
TIME: 3 hours behind GMT. No alterations made to clocks during the year.
HOLIDAYS: New Year (January 1st); *Eid-ul-Ahza; *Phagwah; Republic Day (February 23rd); Good Friday; Easter Monday; Labour Day (May 1st); *Youman Naubi; Caribbean Day (July 5th); Commonwealth Day (First Monday in August); *Deepavali; Christmas Day (December 25th); Boxing Day (December 26th). *Religious holidays are variable.
POLICE/AMBULANCE/FIRE: Tel. 999. There are Police/Ambulance Fire Stations on the waterfront.
TELEPHONES: Could be arranged through Coast Station 8RB.
BANKS: Chase Manhattan Bank N.A., Bank of Guyana Building, Church Street, Georgetown, P.O.Box 101080, Telex: Chase Bk, GY 2222.

Barclays Bank Int. Ltd., 48 Water Street, Georgetown, Telex: Barclay GY 2248.

STORING: See "Prelims".
(1) Yes.
(2) Yes.
(3) Yes.
(4) Yes.
(5) Yes.
(6) Yes.

SHORE LEAVE: Granted by Immigration Boarding Officer.

IDENTIFICATION CARDS: Not required.

DELAYS: Only when berths are occupied.

SHIP'S OFFICER'S REPORT: September 1988.

During vessel's stay in Georgetown I was able to gather the following information:

In a major step towards promoting the export of Bauxite, the Guyanese government has charted the Panamanian flag vessel M.V. "Arrowcane II", for an initial period of 5 years. This vessel will be a silo ship for transhipment of Bauxite.

She will be permanently moored in position Lat. 06° 49' N., Long. 58° 10.5' W. (approximate), heading North (See "Plan").

The "Arrowcane II" has been converted into a self-loading/discharging silo ship. She has an arrangement for discharging barges on her port side using on-board grabs, and then loading larger ships on her starboard side using a conveyor belt. She also has "Yokohama type" fenders on her starboard side.

Initially there was a draft restriction for vessels loading Bauxite at Linden (06° 01' N., 58° 18' W.) (up the Demerara River), so it was not possible for large vessels to take a full load. With the establishment of this silo ship at the mouth of the river it will be possible to load vessels to a deeper draft.

It was not possible to get other details about the loading draft restrictions, loading rates, etc., as the silo ship was still not operational when we left Georgetown. The 4 buoys have been laid and M.V. "Arrowcane II" was to carry out the "mooring operation" within a few days and become fully operational after 2 weeks.

SHIPMASTER'S REPORT: November 1989 and December 1989.

Charts: B.A. Charts No. 519, 527, 533 and 572.

Documents:
3 copies Crew Personal Effects List.
3 copies Bonded Stores List.
3 copies Provisions List.
2 copies Unmanifested Cargo.
1 copy Maritime Declaration of Health.
8 copies Crew List.

Port Officials: The Port Officials boarded at the berth and the party was large for a small vessel. The bond was sealed after gratuities given out.

Pilotage: The pilot boards at the Pilot Buoy (which was unlit at the time of our visits) from a large cutter with a black hull and white upper works with "Pilot" on the side. The name of the vessel was "Lady Young" and it was similar in appearance to a small tug.

There is a shortage of pilots as they are also required for Berbice and Essequibo, so it is usual for a pilot to transfer from an outward bound vessel to an inward bound vessel, and as this is the case, there are quite often long delays. Change of pilot takes place off the town.

A 24 hour pilot service is operated from Georgetown to the sea as long as the leading lights are operating.

Approaches: The headland on Pomeroon River is conspicuous on the radar at 20 miles. The tower and factory at Devonshire Castle Flats/Anna Regina are conspicuous on the radar at 25 miles. The town of Georgetown is also conspicuous at 25 miles on the radar.

The wreck just North of the Pilot Buoy in position Lat. 07° 00.8' N., Long. 58° 02.9' W. is no longer visible at low water.

The Demerera D/F Beacon is very unreliable and the Georgetown light was not operating at the time of our visit.

Anchorage: November 1989: Vessels anchor just North of the Pilot Buoy in a depth of approximately 4 fathoms. The bottom is mud and there is a large groundswell.

December 1989: Whilst waiting for the Sea Pilot for the outward passage we used the River Anchorage and anchored in Position "C". The River Pilot advised us to use 4 shackles in the water. Whilst at this anchorage a good watch should be maintained as thieves may try to board the vessel.

Channel: There are very few buoys left in the Channel and the pilot uses the leading marks day and night.

The old front leading mark has been moved to behind the rear mark (225° × 0.85 miles behind the original rear mark).

The Channel from the Pilot Buoy to the ship silo is 200 ft. wide and is aligned 045°/225°. The Channel has recently been dredged to 20 ft. 6 in. at chart datum (19 ft. 6 in. MLWS), although it was found to be silting to 17 ft. chart datum. There is a lot of mud/silt in suspension.

Radio/VHF: In November 1989, Georgetown Lighthouse Radio was first contacted on VHF Channel 16 at a distance of 30 miles, working Channel 12.

We were not able to contact Demerera Radio (8RB) prior to contacting Georgetown Lighthouse Radio, although another vessel reported making contact with the station at a distance of 120 miles on 2,558 kHz./2,049 kHz.

Whilst at anchor we worked Demerera Radio on 2,558 kHz./2,049 kHz. The station was very helpful.

The pilot launch "Lady Young" works on VHF Channel 16 but will switch to Channel 14 if required.

In December 1989, we made contact with Demerera Radio at over 100 miles (calling 2,182 kHz., working 2,258 kHz./2,049 kHz.). It is in order to make a local call to the Agent.

Berthing: Shell (November 1989): We berthed on the sea side of the Shell pontoon bridge at high water. Our draft was 4.4 m. and we experienced no difficulties going alongside. We unberthed one hour before low water with a draft of 4.1 m. and again experienced no difficulties even though the echo sounder indicated no water under the keep until we were 10 m. off the berth, where the depth was 7.0 m. at datum until we were abeam of Georgetown Lighthouse.

We berthed head out starboard side alongside.

The moorings consisted of 2 head/stern lines and 1 spring at each end. The mooring lines are run by the boat which was very efficient.

The tidal range at the berth is about 2.0 m. The depth alongside at chart datum was found to be about 4.0 m.

Berthing and unberthing is affected day and night.

A searchlight is very useful when berthing and unberthing.

Shell/Texaco (December 1989): Pilots are not keen to berth or unberth at Shell (called 'Rome' on documents) and Texaco (called 'Ramsburg' on documents) at slack low water. At low water the forward mooring pile at Texaco is dry so the mooring boat would be unable to get alongside the pile.

Pilots prefer to dock 2 hours either side of low water at Texaco and about one hour either side of low water at the Shell berth.

The depth at the Texaco berth is greater than at Shell, 4.5 m. at chart datum. At both Shell and Texaco, vessels berth head out starboard side to.

The Texaco berth is made up of wooden pilings and a platform and is about 80 m. in length. Parts have recently been renewed. A searchlight is necessary for night mooring. The after moorings at the Texaco berth are sent to a staghorn.

The official opening times of the pontoon bridge appear to be 0300 hrs., 1100 hrs., 1600 hrs. and 2300 hrs., although these times are liable to change if power is not available. They will also open at other times for river traffic if power is available.

Cargo: Shell (November 1989): The ship's portable flexible hose was used for discharge. The capacity of the shore tank is 180 tonnes.

The maximum back pressure allowed is 12 Bar and with 2 pumps we averaged 40 t.p.h. (LPG mix 80/20). The ship's radio was used to communicate with the shore during cargo operations.

Check for leaks were made prior to commencement of discharging and hot gas was used for 10 minutes on completion. No difficulties were encountered.

The shore Surveyor checks the shore tanks and then boards the vessel on completion.

Texaco (December 1989): Texaco have 9 horizontal cylindrical tanks for ambient storage of LPG (5 × 660 bbls. and 4 × 160 bbls.). The maximum back pressure allowed at the berth is 150 p.s.i. (10 Bar). There are LPG shipments to the Texaco berth every 3 weeks. White oils are also handled at this berth.

The Esso berth which is 0.25 miles upstream of the Texaco berth is of similar construction.

General: It is advisable to keep all cabins and lockers locked and all movable objects under lock as many "visitors" are likely to board the vessel.

We employed 2 guards, larger vessels should employ more guards.

There are 2 tanker berths upstream of the pontoon bridge, these are operated by Texaco and Esso. The Pontoon bridge is only very occasionally opened for sea-going vessels as there is a lack of electric power to operate the winches.

All lights, including Georgetown Lighthouse, but excluding the leading lights are extinguished.

Bauxite vessels with maximum draft of 18 ft. can transit the 55 miles up river to Mackenzie, but during day time only and on a flood tide.

There is a silo ship at fixed moorings to the West of the main Channel, abeam of Georgetown Lighthouse. It is moored bow out. Vessels with a draft of 30 ft. can be handled at the silo vessel at MHWS and 28 ft. 6 in. at normal high water.

Fresh water is only available at one general cargo berth in the town.

It was possible to make an international call from the Tower Hotel near the Cathedral. The cost to Europe is about U.S.$1.60 per minute.

It is very important to make a thorough stowaway search prior to departure.

SHIPMASTER'S REPORT: February 1990.

Berth: Esso Ramsburg.

Position: Lat. 06° 45.2' N., Long. 58° 11.25' W. (BA Chart No.519).

Berthing: The berth is on the East bank of the River at Georgetown. It is 100 m. long and is at the present time being refurbished with tarred hardwood and logs.

The depth alongside at MLW is 14 ft. This depth extends to 100 ft. off the jetty.

Cargo: Mogas is handled by a 6 in. line to a tank of 15,000 bbls. Gas Oil is handled by a 6 in. line to a tank of 18,000 bbls. and Av. Jet is handled by a 4 in. line to a tank of 6,200 bbls. Lube Oils are also handled. There are no facilities for handling of LPG.

Shore hoses are used and a pumping rate of 1,700 bbls./hr. can be achieved. On completion of operations, ullages, temperatures and water dips are taken, ship's forms used.

General: Vessels berth port or starboard side alongside, depending on the tide.

Ship's gangway was difficult to land at low water.

Berth: Guyoil Providence.

Position: Lat. 06° 45.65' N., Long. 58° 11' W. (BA Chart No.519).

Berthing: The berth is operated by Guyoil Providence who are a state oil distribution company. The berth is 50 m. long and is constructed of hardwood, logs and planks. The depth alongside at MLW is 12.5 ft.

Cargo: There is 1 dual purpose 6 in. line for Av. Jet and Gas Oil and1×6 in. line for Mogas. There are 4 tanks, 1×5,000 bbl. for Mogas, 1×5,000 bbl. for Av. Jet and 1×5,000 bbl. and 1×10,000 bbl. tank for Gas Oil. There are no tanks for LPG.

Shore hoses were used for discharge operations.

A water flush is required between Av. Jet and Gas Oil and vice-versa.

General: Vessels berth port or starboard side alongside, dependent on tide.

AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown, Guyana. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

Guyana

ESSEQUIBO RIVER (Bartica): 06.24 N. 58.37 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot Station. Pilotage compulsory. Pilot boardsfrom black cutter 5 cables N.W. of the Outer Georgetown Light.

Essequibo Light (steel framework tower with red and white horizontal bands) marks seaward end of Essequibo Main Ship Channel. Vessels in vicinity of Demerara Pilot Station should listen for pilot boat on VHF Channel 16.
RESTRICTIONS: The Essequibo Bar is composed of hard mud and sand. The least depth of water is 3 ft. less than for Demerara Bar. Vessels should not attempt to cross the Essequibo Bar drawing more than 3 ft. less than that predicted for the Demerara Bar.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
MEDICAL: Hospital at Georgetown and Bartica.
DENSITY: 1000, fresh water.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: At Georgetown.
REPAIRS: Government dry dock situated at Mazaruni, approximately 40 miles up river at junction of Essequibo and Mazaruni Rivers. Extreme dimensions: 160 ft. by 35 ft.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown, Guyana. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

GEORGETOWN: 06.49 N. 58.10 W. (See Plan)

PORT LIMITS: Seaward by an arc of a circle with radius 1 nautical mile, with the Georgetown Lighthouse as centre.
DOCUMENTS:
Certificate of Registry.
8 Crew Lists.
8 Provisions and Stores Lists.
4 Passenger Lists.
Customs Documents:
2 Reports of Ship's Stores (Form C1).
2 Lists of Crew Personal Effects (Form C2).
1 List of Unmanifested Cargo (Form C3).
12 Health Declaration Forms (W.H.O.2)
Health Documents for Crew (1 copy for each crew member).
5 Cargo Manifests.
5 Bills of Lading.
PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at Pilot Station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in Northwestern quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 60 ft. in length.
ANCHORAGES: There are 5 with a least depth of approximately 20 ft. MLWS named A to E from North to South. Vessels are safely anchored at any of the above anchorages 1.5 cables to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.
RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.
MAX. SIZE: Draft 30 ft. 08 in.
HEALTH: Radio Pratique is not given, and Pratique is only given at Georgetown. This normally involves a visit from the Health Authorities if the vessel is clear. If a vessel is "suspect" or "infected", Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Buoy as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.
RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kHz., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF Channel 16, HF 2738 and SSB 8281.2 kHz.
RADAR: No service available.
TUGS: At present, vessels dock stem on to the tide without aid of tugs. However, tugs could be provided if urgently required.
BERTHING: There are 6 main wharves privately and government owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 ft. to 20 ft. at LWS, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.
CRANES: Heavy lift cranes of 25 tons available. Ship's gear has to be used. No floating cranes.
BULK HANDLING FACILITIES: The sugar berth is 416 ft. in length with least depth alongside of 18 ft. MLWS and can accommodate vessels up to 530 ft. in length. Loading rate is 500 t.p.h. using 2 chutes. Vessels should not be more than 63 ft. beam.
BRIDGES: Demerara Harbour Bridge: Floating bridge with retractor span situated 4.2 miles from mouth of river. Arrangements for passing are made by Agents. Bridge operators keep radio watch on VHF Channel 16.
STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 1600 and 1900 and they earn time-and-a-half or double time on public holidays according to which one of the 12 public holidays they work.
MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available.
TANKERS: There are no residue discharge facilities at this port. There are 4 tanker berths in the Georgetown area.
Rome Terminal (Shell) – depth alongside 18.5 ft.
Ramsburg Terminal (Esso) – depth alongside 16 ft.
Ramsburg Terminal (Texaco) – depth alongside 18 ft.
Providence (Guyoil) – depth alongside 8.5 ft.
Size of pipelines: 6 in.
DENSITY: Average density in port is 1015, though during the rainy season (March-May; October-December) density of water may be as low as 1000 at LW in the harbour.
FRESH WATER: Fresh water is available, and is delivered alongside. The ship is required to pay for labour, overtime, etc., involved in the delivery.
FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before HW and leave not later than 1 hour after HW at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.
FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload and/or proceeding up river.
CONSULS: (and Embassies)
Belgium
Brazil
Canada
China
Colombia
Costa Rica
Cuba
Denmark
Egypt
France
Germany
India
Italy
Jamaica
Japan
Korea
Libya
Mexico
Netherlands
Norway
Panama
Sweden
Trinidad & Tobago
United Kingdom
U.S.A.
Venezuela
Yugoslavia
REPAIRS: Every type of deck or engine repair is undertaken at Guyana National Engineering Corporation (GNEC) Dry Dock. Above waterline and engine-room repairs of any type are undertaken on vessels exceeding the dimensions mentioned below while vessel is anchored in the stream. Also see "Dry Docks".
DRY DOCKS: GNEC Dry Dock: A graving dock 210 ft. × 37 ft. 9 in. at entrance situated South of GNEC No. 2 Wharf, which is State owned and operated on normal commercial lines. 198 ft. length of dry dock is on blocks. Breadth: top 46 ft. 4 in., bottom 40 ft. 9 in., depth on sill at HWOST 92 ft.

Government Dry Dock: Situated at Mazaruni approx. 40 miles upriver at junction of Essequibo and Mazaruni rivers is a graving dock and has extreme dimensions of approx. 160 ft. × 35 ft.
SURVEYORS: Lloyd's and Bureau Veritas. No cargo inspectors available.
GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and are obtained through a watchman's pool by ships' Agent.
PIRACY: Armed gangs of robbers have boarded vessels from shore and from canoes and stolen quantities of ship's stores.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of half-a-pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*
CARGO GEAR: Ship's gear.
REPATRIATION: Arrangements normally made through ship's Agents.
AIRPORT: Timehri International Airport is situated approx. 30 miles South of Georgetown with highway connection and is served by many intercontinental airlines.
TIME: 3 hours behind GMT. No alterations made to clocks during the year.
HOLIDAYS: New Year (January 1st); *Eid-ul-Ahza; *Phagwah; Republic Day (February 23rd); Good Friday; Easter Monday; Labour Day (May 1st); *Youman Naubi; Caribbean Day (July 5th); Commonwealth Day (First Monday in August); *Deepavali; Christmas Day (December 25th); Boxing Day (December 26th). *Religious holidays are variable.
POLICE/AMBULANCE/FIRE: Tel. 999. There are Police/Ambulance/Fire Stations on the waterfront.
TELEPHONES: Could be arranged through Coast Station 8RB.
BANKS: Chase Manhattan Bank N.A., Bank of Guyana Building, Church Street, Georgetown, P.O.Box 101080, Telex: Chase Bk, GY 2222.

Barclays Bank Int. Ltd., 48 Water Street, Georgetown, Telex: Barclay GY 2248.

STORING: See "Prelims".
(1) Yes. (4) Yes.
(2) Yes. (5) Yes.
(3) Yes. (6) Yes.

SHORE LEAVE: Granted by Immigration Boarding Officer.
IDENTIFICATION CARDS: Not required.
DELAYS: Only when berths are occupied.

SHIP'S OFFICER'S REPORT: September 1988.

During vessel's stay in Georgetown I was able to gather the following information:

In a major step towards promoting the export of Bauxite, the Guyanese government has charted the Panamanian flag vessel M.V. "Arrowcane II", for an initial period of 5 years. This vessel will be a silo ship for transhipment of Bauxite.

She will be permanently moored in position Lat. 06° 49' N., Long. 58° 10.5' W. (approximate), heading North (See "Plan").

The "Arrowcane II" has been converted into a self-loading/discharging silo ship. She has an arrangement for discharging barges on her port side using on-board grabs, and then loading larger ships on her starboard side using a conveyor belt. She also has "Yokohama type" fenders on her starboard side.

Initially there was a draft restriction for vessels loading Bauxite at Linden (06° 01' N., 58° 18' W.) (up the Demerara River), so it was not possible for large vessels to take a full load. With the establishment of this silo ship at the mouth of the river it will be possible to load vessels to a deeper draft.

It was not possible to get other details about the loading draft restrictions, loading rates, etc., as the silo ship was still not operational when we left Georgetown. The 4 buoys have been laid and M.V. "Arrowcane II" was to carry out the "mooring operation" within a few days and become fully operational after 2 weeks.

SHIPMASTER'S REPORT: November 1989 and December 1989.
Charts: B.A. Charts No. 519, 527, 533 and 572.
Documents:
3 copies Crew Personal Effects List.
3 copies Bonded Stores List.
3 copies Provisions List.
2 copies Unmanifested Cargo.
1 copy Maritime Declaration of Health.
8 copies Crew List.

Port Officials: The Port Officials boarded at the berth and the party was large for a small vessel. The bond was sealed after gratuities given out.

Pilotage: The pilot boards at the Pilot Buoy (which was unlit at the time of our visits) from a large cutter with a black hull and white upper works with "Pilot" on the side. The name of the vessel was "Lady Young" and it was similar in appearance to a small tug.

There is a shortage of pilots as they are also required for Berbice and Essequibo, so it is usual for a pilot to transfer from an outward bound vessel to an inward bound vessel, and as this is the case, there are quite often long delays. Change of pilot takes place off the town.

A 24 hour pilot service is operated from Georgetown to the sea as long as the leading lights are operating.

Approaches: The headland on Pomeroon River is conspicuous on the radar at 20 miles. The tower and factory at Devonshire Castle Flats/Anna Regina are conspicuous on the radar at 25 miles. The town of Georgetown is also conspicous at 25 miles on the radar.

The wreck just North of the Pilot Buoy in position Lat. 07° 00.8' N., Long. 58° 02.9' W. is no longer visible at low water.

The Demerera D/F Beacon is very unreliable and the Georgetown light was not operating at the time of our visit.

Anchorage: November 1989: Vessels anchor just North of the Pilot Buoy in a depth of approximately 4 fathoms. The bottom is mud and there is a large groundswell.

December 1989: Whilst waiting for the Sea Pilot for the outward passage we used the River Anchorage and anchored in Position "C". The River Pilot advised us to use 4 shackles in the water. Whilst at this anchorage a good watch should be maintained as thieves may try to board the vessel.

Channel: There are very few buoys left in the Channel and the pilot uses the leading marks day and night.

The old front leading mark has been moved to behind the rear mark (225° × 0.85 miles behind the original rear mark).

The Channel from the Pilot Buoy to the ship silo is 200 ft. wide and is aligned 045°/225°. The Channel has recently been dredged to 20 ft. 6 in. at chart datum (19 ft. 6 in. MLWS), although it was found to be silting to 17 ft. chart datum. There is a lot of mud/silt in suspension.

Radio/VHF: In November 1989, Georgetown Lighthouse Radio was first contacted on VHF Channel 16 at a distance of 30 miles, working Channel 12.

We were not able to contact Demerera Radio (8RB) prior to contacting Georgetown Lighthouse Radio, although another vessel reported making contact with the station at a distance of 120 miles on 2,558 kHz./2,049 kHz.

Whilst at anchor we worked Demerera Radio on 2,558 kHz./2,049 kHz. The station was very helpful.

The pilot launch "Lady Young" works on VHF Channel 16 but will switch to Channel 14 if required.

In December 1989, we made contact with Demerera Radio at over 100 miles (calling 2,182 kHz., working 2,258 kHz./2,049 kHz.). It is in order to make a local call to the Agent.

Berthing: Shell (November 1989): We berthed on the sea side of the Shell pontoon bridge at high water. Our draft was 4.4 m. and we experienced no difficulties going alongside. We unberthed one hour before low water with a draft of 4.1 m. and again experienced no difficulties even though the echo sounder indicated no water under the keep until we were 10 m. off the berth, where the depth was 7.0 m. at datum until we were abeam of Georgetown Lighthouse.

We berthed head out starboard side alongside.

The moorings consisted of 2 head/stern lines and 1 spring at each end. The mooring lines are run by the boat which was very efficient.

The tidal range at the berth is about 2.0 m. The depth alongside at chart datum was found to be about 4.0 m.

Berthing and unberthing is affected day and night.

A searchlight is very useful when berthing and unberthing.

Shell/Texaco (December 1989): Pilots are not keen to berth or unberth at Shell (called 'Rome' on documents) and Texaco (called 'Ramsburg' on documents) at slack low water. At low water the forward mooring pile at Texaco is dry so the mooring boat would be unable to get alongside the pile.

Pilots prefer to dock 2 hours either side of low water at Texaco and about one hour either side of low water at the Shell berth.

The depth at the Texaco berth is greater than at Shell, 4.5 m. at chart datum. At both Shell and Texaco, vessels berth head out starboard side to.

The Texaco berth is made up of wooden pilings and a platform and is about 80 m. in length. Parts have recently been renewed. A searchlight is necessary for night mooring. The after moorings at the Texaco berth are sent to a staghorn.

The official opening times of the pontoon bridge appear to be 0300 hrs., 1100 hrs., 1600 hrs. and 2300 hrs., although these times are liable to change if power is not available. They will also open at other times for river traffic if power is available.

Cargo: Shell (November 1989): The ship's portable flexible hose was used for discharge. The capacity of the shore tank is 180 tonnes.

The maximum back pressure allowed is 12 Bar and with 2 pumps we averaged 40 t.p.h. (LPG mix 80/20). The ship's radio was used to communicate with the shore during cargo operations.

Check for leaks were made prior to commencement of discharging and hot gas was used for 10 minutes on completion. No difficulties were encountered.

The shore Surveyor checks the shore tanks and then boards the vessel on completion.

Texaco (December 1989): Texaco have 9 horizontal cylindrical tanks for ambient storage of LPG (5 × 660 bbls. and 4 × 160 bbls.). The maximum back pressure allowed at the berth is 150 p.s.i. (10 Bar). There are LPG shipments to the Texaco berth every 3 weeks. White oils are also handled at this berth.

The Esso berth which is 0.25 miles upstream of the Texaco berth is of similar construction.

General: It is advisable to keep all cabins and lockers locked and all movable objects under lock as many "visitors" are likely to board the vessel.

We employed 2 guards, larger vessels should employ more guards.

There are 2 tanker berths upstream of the pontoon bridge, these are operated by Texaco and Esso. The Pontoon bridge is only very occasionally opened for sea-going vessels as there is a lack of electric power to operate the winches.

All lights, including Georgetown Lighthouse, but excluding the leading lights are extinguished.

Bauxite vessels with maximum draft of 18 ft. can transit the 55 miles up river to Mackenzie, but during day time only and on a flood tide.

There is a silo ship at fixed moorings to the West of the main Channel, abeam of Georgetown Lighthouse. It is moored bow out. Vessels with a draft of 30 ft. can be handled at the silo vessel at MHWS and 28 ft. 6 in. at normal high water.

Fresh water is only available at one general cargo berth in the town.

It was possible to make an international call from the Tower Hotel near the Cathedral. The cost to Europe is about U.S.$1.60 per minute.

It is very important to make a thorough stowaway search prior to departure.

SHIPMASTER'S REPORT: February 1990.
Berth: Esso Ramsburg.
Position: Lat. 06° 45.2' N., Long. 58° 11.25' W. (BA Chart No.519).
Berthing: The berth is on the East bank of the River at Georgetown. It is 100 m. long and is at the present time being refurbished with tarred hardwood and logs.

The depth alongside at MLW is 14 ft. This depth extends to 100 ft. off the jetty.

Cargo: Mogas is handled by a 6 in. line to a tank of 15,000 bbls. Gas Oil is handled by a 6 in. line to a tank of 18,000 bbls. and Av. Jet is handled by a 4 in. line to a tank of 6,200 bbls. Lube Oils are also handled. There are no facilities for handling of LPG.

Shore hoses are used and a pumping rate of 1,700 bbls./hr. can be achieved. On completion of operations, ullages, temperatures and water dips are taken, ship's forms used.

General: Vessels berth port or starboard side alongside, depending on the tide.

Ship's gangway was difficult to land at low water.

Berth: Guyoil Providence.
Position: Lat. 06° 45.65' N., Long. 58° 11' W. (BA Chart No.519).
Berthing: The berth is operated by Guyoil Providence who are a state oil distribution company. The berth is 50 m. long and is constructed of hardwood, logs and planks. The depth alongside at MLW is 12.5 ft.

Cargo: There is 1 dual purpose 6 in. line for Av. Jet and Gas Oil and1×6 in. line for Mogas. There are 4 tanks, 1×5,000 bbl. for Mogas, 1×5,000 bbl. for Av. Jet and 1×5,000 bbl. and 1×10,000 bbl. tank for Gas Oil. There are no tanks for LPG.

Shore hoses were used for discharge operations.

A water flush is required between Av. Jet and Gas Oil and vice-versa.

General: Vessels berth port or starboard side alongside, dependent on tide.

AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown, Guyana. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

LINDEN: 06.00 N. 58.17 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilotage compulsory. Pilots are stationed at Georgetown. ETA to be given 12 hours in advance to Pilot Station. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

From Georgetown to Linden and Linden to Georgetown, pilotage not compulsory, but advisable to use G.N.E.C. Pilots.
RESTRICTIONS: Governed by depth of water at Demerara River Bar. Entrance normally at HW. Max. speed limit on the river is 10 knots.
ANCHORAGES: Vessels proceeding to Linden in ballast and drawing less than 15 ft. may anchor beyond Southern limit of Georgetown. Depths 16 ft. – 18 ft. MLWS.
MAX. SIZE: Draft 21 ft. 6 in.
HEALTH: Pratique given at Georgetown by Health Authorities. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz, 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: There are 2 bauxite berths accommodating vessels of up to 570 ft. One loader for metal grades has an airdraft of 29 ft. 8 in. and a loading rate of 800 t.p.h. The second loader for calcined bauxite has an airdraft of 34 ft. and a loading rate of 350 t.p.h.

The Alumina berth has a travelling tower with an airdraft of 64 ft. and a loading rate of 400 t.p.h. Max. beam of vessel 85 ft.
MEDICAL: Hospital at Georgetown.
DENSITY: 1000, fresh water.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
CONSULS/REPAIRS: At Georgetown.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

NEW AMSTERDAM (Everton, Berbice): 06.14 N. 57.31 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot Station. Pilotage compulsory. Pilot boardsfrom black cutter 5 cables N.W. of the Outer Georgetown Light.
RESTRICTIONS: The Berbice Bar is composed of fairly hard mud. Vessels may cross the Berbice Bar on even keel (reported to be dredged to 14.8 ft.)
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Berbice by Health Authorities. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz, 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: The Bauxite Berth is about 1,500 ft. long, and has a fixed loading arm with an average loading rate of 500 t.p.h. The airdraft is 36 ft.

There is a strong ebb current of about 4-5 knots, although the flood runs at about 3 knots.
MEDICAL: Hospital at Georgetown.
DENSITY: 1000, fresh water.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
CONSULS/REPAIRS: At Georgetown.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown, Guyana. *Tel:* 02-59350. *FAX:* 02-78545. *Contact:* I. English, General Manager.

LOCATION: Degrad-des-Cannes – 15 km. from Cayenne.
Le Larivot – 10 km. from Cayenne.
Kourou – 60 km. from Cayenne.
Saint-Laurent-du-Maroni – 250 km. from Cayenne.

PILOTAGE: Notice of ETA and request for a Pilot no less than 24 hours before ETA at Degrad-des-Cannes Channel Buoy and 48 hours for Saint-Laurent and Kourou.

Station de Pilotage de Guyane, Port du Degrad-des-Cannes, 97354 – Remire. Tel: 35.45.20, 35.47.64.

ANCHORAGES:
1. At Sea Buoy at Cayenne.
2. At Sea Buoy at Degrad-des-Cannes.
3. At Salut Island (Iles du Salut).

RESTRICTIONS: Permanent dredging underway. Recommended that vessels approach at high tide.
Depth of water in channels:
Cayenne-Larivot (10 km.): Height of tide.
Degrad-des-Cannes (15 km.): 3.0 m. + height of tide.

HEALTH: French Regulations apply.

RADIO: Cayenne Radio.

VHF: Harbour Master and Pilot Station on Channel 16.

TUGS: Not available.

BERTHING: Berth at Degrad-des-Cannes on the Mahury River, length of concrete wharf is 300 m., max. LOA 160 m. Roll-on/Roll-off facilities available. Discharge of general cargo and containers by ship's gear.

BULK HANDLING FACILITIES: Steel wharf with dolphins. Cement discharged with ship's gear. Max. LOA 160 m.

TANKERS: *Degrad-des-Cannes:* Steel wharf with dolphins. Min. LOA 80 m. Max. LOA 130 m.
Le Larivot: Concrete wharf. Max. LOA 100 m. Depth 4.9 m.

FRESH WATER: Available.

FUEL: By road tanker.

REPAIRS: Limited facilities available.

REPATRIATION: Rochambeau Airport. Connecting flights to France, Suriname and Brazil.

TIME: GMT minus 3 hours.

POLICE/AMBULANCE/FIRE: Contact Harbour Office at Degrad-des-Cannes.

GENERAL: Customs and Frontier Police at Degrad-des-Cannes.

SHIPMASTER'S REPORT: October 1990.

Arrival: Vessel arrived at Degrad Des Cannes Fairway Buoy at 2130 hrs., and anchored to Pilot's advice.

Pilot starts one hour before H.W., in order to be between Buoys No. 10 – 18 at H.W. The shallowest part of the channel is between Buoys No. 1 – 27.

Our deepest draft was 5.03 m.

A tug stands by in case there are any difficulties when transitting the channel. The channel is 80 m. wide, and the buoys are spaced 160 m. apart. The current was to the West at 2.5 knots. Vessel has to keep close to the green buoy.

Departure: Vessel departed at 0330 hrs., and waited at the channel entrance to allow a vessel with draft 5.90 m. to enter.

Dredger: On our arrival, the dredger was under repair, but began work again after 10 days.

Current: According to the Pilot, the current is normally to the West, but changes twice a year and runs to the East for 8 days. In the dry season, the current still runs up 15 minutes after H.W. In the rainy season, the current runs down half an hour before H.W.

Berthing: On approaching the berth, the vessel turns on the starboard anchor, with 2 shackles in the water.

Vessels without bow thrusters must leave berth before H.W., as the current from H.W. onwards pushes the vessel on to the berth.

AUTHORITY: *Port Director:* M. le Directeur, Departemental de l'Equipement, Vieux Port, 97300 Cayenne.

Port Manager: M. l'Ingenieur Subdivisionnaire du Service Maritime, B.P. 1106, 97306 Cayenne, Cedex. *Tel:* 35.58.00. *FAX:* 35.53.96.

Harbour Master: M. le Commandant des Ports de Guyane, B.P. 1106, 97306 Cayenne, Cedex. *Tel:* 35.44.90, 35.45.28. *FAX:* 35.52.51.

NOTES

Haiti

GENERAL

DOCUMENTARY REQUIREMENTS PRIOR TO ARRIVAL:
Advice of Arrival: The arrival of the vessel must be announced 48 hours in advance, and in writing, to the Port Captaincy and to the Port Authority, with indication of the vessel's characteristics, the cargo which will be discharged and loaded, and requirements concerning supply of water, etc.
Information Concerning Cargo Intended for the Port: The Agency must receive in good time by air mail 6 copies of the Cargo Manifest and 2 copies of the Bills of Lading. In the event that it is not possible to supply these documents by mail, the information must be provided by telex to the Agency so that the latter may draw them up.

The Cargo Manifests are distributed to the Port Authority, the Haiti Terminal (private concern handling cargo consolidation), to the Ministry of Commerce, the Ministry of Finances and to the Agency.
REQUIREMENTS RELATING TO THE RECEIPT OF THE VESSEL:
Reception Commission: The vessel is received by representatives of the Port Health, Immigration, Customs, International Police, National Port Authority and the Agency.
Documentation Required: On the arrival of the vessel, the following documents are required, OEA/ALALC, IMO and certain other documents being acceptable.

	No of Copies and Distribution					
Type of Document	*Health*	*Immigra-tion*	*Customs*	*Police*	*NPA*	*Agency (a)*
General Declaration	–	–	1	–	1	1
Cargo Manifest (b)	–	–	–	–	1	–
Crew List	1	1	3	1	–	1
List of Passengers	–	1	2	–	–	–
List of Stores	–	–	2	–	–	–
Declaration of Crew Effects	–	–	2	–	–	–
Maritime Health Declaration	1	–	–	–	–	–
Mail List	–	–	–	–	–	1
Arms and Ammunition Manifest	–	–	1	1	–	1

(a) The Agency requires additional copies of the Crew List, the Passenger List, the Stores List, the Arms and Ammunition Manifest, etc., dependent upon the destination of the vessel, in accordance with the requirements of Consular Clearance.

(b) Required in the event that the manifest has been received, or information regarding the cargo, in advance of the arrival of the vessel; if not, the agency requires 4 or 6 copies for distribution amongst the different authorities.
REQUIREMENTS CONCERNING DOCUMENTATION ON SAILING:
Documentation on Sailing: At the request of the Agency, the Customs issue a clearance with which permission to sail is applied for from the Port Captaincy. The latter's permit is used for requesting the services of the Pilot from the National Port Administration.

An Outgoing Manifest is presented to Customs which also contains a sworn statement (sworn statement of the Master of a vessel with cargo, or sworn statement of the Master of a vessel in ballast), and the List of Passengers. If the vessel is sailing with cargo, it is presented in 6 copies; if in ballast, in 4 copies.
CONSULAR INTERVENTION:
Consular Documentation: In accordance with the 1963 Customs Code, Article 119, the Master of a vessel loading cargo for Haiti, or his representative, must sign before the Consul a Declaration sworn as to the truthfulness of the manifest. This article is transcribed as follows:
Quote:

Article 119, *Oath.* Masters of vessels or their representative, at the time of having their manifests visaed, shall give the following oath which shall be transcribed by the Consul at the bottom of the manifest: I swear that this manifest contains exactly the packages shipped on board my vessel, that the quantities are in agreement with those shown on the Bills of Lading. I declare that I will accept all penalties which I may incur for offence against the Customs Law. I give my hand hereto.
Unquote.

In general, Consular Clearance has to be obtained at each port from the first at which cargo is loaded for Haiti. For this purpose, the Consul requires 6 copies of each of the following documents:
General Declaration.
Cargo Manifests or In Ballast.
Crew List.
List of Passengers or Negative.
Stores List.

The Consul returns 3 copies of the documents, which must go with the vessel, and 6 envelopes, i.e. 1 for each of the following Authorities:
General Customs Administration.
Director of Customs.
Department of Commerce.
Fiscal Department.
Finance Department.
Customs Collector.

The 6 envelopes are not always received, and at times only 2 copies of the visaed documents are given back. The Authorities apply a certain tolerance when it is established that the Consular Fees have been paid at the Consulate or at destination.

CAP HAITIEN: 19.46 N. 72.12 W. (See Plan)

APPROACHES: The current is about 3 knots in the entrance to the port when the river is in flood.
ANCHORAGE: Vessels which are unable to moor alongside because of deeper draft are anchored off the wharf.
BERTHING: The wharf at Cap Haitien was constructed by the Compania Industrial Maritima. The construction is in reinforced concrete. It extends for a length of 900 ft. in an Easterly direction and comprises 3 sections. The most important section is 600 ft. long and has berths for deep sea vessels on the South side in depths of 30 ft. The Western section, nearest the shore, is 300 ft. long with variable depths of 7 ft. to 9 ft. alongside, with berths for motor vessels of small tonnage and sailing ships. The central section accommodates the Customs offices. 2 metal warehouses border the East and West ends of the wharf. Between the warehouses is 1 fixed crane of 30 tons capacity.
FRESH WATER: Fresh water is available at Cap Haitien.
FUEL: Available, only in drums.
GENERAL: For all general information refer to "Port-au-Prince".
DEVELOPMENTS: Ro/Ro Berth length 100 m., under construction. Main pier length 250 m., under construction. Cruise ship pier length 170 m., to be constructed.

REPORT: December 1984.
Documents: See "Port-au-Prince".
Approaches: New lighthouse on Pte. Pinolet seen at 30 miles.
Pilotage: Pilots boarded in Lat. 19° 48.8' N., Long. 72° 10.9' W. Pilots board from small launch, approx. 5 m. long, with grey hull and yellow decking. The words "Pilote No. 1" painted in black on either side of white housing.

2 Pilots boarded – Senior Pilot/Port Captain: Eugene Magloire.
Restrictions: Channel very well marked – new beacons in positions as shown on "Plan". Least depth encountered in channel 10 m.
Radio: ETA telex sent via satellite to Agents. No radio station available.
VHF: Called Pilot Station on VHF Channel 16, 2 hours and 1 hour prior to arrival, but received no reply. Shortly before arrival at pilot boarding point, Pilot Station advised, on Channel 16, that pilot boat was coming out to our vessel.
Tugs: None. Small mooring boat takes heaving lines only ashore.
Berthing: Our vessel, 200 m. long, berthed at the Passenger Berth after swinging to starboard in the basin off the berth (depth 11 m.).

The berth is well fendered (Kleber fenders). Apart from main access to berth, there is also a footbridge for passengers.

Port has recently been reconstructed with modern berthing facilities, adequate mooring points, lighting, warehousing, open storage, etc.
Cargo Handling Equipment: Observed 1 conveyor, no cranes in evidence.
Regulations: Not permitted to take fruit ashore.
Authority: Autorite Portuaire National.

MIRAGOANE: 18.25 N. 73.04 W. (See Plan)

BERTHING: The facilities at Miragoane are 1 small jetty for loading and discharging general cargo with a max. depth alongside of 18 ft.

There is a wharf for loading bauxite, belonging to the Reynolds Company, with a depth alongside of 34 ft. Total annual export about 350,000 tons.
GENERAL: For all general information refer to "Port-au-Prince".

PORT-AU-PRINCE: 18.33 N. 72.21 W. (See Plan)

Also see "General" before first port.
DOCUMENTS:
Shipmasters Report: October 1982.
Clearance from Last Port.
6 Crew Lists.
3 Nil Passenger Lists.
3 Provisions/Stores Lists.
3 Crew Personnel Effects Lists.
2 Ports of Call Lists.
1 Vaccination/Inoculation List.
APPROACHES: The Port of Port-au-Prince is situated at the extreme S.E. of the bay. It can be approached from the North and from the South by 2 channels.

One may approach from the N.E. by the Saint-Marc channel or from the West by the Gonave channel, between Trou-Forban Point and the village of Ca-Ira. The bay extends between Trou-Forban Point in the North and the village of Ca-Ira about 20 miles to the South. The position of Ca-Ira is 18° 32' N., 72° 39' W. From Ca-Ira the South coast of the bay extends about 2 miles N.E. and about 12 miles East to Pointe Lamentin.
PILOTAGE: Pilotage is compulsory for all movements of ships in the port. The Pilot boards to the West of the Fairway Buoy and is accompanied by port officials, i.e. Port Doctor and Representatives of Immigration, Police and Customs. These officials insist on using the accommodation ladder to board the vessel. Masters must arrange with their respective Agents the time which they will require a Pilot to leave the port. If they are ready to depart before the hour arranged they may call the Pilot by 3 blasts of the ship's whistle.

Berthing from 0530 hrs. – 2100 hrs. except Sundays and holidays.

ANCHORAGE: Vessels must anchor to the West of the large red Buoy No. 29 or at the quarantine buoy, situated about 1.5 mile N.N.W. of Buoy No. 29. A bottom of sand over coral is to be found all over this region n depths of 10 to 18 fathoms.

Vessels may anchor or depart at any hour of the day or night.

In order to facilitate the rapid movement of vessels, these are normally nchored in order of arrival.

RADIO: All deep-sea vessels which enter the territorial waters of Haiti re obliged to advise the Port Radio Station.

The radio station is situated at the Bureau de Port. It is in operation 4 hours a day.

Visual light signalling may also be carried out as far as it is possible do this.

The following apparatus is used at the radio station:

1. VHF Radio – Channels 6, 12, 16 and 18.
2. Medium frequency, SSB compatible frequencies 2182 kHz, 2738 kHz. Power 150 watts, range about 250 miles.

In addition to the VHF Channels, the Pilots may use radio-telephone n the following frequencies: 2182 and 2738 kHz.

The general call and distress frequency 2182 kHz is monitored ontinuously.

All messages addressed to the Port Authorities and messages oncerning pilotage must be handled at this radio station.

Masters are particularly required to give the radio station, as soon as ey arrive, the following information:

Vessel's draft and net tonnage, amount of cargo for discharge by atch, number of gangs required.

The telephone number of the radio station is 2 – 3235.

48 hour ETA message to APN also to include details of the vessel, xpected time of departure, quantity and nature of cargo to be handled.

UGS: The port has at present a tug of 2,000 h.p. available at all times. he tug is compulsory for ships from 1,000 tons gross and upwards. At l times 2 aluminium launches, each 30 ft. long, are available for Pilot's se.

ERTHING: The new port facilities are in service, located 600 ft. North f and parallel to the existing pier.

Prime features of new facilities are:

Length of berthing space: 1,400 ft.
Width of apron 93 ft.
Container crane on rails on the apron with 30 tons capacity equipped to handle 20 ft., 35 ft. and 40 ft. containers.
Ro/Ro platform.
Depth alongside 32 ft. MLW.

inger Pier: Length 1,250 ft., width 60 ft. Ro/Ro platform on North side. n the South side there is 1,250 ft. of berthing space, depth 25 ft. – 0 ft. On the North side there is 540 ft. of berthing space, depth 32 ft.

At the outer end of the finger pier there is a dolphin berth for passenger essel. Length 888 ft., depth alongside 32 ft. Vessels may berth on both des.

There is an angular portion of 100 ft. between Quays No. 1 and 2 hich may not be used for mooring, but which the bow of the ship may verhang. Vessels must be secured by at least 2 mooring cables at the ow and at the stern.

The Port Authorities require for vessels manoeuvring in the port a inimum of 2 ft. of water under the keel. This regulation may be modified y special authorisation of the Chef de Port.

In addition to the public pier, there are 5 jetties belonging to private ompanies used for handling products in bulk. These jetties belong to e following companies:

A. La Hasco, sugar refinery established at Port-au-Prince.
B. La Minoterie, flour mill situated at Laffiteau.
C. Le Ciment d'Haiti SA, cement factory situated at Fonds Mombin.
D. Jean Ackmed, fuel installation situated at Simonette.

The above jetties are established on the North side of the bay.

E. Installations of Shell Company and Tropigas on the South side of the bay, equipped with their own mooring buoys for tankers.

ARGO HANDLING: For vessels loading and discharging at the public ier, cargo is transported on railway trucks of 25 tons max. capacity.

One quay is equipped for container ships. One quay is equipped to andle Roll-on/Roll-off traffic.

STEVEDORES: Loading and discharging of ships is carried out by gangs f private workers who are engaged by the ship's Agents under the upervision of a chief stevedore. The working gangs use the ship's own quipment for loading and discharge.

Handling rates are normally about 15 t.p.h. for general cargo, or about 25 t.p.h. for heavy articles, such as drums, planks, bundles of steel rods, etc.

Normal working hours in the port are from 0700 hrs. to 1900 hrs. from Monday through Saturday. Overtime is payable for work required at other than these hours and also for work required on Sundays and holidays.

MEDICAL: There are adequate medical facilities, pharmacies and hospitals.

FRESH WATER: Drinking water is available alongside; however, the ship must provide its own connections. Rate of loading varies from 6 t.p.h. to 12 t.p.h. 48 hours notice required.

FUEL: Fuel oil may be supplied by tanker truck.

CONSULS: Argentina, Brazil, Canada, Chile, China, Colombia, Dominican Republic, Ecuador, El Salvador, France, Germany, Honduras, Japan, Liberia, Mexico, Panama, Peru, Spain, U.K., U.S.A., Venezuela.

REPAIRS: There are no proper facilities for ship's repairs although minor repairs may be effected by small private workshops ashore.

AIRPORT: An international airport for jet planes connects Haiti with principle U.S. and Caribbean points. A local air service connects Port-au-Prince with principal towns of the Republic.

FIRE-FIGHTING EQUIPMENT: The Port Authority has a fire fighting squad equipped for early assistance. There is a town fire service organised by the Army and working in close cooperation with the Port.

HOLIDAYS: *Legal Holidays:*

Independence Day (1st and 2nd January); Labour Day (1st May); Flag Day (18th May); Ascension Day; Assumption (15th August); All Saints (1st November); Commemoration Day (13th November); Discovery of Haiti (5th December).

Authorised Holidays:

Lundi-Gras (half-day); Mardi-Gras; Good Thursday; Good Friday; Pan-American Day (14th April); President's Day (22nd June); Dessaline's Anniversary (17th October); United Nations Day (24th October); Fete des Morts (2nd November).

SERVICES: Fresh provisions are obtainable locally.

There are no facilities for refuse collection, but nevertheless it is forbidden to throw refuse, cinders or any other polluting material overboard.

Launches used for the transport of tourists are available at Port-au-Prince and these are operated by private companies. The Port Authority does not take an active part in the traffic of tourist passengers. Those who disembark on the wharf from cargo vessels or cruising liners must make their way on foot to the taxi station to take part in excursion tours. However, the majority of tourists coming on passenger liners anchored in the roads disembark by launches belonging to the Department of Tourism. They disembark at the Quai Colomb, which is under the authority of the Department of Tourism.

WEATHER: The Bay of Port-au-Prince is nearly always calm except at certain times of the year; for example, during the months from May to November, occasional strong winds may interrupt normal loading and discharging movements.

A light breeze from the East or N.E. blows after dawn, but in the afternoon a breeze 3 times stronger blows in the opposite direction.

The height of the tide is only 1.5 ft. Currents in the port are almost negligible, except that, when mooring or unmooring a vessel, one should pay attention to a Northerly current of about a quarter of a knot.

SHIPMASTER'S REPORT: June 1990.

Position: 18° 33.5' N., 72° 21' W.

Chart: B.A. Chart No. 466.

Documents:

6 Crew Lists.
1 Vaccination List.
3 Stores Lists.
3 Crew Effects Lists.

Six persons board on arrival alongside, and vessel was cleared within 15 minutes. Bonded store is not sealed; Radio Pratique not available; Only Derat Certificate is sighted.

Pilotage: 24 hour watch kept by Port Pilot Station and on Channel 16/12.

Pilot boarded at the Quarantine Anchorage at daybreak.

Pilot disembarks upon unberthing, just after vessel clears berth.

This vessel used 2 tugs, with ship's lines. Vessel berthed port side alongside at a good berth.

Anchorage: Good anchorage about 2.5 nautical miles W.N.W. of jetty.

Approaches: Only one starboard hand buoy exists.

Berth: Up to 36 ft. depth alongside. Berth can accommodate vessels up to 250 m. LOA.

Time: GMT minus 4 hours.

Flag: Blue horizontal stripe over red stripe ("Echo" can be used).

General: No passport or other documents required. I was informed by Agent that it is dangerous to be ashore after 2200 hrs. due to muggings.

No facility exists for any spares, repairs or provisions. Fuel oil available after ample notice through Agent; fresh fruit such as bananas and mangoes are available; fresh water not available. Medical services are poor.

This vessel discharged edible oil (about 3,000 tonnes) directly into tank trucks. The operation took about 48 hours, into a total of 115 trucks.

In the S.W. part of the Bay there is a Shell berth for small tankers and gas ships. Pilot advised us to use a minimum of lines for safe mooring, due to the possibility of lines being cut or stolen at night; our gangway was kept up except when in use, as a deterrent to unauthorised visitors.

AUTHORITY: Autorite Portuaire Nationale, Port de Port-au-Prince, B.P. 616, Port-au-Prince, Haiti.

Honduras

GENERAL

DOCUMENTS:

Consular Documents:

Masters shall submit for certification to the Honduran Consul or Consular Agent residing in the port of loading 4 copies of the general manifest of goods carried for the Honduran port to which it is bound. 3 copies are to be left with the Consul or Agent, and 1 copy, with the certification and receipt to be provided by the Honduran official, is to be retained. The Consul will retain 1 copy in his files, the other 2 shall be sent by the earliest mail to the Secretariat of the Treasury and the Customs Administrator.

Prior to arrival:

Arrival notice:

The Chief of Operations of the National Port Authority (ENP) must be notified in writing no more than 24 hours and no less than 8 hours in advance, of the time and date of the vessel's arrival. This notice is received on working days up to 1600 hrs., but for holidays, the request must be submitted the day before up to 1100 hrs.

The Captain of the Port, Customs, Migration and Maritime Health must be notified of the arrival within the same period indicated above.

Information on cargo for the port:

If available, the following documents must be submitted: 4 copies of the Cargo Manifest, a set of Bills of Lading, 3 copies of the Cargo List, 3 copies of the Container Contents List, and information on the cargo to be loaded. In addition, the following copies of the Cargo Index must be provided, according to the type of goods: 4 to 6 for Customs, 14 to 18 for the National Port Authority; 1 for each depot of the agency to take part, and 1 for general control.

The ENP also allows this information to be submitted after the official visit (boarding party).

Port services request:

The arrival notice submitted to the ENP also serves as a request for pilotage, docking and port services.

On arrival:

Type of Documents	*Number and Distribution of Documents*					
Basic Forms	*Port Captain*	*Customs*	*Migration*	*Maritime Health*	*Agriculture Inspection*	*Total*
General Declaration	1	1	–	–	1	3
Cargo Manifest	–	5	–	–	1	6
Crew List	–	3	1	–	1	5
Passenger List	1	2	1	–	1	5
Ship's Stores List	1	1	–	1	1	4
Crew Effects Declaration	–	–	–	–	–	–
Maritime Declaration of Health	–	–	–	1	–	1
Mail List	–	–	–	–	1	1(a)
Additional Documents						
Clearance from Last Port	1	–	–	–	–	1
Visaed Clearance from Last Port	–	1	–	–	–	1
"No Passengers" Declaration	1	2	1	–	1	5
List of Passengers In-Transit or "No In-Transit Passengers" Declaration	1	2	1	–	1	5
Cargo Manifest (b)	–	1	–	–	–	1
Crew List (b)	–	1	–	–	–	1
Passenger List (b)	–	1	–	–	–	1
Ship's Stores List (b)	–	1	–	–	–	1

(a) Submitted to the shipping Agent.

(b) With Consular visa.

Prior to departure:

Clearance must be requested from the Captain of the Port, on a special form at least 2 hours before the vessel's estimated time of departure. The form must be cleared by the Customs Chief of Exports and the Customs Administrator, therefore copies of the export cargo manifest must be submitted to Customs.

In the case of the terminals of Puerto Cortes, 30 copies of all documents are prepared, of which the vessel carries (aside from the original Sailing Permit and the Maritime Health Declaration) an original and 24 copies of the Cargo Manifest (or Ballast Manifest), the Crew List, Passenger List, the Mail and Firearms List, the Ship's Stores List, and 2 sets of the Bills of Lading.

In addition, when the ship sets sail, 3 Freighted Cargo Manifests, 2 sets of the Bills of Lading, a Crew List, a Passenger List, a Mail and Firearms List, and a Ship's Stores List must be submitted to the Chief of Docks. A copy of each of the following documents must be submitted to the Maritime Guard: Sailing Permit, Cargo Manifest, Crew List, Mail and Firearms List, and Ship's Stores List.

When the ship leaves for Guatemala, it should have 34 copies of all documents, because 4 copies are submitted to the Consul.

For ships leaving for the United States, the clearance document is in Spanish, with 6 copies to be distributed locally, plus 18 copies of the Cargo Manifest, in English, of which 16 are carried on board ship, 1 copy is sent to San Pedro Sula and the other remains in possession of the shipping agency.

Request for pilotage:

Requests for pilotage and unberthing of the vessel are submitted to the National Port Authority at least 2 hours before clearance.

Report: 1990.

Vessels are now expected to deliver 2 copies of their Register to the Port Captain at the time of Clearance Inwards at all Honduran ports.

Owners are recommended to ensure that Masters have same prepared at previous ports, to ensure that no delay is caused in Clearance Inwards.

AMAPALA: 13.18 N. 87.39 W.

PORT NO LONGER IN OPERATION.
COMMERCIAL OPERATIONS AT THIS PORT HAVE BEEN TRANSFERRED TO THE NEW PORT OF SAN LORENZO

LA CEIBA: 15.47 N. 86.47 W.

SHIPMASTER'S REPORT: 1979.

DOCUMENTS:

10 copies of Crew List
6 copies of Stores List
6 copies of Bonded Stores List
4 copies of Vaccination List
Mail Report
Passenger Report
1 copy of Derat Certificate.
Zarpe/Clearance from previous port.
14 copies Cargo Manifest/Ballast Manifest.
3 copies Bills of Lading.

If no Consul available, documents should be legalised by Consul of friendly nation or by Chamber of Commerce, stating the facts.

Also see "Puerto Castilla".

PILOTAGE: Compulsory. Pilot boards 0.5 miles from the pier. 2 hours notice required.

ANCHORAGE: Good anchorage 5 cables, 129° from pier, depth of water 40 ft.

RESTRICTIONS: Vessels able to berth and unberth at any stage of the tide day or night. Limiting factors are length and forward draft of vessel.

MAX. SIZE: Max. LOA 600 ft. However, the after end of the vessel would overhang end of berth (This vessel loaded to 23 ft. draft).

HEALTH: Quarantine Officials operate between 0600 hrs. and 1800 hrs. 2 hours notice of arrival required.

RADIO: HRW – Standard Fruit operate from their own radio station. They handle vessel's traffic on 6350.5, 8560 and 12750 kHz. They also listen on 500 kHz and 8 MHz.

Hours of Operation: 24 hours (Daily).

VHF: The Agent is on Channel 16.

TUGS: Not available. Vessel is able to dock and undock without assistance of tugs.

BERTHING: Berth available both sides of finger type pier, South side berth for side-door loading; North side for unrestricted operations. Nature of the bottom of the berth is sand.

Mooring gang (6 men) come aboard with the Pilot to assist. The bananas are loaded direct from the rail cars using spiral elevators. It is usual to load all decks at the same time.

There are no facilities for handling bulk cargoes or Ro/Ro vessels. There are no shore cranes or floating cranes. There is no storage space for breakbulk cargo or palletised cargo.

Fendering: Pier fendered with the usual Standard Fruit type fendering, vertical uprights on a horizontal "V" bellows on horizontal girders.

CHARTS: B.A. Chart No. 513 (Isla Roatan to Puerto Cortes) and U.S.G. 5393 (positions on this chart are 2.5 miles W.S.W. of B.A. chart).

CONSULS: None, however, American Consulate and those of other nations in Tegucigalpa, about 250 miles by road.

SURVEYORS: Lloyd's Agency in Puerto Cortes.

AIRPORT: International Airport "Goloson" with service daily to New Orleans and Miami, served by regular airlines.

SERVICES: Fresh water, fresh provisions, airport, telex, doctor, hospital, groceries and meats all available.

Labour: Shore labour is available for contract work such as scavenge cleaning, hull painting, etc. The work carried out during our stay was satisfactory and the rate for the foreman was U.S. $1.50 per hour and workmen U.S. $1.00 per hour.

AUTHORITY: Empresa Nacional Portuaria, Apartado Postal No. 215, La Ceiba, Honduras, Central America. *Tel:* 42-2712 (Superintendent), 43-0297, 43-0394, 43-0397. *Telex:* 8007 Enaporto Ho. *FAX:* 43-2712. *Cables:* Enportuaria. *Contact:* Raul Lafitte S., Port Superintendent.

PUERTO CASTILLA: 16.01 N. 86.03 W. (See Plan)

DOCUMENTS:

2 copies Health Declaration.
Zarpe or Clearance from Last Port.
14 copies General Cargo Manifest of all cargo to be discharged in Puerto Castilla or Ballast Manifest.
10 copies Crew List.
10 copies Passenger/Negative Passenger List.
Derat Certificate, only if first call.
10 copies Stores List.
10 copies Mail Declaration (negative or positive).
3 complete sets Bills of Lading.
5 copies Hatch List.
15 copies Tally Books (prepared generally by Agent).

New Honduras Consular Law provides that within 24 hours after a vessel sails from load port, Cargo Manifest (including Ballast), Passenger List, Crew List and Provisions List must be legalised, in Spanish language, by Honduras Consul, as well as Consular clearance obtained.

If no Consul of Honduras available within 50 miles radius of port, documents can be legalised by statement from local Chamber of Commerce, stating the facts.

PILOTAGE: Available.

ANCHORAGES: Once the vessel enters the bay, if no berth is available, she should anchor at a distance of between 0.5 mile – 1 mile from pier, and await boarding party in order to be granted Free Pratique. If proceeding direct alongside, Boarding Party will board when vessel berthed.

RESTRICTIONS: Vessels may enter the port day or night. Visit by authorities available during night time on request. Owing to remoteness of the port, Authorities have to be collected by Agent from villages within 10 miles radius of port.

MAX. SIZE: Vessels with draft up to 36 ft. can safely enter port and moor alongside pier.

HEALTH: Pratique granted after Port Authorities (including doctor) board vessel, between 0600 hrs. and 2000 hrs. Pratique granted if no contagious illnesses on board, otherwise quarantine restrictions imposed. No automatic Pratique when arriving from another Honduran port.

RADIO: Lantana Radio WOE, New Orleans Radio WNU, Limon Radio TIM, Balboa Radio NBA, Miami Radio WAX, messages routed via telegraph station Hondutel in nearby Trujillo, but not considered reliable.

Ship's radio not to be used in port except for communications with Port Authority. Vessel is fined if there is a violation.

VHF: Use Puerto Cortes Radio: Call Sign 'Cortes Radio', Channel 16, if Castilla Radio does not respond (Hours see "Puerto Cortes").

TUGS: None available.

BERTHING: The Agent and/or Port Authority to supply information as to berth, and time of docking. Departure should be effected when the despatch documents are on board and operations finished.

Pier: Made of concrete 150 m. long, width 38 m., depth 38 ft., used for all operations. Rubber/wooden fenders.

Directly adjacent to a paved area 300 m.×200 m.

Equipped with 2 open sided warehouses, each 3,000 sq.m.

Electric connections for 190 reefer containers.

CRANES: 1×20 ton (Port Authority) and 1×60 ton (Private) mobile cranes with tyres.

TANKERS: Pipeline for loading of African Palm Oil. A connection of 16 in. exterior diameter, 14 in. interior diameter, reducers available. Pumping rate 200 t.p.h.

Storage Capacity:

Product	*No. of Tanks*	*Total Capacity*
Diesel	2	240,000 barrels
Gasoline	2	100,000 barrels
Palm Oil	2	40,000 barrels
Bunkers	2	40,000 barrels
Water	1	300,000 barrels

DENSITY: 1028/1030.

FRESH WATER: Water available at wharf, and of good quality, rate approximately 15 t.p.h.

FUEL: Only Diesel and Bunker "C" fuel available, 24 hours' notice required.

CONSULS: None in port. American Consulate and others in Tegucigalpa, 320 miles by road.

REPAIRS: No facilities.

SURVEYORS: Lloyd's Agency available at Puerto Cortes.

GANGWAY/DECK WATCHMEN: Shore watchmen not usually required, and service left to the discretion of the Master.

HATCHES: On liners normally by crew with assistance of stevedores, otherwise according to C/P.

CERTIFICATES: On first call, Registered Tonnage Certificate (2 copies).

CUSTOMS ALLOWANCES: Free use on board and private consumption only.

REPATRIATION: Facilities available for effecting repatriation in La Ceiba, by air.

AIRPORT: International airport "Goloson" in La Ceiba, 90 miles from port. Local airport connecting with La Ceiba daily, except Sundays and holidays, located in Trujillo, across the bay.

TIME: GMT minus 6 hours throughout year.

HOLIDAYS: 1st January; 14th April; 1st May; Maundy Thursday; Good Friday; Saturday and Sunday of Easter; 15th September; 3rd, 12th, 21st October; 25th December. Cargo work can be arranged on those days, except Good Friday, 1st May, Independence Day and Christmas Day.

TELEPHONES: Available at the Port Authority building and Hondutel office at Trujillo, across the bay.

SHORE LEAVE: Permitted without restrictions.

IDENTIFICATION CARDS: Must be shown to gate watchmen, when crew members come back on board, and are supplied by Agents.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.$ 1.00 = 11.60 Lempirus (Lps.) (July 1996).

AUTHORITY: Empresa Nacional Portuaria (E.N.P.), Puerto Cortes, Honduras. *Tel:* Puerto Cortes: 55-0987, 55-1125. Puerto Castilla: (504) 444962. *Telex:* 8007 Enporto Ho. *Cables:* ENP, Puerto Cortes, Honduras. *FAX:* Puerto Cortes: 55-1402. Puerto Castilla: (504) 444962. *Contact:* Captain Victor Iglesias, Operations Manager.

AGENT: Maritima y Transportes, S.A., Carretera Vieja a La Lima, Km. 2, Apartado Postal No. 991, San Pedro Sula, Honduras. Tel: 53-4900, 53-1773. Telex: 5634 Marhond Ho. Fax: 53-3730. Cables: Matra, San Pedro Sula.

PUERTO CORTES: 15.51 N. 87.56 W. (See Plan)

DOCUMENTS:

Health Declaration, 2 copies.

Zarpe or Clearance Permit from the Last Port.

General Cargo Manifest (in ballast if that is the case) of all the cargo to be discharged in Puerto Cortes, 14 copies.

Crew List, 10 copies.

Passengers in Transit, or no passenger declaration, 10 copies.

Derat Certificate, only if first on board call.

Stores List, 8 copies.

Mail Sacks Declaration (negative or positive).

Bills of Lading, 3 complete sets.

Hatch List, 5 copies.

Tally Books, 15 copies.

If no consul of Honduras available, a letter from the Chamber of Commerce, stating the facts, is recommended.

Also see "Puerto Castilla".

APPROACHES: *Shipowner's Report:* 1983 (Updated 1992).

Tankers should make their arrival at a position near Lat. 15° 55' N. and Long. 87° 58' W., 4 miles North of Punta Caballos and well offshore of the shoal patches near the point. From this position true course 180° takes the ship into the bay in a minimum depth of 10.6 m. (35 ft.) West of the tanker dock and between 2 shallow patches of 8.1 m. (27 ft.) 700 yards and 450 yards W.S.W. of the tanker dock. There are 2 sets of daymarks and 2 buoys marking this approach.

Vessels may also enter the bay about 2 miles off the coast of Punta Omoa. Steer E.N.E. in the natural channel which has a minimum depth of 10.9 m. (36 ft.).

Caution: The above mentioned navigational aids are not all indicated on the charts, and are not reliable.

Work is in progress; buoyage and the shape of the coast may have changed. The West entrance will become the main deep water channel when dredging is complete and when leading lights, buoys, and beacons have been installed. An extensive reclaimed land area extends to the North from the mouth of the Rio Medina. The city wharves are being extended West.

The distance from the sea buoy to the Texaco Dock is about 4.5 miles. The city wharves are 0.5 miles further to the East. The Texaco refinery tanks, the water tank near Pier 4, the railroad shop, and the Coast Guard Pier are conspicuous in daytime.

PILOTAGE: Compulsory for vessels over 300 g.r.t. ETA to the Agent, 72, 48 and 24 hours ahead of arrival required. Pilot on VHF Channels 16 and 6.

ANCHORAGES: Once the ship enters the bay, *if no berth space has been notified to the Master,* she should anchor at a distance beyond 0.5 miles from the nearest pier, and wait for the boarding of the official party in order to be granted Free Pratique.

RESTRICTIONS: Vessels may enter the port day or night but are not visited by Port Authorities between 0000 hrs. to 0600 hrs., except in special cases.

MAX. SIZE: Dry cargo vessels up to 31 ft. draft. Tankers up to 30 ft. draft.

HEALTH: Pratique granted after Port Authorities (including doctor) board vessel, between 0600 hrs. – 2000 hrs. Pratique granted if no contagious illnesses aboard, otherwise quarantine restrictions imposed. No automatic Free Pratique when arriving from another port in Honduras.

All crew members to be vaccinated against yellow fever and cholera, if being repatriated. Vaccinations not available in Honduras.

RADIO: Port Authority operates a station HQSU, monitoring 2738 kHz, but by arrangement can reply on other frequencies. Telegrams to be routed via Hondutel, Lantana WOE, New Orleans WNU, Limon TIM, Balbao NBA and Miami WAX.

Ship's radio not to be used in port except for communication with the port authority. Vessel is fined if there is a violation. Also see "VHF".

VHF: Puerto Cortes Radio: Call sign "Cortes Radio". Channel 16.

Hours: 24 hours daily.

TUGS: 2×800 h.p. tugs available for joining up to 0.5 miles off piers. One tug usually employed for berthing and unberthing. Compulsory for vessels over 300 g.r.t.

BERTHING: The Agent to supply information as to berth, and time of docking. Pilot will board the vessel and berth it, assisted by a launch to pass ropes. Departure should be effected when the despatch documents are on board and operations finished.

Pier No. 1 (Texaco Pier), for tankers or ships loading diesel or lub-oil; max. draft 30 ft.

Pier 1-A (molasses and bulk liquids), max. depth 9.15 m. Rebuilt concrete T-Pier, in front of white and red painted tanks, between Texaco Pier and ex-Banana Pier No. 2.

Pier No. 2 out of service.

Pier No. 3 (General Cargo and Ro/Ro Pier) Length 630 ft., depth 30 ft.

Pier No. 4 (General Cargo and Ro/Ro Pier) Length 1,060 ft., depth 30 ft.

Pier No. 5 (Container Terminal, it also handles dry bulk cargo) length 1,060 ft., depth 31 ft.

CRANES: One P & H 125 ton capacity crane, 2 Paceco Container Cranes 45 ton capacity at No. 5 pier and eight cranes of varying capacities.

BULK CARGO FACILITIES: Pier No. 5 (Container Terminal) is used as a multi-function pier, it is used to handle grain, ores, fertilisers and bulk sugar. It is large enough to be able to handle both operations simultaneously.

STEVEDORES: Vessels must give accurate ETA at least 24 hours in advance to enable Agents order necessary gangs. Gangs ordered 0700 and 2100 hrs. working 12 hours (daytime) and 9 hours (night-time) excluding the meal hours (0600–0700; 1200–1300; 1700–1800 and 2300–2330). No work on Holy Friday, May 1st (Labour Day), on other holidays work is possible with double payment.

MEDICAL: No advance notice necessary for medical attention, except in very urgent cases. At San Pedro Sula (35 miles by road) very good medical service can be obtained but several medical clinics are serving this Port. No inoculations required but Master should possess International Health Cards for each member of crew.

TANKERS: *Terminal:* The Texaco Oil Refinery dock is in the S.E. corner of the peninsula. A pipe trestle/roadway of about 100 yards leads S.S.W. to the hose platform and breasting dolphins. The mooring dolphins are about 100 ft. inshore of the hose platform. The tidal range is 0.5 ft. The current in the manoeuvring area is unpredictable. Most of the time it runs parallel to the berth (110° and 290°). The breasting dolphins have been damaged several times, reportedly due to sudden changes in current.

Berthing: Tankers are moored and unmoored at anytime. The ship may be turned anywhere South of the refinery berth, then it proceeds to the dock heading either W.N.W. when mooring starboard side to, or E.S.E. when mooring port side to. The ship is stopped, stemming the current, about 100 ft. off the dock for a parallel mooring. A launch runs the head and stern ropes to the mooring dolphins. The spring ropes are either taken to the breasting dolphins by the launch or later by hand. Anchors should be ready. When mooring starboard side to, an anchor may be used to hold the ship against an inshore set. The 1,100 h.p. tug works forward alongside on his own rope. It shifts to amidships, if needed, to push the ship in or to hold her off. Sometimes the tug works the ship's rope on the hook. Pilot and tug use VHF radio (Channels 16 and 6).

Only 5 pile bollards are available for the ship's moorings, of which 3 are for the spring lines. The breast lines may have too much angle. It is recommended that segregated ballast tanks be used to keep the tanker low in the water. It is advisable not to remain alongside during strong Northers.

Facilities: There are no set emergency shutdown procedures. Each breasting dolphin is fendered by steel beams with wooden protection and 4 rubber shock absorbers. 2×8 in. hoses are used for crude oil discharge into an 18 in. pipeline about 1,500 ft. long to the 360,000 barrels storage tanks. The transfer rate is about 7,000 bbls.p.h. 1×8 in. hose is used for loading fuel oil via a 10 in. pipeline at a rate of about 3,000 bbls.p.h. Ballast and slop facilities are not available. 1 floating oil spill containment boom is kept in storage at the refinery.

Security: The port area and the Texaco Pier are fenced in and guarded; crewmen must have identification cards.

Services: No. 6 fuel is available at 3,000 bbls.p.h. and light diesel oil at 1,000 bbls.p.h. Fresh water is available at 10 t.p.h. Local machine shops can perform very minor repairs. Divers are available. Hospital, medical, and dental services are available at Puerto Cortes, or at San Pedro Sula.

Crew changes can be made. Small quantities of provisions are available.

Departure: Tankers leave the Texaco Pier and Molasses Pier at any time. Tug assistance is seldom necessary. Usually the tanker is unberthed either holding the spring ropes forward or aft to ease the vessel off the dolphins.

The Master should consult with the Pilot as to the sailing draft.

Also see "Shipmaster's Reports" – June 1981 and April 1989.

DENSITY: 1028/1030.

FRESH WATER: Water available at wharf face at 100 ft. intervals. Rate approximately 8 t.p.h. – 10 t.p.h.

FUEL: Diesel, Intermediate Fuel and Bunker "C" available, 24 hours' notice required for good service.

CONSULS: None in the port. American Consulate and others at Tegucigalpa, 200 miles by road.

REPAIRS: Local marine repair companies can undertake limited repairs of general nature; pre-advice recommended.

GANGWAY/DECK WATCHMEN: Shore watchmen not usually required and this service left to discretion of the Master.

OPENING/CLOSING HATCHES: On liners normally by crew with assistance of stevedores, otherwise according Charter Party.

CERTIFICATES: On first call, Registered Tonnage Certificate; thereafter not required unless gross/net tonnage be changed.

CUSTOMS ALLOWANCES: No restrictions, free use on board. Customs officials check no sales ashore.

SURVEYORS: Lloyd's Agency available locally.

REPATRIATION: All facilities available for effecting crew changes and repatriation by sea or air.

AIRPORT: International Airport Ramon Villeda Morales at San Pedro Sula served by regular airlines. 35 miles by road.

TIME: GMT minus 6 hours, no changes during year.

HOLIDAYS: January 1st; April 14th; May 1st; Thursday, Friday and Saturday in Easter week; August 15th; September 15th; October 3rd, 12th and 21st; and December 25th. Cargo work can be arranged on those days, except on Good Friday, and May 1st (Labour Day).

TELEPHONES: Connections to all countries of the world from Hondutel, located just outside main port gate, cable services also available.

SHORE LEAVE: Permitted without restrictions for most nationalities.

IDENTIFICATION CARDS: Identification card must be shown to gate watchman when crew members come back aboard.

GARBAGE DISPOSAL: No collection service available, but agents can arrange for private contractor to haul garbage to city dump.

WASTE OIL DISPOSAL: No waste oil service available. However, agent can arrange for disposal, if oil in 55 gallon drums or similar for hauling to oil-recycling plant.

SEAMAN'S CLUBS: No seaman's clubs available. However, agent can arrange for low cost tours of historical sites nearby, beaches, and football matches with prior notice. Postage facilities and international telephone service is available.

CURRENCY: Lempiras (LPS). U.S.$1.00 = LPS 11.60 (July 1996).

GENERAL: It appears that many of the stowaways discovered recently, are seafarers with a good knowledge of where to conceal themselves.

Local authorities are taking steps to restrict access to vessels by unauthorised persons, but Masters should take special precautions in this respect.

SHIPMASTER'S REPORT: September 1978 (Updated 1996).

Pilotage: Pilotage compulsory. Pilot boards 2–4 cables off the berth, advance notice of 72, 48, and 24 hours required.

Restrictions: Vessels can enter and leave at any stage of the tide day and night. Vessels are able to leave the berth in an emergency without use of Pilot if a tug available. Least depth of water in channel from sea to berth about 35 ft.

Max. Size: LOA 600 ft. Depth of water at banana berth is 33 ft. forward and 38 ft. aft. Max. draft 30 ft. There is a shoal patch about 150 ft. ahead of the berth.

Health: Authorities require 72, 48 and 24 hours notice of arrival.

Radio: Radio stations used when approaching the port were "WNU" and "TIM".

VHF: Port Authority, Pilot and Agent on Channel 16. Channel 14 also available.

Tugs: There are 2 tugs available, each 800 h.p.

Berthing: Banana Pier – Position 15° 50.05' N., 87° 57.35' W. Distance from berth to entrance 2 miles. The nature of bottom at the berth is coral, mud and sand. Prior to arrival it is an advantage to have all derricks up as various equipment has to be brought on board.

Always starboard side alongside, starboard side banana lids can be opened on all decks prior to arrival.

The banana elevators are extremely close to the quay side and usually moved to the East end of the berth for docking purposes, but as vessel is making fast they are moved into position. Leave starboard gangway turned in until alongside and elevators moved. It is a good idea to turn in overside light fittings and on no account have a starboard list. The bollards are situated on the edge of the quay. The quay is concrete with wooden face, only about 1.5 ft. above the water.

Four elevators used for loading. Work carried out around the clock, best hatch rate 48 t.p.h.

Ro-Ro facilities available, vessel moors with 2 anchors and stern to the quay. There are facilities for handling containers. Presently the container area is being expanded.

Currency: Lempiras. If cable sent in advance U.S. Dollars can be obtained.

Diversion: Agents request, if diverted to a Honduran port, a diversion cable must be sent to the Agents of that port giving time/date/nationality/port of departure/and ETA. (This helps Agents with the documentation).

Medical: Doctor and hospital available.

Tankers: The Texaco Pier accepts tankers with a draft of 30 ft.

Fresh Water: Available.

Fuel: Bunker fuel, diesel oil and lubrication oils available.

Density: 1025.

Repairs: Facilities available for small repairs.

Surveyors: Available.

Services: Fresh provisions, groceries, meats and laundry services available. Contract work such as deck and engine room cleaning and painting can be undertaken, however, prices of contractors should be compared.

SHIPMASTER'S REPORT: June 1981.

Berth: Texaco Refinery.

Arrival Draft: Forward 33 ft. 01 in., Aft 33 ft. 01 in.

Density: 1025.

Hoses: 1×6 in. and 2×8 in. clean products; 3×8 in. dirty products.

Pumping Distance: 4,000 ft.

No. of Berths: One.

Tidal Restrictions: None.

Bunker: Bunker "C" and diesel oil.

Bunkering Rate: 2,000 b.p.h.

Depths at LW: Bow, 33 ft.; stern, 40 ft. (by sounding).

Max. Size: LOA 700 ft., beam 90 ft., draft 33 ft.

Products Handled: Crude oil, fuel oil, diesel, kerosene.

Loading/Discharging Rate: 18,000 b.p.h.

Fresh Water: Limited supplies.

Ballast Facilities: None.

Distance from Sea to Berth: 2 miles.

Channel: Width 2,000 ft., minimum depth 35 ft.

Current: Variable/strong.

Docking/Undocking: Any time.

Tug: One required docking and undocking.

Depth Alongside: Minimum 37 ft.

Silting: Rapid.

Bottom: Sand.

Total Length of Dock: 250 ft. Condition: Good/moderate.

Chart: DMA 28000, 28160, 28162, 28163 or HON. 002 – 003.

SHIPMASTER'S REPORT: August 1981 (Updated 1992).

Entrance recommended via buoyed channel close to Punta Cabballos light which is normally unlit and has NO radio beacon. Pilot will board one mile North of channel if requested via VHF Channel 16. Large vessels are instructed by Port Authorities to anchor at least 0.75 miles from piers. One tug only is available – 900 h.p. approx.

Fresh water available at Banana Pier. Launch service available to vessels at anchor.

SHIPMASTER'S REPORT: April 1989.

Berth: Texaco Refinery.

Arrival Draft: Forward: 26 ft. 00 in. Aft: 30 ft. 00 in. (after taking Pilot's advice and discharging part of the ballast).

Density: 1025.

Cargo: Recon Crude Oil, discharge through 2 × 8 in. hoses. Max. discharge rate 15,000 bbls./hr. Distance to tank 500 m.

No. of Berths: One.

Tidal Restrictions: None.

Docking: Starboard side alongside. 3 head lines/stern lines, 2 springs fore and aft. 1 small tug assists docking/undocking any time (24 hours). Berth of wooden construction and in moderate condition.

Vessel Particulars: LOA: 684 ft. 08 in. Breadth: 105 ft. 08 in. Displacement: 63,578 tonnes.

Approach: Pilot boards 1.5 miles North of Punta Caballos, if requested to do so. Call Port Control on Channel 16, 2 hours prior to arrival. Pilot boards from tug. Pilot recommends that deep draft vessels visiting for first time do not enter bay without a pilot. N.E. Channel marker missing and Punta Caballos light destroyed.

Silting: Silting at Texaco Dock is serious. Vessel grounded during berthing. It appears that seaward end of dock has less than 25 ft. of water. Dredging carried out almost continuously so water depth variable. On this visit seaward end of dock was 25 ft., middle 29 ft. and aft 33 ft., bottom is sand.

Stores: Some fresh fruit, vegetables and fish available, also bonded stores.

SHIPMASTER'S REPORT: March 1994.

Documents:

- 1 copy Clearance from Last Port.
- 2 copies Maritime Declaration of Health.
- 2 copies Vaccination List.
- 10 copies Crew List. ***
- 10 copies Passenger List (if no passengers, statement thereof) ***
- 10 copies Ammunition List. ***
- 8 copies Stores List.
- 10 copies General Declaration. ***
- 14 copies Cargo Manifest. ***
- 3 copies Bill of Lading.

*** These documents, at least 5 copies (preferably in Spanish), to be stamped by the Honduras Consul in the previous port.

Approaches/Pilotage: Approaches to the port can be made from the North or West. In either case, there is adequate water for vessels drawing less than 9.00 m., but care should be taken as shoals of between 9.0 m. and 10.0 m. do exist within the vicinity. When approaching from the North on a course of 181° with the peninsula of Puerto Cortes dead ahead, an alteration of course to 221° was made direct to the Northern Pilot Station, with the peninsula 1.2 miles off. Indexing off the N.W. coast of the peninsula proved accurate. However, indexing off Punta Caballos whilst transitting the short channel on a course of 182° (final approaches to the berth), could not be relied upon due to the indefinite coastline. This is due to the constantly varying build-up/dispersal of silt on the very West of the peninsula, which in addition varies with seasonal changes (i.e. during Winter months (September – February), the peninsula is further covered by the sea, but in the Summer months (March – August), much of it dries out.).

The Beacons in the short approach channel cannot always be relied upon, and on this occasion, Beacon No. 4 was missing and Beacon No. 2 poorly lit. Beacons No. 1 and 3 were both well lit and appeared in position. However, it should be pointed out that all 4 Beacons are marked (PA).

The Pilot will board at the Northern Pilot Station (approximately 1.5 miles North of Punta Caballos), by prior request, but normally prefers to board at Southern Pilot Station, South of the short channel, basically just off the jetty. The short approach channel is about 1.0 miles long and about 360 m. wide. There is plenty of water within this channel, and least depth ever recorded during the channel transit was 13.0 m.

Restrictions: Vessels can berth anytime, day or night.

Berthing: Texaco Berth: Vessels always berth starboard side alongside. Moorings: 4 headlines and 2 springs fore and aft. Springs are usually first lines, by heaving line to the jetty. The 4 head/breast lines from the forecastle all go to the same dolphin, and tend to lead more as breast lines than headlines. A similar arrangement exists aft. All lines to dolphins are by mooring boat (with a heaving line). Only one mooring boat is available for both ends, and boat prefers to take all 4 lines together. However, this is not often possible due to lack of manpower on board. A tug of 1,200 h.p. assists during berthing, but does not normally make fast, and generally just pushes along the port side where required.

Depth alongside the berth varies, especially at West end (i.e. forward with the vessel starboard side to). This is due to the build-up of silt on the end of the peninsula, as described earlier, and is the reason why vessels always berth starboard side to (i.e. bow in the most unpredictable and shallowest water, and the more vulnerable stern in the deeper water at the East end of the berth). Due to the problem of silt build-up, a dredger is permanently on station close to the berth.

In view of what has been mentioned above with regard to the build-up of silt, the maximum permitted draft alongside the berth appears to vary, especially from season to season. Ships have been known to berth here with drafts of up to 32 ft. (9.7 m.). On this occasion, our Voyage Orders were for a maximum safe arrival draft of 29 ft. (8.84 m.), and the depths that we recorded alongside the berth were forward 31 ft. 06 in., aft 36 ft. 00 in. I personally would suggest that a draft restriction of 30 ft. must be considered the absolute safe maximum, and recommend that vessels arrive 2 ft. – 3 ft. trimmed by the stern, rather than even-keel.

Cargo Handling Facilities: The Texaco Berth is an old wooden "T" jetty, but reasonably well fendered.

Cargo discharge is via flexible hoses, as follows:

Gas oil	1×8 in. hose
Mogas (all grades)	1×8 in. hose
Jet	1×6 in. hose.

Maximum back pressure ashore is 100 p.s.i. per line/grade.

The shore tanks are only about 0.5 miles away, and overall average discharge rates are approximately as follows:

Gas oil	1,150 cu.m./hr.
Mogas (all grades)	350 cu.m./hr.
Jet	230 cu.m./hr.

With concurrent discharge of grades as described above, a total cargo of about 19,500 tonnes should be completed in about 24 – 26 hours, depending on quantities of grades, of which the Mogas grades are usually the predominant factor.

General: Shore leave is permitted with passes provided by the Agents. A good security watch should be kept with particular regard to "visitors", who inspite of security guards at the gate do sometimes attempt to board vessels. A letter is issued from the Port Authorities upon arrival, stating that unaccompanied females are not allowed on the vessel whilst alongside, and if such an infringement is detected, the ship will be fined.

Shore labour for cleaning/painting work is available at a very low cost. Quotes were submitted for U.S.$2.00 per man/hour with a total of 8 – 10 men being available, plus U.S.$2.50 per hour for the Foreman. Due to short notice, this offer was not taken-up, so the quality/quantity of work was not evaluated, but suggest this should perhaps be considered in the future, as it may prove cost-effective.

AUTHORITY: Empresa Nacional Portuaria, P.O.Box 18, Puerto Cortes, Honduras C.A. *Tel:* (504) 550908. *Telex:* (374) 1157 Enaporto Ho. *FAX:* (504) 551402. *Cables:* Enportuaria. *Contact:* Elezar V. Quiroz, Assistant General Manager.

AGENT: Maritima y Transportes S.A., Apartado 991, San Pedro Sula, Honduras. Tel: (504) 534900. Telex: (374) 5634 Marhond. Fax: (504) 533730. Cables: Matra San Pedro Sula.

SAN LORENZO (Henecan): 13.24 N. 87.22 W. (See Plan)

LOCATION: On the mainland of the Pacific Coast of Honduras near to lthe city of San Lorenzo, Valle.

PORT LIMITS: *Port Jurisdiction:* Lat. 13° 21' 51" N., Long. 87° 26' 15" W. Lat. 13° 24' 51" N., Long. 87° 25' 13" W.

Laytime: In the opinion of the Agent, laytime will commence when vessel received by Port Authorities and Pratique granted. Vessel will be received when docked or at anchorage in the port (but not at Pilot Station).

DOCUMENTS: List of documents requested on arrival of vessels at the Port of San Lorenzo (all documents must be written in Spanish and without these documents serious delay of starting operations on board vessel are foreseen).

	Port Doctor	Port Captain	Port Authorities	Customs	Food Inspector	Immigration	Agency	Agency by Mail

If the vessel will arrive without cargo for the port of Amapala/San Lorenzo documents as stated Ballast and Manifest (Manifiesto on Lastre) from the last port only before arrival are requested.

Leg.*=Legalised by Honduras Consul – or by consul of a friendly nation.

If there is no consul of any friendly nation, by Port Captain, BUT in this case one copy of each manifest should be sent to: Secretaria de Economia y Hacienda, Tegucigalpa, D.C. Honduras CA and to Administracion de Aduanas, Amapala, Honduras C.A. by airmail and certified.

Also see "Puerto Castilla".

PILOTAGE: Compulsory. Distance from sea buoy to berth – 16 nautical miles.

Pilot station for San Lorenzo is at last buoys painted black/white in position: Lat. 13° 12' 03" N., Long. 87° 35' 15" W. Pilot will board the vessel about 1.0 miles – 1.5 miles South of the Sea Buoy, after coming down the Bay from San Lorenzo for about 2 hours' cruise by pilot boat.

Pilot recommends the best arrival time at Sea Buoy to be 3 hours prior to HW.

Two hours before arrival Pilot Station vessel must call Agent's office at San Lorenzo via VHF Channel 10 in order to send Pilot.

Pilot boat has white and green upper works, black hull with the word "San Lorenzo" on poop. Pilot boat on VHF Channel 16.

Shipmaster's Report: March and May 1992.

Pilot boat was a small open boat with outboard motor. When sailing, the vessel may be requested to carry the boat out to the Sea Buoy.

ANCHORAGE: Buoy in position: Lat. 13° 12' 03" N., Long. 87° 35' 15" W.

RESTRICTIONS: All incoming vessels must wait at the Sea Buoy located at the entrance of the access channel, where vessels will be boarded by the Pilot.

The access channel to the Port of San Lorenzo is being provided with light buoys however, vessels may only berth/unberth during daylight hours. This is due to the tide variation and the prevailing fog in the channel at night. The seaward buoy is the Pilot Station. Depth of access channel at LW is 30 ft., width 122 m., and length 30 km.

MAX. SIZE: Depth alongside 32 ft. at LW. Vessels with draft 23 ft. may enter/sail at any time and vessels with draft 30 ft. – 31 ft. at HW.

HEALTH: If no disease on board reported by Master, no special procedure necessary.

The local authorities require all Crew members of vessels visiting Honduras to have valid vaccination certificates against yellow fever and cholera. Such vaccinations are not available in Honduras and Crew members should be vaccinated at a convenient port prior to calling at Honduras.

RADIO: No radio station at San Lorenzo.

VHF: A continuous watch is maintained in office hours on Channel 16, after hours and on holidays, the watch is intermittent.

All calling should be on Channel 16. Tug works on Channel 12. Intership working is on Channel 6. Agents on Channel 10.

TUGS: One tug available. Tug normally joins the ship about half mile from the berth. Use of tug compulsory.

BERTHING: "T" shaped pier with 4 berthing places.

Berth No. 1: 157 m. long. Depth alongside 10.67 m.
Berth No. 2: 139 m. long. Depth alongside 10.67 m.
Berth No. 3: 116.43 m. long. Depth alongside 6.70 m. (Inner).
Berth No. 4: 134 m. long. Depth alongside 6.70 m. (Inner).

Equipment: 1×30 ton portainer. 2 cranes capacity 30 tons and 25 tons. One additional 140 tonnes crane is planned. 6 forklifts, 3×6,000 lbs.; 1×15,000 lbs. and 2×8,000 lbs. 4 yard trucks.

Facilities: General Cargo Warehouse: 2,408 sq.m.; Lumber Shed: 1,204 sq.m.; Piling Sugar Warehouse: 3,072 sq.m. (10 tons capacity); Open Side Warehouse, for cotton: 1,806 sq.m.; 2 molasses tanks, capacity 1 million gallons; open storage 32,913 sq.m.

STEVEDORES: Arranged by Agents, working around the clock with breaks for meals.

Shifts: 0700 – 1200, 1300 – 1700, 1800 – 2300 and 2400 – 0600 hrs.

Cargo Handling Rates:

Resin:	15 tonnes per gang/hour.
Coffee:	30 tonnes per gang/hour.
Lumber:	20 tonnes per gang/hour.
Timber:	25 tonnes per gang/hour.
Cotton:	15/20 tonnes per gang/hour (100 bales).
Molasses:	145 tonnes per hour.
Sugar:	50 tonnes per gang/hour (2 gangs).
Meat:	10 tonnes per gang/hour.
Cars:	15/20 per hour.
General cargo:	8/10 tonnes per gang/hour.
Cement:	30 tonnes per gang/hour (in bags).
Wire/iron bars:	40 tonnes per gang/hour.

MEDICAL: Nearest hospital in Choluteca City, 30 minutes by car. Minor cases can be attended by doctor at San Lorenzo.

TANKERS: Tanker connections between Berths No. 1 and No. 2 (See "Plan").

FRESH WATER: Good quality potable water available in unlimited quantities.

FUEL: Only if required, and if sufficient notice given to the Ship's Agency.

CONSULS: Consulates exist for the following countries:

Nicaragua, El Salvador in Choluteca City, 30 minutes by car from San Lorenzo.

Consulates for other countries in Tegucigalpa, the capital, (90 km.) 2 hours by car from San Lorenzo.

REPAIRS: Not available.

DRY DOCKS: None available.

SURVEYORS: Not locally available but can be called through Agency. Lloyd's Sub-Agency San Lorenzo, c/o Servicios Portuarios SA, San Lorenzo, Honduras, C.A.

GANGWAY/DECK WATCHMEN: Not recommended and not necessary.

HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco/Wine; spirits are not allowed to be held out of bond.

REPATRIATION: Immigration Offices in town and in Tegucigalpa. Flights leave daily from Tegucigalpa. (90 km. from San Lorenzo).

AIRPORT: In Tegucigalpa, 90 km., 2 hours by car. Connections to Miami/New Orleans/Houston/Panama/Mexico and all Central American countries.

HOLIDAYS: January 1st, April 14th, May 1st, August 10th, September 15th, October 3rd, 12th and 21st, December 25th and Thursday, Friday and Saturday of the Easter week.

Work can be arranged excepting May 1st, September 15th and Holy Friday during Easter week.

TIME: GMT minus 6 hours, no alteration during year.

EMERGENCY CO-ORDINATION CENTRE: Firstly Port Superintendent must be called using VHF Channel 16. Also Honduran Coast Guard can be called on the same Channel.

TELEPHONES: None.

BANKS: At Tegucigalpa: Bank of America, Bank of London & Montreal, Banco Atlantida and Banco Ahorro Hondureno.

STORING: See "Prelims".

1. Vessels are stored by truck.
2. Trucks can proceed alongside the berth.
3/4. Fork lift trucks can be used on the jetty to handle stores. Truck must be hired.
5. There is no Custom Regulation in force regarding storing.
6. Local riggers can be employed to assist with storing.

SHORE LEAVE: Allowed. Restrictions placed on crew from some countries. Crew members to shore passes.

GENERAL:
Chart: Honduras Chart No. 004.
Tidal Variation: 2.5 m. – 4.0 m.
Prevailing Winds: From South and East.
Flags: Flags required:

1. The country's flag where the ship is registered.
2. The Honduran flag.
3. The yellow (Quarantine) flag (if necessary).
4. The red flag (if necessary).

SHIPMASTER'S REPORT: May 1994.
Cargo: Loading molasses.
Charts: B.A. Charts No. 1049 and 1960.
Sailing Directions: NP 8, 1975 + NP 8S 10-92, 4.31 ET SEQ.
Standard Time: GMT minus 5 hours. This is in force from early May 1994 under new law. Information published in Admiralty List of Radio Signals and Nautical Almanac is now incorrect.

Approaches: No problems on approach to Gulf of Fonseca. Pilot was contacted at about 25 miles. At this time, he was in his boat and awaiting our arrival, but due to the change in Standard Time kept in Honduras, which had been changed from GMT minus 6 hours to minus 5 hours, we were working on a different time to him, and therefore he had a long and uncomfortable wait for us.

Pilotage: Pilot boards about 1 mile South of Sea Buoy. His boat is a light open boat powered by an outboard motor. This also functions as a mooring boat for running the first lines at the berth.

There is also a heavier steel motor boat with black hull and green superstructure, which was used when we departed.

Buoys cannot be relied upon as charted. Sea Buoy and Buoys No. 1 and No. 2 appear to be in position, but after that, the sequence and position of buoys becomes erratic. On the way in, the following buoys were not seen: No. 7, 8, 9, 14, 15, 16, 17 and 21. The following were out of position as charted: No. 3, 4, 13, 18, 19, 20, 22, 23, 25, 29, 30 and 33. Buoy shapes seem arbitrary, but the colours, although faded, are correct. Although some are fitted with lights and solar panels, they do not appear to be working. Certainly the one buoy visible from the berth was unlit.

Off the beach at Raton, here are 2 large white mooring buoys apparently laid by the U.S.Navy, and there are 4 more similar buoys laid to the North of the Pier, just before the bend in the river. At first, the Pilot appeared confused, and I was concerned about his ability, but perhaps two or three hours waiting for us was a little trying, and once the bridge team began to understand his English, he proved very competent. The echo sounder showed adequate water on a rising tide and a draft of 25 ft. 03 in. with the worst patch in the vicinity of Buoys No. 3/4 (where they should be) and Buoys No. 5/6. Pilot reckons, maximum draft would be 30 ft. to 31 ft. at high tide. As we were entering on the flood, we used the starboard anchor to swing off the berth, stemming the current just North of the North end of the wharf. Current was then used to ease the ship alongside the South outer berth. The manoeuvre was well judged.

There are no tugs at present. There is supposed to be one, but it is not operational.

Departure was on a rising tide, with a maximum draft of 29 ft.03 in. There was 1.0 m – 1.5 m. under vessel from the berth to the bend off Estr. de la Conchelitas, after which depths were 6.0 m. – 8.0 m. under vessel. There was plenty of water until the position of Buoy No. 19 on the chart, where a stretch of shallow water, 1.0 m. under-keel, extended to the bend off Estr. de la Jagua. The final shallow stretch extended from the position of Buoy No. 13 on the chart until Buoys No. 1 and No. 2.

Berth: Clean, open deck with a road to the shore. Dimensions as in the "Guide". Well fendered and a good number of bollards were available. Fresh water is available from metered supply points, and supply is no problem. Molasses connection of 8 in. is on South outer berth.

There are connections for imported petroleum products at the centre point of the outer side. There is another connection on the North outer berth which looks similar to the molasses connection on the South berth. Although the berth is provided with lights on tall poles, they are not used because of the shortage of power, and at night there are very few shore lights visible.

There appears to be less water alongside than advised. At low water we touched bottom (soft mud) when drawing 29 ft.03 in.

Documents/Officials: Documents prepared using information in the "Guide", and this was by and large correct, but with the usual request for three more copies.

No problems with presenting forms in English. Last port was Manzanillo (Mexico), so Clearance was in Spanish with Crew Lists endorsed by Mexican Immigration Authorities.

Bond was not sealed.

Prior to arrival, Agents advised that, due to periodic power cuts, communications with them could be uncertain, and their only solution was to request us to try again later.

Agents were efficient. Two representatives remained on board throughout the loading. One took care of Agency work and the other was the cargo surveyor.

AUTHORITY: Empresa Nacional Portuaria (E.N.P.), P.O.Box 32, San Lorenzo, Valle, Honduras. *Tel:* 81-21-12, 81-21-45. *Telex:* 504-4005 Enaporto Ho. *FAX:* 81-21-27. *Contact:* Miguel Estrada, Port Superintendent.

TELA: 15.47 N. 87.27 W. (See Plan)

DOCUMENTS:

1 original Clearance
1 original Health Certificate.
1 original and 12 copies Manifest.
1 original and 11 copies Cargo Book.
1 original and 8 copies Stores List.
1 original and 8 copies Crew List.
1 original and 8 copies Passenger List.
1 original Baggage.
1 original Voyage Memorandum.

All documents must be in Spanish; Cargo Book should be in alphabetical order.

Certificates: Health and Derat certificates needed.

Also see "Puerto Castilla".

PILOTAGE: Permanent Pilot available and compulsory. There is a small boat that assists docking by handling mooring lines from vessel to wharf. 48 hours advance notice of ETA required.

ANCHORAGES: 1 mile out, North from wharf, 57.5 ft. or more; no boundaries.

MAX. SIZE: Max. permissible length 580 ft., breadth no restrictions, draft 10.3 m.

HEALTH: Agents arrange Pratique; in case of disease or fever aboard, the vessel will be placed in quarantine for a minimum of 5 days.

Valid Vaccination Certificates against yellow fever and cholera required. These vaccinations are not available in Honduras.

VHF: Port Authority on Channel 16.

TUGS: Available on request.

BERTHING: Berthing possible throughout 24 hours..

General Cargo Berth: East side of pier, starboard side alongside.

Banana Berth: West side of pier, port or starboard side alongside, depending on which side elevator space is required (See "Shipmaster's Report" – 1979). 4 elevators available, type camel back. Rate per elevator 3,500 boxes per hour.

Depths: West side: 8.0 m. – 9.9 m. East side: 8.6 m. – 10.3 m.

STEVEDORES: ETA advice should be given 48 hours prior to arrival in order to arrange gangs. Labour rates are subject to surcharge of 25%, 50%, 75% and 100% to cover overtime, depending on hour or day worked.

Gangs: For bananas: 180 men, 3 gangs. General cargo: No restrictions.

MEDICAL: Hospital facilities available.

TANKERS: Discharging lines only, spray oil 6 in. Berth available for 1 tanker on East side. Max. draft 30 ft. Storage for bunkers and LPG available.

DENSITY: Average density in port is 1029.

FRESH WATER: Delivered by hoses at rate of 100 gallons per minute.

FUEL: Available from Texaco Refinery, and by barge.

FIRE PRECAUTIONS: Extinguishers and water hoses available.

CONSULS: None.

REPAIRS: Only minor repairs.

GANGWAY/DECK WATCHMEN: Watchmen can be obtained at daytime rates plus 25%, 50%, 75% and 100% to cover overtime, depending on the hour or day worked.

OPENING/CLOSING HATCHES: Work done by stevedores.

CUSTOMS ALLOWANCES: 1 carton cigarettes and 1 bottle wine or spirits for each man.

CARGO GEAR: Must have current valid certificate for ship's gear.

REPATRIATION: Repatriation can be made on request by Master.

AIRPORT: Distance from wharf to airport is about 80 km. served by regular airlines.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st, work possible; April 14th, work possible; May 1st, not possible; September 15th, work possible; October 3rd, work possible; October 12th, work possible; October 21st, work possible; December 25th, work possible. Thursday, Friday and Saturday of Holy Week – work possible except Friday.

POLICE/AMBULANCE/FIRE: Contact telephone operator.

TELEPHONES: No facilities for placing telephones on board. There is a telephone in stevedores office on pier.

SERVICES: Ship chandler and launch service available.

SHORE LEAVE: Crew members allowed ashore, providing they do not have any diseases.

IDENTIFICATION CARDS: Required (supplied on arrival).

DELAYS: Delays can be expected any time there are 2 ships docked.

GENERAL: Ships must have Honduran flag on board.

SHIPMASTER'S REPORT: February 1979 (Updated 1992).

Contrary to the previous information on this Port, "Vessel" berthed starboard side alongside.

Pilots: Available on request.

Berthing: Used port anchor, head out. The mooring boat meets vessel at the end of the jetty. It is a white painted boat with a small cabin. Very helpful in assisting with the lines, going from forward to aft as required. It is of great advantage to have a mooring rope on the fore deck starboard side, ready to lead forward as due to the Northerly wind and swell, vessel soon drops astern.

The beach shelves fairly fast, and with a ship of this length (575 ft.) a good guide is not to let the bow pass the end of the jetty. A depth of 24 ft. was recorded when sounding round when alongside, only 30 ft. astern of the ship.

The jetty itself has a sprung centre of about 350 ft. long with rubber tyres along same, unfortunately secured by chains which ruins the overside paintwork when the ship surges in the swell.

Additional moorings: The Tela Rail Co. is at present renewing the coir springs on the berth. The shore labour assisted at all times with the moorings as the ship was loaded, also when shifting ship at midnight.

Cargo Gear: The shore side derricks have to be "Doubled up". The existing runners doubled back and shackled to the preventer lug and a snatch block used. It is one straight lift and pulled on board by the single runner on the off-side derrick. The "Hallen" was used at No. 4 hatch but the preference was to use "Double Gear" at No. 3. The "Lift aboard" elevators are 3.7 tonnes, but at the jetty end they run on a steel roller, which is placed on a large steel plate.

Loading: Vessel loaded all hatches, No. 5 being through the side doors and later when No. 1 had finished vessel shifted ahead to give more depth of water aft. Due to a labour shortage we only loaded any three hatches at one time.

Cargo is brought onto the pier by train with several small shunts a shift, very little time lost during shunts.

Fresh Water: Available at slightly differing pressures, rate varies between 5 and 7 tonnes per hour.

Labour: All key personnel speak very good English and are extremely helpful. It is not necessary to keep crew on "Captive Time" for shifting ship during the night, Foreman and labour are only too pleased to assist.

SHIPMASTER'S REPORT: August 1981.

Engines should be kept at immediate notice while alongside, especially from December till May as swell may increase with little warning.

Shore labour for deck/engine room cleaning and painting are readily available.

Two mooring buoys shown on U.S. and B.A. charts to West of piers DO NOT EXIST.

AUTHORITY: Empresa Nacional Portuaria, P.O.Box 38, Tela, Honduras. *Tel:* 48-2024, 48-2187. *FAX:* 48-2187.

NOTES

Please also advise Shipping Guides Ltd.

Hong Kong

HONG KONG: 22.18 N. 114.10 E. (See Plan)

Hong Kong will return to Chinese sovereignty with effect from 1st July 1997.

HARBOUR LIMITS: (Approximately): Western Entrance – the N.S. line between S.E. extremity of Tsing Yi Island and the flashing light at S.W. corner of Green Island. Eastern Entrance – the N.E./S.W. line between the on-shore Fl. W. and the Fl. R. lights either side of the Lei Yue Mun Pass.

DOCUMENTS:

Pre-Arrival Immigration Clearance Facility: Marine Department Notice No. 99A of 1993, issued 5th July 1993:

1. The attention of Owners, Operators, Agents and Masters of vessels is invited to the availability, since 1st September 1992, of Pre-Arrival Immigration Clearance facility for vessels intending to call at Hong Kong. Under the scheme, all vessels other than North Korean vessels and vessels carrying any North Korean crew, are eligible to apply, provided they meet the normal Immigration requirements. Each application is, however, considered on its own merit.
2. Under existing procedures, supernumerary crew, i.e. those not actually employed in the working or service of the ship, are treated as passengers, and if they are visa nationals, they require their travel documents and visas to enter Hong Kong. Vessels carrying supernumerary crew without proper documentation will be precluded from PAC facilities. However, consideration may be given to the issue of visas to them upon the ship's arrival in Hong Kong, provided details are given 48 hours in advance.
3. Applications should be made on Form ID325, with supporting documents specified in Para. 4 below, to the Chief Immigration Officer, Harbour Control Section, 2nd Floor, Central Government Pier, Road D3, New Central Reclamation Area, Central, Hong Kong, at least 48 hours before the estimated time of arrival of a vessel. The Form ID325, "Application for Immigration Pre-Arrival Clearance for Vessels", may be obtained from the Harbour Control Office.
4. Supporting documents consist of:
   (i) Three copies of the Crew List,
   (ii) Two copies of the Passenger List, and
   (iii) A cable from the Master requesting Pre-Arrival Immigration Clearance certifying that all travel documents of crew and passengers are valid for their intended period of stay in Hong Kong. The cable should be sent after the vessel has left its previous port of call, and may be submitted separately (after the original application) to the Harbour Control Section not less than 24 hours before the ship's arrival in Hong Kong.
5. All vessels are encouraged to use this Pre-Arrival facility as it is intended to improve the port efficiency and turn around time of vessels.
6. Further information may be obtained by writing to the Chief Immigration Officer at the address given in Para. 3 above, or by telephoning the Harbour Control Office at No. 25347121.

Signed: Director of Marine (Ag.), Marine Department, Hong Kong.

Marine Department (Arrival):

Marine Department Shipping Report (Form MO. 618).

Certificate of Registry and/or Tonnage Certificate.

Certificate of Fitness (all vessels carrying chemicals in bulk if applicable).

Passenger ship: Safety Certificate.

Passenger or cargo ship: Load Line Certificate.

Cargo ship: Radio Certificate.

Cargo ship: Safety Equipment Certificate.

Cargo ship: Safety Construction Certificate.

Ship's Articles of Agreement with the crew (if the ship is British, or is a foreign ship belonging to a nation not represented by a Consul in Hong Kong).

1 copy Minimum Safe Manning Certificate.

Derat Certificate or Derat Exemption Certificate.

1 copy of the ship's Passenger List (if specifically requested).

Clearance Certificate from the Last Port.

1 copy of the Import Cargo Manifest (if specifically requested).

1 copy of the Dangerous Goods Manifest (if applicable) and a declaration that dangerous goods are being carried in accordance with the IMDG Code.

4 copies of the Radioactive Substance Manifest (if applicable) and a declaration that any Class 7 substances are being carried in accordance with the IMDG Code.

Compulsory Insurance Certificate (if carrying more than 2,000 tons of persistent oil in bulk as cargo).

Note: The ship's Articles of Agreement to be submitted to the Mercantile Marine Office, all others must be submitted to the Port Formalities Office of Marine Department within 24 hours of a ship's arrival with the exception of the Dangerous Goods Manifests (2) which should be submitted at least 48 hours prior to the vessel's arrival.

For regular port callers employing Agents with established credibility, all the above requirements are waived providing:

(a) The original certificates have been sighted once.
(b) Validity of certificates is maintained.
(c) Marine Department Shipping Report (Form MO618) is submitted by fax on vessel's arrival.
(d) Dangerous goods requirements are being complied with.

In addition to the above, certain types of vessels are required to give notification to the Director of Marine prior to arrival as follows:

(i) The Master of every vessel over 300 g.r.t., address to 'MARDEP' using:
   (a) W/T communications via Hong Kong Radio (VPS); or
   (b) Telex: 63607 Mdvts HX; or
   (c) VHF R/T on Channel 12 (156.6 MHz).
   An initial notification of not less than 12 hours before the vessel is expected to enter the waters of Hong Kong, also a confirmatory notification of not less than 4 hours before the vessel is expected to enter the waters of Hong Kong.
(ii) The Master, Owner or Agents of every oil tanker (if carrying more than 2,000 tons of persistent oil bulk), gas tanker and chemical tanker, address to 'MARDEP' by Telex: 63607 Mdvts HX, not less than 48 hours before the vessel is expected to enter the waters of Hong Kong, a tanker arrival notice.

Marine Department (Departure):

Application for Port Clearance (MO 618), 2 copies of Ship's Export Dangerous Goods Manifest.

1 copy of Ship's Export Cargo Manifest (if specifically requested), all relevant documents and trading certificates are same required for the Report of Arrival.

Port Health Officer (Arrival Only):

Maritime Declaration of Health.

1 copy of the ship's Passenger List.

1 copy of the Crew List.

Derat Certificate or Derat Exemption Certificate (whichever is applicable).

Note: The above documents/forms must be produced for the inspection of the Port Health Officer on boarding at the Quarantine Anchorage.

Customs and Excise Department:

One copy of the ship's Import/Export Cargo Manifest for Cargo Research Division, 9/F, MTL Building, Kwai Chung.

One copy of Import/Export Statement in respect of Dutiable Goods (CED 39 and 40) for Excise Control Group, 7/F, Harbour Building, 38 Pier Road, Hong Kong.

One copy of the ship's Import/Export Cargo Manifest, upon request, for boarding Customs Officers.

One copy of Arrival Declaration in respect of Dutiable Stores (CED 64), upon request, for boarding Customs Officers.

One copy of the Arrival Declaration (CED 114) and one copy of Crew List and Passenger List, upon request, for boarding Customs Officers.

NOTE: According to current practice, the Trade Department and the Census and Statistics Department, also both receive a copy of the ship's Import/Export Cargo Manifests from the respective shipping agents. These copies are in addition to the copies supplied to the Customs and Excise Department.

Immigration Officer (Arrival):

2 Transit-Passenger Lists.

2 Landing-Passenger Lists.

3 Crew Lists.

Note: The above forms must be produced for the inspection of the Immigration Officer on boarding after the ship has been 'cleared' by the Port Health Officer.

Immigration Officer (Departure):

2 Lists Passengers boarding.

2 Lists Transit Passengers.

2 Crew Lists.

Post Office (Arrival Only):

1 copy of the Ship's Mail Manifest.

Hong Kong Police:

1 copy of The List of Arms and Ammunition on board (Nil return required) to be handed in at the Entry and Clearance Office with Marine Department papers.

Shipmaster's Report: October 1988.

To be sent from last port of call before Hong Kong:
1 Hong Kong Official Crew List.
1 List of Ports of Call.
Copies of: Ship's Register
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Load Line Certificate.
Safety Radio Certificate.
Derat Exemption Certificate.
Agent: All Certificates.
1 Safety Manning Certificate.
Clearance from Last Port.
1 copy ordinary Crew List.
1 copy Stores List.
Quarantine: 1 Maritime Declaration of Health.
1 ordinary Crew List.
Immigration: On arrival: 1 set of Hong Kong Crew Lists.
5 copies ordinary Crew Lists.
On departure: 2 copies ordinary Crew Lists.
Police: 1 copy Arms and Ammunition List.
Customs: 2 copies Stores List. (Also see "Customs and Excise Department" above).

ARRIVAL ADVICE: It is mandatory for Shipmasters to cable MARDEP Hong Kong 24 hours (See "Notices" – No. 44/1995) before arrival requesting permission to enter Hong Kong waters and advising ship's name, nationality, type of vessel, total number of persons on board, ETA abeam of Waglan Island and reason for call. It is not permitted to enter Hong Kong waters until permission has been granted. It is mandatory for all vessels over 300 tons gross to carry VHF radiotelephone capable of operating on Hague Plan frequencies and to make contact with the Vessel Traffic Centre on Channel 12 before entering Hong Kong waters and thereafter at specified calling points. They should report their position, ETA at Pilot Station, final berth, and intended route inwards, East or West. The vessel's mast height above the water should also be reported. (This is needed for information to the airport where the runway extends close North of the Hung Hom Fairway, and also to check the vertical clearance for vessels to pass under the Tsing Ma Bridge – See "Notice" – No. 45/1995). Shipmasters are also asked to report any other relevant information such as dangerous (including radioactive) goods on board. If the vessel is taking a Pilot, reference should be made to the 'Sailing Directions' in the China Sea Pilot Vol. I, with regard to the positions of the Pilot Stations, and Pilots should only be embarked or disembarked at these points. Additional radio reports to MARDEP during the vessels inward or outward passage aid in the safe movement of all vessels in the port and approaches. The Marine Department has introduced a new radar-assisted Vessel Traffic Service. The system consists of high technology radar surveillance, tracking and data processing equipment.

APPROACHES: (A) (Dry-cargo and container vessels): The approaches are reasonably free from hazards and are well marked by day and night. Vessels working at buoys with drafts up to 11.2 m. are requested to enter port via the Western Entrance. Other vessels with drafts up to 10.9 m. may enter via Lei Yue Mun entrance.

(B) (Tankers): Tankers without a gas-free certificate are prohibited from transit through Victoria Harbour. Tankers which berth at Tsing Yi Island, Lamma Island, and Tap Shek Kok are requested to use the Western approaches. A channel has been dredged at Hongkong Electric Company Wharf at West Lamma Island for the purpose of accommodating vessels at 13.8 m. draft.

(C) Buoyage. The system of buoyage used in Hong Kong has been changed from the Uniform to the IALA System.

Compulsory traffic separation lanes are in force for both the East and West approaches. Up-to-date Admiralty charts should be consulted for details.

PILOTAGE: Pilotage is compulsory in the port for certain categories of ships, as described in the Pilotage (Amendment) Ordinance 1995, which came into effect on 1st October 1995. Pilots are licensed by the Pilotage Authority (Cables: Pilot Hong Kong. Telex: 62062. Fax: 28030859) and are available to board ships at the 4 pilot boarding stations described in the Second Schedule of the above mentioned Ordinance.

The Hong Kong Pilots Association provides pilotage services. Pilots generally board inbound ships using the Eastern Entrance in the vicinity of the Lei Yue Mun 'TCS4' Buoy (Lat. 22° 16' 00" N., Long. 114° 15' 40" E.) and disembark at the same point from outward-bound ships. At the Western entrance, Pilots embark and disembark to the S.W. of Green Island (Lat. 22° 16' 00" N., Long. 114° 06' 36" E.). It is a contravention of Regulation 21(1) of the Shipping and Port Control Regulations, 1978, for any vessel to pick up or discharge a Pilot within a distance of 1 nautical mile from the centre of either the Lei Yue Mun Pass or the Sulphur Channel. Maximum speed inside Harbour is 8 knots.

Hong Kong Pilots can be contacted on VHF Channel 11.

Also see "Notices" – No. 53/1985 and No. 121/1987.

ANCHORAGES: Examination Anchorages (quarantine and immigration) for clearance inwards are situated within the harbour limits to cover the entry of shipping from East and West. The principal dangerous goods anchorages are situated at the Western end of the harbour and at Kau Yi Chau (tankers), whilst there are others at Junk Bay, Tsuen Wan and Rocky Harbour.

The Western Examination Anchorage works 24 hours a day whereas the Eastern Examination Anchorage works from 0630 – 1800 hrs. Since 20th June 1994, the Western Tuen Mun Immigration Anchorage (TMIA) has come into operation daily from 0100 hrs. and 1100 hrs. for river trade vessels plying between Hong Kong and the Pearl River Delta Ports. Ocean-going vessels will not be accorded immigration clearance services at the TMIA. Only on request. Ships requiring service in the Eastern Quarantine Anchorage should advise MARDEP on VHF radio Channel 12 when establishing contact prior to arrival.

Report: The following was sent by the Marine Department to Tanker Terminal Operators in September 1993 (Updated 1996).

Quote:

Vessel Traffic Centre – Anchoring of Large Tanker Vessels Awaiting Berths at Approved Petroleum Wharves:

Tankers of 120 m. LOA or more in length and which are intending to berth at Tsing Yi, will be instructed by Vessel Traffic Centre (VTC) to proceed to anchor at South Lamma Dangerous Goods Anchorage (SLDGA), if they cannot confirm their berths are available before entering the waters of Hong Kong. Only under very exceptional circumstances will such large tankers be allowed to proceed to anchor at Reserved Dangerous Goods Anchorage (RDGA). Tankers of less than 120 m. LOA may continue to anchor in Kau Yi Chau Dangerous Goods Anchorage (KYCDGA) for the time being pending further proposals on anchorage areas and fairways currently being formulated by this department.

The implementation of the above requires close coordination between various offices. I should be grateful therefore if you would make all necessary arrangements, including providing the Masters before they approach, the information on whether a berth is available and, if a designated berth is still occupied, instruct the Master to anchor and wait at SLDGA. You should also book a pilot *only for berthing* your vessel alongside Tsing Yi Wharf. I will inform pilots that they should not take large tankers to KYCDGA unless there is permission from VTC to do so.

Unquote.

MAX. SIZE: Largest vessels calling regularly have been container vessels, length up to 305 m., with drafts up to 14.6 m.; tankers length over 274 m., draft 14.6 m. Maximum size governed by draft of vessel. No limit as to length and beam. Draft in harbour: "A" class mooring buoys 6.5 m. to 12.0 m. "B" class mooring buoys 5.7 m. to 8.8 m.

HEALTH: *Conditions under which a Vessel may be Granted Radio Pratique:*

(a) The vessel must not have called at a plague infected port within 7 days prior to arrival at Hong Kong. The vessel must not carry sacks, rugs or duck feathers as cargo on board.

(b) If the vessel has called at a cholera infected port within 5 days prior to arrival at Hong Kong, the Chief Port Health Officer or his delegated officer has full discretion in the granting of Radio Pratique.

(c) There are not more than 24 passengers on board at the time of arrival.

(d) A vessel carrying more than 24 passengers may be granted Radio Pratique if there is a ship's surgeon on board.

(e) The Master must furnish, through his shipping company or Agent, the following cabled information to the Port Health Office not more than 30 hours and not less than 8 hours before his expected time of arrival at Hong Kong:

(i) Ports of call with dates of departures during the 14 days prior to arrival.
(ii) Numbers of passengers and crew members on board.
(iii) A statement that all persons on board are healthy.
(iv) A statement indicating whether any case of infectious disease has occurred on board during the voyage.
(v) Whether any person on board is sick.
(vi) The date of issue of the Derat or Derat Exemption Certificate.
(vii) Type of vessel.
(viii) Whether foodstuffs are carried as cargo on board ship, and if so, type of foodstuff and country of origin.

Notes:

1. Applications for Radio Pratique must be made by shipping companies or Agents. Application forms should be sent to Port Health Office, Wu Chung House, 18th Floor, 213 Queen's Road East, Wanchai, during normal office hours (0900 – 1700 hrs. on Mondays to Fridays and 0900 – 1300 hrs. on Saturdays).

2. For urgent cases outside normal office hours, shipping companies or Agents may apply for Radio Pratique by telephone or by Fax to the Port Health Office, Hong Kong Airport (Tel: 7696284) during the following hours:

Mondays to Fridays	1700 to 2300 hrs.
Saturdays	1300 to 2300 hrs.
Sundays and Public Holidays	0900 to 2300 hrs.

All necessary information together with supporting documents must be submitted in writing to Port Health Office, Wu Chung House, on the next working day.

3. No Radio Pratique will be granted between 0000 and 0900 hrs.

4. When Radio Pratique is granted, shipping companies or Agents will be responsible for notifying the Master concerned.

5. The granted Radio Pratique will automatically expire 24 hours after the stated expected time of arrival at Hong Kong.

6. The granted Radio Pratique will no longer be valid if there is any change in the health status on board the vessel concerned during the period from the submission of the application to the actual time of arrival of the vessel at Hong Kong. This means that the Master of the vessel concerned will have either to re-apply through his shipping company or Agent, giving the additional information, or to display the appropriate signal when approaching the Quarantine Anchorages:

Day: International Code flag "Q".
Night: A red light over a white light in a vertical line, 2.0 m. apart.

7. Ships granted Radio Pratique will be required to display the following signal when entering Hong Kong waters:

Day: International Code flag "TO."
Night: 3 white lights in a vertical line, 2.0 m. apart.

8. Maritime Declaration of Health and Passengers and Crew List will have to be collected by the shipping companies or Agents and delivered during office hours to the Port Health Office, Wu Chung House within 24 hours of the ship's arrival.

Also see "Notices".

N.B. Vessels coming from non-infected ports are cordially invited to apply for Radio Pratique, directly by the Master of the vessel by Fax or by telegram to the Port Health Office Hong Kong Airport or through their shipping Agents/companies in accordance with the place and time as stipulated under Notes 1 and 2.

Enquiries on Radio Pratique procedures can also be made to Tel: 29618846 during office hours.

IMMIGRATION: Immigration formalities take place at the Eastern or Western Examination Anchorages after clearance by the Port Health Authorities. Immigration launches are on duty 24 hours a day in the Western Anchorage and from 0630 hrs. to 1800 hrs. in the Eastern Anchorage throughout the year. Since 20th June 1994, the Western Tuen Mun Immigration Anchorage (TMIA) has come into operation daily from 0100 hrs. and 1100 hrs. for river trade vessels plying between Hong Kong and the Pearl River Delta Ports. Ocean-going vessels will not be accorded immigration clearance services at the TMIA.

RADIO: Cable Agent via Radio Hong Kong call sign "VPS".

The Marine Department Vessel Traffic Centre (VTC) is manned 24 hours a day throughout the year. It can be contacted by telex, by cable, by facsimile and by VHF radio-telephone on Channel 12. The VTC is the control centre of the newly installed Vessel Traffic System which consists of high technology radar-based surveillance, tracking and data processing equipment. The VTC can be contacted by Telex number 63607, Answerback MDVTS HX. Facsimile number 28586646.

Wireless Telegraphy: Radio communication apparatus on board a merchant vessel is not permitted to be used while the vessel is within Hong Kong territorial waters except in the following circumstances:

When a vessel is proceeding through Hong Kong territorial waters such apparatus may be used to communicate on minimum power with the nearest coast station or, if communication with the nearest coast station is impracticable and the safe navigation of the vessel so requires, with a more distant coast station or another vessel;

For the purpose of summoning assistance on an occasion of danger to the life of any person or to the vessel;

For the purpose of carrying out experimental tests for which permission in writing must first be obtained.

During the period when tropical cyclone signals 8, 9 or 10 are in force, radio and television stations will extend their hours of operation around the clock, and will undertake broadcasting of tropical cyclone warnings in English and Chinese, at two minutes to the hour and half past the hour. Should the expected local conditions so warrant, warnings will be broadcast at quarter to and quarter past the hour. Warnings in English will be broadcast by individual announcers at each station. Radio Television Hong Kong and Commercial Radio will provide a Chinese announcer to broadcast warnings in Chinese from the broadcasting studio at the Royal Observatory.

If conditions are expected to worsen, tropical cyclone warnings may continue after the normal close down time of the stations, or commence before the usual starting time in the morning even though only the No. 1 signal is in force at that time. After consulting the Director, Royal Observatory, the Director of Broadcasting will decide whether or not to adopt either of these courses. He will inform Commercial Radio, HK-TVB, ATV of his intentions as early as possible.

Frequencies: Radio Television Hong Kong – Radio 1 (Chinese) 92.6, 92.9, 93.2, 93.4, 93.5, 93.6 or 94.4 MHz; Radio 2 (Chinese) 94.8, 95.3, 95.6, 96.0, 96.3, 96.4 or 96.9 MHz; Radio 3 (English) 567 kHz, 1584 kHz, 97.9 MHz, 106.8 MHz; Radio 4 (English) 97.6 to 98.9 MHz; Radio (BBC World Service relay) 675 kHz; Radio 7 (Chinese) 621 kHz; Commercial Radio – Quote AM (Chinese) 864 kHz, Metro plus (English) 1044 kHz, 104 FM Select (English), 102.4, 102.5, 104, 104.5, 104.7, 105.5 or 106.5 MHz; BFBS (English), 96.6, 102, 104.8 or 107.4 MHz; Chinese Radio 1, 88.1, 88.3, 88.6, 88.9, 89.1, 89.2 or 89.5 MHz; Chinese Radio 2, 90.3, 90.7, 90.9, 91.1, 91.2, 91.6 or 92.1 MHz.

All ships bound for Hong Kong must obtain permission from MARDEP before entering the waters of Hong Kong. A contravention of this direction will render offending Masters liable to a fine of twenty thousand dollars and to imprisonment of 1 year. When applying for permission to enter the waters of Hong Kong Masters must provide the information required as contained in Marine Department Notices to Mariners No. 39 of 1983 and No. 89 of 1985 (See "Notices"). You are required to answer all signals including those passed from Royal Navy vessels patrolling the approaches to H.K. when approaching Hong Kong – Mardep Hong Kong.

VHF: Vessel Traffic Centre, Marine Department Hong Kong Port Radio call sign "MARDEP" Channel 12, 24 hours listening watch. Range up to 35 miles. Navigational warnings are routinely broadcast on VHF Channels 12, 14 and 20 every hour.

Maritime VHF Radio-telephone Service (Hague Plan): This service operates in Hong Kong on 3 international channels, Nos. 16, 26 and 27. Channel 16 (156.8 MHz) is the simplex distress and calling frequency on which contact is made between shore and ship before changing over to either of the public correspondence channels, No. 26 or 27. The latter are duplex channels and Hong Kong transmits on 161.9 MHz and receives from ships on 157.3 MHz for Channel 26; transmits 161.95 MHz, receives 157.35 MHz for Channel No. 27.

Local connection to the service is *via* the Hong Kong Telephone Company and is made in the same way as for overseas radio-telephone calls by dialling "011". The local operator should then be informed that a telephone call is required on "the Maritime VHF Hague Plan Service". The operator will ask for details of the call, such as the name of the ship and the person required, and will then connect the call *via* Cable and Wireless. Calls can also be sent from ship to shore. The range is about 50 miles and the service is available at all times of the day and night.

Harbour telephones: Service is provided by any one of 3 companies – Hutchinson Tel. Co., China Telecom System and Communication Services Ltd. Calls may be made between any two ships so equipped and between a ship and any telephone number on the Hong Kong Telephone Company network.

Ship to Shore service: Hong Kong Telephone Company will also provide ship to shore telephone service by means of land lines at selected wharf locations. For service at the Container Port call 420-8800.

Also see "Notices".

TUGS: Available for berthing and unberthing. Advance booking is required.

Also see "Table" opposite.

Tug Requirements at Tanker Terminals:

Company	*Location*	*Berthing*	*Unberthing*
Esso	Tsing Yi Island	4 (including 2 escort)	3
China Resources	Ngar Ying Chau/ Tsing Yi Island	3 (including 2 escort)	3
Mobil Oil Wharf	Tsing Yi Island	3 (including 1 escort)	2, 3 if draft more than 10.0 m.
Power Station	Tsing Yi Island	1	1
Caltex	Tsing Yi Island	4	3
		(over 198 m. LOA)	
		3	2
		(under 198 m. LOA)	
Mobil LPG Wharf	–	1	1
Shell	Tsing Yi Main Jetty		
	LOA less than 121.99 m.	2	2
	LOA 122 m. – 152.99 m.	2	2
	LOA 153 m. – 197.99 m.	3	2
	LOA 198 m. – 245 m.	4	3
	LPG Jetty		
	LOA less than 121.99 m.	2	2
	LOA 122 m. – 135 m.	2	2

These tug requirements are to be used during normal working conditions, with the proviso that it should have a flexibility on a case by case basis, and should conditions deteriorate during inclement weather, such as in the typhoon season, then additional tug requirements may be necessary.

Vessels with bow and/or stern thrusters of over 1,000 h.p. each will be able to allow for one tug less per thruster over the 1,000 h.p. mentioned, at separate ends of the vessels, subject to Agent or Master giving requisite confirmation that the thruster is capable of this horsepower, or in excess of, and that they are in good working condition, and depending on the thruster being submerged at the relevant draft.

Providing that duckpeller tugs are ordered, subject to availability, a compromise may be reached allowing for the number of tugs to be reduced.

It is strongly recommended that these guidelines be strictly followed, due to the volatile and dangerous cargoes that these vessels transport to and from oil terminals.

BERTHING: Berthing of dry cargo vessels alongside wharf can be performed any time during day and night. Berthing at tanker wharf not permissible after sunset, depending on size of vessel or other special circumstances. Ships carrying explosives must obtain permission from the Marine Department before berthing is allotted.

Boatmen: Labour to handle ships' mooring lines when berthing and unberthing at any of the wharves in Hong Kong waters is supplied by the owners of the wharf concerned, the cost being included in the berthing fee. For berthing at a Marine Department mooring buoy it is usual for the ship's Agent to arrange for boatmen to handle the ship's slip wire and anchor cable, unless the ship's crew undertake this task. The services of boatmen are generally obtained through the Hong Kong Pilots Association.

Mooring Buoys: See "Max. Size" All ships are required to secure to Marine Department mooring buoys by their chain cable (vessel to supply shackle). The maximum length of a ship permitted to berth at an "A" class mooring is 183 m., the swing circle encompassing each buoy having a radius of 213 m. The maximum length of a ship permitted to berth at a "B" class mooring is 137 m., the radius of swing circle around such buoys being 167 m. It is therefore within the limits of safety for a vessel, when secured to a Marine Department mooring, to slack out to "1 shackle on the windlass" and still clear ships berthed at adjacent buoys, except in exceptional circumstances. As all Marine Department moorings are of the 1-legged type, it is permissible, should circumstances make it necessary, for a ship, when attempting to secure to a mooring, to drop an anchor at not less than 15 m. from the buoy without fouling the mooring chain. It should be noted, however, that 3 moorings sited within the Naval Mooring Area are either of the 2 or 3-legged type, and it is therefore not permissible to use an anchor when berthing.

52 "A" class mooring buoys and 24 "B" class mooring buoys for ocean going vessels.

* Distance between Outer Bollards.
** Dedicated to tankers of 2,300 d.w.t.
Also see "Tankers".

(i) A shore telephone is available at the berth. Shore electrical supply is not available. Fresh water available from shore and by lighter. Berthing facilities available only for small coasters, ferries and harbour craft.
(ii) A shore telephone is not available at the berth. Shore electrical supply is not available. Fresh water available by lighter only.
(iii) and (iv) A shore telephone is available at the berth. Shore electrical supply is not available. Fresh water available by lighter only.
(v) A shore telephone is available. Shore electricity supply is not available. Fresh water available by lighter only.
(vi) A shore telephone is available at berth. Shore electrical supply is not available. Fresh water available by lighter only.
(vii) Bunker facilities available.

Esso: The Esso Tsing Yi Terminal is situated on the Southern part of Tsing Yi Island in position Lat. 22° 19.7' N., Long. 114°06' E. The facilities are owned by Exxon Storage & Wharfage Company Ltd., and used by Esso Standard Oil Hong Kong Ltd., and are used for discharging dirty and clean products, chemicals and LPG.

Pilots: At the Western entrance, Pilots generally embark and disembark to the West of Green Island (Tsing Chau). By pre-arrangement Pilots can be picked up off Ngan Chau and all tankers are recommended to make use of this service and request the Agent to notify the Pilot Association accordingly.

The Pilots maintain a listening watch on VHF Channel 11. Senior Pilots will usually be assigned to larger tankers.

Pilot launches display the international signals by day and by night and during poor visibility sound the international signals. In addition they may sound an identity signal of 4 short blasts.

Esso Tsing Yi Terminal: The berth consists of a T-head pier having 3 separated areas for handling barges and tankers ranging from 500 – 120,000 d.w.t.

The main loading area is designated Berth No. 1 and consists of a fendered loading platform, 2 fendered breasting dolphins, 4 mooring dolphins and associated equipment such as capstans, quick release mooring hooks for 120,000 d.w.t. tanker, etc. Berth No. 2 is provided by fendering the onshore face of one of Berth No. 1 Eastern mooring dolphins and adding an adjacent breasting dolphin suitable for vessels up to 2,500 d.w.t. Berth No. 3 is a small berth for vessels up to 500 d.w.t. and is located adjacent to the Eastern side of the trestle/access way. In addition there is a small jetty from the shore, inside of the Western side of the T-head, used at the present time by small tankers up to 2,000 d.w.t. and barges loading/discharging FO, ADO and LPG.

Berthing Procedure: At the present time the berthing of tankers exceeding 570 ft. LOA and up to 42 ft. draft is carried out during daylight hours and on flood tide only. Above 42 ft. draft, berthing is carried out at HW slack only and during daylight hours only and on a trial basis, HW neap during daylight hours when no HW slack exist for that day.

Tankers not exceeding 570 ft. LOA, draft under 36 ft. can be berthed day and night, but on flood tide. Currents near the berth, up to a distance of approximately 400 ft. off, run parallel to the berthing face. Further out, the ebb tide sets out and the flood tide in towards the North. Vessels always berth port side to. (Maximum tidal current is generally below 1 knot). In addition to the 2 escort tugs used for larger vessels for the passage through the channel from Green Island, usually 2 more tugs are in attendance for berthing larger vessels. Tugs are normally employed in the alongside manner and use their own wire. Pilots bring vessel parallel to the berth, and about 200 ft. off, and then ease her alongside with the aid of attending tugs and mooring lines.

Nearby, approximately 500 ft. Eastward is a new berth owned and operated by China Resources Oil Company. This berth projects further offshore than the Esso Pier. *Caution has to be exercised not to overshoot the Esso Berth.*

Two mooring launches strong enough to handle 120,000 d.w.t. vessel's wire ropes are in attendance. All 4 mooring dolphins are fitted with triple quick release hooks and capstan. The 2 breasting dolphins and 2 corners of the loading platform are fitted with double quick release hooks and capstan. The terminal requires that larger vessels use a minimum of 2 headlines, 2 forward breastlines, 2 forward backsprings, 2 aft backsprings, 2 aft breastlines and 2 sternlines.

Products	*No. and Size of Loading Arm*	*Shoreline* (in.)	*Maximum Pressure* (p.s.i.)	*Average Discharging Rate* (bbls.p.h)
Dark Product	4×10 in.	12/20/24	100	11,000 per load arm
DPK	1× 8 in.	10	100	8,000
DPK and other clean products/ lubes	2× 6 in.	6 and 8	100	2,500/4,000
LPG	Liquid 6 in. Vapour 4 in.	6 4	350	800
Chemical	1× 6 in.	6	100	2,500

Tolo Harbour Terminal:

Shipmaster's Report: July 1987.

The vessel called at Tolo Harbour to discharge a parcel of Light Virgin Naphtha.

On account of the terminal having only been opened recently, the following information should be of some use to vessels having to call at Tolo Harbour in the future.

Position:	Lat. 22° 26.8' N., Long. 114° 14.5' E.
Operators:	China and Hong Kong Gas Co. Ltd.
Products handled:	Light Virgin Naphtha.
Cargo connections:	2 × 10 in.
Shore Tanks:	6 km. away. Submarine pipeline 24 in.
Pilotage:	Daylight movements only.
Tugs & mooring launches:	Come around from Hong Kong harbour.
Vessel:	LOA 174 m. Beam 32 m. Draft 10.92 m.

See "Plan".

Also see "Notices" – No. 52 of 1986.

China Resources Ltd.:

Shipmaster's Report: July 1994.

Location: Ngan Ying Chau.

The Terminal is to be found at the top of Tsing Yi Island (Tsuen Wan) Hong Kong.

Berthing is in daylight only at H.W., and departure is in daylight only.

The Agent confirmed departure as daylight only and at L.W. + 1 hour up to H.W. I would point out that the current runs past on the ebb at up to 2.5 knots and at slightly less on the flood.

When turning off the berth, a vessel of 170 m. length has about 85 m. clearance each end, and on this basis, I would only depart at slack water.

The Terminal asked the vessel to maintain a pressure of 7 kg./sq.m. at the manifold during discharge, and for a gas oil cargo the average bulk rate runs at 1,500 cu.m./hr. via 2 lines (1×10 in. and 1×6 in.).

The Agent and Pilots informed me that the berth itself may be approaching the end of its life, mainly due to the environmental pressures exerted on CRC by the local population, in that the tank farm is built right in the middle of high rise flats. China Resources has another terminal on the South Eastern end of Tsing Yi Island which is normally for larger crude vessels. However, I was lead to understand that the Product Berth will have it's operations moved to this berth, but I was given no time scale other than it seemed sooner than later.

DENSITY: 1017.

FRESH WATER: The supply to ships is made at commercial wharves and from water boats.

Water Boats:

Company	Vessel	Capacity	Delivery (Approx.)
Leung Tai Kee Waterboat Co. Ltd.	Taikee No. 1	150 long tons	150-180 t.p.h.
	Taikee No. 2	120 long tons	150-180 t.p.h.
	Taikee No. 3	320 long tons	150-180 t.p.h.
	Taikee No. 5	250 long tons	150-180 t.p.h.
	Taikee No. 6	320 long tons	150-180 t.p.h.
	Taikee No. 7	130 long tons	150-180 t.p.h.
Union Waterboat Co. Ltd.	Tai Yat No. 1	270 tons	150 t.p.h.
	Tai Yee No. 2	290 tons	150 t.p.h.
	Tai Sam No. 3	300 tons	150 t.p.h.
	New No. 4	340 tons	170 t.p.h.
	Tai Ng No. 5	295 tons	150 t.p.h.
	Pier services to ocean terminal		1,500 tons/day

FUEL: Excellent facilities exist for bunkering vessels with fuel oil and coal. Fuel oil can be obtained either at the wharves adjacent to the oil installation, or from harbour oilers owned and operated by the oil companies. Fuel oil from these vessels can be pumped on board without impeding cargo operations. Adequate stocks of good quality bunker coal suitable for coal-fired marine boilers are maintained in the port. Fuel oil available with viscosity up to 1,000 sec. Redwood. 24 hours' notice for supply is required. Also gas oil and marine diesel available.

Also see Table B – "Port Oilers".

REPAIRS: In addition to ship and engine maintenance and repair work, the dockyards have facilities for many miscellaneous services such as are provided by modern dockyards. These include physical tests on materials such as anchors and cables, for which test certificates can be supplied, chemical analysis, drawing office requirements, chemical cleaning of engines and boilers, shot and sand blasting, zinc spraying to name but a few.

DRY DOCKS:

Hong Kong United Dockyards Ltd.: Three floating docks, two located off Tsing Yi and one at North Lantau. The largest has a lifting capacity of 24,000 tonnes, length 230 m., depth 8.0 m. over blocks and width 38.0 m.

Yau Lian Dockyards: Four floating docks, one located off Tsing Yi and three at North Lantau. The largest has a lifting capacity of 45,000 tonnes, and can accommodate ships up to 150,000 d.w.t.

FIRE PRECAUTIONS: The Fire Services Department operates six fire boats, the largest being the 350 ton "Alexander Grantham". It has an output capacity of 45,000 litres of water and 32,850 litres of foam a minute through a battery of monitors. This vessel is equipped to deal with any type of fire on any size vessel, and is designed to operate both in port and at sea.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: See "Documents".

CARGO GEAR: Normal routine gear, wire and rope slings, nets, grabs, and floating cranes up to 100 tons available.

Vessel's cargo gear must be used for working cargo at all alongside berths.

SEAMEN: All formalities connected with engagement and discharge on board British ships, and on foreign ships whose flag is not represented by a Consular Officer resident in Hong Kong, are required by law to be conducted at the Mercantile Marine Office of the Crew's Branch, Marine Department. Hong Kong continues to be one of the main recruitment centres of Asian seamen and a Seamen's Registry Office, which is an adjunct to the Seaman's Recruiting Office, under the same branch, maintains records of all Hong Kong seamen. The Hong Kong Government Seaman's Service Record Book (Seaman's Discharge Book) is issued by the Seamen's Recruiting Office and is a record of employment.The Seamen's Recruiting Office regulates the recruitment, selection and supply of Hong Kong Registered seamen to ships requiring them, and is situated at the Harbour Building, 3/F, 38 Pier Road, Hong Kong.

Seamen's Travel Documents: The Hong Kong Government Seaman's Identity Book is issued by the Immigration Department and enables the holder to join ships abroad, and return to Hong Kong without a visa during the validity of the book (initially 5 years, with 5 year renewals), and also within 12 months after the expiry of the validity of the book.

A Seaman's Certificate of Nationality and Identity is issued at the Immigration Department only to seamen of British nationality, whereas the Seaman's Discharge Book and the Seaman's Identity Book may also be issued to seamen resident in Hong Kong and no visa is required for return to Hong Kong.

All Crew members signing-off for repatriation must first obtain permission from the Director of Immigration. All crew arriving to join a vessel must produce a guarantee letter through the Agents responsible for all maintenances and other eventual expenses.

CONSULS: The following countries maintain consular offices in Hong Kong:

Antigua & Barbuda
Argentina
Australia
Austria
Bangladesh
Barbados
Belgium
Belize
Benin
Bhutan
Botswana
Brazil
Canada
Central African Republic
Chile
China (People's

AIRPORT: Regular International flights. Airstrip is capable of handling any size of jet planes. Transportation from port to airport terminal about 40 minutes bus drive.

Shipmaster's Report: July 1987.

Personnel joining vessels at Hong Kong: The vessel's Agent must give a letter to the Airport Immigration advising them of incoming air passengers who are joining vessels at Hong Kong. Personnel will be detained by Kai Tak Airport Immigration pending the letter's arrival.

TIME: Standard time kept in the colony is 8 hours in advance of GMT.

HOLIDAYS: Public holidays in Hong Kong occur mainly on festivals whose date is governed by the lunar calendar.

Every Sunday; First week-day in January; Chinese New Year's Day; Second day of Chinese New Year; Third day of Chinese New Year; General holiday in lieu of that for the Ching Ming Festival; Good Friday; Ching Ming Festival; Easter Monday; Birthday of Her Majesty the Queen; Tuen Ng Festival; First Monday in August; Last Monday in August, which shall be Liberation Day; Day following Chinese Mid-Autumn Festival Day; Day following Chung Yeung Festival: Christmas Day; First week-day after Christmas Day.

NOTE: Ching Ming Festival and Good Friday are separate holidays (Occasionally they fall on the same day. When this occurs a lieu day is granted).

POLICE/AMBULANCE/FIRE: When the services of the fire brigade, immigration, port health or police are required, appropriate signals should be made in accordance with the list of "Hong Kong Port Signals". The Marine Region of the Police is responsible for internal port security. Its fleet of launches maintain constant patrols in Hong Kong's territorial waters.

EMERGENCY CO-ORDINATION CENTRE: *Maritime Rescue Coordination Centre (MRCC):* The Marine Department maintains a 24 hour watch at the MRCC, and is responsible for coordinating search and rescue operations in the South China Sea as far South as Latitude 10° N.

The station meets fully the IMO GMDSS requirements for Areas A1, A2 and A3.

Telex: 82952 MRCC HX.
Tel: (852) 545 0181/2/3.
Fax: (852) 541 7714.
Call Sign: Hong Kong Rescue.

GARBAGE DISPOSAL: A shipboard domestic waste collection service is provided by the Hong Kong Government Marine Department free-of-charge to ocean-going vessels calling at the port of Hong Kong. Vessels moored at buoys in the mid-stream, or anchored within Victoria Harbour, are visited daily by three dedicated refuse collection vessels. Each vessel has a refuse reception capacity of 10 cu.m. Request for the service can be made during office hours through vessel's agents to Marine Department on Tel: 385-5661 or 815-0100.

The Marine Department also provides an operational waste collection service. A nominal charge of H.K.$ 300/cu.m. of waste is levied for the provision of such service. Request for this service must be made directly by the vessel's agent to the Pollution Control Unit, Marine Department, Tel: 815-0100, at least 48 hours in advance, giving details of the quantity and type of waste to be collected.

The above services are available daily between 0830 hrs. to 1800 hrs., except Sundays and public holidays.

WASTE OIL DISPOSAL: A chemical and oily waste treatment plant is ready for use.

SEAMAN'S CLUBS: Mariner's Club, 11 Middle Road, Kowloon, Hong Kong. Tel: 368 8261. Fax: 366 0928.

Facilities: Some 72,000 seafarers use the facilities each year. Accommodation for 150 seafarers is provided by the Mariner's Club which has 83% occupancy. Public rooms are converted into dormitories in case of need. Restaurants, bars, bowling alley and swimming pool are well patronised, but the services which are most appreciated are the free use of typewriter, secretarial and travel help and access to fax and international telephone services. Two social workers offer counselling service to the Chinese seafarers and their families. The chaplains, assisted by the Marine Department, Seamen's Union and Officers' Guild, also provide advice and assistance to foreign seafarers who need help during their stay in Hong Kong.

CURRENCY: Hong Kong Dollar (H.K.$). U.S.$ 1.00 = H.K.$ 7.80. Fixed rate. No restrictions on capital flow in or out.

WEATHER: 1st May to 31st October usually considered as typhoon season. No operation of cargo when typhoon signal No. 3 or upward is hoisted. Also see "Radio".

GENERAL: No waste to be thrown into harbour. A free refuse disposal service is available for domestic refuse. Ship's agents can arrange this through Marine Department. Chain required for mooring to buoy. Unnecessary use of ship's sirens prohibited.

DEVELOPMENTS: *Terminal 9:* A four berth Terminal will be constructed by reclamation on Tsing Yi Island. Completion expected in 1999. *Terminal 10:* A four berth Terminal (No. 10) will be constructed on East Lantau Island. Completion expected in 2000. *Terminal 11:* A four berth terminal (No. 11) is expected to be completed in 2000.

NOTICES: Marine Department Notice No. 42 of 1985 (Dated 4th March 1985).

Quarantine Inspection – Eastern Quarantine Anchorage

1. Masters, Owners and Agents of ships are advised that with effect from 1st April, 1985, a Quarantine Service will be available in the Eastern Quarantine Anchorage between the hours of 0800 and 1800 daily upon request. Ships requiring this service should make a request to the Vessel Traffic Centre when establishing contact on VHF Radio Channel 12 prior to arrival.

2. The existing continuous Quarantine Service in the Western Quarantine Anchorage remains unchanged.

3. Marine Department Notice No. 186 of 1984, concerning arrangements for obtaining the services of the Port Health Doctor at the Eastern Quarantine Anchorage will be superseded with effect from that date.

4. Copies of the Notice may be obtained free of charge from the Port Formalities Office, Marine Department, 3/F, Harbour Building, 38 Pier Road, Hong Kong.

Signed: Director of Marine.

Marine Department Notice No. 152 of 1984 (Dated 8th August 1984).

Notice to Owners, Agents and Masters of vessels of over 300 gross registered tons calling at Hong Kong

Owners, Agents and Shipmasters are reminded that Vessels of more than 300 gross registered tons are required to have on board, whilst in the waters of Hong Kong, very high frequency (VHF) radiotelephone equipment. Such vessels are required to make contact with the Vessel Traffic Centre on Channel 12 or 14 of the VHF radiotelephone before they enter the waters of Hong Kong and thereafter to make reports as specified in the Shipping and Port Control Regulations. In addition, a continuous listening watch must be maintained on the radiotelephone, on the specified channels. Failure to comply with these requirements renders the Master liable to prosecution.

Accordingly, Owners and Agents are requested to advise the Masters of vessels enroute to Hong Kong of the foregoing requirements.

The booklet, Hong Kong Shipping and Port Control Laws giving further details is available from the Marine Department Headquarters, Harbour Building, 38 Pier Road, Hong Kong, price $5. You should obtain a copy of this booklet if you are in any doubt as to the laws applicable in Hong Kong.

You are also advised to obtain the publication "Hong Kong Vessel Traffic Services User's Guide for Group 1 Users", promulgated with the intention of facilitating users' familiarisation with the Vessel Traffic Service, which is being introduced with a view to its ultimate compulsory participation.

Please note that the requirement to comply with these VHF reporting procedures does not apply to any vessel to which Part IV of the Shipping and Port Control Ordinance applies.

Signed: Director of Marine.

Notice to Mariners No. 39 of 1983:

Hong Kong Waters, Approaches to Hong Kong Permission to Enter Hong Kong Waters

1. Agents and Masters are reminded that it is mandatory for ships to obtain permission to enter Hong Kong waters from the Director of Marine. It is in their best interests to give as much prior notice as possible before arrival. Permission to enter is conditional upon the following information being supplied to the Director:

(a) Name and nationality of vessel.
(b) Number of persons on board.
(c) Type of vessel.
(d) Reason for call at Hong Kong.
(e) ETA off Waglan Island.

2. The Director of Marine can be contacted through the Vessel Traffic Centre ("MARDEP") in any of the following ways:

(a) By W/T or R/T (HF) via Hong Kong Radio (VPS).
(b) By R/T on VHF Channel 12 (156.60 MHz).
(c) By Telex: 63607 Mdpcc Hx.

Signed: Director of Marine.

Notice to Mariners No. 52 of 1986

Hong Kong Waters – Approaches to Tolo Harbour Establishment of Pilot Boarding Station

Date: With effect from 1st September 1986.
Position: Latitude 22° 29' 36" N., Longitude 114° 19' 42" E.
Area: Tolo Channel.
Details: A pilot boarding station has been established in the above position.
Remarks: Providing its Master has reported to the Authority in accordance with Section 10E of the Pilotage (Amendment) Ordinance 1985, a ship required to be under Compulsory Pilotage may navigate in the pilotage area without a licensed pilot, if it is on its inward voyage from the time it enters the pilotage area to the time it arrives at a pilot boarding station, so long as it is directly proceeding to a pilot boarding station and if it is on its outward voyage under the pilotage of a licensed pilot, from the time the licensed pilot disembarks to the time it leaves the pilotage area, so long as it is directly leaving the pilotage area.

Charts Affected: BA 939, 3386.

Signed: Director of Marine.

Marine Department Notice No. 44 of 1995.

Pre-Arrival Notification before Entering Hong Kong Waters

1. Owners, Operators, Agents and Masters or persons-in-charge of vessels intending to enter the waters of Hong Kong, are required, under the Shipping and Port Control (Amendment No. 2) Regulation 1994, Cap. 313, the Law of Hong Kong, to submit to the Vessel Traffic Centre (VTC, call sign "Mardep"), at least 24 hours before the vessel's intended entry, the information specified in the Annex to this Notice.

2. The information is required by VTC for processing a vessel's application for permission to enter the port. Permission for entry may be refused, withheld or delayed if such information is not received by VTC.

3. Copies of this Notice may be obtained free of charge from the Port Formalities Office, Room 318, Harbour Building, 38 Pier Road, Hong Kong.

Signed: Director of Marine.

Annex: Pre-Arrival Notification before Entering Hong Kong Waters:

1. Name of vessel.
2. Call sign of vessel.
3. Flag of vessel.
4. Type of vessel.
5. Gross registered tonnage of vessel.
6. Length overall of vessel in metres.
7. Number of crew including Master.
8. Purpose of call in Hong Kong.
9. Estimated maximum draft of vessel in metres on arrival.
10. Any defects affecting manoeuvrability or seaworthiness, or special condition of the vessel or its cargo.
11. Quantities and categories of dangerous goods onboard including radioactive materials (insert "None" if applicable).
12. (a) Name of Agent of vessel in Hong Kong (insert "None" if no Agent appointed and indicate whether an Agent is to be appointed or whether the Master is to act as Agent).
    (b) Name of Master of vessel.
13. Intended pilot boarding station if a Pilot is required.
14. Estimated time of arrival at intended pilot boarding station (expressed as "YY/MM/DD/hh/mm").
15. Last port of call (state name of port and country or territory).
16. Height to highest point of vessel in metres above waterline on arrival.
17. Any other relevant information (if applicable).

Marine Department Notice No. 45 of 1995.

Airdraft Information

1. Shipowners, Operators, Agents and Masters or persons-in-charge of vessels or other floating craft intending to enter the waters of Hong Kong are reminded to provide the Vessel Traffic Centre (VTC, call sign "Mardep") with the airdraft of such vessels or floating craft. This information should be included into the pre-arrival notification of the vessel and be submitted to the VTC not less than 24 hours before the vessel's intended entry into the waters of Hong Kong. Airdraft is defined as the height of the highest point of a vessel's structure above sea-level at any particular draft.

2. Copies of this Notice may be obtained free of charge from the Port Formalities Office, Room 318, Harbour Building, 38 Pier Road, Hong Kong.

Signed: Director of Marine.

Marine Department Notice No. 121 of 1987

Compulsory Pilotage

1. Notice is hereby given that the Pilotage (Amendment of First Schedule) Order 1987 will come into effect on 1st August, 1987. The Order will extend the requirement for compulsory pilotage generally to ships of 5,000 gross registered tonnage, or over, as specified in the First Schedule. The amended First Schedule will specify the following vessels:

(1) A ship of 5,000 gross registered tonnage or over.

(2) A ship of 1,000 gross registered tonnage or over, but under 5,000 gross registered tonnage, proceeding to or from any wharf specified in Part I of the First Schedule, and any container terminal specified in the Third Schedule, to the Dangerous Goods (Shipping) Regulations.

(3) A ship of 1,000 gross registered tonnage or over carrying dangerous goods specified in Categories 1, 2 and 5 in the Schedule to the Dangerous Goods (Classification) Regulations.

(4) A ship of 1,000 gross registered tonnage or over, but under 5,000 gross registered tonnage, proceeding to or from a Government mooring buoy.

(5) A ship of 300 gross registered tonnage or over which –

(a) is for any reason, unable to proceed under its own power, manoeuvre with its own steering gear, or work with its own anchors;

(b) has any part of the hull structure removed, or under repair, which may affect the watertight integrity of the ship; or

(c) is at risk of causing injury to persons or damage to property, any other ship or the environment by virtue of the condition of the ship or the nature or condition of its cargo.

2. Copies of the Pilotage (Amendment of First Schedule) Order 1987 (Gazette Legal Notice No. 163 of 1987) may be obtained from the Government Publications Sales Centre, Ground Floor, General Post Office Building, Connaught Place, Central, Hong Kong.

Signed: Director of Marine.

SHIPMASTER'S REPORT: October 1984 (Updated 1996).

Immigration: Notice to Master – Immigration Clearance on Arrival in Hong Kong (Form 1D 245A)

1. (Text) Being the Master of a vessel, you are required, on arrival of the vessel in Hong Kong, to anchor or moor the vessel at an approved Immigration Anchorage (as illustrated on the back page) for as long as may be necessary for Immigration examination, and hoist the Immigration Examination Signal until an Immigration Officer permits you to lower it. The Immigration Examination signal should be, by day, the letters H. N. N. shown by means of signal flags and, by night, 3 lights coloured WHITE in a vertical line one over the other, equally spaced at a distance of not less than 1 m. and visible from any direction at a distance of at least 1 nautical mile. Failure to comply with this requirement is an offence under the Immigration Ordinance, Cap. 115, Laws of Hong Kong and is punishable with a maximum fine of HK$120,000.

2. This opportunity is also taken to remind you that it is your duty to ensure that no persons leaves or boards your vessel (except a Port Health Officer or a Pilot in the course of his duty) and nothing shall be removed from or taken or placed on board your vessel before Immigration Examination.

Master's Remark: Approaching the Western Quarantine Anchorage without a Pilot was difficult, because of an enormous quantity of Chinese and local junks occupying the very narrow roads, waiting for their turn to be cleared. Vessel dropped anchor at 0900 hrs. local time and first persons to board were 2 Customs Officers who came on board by means of lowered accommodation ladder. They were followed half an hour later by the doctor and thereafter by the ship's Agent and shipchandler. As soon as the yellow flag was lowered bumboat people rushed to the ship displaying their merchandise on the aft part of the ship's deck. When Immigration Officers boarded almost 3 hours later they seemed to be very upset and asked me immediately to remove all persons not belonging to the ship's crew and furthermore to write a letter to their office explaining why I let anybody board before Immigration had cleared the ship. Fortunately I had hoisted the signal H. N. N. as per Agent's advice. With few words, they cleared the vessel at 1400 hrs. and I did not have to pay a penalty. They warned me again and told me on my request, after giving me their Circular 1D 245A that nobody including Customs Officers shall board the vessel except Pilot or doctor before them and whenever the Customs Officers want to board before (which is the usual case) the Master is to contact MARDEP on Channel 12 VHF, asking to contact Immigration Office to get Immigration's confirmation for the Customs to board the vessel before Immigration have cleared her. They told me furthermore not to lower the accommodation ladder and to repulse any person who tries to board.

Note: (1993) All ocean-going vessels can obtain Pre-Arrival Clearance, except those registered in North Korea or carrying North Korean crew.

Sailing without a Pilot was also not very easy and I strongly recommend Masters to take Pilots whenever entering or leaving the port of Hong Kong due to the great amount of traffic in this port.

MARDEP – Reporting Points: Vessels entering Hong Kong must report their passing to MARDEP on Channel 12 VHF at the following points:

Through East Lamma Channel	*Through West Lamma Channel*
Wang Lan Island	Wang Lan Island
Potoi Island	Potoi Island
LCS 1 Lamma Channel Buoy	Cheung Chau Island
Lamma Patch Channel Buoy	Green Island
LCS 2 Lamma Channel Buoy	
Green Island	

Through Tathong Channel
Wan Lan Island
Tathong Point
Hak Kok Tau (Cape Collinson)
Lei Yue Mun

RADIO OFFICER'S REPORT: September 1990 (Updated 1996).

Since September 1st 1992, the Pre-Arrival Clearance facility has been possible for all vessels except those registered in North Korea or carrying North Korean crew.

Radio Free Pratique possible.
Advance Port Clearance possible.

To obtain entry permission, MARDEP should be informed of the following information at least 12 hours before arrival:

1. Name/Call Sign.
2. Flag.
3. Type.
4. G.r.t.
5. LOA.
6. Number of Persons on board.
7. Reason for Call.
8. Arrival Draft.
9. Any Defects.
10. IMO Class 1, 2 and 3.
11. Agent.
12. Pilot Yes/No.
13. ETA Pilot Station.
14. Last Port.

At least 4 hours before arrival:

1. Name/Call Sign.
2. ETA Pilot Station.
3. Any Change to First Message.

Radio Pratique:
"Name" "Type"
"ETA HK", called "Last Ports in 14 days with dates of departure", Crew "Number", all healthy, possess valid travel documents and vaccination certificates, no infections, disease occured/sick person on board, valid Derat Exemption Certificate issued "Date" at "Port" apply for Radio Pratique Master.

Advance Port Clearance (staying one day only):
Name/Call Sign.
ETA Hong Kong.
Nationality.
G.r.t.
N.r.t.
Certificate of Registry, Issue Date, Expiry Date, Annual Date, Authority.
Load Line.
Safety Construction.
Safety Equipment.
Safety Radio.
Derat Exemption.
Request Advance Port Clearance.
Signed Master.

Send if coming from Australia:
Hong Kong Official Crew List.
List of Ports of Call.
Copies of: Ship's Registry, Safety Equipment, Safety Construction, Load Line, Safety Radio, Derat Exemption.

Agent:
All Certificates.
Minimum Safe Manning Certificate, 1 copy.
Last Port Clearance.
Ordinary Crew List, 3 copies.
Stores List, 2 copies.
Customs and Excise Service Form, 2 copies.
Tonnage Form, 1 copy.

Quarantine:
Maritime Declaration of Health, 1 copy.
Crew List, 1 copy.

Immigration:
Officers will not board when Pre-arrival Clearance granted.
If they do board – Arrival: 3 Crew Lists.
2 Passenger Lists.
– Departure: 2 Crew Lists.
2 Passenger Lists.

Police:
Arms and Ammunition List, 1 copy (will not always attend).

Customs:
See "Documents" – "Customs & Excise Department".

SHIPMASTER'S REPORT: July 1991.

Terminal: Lamma Power Station Terminal(See Plan).

Cargo: Coal for discharging.

Location: West side of Lamma Power Station, Lamma Island, in position Lat. 22° 13.1' N., Long. 114° 5.9' E. (See B.A.Chart No. 1918).

Approaches to Terminal: Approach to berth is via a 2 nautical mile dredged channel at South side of the berth. This channel widens into a turning basin immediately off the berth. Pilot normally boards 1.5 miles South of Yuen Kok, South of Lamma Island. Channel is 260 m. wide and has a depth of 16.5 m., and is marked by lighted buoys on both sides of the channel. Berthing and unberthing are in daytime only. Pilots for berthing are available until one hour before sunset. Four tugs are used, two made fast and two assist. Tug's lines used.

Jetty Particulars: Jetty is supported by piles and connected to Power Station by an access road alongside the coal conveyors. Length of jetty 290 m., width 26.0 m. and depth alongside 16.5 m. The berthing face is on the West side. On the East side of jetty, there is a coaster berth and ferryboat landing. A display board is fitted near the South end of jetty to indicate distance off and berthing speed of vessel.

Mooring fenders: 8×75 ton quick release hooks, 10×50 ton quick release hooks and 4×50 ton mooring bollards. There are 10 rubber fenders of different configuration for berthing and protection of jetty.

Fire protection: The jetty is protected by fire hydrants.

Coal Unloading Equipment: There are 2 grab type unloaders of 25 tonnes S.W.L. and one continuous unloader. Maximum unloader travel 230 m. Grab outreach from fender 28 m.

Freeboard limitation: No restrictions.

Communications: VHF Channels 6, 9 and 11.

Operational Particulars: Maximum vessel draft: 14.35 m.

Maximum vessel length: 262 m.

Maximum vessel beam: 40 m.

Density of water off berth: 1022/1025.

Berthing: Daylight only from HW + 30 minutes to LW − 30 minutes.

Unberthing: Daylight only, at any state of tide.

Linesmen: Provided by Lamma Power Station.

Lineboat: Pilot launch usually doubles as lineboat. Lamma Power Station also have a workboat available.

Bunkering: Not permitted when vessel is alongside. Vessels requiring bunkers will shift from Lamma to the West Anchorage via Western Lamma Channel. Maximum draft 8.5 m. for passing the channel, to take bunkers.

HAFNARFJORDUR: 64.04 N. 21.58 W. (See Plan)

PORT LIMITS: The seaward boundary is drawn as follows:
Line 1: 020°, from Lat. 64° 02.4' N., Long. 22° 08.0' W. ("Hraunsnes").
Line 2: 272°, from Lat. 64° 04.7' N., Long. 21° 59.2' W. ("Balaklettur").
These lines cross at Lat. 64° 04.9' N., Long. 22° 05.9' W.
DOCUMENTS: Documents required for Immigration and Customs clearance:
3 copies of Cargo Manifest
2 copies of Crew List and Passenger List
1 copy of Crew Declaration to the Customs
1 copy of Stores List
Customs Clearance from Last Port.
APPROACHES: Vessels, with a draft of 7.0 m. or greater, are warned that shoals exist at Lat. 64° 04.7' N., Long. 22° 08.8' W. (1.5 miles×260° from Valhusagrunn Buoy).
PILOTAGE: Pilotage is compulsory for all foreign vessels and is available 24 hours. The Pilot usually boards the vessel 0.5 miles S.E. of the Outer Buoy (Valhusagrunn, red) and requires 2 hours notice on VHF Channel 14 (or mobile telephone 8925493). Smaller vessels and Masters familiar with the port are invited to proceed to the Inner Buoy (Helgasker, green). The Buoyage is IALA "System A". VHF communication with the Pilot on Channel 14.
ANCHORAGES: For vessels awaiting the Pilot, a good anchorage is to be found 1 mile S.S.E. of the Outer Buoy (Lat. 64° 04' N., Long. 22° 04' W.). Smaller vessels may anchor 0.4 miles North of Hvaleyrarhofdi (Lat. 64° 03.9' N., Long. 21° 59.9' W.).
MAX. SIZE: Max. draft 8.5 m.
Tankers: Max. LOA 190 m., max. draft 11.0 m. for arriving tankers.
VHF: Pilot on Channel 14.
TUGS: Hafnarfjordur Pilot tug with 4 tons bollard pull. Further tugs can be ordered from Reykjavik.
BERTHING: The inner harbour is enclosed by 2 breakwaters. The Northern one is 200 m. long and the Southern one 400 m. Entrance channel is 150 m. wide, 9.0 m. deep, bottom soft clay.
North Quay: 245 m. long, depth 5.5 m. to 6.5 m., bottom soft clay. For general cargo.
Oseyrar Pier: 130 m. long and 25 m. wide, depth 2.5 m. to 4.0 m. at Southern side and 6.0 m. at Northern, bottom clay. Mainly used for fishing vessels.
South Quay: 430 m. long, depth 6.0 m. to 8.0 m. bottom clay. For bulk and general cargo vessels.
Finger Pier: 70 m. long, 10 m. wide, depth 5.5 m. to 6.5 m., bottom clay. For asphalt and laying.
CRANES: Mobile cranes of various capacities are available.
BULK CARGO FACILITIES: South Quay: Salt Store House for 8,000 tons and facilities for discharging and handling of salt.
SPECIALISED CARGO HANDLING FACILITIES: South Quay: Store House of 12,000 cu.m. for frozen fish and other frozen and refrigerated cargoes and transit cargoes.
STEVEDORES: Working hours are 0800 – 1700, Monday to Friday. Overtime can be arranged.
TANKERS: *Oil Pier:* Inside the head of the Southern Breakwater is a berth for oil tankers. See "Max. Size".
Berthing and Mooring: Vessels approach the harbour entrance on heading 098°, in the line of 2 red lights. When off the harbour entrance, the vessel is swung, assisted by tug, the port anchor is let go and the vessel comes astern inside the breakwater and is moored port side alongside.
Tidal Variation: Up to 4.5 m. Spring tide average 3.9 m. and Neap tide 1.5 m.
DENSITY: 1025.
TIDAL VARIATION: Up to 4.5 m.
FRESH WATER: Available at all quays.
FUEL: Available.
CONSULS: Available at Reykjavik (10 km.).
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: None. Slipway for vessels up to 300 tons.

SURVEYORS: Lloyd's Agents and representatives for other classification societies: Konnun Hf., Dranghals 14-16, P.O.Box 10053, 130 Reykjavik. Tel: 354-1-688422. Fax: 354-1-680472.
CUSTOMS ALLOWANCES: 1 bottle of spirits (0.75 litres); 200 cigarettes or equivalent; 6 litres of beer or 1 bottle of wine.
REPATRIATION: Possible.
AIRPORT: Domestic airport at Reykjavik 10 km. International airport at Keflavik 35 km.
TIME: GMT throughout year.
GARBAGE DISPOSAL: Collection service is available and can be arranged by ship's agent.
WASTE OIL DISPOSAL: Collection service is available. Further information can be obtained from ship's agent.
SEAMAN'S CLUBS: Church services for visiting foreign vessels and seamen.
CURRENCY: Icelandic Krona (IKr).
DEVELOPMENTS: Landfill West of harbour with additional 800 m. of wharf planned.
AUTHORITY: Captain of the Port, Buh Husid, Nordurbakka, 220 Hafnarfjordur, Iceland. *Tel:* 354-5652300. *FAX:* 354-5652308. *Contact:* S. Hallgrimsson, Harbour Master.

ISAFJORD: 66.05 N. 23.06 W. (See Plan)

DOCUMENTS: As for "Reykjavik".
Certificates: All relevant certificates required.
PILOTAGE: TFZ Isafjord Radio 2182 kHz. To call Pilot use VHF Channels 16 and 12 or morse lamps or whistle "G".
ANCHORAGE: In Fjord, depth of 6 fathoms.
MAX. SIZE: Dry cargo vessels up to 4,000 g.r.t. Tankers up to 30 ft. draft.
HEALTH: Inform Agent.
RADIO: TFZ 2182 kHz and VHF Channel 16.
TUGS: One small tug available.
MEDICAL: Inform Agent 1 hour in advance. Hospital available.
FRESH WATER: Always available through hose-pipes.
FUEL: All grades available advance notice required is 2 hours.
CONSULS: British, German, Norwegian, Swedish, Danish.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 small dry dock available.
GANGWAY/DECK WATCHMEN: Necessary. Carried out by crew.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes each crew member, 400 for Master.
Wine/Spirits: 1 bottle for each crew member, 2 bottles for Master.
Beer: 24 bottles for each crew member. 48 bottles for Master.
REPATRIATION: No facilities exist.
AIRPORT: Distance from port 2 miles, regular flights.
TIME: GMT. No change.
HOLIDAYS: Work carried out every day.
POLICE/AMBULANCE/FIRE: Police: 3258 and 4222. Fire/Ambulance: 3300 and 3333.
TELEPHONES: None available.
SERVICES: Compass adjusting, radar, echomaster, specialists.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Isafjord Port Authority, Harbour Building, 400 Isafjordur, Iceland. *Tel:* 354-4-3295. *FAX:* 354-4-4523. *Contact:* Hermann Skulason, Harbour Master (After hours Tel: 354-4-3721).

KEFLAVIK-NJAROVIK: 64.00 N. 22.33 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilotage is compulsory for vessels over 100 tons net. Pilot is available for all vessels 24 hours per day and is reached via Reykjavik Radio. Pilot boards vessel 1 mile outside Vatnsnes.
ANCHORAGE: Outside the harbour in depths of 27 m. with good holding ground.
TUGS: Use of tug is not necessary.
BERTHING: Port has concrete pier which will be extended for a length of 110 m., and a wooden quay 45 m. in length. Depth of water in harbour and alongside wharves is 20 ft. to 45 ft. Entrance is easy for access.
STEVEDORES: Working hours: 8 hours per day 0800 to 1700 hrs.
FRESH WATER: Available through hose connection on the quay.
FUEL: Available.
REPAIRS: 2 shipyards available.
AIRPORT: Keflavik International Airport is only 4 km. away.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All Tel: 2222.
TELEPHONES: None available on board.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

NESKAUPSTADUR, Nordfjordur: 65.09 N. 13.41 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Provision List.
Manifests and Ship's Papers.
PILOTAGE: No Pilots. Road clear, keep in middle of fjord.
ANCHORAGES: Depending wind. With North or N.W. winds anchor towards South coast and well in the fjord. When N.E. off town towards North coast, but keep clear of small boat moorings.
MAX. SIZE: Length/breadth no restriction. Main quay is 70 m. long and it is built right out to the steep bank at the coast. Depth close to jetty 7 m. but increases quickly.
HEALTH: Free Pratique automatic from Customs Officer. Radio for doctor if illness on board.
RADIO: Neskaupstadur Radio 2182 kHz (TFM) 24 hour watch. VHF, Channels 16 and 26. Range approximately 40 miles.
TUGS: No tugs but large motor-boats are normally obtainable if necessary.
BERTHING: No specific requirements unless over 7 m. draft, when fendering required.
STEVEDORES: If possible 24 hours ETA. Preferably before 1600 hrs. for commencing next morning. Load or discharge rates according to goods.
MEDICAL: Always send advance notice of required medical attention. Hospital available, also 3 doctors and dentist.
TANKERS: Diameters of lines 4 in. and 6 in. Oil companies B.P. and Shell have their own small quays. The third company Esso uses B.P. Jetty.
DENSITY: Normal.
FRESH WATER: Shore line on jetty. No barge.
FUEL: Diesel oil only.
CONSULS: Denmark Tel: 71299, 71430. France Tel: 71119, 71114.
REPAIRS: Limited repairs to engines, hull and deck. Good repairs to radars, sounders, tiller pilots, etc.
DRY DOCKS: None. 1 slipway, 450 tons.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: 200 cigarettes a week while in Iceland. Only 1 allowance of spirit, i.e. on arrival 1 to 3 bottles according to occupation.
REPATRIATION: Possible.
AIRPORT: Distance 3 km. Daily flights.
TIME: GMT, no alterations.
HOLIDAYS: Last Thursday April; 17th June; 1st May; 25th and 26th December; New Year, etc. If work is carried out 31st December, 24th December, Saturday before Easter and Whitsun double pay is claimed.
POLICE/AMBULANCE/FIRE: Telephone office at shore end jetty.
TELEPHONES: No arrangement to place telephones on board.
SERVICES: No tank-cleaning equipment. No discharge of tank-washings. Compass adjusting available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DELAYS: None except if berth not available.
DEVELOPMENTS: No expected draft increases. New berths are under construction but will take unforeseen time.
AUTHORITY: Hafnarstjorinn, c/o Gisli Gislason, 740 Neskaupstad, Iceland. *Tel:* 477-1333. *FAX:* 477-1771. *Contact:* Gisli S. Gislason.

PATREKSFJORDUR: 65.35 N. 23.59 W.

Passenger Lists.
Custom Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's Papers.
PILOTAGE: Pilotage not compulsory, but if needed then contact Radio Patreksfjordur on 2182 M/F.
ANCHORAGE: Anchorage is sheltered by the peninsula.
MAX. SIZE: See "Berthing".
RADIO: Radio Patreksfjordur on 2182 M/F.
TUGS: Available.
BERTHING: The entrance has a depth of 4.7 m. to 4.9 m. (15.5 ft. to 16 ft.) at LLWST. The harbour has a depth of 6.4 m. (21 ft.) at LW, and 10 m. (33 ft.) at HW. 320 m. of quayage with depths from 5.5 m. to 5.8 m. (18 ft. to 19 ft.) alongside. The harbour can be entered by day and night.
STEVEDORES: Working hours 0800 hrs. to 1900 hrs.
MEDICAL: Hospital available, contact through radio.
FRESH WATER: Available. No notice required.
FUEL: Available. No advance notice required.
REPAIRS: Machine-shop. General repairs can be effected. Diver obtainable.
AIRPORT: About 26 km. distance from harbour. Regular service, by airlines.
TIME: GMT. No change.
SHORE LEAVE: Allowed.
AUTHORITY: Hafnasjodur Vesturbyggdar, Hafnarbraut 2 Bildudali, 465 Vesturbyggd, Iceland. *Tel:* 354-456-2165. *FAX:* 354-456-2252.

REYKJAVIK: 64.09 N. 21.56 W. (See Plan)

DOCUMENTS:
For the Immigration Office
1 Crew List.
1 Passenger List.
For Customs Authority
Master's Report on vessel's arrival from abroad.
Master's Certificate with Manifests of all goods.
Master's Certificate with Manifests of goods to each port of discharge.
Health Declaration.
List of Provisions and other Stores in ship.
Ordinary procedure at least 5 copies of each manifest (3 for Customs).

PILOTAGE: Pilotage compulsory. Telegraphic address: Harbour Master, Harbour Office, Reykjavik. Desirable advance notice of ETA 24 hours and again notice 3 hours before expected time of arrival. VHF working Channels 12 and 17 at Pilot Station and pilot boats. 24 hour watch maintained.

Pilot boat: Grey hull with red and white deckhouse. International signals used if necessary. Pilot boat leaves harbour on request and meets vessel up to 1 nautical mile off Grotta (East of Buoy No. 6). Most frequent boarding place is Buoy 7 Kollafjordur.

ANCHORAGES: Good anchorage at Kollafjordur in 30 to 35 m. water 1.5 miles North of Engey Lighthouse. Anchorage prohibited in neighbourhood of harbour entrance.

RESTRICTIONS: All day service. Draft in old harbour restricted at MLWST to 7.0 m. (23 ft.), in Sundahofn to 8.0 m. (26 ft.). No other restriction.

MAX. SIZE: Longest straight quay 315 m. Breadth unrestricted. Depth 26 ft. at MLWST (29 ft. at MLWNT). At present 2 installations for oil carriers to discharge through submerged pipelines. Moorings for up to 32,000 d.w.t. ships.

HEALTH: Pratique obtained through Customs Authorities. In case of suspected disease notify port office or Agent in advance.

RADIO: Reykjavik Radio TFA.

RADAR/VHF: Radar service available for vessels approaching harbour. Pilot office can be contacted by VHF Channel 16. Working Channels 12 and 17.

TUGS: Tugs meet vessels on roadstead. Ship's lines used. Twooceangoing tugs of 800 h.p. and 1 smaller tug available.

BERTHING: Larger vessels preferably handled at high water.

Old Harbour: The Old Harbour is protected by 2 moles leaving a 100 m. wide entrance. It is divided into the West Harbour and East Harbour. The Old Harbour is a fishing harbour where passenger traffic is also served. Cruise liners berth in city centre with max. length 170 m. and max. draft 8.0 m. (26 ft.). In the Old Harbour there are several areas for ship maintenance, the main slipways and a great number of firms specialised in services for the fleet. Quayage is about 2,800 m., of which there are 600 m. only for smaller fishing craft. Draft in Old Harbour at MLWST 7.0 m. (23 ft.) and 8.0 m. (26 ft.) at Cruise liners berth. Bottom is sand and mud.

Sunda Harbour – Vatnagardar: This area is the largest for general and containerised cargo, with a special quay for grain and a container terminal with a 1 × 32 ton Paceco Portainer with an outreach of 31 m. Ro-Ro ramp available. The entrance to the area is not restricted and water depth is more than 8.0 m. (26 ft.) at MLWST. Length of quays is 780 m., with a water depth of 8.0 m. (26 ft.) at MLWST. Bottom is sand and mud.

Sunda Harbour – Holtabakki: Another harbour area for general cargo is in Kleppsvik. The entrance is a 50 m. wide channel dredged to 7.0 m. (23 ft.) at MLWST. The water depth at the quay is 7.0 m. – 8.0 m. Length of quay 250 m.

Sunda Harbour – Vogabakki: Length 300 m. Depth 8.0 m. Quay used for handling general cargo.

Sunda Harbour – Grafarvogur: This area is used for discharging and storing of cement, gravel and asphalt for industries in the vicinity. An approach channel has been dredged to 4.0 m. (13 ft.) at MLWST and water depth at the quay is 4.5 m. (14 ft.)

Eidsvik: In Eidsvik there is a quay for the State Fertiliser Plant. The entrance is unrestricted with deep water to the quay.

STEVEDORES: Stevedoring must be arranged in advance preferably by Agent. Working Hours: 0800 – 1700 hrs. With labour unions permission, work may be carried out until 2200 hrs. and on Saturdays.

MEDICAL: Medical attention available without notice. For hospital stay or surgical operation advance notice desirable, either through Agent or port office.

TANKERS: Submarine pipelines diameter for discharging are 8 in. 2 terminals handling vessels of 15,000 – 25,000 g.r.t. Vessels moor to buoys.

DENSITY: Salinity varies from 33.6% to 35.0% giving sea water density about 1027 in average.

FRESH WATER: Water delivered from taps at quay at rate of 20 t.p.h.– 30 t.p.h.

FUEL: Grade of fuel oil 200 – 400 sec. Supplied by barge or lorry.

FIRE PRECAUTIONS: Ordinary precautions for handling of dangerous goods applied.

SURVEYORS: Lloyd's Register, Norske Veritas, Germanischer Lloyd and Bureau Veritas.

GANGWAY/DECK WATCHMEN: Ship's gangway to be used. Watchmen services from ashore not necessary but can be arranged if asked for.

OPENING/CLOSING HATCHES: Carried out by stevedores.

REPAIRS: All kinds of ship repair possible.

DRY DOCKS: Only slipways available up to 2,000 metric tons weight. Dimensions: Length 85 m., breadth 13.6 m.

REPATRIATION: Can be arranged.

AIRPORTS: Reykjavik Airport within 10 minutes drive. Mostly for local routes. Keflavik Airport 50 km. distance, served regularly by airlines both to Europe and America.

CERTIFICATES:
1. Certificate of Nationality.
2. International Tonnage Certificate.
3. Certificate of Seaworthiness.
4. Cargo Ship Safety Construction Certificate.
5. Cargo Ship Safety Equipment Certificate.
6. Cargo Ship Safety Radiotelegraphy Certificate or Cargo Ship Safety Radiotelephony Certificate.
7. International Load Line Certificate.

Passenger ships must have certificates No. 1, 2, 3, 7 and in addition Passenger Ship Safety Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent. 1 litre alcoholic beverage, 24 bottles beer or 2 litres of wine.

TIME: Icelandic Summertime used all year round and is same as GMT.

HOLIDAYS: January 1st (New Year's Day); Maundy Thursday; Good Friday; Easter Monday; May 1st; Ascension Day; Whit Monday; June 17th (National Day); First Monday in August (Bank Holiday); Christmas Day and Second Christmas Day. On Christmas Eve and New Year's Eve work stops at noon. Dock work goes on on Bank Holiday and by Labour Union permission work may be carried out on Saturday against overtime payment and exceptionally at night until 2200 hrs.

POLICE/AMBULANCE/FIRE: Police (Main station) 11166; Police (Harbour Station) 10145; Ambulance 11100; Fire 11100.

TELEPHONES: Telephone connection can be arranged at some berths in the old harbour and in Sundahofn telephone connections will be at the quay.

SERVICES: Compass adjusting carried out by private firm as well as tank cleaning.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Identification card must be carried.

DELAYS: Normally no delay is to be expected beyond that caused by normal customs clearance.

GENERAL: Engines may not be run while ship is berthed.

DEVELOPMENTS: Extension of terminal facilities at Sunda Harbour underway (See "Plan").

AUTHORITY: Port of Reykjavik, Box 382, 121 Reykjavik, Iceland. *Tel:* 354-1-28211. *FAX:* 354-1-28990. *Contact:* Hannes Valdimarsson, Port Director. Captain J. Ingolfsson, Harbour Master.

SIGLUFJORD: 66.10 N. 18.50 W. (See Plan)

DOCUMENTS: As for "Reykjavik".

PILOTAGE: Compulsory. Pilot meets vessel about 400 m. from harbour entrance.

ANCHORAGE: East of harbour in depths up to 25 m. to 30 m., good holding ground. Gales from North set heavy sea, vessels then seek anchorage in small bay S.W. of Siglunes.

RADIO: Siglufjordur Radio TFX 2182 kHz.

VHF: Channels 16, 24, 26 and 27.

TUGS: None available.

BERTHING: There are several piers and wharves inside the North Mole, 4 quays used by larger vessels have depths up to 23 ft. at LW. The quays have lengths from 50 m. to 125 m.

STEVEDORES: Available. Working hours 0700 to 1200 and 1300 to 1700. Overtime can be arranged.

MEDICAL: All facilities available.

FRESH WATER: Available.

FUEL: Available in general grades only.

CONSULS: Denmark Tel. 71672. Sweden Tel. 71440

REPAIRS: Repairs to moderate size vessels can be obtained. Diver available.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Stevedores normally perform this work.

CARGO GEAR: Cranes lift up to 20 tons.

AIRPORT: Small airport close to town.

TIME: GMT. No change.

POLICE/AMBULANCE/FIRE: All tel. 467-1170.

SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Service available, Tel: 71237.
WASTE OIL DISPOSAL: Tanks for 5,000 litres.
SEAMAN'S CLUBS: Available, Tel: 94-71514.
CURRENCY: Icelandic Krona (IKr).
AUTHORITY: Siglufjardarhofn, Havegur 58, IS-580 Siglufjordur, Iceland. *Tel:* 467-1237, 467-1433. *FAX:* 467-2038. *Contact:* K. Rognvaldsson, Captain of the Port.

SKAGASTROND: 65.50 N. 20.20 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilots are available. When approaching port, order Pilot through Agent if required.
MAX. SIZE: Max. draft 19 ft.
MEDICAL: Doctor available but located in Blonduos 20 km. away, doctor visits Skagastrond 3 days a week.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPAIRS: Small repairs available.
AIRPORT: Nearest 20 km. away in Blonduos.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: Police Station and Firemen in the port.
TELEPHONES: Available.
SHORE LEAVE: Allowed.
AUTHORITY: Arnason Berger, Straumnes, 545 Skagastrond, Iceland. *Tel:* 95-4614.

STRAUMSVIK: 64.03 N. 22.03 W. (See Plan)

This port belongs to the Hafnarfjordur Harbour Authority. It is inside the Hafnarfjordur Port Limits and served by the same personnel.
PORT LIMITS See "Hafnarfjordur".
DOCUMENTS: See "Hafnarfjordur".
APPROACHES: See "Hafnarfjordur".
PILOTAGE: For vessels awaiting the Pilot, a good anchorage is to be found 1 mile S.S.E. of the Outer Buoy (Valhusagrunn, red) Lat. 64° 04' N., Long. 22° 04' W.
ANCHORAGE: For vessels awaiting the Pilots, a good anchorage is to be found 1 mile S.S.E. of the Outer Buoy (Valhusagrunn, red) (Lat. 64° 04' N., Long. 22° 04' W.
RESTRICTIONS: See "Berthing".
TUGS: See "Hafnarfjordur".
BERTHING: Inside the 300 m. long breakwater is a berth, 220 m. long with minimum depth 12.0 m. The entrance channel is 160 m. wide with a depth of 10.0 m.

This port is very narrow for vessels of length over 160 m. Such vessels are only docked and undocked in daylight.
CRANES: Two 8 ton harbour cranes for handling general cargo.
BULK CARGO FACILITIES: There is a suction unloader for discharging alumina.
DENSITY: Mixed salt and fresh water.
TIDAL VARIATION: Up to 4.5 m. Average: Spring tide 3.9 m. Neap tide 1.5 m.
FRESH WATER: Available.
FUEL: Available.
CONSULS: Available at Reykjavik (10 km.).
REPAIRS: See "Hafnarfjordur".
DRY DOCKS: See "Hafnarfjordur".
SURVEYORS: Cargo Surveyors, Lloyd's Agents and representatives for other classification societies: Konnun Hf., Drangahals 14-16, P.O.Box 10053, 130 Reykjavik. Tel: 354-1-688422. Fax: 354-1-680472.
CUSTOMS ALLOWANCES: 1 bottle of spirits (0.75 litres); 200 cigarettes or equivalent; 24 bottles of beer or 1 bottle of wine.
AIRPORT: Domestic airport at Reykjavik (15 km.). International airport at Keflavik (35 km.).
TIME: GMT throughout year.
GARBAGE DISPOSAL: Collection service is available and can be arranged by ship's agent.
WASTE OIL DISPOSAL: Collection service is available. Further information can be obtained from ship's agent.
SEAMAN'S CLUBS: Church services for visiting foreign vessels and seamen.
CURRENCY: Icelandic Krona (IKr).

SHIPMASTER'S REPORT: June 1985.
Pilotage: This is a satellite port under the jurisdiction of Hafnarfjordur Harbour Authority, who supply Pilots. Prior notice via Agents. Confirm by VHF to "Hafnarfjordur Pilots", but will also answer to "Straumsvik Pilots". Pilot boards 1 – 1.5 miles outside harbour.
Restrictions: Large ships berthed and unberthed in daylight only.
Max. Size: Normal max. length 210 m. O.A. Beam unlimited. Depth 12 m., and max. draft guaranteed by charterers 37 ft. (11.28 m.).
Berthing: This port is very small, with one berth only on the inner side of the breakwater. Ships handled comprise about 4 vessels a year of up to 60,000 d.w.t. importing Alumina from Australia for the Icelandic Aluminium Company smelter. Also about 65 vessels a year, of less than 3,000 tons load Aluminium ingots for export.
Tugs: On berthing a tug with bollard pull of 10 to 12 tons, which travels from Reykjavik, is used forward, and the pilot boat, with bollard pull of 3 tons is used aft. In the case of large vessels ships berth head in/port side to.
Cargo Operations: One suction unloader discharges Alumina at about 250-300 t.p.h. For 38,000 tons allow 6 days in port. No public holidays are observed while discharging Alumina. Two travelling cranes also available for loading ingots (8 tons at 20.8 m. radius).
Density: Salt water.
Fuel: Not available.
Fresh Water: Available at about 16 t.p.h.
Provisions: Available at high cost from Hafnarfjordur or Reykjavik.
Other Facilities: None. All minor repairs, medical, Agents, etc., will travel from Reykjavik. There is no permanent population at Straumsvik.
Directions: A group of three conspicuous silos, painted red and white, and about 35 m. in height, are located close to the root of the breakwater and are visible from many miles away.

AUTHORITY: Captain of the Port, Buh Husid, Nordurbakka, 220 Hafnarfjordur. *Tel:* 354-1-652300. *FAX:* 354-1-652308. *Contact:* S. Hallgrimsson, Captain of the Port.
Board of Direction, Hafnarstjorn Hafnarfjardar, Strandgotu 6, 220 Hafnarfjordur, Iceland. *Tel:* 354-1-53444. *FAX:* 354-1-51276.

VESTMANNAEYJAR: 63.30 N. 20.14 W. (See Plan)

DOCUMENTS:
- Health Certificate.
- Crew List.
- Passenger List.
- Manifest.
- Ship's Register.

PILOTAGE: Pilotage compulsory, day and night service. Ship to advise over Vestmannaeyjar Radio ETA. Pilot always available but 1 hour's advance ETA is required.
ANCHORAGE: There are anchorages with depths from 24 m. to 34 m., good holding ground about 0.5 miles North of harbour and on North side of peninsula in depths of 28 m. to 34 m.; this anchorage is exposed to winds between West and North.
RESTRICTIONS: No restrictions except for largest vessels. They must enter at high tide.
MAX. SIZE: 5,000 g.r.t.
RADIO: Vestmannaeyjar Radio. VHF available.
TUGS: Normally join in-coming vessels at anchorage. The use of tug is optional. 1 Tug, 500 h.p.
CRANES: 2 mobile cranes, capacity up to 15 tons.
STEVEDORES: Available. Ordered by Agent. Working hours: 0800-1700 hrs., Monday-Friday.
MEDICAL: Not necessary to receive advance notice. Hospital facilities and doctors available.
TANKERS: Discharge lines, 7 in. No deballasting facilities available.
FRESH WATER: Shore installations on every berth.
FUEL: All grades available.
CONSULS: Denmark, Germany, Norway, Sweden and United Kingdom. To be called through Vestmannaeyjar Radio.
REPAIRS: All repairs possible.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCES: For each crew member; 100 cigarettes or 20 cigars or 100 grm. tobacco, and 1 bottle spirits.
AIRPORT: Local airport. Daily connection to Reykjavik.
TIME: Local time GMT.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1 May); Ascension Day; Whit Monday; National Festival Day (17 June); Prayer Day; Christmas Day (25 December). No work on New Year's Day, Good Friday, Easter Sunday, Whit Sunday, 17 June, Christmas Day.
POLICE/AMBULANCE/FIRE: All tel. 1666.
SERVICES: Radio, radar services etc. Divers available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DEVELOPMENTS: Depth of entrance to harbour to be increased to 6.5 m. New Quays on North Side of harbour to be built in the near future.

SHIPMASTER'S REPORT: August. 1985.
Vessel: Research vessel, length 55 m.
Approaches and Pilotage: Heimaey is the harbour on the largest island in the Vestmannaeyjar Group; off the S.W. corner of Iceland. It is principally a fishing port, and is one of the few places providing shelter on the South Coast of Iceland.

ETAs are sent to Vestmannaeyjar Radio.

The Pilot normally boards from a white and red tug, between Heimaey and Bjarnarey Islands, but in S.E. gales a vessel should go to the North side of Heimaey.

A narrow, tortuous channel, with high cliffs on the North side, and a recent (1973) lava flow on the South, leads into an old Volcano crater where a port has been built.

Berths: The quays are modern, and well fendered. We found the harbour full of fishing boats, but space is kept for visiting vessels. Turning room is restricted, and high winds could make it difficult. The Pilot Tug assists as required.

Officials/Documents: Icelandic Officials can be very strict.

I prepared: 2 Crew Lists, 2 Ship Store Declarations (British Form C14 was accepted, as this was similar to the Icelandic Form). 2 Lists of Items in Bond – including Beer. 2 Personnel Declarations. 2 Ship's Bar Declarations (Including Beer).

Services: A courteous and efficient service was provided.

Water Supplied ex-quay at 10 t.p.h.

Fuel Delivered by Road Wagon, 5 tons at a time. Both IFO 30 and Gas Oil were available. We were able to alter the stem without any bother.

Provisions: Small quantities available through the Agent on Wednesdays.

Repairs: There are several Slips for fishing vessels.

Cranes: Mobile cranes are easily available.

Communications: Flights are frequent to Reykjavik, and there is a ferry to the Mainland.

Recreational Facilities: The main Tourist Attraction is the Volcano, still smoking from the 1973 eruption.

Good views of the spectacular Harbour and Entrance can be had by climbing up into the surrounding hills. The commercial area, near the Docks, is mainly taken up by the fishing industry. There are a few shops, a bank and a post office. Prices are reported to be high.

There are some snack type bars. Beer is Banned! Spirits are available – at a price.

AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

GENERAL (See Plan)

THE INDIAN SHIP POSITION AND INFORMATION REPORTING SYSTEM (INSPIRES): Notice No. 7A/90.

1. With effect from 01 November 1986, the Indian Ship Position and Information Reporting System (INSPIRES) was brought into operation for all Indian merchant vessels, including coastal vessels and fishing vessels of more than 300 g.r.t. All other vessels in the area are encouraged to participate in this system.

2. **Objectives:** INSPIRES has the following objectives:
   (a) to provide up-to-date information on shipping for search and rescue;
   (b) for effective Vessel Traffic Management Services;
   (c) for weather forecasting;
   (d) for prevention and containment of marine pollution.

3. **Area of Applicability** (INSPIRES Area). All the sea area North of Lat. 30° S. in the Indian Ocean including Arabian Sea and Bay of Bengal, on the West along the African Coast between Lat. 10° 30' S. and Lat. 12° N. (boundary of Navarea VIII) and in the East upto Long. 95° E.

4. **Operating Authority:** The Director General Shipping shall co-ordinate the functioning of the system with Maritime Operations Room, Mumbai. The Indian Naval Communication Centres (COMCENs) Mumbai (VTF) and Vishakhapatnam (VTO); Mumbai Radio (VWB) and Madras Radio (VWM) will participate as the shore stations for receiving INSPIRES messages.

5. **Types of Reports.**
   (a) *Sailing Plan (SP):*

   Immediately prior to departure, at departure or immediately after departure from a port within the INSPIRES area, or when entering the INSPIRES area.

   As the Sailing Plan message is lengthy with full particulars, it would be advisable to send this directly by telex. In the event the sailing time is changed by more than two hours, then only the time may be amended by the vessel when the Pilot is disembarked.

   Ships fitted only with Radiotelephony should send their departure reports prior to sailing, and send their position reports through other vessels in the vicinity. Vessels fitted with W.T. are requested to assist vessels not fitted to relay the position reports.

   (b) *Position Report (PR):*

   Every day at time specified below, vessels shall transmit a Position Report:

   A. *West of Longitude 80° E.*

   Latitudes: 0° – 10° N. 0400 – 0455 GMT
   10° N. – 20° N. 0500 – 0655 GMT
   North of 20° N. 0700 – 0755 GMT
   0° – 30° S. 0400 – 0455 GMT

   B. *East of Longitude 80° E.*

   Latitudes: 0° – 10° N. 0300 – 0355 GMT
   10° N. – 20° N. 0500 – 0555 GMT
   North of 20° N. 0600 – 0655 GMT
   0° – 30° S. 0400 – 0455 GMT

   (c) *Deviation Report (DR):*

   When ship's position varies significantly from the position that would have been predicted from previous reports, or when changing the reported route, or as decided by the Master.

   (d) *Final Report (FR):*

   On arrival at destination or when leaving the INSPIRES area.

   (e) *Any other Report:*

   Whenever required as decided by the Master to enhance the effectiveness of the objective of INSPIRES, and may, if necessary, include brief report on cyclones, deep depressions, defects, damages, deficiencies, limitations, etc., of the participating vessel which assists the position reporting system, and also reports concerning marine pollution observed at sea during the reporting period.

6. **Reporting Format.** Reporting format and procedures are given in Appendix 'A'. Sections of the Reporting Format which are not relevant to the ship should be omitted from the report.

7. **Receiving Stations.**
   (a) All the reports specified in Paragraph 5 are to be prefixed INSPIRES and transmitted to the stations detailed in Appendix 'B'.
   (b) At present the reports can be sent by any of the following methods:
      (i) Wireless telegraphy
      (ii) Radiotelephony
      (iii) Radio Telex and
      (iv) Telephone (Terrestrial)
   (c) Particulars of frequencies, watch-keeping timings, telex number, telephone numbers, etc., of Mumbai Radio (VWB), Madras Radio (VWM), COMCEN Mumbai (VTF), COMCEN Vishakhapatnam (VTO) through which the reports can be made are given at Appendix 'B'.
   (d) INSPIRES reports will be accepted free of charge by VTF and VTO. Reports sent through VWB and VWM are chargeable, but are likely to be free of charge in near future.
   (e) The reports should be sent as follows:

Sailing Plan	Before or as near to the time of departure from a port within a system or when entering the area covered by the system.
Position Report	Every day at the time specified in Paragraph 5 (b).
Deviation Report	When the ship's position varies significantly from the position that would have been predicted from previous reports, when changing the reported route or as decided by the Master.
Final Report	On arrival at destination and when leaving the area covered by the system.
Any other Report	Any other report should be made in accordance with the system procedures as notified in accordance with Paragraph 5 (c).

   (f) Importance of forwarding reports at the scheduled times specified in Paragraph 5 (b) is stressed upon the Masters and Shipowners. Masters and Shipowners are advised that if the Position Reports are not received within 6 hours of the scheduled times, names of such vessels will be broadcast on frequencies given in Notice No. 11/89 Paragraph 5. Masters are advised to listen to broadcast BN from COMCEN Mumbai (VTG) for vessels West of 80° E. and broadcast VN from COMCEN Vishakhapatnam (VTP) for vessels East of 80° E., every day at 1400 hrs. GMT on frequencies given in Notice No. 11/89 Paragraph 5. Vessels whose names are enlisted in this broadcast are to send their Position Reports to the concerned COMCEN immediately.

APPENDIX 'A'

STANDARD REPORTING FORMAT AND PROCEDURES

Telegraphy	*Telephone (alternative)*	*Function*	*Information required*
Name of System	Name of System		
INSPIRES	INSPIRES	System Identifier	Ship Reporting System
(1) SP (2) PR (3) DR (4) FR (5) Give in full	State in full	Type of Report	Type of Report (1) Sailing Plan (2) Position Report (3) Deviation Report (4) Final Report (5) Any other Report
A (Alpha)	Ship	Ship	Name and Call Sign or Ship Station identity.
B (Bravo)	Time	Date and time of event	A 6 digit group giving day of month (first two digits) hours and minutes GMT (last four digits).
C (Charlie)	Position	Position	A 4 digit group giving latitude in degrees and minutes suffixed with N (North) or S (South), and a four digit group giving longitude in degrees and minutes suffixed with E (East) or W (West); or
D (Delta)	Position	Position	True bearing (first 3 digits) and distance (two digits) in nautical miles from a clearly identified landmark (state landmark).
E (Echo)	Course	True Course	A 3 digit group.
F (Foxtrot)	Speed	Speed	A 3 digit group in knots and tenths of knots.
G (Golf)	Departed	Port of Departure.	Name of last Port of Call.
H (Hotel)	Entry	Date, time and point of entry into system	Entry time expressed as in (B) and entry position expressed as in (C) or (D).
I (India)	Destination and Ee-Tee-Aye	Destination and expected time of arrival.	Name of port and date time group expressed as in (B).
J (Juliet)	Pilot	Pilot	State whether a deep sea or local pilot is on board.
K (Kilo)	Exit	Date, time and point of exit from the system.	Exit time expressed as in (B) and exit position expressed as in (C) or (D).
L (Lima)	Route	Route information.	Intended track (see Note 2).
M (Mike)	Radio communications	Radio communications	State in full, name of stations/frequencies guarded.
N (November)	Next report	Time of next report.	Date time group expressed as in (B).
O (Oscar)	Draft	Maximum present static draft in metres.	4 digit giving metres and centimetres.
P (Papa)	Cargo	Cargo	Cargo and brief details of any dangerous cargoes including harmful substances and gases that could endanger persons or the environment.
Q (Quebec)	Defect, damage, deficiency limitations.	Defect, damage, deficiencies, other limitations.	Brief details of defects, damage, deficiencies or other limitations.

Telegraphy	*Telephone (alternative)*	*Function*	*Information required*
R (Romeo)	Pollution	Description of pollution incident or observation.	Brief details, including type of pollution (oil, chemicals, etc.), position expressed as in (C) or (D).
S (Sierra)	Weather	Weather conditions to report cyclonic conditions only.	Brief details.
***T** (Tango)	Agent	Ship's representative.	Details of name and particulars of ship's representative for provision of information.
***U** (Uniform)	Size and type	Ship size and type	Details of length, breadth (in metres) gross tonnage and type etc. as required.
V (Victor)	Medical personnel	Medical personnel	Doctor, physician's assistant, nurse, No Medic.
W (Whiskey)	Persons	Total number of persons on board.	State number.
X (X-ray)	Remarks	Miscellaneous	Any other information – give brief details.

Note:

1. For route information, latitude and longitude should be given for each turn point, expressed in C above, together with type of intended track between these points, e.g. 'RL' (rhumb-line), 'GC' (great circle) or 'Coast', or in the case of coastal sailing, the estimated date of passing significant points expressed by a 6 digit group as in (B) above.
2. The International Code of Signals should be used to send detailed information whenever language problems may exist. When the International Code is used, the appropriate indicator should be inserted after the alphabetical index in the text.

* 3. Information under 'T' and 'U' groups shall be provided by the Shipowner or Agent of Indian ships. All other ships may include this information in Sailing Plan (SP) on departure from any Indian Port or entry into the system.

Messages should normally contain the following Groups:

SAILING PLAN: SP A B E F G I L M N O P V W.
Please see Note No. 3.
ENTRY REPORT: SP A B C or D E F G H I L M N O P V W.
Please see Note No. 3.
POSITION REPORT: PR A B C or D E F N.
DEVIATION REPORT: DR A B C or D E F L N and Q, if desired.
FINAL REPORT: FR A B C or D.
EXIT REPORT: FR A B C or D E F K L.

APPENDIX 'B'
(see table below)

APPENDIX 'C'

Frequencies, Call Sign, Class of Emission, Scheduled Time and Details of Transmission of broadcast by COMCEN Mumbai (BN) and COMCEN Vishakhapatnam (VN) are tabulated below:

(a) Broadcast by COMCEN Mumbai (BN):

Name of Station	*Call Sign*	*Frequencies kHz*	*Class of Emission*	*Scheduled Time (GMT)*	*Details of Transmission*
COMCEN Mumbai (Main Station)	VTG 3 VTG 4 VTG 5 VTG 6	2072 4268 6467 8634	A1	0500 Main 1500	VTG 4 VTG 6 Continuous VTG 7

Note: Ships are to indicate their working frequency to COMCEN.

COURTESY FLAG: Correct flag to be flown by foreign ships visiting Indian ports is Indian Merchant Navy Ensign (a red flag with a length of one and one half times the width and with National Flag of India superimposed in top quarter next to staff) and not Indian National flag.
SHIP'S OFFICER'S REPORT: Apart from the various forms and Crew Lists, etc., the Customs Boarding Officer also requires a List of Private Property in possession of the Master, officers and crew on Form No. IV in duplicate and the local Agents need 2 more copies of the same for clearing the vessel inward. This procedure is followed when a vessel arrives from abroad or even when she is arriving from an Indian Port. It is common in both the cases.

ALLEPPEY: 09.29 N. 76.23 E.

PORT LIMITS: On the North by a line drawn from the North boundary pillar (white masonry structure) to 7 fathoms of water. On the South by a line drawn from the South boundary pillar, S.W. to 5 fathoms of water and thereon West to 7 fathoms of water. On the West by a line running North to South joining the Northern and Southern boundary lines. On the East by the beach road from the North boundary pillar to a stone on the beach road 220 ft. East of South boundary pillar.
DOCUMENTS:
(a) For Port Office:
Last Port Clearance (original for verification and return). Ship's Registry (original for verification and return). Load Line Certificate (for perusal and return). Safety Radio Telegraphy Certificate (for perusal and return). Safety Equipment Certificate (for perusal and return). Passenger List (1). Crew List (1). Deck Cargo Certificate (1).
(b) For Customs:
Application for Entry Inwards. Last Port Clearance. Port Office Entry Certificate. Arrival Report. Particulars required by Customs in approved form. Favour Parcel Certificate. Gift Parcel Certificate. Health Report. Opium Certificate. Arms and Ammunition Certificate. Import Manifest. Passengers List. Stores List, Crew List, and Private Property Declaration. Ship's Currency Declaration. ILH Receipt.
PILOTAGE: None. Open roadstead port.
ANCHORAGES: Approach to port free from navigational dangers. The anchorage, 3 miles offshore, provides good holding ground.
MAX. SIZE: Being open roadstead, vessels of any size can anchor according to draft.
HEALTH: Port Health Officer may be contacted by telegram addressed "Cyclone Alleppey" for issue of Pratique certificate. Procedure to be followed in Indian Port Health Rules.
RADIO: Morse system of signalling by light and signalling by International Code flags alone are available. Vessels code can be used as call sign.
VHF: Port Office on Channel 16.
TUGS: 2 tugs owned by Port Department render services per requisitions from Agents. Tugs usually approach vessels after anchoring.
BERTHING: No Berths. Electric cranes on the pier.
MEDICAL: Government hospitals available.
DENSITY: 1025.
FRESH WATER: Only available in very small quantities.
FUEL: Not available.
CONSULS: Nil.
REPAIRS/DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By stevedores.
REPATRIATION: Crew changes are effected subject undertaking by Owners through Agents.
AIRPORT: Cochin, 62 km. North of Alleppey. Internal flights only.
TIME: GMT plus 5.5 hours.
HOLIDAYS: For work on approved closed port holidays and national holidays labourers have to be paid extra in addition to wages.
POLICE/AMBULANCE/FIRE: Emergency (Fire and Police) 100 Alleppey Exchange.
SHORE LEAVE: Crew allowed to land. Foreigners required obtain prior permission of Police authority through Agents.
IDENTIFICATION CARDS: Necessary only when crew land ashore.
AUTHORITY: Port Officer. *Tel:* 2213, home 3594.
AGENT: See "Cochin".

BEDI BUNDER: 22.31 N. 70.02 E.

DOCUMENTS:
1 Maritime Declaration of Health.
1 Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
4 Stores Lists.
4 Private Property List of crew and officers.
4 Certificates of Currency, Arms and Ammunition and Deck Cargo.
1 Same Bottom cargo list.
1 Hazardous Cargo List with categories.
PILOTAGE: Vessels anchor at roads as pilotage not compulsory; however, if requested in advance by Master to "Portal Bedi", ship may be piloted from Pirotan Lighthouse to Rozi Anchorage about 7 miles from port by local Pilot Guide. Pilot boards vessel off Pirotan Island Light (Lat. 22° 36' N., Long. 69° 57' E.).
ANCHORAGE: Lighterage port. Vessels anchor at Rozi Anchorage about 7 miles from port, where good anchorage up to 7 fathoms at LW.
HEALTH: Pratique granted on delivering Maritime Declaration of Health to Customs Officer on boarding. Vessels having touched yellow fever area prior to arrival granted Free Pratique by Mosquito Party to be deputed from Kandla, which can only be arranged by prior notice failing which vessel has to proceed either Kandla or Mumbai for Free Pratique.
RADIO: Call sign VUK5. Working hours:
0930 – 1130 hrs. 1730 – 1930 hrs.
1330 – 1530 hrs. 2130 – 2330 hrs.
Frequency 600 m. or 500 kHz, working at 429 m. and calling at 500 m.
TUGS: Port tug available for use at anchorage.
BERTHING: No berths.
STEVEDORES: Agents and stevedores require advance ETA of 24 hours for preparing labour gangs. Daily loading is 400/500 tons for bagged cargo.
MEDICAL: 24 hours notice required for medical service. Government hospital at Jamnagar where vaccination/fever injection services available.
DENSITY: 1025.
FRESH WATER: Supplies by barge capacity 50 tons. Possible supply about 50 tons every alternate tide subject adequate supply of water in port area.
FUEL: None.
CONSULS: None.
REPAIRS: No facilities for repairs to ships.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: The services of watchmen are recommended.
OPENING/CLOSING HATCHES: By ship's crew.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Exemption Certificate.
Cargo Gear Certificate.
AIRPORT: Jamnagar – 7 miles from city. Daily flight Jamnagar-Mumbai.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Non-working days and work not permitted even on payment of overtime charges: Indian Republic Day; Bakri-Id; Holi; Muharram; Gokulastami; Dasehra; Diwali; Ramzan-Id.
POLICE/AMBULANCE/FIRE: District Superintendent of Police 100 and 3795; Ambulance/Casualty Department 4444; Fire 101.
SHORE LEAVE: Crew members allowed ashore in emergency or for medical treatment. Necessary police permits take 48 hours.
REGULATIONS: No launch services available for crew. Only 5 ships allowed to work at time at anchorage. Further arrivals wait turn.
DELAYS: Delay expected for loading and discharging in monsoon due to limited number of barges available.
GENERAL: Tidal port and barges loaded and sent out to ship during tide time only. Loading of barges carried out manually.
DEVELOPMENTS: The scheme of creating additional facilities, road connection, transit godowns, electrification and water supply and cranes, etc. near mouth of creek. This newly developed area is completed and connected by good all weather road with City of Jamnagar.

SHIPMASTER'S REPORT: September 1991.
Pilotage: No pilotage service available.
Anchorage: Lighterage port. Vessels anchor at Rozi Anchorage. The working area is within a circular area with radius 2.0 miles – 2.25 miles, centred on Kalvan Lighthouse and the 10.0 m. line.
Radio: Not confirmed. Okha Radio have no information.
Tugs: Out of use for anchorage.
Fresh Water: Supplies by barges of 100 tons capacity.
Fuel/Luboil: Available.
Repairs: Small repairs available through local Agent.
Dry Dock: Available.
Shore Leave: Crew members allowed ashore. Master must send notice to the local Agent 24 hours beforehand, giving name and crew list's numbers of each person in order to obtain Immigration Officer's permit. The day after which the Agent sends a motor launch to take crew members nominated to the shore.
Regulations: During ship's stay at anchorage (21 days), 7 ships loaded and 1 ship discharged at the same time and 3 ships were waiting turn.
Authority: Immigration/Port Officer.

AUTHORITY: Port Officer.
AGENT: See "Cochin".

BELEKERI: 14.43 N. 74.15 E. (See Plan)

PORT LIMITS: *North:* A line drawn due West from Kawada Guda Peak into the sea up to 7 fathoms of water starting from a point 50 yards above high-water mark of the shore.
East: Seashore of Belekeri Bay 50 yards above high-water mark from North Boundary Mark to rocky promontory in Lat. 14° 40' N. including the Belekeri Creek and all branches thereof, as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including Islands. All patta lands and other private sites excluded.
South: A line drawn due West from a point 50 yards above high-water mark of rocky promontory in Lat. 14° 40' N. into the sea up to 7 fathoms of water.
West: A line joining the two 7 fathom points in the sea.

ANCHORAGE: The anchorage for shallow draft vessels in open roadstead is with Kukra Island bearing 080°(T) distance about 1.5 miles in depth of 27 ft. to 29 ft. Anchorage for deep drafted vessels is with Kukra Island bearing 080°(T) distance about 2.5 miles in depth 34 ft. to 37 ft.

DOCUMENTS:
8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists.
4 Import Manifests.
Last Port Clearance.

PILOTAGE: Not necessary. Vessels anchor in stream and in open sea. Ships can be manoeuvred under guidance of Port Officer.

HEALTH: Medical Officer, Ankola acts as Port Health Officer. Free Pratique to incoming vessels granted by radio. All vessels calling from foreign destination must send radio message addressed "Medical Officer, Ankola", at least 48 hours before entering, giving last port of call, number of crew, health conditions, ETA and requesting Pratique; same message must be repeated to Agents also, on which Pratique granted on shore. Anchoring time is Pratique time. For vessels from Indian ports Pratique not required. Vessels which have taken on board passengers or crew from yellow fever areas within 30 days of departure from such ports will be under quarantine. Free Pratique will not be granted until Mosquito Search Party, from nearest major port (i.e. Cochin, Goa or Mumbai) has inspected, disinfected and certified that ship fit for granting Pratique. Master to inform Agent well in advance if arriving from yellow fever area to enable arrange Mosquito Search Party for quick Pratique.

RADIO: Recommended to give ETA or Pratique messages via Goa or Mumbai Radio.

BERTHING: No berths.

STEVEDORES: ETA required at least 48 hours prior arrival order Agents advise Shippers and stevedores.

MEDICAL: No hospital but good medical aid given at Karwar, 20 miles distant. In case of inoculations and vaccination at least 2 days advance notice to be given for vaccines to be brought from Hubli or Mumbai, distance 100 and 150 miles respectively.

DENSITY: 1025.

FRESH WATER: Can be supplied from Karwar by water barge.

FUEL: None.

CONSULS/REPAIRS/DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Generally done by ship's crew.

CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Vaccination and Inoculation Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member. Wine and/or Spirit: 1 bottle of light spirit and 1 bottle of hard spirit per crew member.

CARGO GEAR: Valid International Cargo Gear Certificate not more than 12 months old. Validity shall cover whole period of loading and discharging.

REPATRIATION: Arranged from Goa or Mumbai.

AIRPORT: Nearest airports Goa or Mumbai.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Port Authorities. Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).

POLICE: Tel: 49.

SHORE LEAVE: Permission may be obtained (Chinese personnel not allowed to land on shore).

IDENTIFICATION CARDS: Not required.

AUTHORITY: Port Conservator, Belekeri, Ankola, Uttar Kannada District, Karnataka State, India. *Tel:* Belekeri 22.

BEYPORE: 11.08 N. 75.52 E.

PORT LIMIT: The seaward (Westward) limit of the Port is the 9 fathom line.

DOCUMENTS:
6 copies Crew List.
6 copies Passenger List.
A & B Certificate.
Bill of Health.
Last Port Clearance.
Port and Light Dues Register.
Vessel's Manifest.
Bill of Lading and other documents which may be necessary (6 copies each).
Ship's Certificates.
Register.
Articles of agreement in the case of foreign going vessels staying in Port for more than 48 hours.

PILOTAGE: Pilotage is compulsory. 48 hours and 24 hours notice of ETA required. 2 hours before arrival, vessel to contact Calicut Signal Station through VHF Channel 16. Pilot boards at the anchorage. No night pilotage at present.

ANCHORAGE: Safe anchorage can be obtained in a depth of 7.0 m. – 10.0 m. between Beypore Lighthouse bearing 090° (T) and 045° (T).

RESTRICTIONS: At present, entry only during daytime and during high water, permitted draft 4.0 m.

MAX. SIZE: Maximum permissible length 100 m., beam 12.0 m. and draft 4.0 m.

HEALTH: See "Calicut".

RADIO: See "Calicut".

Signalling: The signal station is situated on the Northern side of the Beypore Port on the inner end of the breakwater. The station is manned only while a vessel is waiting, otherwise VHF contact can be made through Calicut Signal Station.

VHF: 24 hours at Calicut Signal Station, when expecting a vessel, or when there is a vessel at anchorage, calling Channel 16, working Channel 12.

RADAR: No radar station.

TUGS: Two motor tugs of 191 h.p. and 132 h.p. (twin screw) are available for assisting berthing and towing cargo lighters. Number of tugs used for berthing depends on time and weather conditions.

BERTHING: There is a wharf 152 m. in length with closed and open go-down facilities. Draft alongside 4.0 m. at low water. Load/discharge by shore cranes or by ship's gear for handling general and bulk cargoes.

CRANES: There are 4×3 ton shore cranes and 1×5 ton shore crane. No heavy lift cranes available.

BULK CARGO FACILITIES: See "Berthing".

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGE: None.

STEVEDORES: See "Calicut".

MEDICAL: General hospital and medical college hospital situated about 12 km. and 18 km. respectively.

TANKERS: No facilities.

DENSITY: 1022 (varies).

FRESH WATER: About 25 tons a day available at cost of Rs.50/ton.

FUEL: Only HSD oil available by trucks with ample notice.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: None.

REPAIRS: Minor deck and engine repairs are possible.

DRY DOCKS: None.

SURVEYORS: The Port Officer, Calicut, undertakes private surveys.

GANGWAY/DECK WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: One bottle of spirit and 200 cigarettes for each crew member.

CARGO GEAR: Loading/discharging effected by shore gear and ship's gear.

REPATRIATION: Possible.

AIRPORT: See "Calicut".

TIME: See "Calicut".

HOLIDAYS: See "Calicut".

POLICE/AMBULANCE/FIRE: See "Calicut".

TELEPHONES: No facilities.

SERVICES: Available from Cochin.

BANKS: Many at Calicut.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required. Shore passes are issued.

GARBAGE DISPOSAL: Can be arranged through Agent.

SEAMAN'S CLUB: None.

CURRENCY: Rupees.

GENERAL: *Charts:* Indian Charts No. 22, 259, 2053 and 2003.

DEVELOPMENTS: Extension of present wharf underway, and 2 go-downs are under construction.

It is also proposed to construct an LPG plant on the Southern bank of the river at Chaliyam, and a suitable wharf with a depth alongside of 9.0 m.

AUTHORITY: Port Officer, Port Office, Kozhikode. *Contact:* Captain C. Ramachandran, Port Officer.

Also see "Calicut".

BHAVNAGAR: 21.47 N. 72.08 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Certificate.
Manifest on prescribed form (3 copies).
Declaration of private and personal property.
2 Copies of Crew List.
Customs circulation copy issued by Boarding Officer of last Indian Port of call.
Place and date of Derat Certificate.
Also see "Report" dated January 1996.

PILOTAGE: Pilotage should be arranged in advance through ship's local Agent who may be contacted via the port radio, call-sign VUJ-9. An ETA should be sent at least 48 hours in advance in order to arrange Pilot. Pilotage is compulsory. Pilot boat is normally a tug boat which can be contacted by VHF. Pilot station is 4.5 miles N.N.E. of Piram Island Lighthouse and pilot boat will only be on station when the vessel is scheduled to arrive. Vessels should arrive at Pilot Station about 2 hours prior to time of HW and are advised not to anchor awaiting a Pilot but to make a reciprocal course until arrival of the pilot boat.

ANCHORAGE: Vessels up to 35 ft. draft are anchored about 3 miles Eastward of Perigee Light Vessel (increased from 31 ft. on a trial basis). All vessels at anchorage are loaded and discharged by means of lighters

Precautionary guidance to the Master of the Ship arriving at Bhavnagar Anchorage:

1. Proper anchorage watch to be kept throughout the period at the anchorage.
2. Engine should be kept on stand-by so as to be made available within 20 minutes in case of an emergency when Spring tides are running.
3. To prevent yawing during Spring tides a second anchor is to be used with about 2 shackles and must be heaved up and dropped well in advance of every turn of the tide, (about 1.5 hours before and after tide change) so as not to foul the anchor.

Suggested routine is as follows:

(a) Heave up the riding anchor to one shackle.
(b) Steer well clear, about 35° to 40° from the leading anchor.
(c) Let go second anchor.
(d) Walk back to get good lead on second anchor.
(e) Let go second anchor 1.5 hours after HW.
(f) Heave up second anchor 1.5 hours before LW.
(g) Let go second anchor 1.5 hours after LW.
(h) Heave up second anchor 1.5 hours before HW.
(i) Never clear the fouled anchors during the middle of the tide, it should be done at slack water, i.e. about 1.5 hours before relevant end of the tide.
(j) In case of violent shearing the steering may be used. Auto-pilot can be made use of to steer a course in between yaw.

MAX. SIZE: Up to 500 ft. length, and up to 65 ft. breadth may berth alongside.

Permissible draft for a particular tide is arrived at by subtracting 17 ft. from predicted height of HW for that particular tide.

HEALTH: Healthy ships are granted Pratique by the Pilot. If the Vessel is coming from a Yellow Fever area or a jigger infected port within the last 30 days then Pratique is granted by the Port Health Officer at Kandla.

RADIO: Bhavnagar Port Radio, call sign VUJ-9 should be used for routing ETA messages, and is also used by Agents in cables to shipping.

Time of operation:	0200 – 0700 hrs. 0800 – 1300 hrs. 1400 – 1800 hrs.
Range:	250 miles.
Calling Frequency:	500 kHz and VHF Channel 16.
Working Frequency:	418 kHz and VHF.

VHF: Port Control available 1100 hrs. to 1800 hrs. on Monday to Friday and 1st and 3rd Saturday of each month.

TUGS: Tug assistance is available for berthing and unberthing vessels in inner harbour. Position where tugs join the vessel is dependent upon prevailing weather conditions. Usually ship's lines are used in connections to tug.

BERTHING: Port equipped with 3 berths having 6 cranes with 3 tonnes capacity. Cranes available for loading or discharging ship cargo. 3 mobile cranes with capacity up to 18 tons and 1 fork lift also available.

Storage: Concrete Jetty: 16 transit sheds with floor area of 21,205 sq.m.

Steel Jetty: 3 transit sheds with floor area of 4,753 sq.m.

Godowns: Steel Jetty: 51 godowns with 50 partitions. Total floor area of 59,710 sq.m.

In City: 3 godowns with floor area of 2,230 sq.m.

Ample open storage space is available.

STEVEDORES: The stevedoring gangs are arranged directly by Agents through approved stevedores.

Working Hours: Day: 0800 hrs. to 1200 hrs. and 1300 hrs. to 1700 hrs.

Overtime: 1800 hrs. to 2200 hrs. and 2300 hrs. to 0300 hrs.

Recess: 0300 hrs. to 0800 hrs. and 1200 hrs. to 1300 hrs. 1700 hrs. to 1800 hrs. and 2200 hrs. to 2300 hrs.

MEDICAL: Medical facilities can be arranged by Master through Agent. Hospital facilities available in city of Bhavnagar which is 13 km. from port.

FRESH WATER: Fresh water supplied alongside jetty as well as at anchorage.

Shipmaster's Report: Water is often in short supply, and ships may be unable to obtain any at all at the anchorage. Ships should not rely upon an evaporator to make water at the anchorage, due to the high mud content of the sea water.

FUEL: Oil bunkering available in limited quantity.

FIRE PRECAUTIONS: Alongside jetty fire-fighting facilities available. At anchorage fire-fighting facility is provided by the tug.

Usual fire precautions applicable.

CONSULS: No consulates at port. Nearest consulates are at Mumbai.

REPAIRS: No repair facilities exist for the ship except repairs of minor nature which could be undertaken by private repair firms.

DRY DOCKS: Small dry dock available for repairs of vessel of up to 200 ft. length.

SURVEYORS: Surveyors should be arranged in advance with Agent. Surveyors come from Mumbai.

GANGWAY/DECK WATCHMAN: Gangway and deck watchman are recommended.

OPENING/CLOSING HATCHES: As arranged between the Master and stevedores.

CERTIFICATES: Registration; Safety Equipment; Safety Radio and Telegraphy; International Load Line.

CUSTOMS ALLOWANCES: As per Customs regulations in force from time to time at Indian ports.

CARGO GEAR: Ships should possess valid Cargo Gear Certificate.

REPATRIATION: Possible.

AIRPORT: Bhavnagar City is served by an airport situated about 7 km. from the Port. Regular flights to Mumbai are available daily and to Surat on Monday, Wednesday and Friday.

TIME: GMT plus 5.5 hours.

HOLIDAYS: 8 holidays a year declared by Port Authorities on which working of the ship can be attended at the option of the port.

POLICE/AMBULANCE/FIRE: Police force and ambulance and fire facility available from Bhavnagar City. Limited fire-fighting facility available at port.

TELEPHONES: No facility is available for providing telephones on board the ships.

SHORE LEAVE: Citizens of The People's Republic of China and Pakistan not allowed ashore. All other nationals are allowed to go to Bhavnagar City which is 13 km. from port for which shore passes are issued by Customs Dept.

CREW IDENTIFICATION CARD: Valid international passport or identification card necessary. Shore passes are issued.

REGULATIONS: Photography in port prohibited. No crew member allowed to take liquor ashore.

DELAYS: Delays in berthing depend upon number of ships working on berth and awaiting if any. At anchorage generally not more than 2 ships are worked at a time.

SHIPMASTER'S REPORT: April 1981.

Bhavnagar discharging anchorage is a dangerous anchorage due to strong currents and an abnormal bottom.

All Shipmasters must make contact by cable 24 hours before arrival and await appointment from Port Authorities and Pilot Station. VHF not available and radio station working only during daytime.

All ships must arrive at Pilot Station, maximum 2 hours before HW and only during daytime and in good visibility, otherwise Pilot cannot board.

For many years anchorage was used for discharging, but now closed as about 300 anchor-chains remaining on bottom. In 1981, another anchorage opened, near to the port, and up till April, 4 ships lost anchors due to strong currents and irregular bottom. Contact with shore is very difficult and at night time impossible.

Our vessel was there for discharging and from 0300 hrs. when port anchor broke with 7 shackles of chain, up till 0700 hrs. we were waiting for tugboat from shore to pick up 100 stevedores, but was impossible. At 0700 hrs. we took ship out of dangerous area without Pilot and without any assistance, with 100 stevedores onboard.

To enter Bhavnagar Port, draft no more than 17 ft. and breadth no more than 65 ft., to pass the locks.

SHIPMASTER'S REPORT: July 1992.

Pilotage: Pilot will board 4.5 miles N.N.E. of Piram Island, about 1.5 hours before high water, day or night. However, vessel must have prior confirmation of pilot before arriving at the Pilot Station.

Waiting Area: There is no anchorage area for awaiting pilot close to the port. Lighter vessels may anchor South of Piram Island, where ships awaiting beaching for breaking are generally anchored. Heavily laden vessels are advised to anchor about 5 miles South of Jafarabad Port (20° 51.5' N., 71° 23' E.), about 80 miles S.W. of Bhavnagar, and enter Gulf of Cambay at an appropriate time when called for pilot.

Anchorage: When anchored in the port to work cargo, following routine is suggested during Spring tides:

1. About 1.5 hours after the L.W., use helm to steer clear of the riding anchor and let-go second anchor, 2 shackles in water.
2. About 1.5 hours before the next H.W., heave-up second anchor.
3. About 1.5 hours after the H.W., use helm to steer clear of riding anchor and let-go second anchor, 2 shackles in water.
4. About 1.5 hours before L.W., heave-up second anchor.

During the Spring tides of June 1992, this vessel lost starboard anchor with 7 shackles of cable. Two other ships also lost their anchors in the same period.

It is true that no assistance from the port can be expected at any time of emergencies. The port anchorage area is now congested with more ships than it can take, which can be hazardous during the emergencies.

REPORT: January 1996.

Documents: Required by vessel upon arrival: 10 copies Crew List, 5 copies Personal Effect List with currencies of any kind, 5 copies Stores List with details of Deck/Engine/Saloon, etc.

Berthing: Berthing is out of the question as insufficient water for entering/leaving. Only small lighters up to 2,200 tonnes d.w.t. are brought inside during Spring tides.

All vessels calling at Bhavnagar Port work at anchorage and use private barges and private shore cranes on Jetty.

Shore Leave: Shore passes issued by Immigration Officer and Master to confirm, in advance, via Bhanvagar Radio on VHF, both name and rank of officers and crew landing ashore, so shore passes can be arranged and delivered on arrival.

Developments: No major dredging proposed in near future.

Authority: Port Officer changes from time to time. No permanent Port Captain is stationed at Bhavnagar Port.

AUTHORITY: Port Officer, Gujarat Maritime Board, New Port Bhavnagar, Bhavnagar (Gujarat), India. Pin Code No. 364005. *Tel:* 24302 (office). *Telex:* 0162-224 GMB IN. *Cables:* Portal Bhavnagar.

AGENT: See "Cochin".

CALCUTTA: 22.32 N. 88.22 E. (See Plan)

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Port Clearance from Last Port.
Indian Coast Light Dues Receipt (if any).
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Through Cargo Manifest.
4 copies of Stores List.
1 copy of Cargo Manifest with B/Lading for the same.
4 copies of Opium and Dangerous Drugs Certificate.
Cargo Plan.
Cargo on Deck Declaration.
4 copies of Certificate of Foreign Currency.
4 copies of Certificate of Arms and Ammunition.
Letter to Assistant Collector of Customs regarding Local Agency.
Letter to Assistant Collector of Customs regarding duty on ships stores.
Application to the Inspector of Police.
3 copies of Arrival Report.
4 copies of Watches and Clock List possessed by each member of the crew.
6 copies Hazardous Cargo, if any.

PILOTAGE: Telegraphic address of Pilot station: VWST "Pilots Sandheads". Radio message should be sent 48 hours prior arrival giving (a) ETA Eastern Channel Lt. Vs.; (b) from . . . to . . . (either Haldia, Budge Budge, or Calcutta); (c) deepest *fresh* water draft; (d) length overall; (e) d.w.t.; (f) whether VHF is or is not on board.

Pilot boards vessel at Sandheads from pilot vessel fitted with W/T, DF, VHF, radar, echo sounder and other navigational equipment, maintains continuous watch on 500 kHz and receives ETA messages of incoming vessels.

As an aid to navigation, navigable channel in river is marked with lights and channel buoys. There is a lighthouse at Sagar and downstream from this point, 2 unattended Light Vessels are stationed at Upper Gasper and Lower Gasper and 2 attended Light Vessels at Intermediate and Eastern Channel Stations. Navigable channel leading to Haldia Port from sea is 63 nautical miles and to Calcutta about 123 nautical miles. There are 15 bars in different reaches of the river, 4 of these are downstream of Haldia and the remaining 11 between Haldia and Calcutta. Since these bars are subject to fluctuations, the river is regularly surveyed and dredged as required. Owing to sharp bends, narrow channel and difficult tidal conditions the navigation of ships between ports and sea requires service of trained Pilots employed by The Port Trust. River Pilots take change of vessels at Sandheads to navigate to Haldia/Baj Baj/Garden Reach, as the case may be. River Pilots manoeuvre vessels to Haldia Dock, but at Baj Baj and Garden Reach hand over the ships to Harbour Pilots, who manoeuvre the vessels on the river moorings at Baj Baj and to the moorings or dock entrance lock in Calcutta. Movement of ships inside docks is guided by Berthing Master.

Shipmaster's Report: December 1983.

Procedure for sending ETA Sandheads Calcutta: Vessels calling at Calcutta should, along with their ETA messages to the Commander Pilot Vessel, Sandheads, also indicate the Owner's/Agent's name and only then will Master's ETA message be recorded, otherwise vessel will not be treated by Calcutta Port Trust on arrival at Sandheads for further coming up river to the port.

ANCHORAGES: Anchorage in River Hooghly at Saugor Roads, Haldia Kalpi, Baj Baj, Diamond Harbour, Royapur, Ulubaria and Garden Reach of which Royapur, Ulubaria and Garden Reach utilised only by ships on passage to and from the port in emergency. Depths of anchorages vary on day to day basis according to River Draft Forecast but on average 30 ft. deep.

RESTRICTIONS: Navigation on River Hooghly is carried out only with Pilot on board and according to tide. Speed of vessel important factor and must be declared to Pilot on board, preferably telegraphed 48 hours in advance to Pilot vessel.

MAX. SIZE: Maximum LOA 565 ft. with beam of 80 ft. for Netaji Subhas Docks and 515 ft. LOA with beam of 70 ft. for Kidderpore Docks. A vessel of 535 ft. and over can sail out as "Tide Time Sailing" only and this restricts her draft from Calcutta.

Maximum LOA of tankers for tanker terminal at Budge Budge is 620 ft. Restriction of beam for vessels berthed at Budge Budge is 85 ft. Deepest draft alongside dock berths in Netaji Subhas and Kidderpore Docks 8.70 m. At Budge Budge deepest draft at any berth 9.00 m. Berthing of vessels, depends on prevailing draft of day published in Draft Forecast for month.

HEALTH: Procedure for obtaining Pratique: To obtain Radio Pratique incoming vessels communicate by wireless to Port Health Officer, Calcutta, Cable address: "Quarantine Calcutta":

(a) No sickness or death from sickness on board within last 15 days.
(b) No sand, earth, pigs, poultry, crew or passenger taken aboard from E. Coast of Africa between Port Sudan and Durban, both ports included.
(c) Ship not touched within last 30 days any port in E. Africa between Northernmost point of Eritrea and Southernmost point of Tanzania, including Island of Zanzibar or any other yellow fever infected area.
(d) No abnormal mortality of rats or mice on board.
(e) No monkey on board.

(Item *(a)* to be sent in code under usual standard quarantine messages required by ships; rest in plain language through local wireless station.)

In case of any suspected disease or fever on board, local Agents may be contacted by cable who arrange for doctor to be sent or for removal of a patient if necessary. Vessels calling at another port in same country are exempted from obtaining Pratique.

RADIO: Calcutta Radio, call sign VWC. R/T. and VHF.

Weather bulletins broadcast to ships from Calcutta Radio (VWC) at 0018 hrs. and 0918 hrs. GMT, on 500/470, 4286, 12745 kHz. Bulletins are preceeded by time signals.

Also see "Pilotage".

TUGS: 15 tugs, 550 hp. – 2,200 hp. Tugs used for vessels after passing lock entrances at Netaji Subhas and Kidderpore Docks. Tugs used for vessels to turn. Vessels own lines. At Garden Reach sailing on ebb tide for "Tide Time Sailings".

BERTHING: Vessels brought in for berthing according to tide. Movements from one berth to another inside dock not dependent on tide, but according to convenience of port. Vessels berthed at riverside jetties or river moorings required to have starboard anchor unshackled in order that starboard chain could be tied to buoy on arrival. After first chain is shackled on, port anchor is unshackled and 2 pieces of chain, each 30 fathoms long are removed from port cable and sent aft by boat and made fast to buoys, etc., and tied to stern of ship. The remaining port cable is tied up to another buoy forward. Vessels at river jetties and river moorings if left during Bore Tide are to comply with following:

Half an hour before low water:
(a) Gangway to be hoisted up, if ashore.
(b) Pipe-lines disconnected and triced up (for vessels at Budge Budge Jetty).
(c) Heave tight on forward chains to keep vessel about 6 ft. off jetty or pontoon. Make sure weight is on bore springs and not on chains aft.
(d) Tighten all buoy ropes.
(e) When bores expected, all vessels in stream shall have steam on main engines, windlasses and winches and a sufficient number of officers and crew on board to tend vessel in case of emergency.

After bore made, and vessel stopped ranging, slack forward chains to old mark. Bore springs can be had through Agents from local suppliers.

Budge Budge (oil terminal) on banks of River Hooghly has river jetties, hence above instructions also apply to vessels berthed at Budge Budge Jetties.

At Budge Budge two lengths of chain provided by Port Trust for stern moorings.

Kidderpore Dock: Dock not in use.

Netaji Subhas Dock: Lock entrance: 700 ft.×90 ft. 8 general cargo berths, No. 1 Berth equipped with 200 ton heavy lift crane. One oil berth, Berth No. 12, used for unloading petroleum products. 6 additional berths available.

Garden Reach Jetties: 2 alongside berths for overside cargo work only.

Budge Budge: Also see "Tankers". 6 jetties which can accommodate vessels up to 625 ft. (190.50 m.) LOA.

These jetties are presently available for handling bulk liquids like edible oil, vegetable oil, soya bean oil, etc., for which separate storage of 59,000 tonnes capacity is under control of the State Trading Corporation.

BRIDGES: 2 bridges; 1 collapsible, 1 swing, situated inside Kidderpore Dock are open for navigation to suit convenience of port.

STEVEDORES: 48 hours notice of arrival at Pilot Station required by Agent.

MEDICAL: Masters in need of medical services required cable Agents. Hospital facilities. Ships leaving for foreign port or minor Indian port (where no Port Health Officer) required to ensure officers and crew have valid health certificates (for cholera and yellow fever if proceeding to a yellow fever area).

TANKERS: Not permitted discharge residue into dock (at Berth No. 12 – Netaji Subhas Dock).

S.G.	A.P.I. of local types of oil
0.91 and 0.94	0.9430 varying to 0.9550.

Tanker terminal at Budge Budge 13 nautical miles from Calcutta by river.

BB Jetty No. 1 for accommodating vessels of LOA 620 ft.
BB Jetty No. 2 for accommodating vessels of LOA 380 ft.
BB Jetty No. 3 for accommodating vessels of LOA 460 ft.
BB Jetty No. 5 for accommodating vessels of LOA 620 ft.
BB Jetty No. 6 out of commission.
BB Jetty No. 7 out of commission.
BB Jetty No. 8 for accommodating vessels of LOA 460 ft. – 580 ft.

Deepest draft alongside jetty berths 9.0 m., but vessels brought up according to prevailing draft as per forecast.

Berthing: Vessel is moored starboard side to at Budge Budge as follows: Port Anchor to about 6 shackles on the Port bow with the ship's starboard anchor unshackled, and cable shackled to the shore cable on the starboard bow. 2 shore cables made fast round the bitts are used aft. These cables are crossed. An experienced shore mooring gang boards vessels to assist in berthing, and these men require very little help from the Ship's Crew. The operation generally takes about 1.5 to 2 hours.

The sequence is as follows: The Port anchor is dropped well off and up-stream of, the Pontoon, on the first of the Ebb tide. The vessel's bow is then swung into the forward in-shore mooring buoy by a mooring rope. This buoy is then brought close under the bow whilst the starboard ship's cable is made fast to the shore cable. For this purpose, the Shore mooring gang, will, on first boarding, hang off the starboard anchor, through the hawse pipe, leaving the first 15 fathoms of cable flaked on deck. Ship's wire rope (100 mm.), should be available for hanging off, together with 75 mm. rope, quantities will be advised by the Berthing Master for lashing the cable.

When the forward cable is fast, the stern is swung, again using mooring and are made fast round the two bitts. 75 mm. (3 in.) rope lashings will also be used here. On completion of making fast the after cables, the vessel is hove into position by the windlass. The mooring ropes are made fast to the two quarter and two bow mooring buoys and are again used when the shore Gang board to break moorings prior departure. To avoid any chance of delay in mooring, the vessel should ensure that the first shackle of her Starboard cable is free prior to arrival, and should have three joining shackles ready for use in case these are required. One ship's wire will be required forward, for hanging off the anchor, and two aft, for heaving on board the ends of the shore cables. Although the shore mooring gang have their own shackles, etc., at Budge Budge, it is necessary for the ship to provide a drift punch and heavy hammer for breaking the cable.

It should be noted that at Calcutta itself there are not enough shore chains to provide moorings to all vessels using the port, and in these cases vessel's Port anchor cable will be broken to provide the after moorings. All the Budge Budge Berths, however, are supplied with sufficient cables. These latter cables are anchored to swamped moorings at each berth.

Shore Lines: All products handled through 150 mm. (6 in.) or 200 mm. (8 in.) hoses.

Restrictions: Handling of packed cargo permitted in daylight only, but not permitted during the discharge of Low Flash bulk cargo.

Fuel: Fuel oil, diesel oil and gas oil available ex-wharf at Budge Budge and by lighter. Lubricants available.

Fresh Water: Available.

General: A continuous and strict watch, especially during the hours of darkness, should be kept on the vessel, both when anchored or in the berth, in order to prevent unauthorised persons boarding the vessel.

DENSITY: Average density in port is about 1000.

FRESH WATER: Fresh water on application from Masters or Agents and preferable if at least 48 hours' notice given. Supplies through barges and direct from quay line.

FUEL: Redwood 600 – 700 sec. supplied at Calcutta and require at least week's notice for supplying vessels lying inside dock. Fuel also supplied at Budge Budge Terminal, 3 days notice to suppliers and Port Authorities.

FIRE PRECAUTIONS: Usual non-smoking precautions and Master, Owners, Charterers or their Agents of vessels carrying import cargo or intending to load export cargo of hazardous or inflammable nature, furnish 6 copies of list of cargo involved to Traffic Manager in prescribed form, at least 10 days before vessels intend to land or ship cargo. Traffic Manager on receipt of list, categorise items enumerated in list and landing delivery and storage of such cargo be done strictly in accordance with instructions.

REPAIRS: All types of deck and engine repairs undertaken.

DRY DOCKS: 5 dry docks owned by Port Trust available. 3 in Kidderpore Docks and 2 in Netaji Subhas Docks, dimensions as follows:

Dry Dock (Kidderpore) (1) 547 ft.×69 ft.×25 ft. (2) 497 ft.×69 ft.×27 ft. (3) 350 ft.×60 ft.×23 ft. (max. length/beam of vessel allowed. No. 1: 515 ft.×64 ft. No. 2: 500 ft.×64 ft. No. 3: 335 ft.×48 ft.)

Dry Dock (Netaji Subhas) (1) 581 ft.×80 ft.×22 ft. (2) 596 ft.×80 ft. ×22 ft. (max. length/beam of vessel allowed. No. 1: 565 ft.×75 ft. No. 2: 565 ft.×75 ft.)

Netaji Subhas Dry Docks arranged in tandem and used as one dock. Power supply, compressed air and fresh and unfiltered water supply, hydraulic capstans for propeller work and cranage service including heavy-lift available all dry docks. Each dock provided with automatic telephones for use on board ships.

GANGWAY/DECK WATCHMEN: Necessary and recommended by Agents at rate of 3 watchmen per shift of 8 hours.

OPENING/CLOSING HATCHES: Normally undertaken by stevedores, unless specifically mentioned that same will be attended to by crew.

CUSTOMS ALLOWANCES: 0.25 lb. tobacco and 200 cigarettes. Wine and/or Spirit: 1 bottle of wine or spirit per head for consumption on board.

CARGO GEAR: Proof of cargo gear tested by a competent authority required.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORT: 12 miles; served by regular international airlines with minimum 1 flight per day.

TIME: GMT plus 5.5 hours.

POLICE/AMBULANCE/FIRE: Police (port) Tel: 4791566 and ask Port Police or dial 100; Ambulance dial 102 or 45–4163; Fire dial 101 or 4791566 and ask Fire Fighting Service.

CONTRABAND: Regulations provide that a vessel shall be liable to confiscation which is or has been in Indian Customs' waters where constructed, adapted, altered or fitted in any manner for the purpose of concealing goods.

The act also provides for a fine in lieu of confiscation which could in theory be up to the value of the vessel.

Indian Customs Authorities regard vessels as subject to the regulations if they have any alterations to the normal structure of the vessel or its fittings which is not of operational value, e.g. holes cut in panelling (over bulkheads) which are frequently found concealed from view behind cabin furniture such as settees, bunks, desks, wardrobes, etc. Customs invariably impose fines for such cavities even though empty of about Rs. 5,000/- for 1 or 2 cavities and increasing if more cavities are found. Fines would be substantially higher if cavities in fact contained contraband.

To minimise fines it is essential that Shipowners should instruct their Masters to organise periodic anti-smuggling searches of all accommodation and other places in the vessel by ship's officers with a view to locating any cavities or contraband and such searches, and results thereof, should be logged. Furthermore, the Customs Authorities invariably obtain a statement from the occupant of the cabin whether instructions had been issued by the Owners or Master for each officer crew member to search his own cabin for cavities or hiding places or other unusual or irregular tampering with the normal structure of the cabin and to report to the Master any such cavities, hiding-places or such other unusual tampering found at any time whilst serving on the vessel.

If no such instructions have been issued, the Customs generally regard the Owners/Master as failing to take proper anti-smuggling precautions and the risk of increased Customs fines arises.

It is suggested that appropriate instructions should accordingly be issued without delay by all Masters to their officers and crews and that each officer or crew member should acknowledge receipt in writing of such instructions. It is also emphasised that such instructions should also be notified to any officer or crew member who joins the vessel after first issue of the instructions to the existing officers and crew.

HOLIDAYS: Closed Holidays (when no work is permissible): Independence Day, Republic Day, Gandhi's Birthday, Vijaya Dashami and Kali Puja.

Holidays when double wages payable: Saraswathi Puja, Netaji's Birthday; Idul Fitr, Dholjatra, Muharram, Bengali New Year, May Day, Fateh Duaz Dahan, Durgapuja, Guru Nanak's Birthday, Id and Christmas Day.

TELEPHONES: No arrangements for installing telephones on board, but use of telephones from Port Trust's/Superintendent's Office on each dock.

SERVICES: Tank-cleaning equipment with minimum notice of at least 7 days. Discharge of tank-washings not permitted while vessels lying in dock. Compass and radar technicians available.

SHORE LEAVE: Seamen permitted to go ashore after cleared by Immigration Officer boarding vessel on arrival. In case of Chinese, special permission to be obtained from Immigration Authorities, through vessel's Agents.

IDENTIFICATION CARDS: Not necessary if holding Seamen's Books or Passport.

REGULATIONS: Booklet "Dock and Jetty Handbook" supplied free by Port Trust to incoming vessels.

DELAYS: Delays occur during monsoon.

GENERAL: *Important:* Masters of vessels in port should ensure that vessel's engines are not immobilised without prior permission of the Harbour Master.

DEVELOPMENTS:

1. Construction of container terminal (Netaji Subhas Dock) with related facilities has commenced and will take about 3 years to complete. Annual capacity will be 100,000 TEU's as compared with the present 45,000 TEU's.
2. 11 new cranes and 16 fork lifts have been purchased.
3. Dredging (maintainance – deepening) of river to allow deeper draft vessels into Calcutta and Haldia.

SHIPMASTER'S REPORT: September 1979 (Updated 1994).

Approaches: When approaching Calcutta from South Sri Lanka it would be advisable to pick up False Point Light and then proceed to Eastern Channel Light Float at Sandheads for Pilot. During the S.W. monsoon vessels encounter long spells of overcast skies and rain hence vessels should pick up Dolphin Nose Light at Vishakhapatnam then coast up to False Point Light before branching off to Eastern Channel Light Vessel.

Pilotage: Pilots board at the Sandheads. For picking up Pilots from the pilot vessel, vessels will have to approach close to the pilot vessel's stern with M.M.D. approved type pilot ladder rigged over side. Separate accommodation has to be provided for Pilot.

Restrictions: None for vessels below 22 ft. draft. Those between 22 ft. and 24 ft. 6 in. may have to wait for Spring tide for entrance and departure. However, Hooghly River Authority publishes a booklet every month stating the draft restrictions for entry into Calcutta.

Berthing: Whilst entering locks, passing through cuttings and berthing, vessels should have good fenders rigged 2 ft. above the water to prevent dents and scrapes to the hull. The Port is not equipped with fenders. The coal berths at Kidderpore Docks are old. Masters should exercise caution when coming alongside these berths for waiting or loading. For tying up to riverside moorings both anchors have to be unshackled. Starboard cable lead to port buoy and port cable to starboard buoy in a cross fashion. At the stern vessels with stern cables will have to follow the same as forward. Over and above, ropes and tackles will have to be rigged for taking the initial stress of the bores before strain comes on the cable.

Tying up the vessel to the buoys at the riverside moorings can be aided by experienced shore mooring gangs at Owner's expense.

Radar/VHF: No Radar. VHF Channel 16 for contact with pilot boat or by W/T, Channel 12 for Deputy Harbour Master and Channel 10 for Dock Master and Assistant Dock Master.

Customs: Very stringent about cargo particulars.

Cranes: One heavy lift quay side crane of 200 tonnes. Berths No. 2, 3, 4 and A at NS Dock fitted with 2 tonne cranes. Berth B and D of NS Dock are fitted with 3 tonne electric cranes. Berths No. 27, 28 and 29 at K-P Docks are fitted with new 3 tonne electric cranes.

Hatches: Wooden hatch boards and beams by stevedores. Mechanically operated or other hatches by ship's crew. Rigging gangs may be employed at Owners' expense.

Stevedores: 1st shift (0630 – 1530 hrs.). 2nd shift (1530 – 2230 hrs.). 3rd shift (2230 – 0530 hrs.).

Medical: Very good hospitals and nursing homes.
Specialised Cargo Handling Facilities: Containers can be loaded and stuffed aboard. No Roll-on/Roll-off facility.
Surveyors: A.B.S., I.R.S., L.R.S., G.L., N.V. and others. Standard marine, cargo surveyors and general surveyors also available.
General: Vessels navigating the Hooghly River should be very careful about river thieves who will board the vessel whether stopped or at anchor or making way at full speed.

SHIPMASTER'S REPORT: November 1984 (Updated 1994).
Pilotage: Accommodation is sometimes required for up to 3 Pilots transferring from Sandheads to Haldia/Calcutta or vice versa.

Radio Officer is required on standby (From Hooghly Point to Garden Reach – inward and outward) during pilotage to send W/T messages as required by the Pilot.

Silting problems at Auckland Bar required a 0.4 m. reduction on published drafts November 1984.
Radio: Information on weather on 2000 m. not heard.

SHIP OPERATOR'S REPORT: January 1987 (Updated 1994).
Location: The port is located on the left bank of the River Hugli about 129 km. above the river entrance off Sagar Island in the Bay of Bengal.
Pilotage: Pilotage is compulsory for all vessels over 100 gross tons. River pilotage which extends from Sandheads, 72 km. below Sagar Island, covers a total distance of 201 km. The River Pilot boards the vessel at Sandheads (Lat. 20° 59' N., Long. 88° 14' E.) and a Harbour Pilot boards the vessel at Garden Reach (Lat. 22° 33.5' N., Long. 88° 17.5' E.) for mooring vessels in the river or berthing in the docks. The movement of ships inside the docks is controlled by the Berthing Master.
Approach Channel: The Approach Channel to the main port requires considerable navigation skill. There are several sand bars and crossings, as well as sharp bends in the river which the ships have to negotiate. These bars are subject to seasonal and, at times, sudden fluctuations both in depth and alignment of the channel, necessitating dredging on the shallow reaches. The channel is well marked with numerous navigational aids which consist of lighthouses, lightvessels and channel buoys, automatic tide gauges and signals and river marks; thus facilitating navigation both by day and night. Surveying and charting of the river is continuous and depths over the river bars are forecast daily. Besides navigation aids, a fleet of dredgers, barges, a river survey vessel and hydraulic research vessel are employed to provide safe navigation to shipping.
Permissible Draft: Drafts are subject to fluctuations according to the rise of tide and the condition of controlling bars. The port of Calcutta publishes a monthly draft forecast about 6 weeks in advance, copies of which are available from the Harbour Master's Office (River) in Calcutta. The River Hugli can generally be navigated as far as Calcutta during the period:

(a) June to October
At HW Springs by vessels drawing 8.7 m.
At HW Neaps by vessels drawing 8 m.
(b) October to June
By vessels drawing between 6.7 m. to 8.2 m.

However, there are times during the above period, when the permissible draft could decrease to as low as 5.5 m. before increasing again. Therefore it is strongly recommended that Masters of vessels loading for Calcutta should consult the monthly fresh water draft forecast of River Hugli, issued by Calcutta Port, and should load accordingly in order to avoid unplanned delays outside the river at Sandheads.
Communication:

Radio: There are W/T stations at Ram Nagar, Hugli Point and Haldia. Long range and short range W/T service for navigational messages is available for ships at sea within the range of 850 km. and 24 km. respectively.

VHF: There is a VHF network in operation in the port as an essential means of communication. Apart from Ram Nagar, Hugli Point and Haldia, VHF communication facilities are also available on the pilot vessel, survey vessel, dredgers and other vessels of the port.

The port has 2 pilot vessels fitted with W/T and VHF. These vessels maintain a continuous watch on 500 kHz and receive ETA messages from incoming vessels. At Sandheads, vessels in the vicinity may communicate with the pilot vessels on VHF Channel 12.

Calcutta Port issues time of embarking Pilot at Sandheads to meet required fresh water drafts for a particular day. Therefore Masters of all incoming vessels should take note of time for embarking Pilot and should radio their ETA Sandheads with names of local Agents, destination, deepest FW draft, LOA and speed of the vessel to the local Agents and to Sandheads (Call sign: "VWST") as soon as possible. There is slight reductions in FW draft of vessels, whose speed is below 12 knots.
Traffic Control: It is established and co-ordinated by the Harbour Master. Traffic information and navigational warnings are given on 500 kHz. The general rules governing traffic in the river are as follows:

All vessels going with the tide will have the right of way. Navigation in the river is carried out exclusively on Pilot's advice at times and tidal conditions established by the Port Authority. Night navigation is permitted. Since the depths at numerous locations change continuously, the River Pilots are notified of depth changes and traffic movements through a system of visual signals and via ship's radio on 500 kHz.
Special Feature: Calcutta being a river port is subjected to a "Bore Tide" condition. Vessels at river moorings or jetties are subjected to sudden surges on their moorings during flood tide. The "Bore" takes place only during certain periods, which are predicted a year in advance and last for 1 day to 5 days.

During the "Bore", no vessel over 152 m. in length in Calcutta and over 160 m. in length in Buj Buj will remain in the moorings/jetties. The max. draft of vessels in the river moorings/jetties will also be restricted to 5.5 m. at Calcutta and 6.1 m. at Buj Buj. Vessels which cannot remain in the river moorings/jetties are taken inside the docks where ships are not influenced by "Bore" tidal conditions. Those vessels which remain in the river are provided with extra shore mooring ropes and tackles.
Bunkers/Fresh Water: Adequate facilities exist in the port for the supply of drinking water to ships in the river moorings and at Buj Buj jetties but not at "C" Berth in N.S. Docks.

Oil bunkers can be supplied by pipeline or barge at Buj Buj and N.S. Docks. Only 1 grade of intermediate fuel oil and diesel oil are available.
Repairs: The existing facilities comprise 5 dry docks for all major surveys and underwater repairs. Of the 5 dry docks, there are 3 docks up to max. 515 ft.×64 ft. in Kidderpore Docks and the remaining docks of max. 516 ft. and 75 ft. are in N.S. Dock. The entry into docks is from the unpounded dock basins and not directly from the river.
N.S. Dock Oil Terminal (previously known as Paharpur): The terminal is located at "C" Berth in N.S. Docks; which is in line with "B" Berth used for general cargo. Therefore the max. length of a vessel which can berth at "C" Berth depends upon the size of the vessel at "B" Berth up to a max. of 172 m. The shore facilities are owned by the government and used by various oil companies for lube products only.

The access to cargo manifold platform is by steel walkway fitted with wooden covering, some of which is missing or in poor condition. The berth structure consists of the cargo manifold area and 2 mooring dolphins, 1 at each end of the manifold area, which are made of concrete and filled with wooden beams to avoid metal to concrete contact. The manifold size is 8 in. and 1 length of 60 ft. hose sufficient for ship/shore connection is provided.

There are a few fire hydrants located near by but no oil spill control equipment is available at the berth.
Buj Buj Oil Terminal (also known as Budge Budge): The terminal is located about 28 km. downstream from N.S. Docks. 6 out of 8 oil berths are now in operation. This is the major oil terminal for the port of Calcutta and handles all grades of petroleum products, except crude and LPG. The oil berths are located in the river and have floating pontoons. The moorings consist of 4 mooring buoys of old construction. 8 ship's lines are sent to 2 buoys and 2 shore mooring chains to the remaining 2 buoys. The buoys are provided with a ring on top, through which the ship's lines are passed and secured. The mooring chains are made fast under the buoy to the buoy pendants and divers carry out these operations. 1 or 2 floating pontoons are provided at each berth. The pipeline is carried on a steel walkway fitted with wooden steps which also acts as an access to the pontoon. The pipelines end on the pontoon where the manifold is located. The shore manifold is connected to the ship's manifold by hoses of 6 in., 8 in. and 12 in.

It is essential that vessels ensure prior to arrival that the detachable link of the first shackle can be easily opened. Inability to send the cable to the buoy may cause serious delays.
Berth Limitation and Facilities:

Berth	*Length* Min. – Max. (ft.)	*Beam* Max. (ft.)	*Product Handled*
1	455 – 620	85	Fuel oil, diesel, lube
2	280 – 380	85	Lube
3	350 – 460	85	Bunkers
5	435 – 620	85	Clean products only
8	425 – 620	85	Clean products, solvents and petro-chemicals

Facilities Available:

Slops: No facilities available at the terminals.

Pollution: No oil spill control equipment available at the terminals. In case of oil pollution, private contractors are engaged to clean up the area with the assistance of the fire brigade.

Security: Terminals and berths are considered restricted areas. The whole area is fenced and the gates are guarded. Watchmen are available and are considered essential by local Agents.

Safety: Fire fighting truck/boats are available. There is no safety check list provided. Safety is left entirely to the ship's personnel.

AUTHORITY: Calcutta Port Trust, 15 Strand Road, Calcutta – 700001, India. *Tel:* 2203451 (16 lines). *Telex:* 21-7336 Calp In. 21-7423 Port In. *Cables:* Calpotrust. *FAX:* 033-220-4901. *Contact:* Captain R.M. Gangahar, Director – Marine Department.

AGENT: See "Cochin".

CALICUT: 11.15 N. 75.46 E.

PORT LIMITS: The seaward (Westward) limit of the port is the 9 fathom line.
DOCUMENTS:
Register.
Articles of agreement in the case of foreign-going vessels staying in port for more than 48 hours.
Nominal list of crew and passengers and the A & B Certificates.
Bill of Health in the case of a vessel arriving from an infected port.
Clearance from last port.
Port and Light dues receipts.
Vessel's manifest and any other document, which may be necessary.

PILOTAGE: No pilotage available.
ANCHORAGE: Anchorage is about 3 miles offshore with Calicut Lighthouse bearing 078° (T), in depth of 10.0 m. Mud – good holding ground.
HEALTH: In the case of all infected vessels Health Officer proceeds aboard, and in the case of all other vessels Health Officer may proceed on board and examine vessel. Master shall give every facility for examination of passengers, crew, personal effects, cargo, provisions, water-supply and any part of vessel Health Officer considers necessary to examine. Health Officer may require written declaration from Medical Officer (if any) of vessel or from Master (or from both) stating whether

any death or sickness from an unknown or suspicious cause or any case of any disease occurred on board either during voyage or before departure, and whether any unusual mortality has been observed among rats on vessel. If Health Officer satisfied that such deaths or cases of sickness as may have occurred were not due to any of diseases specified he shall permit vessel to proceed to usual place of anchorage or berth in harbour and to discharge passengers and cargo without further restriction. Inspection by Health Officer not between sunset and sunrise except in unusual circumstances.

RADIO: Messages through Cochin Radio or Mangalore Radio.

SIGNALLING: The signal station is situated North of the lighthouse and is manned 24 hours a day. Station on VHF Channel 16.

TUGS: 2 motor tugs for towing lighters.

BERTHING: No berths, only one pier.

CRANES: Fixed wharf cranes with capacity of 3 tons – 5 tons on the South Pier.

STEVEDORES: Arranged through Agents and stevedore contractors.

MEDICAL: General Hospital and Medical College Hospital situated about 0.5 miles and 5 miles away respectively.

DENSITY: Sea water – 1025.

FRESH WATER: Can be supplied by port tug, max. 15 tons per day.

FUEL: Available. Small quantity of 30 tons can be provided, 48 hours notice required.

CONSULS: None.

REPAIRS: No facilities.

DRY DOCKS: None.

SURVEYORS: The Port Officer at Calicut undertakes private surveys.

CERTIFICATES:
- Registry.
- Radio Telegraphy.
- Safety Equipment.
- Load Line Certificate.
- Certificates of Competency of Master and other officers.

AIRPORT: Calicut Airport 25 km. from port. Daily flights to Mumbai, Madras and Bangalore, and international flights to Gulf countries.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the State Government are holidays for the port. Cargo work can be arranged on holidays.

FIRE/AMBULANCE/POLICE: Police 100; Ambulance 101; Fire 102.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Necessary.

GENERAL: Ship-to-shore signalling is normally by morse light. When a vessel is at anchorage, VHF service can be obtained with the Signal Station.

Charts: Indian Charts No. 22, 259 and 2053.

DEVELOPMENTS: Port of Beypore has been declared 10th wharf of Calicut. Vessels with a maximum draft of 4.0 m. can be berthed alongside wharf. The port has two breakwaters at the mouth. Two navigational guide lights are provided at the tip of the breakwater. An additional wharf is under construction. Increasing depth in the harbour is under consideration (See "Beypore").

AUTHORITY: Port Officer, Port Office, Calicut. *Tel:* 55604 (Office), 365725 (Residence). *Cables:* Cyclone, Calicut. *Contact:* Captain C. Ramachandran, Port Officer.

COCHIN: 09.58 N. 76.15 E. (See Plan)

PORT LIMITS: *Seaward Limits:* 9 nautical miles Westwards between the following 2 positions:
- (a) Lat. 10° 02' N., Long. 76° 03' 27" E.
- (b) Lat. 9° 55' N., Long. 76° 06' 00" E.

DOCUMENTS:
- 7 Crew Lists.
- 7 Passenger Lists.
- 1 Last Port Clearance.
- 4 Stores Lists, including List of arms and ammunition.
- 5 Passengers' and Crew Personal Effects Declarations.
- 4 Cargo Manifests.
- 3 Cargo Certificates.
- 3 Deck Cargo Certificates.
- 3 Opium Certificates.
- 3 Currency Declarations.

PILOTAGE: Berthing arrangements, booking of Pilot, etc., normally done by Agent. Advisable send ETA messages at least 48 hours in advance to Agent. Amendments to ETA messages must be sent at least 12 hours in advance. ETA messages may also be sent to Harbour Master, Cochin Port Trust. Messages should contain time and date of arrival at Outer Roads in IST and also draft fore and aft (in salt water). 30 minutes before arrival at Fairway Buoy the Port Control to be contacted on VHF for instructions.

No Pilot vessel on station in Outer Roads. A pilot boat with red hull and white superstructure exhibiting the normal International Pilot Signal comes out to Outer Roads for embarking and disembarking Pilots. No special light or sound signal need be made for Pilots. All ships awaiting Pilot in Outer Roads must have engines ready at all times to enter harbour (unless instructed otherwise). Masters should ensure that a good pilot ladder with 2 manropes is lowered about 2 ft. above water for embarking Pilots. Also while embarking Pilot, lifebuoy must be kept handy, and a good lee given. Pilots must be escorted from and to the bridge, to the embarkation deck. Also see "Restrictions".

ANCHORAGE: Cochin Roads is open anchorage with good holding ground of oily mud. Masters are required to anchor vessels in Westerly area from North to South of Fairway Buoy within radius of 0.5 miles. Deep-drafted vessels may anchor in a Westerly direction from Fairway Buoy within a distance of 0.5 to 1 mile. To facilitate entry and departure of deep-drafted ships, Masters not to anchor in line with direction of main channel, Westward of Fairway Buoy.

RESTRICTIONS: Unless otherwise specifically instructed, vessels not to enter main channel at any time without Pilot on board. Pilotage compulsory for all vessels over 100 tons gross. No night entry for crude oil tankers.

Draft Restrictions for Tankers in Ballast: The Cochin Port Trust has recently issued the following notice regarding draft restrictions for tankers.

Tankers less than 500 ft. in length:
Minimum F. 14 ft. ± 2 ft. (and trimmed by stern).
A. 16 ft.

Tankers between 500 ft. and 700 ft. in length:
Minimum F. 16 ft. ± 2 ft.
A. 20 ft.

Tankers over 700 ft. in length: Draft should not be less than 16 ft. forward and 20 ft. aft (as for ships between 500 ft. and 700 ft.), but not more than 28 ft. draft.

MAX. SIZE: LASH ships of about 900 ft. LOA are being handled at Ernakulam Channel. Draft for such ships is limited to 32 ft. salt water. Ships of up to 550 ft. in length are accommodated at Mattancherry Wharf.

Tidal Conditions: In Cochin Port ebb and flood begins to run 2 to 2.5 hours after HW and LW. During monsoons, freshets are encountered and there may not be any flood for several days.

New Tanker Berth: Max. size 115,000 d.w.t. with part cargo. Max. draft 35 ft.

HEALTH: When a ship arrives at an Indian port, the Pilot who boards to bring vessel into harbour is authorised to give Free Pratique to healthy ships. The only exception to this procedure is if a vessel is arriving in India within 30 days of calling at 'Yellow Fever port' the vessel is put in quarantine and she is granted Free Pratique *only* after the Port Health Officer has boarded and satisfied himself that all persons on board are in possession of valid certificates against Yellow Fever and after conducting Mosquito Survey.

Once a ship has been granted Free Pratique at an Indian port, it is not necessary to apply for Pratique at any subsequent Indian port she may proceed to which is automatic Pratique.

Part I. The complete message comprises two parts. The first part embodying the code group on page 126 (Radio Quarantine Reports) from ships at sea e.g. ZS, ZT, ZU, ZV, etc.

Part II. The second part is in plain language and the following information must be given:

A. (i) Expected time and date of arrival in the port.

(ii) List of ports of call with dates of departure within 30 days period prior to arrival at the Indian port.

OR

'Called at' 'not called at' any port in West Coast of Africa from Senegal to Angola and Eritrea, Somalia, Kenya or Tanzania, Brazil, Peru and any other countries North of these in South America including Trinidad, Tobago, Venezuela, Panama, Surinam, Guyane, Guatemala, Bolivia, Belize, Colombia, Costa Rica, Ecuador, Guinea, Nicaragua, etc. within 30 days.

(iii) Whether any monkeys on board.

(iv) Whether any person/crew taken aboard at Djibouti or Aden (if the ship has touched either of these ports).

(v) Number of crew and vaccination status.

(vi) Maritime Declaration of Health Questions. Whether negative 'ZT' or positive (indicated by compliments – 'ZU') as the case may be.

(vii) The message must finally embody the phrase 'Request Radio Pratique'.

B. Additional information: Name of Agent. Request for 'Radio Pratique' must also include the name of the ship's Agent in the quarantine message. The message should be sent when the vessel is not more than 12 hours and not less than 4 hours from the Indian port. If the expression 'Request Radio Pratique' is not used but the complete message outlined above has been sent in that specific form Free Pratique will be granted by the Pilot provided that 'all is well' aboard. The message should be complete, timely and specific otherwise Radio Pratique cannot be granted.

In addition to the quarantine message the Maritime Declaration of Health must always be completed and presented to the Pilot, Port Health Officer or other authorised person immediately on arrival. On verification of Maritime Declaration of Health if it is found that quarantine message sent by the Master of ship is defective then Port Health Officer has the right to cancel the Radio Pratique granted earlier.

Port Health Officer usually inspects all incoming ships coming from foreign ports to Indian ports and also carries out health and sanitary inspection and if satisfied gives Free Pratique on board the ship and certificate of clearance to sail out from Cochin port.

Note: Masters are requested to check this information with the Agents in individual Indian ports and advise us without delay, if these instructions are at variance with local requirements.

Special Reservations for India:

1. Ships having other infectious diseases besides diseases subject to the regulations, e.g., Chickenpox, Measles, Mumps (Epidemic Pariotitis), Cerebrospinal Meningitis, Whooping Cough, Malaria, Paralytic Poliomyelitis, Influenzal Pneumonia or any crew/passenger having temperature of 100°F or more for more than 2 days which is accompanied by rash, jaundice, glandular swelling or diarrhoea severe enough to interfere with normal activities should inform 'Quarantine' Cochin by message and to be brought in under QQ flag in day time and red and white light at night. Port Health Officer will board such ships and grant Free Pratique after observing health formalities.

2. Ships having passenger/crew originating from or embarking at ports of Djibouti, Massawa, Aden or Yemen and arriving within 14 days of departure from the said ports should inform 'Quarantine' Cochin and the ship to be brought in under QQ flag. Port Health Officer will board such ships and grant Free Pratique after observing all health formalities.

3. Healthy ships touching Aden or Djibouti and coming to Indian ports within 6 days without any passenger or crew embarking at Aden or Djibouti, should hoist 'Q' flag on approaching the port limit. The boarding Pilot in such cases shall grant Free Pratique to the ship.

If passengers or crew embarked on a ship either at Aden or Djibouti and the ship arrives at Indian ports within 6 days, such ship is required to hoist 'QQ' flag and Port Health Officer is to board the ship to eliminate the risk of Yellow Fever and grant the ship Free Pratique.

Master of such ships should send quarantine message to the Port Health Officer before arrival at the port. This message should be sent not more than 12 hours and less than 4 hours before arrival.

4. Ships carrying monkeys from Yellow Fever area and coming to Indian ports within 31 days to be brought in under 'QQ' flag and Master should send quarantine message positively. Port Health Officer will board such ships and grant Pratique after observing health formalities.

5. Any ship carrying dead body, Master should send cable. Port Health Officer will board the ship to investigate the cause of death whether due to any diseases subject to the Regulations.

RADIO: Cochin Radio keeps listening watch on 500 kHz, 24 hours a day (HF does not work). MF and RT is low powered and is reported to have a range of less than 300 km. ETA messages may be routed through Bombay or Madras Radio which stations are directly linked with Cochin telegraphically.

VHF: VHF sets are installed in all port pilot launches, tugs, dredgers and at the Port Control Station in Harbourmaster's Office. Channel 16 is used for calling and Channels 14, 13, 12, 10 and 6 are available for communication. Ships awaiting berthing should maintain listening watch on Channel 16 at all times. Information regarding berthing would be generally available from Port Control at 0600 hrs., 1330 hrs. and 1800 hrs. daily. Cochin Radio maintains a VHF service which can be linked to shore telephones anywhere in India. This facility is available 24 hours a day. But is is recommended that they first be contacted on 500 kHz.

TUGS: There are 3 conventional tugs and one V.S. tractor tug in operation in Cochin. The conventional tugs have 32 tons, 22 tons and 19 tons bollard pull and the V.S. tug 30 tons bollard pull. Two more tractor tugs, each of 32 tons bollard pull, are under construction. Ship's rope may be used at the discretion of the Pilot.

BERTHING: Generally crude tankers are berthed to ebb, and loading tankers to flood. Other ships depending on the draft and also to the Agent's requirements.

CARGO HANDLING: Modern systems of cargo handling such as preslinging, palletisation and containerisation are commonly used. The port has at present 24 wharf cranes with capacity varying from 3 tonnes to 10 tonnes, 12 mobile cranes of 10 to 40 tonnes capacity, 49 forklift trucks of 2 to 2.7 tonnes capacity and 1 floating crane of 120 tonnes capacity, 3 high powered tractors each of 180 h.p., 19 semi-trailer chassis, (10 with payload of 40 tons, 9 with payload of 20 tons), 2 heavy duty fork lift trucks with side lift attachment for handling empty containers and 5 ordinary tractors and 11 trailers for cargo handling operations.

There are 7 general cargo wharf berths, 1 coal berth, 1 boat train pier jetty, 3 tanker berths, 1 open berth and 2 low wharves and 11 stream moorings. Ro-Ro ships and container ships are also handled. Fertiliser raw material is discharged at Quay 10. A grab crane which can handle up to 600 tonnes per hour is fitted at this berth. Phosphoric acid is also discharged at this berth. The South Coal Berth has been converted to take ammonia gas tankers. Berths Q8 and Q9 are being converted to fully fledged container berths.

STEVEDORES: Booking of gangs undertaken by Agent on receipt of ETA message.

MEDICAL: Medical attention easily available in Cochin. If medical attention required immediately on arrival, Agent to be informed when sending ETA. Valid inoculation and vaccination certificates against Cholera and Yellow Fever are essential.

Medical advices if required on high seas to be communicated to 'Quarantine' Cochin. Harbour Master/Deputy Conservator/Agents of shipping company usually arrange evacuation of serious cases for hospitalisation from anchorage.

TANKERS: LOA limited to 700 ft. at North Tanker Berth and 560 ft. LOA at South Tanker Berth. Max. draft 30 ft.

The new oil terminal can accommodate tankers up to 115,000 d.w.t. with part cargo. Max. draft 35 ft. Products Handled: 1×750 mm. line for crude. 2×400 mm. lines for furnace oil and white oils; 4×300 mm. discharge arms. Discharge rate 4,000 tonnes/p.h.

Deep draft tankers berth only on ebb tide. Ballasted or loaded tankers can sail any time.

All tankers must have fire wire fast and ready fore and aft on side facing channel.

DENSITY: Varies from 1000 to 1020 depending on tidal and weather conditions.

FRESH WATER: Supplied by shore hydrants at Rs. 15/Mt. and Rs. 24/Mt. respectively for coasting and foreign vessels. Rates for supplying through barges range between Rs. 45/Mt. to Rs. 130/Mt. and Rs. 20/Mt. to Rs. 210/Mt. respectively to coasting and foreign vessels according to the position of the vessel and the time of supply.

FUEL: All grades fuel oils normally available. Essential give advance notice to Agent to make necessary arrangements.

CONSULS: United Kingdom, Norway, Italy and France have consuls at Cochin.

REPAIRS: The Cochin Shipyard now undertakes all types of deck and engine repairs.

In addition there are various other workshops who undertake engine and deck repairs. Exclusive surveyors to Lloyd's and non-exclusive surveyors to other classification societies are also available for hull/engine surveys. Repairs to radio, radar and other electronic equipment can also be arranged.

DRY DOCKS: Port dry dock can handle ships of up to 217 ft. LOA. However, not normally available for foreign craft.

The Cochin Shipyard dry dock can accommodate ships of up to 100,000 d.w.t. with max. size of ship up to 257 m. length and 38.5 m. beam. The dry dock entry draft permitted is 6.5 m.

GANGWAY/DECK WATCHMEN: Watchmen available at nominal cost. Recommended employ watchmen at gangway, on deck and in holds.

OPENING/CLOSING HATCHES: Opening hatches normally done by stevedores. Topping derricks and removing locking arrangements on hatches must be done by ship's personnel.

CARGO GEAR: All cargo gear must have valid test certificates and all other factory act requirements must be complied with.

REPATRIATION: Crew changes are carried out in this port. The Agents execute a bond before the Shipping Master before disembarkation. Repatriation undertaken by the Agents as mentioned in the said bond as well as general bond executed by them in Port Registration Office. Permission to enter India, travelling within India to the International airport through which they are leaving India and permission to leave India through Cochin port are being given by the Port Registration Office.

AIRPORT: Airport about 2 miles from harbour area. Cochin Airport handles internal flights only.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed holidays: Republic Day (26th January); Independence Day (15th August); Gandhi Jayanti (2nd October); 1st May and 25th December.

FIRE/AMBULANCE/POLICE: Willingdon Island Fire Station 6555; Willingdon Island Police 6005.

TELEPHONES: Arrangements can be made for telephone connections on board ships on wharf berths only.

SHIP SUPPLY SERVICE: "Ship Supply Service" is functioning at Cochin port. The Agents of the vessel arrange ship-to-shore transport of personnel and/or essential stores and/or sick crew members, etc., whenever such services are required. Usually, vessel's Agent gets this work after securing necessary clearance from the concerned Authorities and these are arranged through their ship chandlers or other contractors as the case may be. In cases of such emergencies, helicopter services are arranged by the local Agents with the Naval Authorities in Cochin with the assistance of the Port Health Officer stationed in the area.

SHORE LEAVE: Temporary landing permits are issued to foreign crew, subject to restrictions as per Government orders, if any.

IDENTIFICATION CARDS: Shore passes (temporary landing permits) are being issued. Seaman's Books cannot be used by foreigners unless with Immigration stamp.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: Club located 1.0 km. from wharf.

GENERAL: Floating crane 120 tons, fire float.

DEVELOPMENTS: One of the existing berths (Q-9, length 414 m.) is being converted into a fully fledged container berth. Necessary infrastructure facilities like hard-surfaced area, lighting, power plug points, container freight station, etc. have been provided. Tractor-chassis, trailers, heavy duty fork lift trucks, etc. to handle 40 ft. and 20 ft. containers have also been provided. Four transfer cranes have been installed in the stacking yard, and 2 gantry cranes are under construction. Steps have already been taken to provide quayside gantry cranes at the wharf in order to provide fully fledged container terminal facilities for handling cellular container ships at the port in view of the rapid increase of container traffic.

SHIPMASTER'S REPORT: August 1979.

Hatches: Beams and hatchboards by stevedores and the remainder by ship's crew.

Stevedores: 1st shift 0800 – 1700 hrs., 2nd shift 1800 – 0300 hrs.

COONDAPUR (Kundapura): 13.37 N. 74.40 E.

DOCUMENTS:

Inward Report.
Valid Certificate of Safety.
Radio Telegraphy.
Safety Equipment.
Safety Construction.
Crew List.

PILOTAGE: Optional. Vessels call at this Port for carrying ore cargo and anchor at open roadstead at a distance of about 1.25 miles to 5 miles depending upon their draft in a holding ground of sand and mud. The Agent of the ship bound for this port reports the vessel's ETA in advance. In the ETA message the name of the vessel, date and time of arrival are included.

ANCHORAGES: Good anchorage in depth over 8 fathoms at a distance approximately 5 miles from the channel bar.

Tippu Sultan Gudda Light bearing 053.5°(T) and Kodi Light bearing 080.5°(T). The Northern approaches to the Port area are rocky and the safest approach to the anchorage is from the South. Tidal range is 5 ft. Depth at bar 7 ft. at LWOST. 8 ft. – 10.5 ft. during HW.

RESTRICTIONS: No restrictions except that vessels calling at the port anchor at open roadstead.

MAX. SIZE: Vessels of smaller draft can anchor in 9 fathoms of water.

HEALTH: The Assistant Surgeon, Government Hospital, Kundapura is the Port Health Officer at the port.

RADIO: There is no radio station at the port. The nearest wireless station is at Mangalore and its call sign is "VWL".

VHF: Not available.

TUGS: There is one pilot launch for towage service of sailing vessels and for special trips.

BERTHING: No berthing facilities available for ships.

1 wharf of 300 ft. in length with small stocking area.

1 RCC sheet piled wharf of 700 ft. length with vast stocking area duly electrified and a stocking platform of 180 ft. length are the only shore facilities at this port.

CRANES: None.

BULK CARGO FACILITIES: None.

STEVEDORES: Advise well in advance of ETA to shippers in order to arrange shore loading. Main cargo – ore.

MEDICAL: No advance notice except in case of serious illness to be included in arrival message. Hospital facilities available at Kundapura.

TANKERS: No facilities.

FRESH WATER: No facilities for supplying water to vessels are available. Sailing vessels crew draw their requirements of fresh water from nearby wells.

FUEL: For ocean going vessels, there is no bunkering facility. There are oil depots at Gangoli, Kundapura from where High Speed Oil can be supplied to small vessels in drums.

CONSULS: None.

REPAIRS: Small workshops where repair work for fishing launches, barge, etc., are undertaken.

DRY DOCKS: None.

SURVEYORS: Ship surveyors of Mercantile Marine Department at Goa and Cochin are available. Private Surveyors are available at Mangalore and Goa.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CARGO GEAR: No shore facilities. Ships anchor at open roadstead and load cargo by ship's gear.

REPATRIATION: No facilities.

AIRPORT: Nearest airport is at Bajpe which is situated 73 miles South of the port.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the Collector of Customs, Bangalore are followed at the port.

POLICE/AMBULANCE/FIRE: Pilot sub-station is located at Gangoli. Ambulance facilities available at Government Hospital and Private Hospitals at Kundapura. Fire station available at Kundapura (Tel: 20724).

TELEPHONES: No arrangements exist for placing telephones on board the ship.

SERVICES: No facilities for ocean going vessels.

BANKS: Syndicate Bank and Canara Bank, Gangoli, Kundapura Taluk, South Kanara Dt., S. India. No telex facilities.

SHORE LEAVE: Crew members are allowed ashore subject to Customs formalities.

IDENTIFICATION CARD: Seaman's Book is sufficient and shore passes are issued by Customs.

DELAYS: Delays in loading can normally be expected during bad weather.

GENERAL: The Port of Coondapur is a riverine port which is seasonal. Open for traffic from 15th September to 15th May every year. Port is situated at the confluence of the Heal and Chakianadi rivers at Gangoli village. The Port is 60 miles North of Mangalore which is the nearest railway head.

Charts: B.A. Chart No. 745. Indian No. 2019.

AUTHORITY: Port Officer, Kundapura, Gangoli P.O. Pin Code 576216, Karnataka, India. *Tel:* 45072 and 45075 Gangoli. *Contact:* Captain R. Mohan, Port Officer.

CUDDALORE: 11.43 N. 79.46 E.

DOCUMENTS:

8 Crew Lists.
8 Passengers Lists.
3 Forms of Import Manifest of Stores.
3 Lists of articles in slop chest.
3 Private Property Declaration of Crew.
3 Manifests.
3 Bills of Lading.

PILOTAGE: No pilotage. Open roadstead port.

ANCHORAGE: Vessels anchor in 5 to 7 fathoms with Cuddalore lighthouse bearing 265° to 295°, which is most convenient anchorage for communicating with shore at all seasons of year. Nature of bottom, sand.

Explosive Anchorage: An area of 0.5 miles radius from the position Lat. 11° 48.80' N., Long. 79° 49.42' E. has been designated as anchorage of handling dangerous goods at Cuddalore port. Vessels should enter this area for specific purpose of handling dangerous goods.

New Lighthouse Position: Lat. 11° 42' 21" N., Long. 79° 46' 36" E.

RESTRICTIONS: No restrictions regarding entry of vessels during day or night.

MAX. SIZE: Any size of vessel handled.

HEALTH: On arrival, Master to signal Port Health Officer stating all crew well and requesting Free Pratique. In event of any crew member suffering from suspected infectious disease, Master to advise Agents sufficiently in advance to enable Port Health Officer to board vessel on arrrival. No Free Pratique necessary whenever vessels call from another Indian port.

RADIO: No radio station. Cables routed through Madras Radio (call sign VWM), 72 hours prior to arrival.

VHF: Cuddalore Port on Channels 16, 12 and 14 from 0600 hrs. – 1000 hrs. and 1500 hrs. – 1900 hrs., except on Saturdays, Sundays and Government Holidays.

TUGS: There are two tugs available. The tugs are utilised for towing the lighters between ship to shore and vice-versa.

BERTHING: No berths.

Lighters: About 60 lighters owned by private individuals are operating for transporting cargo between ship and shore and vice-versa and handle 1,000 tonnes in total for a round trip.

Railway Sidings: Metre gauge railway line from Cuddalore Junction is extended upto the wharves at the port to facilitate easy movement of cargo from the port.

Cargo Shed: 3 covered cargo sheds with plinth area of 720 sq.m each are available.

Storage capacity 1,700 tonnes. 2 open transit cargo sheds with plinth area 293 sq.m each are available, storage capacity 500 tonnes.

BULK CARGO FACILITIES: Open roadstead port. Vessels anchor in 5 to 7 fathoms at a distance of 1 mile from the port. Cargo is being handled by means of lighters. There are 6 wharves for landing and shipping of cargo from lighters. Total length of wharfage with platform is 1,033 m. Total length of jetties 460 m. Depth alongside of 1.8 m. at MLWST.

CRANES: 1 'Coles' 10 ton capacity mobile crane has been purchased for handling cargo in this port. This is a diesel electric crane.

STEVEDORES: ETA advice required 72 hours in advance to enable stevedores to make adequate arrangements for handling cargo.

1. M/s Galaxy (Cuddalore) Agencies, Cuddalore Port. Tel: 20092.
2. M/s Senthil Traders, Cuddalore Port. Tel: 22385, 22531.
3. M/s Combined Freight Forwarders Ltd. Cuddalore.
4. M/s Prasath Enterprises, Cuddalore Port. Tel: 22314.

MEDICAL: No advance notice required unless vessel arrives with crew member requiring immediate medical attention. Seamen can be treated at Municipal Dispensary at Old Town near port and also at Government headquarters hospital in charge of District Medical Officer at New Town about 6.5 km. from port.

DENSITY: Density of water 1024 – 1025. State of tide does not affect density.

FRESH WATER: 1 steel water barge of 50 tonnes capacity is available for supplying fresh water to vessels in the Roads.

FUEL: None.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, wharves, godowns and on board vessels. Smoking is also prohibited in any areas where gasoline or similar materials are being handled.

CONSULS: None.

REPAIRS: Minor repair facilities available.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended in interest of ship to avoid pilferage. 3 watchmen night and day per shift of 8 hours.

OPENING/CLOSING HATCHES: By stevedores.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Derat Certificate.
Last Port Bill of Health.
Last Port Clearance.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each crew member to be held out of bond. Wine/Spirit, 1 open quart bottle per crew member permitted to be held out of bond.

CARGO GEAR: Register of cargo gear and machinery to be maintained up to date and to be attested by competent authority.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: Nearest airport at Madras, distance 180 km.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Cargo work arranged on all holidays except Republic Day, Gandhi's Birthday, Pongal, Karinal, Masimagam, Pennayar Festival, Independence Day and Deepavali, on payment of overtime.

POLICE/AMBULANCE/FIRE: Tel: Police 2024; Fire and Ambulance 99.

SERVICES: Cleaning of hatches after discharging cargo available.

SHORE LEAVE: Crew members permitted to go ashore within municipal limits.

IDENTIFICATION CARDS: Needed.

BANKS:

State Bank of India, Cuddalore Port.
Indian Overseas Bank, Cuddalore Port.
Indian Bank, Cuddalore Port.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Indian Rupee.

DELAYS: No delay of anchoring of vessels. Cargo work carried out during day. No night work.

GENERAL: Private launches arranged for purposes of crew going ashore. Such launches ply between 0600 hrs. and 1700 hrs. Laundry, provisions, etc., can be arranged.

AUTHORITY: Government of Tamil Nadu, Tamil Nadu Port Department, State Port Office, 56 Chamiers Road, P.O.Box No. 2179, Raja Annamalaipuram, Madras 28, India. *Contact:* Captain I.V.G. Prasad, State Port Officer. Tel: 457994 (office), 459588 (personal).

Port Officer, Cuddalore Port, Tamil Nadu, South India 605003. *Tel:* 22025 (office), 20059 (residence), 22026 (personal). *Contact:* Captain S. Sainath, Port Officer.

AGENT: See "Cochin".

DAHEJ: 21.43 N. 72.35 E.

SHIPMASTER'S REPORT: March 1987.

DOCUMENTS:
- Clearance from Last Port.
- 2 copies Ship's Stores List.
- 2 copies Crew Personal Effects List.
- 6 copies Crew Lists.
- Cargo Manifest.

PILOTAGE: Optional. The Assistant Port Officer acts as Pilot. Masters are advised to approach/anchor during daylight hours.

ANCHORAGE: Vessel anchors with Luhara Point Lt. (21° 39.5' N. 72° 33' E.) bearing 137° T, 5.3 miles off. Anchorage marked on chart. Cable "APO DAHEJ" via Mumbai Radio at least 24 hours prior arrival for pilotage if required. Vessels should approach the anchorage during slack water (20 minutes after Bhavanagar) and bring up the vessel on port anchor with about 6 shackles in water. Holding ground is good. Vessel may drop starboard anchor underfoot. Depth about 16 m. at chart datum. This is a tidal port and currents are up to 5 knots during Springs.

MAX. SIZE: No restrictions.

HEALTH: Cable "APO DAHEJ" and "PORTAL BHARUCH" via Mumbai Radio for Free Pratique. Pratique normally granted on anchoring.

RADIO: Mumbai Radio (VWB) or Bhavanagar Radio (VUJ9).

VHF: Vessels should contact Bhavanagar Port Control and Dahej Port on Channel 16 for anchoring instructions at least 2 hours prior to arrival. Dahej Port maintains a listening watch on Channel 16 from 0930 hrs. – 1230 hrs. and 1530 hrs. – 1900 hrs. (local time).

BERTHING: *Discharging:* The port is solely used for unloading bulk fertilisers. At present there are 3 self-propelled barges, each of about 550 tonnes capacity. These barges come alongside during high water and leave at the next high water.

Discharging done manually using ship's gear and a rate of about 1,300 tonnes per day can be obtained on the basis of 4 working hooks during Springs.

The Receivers of the cargo are Gujarat Narmada Valley Fertiliser Corporation, Bharuch.

STEVEDORES: Only one stevedoring company available, M/s Ocean Shipping Services, Bharuch (Cable: "Oceanship Bharuch"). Only one vessel at a time permitted to work in this port. The port does not handle any discharging from April to September. The shore labour which boards the vessel stays on board until completion.

MEDICAL: No facilities. Under exceptional circumstances, emergencies may be arranged from Bharuch through the Agent. Advisable to inform the Agent well in advance.

DENSITY: 1024 (approx.).

FRESH WATER: Extremely difficult to obtain. Small quantities (10 tonnes – 15 tonnes) may be obtained after arrangements made with the stevedores who are the owners of the self-propelled barges. Vessels are strongly advised to arrive with sufficient fresh water for their stay.

FUEL: Not available.

CONSULS: None locally.

REPAIRS: No facilities at present time.

SURVEYORS: None locally. May be arranged from Mumbai.

GANGWAY/DECK WATCHMEN: Not required.

HATCHES: Opening/closing by ship's crew.

CUSTOMS ALLOWANCE: Standard allowance for Indian ports.

REPATRIATION: Not possible at present. Under consideration by the authorities.

AIRPORT: Nearest is Vadodara (formerly Baroda), which is about 90 km. distant. Daily flights to Mumbai.

TIME: Indian Standard Time (GMT plus 5.5 hours).

HOLIDAYS: In accordance with other Indian ports but work can be arranged during holidays.

SHORE LEAVE: Not permitted under normal circumstances, this also includes Indian nationals.

GENERAL: Provisions are expensive and difficult to obtain.

AUTHORITY: The Assistant Port Officer, Gujarat Maritime Board, Dahej Port.

AGENT: See "Cochin".

HALDIA: 22.00 N. 88.05 E. (See Plan)

Subsidiary deep water modern dock of Calcutta, situated on West bank of Hooghly River and 56 miles downstream of Calcutta.

DOCUMENTS, PRATIQUE: All general information; refer to "Calcutta".

RESTRICTIONS: The lock entrance lead-in jetty – 1,010 ft. (307.84 m.).

Lock: 985.5 ft. (300.38 m.) long and 130 ft. (39.62 m.) wide. Ships up to lengths of 885 ft. (269.75 m.) can be safely accommodated at Haldia Dock.

MAX. SIZE: Capital dredging in shipping channel is in progress and the results being constantly reviewed. Currently actual drafts as per draft of the day. Draft forecasts are issued 6 weeks in advance.

TUGS: 5 tugs available.

BERTHING:

1. Satish Samanta Oil Jetty (Berth No. 1): Berth to provide berthing accommodation for super-tankers with LOA of approximately 780 ft. and draft up to 35 ft.

See "Tankers" and "Developments".

2. A Finger Jetty – equipped with grab-bridge crane capable of transferring salt, rock phosphate and other bulk cargo from ship to barge, or vice versa at an average rate 5,000 tons per day.

3. A Coal Berth length 270 m. with depth alongside of 45 ft. is capable of loading bulk carriers of the 60,000 d.w.t. class. Mechanical plant capable of loading conventional ships and bulk carriers at a designed rate of 2,000 tonnes/p.h. 2 wagon tipplers, capacity 1,500 tonnes/p.h.; 1 conveyor belt; 2 stacker-cum-reclaimers – stacking capacity 1,500 tonnes/p.h. Reclaiming capacity 1,000 tonnes; 2 Shiploaders, capacity 1,500 tonnes/p.h. per loader.

4. An Ore Berth – rate of loading 5,000 t.p.h. and with provision for increasing to 8,000 t.p.h. Accommodation for carriers up to 80,000 d.w.t. 2×1,500 ton wagon tipplers, 4 stacker-reclaimers with capacity 1,500 tonnes/p.h.; 2 shiploaders, capacity 3,000 tonnes/p.h. This berth can also handle tankers.

5. A Fertiliser Berth – for ships up to 50,000 d.w.t. class.

Mechanical plant for rapid mechanical discharge of finished fertiliser, rock phosphate, sulphur, etc., from bulk carriers and conventional ships at a designed rate of 1,400 t.p.h.; 1 conveyor belt, 1,300 tonnes/hr. capacity can be extended up to the Fertiliser Factory; 2 ship unloaders, capacity 700 tonnes/p.h.; covered storage for 30,000 tonnes (with provision for increase to 60,000 tonnes in future) and open storage for 15,000 tonnes, (with provision for increase to 30,000 tonnes in future).

6. Two general Cargo Berths – each with a quay of 720 ft. and 120 ft. wide and back-up area of 18 acres. Both will have adequate cranage, latest in cargo handling machinery and direct rail-road facilities.

7. Container Terminal: The first fully-fledged container terminal in India with portainer crane (30 ton Paceco) for handling containers into or from ships. Back-up area 180,000 sq.ft. (16,722 sq.m.) providing storage space for over 1,000 containers at a time. Equipped with one high-speed transtainer crane capable of serving both rail and road vehicles.

TANKERS: No. 1 Oil Jetty extends 180 m. into the deep water channel. The maximum velocity of current during ebb tide is 6 knots. During period March to June, Northwesterly squalls frequently blow up on inshore side of tankers moored at No. 1 Oil Jetty, with reported wind speeds of up to 90 km./hr.

Vessels are programmed to berth on HW (daylight only) and port anchor is used to swing vessel for starboard side berthing. The flood stream continues to run 1.5 hours after HW and this provides sufficient time for safe mooring operations. 1 tug is in attendance when mooring. Although there is a hose handling gantry, it is not used during discharge as the hoses are reported to kink when excessive ranging occurs.

In view of the jetty being located in an area where strong tides are experienced, vessels are required to have the following moorings:

Forward		Aft	
	– 5 head ropes		– 5 stern ropes
	– 3 breast ropes		– 3 breast ropes
	– 3 back springs		– 3 back springs

This gives a total of 22 moorings. Doubling up of mooring ropes is acceptable to provide the above requirement provided all ropes are in good condition and of sufficient length to reach the shore bollards. After the vessel has been securely moored, ropes are turned over and the opposite eye is sent ashore. Mooring wires may be used as back springs.

In the final mooring position, the drift (distance fairlead to shore bollards/hooks) for the various moorings is a as follows:

Head and Sternlines:	Approx. 240 ft. (73 m.)
Breastlines F & A:	Approx. 125 ft. (38 m.)
Springs F & A:	Less than breastlines.

Above drifts apply to a ship with LOA 560 ft. (170.7 m.)

Hose Connections: Midships.

Shore Line System: Handles white oils, fuel oil and crude oil. 30 in. crude line with 3×12 in. connections on jetty. White oil line: 200 mm. (8 in.) to 300 mm. (12 in.) Shore lines: 1.5 km. long. Max. back pressure 7 bar (105 p.s.i.) Average rate 600 tonnes/p.h. (product).

Shore Steam: No facilities.

Bunkers/Lubricants: Not available.

Fresh Water: Available from shore in small quantities.

Tank Cleaning/Dirty Ballast Facilities: No facilities. Clean ballast may be pumped overboard.

General: Continuous and strict watch to be kept on vessel when anchored or in the berth to prevent unauthorised persons boarding.

Due to the remoteness of Haldia it is extremely difficult to arrange the formalities associated with crew members joining or leaving the ship.

In view of current and wind conditions it is recommended that a continuous watch is maintained to ensure that moorings are well tended at all times.

Also see "Shipmaster's Reports".

WASTE OIL DISPOSAL: 1×15 kl. slop tank on service platform for spillage from loading arms and pipelines.

1×7,000 kl. tank for collection of ballast water from tankers.

SEAMAN'S CLUBS: Seaman's Hostel, Haldia. Tel: 03224-2424.

The facility was opened in April 1992 and provides accommodation for officers and crew. Shops and telephone will be provided later.

DEVELOPMENTS: Oil Berth No. 2 became operational in October 1991. *Location:* 470 m. downstream of Berth No. 1 (the First Oil Jetty).

Vessel Size Acceptable:

	Maximum	Minimum
D.w.t.	150,000 tons	18,000 tons
LOA	270 m.	140 m.
Draft	12.2 m.	

Type of Structure: The berthing and mooring dolphins are of flexible type, resting on large diameter steel piles which have been provided with cathodic protection against corrosion.

Distance between outer-most Mooring Dolphins: 330 m.

Fenders: 2 Bridgestone type cell rubber fenders have been fixed on each berthing dolphin.

Facilities: 5 marine unloading arms have been provided with a provision for an additional arm in the future. 3 unloading arms (300 mm. diameter) are connected to HSD, SKO, SRN and ATF pipelines. 2 unloading arms (400 mm. diameter) are connected to crude, FO and deballasting pipelines. Apart from these, there are pipeline connections for water supply and firefighting.

Fire Protection System: 2 rotatable and elevating type remote controlled/manually operated fire-monitors have been provided on 22 m. high towers on fire-monitor deck. These monitors are fed with water and foam by heavy duty pumps installed in the Pump House.

Tug and Launches: 2 tractor tugs having 35 tonnes bollard pull capacity and one mooring launch have been ordered.

SHIPMASTER'S REPORT: November 1984.

Pilotage: Ensure a boat rope is rigged; of good length and well down to the water and Pilot comes out in a small open boat, requiring a good lee and about 4 knots headway.

Also see "Calcutta".

Radio: See "Calcutta".

Tugs: Berthing at Haldia is critical in windy conditions. Tugs are under powered and have high freeboards. New tugs have been ordered. Present set up requires clear understanding on Pilot's side of controllable pitch ships where engines run continuously. Tugs slip wires unexpectedly on occasions.

Tankers: Tankers are sometimes berthed on the Iron Ore Berth inside the locked – in dock (11 m. alongside). Good pumping rates, up to 1,600 cu.m.p.h. Hose size 10 in., up to 4 connections. No night movements. If dealing with the India Oil Corporation, be ready for draft survey, independent quantity surveyor and a "standard" letter or protest. Also keep to hand all bunker/water information for arrival at previous port through to departure from present port, for end of passage and full away on passage plus port consumption/liftings.

SHIPMASTER'S REPORT: February 1994.

The following information has been supplied by the Hoogly River Pilot, who also berths and unberths the vessel.

The port is a tidal river port with strong to very strong currents, and is affected by cyclones when in season.

Tankers can be moored inside Haldia Dock after passing a lock, or in the river where 2 jetties are built.

We berthed at River Jetty No. 2, being the most Southward one. These jetties are very much affected by strong currents, and 22 mooring ropes are required and doubling of ropes is permitted.

There is no night berthing.

The ship arrives at Sandhead Pilot Station, which is a wide open anchorage affected by rotary currents, which can be strong. Pilot Book and chart gives sufficient information on this matter.

Ship has to anchor at Sandhead Pilot Station awaiting the tide/high water.

After picking up Pilot near East Channel lightvessel, vessel proceeds up-river under pilotage.

The pilot vessel (31 years in age) is cruising or anchored near East Channel lightvessel. See Pilot Book and chart for information regarding possible position of pilot vessel (depends on season).

Communication with the pilot cutter is good, and is carried out by VHF Channel 16 and/or 13.

First contact with Pilot Station has to be done through wireless. However, as ships have no wireless station these days, Agent has to be requested explicitly to inform Sandhead Pilot Station of ETA, fresh water arrival draft, etc.

Boarding of the Pilot near the pilot vessel is carried out by small motor boarding launch lowered from the pilot vessel. Vessel has to approach pilot vessel up to 3 or 4 cables and stay in contact with pilot vessel regarding manoeuvring, etc.

For safe boarding of Pilot, the following is necessary:

(1) 2 manropes for pilot ladder.
(2) Heaving line for hoisting some pilot equipment. He carries with him Indian charts which show the river depth in great detail.
(3) Boatrope, long enough to reach from manifold to well aft of pilot boarding ladder. Rope to be lowered in a bight just above the water.
(4) Pilot ladder (combination accommodation ladder/pilot ladder) to hang 1.0 m. above water.

In most cases, ships proceed up-river in a small convoy (in our case 3 ships, of which we were the last one). This can create some time lag when berthing at the river jetty, as the current turns sharply and in short time at the river jetty.

Anchorages:

(1) Sandhead Pilot Station: For awaiting high water/tide.
(2) Sagar Roads: Occasionally ships will be moved (under pilotage) from Sandhead to Sagar Roads and await high water/tide there.
(3) Haldia Anchorage: This is an emergency anchorage, in case ships arrive at tanker berth river jetties, and for one reason or another ship is unable to berth due to a last minute change, such as vacating tanker unable to leave.

There is no night berthing at Haldia. However, night movements from sea up to Sagar Roads are carried out.

Current Information:

March/April:	Current 7 knots. Ebb current weaker than flood current.
July/August: (especially August)	Ebb current 8 knots, due to heavy rain. Flood current is less.
November to March:	Current 3 to 4 knots. Night current is stronger.
May to June and September to October:	Cyclone season with weak tides. However a tidal surge, which can be strong.
Current at Sandhead:	Normal rotary current, see Pilot Book and chart for more detailed information.
Current at Sagar Roads:	Linear current, flood tide setting N.N.E., less than 5 knots.
Current at Haldia Anchorage:	Strong current. Anchor likely to drag, therefore constant manoeuvring required.

Charts used: The British Admiralty Charts can be used. However, due to the numerous and very frequent changes in buoys, depths, etc., these charts are not updated. This is simply not possible due to the fact that many corrections are not passed on to the Admiralty.

The Pilot, when boarding, has a complete set of river charts which show the buoys and depths in great detail.

Every 2 weeks, the river is sounded extensively and dredging is also carried out.

However, siltation of the river is unavoidable, and Pilot considered it as being a lost fight, unless very modern techniques are employed. The big problem delaying the dredging is the strong currents, thus dredging has to be postponed for some months.

Mooring at Haldia River Jetty: Berthing starboard alongside. Vessel has to use 22 ropes. Fixed drum Atlas ropes are unsuitable for using as a loose rope. They are too smooth and slippery, and therefore they slip through when handled on the winch. For this reason, it is not possible to get these loose Atlas ropes tight.

Jetty No. 2 is a platform in the river. See "Plan" for mooring arrangement.

Mooring bollard "H" appeared rather damaged and it is not advisable to place 3 springs on it. However it is discussable.

For that reason, one fixed Atlas rope had to be given out from the port maindeck to forecastle and leaving ship from the forecastle head. This was not ideal, but can be safely executed. The fixed rope could be kept on the drum, as using as loose rope is not possible (slips through).

Mooring is carried out by using shore messenger attached to ship's messenger and attached to ship's mooring rope and thus to shore and ship. Mooring launch is not used due to current.

Messenger must be strong, as there is a lot of weight coming on these lines. Weight of mooring ropes, sinking in water and the force of the mooring has to be carried out within a certain time frame, as the current is changing quickly.

When one is last in the convoy, this could work out unfavourable due to lack in time when mooring.

Consequently any delay in mooring (parting of messengers, confusion in understanding orders, etc.) minimises the remaining mooring time.

If mooring should go wrong, one has to stop mooring and anchor at Haldia Anchorage, which is small in size and 8 knot currents are experienced.

2 tugs assist with mooring but only push, do not make fast.

Communication with tugs on VHF was not possible for one reason or another. However, they do have a VHF set. Communication was done through whistle signals.

Communication with shore through VHF was good.

Pilot was very competent, despite the fact that his last mooring at Haldia was over a year earlier.

The paying out of mooring ropes is time consuming. Due to the fact that the current starts to build up, ropes are easily twisted and will reach shore messed up and this delays mooring. It is almost impossible to get the ropes straightened out again on the shore.

Ship is requested to pay out 4 ropes at one time. However, I refused as there was a shortage of manpower and to avoid messing up ropes. Even with paying out 2 ropes at a time, the head lines appeared to be twisted and the operation had to start again.

We had the bad luck during mooring operations, a heavy rainfall started for approximately 30 minutes. When this happens, the shore mooring gang abandons the mooring operations, which they actually did.

The passing out and also bringing in of the ship's gangway when leaving is time consuming and not easy.

If one trusts bollard "H", in respect of strength, the 3 springs forward can be paid out from the maindeck. This assists the mooring operation greatly.

When the ship is approaching the river jetty, she will be swung to starboard by using hard starboard rudder and full power on the engines. When the swing starts, full astern is applied. One tug is pushing on the port bow. No anchor is used for swinging purposes. This manoeuvre is commenced when the ship is abreast Haldia Lock, which is approximately 7 cables from the jetty (down-river). Vessel is then ready to land abreast (more or less) the jetty, as the current sets her rapidly up-river. Engines on astern when necessary.

At a certain stage, port anchor is dropped with maximum 3 shackles in water to hold the bow up. We ended up with 6 shackles in the water.

The jetty, we berthed to, had a rather damaged appearance, probably due to heavy landings of ships. Repair was carried out.

Unmooring: No tugs to be used.

Vessel has to follow the Pilot's unmooring sequence.

As the ropes are very tight, and as the Pilot advised us not to slack any ropes, with the exception of the spring lines, the automatic release hooks are used.

For this reason, when the order to the shore is given to let go the ropes, the ship's mooring gangs have to take shelter, because the breast lines, stern lines and head lines are catapulted through the air and hit the ship's hull heavily.

I protested to the Pilot, but he advised me that this was the only way unmooring at Haldia was carried out. The last ropes to let go are the 4 head lines which are at that moment under heavy stress, and it is especially these ropes which are catapulted heavily.

Taking the head lines on board together with the heaving-up of the anchor can cause some nuisance, as ropes tend to twist around the anchor chain, due to the current.

Remarks: The ropes have to be watched and constantly attended during the whole discharge period. No special problems were encountered during that period.

Be aware of thieves coming on board from the riverside, with the sole purpose of cutting and stealing mooring ropes which are scattered around forward and aft. Special watches had to be organised by the vessel to keep these ropes under constant surveillance. Agent is unable to supply any shore watchmen. The dark hours are especially favoured for stealing mooring ropes, and the period just after being moored and just before departing, when everybody is busy.

Armed military/police guards are stationed on shore.

AGENT: See "Cochin".

HAZIRA (Magdalla): 21.05 N. 72.37 E. (See Plan)

(A) ANCHORAGE PORT
(B) SBM

(A) ANCHORAGE PORT

SHIPMASTER'S REPORT: April 1995.

We called at Hazira Anchorage (Surat Roads) for discharging our cargo of 41,357 tonnes of steel slabs, which were loaded at Bandar Imam Khomeini and we were, according to receivers, the first vessel with this kind of cargo calling in the port.

Hazira is situated 400 km. North of Mumbai, 4 – 6 miles S.S.W. of Suvali Point, and is the anchorage for Tapi River, in depths from 12 m. – 30 m.

Vessels may need to veer additional anchor cable in this anchorage because of the strong tidal streams, particularly on the falling tides.

At Surat Roads, the weather is unsettled with Southerly winds, which precede the S.W. Monsoons, occur earlier than Mumbai.

After mid-April and in early May, strong Southerly winds are common, raising a considerable sea during Spring tide. We experienced this weather from mid-March and discharge was interrupted during this period.

Tidal Streams: At Surat Roads, the flood stream sets North, continuing for one hour after the time of local high water. At the outer anchorage, Spring tidal streams are strong, especially the ebb, which sets South at the rate of 4 knots to 5 knots. Nearer the bar the streams are weaker. The tide often falls 2.0 m. before tidal stream turns South.

The following are some lines of a letter received by the receivers ESSAR, stating:

"This is to inform you that tidal currents are extremely strong at this anchorage. You are requested to maintain proper anchor watch for the safety of your vessel and our lighterage crafts made fast alongside your vessel".

However, this port was introduced to us as a safe anchorage.

DOCUMENTS: As in all Indian ports.
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Clearance.
Cargo Manifest.
Declaration of Private and Personal Property.
Money Declaration.
Narcotics Declaration.
Ammunition Declaration.
Crew List.
No monkeys on board Declaration.
Place and date of Derat Certificate.

Customs Officials boarded on arrival with the first tide, together with Agent. We prepared ship's documents in advance and were accepted. The Agent took a photocopy of ship's certificates.

APPROACHES: The chart used on our visit was B.A. Chart No. 1486, a middle scale chart. No other bigger scale chart available.

No difficulties were encountered on our approach.

We shaped course, from abreast Daman (Lat. 20° 24' N., Long. 72° 50' E.) for the roads, keeping depths of from 10 m. – 20 m. (33 ft. – 66 ft.) and well clear from Malacca Eastern Bank.

Valsad, Machiwada, Borsi and finally Hazira lights are good radar targets, and it is possible to fix very good positions by them. However, our vessel also equipped with a GPS satellite navigator, so we double-checked our position.

PORT LIMITS/ANCHORAGES: Hazira Anchorage or Surat Roads, is bounded by the following positions:

Lat. 21° 03' N.,	Long. 72° 34' E.
Lat. 21° 03' N.,	Long. 72° 36' E.
Lat. 21° 01' N.,	Long. 72° 36' E.
Lat. 21° 01' N.,	Long. 72° 38' E.
Lat. 21° 00' N.,	Long. 72° 38' E.
Lat. 21° 00' N.,	Long. 72° 34' E.

We anchored in the middle West-side of this anchorage which was 5 miles S.W. of Hazira Light. The depth of the water was approximately 29 m. and the nature of the bottom is mud. The holding was good.

PILOTAGE: Not available. Hazira is an open anchorage area.

UNLOADING: Vessels coming to this anchorage will discharge the cargo into the barges, which in turn will take the cargo to the jetties, constructed on the banks of the River Tapi.

The main discharge places are ESSAR Jetty, L & T Jetty, Reliance Jetty, Kaibhod Jetty (Silted badly) and Magdala Port Jetty.

Barges and small coastal vessels drawing a draft upto 3.5 m. can enter Tapi River (Draft is dependent on the tide). The range of tide is upto 6.0 m., thus causing strong current in the river as well as at the anchorage.

Vessels anchor at Surat Roads in the depth of water of 12 m. – 30 m. to carry out the discharge of the cargo, then shift closer to the entrance as the draft reduces by the discharge of the cargo.

As Magdala is a tidal port, vessels only move during the high water, and towage is restricted to daylight hours only. The barges available are hatch type self-propelled or open barges. Most of the cargo imported is bulk and is received by ESSAR.

The ship can be visited only during the high water, and if the boat does not come back on the same tide, it has to wait for the next high water.

Discharge of the cargo at the jetties is carried out by mobile cranes. The barges generally sit on the river bed during low water.

The discharge rate is totally dependent on the cargo gear and specially barge availability.

The stevedores' and receivers' equipment are in short supply. During discharge, we faced the problem of missing slings and other tools and especially missing barges. Stevedores try to replace their slings and tools with ship's gear.

Portable VHF equipment was not available. As communication between stevedores and receivers was essential, we were forced to provide our equipment for this purpose.

Cooperation between stevedores and ship was very good. The stevedoring company, engaged for discharge of cargo, work fast when barge alongside the vessel and cause only minor damage.

The first problem was with the receivers (ESSAR). The holds were recently surveyed by Bureau Veritas surveyor for the needs of the ship's certificates, sandblasted and painted, in the shipyard. But we received the following letter:

"It is noticed that your vessel's cargo hold internals are damaged at several places. Australian ladder, their railings broken at several places. Brackets at intersection of frames with lower hopper bent at several places. Eyes at various places in cargo hold broken. Above damages were noticed while undersigned visit on your vessel prior commencing discharge."

The second problem was because the discharging rate according to charter party was about 5,000 tonnes daily, but this was never reached. We registered a protest letter for slow discharging, due to "No Barges Availability", as the reason shown on the stevedores Idle Report, where it clearly stated "Waiting for Barges" about 12 hours daily.

ESSAR replied with a protest letter for bad stowage, even if they knew that a Charterer's representative attended the loading.

However, it was very easy to prove them wrong, as the reason for slow discharge was only due to "Waiting of Barges".

The third problem was at Hazira Anchorage, and was witnessed by other vessels on the VHF. A crew member wished to disembark due to a very serious family reason (Chief Officer's father died). The Master of that vessel was trying for a whole day and asked the man on watch at ESSAR base station to make a telephone call to his Agent to ask if it was possible for the Chief Officer to disembark. After a long wait period, the answer was "Sorry Captain, we are the receivers, not your Agents. It is not our job to help you in any way. If you like to contact your Agent, try a radio station. We know on which telephone your Agent replies and if you like we can give this number to you, but nothing else".

As you understand, if you are in the middle of nowhere with a problem like that, you must at least have the help of your very close companions, even if they are "the receivers".

Finally, we wish to close this report with a telex received by our local Agent:

"Since this port is in a remote area (400 km. from Mumbai), hence everything is quite expensive. Suggest Master not to ask for any fresh water or provisions, etc., as same would be 5-6 times more costlier in comparison to Mumbai or nearby ports. Even taxi/barge operators charges are tremendously high. However, shall try protect Owner's interest to the maximum extent possible".

STEVEDORES: Stevedores are fixed by the Agent, and the receivers of the cargo are usually ESSAR. 60-70 stevedores boarded the vessel and stayed until the end of discharge. In our case stay was 16 days.

FRESH WATER: Fresh water is not available at this port and we arrived with our tanks nearly full. We had water discipline for all the period that the vessel discharged, due to very high consumption. For the first two days that the water was free to stevedores, the daily consumption rose to 25 tonnes. After the discipline, the daily consumption fell between 6 tonnes to 8 tonnes.

CUSTOMS: Customs allowed 200 cigarettes and one bottle of spirits.

The bonded stores were sealed and Customs assured us that after a week it would be possible to open again. We called Agent and asked for an issue but due to very high price of launch (U.S.$1,000), it was impracticable for the Customs to visit us and open the bonded store.

SHORE LEAVE: As Immigration is completely absent in this place, shore passes and permission to go ashore restricted.

OPERATOR'S REPORT: March 1996.

RELIANCE INDUSTRIES LTD., HAZIRA MARINE FACILITIES:

Reliance Industries Ltd. (RIL) owns and operate jetty facilities on the river front of the petrochemical plant at Hazira. These facilities are comprised of 3 terminals (gas/chemicals/petroleum) for loading and unloading of cargoes such as liquified gases/chemicals/petroleum products and Single Point Mooring terminal (See Part "B") for loading and unloading of chemicals and petroleum products. These areas are covered by Indian Charts Nos. 254, 209 and 2019, published by Naval Hydrography Office in India. The controlling port is Magdalla (21° 08.2' N., 72° 44.1' E.).

General: The distance from Fairway Buoy to RIL jetties at petrochemical plants site, on the bank of Tapi River is approx. 12 nautical miles. The channel is very shallow and the vessels navigate in/out only during high tide periods. Tapi River channel is liable to change due to the natural phenomena. Mariners are advised to navigate with extreme caution due to strong tidal currents and channel marking buoys are liable to drift from the actual marked positions.

Lighterage Areas:

Ethylene lighterage area:
Lat. 21° 00.0' N. to 21° 01.0' N.
Long. 72° 36.0' E. to 72° 38.0' E.
General lighterage area:
Lat. 21° 00.0' N. to 21° 03.0 N.
Long. 72° 34.0' E. to 72° 36.0' E.
Proposed lighterage area:
Lat. 20° 59.0' N. to 21° 00.0' N.
Long. 72° 36.0' E. to 72° 38.0' E.
Proposed tanker waiting/lighterage area:
Lat. 21° 03.0' N. to 21° 06.0' N.
Long. 72° 33.5' E. to 72° 35.5' E.

Dangerous Cargo Lighterage: The mother vessels carrying dangerous cargoes will anchor in the designated Ethylene/LPG/Tanker lighterage areas after getting confirmation from Reliance Base on VHF Channel 67 (24 hours). For some small vessels with draft less than 3.0 m. calling at Reliance jetty, pilotage is optional and normally Masters are required to navigate themselves in the channel. All vessels calling at Reliance are subject to safety inspection and have to comply with all the Safety Check Lists during the operations. Reliance own and operate 4 shallow draft chemical/gas lighterage tankers.

(B) SBM

LOCATION: Reliance Industries own and operate the Hazira Offshore Terminal on the West coast of India.

The terminal, which is within Magdalla Port limits, is situated approximately 9 miles N.N.W. of the Tapi River Fairway Buoy at the head of the Sutherland Channel.

The Single Point Mooring (SPM) is located at Lat. 21° 08' 56.508" N. Long. 72° 34' 25.943" E. in a water depth of 25 m.

It is fitted with a radar reflector, fog horn and a navigation light, continuous flashing (Morse "U"), 15 second period.

Tidal current in the vicinity of the SPM reaches 5-6 knots during Spring tides and the direction of the ebb and flood is generally South and North. The tidal range is approximately 7.0 m.

Charts: India Naval Hydrographic Office Chart No. 209 covers the area.

DOCUMENTS: The following documents should be completed for arrival (Magdalla Port forms):

2 copies Form I General Declaration.
2 copies G.O.I. Maritime Declaration of Health.
2 copies Customs Form: Ship's Certificates & Declaration.
2 copies Customs Form: Break Bulk Permission.
3 copies Form II Port/Customs/MMD/Health/Police.
6 copies Form III Arrival/Departure Form.
2 copies Drugs Declaration Form.
2 copies Foreign Currency/Deck Cargo/Agency Form.

Agent: Normally the agent will board the tanker at Surat Roads Anchorage or after berthing and the previously mentioned documentation will be handled by him.

Customs and Immigration: Officials of the Customs and Immigration Services will board the tanker prior to or after berthing.

SPM, to prevent accidental dropping when the vessel is secured to the SPM. Under no circumstances should anchors be dropped closer to the SPM than 500 m. and in the Prohibited Area to the East of the SPM as marked on the chart.

PILOTAGE: Pilotage is by Hazira Reliance pilots, who normally board at Surat Roads. Tankers are recommended to anchor in this area and await instructions. Such vessels may call Reliance Base, Hazira and request information.

The pilot, who will be assisted by a Reliance Marine Officer, will remain on board the vessel during the full stay at Hazira Reliance SPM and during that time will act as company representative. All company business and radio communications will be under his direct control.

The Pilot and Marine Officer will advise on pilotage, mooring and unmooring the vessel, hose connection and disconnection. In this respect the Pilot and Marine Officer are to be deemed servants of the Owner and Reliance Industries Limited shall not have or engage any liability for anything done or omitted to be done by any Pilot or Marine Officer.

Boarding Facilities: All vessels using the Hazira Reliance SPM must be fitted with a pilot ladder and accommodation ladder as specified in "SOLAS 1974", Chapter V, Regulation, 17. Such pilot ladder, accommodation ladder and ancilliary equipment must be rigged as specified in the Regulation and used for embarking and disembarking personnel.

In addition, all personnel embarking and disembarking must wear an approved life saving appliance.

Masters should be aware that the port side manifold area should be kept clear to allow access for the tug towing the floating hoses, and passing same to vessel for connection.

ANCHORAGE: Tankers delayed prior to berthing at the SPM due to port closure, berth occupancy or awaiting HW/LW will normally anchor in the Surat Roads anchorage. Vessels will only berth in daylight at HW/LW slack periods.

Proposed tanker anchorage area is located North of general lighterage area (3 nautical miles × 2 nautical miles).

The area is enclosed by following co-ordinates:
Lat. 21° 03.0' N., Long. 72° 33.5' E.
Lat. 21° 03.0' N., Long. 72° 35.5' E.
Lat. 21° 06.0' N., Long. 72° 33.5' E.
Lat. 21° 06.0' N., Long. 72° 35.5' E.
The depth is 25 m. below CD.

Anchors: Anchors must be secured by stoppers/lashing wires before approaching SPM, to prevent accidental dropping when the vessel is secured to the SPM. Under no circumstances should anchors be dropped closer to the SPM than 500 m. and in the Prohibited Area to the East of the SPM as marked on the chart.

PRE-ARRIVAL CHECK LIST: Actions to be taken when vessel arrives in the Waiting Area:

Ref. Item:

W1 Discuss and agree Cargo Transfer Plan.
W2 Confirm Berthing Time.
W3 Obtain and process cargo samples for approval.
W4 Transfer additional mooring equipment, if required Ref. V7 (See "Radio").
W5 Transfer additional lifting equipment, if required Ref. V8 (See "Radio").
W6 Transfer personnel and communications equipment.
W7 Transfer Camlock wrench and valve hose handle.
W8 Transfer flange reducers, gaskets and seals.
W9 Operational checks on SPM Buoy.
  Rotating Assembly free to rotate
  All SPM valves OPEN
  Battery charge levels OK
  Instrumentation systems functional
  Mooring Hawsers free of damage
  Mooring Hawsers free streaming
  Floating Hoses clear and free streaming

RESTRICTIONS: Vessels berth at slack H.W./L.W. and in daylight.

MAX. SIZE/REQUIREMENTS: *Vessel Requirements:*

Minimum Summer Deadweight:	15,000 Tonnes
Maximum Summer Deadweight:	50,000 Tonnes
LOA:	170 m. – 250 m.
Beam Moulded:	24 m. – 35 m.
Depth Moulded:	15 m. – 23 m.
Maximum Arrival Draft:	13.00 m.
Bow Mooring Fittings:	As per OCIMF (including 2 (OCIMF only require 1 stopper) bow stoppers to accommodate 54 mm. chafe chains, SWL 200 tonnes).
Bow Mooring Arrangement:	As per OCIMF (i.e. fairleads, bollards, etc.).
Windlass capable of lifting:	15 tonnes at the bow.
Minimum derrick/crane SWL: (Port cargo manifold)	15,000 – 20,000 tonnes d.w.t. vessels require a crane of SWL 7.5 tonnes (OCIMF states all vessels 16,000 – 60,000 tonnes should be fitted with crane of minimum 10 tonnes SWL). 20,000 – 50,000 tonnes d.w.t. vessels require a crane of SWL 10 tonnes and sufficient outreach for SPM operations.
Cargo manifold/reducers:	As per OCIMF.
Cargo Manifold size:	16 in. 150 ASA Naphtha/gas oil (import line). 10 in. 150 ASA NGL (export line)
Maximum bow/manifold distance:	450 ft.
General Compliance of Vessels:	As per OCIMF.

Other Requirements:

1. Vessel must be capable of discharging cargo and loading ballast OR loading cargo and discharging ballast concurrently and retaining 30% Summer d.w.t. on board at all times.
2. Owners to warrant that the vessel is fitted with sampling point at the manifold.
3. Vessel's crew shall perform mooring/unmooring operations and assist tanker boarding personnel in connecting/disconnecting cargo hoses during the SPM operations.
4. Owner warrants that the vessel is capable of discharging entire cargo within 24 hours or maintaining 100 p.s.i. at ship's manifold.
5. ETA Notices: 5/3/2/1 days addressed to Operations In-Charge (OIC), Reliance Shipping Offshore Terminal Hazira.

RADIO: *ETA:* Vessels are requested to confirm ETA and arrival draft to Reliance Base, Hazira, 12 hours before arrival and any adjustment to that time at least 2 hours before arrival (Also see "Max. Size/ Requirements").

PRE-ARRIVAL CHECK LIST: Details to be given BY the Vessel's Master 72 hours before ETA.

Ref:Item: *Details*

V1 Communication Channel with Terminal.
V2 Emergency Channel.
V3 Communication Channel at Wait Area.
V4 Communication Channel at Mooring.
V5 Estimated Time of Arrival at Wait Area.
V6 Vessel Draft.
V7 Vessel Mooring Equipment:
  Type of Chain Stopper
  Size of Chain Stopper
  Length and Size of Messenger Lines
  Additional Mooring Equipment required
V8 Hose Lifting Gear:
  Type
  SWL
  Shackle Sizes Available
  Strop Available for Rail Hose
  Lines Available for Snubber Use
  Additional Equipment required
V9 Cargo Details:
  Type
  Quantity
V10 Vessel Manifold:
  Position
  Size
  Type
  Rating
V11 Cargo Pumping Details:
  Vessel Pump Pressure at Manifold, MAX.
  Vessel Flowrate at Manifold, MAX.
V12 Damaged or defective equipment on vessel which may affect manoeuvrability

PRE-ARRIVAL CHECK LIST: Details to be given by the Terminal Controller TO the Vessel's Master 72 hours before ETA.

Ref:Item: *Details:*

T1 Communication Channel with Vessel.
T2 Emergency Channel.
T3 Communication Channel at Wait Area.
T4 Communication Channel at Mooring.
T5 Navigation Route to SPM Buoy.
T6 Give details of Defined Waiting or Holding Area.
T7 Confirm SPM Buoy Location.
T8 Confirm Buoy Navigation Signals and Markings.
T9 Allocate Preliminary Mooring Time.
T10 Give Instructions and Information regards:
  Local Regulations
  Special Procedures
  Special Safety Precautions
  Any changes to Standard Procedures

Tide data to be transmitted to the vessel:

Date *Time* *Height*

Weather forecasts to be transmitted to the vessel:

Date *Forecast*

VHF: *Hazira Reliance SPM:* Reliance Base, Hazira operates a 24 hour listening station on VHF Channel 67, Call Sign "Reliance Base".

Communications during berthing and stay at Terminal: In addition to the tanker's own radio facilities, the Hazira Reliance pilots normally operate on VHF Channel 67 for port operations and communications with the tugs.

TUGS: 2×40 tons B.P.

Reliance Workboats: Reliance Industries Limited maintain vessels to assist in berthing. These vessels are under the direct supervision of the Pilot.

BERTHING: *Pilot and Marine Officer Attendance:* The Pilot and Marine Officer will attend to the vessel during its entire stay at the Hazira Reliance SPM, to maintain its position and assist with turning round the buoy at slack water/change of tide.

The stern tug will remain made fast, under the instructions from the Pilot.

Usual Sequence of Events:

1. Pilot and Marine Officer boards the tanker at Surat Roads Anchorage area, prior to next available daytime H.W. or L.W. (Hazira Outer).
2. Approximately 3 miles from the Hazira Reliance SPM, the mooring and hose connection equipment will be passed aboard from a Reliance Tug (it should be noted that the tanker should have the port derrick/crane rigged for this purpose) which will then make fast aft.
3. The tanker will then proceed to a position approximately 450 ft. from the SPM and pass a light messenger (4 in. polypropylene rope) to the Mooring Launch. Her crew will attach it to a 10 in.×450 ft. polypropylene "pick-up" rope which is secured to the mooring chafe chain. This pick-up rope is heaved until the chafe chain is inboard. The chafe chain is then secured in the mooring bow stopper.

   On vessels where 2 moorings are required, the operation will be repeated. The port mooring is taken first, following by the starboard mooring.
4. As the weight is taken up on the mooring, a Reliance Tug, having previously secured and cleared the hose string for the tanker's approach, will now come alongside and the hose connection operation commences.

MOORING/UNMOORING: *SPM:* The SPM consists of 2×15 in. circumference × 150 ft. braided nylon ropes secured to the SPM by 76 mm. diameter × 4.0 m. length of Grade U3 stud link chain.

The ship's end of the mooring consists of 54 mm. diameter × 5.5 m. length of Grade U3 stud link chain.

These chafe chains are secured in the tanker bow stoppers.

Vessels of 15,000 d.w.t. will take one mooring. All vessels of a greater tonnage will take two moorings.

Mooring: Mooring will be carried out with the assistance of ship's crew under the advice of the Marine Officer and his crew.

During final approach to the berth, the vessel's anchors must be tight home and secured by stoppers/lashing wire to prevent accidental dropping. The stoppers/lashing wire must remain in position until the vessel is clear of the berth after unmooring.

Unmooring: Unmooring will be carried out with the assistance of the ship's crew under the advice of the Marine Officer. The weight of the mooring will be taken on the 10 in. pick-up rope (using the ship's engines to reduce the load if necessary) and the chafe chain(s) released from the bracket.

The messenger will then be slowly slacked away until the support buoy is in the water and taking the weight of the chafe chain.

As the vessel drops astern the messenger should be slowly paid out.

LOADING/DISCHARGING: *Discharge Commencement/Completion:* On the instructions of the Pilot discharge/loading will commence.

On completion of discharge/loading, after tank inspection/gauging, the manifold valves will be closed and hoses disconnected.

Sailing: When the hoses have been passed to a Reliance Tug, the tanker will slip from the Monobuoy.

Once the mooring messenger(s) has/have been lowered into the water the crew will collect all mooring equipment and hose connection gear in the manifold area and sling it ready to pass to the tug when the vessel is clear of the SPM for handing down in the Sutherland Channel.

The Pilot and Marine Officer will disembark when the vessel is clear of the Sutherland Channel.

HOSES: *General Information:* Discharging/loading hoses are 1×10 in. and 1×16 in. floating hoses, fitted with 150 ASA flanges.

Each hose is fitted with a "Camlock" coupling for connection to the ship's manifold. Both strongs are fitted with a Gall Thomson marine breakaway coupling.

Hoses are connected on the port side of the vessel only.

Hose connection and disconnection will be carried out with the assistance of the ship's crew under the advice of the Marine Officer and his crew. All equipment for the operation will be provided by Reliance Industries Limited, and passed to the vessel approximately 3 miles South of the Monobuoy.

Hose Handling: Hose handling should always be carried out with the string de-pressured.

After the vessel is securely moored, the Reliance Tug will tow the ends of the floating hoses to a position beneath the tanker's derrick/crane.

If both hoses are to be used, it is essential that the forward hose string is made fast to the forward manifold and the after hose string to the after manifold, in that order.

Hose Lifting: The derrick/crane should be rigged with the head positioned midway between the vessel's rail and manifold.

The lifting hook should be lowered to the tug where the crew will attach it to the lifting chain. The hose should then be lifted to the tanker's rail.

At this time, the condition and securing arrangement of the various hose lifting gear components should be visually inspected for excessive wear, damage or poor connections.

The hose should then be lifted to a height sufficient to enable the hose supporting chain to be attached to the hang-off chain, which is then made fast to a suitable cruciform bollard. The hang-off retention chain can be uncoupled at this stage.

Hose Securing: The hose should then be lowered to transfer the full weight to the hose support chain.

A snubbing rope positioned around the hose and secured to the tanker's rail will assist in lining up the hose to the tanker-manifold, and prevent lateral movement during connection.

The height of the hose should be sufficient to allow the hose to be bent over to the tanker's manifold and for the hose and manifold flanges to be aligned.

The hose end should then be lowered to deck level and the blind flange removed. Before removal, a check should be made to ensure the line is de-pressured and a spill tank or drip tray should be positioned to contain any leakage.

Hose Connection: The hose should then be connected to the tanker's manifold using the Camlock quick coupling or end flange as applicable.

If the hose end flange is connected to the tanker's manifold or if reducers are required (these should be secured prior to hoisting hoses out of the water), the full number of nuts should be used and tightening should be in a diagonal sequence. New, high quality gaskets should be used.

When the hose connection has been made, a strop should be connected to the rail hose(s) and hooked onto the derrick. The strop(s) should be used to achieve an acceptable bend radius configuration.

The snubbing rope may be left in position to minimise lateral movement of the hose(s) induced by sea/swell.

During the hose lifting and connection, care should be taken to ensure that the weight of the hose string is not taken off the support chain by other than the prescribed lifting gear. In particular, the strop should not be used to take the full weight of the hose string to adjust the support chain.

Hose Disconnection: Care should be taken to ensure that the hoses are secured to the tanker or derrick/crane at all times, until they are lowered to the sea. Before disconnection, the tanker's manifold valve(s) must be closed, the hose end butterfly valve closed and secured and the line de-pressured.

To disconnect the hose, its weight should be taken on the derrick/crane at the strop and the Camlock coupling/end flange disconnected. Care should be taken to stop the hose moving when disconnected and this is most easily done by securing a line around the hose near the flange and fastening it to a convenient set of bitts.

When disconnected, the blind flange must be refitted to the Camlock coupling/end flange. (Prior to closure, inspect the Camlock "o" ring gasket for damage). It is important that the blind flange be properly fitted and all shackles assembled (i.e. hang-off and pick-up chain) and secured properly before the hose is lowered into the water.

If 2 hoses are used it is essential that the hoses are disconnected in sequential order form aft to forward. This will avoid the hoses fouling each other when they are lowered to the sea.

When the blind flange is secure, the derrick/crane hook should be transferred to the hose pick-up chain. The hose should then be slowly lifted to the vertical. When the hose is hanging vertically with all the weight on the derrick/crane hook, the hose support chain should be removed from the safety hook assembly and re-connected to the hang-off retention chain.

The snubbing rope may now be disconnected and the hose lowered until the pick-up arrangement is level with the tanker's rail.

A line should be passed through the pick-up arrangement and secured to the tanker so that it can be used as a slip rope. Care should be taken to ensure that the slip rope is long enough to lower the hose to sea level.

Prior to sailing, hose(s) will be lowered to the Reliance Tug for towing clear. Alternatively, the hoses may remain hanging-off the rail until the tanker slips and then lowered to the water as the tanker drops astern.

FRESH WATER: Not available.

FUEL: Not available at the buoy.

SHORE LEAVE: No officers and crew shall be allowed shore leave and no boats of any kind, except in an emergency, shall be lowered during the vessel's stay in the berth.

GENERAL: *Dirty Ballast/Garbage/Oil Residue:* There are no dirty ballast reception facilities at the Hazira Reliance Terminal nor can oil residue/sludge and garbage be disposed of.

Vessel Readiness: Any vessel which is not in the opinion of the Hazira Reliance Pilot, ready in all respects to discharge may be rejected until such faults are rectified.

Notice of Readiness: Notice of Readiness will only be accepted without prejudice by the Hazira Reliance Pilot on behalf of Reliance Industries Limited when the vessel is ready in all respects to berth and load/discharge cargo.

Delay, etc.: Reliance Industries Limited is not to have or engage any liability for any delay to any vessel for any reason over which Reliance Industries Limited has no direct control or is otherwise beyond its reasonable control.

Site and Bathymetric Information: The SPM buoy is sited approximately 3.8 km. West of the Low Water line at Hazira in a water depth of 25 m. (nominal surveyed depth 1994).

The vessel's Master should be acquainted with navigation and bathymetric charts related to the Hazira area.

Tide and Weather Information: Vessel's Masters must always be in possession of the latest tide, current and weather information when in the terminal area.

When moored at the SPM terminal, vessels will assume a position of least resistance to tide and wind. The SPM enables vessels to weathervane through a full 360°.

The SPM-CALM buoy is designed to withstand the following conditions when a vessel is moored and transferring cargo. The operator should stipulate maximum allowable operating conditions to ensure that the design limits are not exceeded. Figures given relate to dual hawser mooring for 50,000 d.w.t. vessel.

Max. Wave Height:	4.5 m.
Significant Wave Height:	2.8 m.
Max. Wind Velocity:	18.0 m/s (1 minute duration)
Max. Current Velocity:	3.0 m/s (surface)
Tidal Range:	8.8 m. (astronomical)
Environmental Direction:	N–S prevailing

REPORT: August 1995.

LOCATION: Reliance Offshore Terminal is located in position Lat. 21° 01' N., Long. 72° 35' E.

The Terminal is operated by Reliance Industries Ltd., Mumbai. They have a berth in the Tapi River for unloading barges.

TANKERS: *Specifications of the Tankers:*

Summer Deadweight:	15,000 – 50,000 tonnes.
LOA:	170 m. – 250 m.
Beam (Molded):	24 m. – 35 m.
Depth (Molded):	15.5 m. – 23.0 m.
Draft on 100% Loading:	9.6 m. – 13.0 m.
Draft on 20% Loading:	3.0 m. – 4.3 m.
Manifold Size:	16 in. 150 ASA for Naphtha/Gasoil. 10 in. 150 ASA for Gasoline/Xylene.
Maximum Bow to Manifold Distance:	450 ft.
Minimum Derrick/ Crane SWL:	7.5 tonnes for 15,000-20,000 tonnes d.w.t. 10 tonnes for 20,000-50,000 tonnes d.w.t.

Minimum water depth in approaches to SBM from Surat Roads Fairway Buoy is about 20.0 m.

Forward winch/windlass to be capable of lifting 10 tonnes at the bow.

Tidal rise in vicinity of SBM reaches 5.0 m. – 6.0 m. during Spring tides. Tidal range between High Water and Low Water is 9.2 m.

Other Requirements:

1. The vessel should be fitted with a bow stopper and a bow fairlead in accordance with OCIMF Recommendations for use with 54 mm. chafe chain. Owner to warrant that the vessel is fitted with sampling point at the manifold.
2. The vessel to be capable of discharging cargo and ballasting or loading cargo and deballasting concurrently and retaining 30% S.d.w.t. onboard at all times.
3. Vessel's crew shall connect and disconnect cargo hoses.
4. Owner warrants that the vessel is capable of discharging the entire cargo within 24 hours or maintaining 100 p.s.i. at ship's rail.
5. Delays in berthing for loading and discharging and any delays after berthing which are due to weather conditions shall count as one half laytime, or if on demurrage at one half demurrage rate.
6. Owner guarantees that the vessel's manifold arrangements are in accordance with OCIMF Recommendations for the size of the vessel.

General:

1. No facilities available for receiving dirty ballast/slops.
2. Night berthing/unberthing not planned in the initial stage.
3. No bunker or fresh water supplies facilities available.
4. Two tugs of 40 tonnes bollard pull each will be available for SBM operations. Mooring launch also available for mooring operations.

SHIPMASTER'S REPORT: January 1996.

Contact was made with "Reliance Industries" on VHF Channel 67 5 hours before arrival and vessel informed to anchor at Surat Roads. One hour before arrival contact was again made and anchor position requested as 10 vessels were anchored in Surat Roads and 5 vessels in the Transhipment Area. We were instructed to anchor 6 miles South of Suvali Point but in fact anchored at 2350 hrs., 6 miles S.S.W. of Suvali Point at the Southern edge of Transhipment Area in 22 m. of water. We were informed of possible berthing at 1700 hrs. next day.

The port is tidal and all operations, customs clearance, etc., take place around high water time.

Agent and customs boarded at 0400 hrs. next morning and vessel cleared at 0430 hrs. Usual Indian paperwork required, with the Agent doing most of the work after which customs sealed the bonded store.

Pilot, Marine Officer, I.O.C. representatives and Surveyors boarded at the anchorage at 1448 hrs. and during the run to the SPM, the tanks were inspected and passed. Just prior to arrival at the buoy, mooring and pipeline strops plus a mooring gang were shipped from a tug. The SPM is approached at slack water and the final run to the buoy at beginning of the ebb tide. One tug is made fast alongside on starboard forward shoulder and a second tug made fast from centre lead right aft. Mooring was a normal SPM operation. Two hoses were available but only one was connected by ship's crew and the mooring gang.

The SPM is owned by Reliance Industries, and I.O.C. rent the facility for import and export cargoes. This vessel was the third vessel to use the buoy and the first to export cargo.

The operation is controlled by the Reliance Industries Pilot with other information being given by the I.O.C. Loading Master. All went quite smoothly with regards to cargo planning, emergency stop procedures, communication arrangements and a shore stop on the cargo to load was requested.

The loading rate was 720 tonnes/hr. using one shore pump. A second pump was available but as I.O.C. have to rent the pumping facilities no-one in I.O.C. could make the decision to start the second pump. The loading went smoothly if somewhat slowly, taking 28 hrs. 20 minutes to load 20,385 tonnes of Naphtha (NGL). (21,000 tonnes maximum had been requested).

There is no night berthing or unberthing at present, therefore as loading completed at 2330 hrs., the vessel had to wait until 0656 hrs. next day to unberth. The cargo documents are prepared on board by the I.O.C. representatives and it took until 0400 hrs. for them to be completed.

A tug remains fast astern throughout the operation and Reliance Industries personnel are stationed forward, checking on the SPM at all times. At each change of tide the vessel must swing anti-clockwise round the buoy to avoid fouling the pipelines. Ship's officers and the pilot monitor this and if any possibility of swinging the wrong way, the aft tug is called to correct the swing or ship's steering gear utilised. Vessel's engines remain on stand-by throughout.

In conclusion, a smooth operation well organised by Reliance Industries who are very much in charge. Rather an excessive number of shore personnel on board at times, reaching a maximum of 14 extra persons at meal times. The pilot, Marine Officer and I.O.C. representatives have to be accommodated, the Reliance Industries personnel change watch from the tug astern.

The I.O.C. Loading Master was from Mumbai and I recognised him from other visits to that port. He was training the other I.O.C. staff from Hazira. Once their training is complete the number of extra personnel on board may be reduced.

It would appear that the plan it to export all Naphtha from Hazira instead of Kandla, thus reducing the congeston at that port.

OPERATOR: Reliance Industries Ltd., Shipping Division, Village Mora, Post Bhatha, Surat Hazira Road, Surat - 394510 (Gujarat), India. *Tel:* +91 261 88 5484. *FAX:* +91 261 89 5489. *Contact:* Captain R.K. Singh, Assistant Vice-President (Shipping).

Head Office: Reliance Industries Ltd., Shipping Division, Reliance Centre, 19 W.H. Marg, Ballard Estate, Mumbai 400 038, India.

HONAVAR: 14.16 N. 74.27 E.

DOCUMENTS:
- Crew Lists.
- Passenger Lists.
- Customs Documents.
- Health Documents.
- Manifests.
- Bills of Lading.
- Ship's Papers.

PILOTAGE: Open roadstead port. No system of pilotage. Pilot is however available, on requisition by Master or Agent.
ANCHORAGE: Distance off 3 miles, depth of 5.5 fathoms.
MAX. SIZE: No restrictions on length and breadth. Generally up to 34 ft. draft vessels can anchor within 2 miles to 3 miles from entrance.
HEALTH: Port Health Officer grants Pratique as and when necessary, on requisition.
RADIO: Wireless station at Mangalore.
BERTHING: No berthing facilities. Ships anchor on open roadstead.
MEDICAL: Medical facilities for minor treatment available in Honavar. Proper hospital facilities available only at Karwar about 60 miles North. At least 24 hours advance notice ETA to be communicated to Agents.
DENSITY: Varies 1020/1025.
FRESH WATER: Very small quantities available. No arrangements for delivery to ships.
FUEL: Not available.
CONSULS: None.
REPAIRS: Nearest workshops undertaking repairs available at New Mormugao or Mangalore. Minor repairs may be carried out at Karwar.
DRY DOCKS: None.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: All ship's papers such as Certificate of Registry, W/T Certificate, Safety Equipment, Load Line, etc., to be on board for verification.
CARGO GEAR: Cargo gear Test Certificates, etc., to be produced.
REPATRIATION: Facilities available.
AIRPORT: Belgaum, about 178 miles.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Charter Party Holidays observed. Cargo work can be arranged on holidays. Dates of holidays vary from year to year.
POLICE/AMBULANCE/FIRE: Police 48; Ambulance 32; Fire Kumta 20.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Needed, if going ashore.
DELAYS: Generally no delays are expected.
AUTHORITY: Port Officer – Honavar, Port Office, Honavar, India 581395. *Tel:* Honavar 43. *Contact:* The Port Officer.

JAKHAU: 23.15 N. 68.37 E.

LOCATION: In Gulf of Kutch, on Godia Creek about 5 miles inside Arabian Sea. Port is about 7 miles West of Jakhau. Small sub-port exporting salt utilised by foreign-going and coastal traffic. Vessels calling Jakhau anchor in open roadstead about 6 miles offshore. Highest tidal range 14 ft. Current parallel to coast running about 4 knots.
AUTHORITY: Assistant Conservator Jakhau-Kutch.
AGENT: See "Cochin".

JAWAHARLAL NEHRU PORT (Nhava Sheva): 18.57 N. 72.58 E. **(See Plan)**

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked, and/or when vessel is required to anchor outside pilotage area, awaiting a suitable tide, as in the case of large bulk carriers/ container vessels.
DOCUMENTS: Agents to submit 'VIA' form prior to the vessel's arrival to Operations Department and Berthing Application to the Harbour Master's Office.
PILOTAGE: Compulsory for vessels of 100 n.r.t. and above.

Minimum of 24 hours advance notice to Agents and Harbour Master, JNPT, who can be contacted directly over telex installed in the Port Signal Station, and is manned 24 hours a day (Telex: 01177506 HM JP IN).

Jawaharlal Nehru Port Trust operates a VHF service on Channels 13 and 16 on a 24 hours basis, with the call sign "Jawaharlal Port Control".

In-bound vessels are required to contact "Jawaharlal Port Control" on Channel 13 and 16 to report ETA and receive instructions. Vessels must not proceed beyond Mumbai Floating Light without being instructed to do so.

Pilot will be embarked by means of a pilot launch with a black hull and white superstructure with the legend "Pilot" on the side, in position 1.8 miles South of Prongs Reef Lighthouse. The pilot launch is equipped with VHF Channel 13, radar and searchlight, and displays the usual pilot jack during daylight hours and pilot lights at night.

Whilst Jawaharlal Nehru Port Pilot will give instructions and communicate directly on VHF to incoming vessels, overall control of shipping at Jawaharlal Nehru Port/Mumbai Port, pilotage ground will rest with the Master Pilot/Port Control, working in conjunction with the Pronge Lighthouse, which maintains continuous VHF watch on Channels 12 and 16.

During the S.W. monsoon season, a long swell prevails at the port entrance, and the pilot launch may experience difficulties in coming alongside. At such times, Masters may be instructed to steam up to a position approximately one mile S.E. of Sunk Rock Lighthouse, where a better lee may be obtained. Masters will be advised which side to make a lee by the Pilot. During the early part of the S.W. monsoon, when the wind is South of S.W., the sea runs from the South, and Masters are advised to keep their ships heading East, when making a lee for the Pilot.
ANCHORAGE: *Outer Anchorage:* See "Mumbai".
Inner Anchorage: For the present, Jawaharlal Nehru Port does not afford any inner anchorage to vessels. However, one 500 m. diameter emergency anchorage with a dredged depth of 13.5 m. exists North of the container berth.
RESTRICTIONS: Maximum draft of vessel's for transiting through JNPT is 12.0 m. inward and 12.5 m. outward.
MAX. SIZE: Drafts in the common channel, JNP approach channel, bulk and container terminals are subject to dredging soundings and rise of the tide. These drafts are declared by the Harbour Master, JNPT, periodically. Vessels, intending to call at JNP and planning to load to the maximum permissible draft, should check at the time with the Harbour Master's Office.
HEALTH: See "Mumbai".
RADIO: See "Mumbai".
VHF: See 'Pilotage'.
RADAR: The port has no radar. However, one integrated VTMS service together with Mumbai Port is planned to be provided in the near future.
TUGS: 3 Voith Schneider tugs of 30 tons bollard pull. Tugs join vessel at the JNP channel entrance. Tugs lines are used. 2 mooring boats are provided for docking.
BERTHING: Separate berthing facilities available for the discharge of bulk cargo at the Bulk Terminal, and loading and unloading of containerised cargo at the Container Terminal.
CRANES: 2 Omega P&H mobile cranes with telescopic boom and capacities of 50 tons and 25 tons available for maintenance work.
BULK CARGO FACILITIES:
Bulk Terminal:
2 berths with total quay length 500 m.
Service Berth with quay length 212 m.
Depth alongside 12.5 m.
Maximum permissible ship draft at low water level: 12.5 m.
Discharge by shore equipment at both bulk berths.
Discharge can be done in Service Berth by ship's own gear.
No loading facility at present.
Cargoes handled:
Fertiliser (DAP, MCP, SOP, Borax).
Fertiliser raw material (Sulphur, Rock Phosphate).
Foodgrains.
Equipment:
Bulk Berth No. 1 is equipped with 2 grab unloaders.
Bulk Berth No. 2 is equipped with 2 continuous unloaders.
Maximum height of discharging gear above high water level: 60.80 m.
Maximum discharge rate: 12,000 tonnes/day (all equipment combined).
CONTAINER HANDLING FACILITIES:
Container Terminal:
3 berths with total quay length 680 m.
Depth alongside 12.5 m.
Maximum permissible ship draft at low water level: 12.5 m.
Discharge and loading by shore equipment.
Cargo handled: Containerised cargo.
Equipment:
3 rail mounted quay cranes, one in each berth. Two cranes working possible in each berth.
8 rubber tyred gantry cranes for yard operations.
1 rail mounted gantry crane for ICD operations.
38 tractors (prime movers).
136×40 ft. trailers.
Ro/Ro facilities available in container terminal. Presently, Maruti cars and other heavy vehicles are being exported.
STEVEDORES: Stevedoring work undertaken by port employees. No special agency. Both bulk and container terminals work 24 hours a day in 3 shifts, except holidays.
Shift Times: 1st shift: 0700 hrs. – 1500 hrs.
2nd shift: 1500 hrs. – 2300 hrs.
3rd shift: 2300 hrs. – 0700 hrs.

Overtime work is arranged on holidays, if necessary.

Average discharge rate for bulk cargo 8,000 tonnes/day (with all 4 appliances).

Average discharge rate for container cargo is 1,200 TEUs/day with all 3 quay cranes on a cellular vessel.
MEDICAL: Emergency medical facilities are provided at JNP. However, in serious cases, arrangements can be made for transportation and hospitalisation at Mumbai.
DENSITY: See 'Mumbai'.
FRESH WATER: Available at all berths.
FUEL: Diesel and furnace oil available at all berths. Bunkers provided from storage tanks belonging to BPCL.
FIRE PRECAUTIONS: Port Fire Service maintains 24 hours watch. Any fire/emergency must be immediately reported to Port Signal Station on VHF Channel 13, which operates on a 24 hour basis. All hot work to be carried out after obtaining Hot Work Permit from Port Safety Inspector. Tel: 306.
CONSULS: See "Mumbai".

REPAIRS/DRY DOCKS: See "Mumbai".
SURVEYORS: See "Mumbai".
GANGWAY/DECK WATCHMEN: Routine gangway/deck watch is the responsibility of the vessel's Master. Private watchman not envisaged as a port requirement.
HATCHES: Opening and closing done by ship's crew.
CUSTOMS ALLOWANCE: See "Mumbai".
CARGO GEAR: Load/discharge effected by shore gear.
Special beams available for handling O/H containers.
REPATRIATION: See "Mumbai".
AIRPORT: See "Mumbai".
TIME: See "Mumbai".
HOLIDAYS: See "Mumbai".
POLICE/FIRE/AMBULANCE: Police: Sheva Police Station, Tel: 364. Fire: JNP Fire Station, Tel: 306. Ambulance: Tel: 360, 346.
TELEPHONES: Arrangements are being made to provide telephones at all the berths.
IDENTIFICATION CARDS: See "Mumbai".
REGULATIONS: See "Mumbai".
GENERAL: *Hazardous Cargo:* At present, hazardous cargo in break bulk form is not handled in JNP. Except for Class 1 and 7, IMDG code hazardous goods of all IMO Classes are allowed to be landed/loaded in containerised form at JNP container berths.

In each case, Masters of vessels carrying dangerous cargo in containers must arrange to transmit Dangerous Cargo List, giving container No., IMO Class, Bay Plan, description of goods, UN Code No., to the Harbour Master of JNPT.

DEVELOPMENTS: Procurement of additional container handling equipment such as 2 quay cranes, 2 yard gantry cranes and 2 reach stackers.

Conversion of bulk service berth for import of phosphoric acid, edible oils, LPG and export of foodgrains. Expected completion by end of 1996.

Construction of two additional berths for container handling, enlargement of stacking area, enlargement of CFS, etc. Expected date of completion after 1996.

AUTHORITY: Jawaharlal Nehru Port Trust, Administration Building, Sheva Tal-Uran, District Raigad, Maharashtra, India. *Tel:* 7242301. *Telex:* 011-01313202, 011-84148. *Contact:* Captain R.Ramkumar, Harbour Master.

AGENT: See "Mumbai".

KAKINADA: 16.56 N. 82.15 E.

DOCUMENTS: *(a)* To be supplied by Master on arrival:
Ship's Register.
Safety Equipment Certificate.
International Load Line Certificate.
Derat Certificate.
Last Port Clearance.
ILH Dues Receipt, if coming from an Indian Port.
Crew List: 6 copies to Agents, 2 copies to Immigration Dept., 2 copies to Customs.
Customs Circulating Copy, if coming from another Indian Port.
Import Manifest of Stores (Stores List).
Private Property Statement of crew and officers.

(b) Master to sign following certificates, in prescribed forms, presented by Agents, on arrival:
Port Entry.
Port Clearance.
Customs Entry.
Customs Clearance.
Departure.
Health.

PILOTAGE: No pilotage.
ANCHORAGE: *Allotment of Anchor Berths:*
Masters of vessels calling at the Port of Kakinada should cable the following information to the Port Officer directly, 24 hours before their arrival off the Port:—
(a) ETA (Indian Standard Time)
(b) Total cargo for loading/discharging at Kakinada and nature of cargo.
(c) Hatchwise distribution.
(d) Declaration of hazardous, inflammable and explosive cargo.
(e) Declaration of vessels winches in good working condition.
(f) Draft Fore and Aft.

A specimen cable covering the above is quoted below:
"Port Officer Kakinada STOP Vessel XXX ETA Kakinada 22/10 0900 Local Time quantity loading 9,500 tonnes rice bran extractions hatch one 1,000 hatch two 2,000 hatch three 3,000 hatch four 3,000 hatch five 500 no hazardous inflammable explosives STOP All winches derricks good working condition draft fore 8 m. aft 9 m."

The above cable sent to the Port Officer (in addition to the cable sent to their Agents as per normal practice) will facilitate proper anchoring instructions from Port Authorities to the Master and avoid difficulties in Port operations.

Masters should also keep watch on VHF Channel 16 to receive instructions from Port Control and contact Port Control on arrival at the approaches to the Port.

Specific instructions will be given by the Port Officer on VHF through Port Control in respect of anchorage positions. When once anchored as above, Masters should not shift their position without specific re-anchorage position given by the Port Officer, unless in case of emergency in regard to the safety of the vessel.

Masters of vessels calling at this port are advised to be in possession of the latest navigation chart corrected up to-date. The Indian edition available is 3009 "Approaches to Kakinada Port" with an inset of Kakinada Bay.

Main engines should not be immobilised without specific permission from Port Authorities.

The Godavari Point (sand spit) is extending Northwestwards at a rate of about 170 ft. per annum and a port hand buoy (flashing red) 5 secs. is installed at the tip of the spit.

The holding ground anywhere in the anchorage is considered excellent (soft mud and sand).

MAX. SIZE: No restriction. Vessels any size can enter the port.
HEALTH: Masters have to send standard quarantine message not more than 12 hours and not less than 4 hours before arrival. Pratique will be granted by Port Health Officer basing on the quarantine message, which will be instructed to the Agents. Health inspection of the vessel will be carried out by the Port Health Officer at the earliest convenience. Vessels that have touched ports in the yellow fever endemic area within the last 30 days, should send the quarantine message at least 48 hours before the expected time of arrival.
RADIO: Radio stations are Visakhapatnam and Madras.
VHF: VHF radio station is in the Port Office (Port Control) on International frequency, Channels 16 and 12, communication from ship/Port control and vice versa. If ship requires communication on Channel 12, it should be advised in advance to prepare machine accordingly.

The Port control VHF functions round the clock at the following specified times:–

0045 to 0100 hrs.	1245 to 1315 hrs.
0345 to 0415 hrs.	1445 to 1515 hrs.
0545 to 0615 hrs.	1745 to 1815 hrs.
0745 to 0815 hrs.	1945 to 2015 hrs.
1045 to 1115 hrs.	2245 to 2315 hrs.

All times Indian Standard Time.

TUGS: There are 5 small tugs and 6 Pablo Boats for towing cargo lighters.
BERTHING: 1 wharf, length 300 m. 1 floating crane, capacity 50 tons.
CARGO LIGHTERS: There are 110 cargo boats with total capacity of 9,600 d.w.t. In addition 5 self-propelled mechanised barges each of 250 d.w.t. owned by the Port Authorities.

There are also available 6 mechanised barges each 240 d.w.t. owned by Central Island Water Transport Corporation Ltd., Calcutta.

STEVEDORES: Gangs engaged by party doing stevedoring work. In case of liners, Agents attend. In case of chartered vessels, consignees/shippers attend. Master to give ETA with number of hatches to be worked on arrival. Revised ETA to be sent whenever there is change.
MEDICAL: Government general hospital available with specialists. Private nursing homes also available with efficient physicians and surgeons. Agents arrange medical aid on advance advice. Being roadstead port, launches have to be arranged, hence advance notice of 6 hours necessary through signal station while in port.
DENSITY: Ranging from 1010 to 1025.
FRESH WATER: Of the 5 mechanised barges owned by the Port Authorities, 1 mechanised barge is used for supply of fresh water up to 200 tons. Privately owned self-propelled barge is also available for supply up to 100 tons. Prior arrangements to be made through Agents of vessels 24 hours in advance.
FUEL: No fuel suppliers. In case of emergency small quantities of 10/15 tons, in 205 litre drums, can be arranged from Visakhapatnam, duty paid.
CONSULS: None.
REPAIRS: No facilities. Only minor repairs to winches, welding work, casting and repairing spare parts.
GANGWAY/DECK WATCHMEN: Arranged by stevedores.
OPENING/CLOSING HATCHES: By ship's crew only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and Spirits: 16 oz. per head per week for those who are eligible for supply by ship.
REPATRIATION: Can be arranged.
AIRPORT: Visakhapatnam 105 miles, Madras 350 miles.
TIME: GMT plus 5.5 hours = IST.
HOLIDAYS: Charter Party holidays are observed. Work is done day and night. Port and Customs also work on holidays and out of office hours on payment of overtime. No work even on overtime payment on following days: Bhogi, Pongal, Kanumu. Optional holidays to labour on Chollangi Amavasya, in January.
POLICE/AMBULANCE/FIRE: Police 3052; Fire 101; Ambulance 3311.
SERVICES: Fresh and dry provisions available.
SHORE LEAVE: Shore permits given by Port Registration Officer (Immigration).
IDENTIFICATION CARDS: Required.
NOTARY: Available for noting protest.
DEVELOPMENTS: Development programmes include canal protection, transport facilities, navigational aids, power supply to loading/discharging points and stacking yards at shore and providing breakwater of 880 m. in length (sea wall) and mooring circle on the West side of the sand-spit known as Hope Island. The breakwater can be extended a further 3.2 km. Eastward for direct berthing of ships to serve long term needs of the port.

Deep water facilities to be built. 3 berths, 2 mobile cranes, 2 tugs, transit sheds and navigational aids will be available 1996.

AUTHORITY: Port Officer.
AGENT: See "Cochin".

KANDLA: 23.00 N. 70.12 E. (See Plan)

DOCUMENTS: To be submitted by Masters on arrival:

Customs: Crew List (3 copies).
Crew Private Property List – this should indicate all items they possess (3 copies).
Ship's Stores List (3 copies).
All valid documents of ship in English for verification of Customs Boarding Officer.
Port Maritime Declaration in duplicate.
Health: Valid crew health cards and Derat Certificate.
Agents: Stowage Plan, Cargo Manifest and Bills of Lading.

Boarding Pilot collects following documents:
4 copies Arrival Report.
4 copies Pilotage Certificate.
2 copies Crew List.

PILOTAGE: Compulsory. Pilot station situated Lat. 22° 49.5' N., Long. 70° 07' E. Loaded vessels can cross bar only during high water. Vessel to report at Pilot Station 2.5 hours before high water. Masters to keep Agents closely advised of ETA and anchoring time. 12 hours advance notice to be given by Agents for Pilot. No pilot ship or telegraphic address for Pilot Station (Outer Tuna buoy). Vessels can contact Kandla Tower through VHF Channel 16. Pilot station 16 miles away from port. During all weathers vessels have to anchor at above position and await Pilot.

Chart: Indian No. 2059 and 203.

Shipmaster's Report: On calling at Kandla, the Pilot advised that anchorage outside a 2 mile range from the Outer Tuna Buoy and the Pilot having to board there, increases the pilotage dues by 100 per cent.

ANCHORAGE: Vessels can anchor 1 mile S.W. of above anchoring position. Inside harbour, anchorages allotted by Port Authorities, and Pilots anchor vessels at suitable positions.

Vessels can however anchor more than 2 miles from Fairway Buoy but must pick-up Pilot within 2 miles of Outer Tuna Buoy.

RESTRICTIONS: Being a tidal port, entering and leaving of loaded vessels depends on tide, and loaded vessels can cross bar at entrance of channel only during high water. Night navigation has been introduced and is restricted to vessels up to 189 m. LOA and up to 8.23 m. draft.

Tankers bound for oil jetties are only handled during daylight hours.

Ships having speed of less than 9 knots through the water will not be moved in and out of the port of Kandla during hours of darkness.

Berthing and unberthing of ships at the moorings will be restricted to daylight only. Daily draft forecast for crossing Kandla Bar published at intervals by the Kandla Port Trust.

REGISTRATION: Report: August 1985.

On account of congestion a registration system has been introduced.

When vessel has arrived at the Outer Tuna Buoy and registered with the signal station she will be allowed to proceed to other ports.

It will be up to the vessel to ensure that she is at the Outer Tuna Buoy when her turn comes up.

MAX. SIZE: Max. overall length 740 ft. No breadth restrictions.

For oil tankers max. permissible overall length is 700 ft.

Draft according to water on the bar varies from 30 ft. year round, to 31 ft. (frequently), to 32 ft. (occasionally) and 33 ft. – 34 ft. (very occasionally).

Sogal Channel (Mid Channel) was commissioned in 1984 which has given additional draft of 3 ft. i.e. 14 ft. at Chart Datum.

Tides:

MHWN	5.71 m.
MHWS	6.66 m.
MLWN	1.80 m.
MLWS	0.80 m.
HHW	7.59 m.
LLW	– 0.40 m. (Below Chart Datum).

HEALTH: The Masters of all ships arriving at Kandla are required to send the Port Health Officer, Kandla (cable address "Sandgrodh") a wireless message embodying all applicable terms of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the International Code message, Masters are also required to give the following information in plain language:

(a) Whether there is any abnormal mortality of rats or mice.
(b) Whether there is any monkey on board.
(c) Whether touched or embarked at Aden or Djibouti any person.
(d) Names of all ports touched en-route within preceding 30 days, with dates of departure.
(e) Request for Radio Pratique.

Upon anchoring at Pilot Station, cable again "Sandgrodh" stating time anchored and requesting Radio Pratique.

In cases where the vessel has touched any yellow fever area within preceding 30 days it is necessary for Master to certify that all officers and crew/passengers on board possess valid yellow-fever certificates.

Present practice for granting Pratique is by radio or by Port Health Officer boarding vessels inside harbour.

If the Maritime Declaration is not in order, the Pilot refers the Master to the Port Health Officer who then boards the vessel and grants Free Pratique after his inspection of the vessel.

RADIO: Within a range of 800 km. off Kandla, vessels can contact Kandla Radio on call sign VVK. Before 800 km. off, Kandla can be contacted through Mumbai Radio only.

TUGS: 5 tugs. Port tugs join ships inside harbour off berth. Ship's wires used.

BERTHING: The cargo jetty provides 6 alongside-berths with total quayage of 4,725 ft. which can accommodate ships drawing up to 32 ft. loaded draft. The cargo jetty is served with 26 electric level luffing cranes, 20 of 3 tonnes, 5 of 6 tonnes and 1 of 10 tonnes capacity for handling cargo from ships.

3 mooring berths are available near the cargo jetty for vessels up to 600 ft. LOA and 25 ft. draft and vessels up to 500 ft. LOA and 24 ft.-26 ft. draft. In addition, there are separate moorings for *(a)* ships loading salt, max. LOA 600 ft. and max. draft 30 ft.,((b) deep draft mooring for ships up to 35 ft. draft and 740 ft. LOA.

The Bunder basin has 3 wharves, two wharves with transit sheds. The South wharf is served with 4 quay electric level-luffing cranes of 3 tons to 10 tons capacity for handling cargo from lighters. The North Wharf is for country craft. The West wharf is provided with a 60 tons capacity electric gantry crane.

Marine unloader with rated capacity of 350 tonnes per hour for discharging bulk fertiliser and its raw materials has been commissioned.

There is a back-up storage area of 30,000 tonnes. Automatic bagging and stitching machines are also available.

CRANES: 3 mobile cranes with capacity 3 tons – 20 tons.

Also see "Berthing".

STEVEDORES: Minimum 24 hours notice required for arranging stevedoring labour and gangs. Bulk fertiliser – average 650 tonnes per berth/day by conventional method. Grain – 850 tons. General cargo 250 tons per hook, subject congestion prevailing in sheds, wharves, warehouses and clearance, and on number of vessels working at particular period.

Cargo Operations:

1. At this port the unloaded/loaded LASH barges are towed by tugs which are subsequently discharged/picked up by LASH ships (operation suspended at present).

2. Regulations concerning the handling of dry-cargo are applicable to handling of cargo in barges.

3. Trucks can proceed alongside the berth and can park within the reach of the shore cranes. Cargo is loaded/unloaded from trucks directly on the wharf for shipment per vessel.

4. Forklift trucks are used to transport the cargo from the place of unloading to the stacking area and vice-versa.

5. Cargo on board the vessel is handled by Kandla Dock Labour Board workers. Packaged cargo on shore is handled by labour engaged by respective importers/exporters which are drawn from local market. Bulk cargo viz. fertiliser and wheat is handled on shore by departmental labour of Food Corporation of India

MEDICAL: Private Doctors' services available for vessels at berth. For vessels at Pilot Station or inner anchorages minimum advance notice of 12 hours and 6 hours respectively required. Very limited facilities of private practitioners. No hospital facilities. Inoculation and vaccination carried out by Port Health Officer (a Government body) – minimum 48 hours' notice required.

TANKERS: (Also see "Port of Vadinar"). Tankers with max. overall length of 700 ft., 40,000 tons displacement and 34 ft. draft permitted to berth. 3 main pipelines connected to tanks situated about 10 km. from berth, 2 generally used for white oils and one for black oil. White-oil pipelines diameter 12 in. and black-oil pipeline diameter of 16 in. In addition, one 8 in. diameter pipeline for soyabean oil, one 3 in. diameter pipeline for acetone and one 4 in. diameter pipeline for formaldehyde and one 12 in. diameter pipeline for Phosphoric Acid imported by Indian Farmers Fertiliser Co-operative Ltd.

Berthing of Ammonia Tankers at Tanker Berth No. 1 with loading/unloading arm but restriction depending on the position of manifold.

Shipmaster's Report: Tankers will sometimes be brought in to the port even though a berth may not be available at that time. Such vessel will then be moored to a mooring buoy close to the jetty, awaiting her berth at the tanker pier. Mooring to this buoy is effected by use of the vessel's starboard anchor chain, so that the anchor has to be disconnected from the chain before entering.

In securing alongside the oil-pier, tankers are required to utilise 1 insurance wire fore and aft (not supplied from shore). In addition vessel is required to use all her available ropes and wires owing to strong currents – 4 head-ropes, 2 breast-ropes, 2 springs.

DENSITY: Varies from 1020–1030.

FRESH WATER: Can be supplied through shore pipe alongside and by barges in the stream.

Shipmaster's Report: Water is very scarce and should be ordered at least 3 days prior arrival.

FUEL: Furnace oil (heavy oil) and light diesel oil can be supplied. Usually 12 hours advance notice required for bunkering. In event of oil tanker discharging at berth, bunker supply can only be commenced 18 hours after completion of discharge by tanker. Quantities up to 500 tons supplied by tank trucks, above 500 tons supplied through pipelines if berth vacant. However, any quantity can be supplied by tank trucks.

FIRE PRECAUTIONS: 3 sea water fire fighting pumps installed at oil jetty. These pumps are under charge of fire brigade officers and have adequate fire fighting equipment. A tug fully manned with fire fighting arrangements also available at short notice.

CONSULS: None.

REPAIRS: Minor repairs carried out. Chipping and painting work also carried out.

DRY DOCKS: A floating dry dock with lifting capacity of 2,700 d.w.t. to accommodate small craft up to 100 m. in length and 5.0 m. draft.

SURVEYORS:

G. P. Dave & Sons, Tel: 20288.
J. B. BodaMarine, & General Survey Agents Pvt. Ltd., Tel: 21693, 21946.
Metcalfe & Hodgkinson Pvt. Ltd., Tel: 21740, 20940.
Navark & Mareng, Mohan Bhuvan, Tel: 21123.
Seascan Services Pvt. Ltd., Tel: 20288.
S.G.S. Ltd., Tel: 21857.

GANGWAY/DECK WATCHMEN: All ships engage 2 watchmen round the clock at gangway. To look after mooring lines, 8 mooring men (4 each at fore and aft) are engaged round the clock.

OPENING/CLOSING HATCHES: Unless specified in relative Charter Party to contrary, ship's crew to accomplish this work.

SHIP CERTIFICATES:

Registration.
Safety Equipment.
Safety Radio and Telegraphy.
International Load Line.

CUSTOMS ALLOWANCES: 200 cigarettes per week per person. Wine and/or Spirit: 2 pegs of spirit per person per day or 4 pints beer.

Shipmaster's Report: Very strict Customs supervision, particularly in regard to declaration of foreign currency.

CARGO GEAR: Ships should possess valid Cargo Gear Certificates.

REPATRIATION: Adequate facilities available.

AIRPORT: Kandla Airport 20 km. from the port and an additional airport about 70 km. from port.

TIME: GMT plus 5.5 hours.

HOLIDAYS:

	Approximate Date
Republic Day	January 26th
Holi (Second Day)	March 10th
Chetichand	March 26th
Good Friday	April 9th
May Day	May 1st
Id-Ul-Fitr	July 23rd
Janmashtami	August 12th
Independence Day	August 15th
id-Ul-Azha (Bakrid)	September 28th
Mahatma Gandhi's Birthday	October 2nd
Dussehra	October 27th
Muhurram	October 28th
Diwali	November 15th
Diwali (New Year Day)	November 16th
Guru Nanak's Birthday	November 30th
Christmas Day	December 25th

TELEPHONES: Available for tankers and cargo vessels.

SERVICES: Tank cleaning by shore labourers. Tank washings and residue not allowed to be discharged in port area.

SHORE LEAVE: Possible.

Regulations: Photography in port area prohibited. No crew members allowed to take with them liquor of any kind ashore and not permitted to drink liquor outside port limit.

IDENTIFICATION CARDS: Required. See "Shore Leave".

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: There are 2 tanks at the Oil Jetty (400 tons and 250 tons) for waste oil, and the Port Authority has a tanker lorry for collection of waste oil.

SEAMAN'S CLUBS: The Seaman's Club is situated close to the port. International telephone calls can be made at the Post Office.

CURRENCY: Rupees.

GENERAL: Port equipped with 21 electric level luffing shore cranes of 3 tons to 10 tons capacity used for discharging all ships alongside cargo jetty. For discharging tankers with bulk grain port's vacuvators belonging to Food Corporation of India used.

Kandla port is a prohibited area where entry and exit are restricted to those persons having bona fide work only. Masters are requested to exercise a strict check at the gangway in order to ensure that only those persons with bona fide business to transact are allowed aboard. In the event that any unauthorised person is found to be aboard the vessel, this should be reported to port officials and the police on duty.

Masters are requested to advise their crew in advance of arrival at Kandla that photography within the port area is strictly prohibited, and it is suggested that all cameras should be left in the safe custody of the Master in order that crew members may not violate this regulation inadvertently and become involved in legal proceedings.

DEVELOPMENTS: Berths and bar continuously under dredging.

An additional berth (343 m.) has been constructed and will be commissioned in the near future. It will have a container freight station, storage yard and container handling facilities.

SHIPMASTER'S REPORT: May 1988.

1. Vessels can anchor any distance from the Outer Tuna Buoy but must rendezvous with the pilot vessel about 2 cables North of the buoy to take pilot.

   Arriving vessels picking up pilot must pass the Outer Tuna Buoy to starboard, then swing to port to give the pilot boat a good lee. (Pilot ladder rigged starboard side, 1 metre from the water.)
2. Communication through Kandla Tower for berthing instructions and pilot boat works on Channel 8. Kandla Tower calls on Channel 16, works on Channels 10 and 8.
3. No night berthing for loaded tankers.
4. Vessel anchored 2.7 miles from Outer Tuna Buoy with 5 shackles in water, good holding ground in sand/mud in very strong tides.
5. Vessel berthed at Oil Jetty No. 3, pilot reported that there is 32 ft. of water at low water.
6. Pilot reported that it was very rare for a tanker to be moored at a buoy in the river using anchor cable to buoy, but common for cargo ships awaiting berth or cargo.
7. Vessel used port anchor in river just after passing berth to swing (1 shackle in water) then, when turned, anchor is weighed to clear of the water.

   On approaching berth, port anchor is again used to control movement towards jetty. One tug assists, usually just pushing.
8. Normal moorings only required at this berth, 3 head/stern lines, 2 breast lines and 2 springs, one mooring boat employed.

   Special wires from either the ship or the shore not required.
9. At Oil Jetty No. 3 we used 2×8 in. flexible cargo hoses, max. pressure of 10.5 Bar, which gave a rate of 1,200 – 1,300 cu.m.p.h.

   Fresh water available ex-jetty, we gave Agent 3 days' notice and 100 tonnes was no problem, but we were told that this was the maximum at this time of year.
10. Tank washing for clean ballast possible alongside, but best to get written permission from the Harbour Master via the agent.
11. Officials required 5 copies of all usual documents.
12. Shore passes must be issued to all persons wishing to go ashore. No other identification required. Those going ashore must return to the vessel by 2230 hrs.

    Customs suggest all cameras locked away by Master as a precaution against possible illegal use.

    Town is 16 km. away, taxis and a bus (every 30 minutes) available at head of jetty.

    Foreign currency can be changed ashore at official places but a receipt must be obtained.

    Agent recommended that no watchmen be employed on board.
13. Unberthing at night costs more than normal daylight rate, also on the tanker berths a loaded tanker is unable to berth at night, so better to unberth during daylight.
14. One tug used unberthing, it does not make fast, normal unmooring using engine and heaving on anchor cable.
15. All Kandla buoyage in position, but lights not checked due to daylight movements only by this vessel.

    Pilot left vessel 1–1.5 miles North of the Outer Tuna Buoy, swinging to starboard to give lee for pilot ladder on the starboard side.
16. On leaving Kandla this vessel had to stop at sea (120 miles off) to clean lub oil coolers as they had become blocked quite badly due to sand and mud picked up in the Kandla River/creek.

Other details of vessel/cargo: Vessel in port 5 days. Cargo discharged: 24,431 tonnes diesel oil. Arrival draft 9.55 m. LOA 171.45 m.

SHIPMASTER'S REPORT: October 1993.

Charts: B.A. Charts No. 43, 672 (old) and 3466 (new).

Approach: Approaching Gulf of Kutch from S.W., the promontory of "Okhamandal" shows up well on radar with all Racons operating.

Buoyage fairly reliable in N.E. Monsoon. Local knowledge suggests that in S.W. Monsoon, buoys either withdrawn or become unreliable.

Tidal currents are strong, up to 5 knots or more with high swells in S.W. Monsoon.

Anchorage: Outer Anchorage: Near "Outer Tuna" Buoy in 10.0 m. to 12.0 m. Holding ground good.

Large swell in S.W. Monsoon.

We anchored in position Lat. 22° 48.9' N., Long. 70° 06.2' E. with 7.8 m. draft. Anchorage quite crowded.

Inner Anchorage: Under pilotage with tug assistance.

In Kandla Creek. From approx. Lat. 22° 58.5' N. to Lat. 23° 00.0' N. in deep water near Western shore, and Lat. 23° 01.5' N. to Lat. 23° 02.5' N. in deep water nearer Eastern shore. Usually about 5 shackles second anchor dropped to about 1 shackle on bottom between change of tides to steady vessel. During tide changes, this anchor is hove up 30 minutes before change of tide and let go again after vessel has completely swung and settled to tide.

Berthing delays are common and sometime at anchor seems to be inevitable.

Pilot: Now boards just S.W. of Buoys No. 2 and No. 3, not West of the Outer Tuna Buoy as indicated on chart.

There used to be a rule that if you anchored over 2 miles from the Outer Tuna Buoy, a double pilotage fee charged. Quite often, due to number of ships at anchor, it is impossible to anchor this close, also Kandla Tower gives vessel plenty of notice, so this rule no longer seems to be in force.

Kandla Tower gives out berthing information around 2100 hrs. and 0900 hrs.

No night berthings, at present, for any ships. This is partly due to the lack of pilots (4), and also the difficulty of berthing with the poor quay/jetty lighting.

Sailing of tankers not undertaken during darkness, but cargo ships can sometimes sail at night, depending on draft, and with prior arrangement.

Movement of tankers is governed by transit of Sogal Channel Bar during daylight.

We left Lower Creek Anchorage (opposite new container berth) at 0530 hrs. with 8.8 m. draft, about 30 minutes before H.W., crossing Bar on H.W. at dawn. Pilot advised me that this is the earliest a tanker can leave.

Pilots were very good. Two younger Pilots for the river and channel, and two more experienced Pilots for berthing and unberthing. Sometimes retired Pilots brought in.

Pilot cutter is a large steel craft with speed of 12.0 knots. The Pilot says it is good in S.W. Monsoon.

Kandla Pilots also work offshore terminal at Vadinar (to South West), which comes under Kandla port limits.

VHF: Kandla Tower on Channels 16 and 8 (officially 24 hours). During the early hours (12 to 4) not very responsive. Station comes to life around 0430 hrs. We made contact 45 miles away.

Signal Station: Pilots/VHF/radar from Signal Tower situated just North of General Cargo Wharves (23° 00.48' N., 70° 13.3' E.). Pilots advised that radar is not used.

Pratique: Radio Pratique if coming from a foreign port (as per ALRS/International Format). Kandla Radio (VWK) impossible to obtain. Send message via telex or telegram or via Agents. A sister ship reported that Pratique can be given on anchoring.

Channel: During S.W. Monsoon, outer buoys often drift out of position and are lifted and not replaced until N.E. Monsoon. In early October, Buoy No. 1 was missing. Pilots report every effort is concentrated in S.W. Monsoon in keeping Sogal Channel buoys in position.

Chart No. 672 (now withdrawn) does not reflect changes in Sogal Channel buoys and leading lights. Chart No. 3466 should show changes (not on board at time of visit). Pilots advise maximum draft 35 ft. (10.6 m.) on HWS. Bar is maintained by 2 dredgers constantly working at 4.5 m. Chart Datum.

We crossed on top of H.W. with a draft of 8.8 m. with 1.5 m. underkeel (echo trace) on tide height of 5.9 m. This was confirmed by our arrival draft crossing Bar at H.W., that 4.5 m. Datum is accurate.

Least depth just South of Buoy No. 11. All Sogal Channel Buoys lighted.

Kandla Creek, between Lat. 23° 01.6' N. and Lat. 23° 00.0" N., bottom of sand wave formation.

Kandla Creek is full salt water – 1026 obtained at various times. Pilots report no fresh water intake.

Kandla Creek Buoys No. 16 and 17 unlit. Leading lights ISO. 3 sec. and QW bearing 050° discontinued, although beacons still in position. Front leading light (QR) Lat. 22° 58.3' N., Long. 70° 15.7' E., has been doubled to give sector bearing 035° to 037°, basically 2 front leading lights (QR), side by side.

Tugs: 4 modern Kort Knozzle tugs of 32 tonnes bollard pull. All could do with some maintenance. Ship's lines used.

Berthing: Always berth into the tidal current. Generally no berthing 45 minutes either side of the turn of the tide.

Deeply laden ships generally have to anchor in the Creek for next tide before berthing and unberthing and proceeding alongside or to sea.

We berthed on the ebb at Oil Jetty No. 2 – port side to, and crossed the Sogal Bar at H.W., but due to Berthing Pilot's delay, insufficient time to berth before L.W. Likewise had to leave on ebb, so had to wait for next daylight H.W. before crossing Bar.

Offshore anchor let go to 4 – 5 shackles about 100 m. off berth.

One tug pushing was used.

Moorings were 3-2-2, each end. Head and stern lines (dependent on side to) to buoy South of jetty.

Mooring boat with large mooring gang provided.

On departure, we used anchor and stern tug.

Fenders are vertical hardwood bulks and are adequate.

Berth: 3 oil jetties available. No. 1 (North side), No. 2 and No. 3 (detached on South side).

Jetties No. 1 and No. 3 are capable of handling up to 75,000 d.w.t., depending on draft.

Jetty No. 2 can handle up to 40,000 d.w.t., depending on draft.

Jetties No. 1 and No. 2 are of concrete pile construction and require renovation.

Jetty No. 3 is of more recent construction (1989), and is a typical tanker "T" jetty of concrete with outlying mooring dolphins North/South and connected by catwalks.

Depths: No. 1 – 11.0 m. at C.D. (reported).
No. 3 – 10.0 m. at C.D. (reported).
No. 2 – Found by soundings round at L.W. – minimum 7.7 m. C.D., but generally 9.0 m. C.D. (See "Plan").

Gangway: Due to tide, only Regulation Brow type gangway can be used. Accommodation ladder must be turned in before berthing.

Cargo: Berths handle all products, except crude.

Jetty No. 1 handles ammonia for the fertiliser plant situated close North of berth. Also handles furnace oil and some chemicals.

Jetty No. 2 handles vegetable oils (particularly the export of castor oil), diesel oil and chemicals.

Jetty No. 3 handles furnace oil, diesel and some chemicals.

We berthed at No. 2 for the loading of castor oil, which comes from storage tank down 8 in. line to berth manifold, then 6 in. hose to vessel. Trucks also deliver direct into pipeline at tank farm.

When coming direct from storage tank, loading rate for castor oil is around 140 t.p.h. and from trucks as low as 50 t.p.h.

Heating instructions stipulate maximum temperature of 35°C, but cargo comes on board at up to 43°C. Protest required.

To clear line on completion of loading, a "Pig" used, which takes around 30 minutes.

Two surveyors live onboard, cabin required.

Allow 2 hours for paperwork on completion.

Agent signs Bills of Lading.

About 15,000 to 20,000 tonnes of castor oil is exported each month. It can also be loaded at No. 3 General Cargo Jetty by pipeline.

Chicksan arms on Berths No. 1 and 3, although not seen used during our 3 days at Berth No. 2. Ammonia is reportedly discharged by hose.

Fresh Water: Fresh water is piped to all jetties, and is often unavailable or in very short supply, which has happened in the dry season.

Water was rationed ashore during our call.

Medical: After many requests, Agent arranged for 4 crew members to attend a local doctor. Reports were reasonable.

Security: Maximum security required. Thieves roam around at night in high powered boats.

Gang thieving is rife as we learnt to our cost.

Watchmen not available. Agent reported that watchmen act in collusion with thieves, and he would not employ them.

Port Authorities are not interested, and in fact if thieving is reported, Customs will search ship and check Stores Manifest very carefully for any differences.

Authorities: We came from Mumbai and might just as well have come from a foreign port as a large amount of paperwork was required.

Basically boarding is by three different groups, and they require the following:

Customs:	"Rider" from Mumbai, containing all Mumbai entry papers. Mumbai Clearance. 2 copies Crew List. 2 copies Personal Currency List. Checked Bond and Resealed.
Immigration:	2 copies Crew List. Seamen's Discharge Books sighted. Issued shore passes to all crew (not required to be handed back).
Health:	Mumbai Health Clearance. Derat Exemption sighted. Galley and Storerooms visited.
Pollution:	Sights IOPP. Both Oil Record Books, the Noxious Substances Book not understood but stamped it.
Port Safety:	Safety Equipment Certificate.

Numerous forms to fill in, in fact more paperwork/forms in this port than in any other that I have visited.

The Authorities seem to be very hot on cameras, and photography is not allowed. I signed a form advising that cameras not allowed off vessel, but nothing checked.

General: Very busy at general cargo quays, all with cranes operating.

The new quay at the South end is open and operating for self-discharging container vessels. Pilots report 10.0 m. alongside.

Kandla City is about 10 miles away to N.W. over salt pans. Land around very flat.

Two local shops in Kandla Port area advertise onboard International telephone connections (U.S.$ 2.00 per minute to North Europe). Rickshaw ride from gate U.S.$ 4.00 return.

Noticed on way in and out that anchorage port of "Bedi Bandar" (22° 38'N., 70° 04' E.) was very busy and crowded. We heard several ships on VHF complaining that other ships were anchoring too close.

AUTHORITY: Kandla Port Trust, Administrative Building, P.O.Box 50, Gandhidham-Kutch, Gujarat, India, Pin. 370201. *Tel:* (02836) 20001, 20601. *Telex:* 105-208. *Cables:* Port Trust Kandla. *Contact:* Harbour Master or Deputy Port Conservator.

AGENT: See "Cochin".

KARWAR: 14.48 N. 74.06 E. (See Plan)

PORT LIMITS: *North:* A line drawn from Dayamada Point to Parker Rock.
East: Seashore of Karwar Bay from Dayamada Point to Badchidar Point 50 yards above high-water mark including Baithkol Cove, Kalinady and all branches thereof as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including all islands and thence to Mogera Guda Island (including Mogera Guda Island). All patta lands and other private sites excluded.
South West: A line drawn from Mogera Guda Island through Gudsav Sunv, Westernmost point of Mandal Island to Parker Rock.

DOCUMENTS:

8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists (if any).
4 Import Manifests.
Last Port Clearance.

PILOTAGE: The approach from Northward is between Oyster Rock Lighthouse and 2 front and rear leading lights on Simshigudda and Kurmagad Islands, respectively, in positions Lat. 14° 50' 11" N., Long. 74° 05' 43" E. and Lat. 14° 50' 33" N., Long. 74° 05' 59" E. Vessels approaching from Southward may enter between Oyster Rock Light and Karwar Head. Currents in bay are negligible. Ocean-going vessels are piloted by Departmental Port Officer who is a licensed Pilot. No pilotage charges at present.

ANCHORAGE: Anchorage for shallow draft vessels is with the Port Signal Station, bearing 120° (T), distance 1 to 2 miles, or Oyster Rock Lighthouse, bearing 278° (T), distance 2.5 miles in about 24 ft. to 28 ft. of water. Anchorage for deep drafted vessels is with the signal station, bearing 099° (T), distance 3 to 3.5 miles in depths of 38 ft. to 42 ft.

RESTRICTIONS: No entry restrictions. Karwar Bay may be entered on either side of Sunghiri Island, according to draft and anchorage taken as required. A vessel can enter Karwar either by day or night after having made lighthouse on Devghad Island.

MAX. SIZE: Any size of vessel can be worked as loading and unloading operation done in open sea. Depth at Outer Roads over 7 fathoms increasing accordance distance from land.

HEALTH: District Civil Surgeon acts as Port Health Officer. Free Pratique to incoming vessels from foreign ports granted by radio. All vessels calling from foreign destination must give radio message addressed "Civil Surgeon Karwar" at least 48 hours prior entering port giving last port of call, number of crew, health conditions, approximate time of arrival and requesting Pratique, same message must be repeated to Agents who obtain Pratique on shore. Anchoring time is Pratique time. For vessels calling from an Indian port, Pratique not required.

Vessels which have taken on board passengers or crew from yellow fever areas, within 30 days of departure from such ports will be under quarantine. Free Pratique will not be granted until such time as a mosquito search party, from nearest major port (e.g. Cochin, Goa or Mumbai) has inspected, disinfected and certified that ship is fit for granting Pratique.

Necessary for Owners or Masters to inform Agents well in advance in case of vessel arriving from yellow fever area to enable arranging of mosquito search party and quick Pratique.

RADIO: ETA and Pratique messages should be sent via Goa or Mumbai Radio as Karwar Radio has been shut down.

TUGS: No tugs necessary as vessels work in stream.

BERTHING: No berth, vessels work in open sea. Baithkol Cove is safe berthing place for lighters. Alongside wharves 10 to 12 smaller vessels can obtain safe berth with depth of 6 ft. to 8 ft.

Also see "Developments".

STEVEDORES: 48 hours notice ETA required order enable Agents advise shippers and stevedores to keep cargo and labourers ready. Main commodity export of ore. Mechanised barge loading operations in port. Ore loading rate up to 4,000 tons per day. General cargo 1,000/1,300 tons per day.

MEDICAL: Good hospital facilities exist. 2 hospitals about 1.5 miles from port. In case of inoculations and vaccination at least 2 days advance notice to be given enabling bring vaccine from nearby town (Hubli or Belgaum) distance 100 miles and 150 miles respectively.
TANKERS: No facilities for tankers.
DENSITY: 1025.
FRESH WATER: Dumb water barge for supply to vessels anchored in open Roadstead.
FUEL: No bunkering facilities for ocean-going vessels. Diesel and petrol storage depots within port for supply to small vessels.
OPENING/CLOSING HATCHES: Generally carried out by ship's crew.
CERTIFICATES:

Ship's Register.
Cargo Gear Certificates.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Vaccination and Inoculation Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits.
CARGO GEAR: Before commencement of loading, Master to present shippers or their Agents with valid International Cargo Gear Certificate, which shall not be more than 12 months old. Validity of said certificate to cover whole period for loading and discharging. Fourth five-year plan includes proposals for mechanical front-end loaders, tipping trucks, mobile cranes and forklift trucks.

A 10 ton mobile crane is available.
CONSULS: None.
REPAIRS: Moderate-sized workshop in town able carry out minor deck and engine repairs.
REPATRIATION: Shipping Master arranges crew changes and necessary repatriation. Crew signing off repatriated via Goa or Mumbai.
AIRPORT: No airport, or rail connections. Nearest airports Goa or Belgaum, 60 miles and 150 miles distant respectively. 2 flights per day to Mumbai from Goa.
TIME: GMT plus 5.5 hours. Permanent.
HOLIDAYS: Charter party holidays declared and published every year by Honorary Secretary of the Karnataka Chamber of Commerce and Industry, Jaya Chamaraj Nagar, Hubli-20.

Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).
POLICE/AMBULANCE/FIRE: Circle Police Inspector 116; City Police Station 33; District Superintendent of Police 7; Reserve Police Headquarters 18; Ambulance 19.
SHORE LEAVE: Crew members are allowed ashore provided not of Chinese nationality.
DEVELOPMENTS: Proposed to develop Port of Karwar into all-weather intermediate port, with 2 berths (the jetty 375 m. long) and 1 mechanical berth (ore berth, for vessels 40,000 d.w.t.), an approach channel and turning basin. Intended arrangements include ability accommodate up to 60,000 d.w.t. ore carriers, loading up to 8 million tons ore and 1.25 million tons other cargo per year. Also intended develop fishing harbour with facilities accommodate large-scale deep-sea fishing industry for 1 million tons fish per year. Also see "Cargo Gear".

Provision of Channel Marks:
1 Fairway Buoy.
10 channel marking buoys.
Provision of a mooring boat with equipment for maintenance of buoys.
Experimental dredging.
Dredging approach channel and turning basin.
Land acquisition for future expansion.
Diversion of present main road alongside port wharf.
Improvement of Binga/Karwar Road.
Provision of 2 berths and 1 mechanical berth for ocean-going vessels.

Main berth length 172 m., depth 9.75 m. and secondary berth length 122 m., depth 7.5 m.
AUTHORITY: Port Officer – Karwar, Port Office, Karwar, Uttar Kannada District, Karnataka State, India. *Tel:* Karwar 342: *Contact:* Port Officer, Karwar.
AGENT: See "Cochin".

MADRAS: 13.06 N. 80.18 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port are lines joining the following points:

A.	13° 07' 58.8" N.,	80° 17' 57.9" E.
B.	13° 09' N.,	80° 20' E.
C.	13° 09' N.,	80° 22' E.
D.	13° 03' N.,	80° 22' E.
E.	13° 03' N.,	80° 20' E.
F.	13° 13' 54" N.,	80° 17' 15" E.

DOCUMENTS:

3 Private Property Lists.
3 Stores Lists (Bonded Stores).
3 Crew Lists.
Last Port Clearance.
1 valid Derat Exemption Certificate.
1 Bill of Health (only if vessel has touched yellow fever areas).
3 Slop Chest Declarations.
3 Currency Declaration.
Passenger List (if applicable).

Ship's Papers:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Ship's articles (if vessel is Indian or Commonwealth flag).
Ship's papers to be handed over to Agent's Representative for final entry of vessel in Customs House. Same returned to Master.

PILOTAGE: Pilotage compulsory, both inward and outward, also for purpose of shifting inside harbour. Master required to advise ETA at least 24 hours before arrival, when local Agents contact Port Authorities for arranging berthing. If any berthing delay, vessel has to anchor at Outer Anchorage. Vessels requiring Pilot fly "G" flag by day and 1 white light exhibited on a conspicuous point on ship by night. For departure from berth, vessel must call for Pilot 30 minutes before readiness to sail.
ANCHORAGE: Vessels should anchor South of Latitude 13° 06' N.

Also see "Notice" – "Instructions to Ship Masters".
Wreck: M.V. "Decan Pioneer" sank on 11th November 1985 in position 13° 05' 52" N., 80° 19' 11" E. (Masts are visible).
RESTRICTIONS: No restrictions of entry, both day and night. In Bharathi Dock berthing of tankers more than 50,000 d.w.t. while in a loaded condition is undertaken only during daylight hours, unberthing of ships of all sizes whether loaded or light is undertaken at all times.

Also see "Notice".
MAX. SIZE: *Maximum Permissable LOA:*

North Quay – 540 ft. (164.6 m.)
West Quays – No restriction.
South Quay 1 – 710 ft. (216.4 m.)
South Quay 2 – 500 ft. (152 m.)
South Quay 3 – 518 ft. (158 m.)
South Quay 4 – 500 ft. (152 m.)
South Quay 5 – 450 ft. (137 m.)
East Quay – 540 ft. (164.6 m.)
Mooring No. 3 – 560 ft. (170.7 m.)

Outer Petroleum Berth: – 900 ft. (274.31 m.)
Jawahar Dock: Total available length 2,150 ft. (654 m.) on the East and West sides respectively with drafts up to 11 m. Breadth of Jawahar Dock entrance is 110 ft. (33.49 m.). It can accommodate vessel up to LOA 750 ft. (228.59 m.) and breadth 105 ft. (32.0 m.).
Bharathi Dock: Max. length 900 ft. (274.31 m.) and draft of 53 ft.(16.15 m.) for oil tankers using Bharathi Dock is in force. Ore berth accepts vessels with draft up to 53 ft. (16.15 m.)
Container Berth: Max. LOA 900 ft. Max. draft 42 ft.
Moorings: No. 3 – max. draft 35 ft.

Max. draft in the enclosed harbour varies from 26 ft. (7.92 m.) to 35 ft. (10.67 m.).

Details may be obtained from the Deputy Port Conservator, Madras Port Trust, Madras – 600 001.
HEALTH: All vessels arriving from foreign ports have to apply for Pratique through their radio – not earlier than 12 hours and not later than 4 hours before arrival. Pratique message to be addressed "Quarantine Madras" and worded as required by Port Health Authorities.

The Pilot boarding the vessel grants Free Pratique if the vessel is healthy in all respects – answer to all health questions being negative.

In all other cases or if vessel is coming from yellow fever infected area within 30 days of departure or in case of any infectious disease on board, Port Health Officer boards vessel and after due inspection grants Pratique.

Telegrams should take the following form: Name of vessel; ETA, in hours and date. No monkeys on board; answer to all health questions, (ports touched in last 30 days with departure dates). Request Radio Pratique.

Port Health require to sight Derat and Vaccination Certificates when vessel due to leave before issuing clearance for Pilot and Customs who then issue Port Clearance.
RADIO: Coast Station Madras Radio, call sign VWM. VWM operates throughout 24 hrs. Vessels with powerful transmitters can contact VWM on HF from Singapore, Mauritius or Aden. Information regarding weather distributed twice daily. VHF communication with Pilot Station available around the clock to transmit and receive berthing and other operational messages. Calling frequency Channel 16 and operating frequencies Channels 14, 12 and 10. Channel 12 is the port's working channel.

Weather Radar is installed on top of the new Madras Port Trust Administrative Office Buildings.

Also see "Notice" – "Instructions to Ship Masters".
RADAR/VHF: VHF communication available, see "Radio".
TUGS: Join vessel just inside breakwater. Vessels usually use own lines. Tugs' lines are also used if required by Pilot.
BERTHING: Vessels berth at all times.

There are in all 18 general cargo/bulk cargo berths and 1 mooring.

Dock/Quay	*Berth* No.	*Length* (m.)	*Depth* (m.)	*Cargo Handled*
Bharathi Dock	1	338.94	14.60	Oil
	2	222.00	16.20	Ore
	3	304.00	16.20	Oil
Container Quay	1	380.00	11.00	Containers
	2	220.00	11.00	Containers
North Quay	–	198.00	8.50	Passenger/General
West Quay	1	170.60	7.90	General
	2	170.60	9.20	General
Centre Berth	–	170.60	9.20	General
West Quay	3	170.60	9.20	General
	4	170.60	7.6 - 8.5	Fertiliser/General
South Quay	1	246.00	9.50	Fertiliser/General
	2	179.00	9.50	Fertiliser/General
	3	181.00	9.20	Ore/General
	4	184.00	8.50	Coal
	5	185.00	7.90	Coal
East Quay	–	157.00	7.90	Coal/General

Dock/Quay	*Berth No.*	*Length (m.)*	*Depth (m.)*	*Cargo Handled*
Jawahar Dock	1	218.33	10.06	Food Grains/General
	2	218.33	10.40	Ore/Coal/General
	3	218.33	10.06	Food Grains/General
	4	218.33	10.40	Ore/Coal/General
	5	218.33	10.06	Food Grains/General
	6	218.33	10.40	Ore/Coal/General

CRANES:
North Quay: 1×3 tons and 1×5 tons.
West Quay: 3×3 tons, 3×10 tons and 2×5 tons.
South Quay 1: 1×50 tons and 1×10 tons.
South Quay 2: 1×3 tons, 1×5 tons and 1×10 tons.
South Quay 3: 2×8 tons and 1×10 tons.
South Quay 4: 1×5 tons, 1×8 tons and 1×10 tons.
Jawahar Dock West: 7×3 tons, 1×5 tons and 4×10 tons.
Jawahar Dock East: 3×10 tons and 7×13 tons.
Jawahar Dock South wall: 3×3 tons.
One heavy duty floating crane of 120 tons available.

BULK HANDLING FACILITIES: There are 4 berths, 3 in the Jawahar Dock and 1 in South Quay. Handling of iron ore has been discontinued in Jawahar Dock due to the operation of mechanised iron ore plant at the Bharathi Dock. Instead bulk cargo like barytes is handled.

An iron ore berth with modern mechanical loading facilities is in operation at Bharathi Dock with an air draft of 17 m. and rated capacity of 8,000 t.p.h. The berth can accommodate vessels of 130,000 d.w.t. with a max. draft of 53 ft.

The Bharathi Dock has the potential for accommodating 2 more berths one of which can be converted into a container berth.

A breakwater has been constructed extending Northwards from the North end of the old breakwater to ensure tranquil sea conditions in turning circle of Bharathi Dock.

CONTAINER HANDLING FACILITIES: There are 2 container berths with a quay length of 600 m. and max. draft of 12.8 m. Four heavy duty gantry cranes of 35.5 tons – 40 tons capacity under spreader have been provided.

The container parking yard has a capacity for stacking 5,200 containers and is served by 4 rubber-tyred transfer cranes of 35.5 tons capacity under spreader.

5 top lift trucks for 20 ft. and 40 ft. containers.

The container freight station with an area of 6,300 sq. m. has been provided for stuffing and unstuffing operations.

40 reefer plug points for refrigerated containers are available with a standby generator for giving continuous power supply to reefer containers.

STEVEDORES: A copy of Manifest for stevedores' required on board.

Working hours: 1st shift, 0600 – 1400 hrs. (Recess 1100 – 1130 hrs); 2nd shift, 1400 – 2200 hrs. (Recess 1900 – 1930 hrs.); 3rd shift, 2200 – 0600 hrs. (Recess 0200 – 0230 hrs.).

Rate of Discharge/Loading:
Grains, by hooks/derricks:
Bulk: 300 tons per day per hook.
Bagged: 300 tons per day per hook.
By Vacs: 250 tons per Vac. per day.
Fertiliser: By hooks/derricks.
Bulk: 200 tons per day per hook.
Bagged: 300 tons per day per hook.
General Cargo: 150 tons per day per hook.
Liquid Cargo: About 150 t.p.h.

MEDICAL: Advance notice for medical aid useful if vessel anchored/anchoring outside and not coming alongside, as it takes time to arrange for launch, etc. Medical assistance arranged easily if vessel alongside. Various hospitals and private nursing homes with modern equipment available. All crew members to be in possession of valid health cards in respect of inoculations/vaccinations against cholera, etc. Facilities for renewal available.

BRIDGES: There are 2 bridges for pedestrian traffic only. 1 swing bridge at the entrance of Jawahar Dock and another Bascule bridge at the entrance of boat basin.

TANKERS: *Bharathi Dock – I:* B.D.I is equipped for handling crude, products and furnace oil. There are 5 marine loading arms of 12 in. diameter each. The rated discharge of each arm is 1,500 tonnes per hour. Three of these arms are earmarked for handling crude oil and all the three arms are connected to a 30 in. diameter pipeline. Two of the crude arms are also connected to the furnace oil pipeline having a diameter of 14 in.

The two product arms could be connected to either 14 in. diameter pipeline or to 20 in. diameter pipeline.

The present maximum permissible draft at the berth is 48 ft.

The berth is provided with fire fighting facilities consisting of remote control tower monitors, water curtains and fire hydrants, etc.

Bharathi Dock – III: There are 5 marine loading arms, out of which 3 are of 16 in. diameter and 2 of 12 in. diameter. The rated capacity of 16 in. is 2,500 tonnes per hour and that of 12 in. is 1,500 tonnes per hour. The distribution of the arms for handling crude, product and furnace oil are same as in B.D.I. These marine loading arms are fitted with hydraulic remote control quick connect and disconnect (QCDC) couplings.

The berth is provided with fire fighting facilities consisting of remote control tower monitors, water curtains and fire hydrants, etc.

B.D.III is equipped with quick release mooring hooks to facilitate casting off the mooring ropes by remote control,

The present maximum permissible draft at the berth is 53 ft.

Both berths are equipped with efficient communication system with main harbour.

Also see "Ship Operator's Report".

FRESH WATER: Available and can be supplied to vessels either through shore connections or by water barges (rate 40 t.p.h.). During Summer months due to scarcity of water, full requirements of vessel may not be possible.

DENSITY: Varies from 1019 to 1025 according to season. No variation due to state of tide.

FUEL: Heavy Oil, Marine Diesel Oil, High Flash High Speed Diesel Oil, conforming to the following specification limits are available from the Indian Oil Corporation Limited with 48 hours notice.

(1) Furnace Oil (Heavy Oil)	Viscosity 100° F	1500 seconds Redwood I
	or	180 C.St. at 50°C.
	Sulphur % by Wt.	4.5 maximum
	Flash point	66°C minimum
(2) Light Diesel Oil (Marine Diesel Oil)	Viscosity 100° F	2.5 to 17.0 C. St. (typical at 15°C. St.)
	Flash point	66°C minimum
	Sulphur % by Wt.	1.8
(3) High Flash High Speed Diesel Oil	Kinematic Viscosity	2 to 7.5 C.St.
	Flash point	66° C
	Sulphur % by Wt.	1

Lubricants – All the grades are available.

Note: Mode of Delivery – Heavy Oil by pipelines
Marine Diesel Oil/High Flash High Speed Diesel Oil by trucks.
No barge supplies.

CONSULS:

France	Tel. 472131	Sri Lanka	Tel. 476751
Germany	Tel. 473593/471747	United Kingdom	Tel. 473136
Japan	Tel. 665594	U.S.A.	Tel. 473040/478912
Russia	Tel. 71112		

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

DRY DOCKS: 1×40,000 d.w.t. and 1×5,000 d.w.t. Lifting capacities of 14,000 tonnes and 2,500 tonnes respectively.

SURVEYORS: Lloyd's Register, Bureau Veritas, Indian Register and ABS. Standard cargo and marine survey services available.

GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and they can be engaged from Dock Labour Board.

OPENING/CLOSING HATCHES: Work of opening/closing of hatches usually depends on what Charter Party says and also type of hatches of vessel. Liner Term Vessels:- "MacGregor Type" – These types of hatches are opened/closed by the crew; but, if Owners/Master desires, rigging gangs may be hired for this work at Owner's expense. Ordinary – beams & hatch boards or pontoon type-opening/closing of this type of hatches is done by stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes and half-ounce tobacco per week can be held by each crew member. Wine/Spirit: 1 open bottle of spirit or wine per week can be held by each crew member.

CARGO GEAR: Vessel should be in possession of valid cargo gear certificate issued by competent authority. Port Dock Safety Inspector may inspect cargo gear before or during loading/discharging in spite of vessel being in possession of a valid certificate.

REPATRIATION: All facilities for effecting crew changes and arranging repatriation exist.

AIRPORT: The Madras Airport (Meenambakkam) about 15 miles from harbour and served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Declared by authorities are observed, but work completely closed on: Pongul, Republic Day, May Day, Independence Day, Mahatma Gandhi's Birthday and Deepavali.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Can be placed on board, but only on vessels at certain berths. All berths on West Quay, i.e. WQ 1, WQ 2, Centre Berth, WQ 3 and WQ 4, North Quay berth and berths on Jawahar docks (West) only, i.e. JD 1, JD 3 and JD 5.

SERVICES: All services available.

SHIP SUPPLY SERVICE: Madras Port does not operate off-shore ship supply services either by the Port Authority or by private parties. However, certain private firms and individuals have been granted permits to ply their launches within the Port limits for the purpose of transporting ship's personnel, supply of provisions and stores for ships waiting at Outer Anchorage or for transporting sick crew members of ships.

SHORE LEAVE: Crew members allowed ashore after securing shore passes issued by Port Security Officer. However, they must restrict themselves to city limits.

IDENTIFICATION CARDS: All crew members should be in possession of their respective CDC's/Z. Cards/Passports.

GARBAGE DISPOSAL: Skips are provided at all berths and cleared daily. It is the responsibility of the ship's Masters to arrange to dump waste into these skips. Direct disposal of garbage from vessels to outside the port is also arranged by the ship's Agents. Details of charges and collection times can be obtained through Agents.

WASTE OIL DISPOSAL: A waste oil reception tank of 4,400 kl. is available at the Tank Farm located close to the oil berths for tankers. Similarly one 5 ton capacity tanker trailer is available for cargo ships. One small tank of 175 kl. in the Tank Farm is available to store sludge from tankers. Additionally, the port has a multi-purpose self-propelled barge, "Prestige", with 90 tons tank capacity to collect waste oil from ships.

SEAMAN'S CLUBS:
(a) Marine Club, Rajaji Salai, George Town, Madras 600 001. Tel: 510821.
(b) Seafarers' Club, Rajaji Salai, Opp. Reserve Bank, Madras 600 001. Tel: 562696.
(c) St. Mary's Church (Oldest church East of Suez), inside Fort St.George.

CURRENCY: Indian Rupee.

PORT REGULATIONS: Normal Port Regulations. No photograph allowed in harbour except with Chairman of Port Trust's permission.

WEATHER: *Bad weather and seasons in Madras:*

(a) Cyclone Period:

	15th April – 15th June	S.W. Monsoon
	15th October – 15th January	N.E. Monsoon
(b) Tropical Season:		
	1st December – 30th April	Load Lines are read accordingly.
Summer Season:		
	1st May – 30th November	

DELAYS: When there is heavy arrival of bulk grain and fertiliser, vessels may expect a delay of about a week or so.

DEVELOPMENTS: The Madras Port Trust have definite plans for the following scheme:

Madras Port is constructing a satellite port at Ennore, about 12 km. North of the present Port, mainly for import of about 8 million tonnes of coal per annum for the North Madras Thermal Power Station. This port is expected to be operational in 1998.

NOTICE:

Instructions to Ship Masters:

(1) No ship is allowed to enter the following area without a Pilot on board. This area is bounded by the following points:

(a)	Lat. 13° 06.4' N.	Long. 80° 18.7' E.
(b)	Lat. 13° 07.0' N.	Long. 80° 19.7' E.
(c)	Lat. 13° 07.4' N.	Long. 80° 21.7' E.
(d)	Lat. 13° 08.2' N.	Long. 80° 21.7' E.
(e)	Lat. 13° 07.5' N.	Long. 80° 18.5' E.

(2) Pilot Boarding Area No. 1 for ships less than 230 m. in length is marked by the following points:

(k)	Lat. 13° 06.5' N.	Long. 80° 19.6' E.
(l)	Lat. 13° 06.3' N.	Long. 80° 19.6' E.
(m)	Lat. 13° 06.3' N.	Long. 80° 19.9' E.
(n)	Lat. 13° 06.5' N.	Long. 80° 19.9' E.

(3) Pilot Boarding Area No. 2 for ships of 230 m. in length or more is marked by the following points:

(p)	Lat. 13° 07.2' N.	Long. 80° 21.6' E.
(q)	Lat. 13° 06.8' N.	Long. 80° 21.6' E.
(r)	Lat. 13° 06.8' N.	Long. 80° 22.0' E.
(s)	Lat. 13° 07.2' N.	Long. 80° 22.0' E.

(4) No ship is allowed to anchor within the Pilot Boarding Areas No. 1 and No. 2 without express permission from Port Control.

(5) Ships that are not berthing on arrival, should anchor South of Latitude 13° 06' N.

Instructions to Ships Approaching Madras Harbour:

(6) Ships entering the harbour should have enough stern power to check their headway within their own length.

(7) Ships embarking Pilot outside the harbour should have the pilot ladder rigged on the land side, irrespective of the direction of the wind.

(8) All ships entering, leaving or shifting in the harbour are required to have the following minimum ballasted draft:

LOA (ft.)	*Draft Forward* (ft.)	*Draft Aft* (ft.)
500	10	15
600	15	20
700	20	25
800	25	30
900	30	35

(9) Ships bound for Madras should contact Port's Signal Station on VHF Channel 16 as soon as possible and give the following particulars:

(a) Ship's name
(b) Nationality
(c) Name of Master
(d) Last Port
(e) Local Agents
(f) LOA
(g) Draft, Forward and Aft
(h) Summer Deadweight
(i) GRT
(j) NRT
(k) Nature of Cargo
(l) Hazardous Cargo, if any with I.M.D.G. Classification, and Quantity.

(10) *Instructions to Masters during bad weather at Madras Port:* Whenever a depression/cyclone is formed in the Bay of Bengal, the Meteorological Office sends out weather bulletins and the Madras Port Trust hoists storm signals at her Signal Station in accordance with these weather bulletins. During such conditions, Masters of ships inside the harbour are advised to contact the Port Signal Station on VHF Channel 16 for receiving the latest weather bulletins and any further guidance in this regard. They are also advised to immediately put out extra mooring lines. In addition to this, if they experience any ranging of their ships at their respective berths, they should contact the Port Signal Station immediately and have the ship's main engine ready. If the prevailing weather conditions so demand, the ships that are affected due to ranging at the berths would be taken out of the harbour.

Information regarding functioning of Madras Radio:

(11) (i) Calling/Watch keeping: VHF 24 hours on Channel 16 (156.8 MHz)
(ii) Passing messages by Madras Radio Channel 26
Transmission: 161.9 MHz
Reception: 157.3 MHz
(iii) On W/T Watch keeping: 500 kHz.
Transmission on 485 kHz.
Reception as per Ship's working channel.

SHIP OPERATOR'S REPORT: January 1987 (Updated 1992).

General: Madras is an artificial harbour on the coast of Tamilnadu State. Protected from sea and swell by 2 breakwaters, but is vulnerable to cyclonic weather. The oil berth is located in Bharathi Dock. The Madras Refinery receives crude from Bharathi Dock Oil Terminal.

Lube and non-flammable liquid cargo are also handled at West Quay No. 1/North Quay – which is also a general cargo berth.

All terminals and berths within the port limits are owned and operated by Madras Port Trust.

Communications: All traffic by W/T via Madras Radio (call sign: "VWN"). When within VHF range, communication with Madras Pilot can be established on VHF (Channels 16 and 14), which is located at the Port Signal Station.

Laden tankers should include in their initial ETA message: Deepest draft, actual displacement, cargo quantities, Shipper(s), Consignee(s) and name of local Agent.

The above information should be copied to:

1. Agent Madras.
2. Indian Oil Madras. Telex: 041-7168 for SR S & D Manager.
3. Indlub, Madras. Telex: 041-6345.
4. Indian Oil Bombay. Telex: 011-71656 for SR Shipping Manager.

ETA should be subsequently confirmed (or revised) 3 days, 2 days and 1 day prior to arrival.

Radio Pratique is permitted and the following information should be cabled to "Quarantine Madras", maximum 12 hours and minimum 4 hours prior arrival:

AAA Name of vessel and call sign.
BBB ETA Madras – local time.
CCC Maritime Declaration of Health has negative answers to all questions.
DDD No monkeys on board.
EEE Names and dates of ports visited within last 30 days.
FFF Ship healthy – request Free Pratique.

Approaches: When within VHF range, call "Madras Pilot" on Channel 16 stating ship's name, ETA and deepest draft. There are 2 waiting areas for Pilot which are clearly marked on the chart. The first waiting area is for ships over 11 m. draft and the second is for ships under 11 m. draft. If it becomes necessary to anchor, Madras Pilot will advise the anchorage position. The anchorage has good holding ground but is exposed to sea and swell.

Prior to the Pilot boarding, the pilot office will advise the vessel by VHF, at short notice, to proceed to the waiting area where the Pilot will board the vessel. Pilotage is compulsory. The pilot boarding area is about 1 km. to 1.5 km. seaward of Fairway Buoy.

The depth of water in the Approach Channels (1992):

Outer Channel = 19.2 m.
Inner Channel = 18.6 m.
Turning Circle = 18.0 m.
Approach to Berth
in Bharathi Dock = 17.7 m.

Permissible Draft and Length of Vessels: Oil tankers carrying crude and/or refined petroleum products normally berth at Bharathi Docks Berths I, II and North Groyne Mooring, while tankers carrying lube oil berth at West Quay I.

Oil tankers may berth at Bharathi Dock II, which is meant for loading of iron ore, if there is no vessel loading ore. Similarly, vacant container terminal berths can be used by tankers, but only for transhipment from mother vessel to daughter vessel and shore discharge for all products with flashpoint above 40°C.

The berth parameters and products handled are as follows:

Name of Berth	*Maximum size of vessel that can safely berth*			*Products handled*
	Length (m.)	*Beam* (m.)	*Draft* (m.)	
Bharathi Docks I (Exclusive Oil Jetty)	345	No restriction	14.6	Crude, fuel oil, MDO, naphtha, motor
Bharathi Docks II (Iron Ore Jetty) Oil tankers are handled at this berth when there is no iron ore vessel	345	No restriction	16.15	Regular and premium gasoline, kerosene Aviation turbine fuel, high speed diesel
Mooring (North Groyne)	210	No restriction	9.1	Fuel oil, MDO, premium gasoline, kerosene, aviation turbine fuel, high speed diesel
West Quay I/ North Quay	152.4	No restriction	7.9	Lube oil
Container Terminal Berth	330	No restriction	13.4	Lube oil

Bharathi Dock Oil Terminal: Bharathi Dock is an extension of old Madras Harbour, built mainly for the export of iron ore and import of crude oil. Berth I is located along the inside of breakwater in the form of "T" head jetty with 2 mooring dolphins each side of the berth. There are 2 berths – Bharathi I – exclusively for oil tankers and Bharathi II – designed for ore vessels but can be used by oil tankers, when the berth is vacant.

There is also a mooring berth for oil tankers inside the main harbour where vessels are secured with 2 anchors, and stern to the harbour wall/North Quay Breakwater.

Bharathi Dock I is also used for ship-to-ship transfer as well as for ship-to-shore transfer. Both operations are performed while alongside the dock.

General Cargo Berth Tanker Handling: The West Quay I/North Quay share a common facility which is connected to tanker with a 6 in. hose to receive lube.

AUTHORITY: Madras Port Trust, Rajaji Salai, Madras – 600 001. *Tel:* 560161 and 562201 (24 hours). *Telex:* 041-331. *FAX:* 044-561228. *Cables:* Porttrust, Madras. *Contact:* Deputy Port Conservator.

AGENT: G.A.C. Shipping (India) Pvt. Ltd., P.O.Box 1804, (141 Thambu Chetty Street), Madras 600001, India. Tel: (91-44) 5221588, 5222423. Telex: 418105, 418732 GAC IN. Cables: "Gacshipmas", Madras. Fax: (91-44) 5233074.

MALPE: 13.21 N. 74.42 E.

ANCHORAGE: The port is an open roadstead. Anchorage can be obtained at a distance of 0.81 km. N.W. of Daria Bahadur Ghur Island. Depth at Anchorage – 4.5 fathoms.

BERTHING: With the construction of two breakwaters, the channel in between is maintained at about 4.50 m. at LWOST. The maximum tidal range is 1.52 m.

Length of Jetties: 1st – 33.53 m. 2nd – 5.79 m.

FRESH WATER: Not available.

FUEL: There are oil storage depots in the Port area where HSD oil can be supplied to small vessels. For ocean going vessels there is no bunkering facility.

AIRPORT: Nearest at Bajpe (Mangalore).

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the Collector of Customs, Bangalore.

POLICE/AMBULANCE/FIRE: Malpe Police Station Tel: 21999 Udipi. Fire: Tel: 20333 Udipi.

BANKS: Syndicate Bank and Corporation Bank, Malpe P.O., Via Udipi, South Kanara Dt., South India.

GENERAL: There is a small shed for storage of cargo. Storm warning signals are hoisted on the flagstaff.

AUTHORITY: Port Office, Malpe, South Kanara Dt., South India. *Contact:* Mr. M. Devawas Shetty, Deputy Port Conservator, *Tel:* 20592 (Udipi).

MANDVI: 22.49 N. 69.21 E.

DOCUMENTS: Arrival: Arrival Report with ship's details, Voyage Memorandum, Crew Lists, Stores Lists.

Departure: Departure Report with ship's details, Export General Manifest, Certificate of Cargo Tonnage Loaded.

PILOTAGE: None. All vessels anchor in stream.

RESTRICTIONS: Vessels anchor in open roadstead in 3 – 5 fathoms, 2 – 2.5 miles from shore. Vessels of 9 ft. draft can reach wharves at HW and vessels drawing 12 ft. can reach Albert Edward Breakwater. Vessels having 750 tons cargo only can enter port during high tide. Highest tidal range 14 ft., average range 10 ft. Current 2 knots during fair season.

HEALTH: Government Medical Officer attends as Health Officer.

RADIO: No radio. All messages delivered through Kandla. Ship to shore radio messages delivered through VHF at stipulated times.

TUGS: Services optional. 3 tugs and 1 launch. Charges based on time and horse power.

STEVEDORING: Arranged by Agent with Port Authority.

MEDICAL: 24 hours notice required of any medical requirements.

FIRE PRECAUTIONS: Fire extinguishers are available at the port. Fire fighter is available at the Port workshops. Smoking strictly prohibited in port area.

WATCHMEN: Arranged through Agents.

HATCHES: Opened and closed by crew.

CERTIFICATES: Non-carriage of dangerous cargo, Cargo Gear Certificates, Statement that no passengers carried.

CUSTOMS ALLOWANCES: No restrictions for crew of coastal vessels. Stocks of tobacco, wine and spirits to be declared to Customs. Wines and spirits prohibited in Gujarat States but Master permitted daily quota by Customs Authorities.

REPATRIATION: No facilities.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Usually possible to arrange work on holidays.

POLICE/AMBULANCE/FIRE: Police 8; Ambulance 32; Fire 10.

SHORE LEAVE: Crew of coastal vessels only allowed ashore subject prior permission from Captain of the Port.

DELAYS: Delays to be expected in supply of cargo at times of lowest water.

GENERAL: Gulf of Kutch Ports, viz. Mandvi, Mundra, Jakhau and Koteswar administered by Chief Executive Officer and Vice-Chairman, Gujarat Maritime Board, Ahmedabad. Mandvi located on Southern coast Gulf of Kutch at mouth of River Bukmavati, seasonable, tidal and intermediate ports.

AUTHORITY: Office of the Deputy Executive Engineer (Civil) and Port Office, Mandvi-Kutch, Gujarat Maritime Board, Mandvi-Kutch, India 320455. *Tel:* 33 (Office), 40 (Residence). *Cables:* Portal Mandvi-Kutch. *Contact:* Port Officer, Mandvi-Kutch.

AGENT: See "Cochin".

MANGALORE (Minor Old Port): 12.50 N. 74.50 E.

PORT LIMITS:

North: A line drawn due West from the Northern boundary pillar on the seashore about 740 yards from Sultan's Battery to 9 fathoms of water.

South: The line drawn due West from the Southern boundary pillar to the seashore, about 1,000 yards below the marine yard to 9 fathoms of water.

West: The 9 fathom line between its intersections with the lines above defined as the Northern and Southern limits.

DOCUMENTS:

Crew Lists (6 copies).
Crew's Declarations for Customs (4 copies).
Stores Lists (4 copies).
Currency Declaration (2 copies).
Import Manifest, inclusive of Deck Cargo and bottom cargo (3 copies).
Bill of Lading (1 copy).
Ship's particulars inclusive of service stand (2 copies).
Declaration of opium, dangerous drugs, gold, arms, ammunitions and explosives, monkeys on board, last and next port of call (2 copies).
Valid Safety Equipment Certificate.
Valid Construction Certificate.
Valid Radio Certificates.
Valid Certificate of Registry.
Derat Certificate.
Vaccination Certificates.
Declaration of Health.
Arrival Report and Port and Light dues receipts (2 copies).

PILOTAGE: Compulsory. ETA must be informed at least 48 hours ahead of arrival. In the message of ETA the following information must be included:

(a) Name.
(b) Nationality.
(c) Call sign of the vessel.
(c) LOA (draft, forward and aft), g.r.t. and n.r.t. of the vessel.

ANCHORAGES: Open roadstead. Vessels anchor in 7.32 m. to 10.98 m. due West of entrance and are loaded and discharged by lighters. Bar situated due West of entrance. Depth of bar 2.13 m. LWST.

RESTRICTIONS: No night pilotage.

HEALTH: Vessel arriving from foreign country sends radio message in code or otherwise to respective Agents who contact Port Health Officer accordingly. If vessel from yellow fever area, Master should give prior notice to Agent to arrange for Mosquito Party from Cochin to come to Mangalore and board ship on arrival. If suspected or infected, vessel should anchor not less than 0.5 miles from all other vessels and notify Port Authorities of situation either by radio or through signal station.

RADIO: Call sign VWL on 500 kHz and 438 kHz working frequency. Tel: 24300.

TUGS: 1 Port tug (210 h.p.) and 1 launch and 2 private tugs capable of towing over 600 tons each are available.

CRANES: 1×1 ton and 1×5 tons. 1×18 ton mobile crane.

STEVEDORES: Stevedores available. Average loading/discharging rates per day:

(a) Iron ore 400 tons per hook (weather permitting).
(b) Fertiliser or wheat bags 200 tons per hook (weather permitting).
(c) General cargo bagged 200 tons per hook (weather permitting).

MEDICAL: 24 hours notice necessary to arrange for a doctor on board. Government Hospital and Nursing Homes available.

DENSITY: Density of 1022/3 throughout year, except in September (immediately after Monsoon at beginning of shipping season) when density about 1016.

FRESH WATER: Supplied by water barge at rate of 100 tons per trip with 48 hours prior notice. Cost of supply inclusive of all charges except crew overtime on holidays. Minimum order 35 tons.

FUEL: Not available.

CONSULS: None.

REPAIRS: Minor repairs to engines and gear carried out by auto-workshops.

DRY DOCKS: Small dry dock, maximum capacity 450 d.w.t. Dimensions, 110 ft.×30 ft. Depth on sill 8 ft. at MHWS. For minor repairs only.

SURVEYORS: Qualified Cargo Survey Agencies are available.

Surveyors available for Lloyd's Register, American Bureau, Bureau Veritas, etc.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CERTIFICATES:

Ship's Registry.
Derat Certificate.
Articles of Agreement.
Dock Safety Register (cargo gear).
Radio Telegraphy Certificate.
Load Line Certificate.
Port Clearance from last port.
Bill of Health.
Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 50 grams tobacco per week. Wine and spirits: 950 ml. per week.

CARGO GEAR: Derricks and boat devices to be hoisted in when not required to prevent contact with masts and sailyards of lighters alongside. Advisable that lifeboats be lowered only on non-working side.

REPATRIATION: Can be arranged by ship's agents or at shipping office for Indian crew.

AIRPORT: Bajpe – 20 km. away. Daily air service available to Bombay to connect with international flights.

TIME: GMT plus 5.5 hours.

HOLIDAYS: 26th January, Republic Day; 15th August, Independence Day; 2nd October, Gandhi Jayanthi; and other local holidays declared by the Central Government.

POLICE/AMBULANCE/FIRE: Tel: 100/102/101 respectively.

EMERGENCY CO-ORDINATION CENTRE: Relay information to Port's Signal Station through New Mangalore Port. VHF also available at Port Signal Cabin.

TELEPHONE: No arrangement for placing telephone on board.

BANKS: State Bank of India, Main Branch, Mangalore 575 001.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Shore passes are issued.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

DELAYS: Adverse bar conditions necessitate stopping work for bad weather.

GENERAL: *Weather:* During monsoon, mid-May to mid-September no communication with shore and port is officially closed. There is an All Weather Major Port at Panambur (New Mangalore Port) 9 km. North of roadstead.

Tides: Range of tide 1.22 m. to 1.52 m.

Lighters: Approximately 25 lighters are available with average capacity of 45 tons each and 3 motor launches. Depth at quay 2.44 m. LW.

AUTHORITY: Captain R. Mohan, Port Officer, Old Mangalore Port, Mangalore 575 001, Karnataka, India. *Tel:* 420374 (personal), 425031 (residence).

Sri H.S. Nagaraja, Port Engineer, Old Mangalore Port, Mangalore 575 001, India. *Tel:* 420814 (personal), 421229 (residence).

AGENT: See "Cochin".

MORMUGAO: 15.25 N. 73.47 E. (See Plan)

PORT LIMITS: Roughly up to 10 fathom line running North and South from Cabo to Grand Island. Vessel is considered "arrived vessel" when she comes under direction of Signal Station.

DOCUMENTS:

10 Crew Lists.
10 Passenger Lists, if any.
3 copies of Manifest.
Last Port Clearance.
1 Bill of Lading in case of imports.
3 Stores Lists.
3 Personal Property Lists.
1 Letter of Authority to Agents addressed to Asst. Collector of Customs (prepared on arrival).
1 Arrival Report to Immigration Officer.
1 Customs Declaration.
1 Inward Clearance Certificate.
1 List of Particulars.
1 Deck Cargo Certificate.
1 Arrival Report.

Last 7 items to be signed by Master in port after arrival.

Ship's papers: Documents placed at disposal of port:

Ship's Registry.
Derat Certificate.
Safety Equipment.
Load Line.
Radio Telegraphy.
Indian Light Dues.
Annual Cargo Gear Certificate.
Safety Construction Certificate.

PILOTAGE: Compulsory. ETA required at least 48 hours before arrival to order Pilot. Call Pilot by VHF Channel 16, preferably 6 hours before arrival, with subsequent amendments up to 1 hour before arrival.

Pilot launch shows the Pilot flag. In fair weather Pilots board West of Entrance Buoys. In bad weather, Pilots guide vessel from launch until boarding possible. Pilot launch leaves from Inner Harbour with Pilot and is not stationed at any particular position. International Regulations for Pilots' ladders applicable. Vessels awaiting Pilot may anchor 2 miles to 4 miles West of the breakwater lighthouse, depending on arrival draft.

RESTRICTIONS/MAX. SIZE: Pilotage around the clock during the fair weather season (October – May). Draft restricted. Deep-laden vessels await high tide. Max. draft permissible 13.0 m. (with tide).

Draft particulars in fair weather season for various berths as detailed below.

Berth No.	*Max. Draft* (m.)	*Max. Length* (m.)
5*	8.50	152
6*	6.00	200
7	3.00	85
8	12.50	260
9	13.00	305
10	10.00	203
11	10.00	203

Vessels loading West of breakwater in fair weather: No restriction on size or draft.

*These berths are to be decommissioned shortly for construction of new cargo berths No. 5A and 6A. The berths will have a total berthing length of 450 m. and a depth of 11.0 m.

HEALTH: International Regulations apply. Pratique automatic when calling from another Indian port. Pratique granted by Port Health Officer by radio. Telegraphic Pratique can also be obtained from Port Health Officer cable address "Quarantine Mormugao".

Master should send quarantine message 48 hours prior to arrival indicating:

1. Name of ship.
2. Expected date and time of arrival.
3. My Maritime Declaration of Health has negative answers to all 6 Health Questions or ZT or My Maritime Declaration of Health has a positive answer to question (indicated by complements) or ZU (indicated by complements 1 – 6).
4. List of ports of call with dates of departure during last 30 days.
5. Have or have not monkey on board.
6. Have or have not any person on board embarking at Aden, Djibouti or Yemen.

Request Radio Pratique.

RADIO: Goa Radio, call sign VWG. Operating continuously on 500 kHz, 417 kHz, and 2182 kHz. Communication range 100 miles.

VHF radio telephone station at headland signal station, call sign Goa Port, calling Channel 16, working Channels 11, 12, 10 and 14 (24 hours). Port VHF station attracts attention of desired ship by light signalling, when VHF is inoperative.

VHF service restricted for port operation, ship's emergencies and movements. All messages to be addressed to Harbour Master. Third party communication not allowed.

TUGS: 3 tugs available with 30 ton bollard pull. Tugs usually used inside breakwater. Normally push, but when towing, use ship's lines or tug's lines.

BERTHING: Deep loaded incoming vessels berthed 2 hours before HW. Vessels also use anchor and quarter line to mooring buoy to keep off berth.

Berth No. 10: New multi-purpose general cargo berth. Length 250 m. Depth alongside 11.0 m.

BULK HANDLING FACILITIES: *Ore Berth (Berth No. 9):* Provided with a mechanical loading plant of a rated capacity of 8,000 tonnes/p.h. The facility, presently capable of fully loading 60,000 d.w.t. vessels is designed to cater for 100,000 d.w.t. vessels after further dredging of entrance channel, turning circle and berth. Vessels of up to 325 m. length are being part-loaded alongside the berth up to a draft of 13.0 m., and then topped-up at anchorage by transhippers which are capable of loading around 20,000 tonnes a day (loading rate at the berth varies from 60,000 – 90,000 tonnes per day). The channel is presently dredged to −13.7 m. and berthing basin to −13.1 m. Synthetic ropes only to be used for mooring at Berth No. 9.

Ore Transfer in Stream: Carried out between October and May (fair weather). Vessels are loaded or topped-off to a draft of 20 m. Four transhippers available with loading, rates 950 t.p.h. – 3,000 t.p.h.

STEVEDORES: Original ETA of 48 hours and a definite ETA of 24 hours required and Master should indicate stowage and gangs required before arrival, also how derrick booms must be arranged so as to enable stevedores to arrange same on arrival.

MEDICAL: Hospital facilities for any serious sickness and port ambulance is available around the clock.

TANKERS: Discharge line 35 cm., using 8 in. reducers. No loading facilities. Permissible draft in fair weather 12.5 m. at Oil Berth No. 8. Max. LOA 260 m. Discharge facilities at Berths No. 4 and No. 5 for MEG and caustic soda lye and loading facilities for molasses. Depth 8.5 m. (with tide).

DENSITY: Salt water 1025 – slightly fresh during monsoon season.

FRESH WATER: Available alongside berths also from 200 tons capacity barge. Pumped by hose at 20 t.p.h. at berth, and 30 t.p.h. from barge. Sometimes restricted to 50 tons maximum if supply is limited.

FUEL:

Grades		*Viscosities*
High speed diesel oil		Less than 45 Redwood
Light diesel oil		41 ,,
Furnace oil (also known as light fuel oil)	of	623 ,,

48 hours advance notice required.

FIRE PRECAUTIONS: During discharge of oil tanker, great care taken that no naked lights are visible nearby. Movements of unauthorised persons at point of discharge strictly restricted. Ships alongside or up to a distance of 100 ft. are advised not to emit smoke through funnel. Round the clock standby duty carried out by Fire Service, around tanker, till completion of cargo discharge.

REPAIRS: A private floating dry dock has been established in place of decommissioned Berths No. 1, 2 and 3, and major repairs to vessels up to 200 m. LOA can be carried out.

DRY DOCKS: Floating dock available.

GANGWAY/DECK WATCHMEN: Necessary to have watchmen in case of loading general cargo to protect goods. In case of loading iron ore no watchman required.

OPENING/CLOSING HATCHES: Usually by crew, unless contrary to Charter Party.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per crew member per week. Wine and/or Spirit: 4/5ths of bottle per week for each member of European crew. 2/5ths of bottle per week for each member of Asian crew as per practice.

CARGO GEAR: Certificates to be valid.

REPATRIATION: Facilities exist for changing and repatriating crew.

AIRPORT: Approx. 7 km. from harbour. One local flight daily to Mumbai. No international flights from Goa and all outgoing foreign passengers have to be repatriated via Mumbai.

TIME: GMT plus 5.5 hours.

HOLIDAYS: New Year's Day, Republic Day, Gudi Padva, Good Friday, May Day, Id-Ul-Fitr, Independence Day, Ganesh Chaturthi, Mahatma Gandhi's Birthday, Idu's Zuha, Diwali, Muharram, Feast of St. Francis Xavier, Goa Liberation Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 2234 through Postal Exchange; Ambulance (Health Centre) 2454 through Postal Exchange; Fire 222 or 223 through Port Exchange and 2300 through Postal Exchange.

TELEPHONES: No arrangements for installation of telephones on board.

SHORE LEAVE: Crew members allowed to go on shore with Police landing pass.

IDENTIFICATION CARDS: Not essential but according to Immigration Rule temporary Police landing pass issued to each crew member going on shore, valid for municipal area of Vasco town; if valid passport is possessed.

GARBAGE DISPOSAL: Bins and garbage truck are provided alongside as and when required. Charges included in pilotage fees.

WASTE OIL DISPOSAL: Agents can make arrangements to collect oil. Pontoon available for bilge water collection.

SEAMAN'S CLUBS: None. Usual local facilities.

AUTHORITY: Mormugao Port Trust, Mormugao Harbour, Goa, India 403803. *Tel:* 512725, 512499. *Telex:* 0191-219, 0191-256. *FAX:* 0834-513065. *Cables:* Harbadmin Mormugao. *Contact:* Captain V.S. Gopinath, Deputy Conservator. Captain B. Gomes, Harbour Master.

AGENT: See "Cochin".

MULDWARKA: 20.45 N. 70.40 E.

SHIPMASTER'S REPORT: January 1995.

LOCATION: Lat. 20° 45.2' N., Long. 70° 39.8' E., about 19 nautical miles E.S.E. of Veraval (Refer to B.A. Chart No. 1474).

DOCUMENTS:
6 copies Crew List.
2 copies Crew Private Property List (The list should indicate all items possessed by crew, including all currencies).
3 copies Ship's Stores List.
Clearance from Last Port.
All Safety Certificates.
Ship's Register.

PILOTAGE: Not available.

ANCHORAGE: Anchorage port. This vessel, a 42,025 tonne handymax bulk carrier, drawing 11.45 m., anchored about 1.7 miles W.S.W. of breakwater in a depth of about 20 m.

The port has a shallow water private berth owned by Gujarat Ambuja Cements Ltd. (GACL). It is used for loading cement and cement clinker in to barges. Loading is done at anchorage from these barges, using ship's gear. We were able to obtain a load rate of 5,000 tonnes per day, using 4 cranes fitted with grabs with capacity of about 9 cu.m.

HEALTH: Master should send message through Agent 48 hours in advance with all information as required for port of Kandla.

RADIO: As there is no local port office, all notices, etc., are to be sent through the local Indian Agent, who tenders same on vessel's behalf to the concerned authorities.

VHF: GACL normally operate on Channel 71. Range 4-5 miles. Call sign "Gujarat Ambuja".

RADAR: Breakwater paints clearly on radar on 3 mile range.

BERTHING: See "Anchorage".

STEVEDORES: Normally work round the clock, provided the cargo barges are alongside.

MEDICAL: One private hospital at Ambujanagar, about 9 km. from breakwater.

DENSITY: 1024.

FRESH WATER: Difficult to obtain. However, small quantities can be obtained through cargo barges, provided vessel can use its own pump to take in the water.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMAN: Not required.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: See "Kandla".

REPATRIATION: Possible.

AIRPORT: Nearest airport at Rajkot, a distance of 250 km. (4 hours by road). There are daily flights to Mumbai for international connections.

TIME: GMT plus 5.5 hours.

SHORE LEAVE: Very difficult for foreign nationals as there is no Immigration Office at the port. However, same can be obtained through Customs by giving good advance notice.

GENERAL: Shipchandler available.

MUMBAI (Bombay): 18.56 N. 72.49 E. (See Plan)

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked and/or when vessel is required to anchor outside pilotage area awaiting a suitable tide, as in the case of large tankers.

PILOTAGE: Pilots will board in approximate position Lat. 18° 51' N., Long. 72° 49.5' E., from a white pilot launch with the legend 'Pilot' on either side.

A radar equipped Vessel Traffic Management System is likely to be in operation in the near future.

Minimum 24 hours advance notice to Agents and Harbour Master, Mumbai, through Mumbai Radio (VWB).

Mumbai Port Trust operates a VHF service with the following call: "Prongs" on Channels 16 or 12, Port Signal Station on 12. VHF Channel 14 used as a change over channel.

(1) "Mumbai Port Signals" for Harbour Control, Port Signal Station and Prongs Lighthouse.
(2) "Jawahar Dweep Island" for Marine Oil Terminal.

Inbound vessels are required to contact Harbour Control/Prongs Lighthouse on Channel 16 to report ETA and receive instructions.

It is compulsory for all power driven merchant vessels of over 200 tonnes to have a Pilot on board to proceed North of Pilot Cruising grounds. Such vessels may not enter, leave or shift berths in this area without a Pilot or Harbour Official on board.

Pilots now embark/disembark inbound/outbound vessels only from/in a pilot launch usually painted white with the legend 'Pilot' on the side. During the S.W. monsoon season a long swell prevails at the port entrance and it is imperative that vessels should give a proper lee, as the pilot launch may experience difficulties in coming alongside. During such times, Masters will be advised which side to make a lee by the Pilot vessel. During the early part of the S.W. monsoon, when the wind is South of S.W., the sea runs from the South and Masters are advised to keep their ships heading East when making a lee for the Pilot.

DOCUMENTS:
Ship's Register.
International Load Line Certificate.
International Safety Radio Certificate (Telegraphy).
International Safety Radio Telephony Certificate.
Derat Certificate.
International Safety Equipment Certificate.
Port Clearance from last Port.
Indian Coast Light Dues Receipt (if any).
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Through Cargo Manifest.
4 copies of Stores List.
1 copy of Cargo Manifest with Bill of Lading for the same.
4 copies of Opium and Dangerous Drugs Certificate.
Cargo Plan.
Cargo on Deck Declaration.
4 copies of Certificate of Foreign Currency.
4 copies of Certificate of Arms and Ammunition.
Letter to Assistant Collector of Customs regarding Local Agency.
Letter to Assistant Collector of Customs regarding Duty on Ship Stores.
Application to Inspector of Police for Shore Passes.
3 copies of Arrival Report.
4 copies of Personal Property Declaration.

Note: The above list of documents is likely to undergo a change in order to bring the documentation and procedures in line with IMO convention on Facilitation (subject to special needs of Public Authorities in India).

ANCHORAGES: The designated anchorages 'A' and 'B' are located West of the West Port Limit. Vessels required to anchor outside the pilotage area must anchor in either of these two areas only.

Anchorage Area 'A':

(1)	19° 08.0' N.	72° 29.6' E.
(2)	19° 08.0' N.	72° 33.2' E.
(3)	19° 02.0' N.	72° 34.8' E.
(4)	19° 02.0' N.	72° 31.1' E.

Anchorage Area 'B':

(1)	18° 53.0' N.	72° 31.7' E.
(2)	18° 45.8' N.	72° 23.2' E.
(3)	18° 35.2' N.	72° 33.5' E.
(4)	18° 42.2' N.	72° 41.7' E.

Outer Anchorage: When not berthing on arrival, deep-drafted vessels should anchor in Area 'A' or Area 'B', which are clear of submarine gas pipelines and submarine cables. The mud and shingle bottom is reported to be good holding ground. Pilots do not assist in outer anchorage. It is entirely up to the Master to find a suitable anchorage in areas indicated.

A long swell is present during the S.W. monsoon in the Outer Anchorage and at the entrance to the harbour.

Visibility is often reduced by heavy rains during S.W. monsoons and by smoke haze which frequently prevails in the area from November to March.

Where for any reason such as adverse weather, a vessel does not anchor on arrival the Master should ensure that the Port Signal Station/Pilot Vessel/Harbour Master are advised of his arrival as vessels are handled on a first come first served basis.

In all cases, vessels anchoring at Outer Roads are to report their anchoring time and all particulars requested by Prongs Lighthouse or Port Signal Station.

Inner Anchorages: Inner anchorages are allotted to vessels by the Harbour Master upon application by the Agents and taking into account the draft. There are more than 60 anchorage berths with radius 1,000 ft. having depths from 32 ft. to 14 ft., of these, 2×32 ft., 10×30 ft., 22×20 ft. – 30 ft. and the remainder below 20 ft. All anchorages are safe. The permissible draft at the anchorages varies from 15 ft. to 32 ft. Depending upon the room available, vessels may be provided with a Pilot to take an incoming vessel directly to the assigned anchorage. The usual inner anchorage for merchant vessels is on the West Side of the harbour, abreast of the City of Mumbai. An area North of Sunk Rock is reserved for naval vessels.

A vessel subject to quarantine will be instructed to anchor as convenient for boarding by the Port Health Officer.

RESTRICTIONS: According to state of tide and draft.

HEALTH: The Master of every vessel calling Mumbai from a foreign port must send the following particulars by cable to "Quarantine Mumbai" 12 hours to 24 hours prior to arrival at Mumbai.

1. Name of vessel and Call Sign.
2. ETA (Local Time).
3. Ports called and date of departure within last 30 days.
4. Maritime Declaration of Health has Negative Answers to the 6 Health Questions (Note: Code Signal "ZT" should be used).
5. No monkeys on board.
6. No person embarked aboard from any Yellow Fever Endemic ports.
7. Date and Port of Issue of International Derat Exemption Certificate.
8. Name of Local Shipping Agent.
9. Code Signal "ZU" should be used if Maritime Declaration of Health has positive answers to any of the 6 Health Questions.

Radio "Quarantine Mumbai" 24 hours before arrival using standard Quarantine Messages from International Code of Signals, if vessel has called at a Yellow Fever area port within the last 30 days, whether all on board have valid Yellow Fever Vaccinational Certificates or if any contagious disease is suspected.

Radio Pratique is permitted and the information required under "Pratique" should be cabled to "Quarantine Mumbai" maximum 24 hours and minimum 12 hours, prior to arrival.

The boarding Pilot also hands over a form for the Master to complete and this is forwarded by the Pilot to the Port Health Officer for their records.

MAX. SIZE: Drafts at Indira Dock, Prince's and Victoria Docks and Jawahar Island and Pir Pau are subject to dredging, soundings and rise of the tide. These drafts are declared by the Deputy Conservator of the Mumbai Port every month in the Daily Shipping List.

Commercial Docks:

(1) Indira Docks, including Ballard Pier and Ballard Pier Extension.
(2) Prince's Dock and Victoria Docks.

Name of Dock		*Max. Normal Dimensions (ft.)*	*Max. Oversize Dimensions (ft.)*	*Remarks*
Indira Dock Basin Berths	LOA	625		
	Beam	85		
	Draft	29 to 30		
Ballard Pier Extension Passenger Terminal	LOA	750		Passenger vessels including 'Queen Elizabeth II'
	Beam	95		
	Draft	30		
Ballard Pier Mole Station	LOA	600	650	
	Beam	85	90	
	Draft	29		
Harbour Wall Berths	LOA	550		
	Beam	70		
	Draft	19/20		
Victoria Dock	LOA			
	By Day	460	460	
	By Night	400	400	
	Beam	62	65 Day only	
	Draft	19	19	
Prince's Dock	LOA			
	By Day	500		
	By Night	460		
	Beam	61.03		
	Draft	17		
Prince's Dock Harbour Wall New Ferry Wharf Berths	LOA	250		
	Beam	45		
	Draft	15		

Also see "Tankers".

RADIO: Mumbai Coastal Station, call sign VWB.

Information regarding weather will be broadcast at 0630 hrs. and 1030 hrs. local time on 2,000 metres.

Special Information required from Tankers: Radio Agents 96 hours before arrival giving Master's name, ETA, draft, ports visited last 30 days, vessel's gross and net tonnage, present loaded displacement, distance manifold from amidships, cargo quantities on board gradewise, and, if Mumbai last discharge port, "Load-on-top" data, vaccinations required, men for doctor and dentist, supplies and cash requirements. *Failure to comply with foregoing could incur berthing delays.* Confirm ETA 48 hours before arrival. Any subsequent changes to be notified to Agents.

Note: Agents Offices are closed from Friday 1730 hrs. IST to Monday 0930 hrs. IST. Week-end messages to be in by Friday afternoon.

Agents can be contacted by Mumbai Radio VHF Channel 26, and thence public telephone system.

A Naval Signal Station is situated on the extreme South end of Mumbai Island at Colaba Pt. and ships entering or leaving port are liable to be called up by signal lamp. Masters are required to answer such signals by lamp should their ship be called up.

RADAR: The Port has no Radar/VTMS service.

VHF: See "Pilotage".

TUGS: 9 tugs, 900 h.p. – 3,000 h.p. Tugs join vessel when close dock entrance and assist undocking. Ship's lines are used.

BERTHING: *Indira Dock:* 21 berths, able to handle cargo vessels up to 20,000 d.w.t. Average length of berth 150 m. Most berths are equipped with 1×6 ton crane and 4×3 ton cranes.

Victoria Dock: 15 berths, able to handle vessels up to 5,000 d.w.t. Average length of berth 110 m. Most berths are equipped with 1.75 ton and 1.5 ton cranes. Vessels dock and undock from about 3 hours before high water to half an hour before high water.

Prince's Dock: Length 1,560 m. of which 1,200 m. is available for handling cargo. There are 8 berths able to handle vessels up to 5,000 d.w.t. Vessels dock and undock from about 3 hours before high water to half an hour before high water.

Ballard Pier: Container berth: Length 244 m., width 110 m., has a large back-up area for stacking containers. 2 gantry cranes and 2 transtainers on rubber tyres have been provided.

The extension at Ballard Pier is the passenger terminal and receives passenger vessels up to 30,000 g.r.t. at any stage of the tide, commensurate with draft. The berth is a continuous solid concrete pier fitted with rubber fenders.

Berthing/Unberthing is allowed during day and night, depending on the draft for the safe transit of the access channel. When entering the dock basin, the Harbour Pilot brings the vessel in to the locks of Indira Dock. Berthing Master takes the vessel to the berth in the dock. The entire docking/undocking operation is carried out under the overall charge of the Dock Master.

Allotment of Berths: Type of cargo carried is divided into 6 groups for allotment of berths to vessels:

Group I	Finished Fertiliser and Food grains.
Group II	Fertiliser raw materials.
Group III	Edible Oil in bulk.
Group IV	One commodity comprising more than 80% of the cargo, e.g. Scrap Metal, Iron and Steel cargo.
Group V	Containers.
Group VI	Break Bulk and General Cargo.

Under the pre-booking of berth facilities introduced from 1st February 1990, one berth for each of the above groups will be set aside for the owner/agent of a vessel who would like to occupy the berth on a priority basis, instead of waiting in the general queue. For this the owner/agent has to apply latest 72 hours before the arrival of the vessel and only 4 hours grace period will be allowed for any delay in arrival of the vessel. To avail of this facility the owner/agent has to pay a specified sum as a service charge. If however the vessel fails to arrive by declared time plus 4 hours grace period, with the allotment will stand cancelled, the booking fee will be forfeited and the vessel will have to join the general queue.

CARGO HANDLING EQUIPMENT: Compliance with M.P.T. Port Rules and Dock Bye Laws is essential.

Electric and Heavy Lift Cranes, Floating Mobile and Crawler Cranes available.

2 gantry cranes (35 tonnes each) are fitted at Ballard Pier (Mole Station).

2 Transtrainers on rubber tyres (35 tonnes) are provided in the Ballard Pier back-up yard for stacking containers.

1 Transtrainer on rubber tyres (35 tonnes) is provided at the Stacking Yard at No. 1, Indira Docks.

29 Mobile Cranes with capacity up to 30 tonnes available.

Heavy Lift Electric Crane of 60 tonnes at Jetty End Indira Docks.

2 Floating Cranes available of 60 tonnes and 125 tonnes capacity.

Forklifts – 43×3 tonnes and 4×1.0 – 1.5 tonnes.

STEVEDORES: Supplied by Dock Labour Board. Mumbai Port Trust supplies shore labour for handling cargo, including stacking in sheds.

Working hours:

1st Shift (0800 hrs. – 1700 hrs.)
2nd Shift (1700 hrs. – 2300 hrs.)
3rd Shift (2300 hrs. – 0500 hrs.) - restricted.

Advance information and notice will aid agents in arranging for any specialised services that may be required.

Good facilities for LASH System of cargo.

MEDICAL: Excellent medical facilities and hospitals in the city. Notice in sufficient time, depending on seriousness of case, to arrange for transport, hospitalisation, etc.

TANKERS: The oil terminal facilities are located on the Eastern side of Jawahar Island (Butcher Island) and consist of a concrete jetty about 1,700 ft. long, having 3 pier heads, with dolphins at either end of the pier head. The jetty carries a roadway and pipelines and has berths for 3 vessels of various sizes. The berths are numbered from North to South as No. 1, 2 and 3 respectively. Each berth is provided with breasting dolphins and mooring dolphins. A fourth oil berth South of Jawahar Island has been added for loading/discharging of crude oil.

The oil terminal is administered by a Senior Dock Master, who works 24 hours on – 24 hours off.

Approach to the Berth: From the Pilot Cruising Ground the vessel proceeds towards Jawahar Island at slow speed, under the direction of the Port Pilot, to avoid squat and so as to arrive off the berth on top of high water, in the case of loaded tankers. During the approach to the oil terminal, the vessel has to pass through the inner harbour, where other vessels are anchored. Before arrival at the berth, engines should be stopped and tested astern. This trial is compulsory before berthing at the oil jetty.

The tanker anchorages, 9 cables and 13 cables S.W. of Butcher Beacon, are available for light tankers awaiting berth or suitable tide. An emergency anchorage exists 4.5 cables N.E. of Butcher Beacon.

The tidal stream directions are not in line with the jetty. The ebb stream runs at an angle of 15° onto Berths No. 2 and No. 3 and 20° to Berth No. 1. Berth No. 1 and No. 2 are partially protected from the flood stream effects by the surrounding shore. Berth No. 3 is protected by an artificial reef from the shore towards Butcher Beacon. But there are reports that the flood stream tends to push the vessel off the berth. Although Berth No. 4 lies in the direction of tidal stream, which runs about N.E. – S.W. it does experience some strong tidal stream, pushing the vessel away from the berth and has resulted in moorings breaking if not properly tended.

Deep draft laden tankers dock on top of high water/beginning of the ebb, always port side alongside.

Berth Limitations and Facilities at Jawahar Dweep Marine Oil Terminal and Pir Pau:

Jawahar Dweep:

Berth	*Max. Displacement* (tons)	*LOA* (ft.)	*Max. Oversize LOA* (ft.)	*Beam* (ft.)	*Beam Oversize* (ft.)
No.1	70,000	740	780 (Daytime only)	95	130
No.2	48,000	600	-	95	NA
No.3	70,000	740	780 (Daytime only)	95	130
No.4	125,000	984	NA	130	NA

Pir Pau Berth:

LOA: 560 ft. (day light), Beam: 85 ft. Maximum Oversize: Length 585 ft. and Beam 95 ft.

Vessel to be equipped with a functioning bow thruster and be able to pump over tide.

Draft:

	LOA up to 600 ft.	LOA over 600 ft.
No.1	33 ft. 09 in.	29 ft. 06 in.
No.2	30 ft. 06 in.	30 ft. 06 in.
No.3	33 ft. 06 in.	31 ft. 10 in.
No.4	42 ft. 00 in.	42 ft. 00 in.

Pir Pau:

LOA up to 525 ft. – 19 ft. 00 in.
LOA up to 560 ft. – 18 ft. 04 in.

Also see New Pir Pau Pier.

Note: Drafts indicated above are at chart datum and correct at time of going to print. These are subject to change due to dredging/siltation. Drafts for these berths are declared by the Deputy Conservator of the Mumbai Port Trust every month.

Mooring and Unmooring Operations: At Berths No. 1, 2 and 3 the usual mooring arrangement consists of 3 head, 3 stern, 2 breast and double back springs fore and aft. An offshore anchor is sometimes used underfoot. 2 mooring launches assist in running the lines ashore. It is recommended, to facilitate in quick positioning of the vessels, that the back springs fore and aft are paid out and stored along the vessel's sheer strake so that they can be quickly hove in and made fast once placed ashore. Mooring and unmooring times and conditions are decided by the Jawahar Island Dock Master. No long delays are experienced. Usually 2 tugs of sufficient power assist with mooring and unmooring. When berthing, tugs come alongside abeam of Butcher Beacon.

When berthing at Berth No. 4 the mooring arrangements are 3 head/stern, 3 breast lines fore and aft and 2 springs fore and aft are used. When berthing, the tugs come alongside between North Karanja and West Uran Buoys. During monsoons additional lines may be required and will be indicated by the Dock Master. Strong ebb stream is experienced at Jawahar Island. Prior to start of the ebb it must be ensured that both back springs and breast lines are taut. Moorings must be tended regularly in view of strong currents and unsettled weather and fairly large range during Spring tides.

Gangway: No shore gangways are provided so vessel's gangway should be used. Pilot will indicate which side the vessel will berth and the gangway should be ready on deck about 20 ft. forward or aft of the manifold, ready to be put ashore as soon as the vessel has made fast. Hose gangs come aboard via the gangway, therefore, it is important to have the gangway placed promptly.

Pumping Over the Tide: Berth siltation takes place rapidly, and therefore depths at the berths vary from time to time. These should be checked from the monthly bulletins issued by the Deputy Conservator of the Port. The tidal ranges above the chart datum are from zero to 16 ft. during Spring tides and from 6 ft. to 10 ft. during Neap tides.

Pumping over the tide is a routine practice by the local oil industries. Vessels are required to reduce their draft before the first low water after berthing, hence vessel should be in all respects ready to commence discharge once mooring and connecting up are completed. Discharge over the first four hours should be planned to reduce the vessel's draft to the draft which will be indicated by the Dock Master. At least 1 ft. under keel clearance should be kept at all times.

Cargo Operations: Crude Oil Vessels: Vessels of 740 ft. LOA are routinely accepted. Spot approvals for vessels up to 780 ft. LOA docking at Berths No. 1 and 3 may be granted provided that Berth No. 2 is vacant or the vessel there is small enough to accommodate the extra length.

3×10 in. ASA hoses are used on crude vessels. Vessels are allowed to arrive with the blanks off and reducers in place, on the manifold. A shore crane is available, but it is also advisable to have the vessel's derrick ready. Connecting of hoses is carried out by an experienced gang. At Berth No. 4, 5 Ckicksan type loading arms are fitted with end flange size 12 in. 150 lb. class. The shore will accept ship's ullage figures (arrival) taken without their representative present if this is necessary in order to avoid delay in commencing discharge.

Product Vessels: Products are loaded and discharged through 8 in. diameter hoses with ASA flanges. These vessels dock at Berths No. 1, 2 and 3 only. Loading of product tankers involves considerable line clearing. Usually, 2 hoses are connected, although 3 lines are available. Vessels arriving alongside for loading, should have clean ballast only, with all tanks washed and ready to load any product. Since changes in the cargo pattern occur very frequently, it is essential that vessels observe this requirement. Tank cleaning including Crude Oil Wash is carried out only with the specific permission of the Dock Master/Safety Officer.

For clean products, 3 lines are available at Berths No. 1, 2 and 3, 1×16 in. for HSD, 1×16 in. for Kerosene and 1×12 in. for other clean products such as M.S., ATF, JP 1, etc. This line is always being kept full of water. Products are separated in this line by interface, if quality so permits, or by water plugs.

In the process of flushing, a small amount of water may be loaded on board the vessel. This amount of water has to be checked, calculated and included in deadfreight calculations.

The shore representatives inspect the tanks, prior to loading, and seal the sea chests. He remains on board throughout the stay of the vessel, maintains communication and co-ordinates the activities with the shore. He should be provided with a cabin.

Early Departure Procedure is practised and Bill of Lading quantities are communicated to the vessel after sailing. Discrepancies, if any, between ship and shore figures are to be protested by cable.

Discharge of Dirty Ballast and Slops: There is a slop tank available. Clean ballast may be discharged over board. Slops and dirty ballast may be pumped ashore via a 12 in. line to a Slop Tank. Sufficient notice and information of quantities of slops/washings should be given. Maximum quantities acceptable 4,500 tonnes, rate 1,000 t.p.h.

Pollution and Safety: No facilities or equipment are available within the port for combating an oil spill.

The Port has a fire station at the Marine Oil Terminal. Several firemen are in attendance at the berth at all times. Each jetty has 2 towers fitted with fire monitors. There are also trailer pump generators at each jetty equipped with foam compound.

Fire wires must be hanging over the side on the outboard side, bow and quarter, while alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level and sufficient slack should be flaked out on deck.

Strict security is maintained at Jawahar Island. Access to the oil jetty is from a small pier close Northward of the Island. No boats are allowed alongside. All crew members are provided with a pass and these are to be returned before sailing.

Fuel and Bunker Facilities: Fuel oil and light diesel oil are available ex-wharf. Lubricants also available in drums. The loading rate of fuel oil is about 500 t.p.h.

Fresh Water: Drinking and boiler water available ex-wharf (30 t.p.h. – 35 t.p.h.). Private water boats (about 150 tons each) at 25 t.p.h.

Pir Pau: Pir Pau Pier is situated at the Northern end of Mumbai Harbour in a locality called Trombay. Here the refineries of Bharat Petroleum Corporation and Hindustan Petroleum Corporation are situated.

The approach to Pir Pau Pier is made through the channel between Jawahar Dweep and Elephanta Island, thence through the Pir Pau Dredged Channel which is marked by buoys. Only daytime berthing/unberthing during the flood tide is allowed.

A number of bollards are laid throughout the length of the Pier and provide a suitable mooring layout for any size vessel up to 560 ft. length overall. The fendering system consists of vertical rubber fenders on the pier for its entire length. It it advisable to keep portable fenders readily available.

Pipeline size varies from 6 in. to 12 in. A loading/discharging rate of 150 t.p.h. for all products is maintained. Cargo discharged at this pier is mainly L.P.G., ammonia, lube oils and chemicals.

Refrigerated cargoes acceptable, but due to design limitations of pipeline/tank volume, cargo to be heated to − 10° C. to 23° C. Pipeline length 5 km. (8 in. ASA 300.). No vapour return line available. Maximum discharge rate 120 tonnes per hour at back pressure 14.5 kg./cm. Vessels to carry suitable hoses of 75 ft. length for discharge.

No bunkering facilities available at Pir Pau. Fresh water available ex-wharf at 5 t.p.h. or by water boat.

New Pir Pau Pier: A pier is under construction for handling bulk liquid chemicals and special grades of POL products (LPG, LSHS, lube oil, etc.).

The pier is located in position Lat. 18° 58.76' N., Long. 72° 55.22' E. Ships upto 10.6 m. draft can remain at the berth at all states of tide. Night navigation will be available. The pier is scheduled to be ready for operation in April/May 1996.

Lube Terminals at Commercial Docks:

Certain Lubes, Vegetable Oils and fats are discharged both at Indira Dock and at Prince's and Victoria Docks at berths nominated by the Port. These are discharged either through a pipeline or into tank trucks. The average rate of discharge into tank trucks is 40 t.p.h. From the docks the pipeline (10 in.) extends to a tank farm about 10 km. away. For docking in the commercial docks a valid Gas Free Certificate will be required.

Ship Operator's Report: January 1987 (Updated 1996).

Location: The Port of Mumbai is situated almost mid-way on the Western coast of India and is a natural deep water harbour protected by the mainland on its East and the island of Mumbai on its West. It is the largest Indian port for dry cargoes in bulk and container trade. The Marine Oil Terminals are located at Jawahar Island (Butcher Island) and Pir Pau at Trombay, where also refineries of Bharat Petroleum, Hindustan Petroleum and Indian Oil are located.

Lube Oils and certain non-flammable liquid cargoes are also handled at some wharves of the Indira Dock and Victoria Dock.

Communications: All vessels bound for Mumbai should listen to Mumbai Radio (Call Sign — VWB) which is located at Lat. 18° 36' N., Long. 72° 50' E. and send their initial ETA as soon as possible.

Tankers arriving in ballast should notify: ETA, amount of slop and dirty ballast to be discharged ashore, deballasting time, proposed loading sequence and quantity of each grade, displacement on completion of loading and alll requirements/services needed.

The initial ETA should be subsequently confirmed or revised, 72, 48 and 24 hours prior to arrival.

Approaches: The approaches outside the 10 fathom contour are free of dangers. The vessel may approach Mumbai from North to South through West, but attention must be paid to areas in which fishing stakes may be encountered as indicated on the chart. Dangerous wrecks and fouled ground exist within the area bounded by parallels Lat. 18° 48.5' N. – Lat. 18° 50' N. and meridians Long. 72° 42.5' E. — Long. 72° 44.5' E. Masts of sunken ships are sometimes visible during the periods of the LLW tides. Under no circumstances should vessels of any draft, attempt to cross this area.

The harbour entrance is lined by light buoys moored North of Thal Shoal, S.E. of Prongs Reef and S.W. of Prongs Reef.

Racons are fitted onto Kanoji Angre Lighthouse and Prongs Lighthouse, which transmit the morse signal "K" and "P" respectively. The performance of Khanderi Racon is satisfactory and that at Prongs is under test.

Permissible Draft: There are no night restrictions, except at Oil and Chemical Jetty at Pir Pau. The minimum depth in the entrance channel to the harbour is 34 ft. 6 in. below chart datum. The shallowest bar extends from a beam of the buoys at the entrance to abeam of Middle Ground Island.

Deep draft vessels, including laden tankers, should be at Pilot Cruising Ground from 1 hour 30 minutes before high water to on top of high water, depending on the instructions received from Prongs Lighthouse or Port Signal Station.

It is advisable to start heaving anchor in good time, about 2 hours before time required at Pilot Cruising Ground; and to make approach to the port entrance, passing about 1 mile North of Mumbai Floating Light Vessel (Withdrawn 1996). Then vessel should head towards the middle of the 2 entry buoys (Prongs Reef Buoy and South Entrance Buoy), passing about 8 cables South of S.W. Prongs Reef Buoy.

DENSITY: The Port of Mumbai is essentially a salt water port and major fluctuations in the density occur on account of tide. Density varies mostly in monsoon period June to September. Sea water temperature 18° C. to 23° C. throughout the year.

FRESH WATER: Available at all berths ex-wharf at following delivery rates:

Jawahar Dweep	30 t.p.h. – 35 t.p.h.
Pir Pau	5 t.p.h.
Indira Dock	12 t.p.h. – 15 t.p.h.
Prince's and Victoria Docks	12 t.p.h. – 15 t.p.h.

Fresh water also available by water boats.

Privately owned water boats (150 tons)	25 t.p.h.

Ship Officer's Report: Vessel berthed at Ballard Pier, East side. Fresh water availability on pier dependent on capacity of storage tank at the time of call. The water was not available continuously and we had to wait for the tank to be refilled.

FUEL: Diesel oil and fuel oil are available ex-wharf at the four Jawahar Island berths. No bunkers are available at Pir Pau. At the commercial docks only diesel oil is available and is supplied by tank trucks.

Bunker barges for fuel oil are available, however some delay can be expected. Bunker requirements should always be included in the first ETA message to minimise delays.

FIRE PRECAUTIONS: All regulations of Petroleum Rules (Chapter 1/50 of MPT Port Rules). Port maintains fire stations, 24 hours per day, both at docks and at Butcher Island Oil Terminal. Special precautions taken for tankers at Marine Oil Terminal at Butcher Island.

CONSULS: Most countries of the world have consulates/representative offices in the city.

REPAIRS/DRY DOCKS: Major repairs may be carried out afloat and in dry docks. Excellent facilities exist and all repairs possible. There are several private and public ship repairers to do this work.

There are 2 dry docks belonging to the Mumbai Port Trust. Hughes Dry Dock is 1,000 ft. long and 100 ft. wide and the entrance to the dry dock is from Indira Dock Basin. Merewether Dry Dock is 525 ft. long and 65 ft. 6 in. wide and the entrance to the dock is from Prince's Dock Basin.

SURVEYORS: Nautical surveyors (Mercantile Marine Department) and all Classification Societies (Marine) and General Surveyors available.

GANGWAY/DECK WATCHMEN: Private watchmen, regulated by the Port, are posted on deck as and when required by the Agents/Owners.

OPENING/CLOSING HATCHES: All mechanically operated hatches are opened and closed by ship's crew. Rigging gangs may also be employed for this work.

CUSTOMS ALLOWANCES: Weekly allowance is 200 cigarettes and 1 bottle of spirits (1,000 ml.).

REPATRIATION: Can be arranged, also crew changes.

AIRPORT: International Airport at Sahar, 25 km. from Mumbai Harbour.

TIME: Indian Standard Time ahead of GMT by 5 hours and 30 minutes. No alterations to clocks are made any time.

HOLIDAYS: Republic Day (January), Holi (2nd Day) (March), Ambedkar Jayanti (April), Shivaji Jayanti (April), Ramzan Id (April), Maharashtra Day (May), Bakri Id (July), Mohurram (August), Independence Day (August), Ganesh Chaturthi (August), Dasera (September), Diwali (October) and Christmas (December).

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Arrangements for placing a telephone on board ship exist at all transit sheds in the Commercial Docks.

IDENTIFICATION CARDS: Shore passes issued. Necessary for Police/Custom Authorities and are to be returned prior to vessel's departure.

GARBAGE DISPOSAL: Bins are placed on shore at the end of the berth where vessels are expected to place their garbage. Collection of the garbage from the bins is arranged by MPT. Collection service is not available from on board of the vessel.

WASTE OIL DISPOSAL: Collection service for disposal of waste oil is presently available at all the commercial berths by tanker trucks. There is no charge levied for this service at present. Application on plain paper for this service has to be made to the Director, Pollution Control, MPT. Tel: 2619565. Telex: 011-81047.

SEAMAN'S CLUBS: The Royal Mumbai Seamen's Society, Prince of Wales Seamen's Club, 18 R. Kamani Marg, Ballard Estate, Mumbai 400 038. Tel: 2613731, 2612260. Facilities: Beer bar, snack bar, club shop, biliards and table tennis, dances twice weekly on Tuesdays and Fridays, chapel, card room, accommodation for 153 persons, postage facility available. Technical meetings and lectures held every month through Technical Institutions.

CURRENCY: Indian Rupee (Rs.).

REGULATIONS: Stringent Port Rules and Docks By-laws detailed in "Mumbai Port Rules".

GENERAL: *Hazardous Cargo:* All items of Dangerous Goods are published by the International Maritime Organisation and are treated as hazardous cargo. They are divided into four broad categories for the purpose of handling in Port area. These categories are graded according to risk involved in handling:

Category "A": Low Flash Point (below 50° F. or 10° C.) or other goods which are too dangerous to be handled through the dock. Cargo of this category is discharged into lighters in the stream for direct delivery from the Port Hazardous depot at Haji Bunder. Vessels carrying commodities belonging to this category are not admitted into the docks.

Category "B": Intermediate Flash Point (above 50° F. to 76° F. or 10° C. to 24.4° C.) or other goods which present moderate degree of hazard. Cargo of this category is discharged into lighters in the stream for transportation to Haji Bunder for storage. Containers carrying this category of cargo may be landed from container vessels on shore in the docks and the containers are removed immediately to Haji Bunder for storage.

Category "C": High Flash Point (above 76° F. to 141° F. or 24.4° C. to 60.6° C.) or other goods which present lesser degree of hazard. Cargo of this category is permitted to be discharged in docks for immediate delivery only. If direct delivery is not possible these commodities will have to be discharged overside into barges in the docks for delivery from Haji Bunder.

Category "D": Flash Point above 141° F. or 60.6° C. or other goods, specially some poisons and some corrosives, which also have hazardous properties. These are permitted to be stored and handled in the port area subject to special handling and storage instructions.

In every case Masters of vessels carrying such cargoes are advised to inform their local agents well in advance of all hazardous cargo on board so that necessary arrangements can be made for off-loading such cargo as required.

REPORT: Pir Pau Jetty (LPG), June 1984 (Updated 1996).

Pir Pau Jetty: Datum draft 19 ft. 4 in. for Max. LOA 525 ft. Pir Pau Channel datum 13 ft. 1 in. Max. rise of tide approximately 15 ft. No berthing/unberthing between sunset and sunrise.

Pipeline/discharging facilities:

1. Refrigerated cargoes acceptable, but due design limitation of pipeline/tank volume cargo to be heated to −10°C. before discharge. Sea water temperature at Mumbai during year 18° minimum to 23° maximum.
2. Pipeline length 5 km. diameter 8 in. ASA 300 psi, no vapour return line available.
3. Max. discharge rate 120 tonnes/p.h. at back pressure 14.5 kg/cm. (abs).
4. Vessel to carry suitable hoses making length of 75 ft. for discharge keeping in view items (2) and (3) above and to be equipped with derrick.

SHIPS OFFICER'S REPORT: May 1989 (Updated 1996).

Documents:

Maritime Declaration of Health.
Arrival Report.
Cargo on Deck/Transit with Port of Loading/Discharging.
Customs Arrival Report.
Vessel's Arrival Report.
2 copies No Arms/Ammunition Form.
2 copies Agent's Report.
6 copies Deck Cargo Declaration.
4 copies Stores List.
6 copies Personal Effects List.
Other Local Forms. If visiting Mumbai for the first time, the vessel may use its own forms.
10 copies Crew Lists.
3 copies Narcotics List.
1 copy Vaccination List.

Note: The Agent will provide a booklet which contains all the forms needed.

Customs: Customs Officers will board the ship to check the bonded store. Ship hands over the forms prepared by the Agent.

Quarantine: Hand over the forms prepared by the Agent.

Immigration: Hand over the forms prepared by the Agent.

Shore passes are obligatory.

SHIPMASTER'S REPORT: October 1993 (Updated 1996).

Charts: B.A. Chart No. 1487, 2621 and 2624.

Approach: Khandri Lt. and Prongs Reef Lt. are very conspicuous.

Khandri Lighthouse Racon was not operating.

A lot of fishing vessels sighted inshore, so it is best to approach anchorage from seaward.

Anchorage: The Outer Anchorage, judging by the anchored vessels, seems to be a square (18° 55' N. 72° 40' E.; 18° 55' N. 72° 45' E.; 18° 50' N. 72° 40' E.; 18° 50' N. 72° 45' E.).

We anchored in the middle of the area with 5 shackles, clear of the disused submarine cables. There is a large ground swell, even in N.E. Monsoon. I believe the area can be awkward at the height of the S.W. Monsoon. The bottom is mud.

Even with port congestion, there is plenty of anchorage room.

Area A on B.A. Chart No. 1487 not used, and Area B in "Guide to Port Entry" not used.

Entry into the Inner Anchorage, which is inside the port limits, and subject to port charge, is conducted under pilotage (although due to pilot shortage, did hear on VHF, ships being told to anchor themselves in designated area). The area is as on B.A. Chart No. 2624, but area extends from 72° 50' E. each side of dredged fairway.

VHF: Mumbai Port: Channels 16/12. Mumbai Pilot: Channels 16/14.

The Port Radio Station is quite good with information and operates throughout 24 hours.

Pilot: Pilot boards and disembarks throughout 24 hours from old slow cutter off Red Buoy (FL (2) R. 10 sec. – 18° 51.2' N., 72° 49.4' E.).

Tugs: There are numerous old and poorly maintained tugs, and they are often difficult to obtain (Pilot's Report).

Ship's lines are used.

On berthing, we used 3 tugs (one forward, one aft and one large tug pushing).

On departure, tugs were not obtainable (after waiting 45 minutes), so left Indira Dock outer wall using traditional methods.

Berthing: No. 19 Indira Dock Wall:

We found Cross Island Reef, from echo traces inwards and outwards to extend about 70 m. South of the Buoy (confirmed by Pilot).

Vessel berthed starboard side alongside dock wall with 7.4 m. maximum draft 2 hours after LW.

There was confusion over actual depth of water on berth, with Pilot maintaining a depth of 5.5 m. C.D. (actually correct along dock wall) which required ship to anchor off Indira Dock "Bull Nose".

Berthing and unberthing on dock wall is during daylight only, and in Indira Dock throughout 24 hours.

For berthing on dock wall, vessels swing off Bull Nose and are towed stern in, berthing starboard side to.

This vessel sailed from Indira Dock No. 10 with a draft of 8.72 m. on H.W. without any problems.

Berth: Indira Dock Wall No. 19:

Recent harbour depth survey gives 7.3 m. C.D. alongside, out to a distance of 50 m. (Sheds No. 18 and 19).

There is 10.0 m. C.D. alongside Ballard Pier East side.

We found (See "Plan") 5.0 m. alongside dock wall slopping out to 7.3 m., 21.0 m. off dock wall. North of the South end of Shed No. 20 (18° 56.33' N.) shoaling takes place. Dock Master advised depth of 6.0 m. C.D., then shoaling to about 3.0 m. North of Shed No. 21.

Indira Outer Dock wall has no fenders, dock side smooth concrete blocks, ships must provide their own fenders. Fortunately we had plenty of rubber truck tyres and wooden fenders.

The old floating pontoon fenders are on the dock side under repair.

Berthing/unberthing on dock wall is in daylight only.

Ship's gangway used and just avoided having to turn in at L.W.

Vessel grounded at L.W. (soft mud).

Sailed with 7.66 m. maximum draft.

Lines were 2,1,2 each end. Plenty of bollards available, mooring boat and large mooring gang assist in mooring.

Very little room between adjacent vessels.

In S.W. Monsoon, Pilots report a swell is felt alongside.

Loading: We loaded castor oil from small (13 tonne) tank trucks, which bring the oil from storage tanks about 15 km. away.

Loading was through open access hatch from 3 shore pumps connected to individual trucks.

Maximum rate achieved about 100 tonnes/hr. per tank.

Tally clerk keeps record of trucks ("Boat Note").

During the night, trucks tend to 'dry up' with long waits.

No Bill of Lading figure on completion as trucks empty weights have to be checked and tallied up, so normally about 36 hours before Bill of Lading figures obtainable.

About 30,000 tonnes of different castor oil grades shipped from Mumbai per month, mainly to U.S.A. and North Europe, for medicinal purposes, aircraft engine lubricants and in the plastics industry.

Numerous cranes along dock wall, but understand only those at Shed No. 18 in operating condition.

Fresh Water: Available ex-quay. Apply through the Agent well in advance. Water barges also available for vessels at anchorage.

Medical: Arranged through Agent. Extensive facilities in city. Vessels at outer anchorage can land sick seamen at Pilot Boarding Station, by arrangement through Agent.

Shore Leave: Shore passes required, which have to be handed in on departure.

No restrictions on foreign currency usage.

Taxis line up alongside vessel hoping for a fare. Hire of 3 hours and return to dock costs U.S.$ 10.00.

Chandler: A number of chandlers are available. We used Mazda Associates as with previous call. They are fair and are paid through the Agent.

Authorities: They board vessel spasmodically.

Agent : 2 hours after berthing.
Immigration : 1.5 hours after berthing.
Customs : 3 hours after berthing.
Health : 3.5 hours after berthing.

I believe Customs only work from 0930 hrs. to 1730 hrs.

No problems over currency, not checked, and U.S.Dollars are freely used ashore.

Applied for Free Pratique as per format in "Guide to Port Entry" by telegram through telex system, no reply received. Pilot granted Pratique on boarding.

We had transit papers to Kandla, Customs boarded before departure with sealed Transit envelope.

The following documents were required at various times:

12 copies Crew List.
1 copy Crew Currency List.
1 copy Ship's Currency.
1 copy Arms "Nil" List.
1 copy Drugs in Master's Safe.
1 copy Cargo in Transit.
2 copies Crew Declaration.
2 copies Stores List/Bond List.
1 copy Ports of Call List.
1 copy Passenger "Nil" List.
3 copies Health Declaration (1 copy Pilot).
2 copies Vaccination List.

The Agent makes out numerous Indian forms.

Gratuities consisted of 18 cartons of cigarettes and one case of beer.

AUTHORITY: Mumbai Port Trust, Port House, 1st Floor, Shoorji Vallabhdas Marg, Ballard Estate, Mumbai-400 001, India. *Tel:* 2614321, 4145100. *Telex:* 011-81047. *Cables:* Portrust Mumbai. *FAX:* 022-2611011. *Contact:* Captain J.C. D'Souza, Harbour Master.

AGENT: G.A.C. Shipping (India) Pvt. Ltd., P.O.Box 11531, 211 Dalamal Tower, Mumbai 400021, India. Tel: (91-22) 2679980-6. Telex: 011-85988 GAC IN, 011-83835 MRTN IN. Fax: (91-22) 2672579. Cables: "Gacsteam", Mumbai-21.

MUNDRA: 22.54 N. 69.42 E.

LOCATION: In Gulf of Kutch near Navimal Lighthouse, about 2 miles inside Bocha Creek. Port is about 6 miles West of Mundra town. Salt exporting port open for deep sea and coastal traffic. Vessels calling Mundra anchor in open roadstead 2 miles from shore. Vessels of 8 ft. draft can berth alongside jetty. Highest tidal range 17 ft. Current parallel to coastline running about 3 knots.

AUTHORITY: Assistant Conservator.

AGENT: See "Cochin".

NAGAPATTINAM: 10.45 N. 79.50 E. (See Plan)

PORT LIMITS: All water front sea area and 50 m. from high water mark contained between the following 4 points:

1. Lat. 10° 49' 36" N., Long. 79° 51' 06" E.
2. Lat. 10° 49' 36" N., Long. 79° 57' 06" E.
3. Lat. 10° 44' 51" N., Long. 79° 57' 30" E.
4. Lat. 10° 44' 51" N., Long. 79° 51' 06" E.

DOCUMENTS: To be completed by Masters of vessels on arrival:

8 Crew Lists.
8 Passenger Lists.
3 Form of Import Manifests of Stores.
3 Lists of articles in slop chest.
3 Private Property Declaration of the Crew.
3 Manifests.
3 Bills of Lading.
Arrival Report in the proper form.
Deck Cargo Certificate.
Bottom Cargo Certificate.
Arms and Ammunition Certificate.
Drugs Certificate.
Gold or Silver Certificate.
Maritime Declaration of Health.

To be handed to Agents:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Certificates of Deck Officers, Engineers and Radio Officer.

PILOTAGE: No Pilot Station, being open roadstead port. Vessels not piloted to anchorage.

ANCHORAGE: Vessels anchor according to draft and prevailing weather conditions. In fine weather, good anchorage in depths of 7.0 m. – 14.0 m. with lighthouse bearing 281° to 255°. Holding ground, sand and mud, good. Agents, in consultation with Port Authorities, signal Master on arrival of vessel, anchorage position for guidance.

MAX. SIZE: No restrictions. Vessels choose anchorage according to draft.

HEALTH: On arrival Master to signal local signal station, addressed Port Health Officer stating vessel arrived and no sick person on board. Agents then obtain Free Pratique from Port Health Authorities. In event any person having chicken-pox on board, advisable that Master informs Agents sufficiently in advance to enable them make necessary arrangements for Port Health Officer to board vessel on arrival and obtain Free Pratique after Port Health Officer is satisfied that isolation arrangement on board adequate.

RADIO: Madras Radio. Send ETA to local Agent 48 hours before arrival.

VHF: Port Radio Station on Channels 16, 12 and 14. Working hours 0600 hrs. to 1000 hrs. and 1500 hrs. to 1900 hrs. on all days, except holidays and Sundays.

TUGS: 1 motor launch of 66 h.p. belonging to the Port Department is available for towing lighters. Launches owned by private owners are also available for towing lighters.

BERTHING: Open roadstead port. No berths. A mobile crane of 4 tons capacity is available in the port for handling heavy cargoes.

STEVEDORES: Port usually handles fertiliser imported on Government of India account and rate of discharge per day about 750 to 1,200 tons. Advisable that ETA of vessel is passed to Agents at least 2 days in advance to enable them to advise receivers to arrange necessary gangs.

MEDICAL: No advance notice required unless sickness of serious nature when Medical Officer boards vessel on arrival. In case of sickness to officers or crew, Medical Officer boards vessel or if in condition to go ashore, necessary arrangements made to take sick crew to Doctor. District Headquarters Hospital with all medical facilities available. Special wards available for sick members of crew. Vaccination, inoculation against yellow fever, cholera, plague, etc., can be arranged.

There are also a number of private nursing homes available.

DENSITY: 1025.

FRESH WATER: Available in limited quantities and dependent upon port getting continuous supply from municipality. A water barge of 30 tons capacity is available.

FUEL: Diesel oil available in a limited quantity.

CONSULS: None.

REPAIRS: Minor repairs in engine room and on deck can be effected. Chipping and painting can also be arranged.

DRY DOCKS: None.

SURVEYORS:

1. Cargo inspectors not available.
2. All leading Classification Society Surveyors available from Madras.

GANGWAY/DECK WATCHMEN: In the interest of vessel, 2 gangway and deck watchmen daytime and at night to be employed to avoid pilferage.

OPENING/CLOSING HATCHES: Opening and closing of hatches on arrival of vessel before commencement of discharge and on completion carried out by stevedores. Time used for opening and closing of hatches not counted.

CUSTOMS ALLOWANCES: Tobacco, 1 carton per week per crew member. Wine and Spirit, Whisky or brandy 1 quart each member for a week. No restriction for beer as the issue is based on weather, etc.

REPATRIATION: Facilities available for effecting crew changes and arrangements can be made for repatriation.

AIRPORT: Nearest airport at Trichy, served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Authorities. Vessels work on Charter Party and Government holidays but time not counted. No closed holidays but overtime charged for any work done on Government holidays and on Sundays.

POLICE/AMBULANCE/FIRE: Police 22100; Ambulance 22102; Fire 22101. The Police and Customs Departments maintain their own W/T stations which can be contacted or utilised at times of emergency.
EMERGENCY CO-ORDINATION CENTRE: The information should be passed on in case of a vessel in distress to the Maritime Operations Room/Sector Search and Rescue Co-ordination Centre as "Life-Saving Call" to Madras Radio for this area.

Call Sign: VWM
MADRAS
RADIO
Frequency: 500 kHz
2182 kHz
Time: Continuous.

SERVICES: Hatch cleaning after discharge of cargo can be carried out.
BANKS: American and European banks are not available at Nagapattinam town, but are available in Madras.
STORING: See "Prelims".

1. Ship's stores to be sent to vessels are loaded into lighters from port wharves, as Nagapattinam is an open roadstead port, having no berths for mooring vessels.
2. Stores can be taken from lighters both during loading and discharging.
3. Trucks can proceed only up to the wharves of the port. The approximate distance from wharves to the ship depends upon the place of anchoring of the vessel. It will be about 2 to 3 nautical miles.
4. Fork-lifts are not available.
5. Necessary shipping bills are to be filed with the Port and Customs Offices before taking in stores from the shore to the vessel.
6. Local riggers may be employed.

SHORE LEAVE: Officers and members of crew allowed to go ashore and necessary passes obtained by Agents.
IDENTIFICATION CARDS: Needed.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
DELAYS: Usually no delay in anchoring vessels and generally all formalities including survey carried out on vessel's arrival. If vessel arrives between 0600 hrs. and 1400 hrs., she commences discharge same day.
GENERAL: No regular launch service between ship and shore. Agents hire out private launch and obtain permission from port office to ply launch between ship and shore, to facilitate officers and crew to go ashore and for Doctor, Agent and Port Health Officer. Port Authorities do not permit plying of launch after 1800 hrs. 3 trips arranged for launch to go to vessel and back from 0600 hrs. to 1800 hrs. every day weather permitting.
AUTHORITY: Port Officer and Harbour Master, Port Office, P.O. Box No. 6, Nagapattinam, PIN 611001, Tamil Nadu State, India. *Tel:* 22255 (office), 22363 (personal), 22285 (residence). *Cables:* Port Officer, Nagapattinam. *Contact:* Port Office and Harbour Master.
AGENT: See "Cochin".

NAVLAKHI: 22.57 N. 70.27 E.

DOCUMENTS:
Arrival:
Last Port Clearance.
Bill of Health/Maritime Declaration of Health.
Customs Arrival Report.
Port Arrival Report.
Agent's Arrival Report.
List of Same Bottom Cargo.
Crew List (6 copies).
Import General Manifest.
Light Dues Receipts (in case the last port of call being Indian port).
Stores List & Private Property List (8 copies each).
Misc. Declaration.
Departure:
Port Clearance (handed over by Customs).
Bill of Health.
Port Departure Report.
Agent's Departure Report.
Income Tax Clearance Certificate (in case of export cargo).

PILOTAGE: Not compulsory. If required an experienced local guide provided by Port Authorities. In such cases Pilot meets vessel at Tuna Buoy station about 19.5 miles from port.
ANCHORAGE: Open roadstead port. Vessels work in stream. 2 vessels can be brought to inner anchorage and work conveniently in good weather. In case a third vessel arrives, it has to anchor at Buoy No. 5 until one of the vessels sails from inner anchorage. During non-monsoon times vessels can be moored at Buoy (Navlakhi) No. 5. Chart of the approaches is No. 2017.
RESTRICTIONS: Night navigation not provided. Generally vessels' movements during daytime high water period. Vessels should arrive Tuna Buoy 3 hours before high water in daytime.
HEALTH: Port Health Officer available at Mahendrasinghji Hospital, Morbi.
RADIO: Radio messages intended for this port should be addressed either through Kandla or Mumbai Radio Stations.
VHF: To be installed in the near future.
TUGS: Four tugs available, 150 h.p., 370 h.p., 350 h.p., and 240 h.p.
CARGO HANDLING: Ships lie at anchor in the stream about 2.0 km. from shore and cargo is shipped/landed through lighters. There are 17 barges of 100 tons capacity each. There are 17 godowns of 17,000 sq. m. floor area to store the cargo passing through ports. There are four 3 tonnes capacity cranes two of 5 tonnes capacity, and one of 12.5 tonnes capacity.
STEVEDORES: At least 24 hours notice to arrange gangs. Rate of loading and discharging for grains and fertilisers about 1,600 tonnes a day if 1 ship working; in case 2 vessels working simultaneously, combined average of about 1,600 tons can be maintained in fair weather days.
MEDICAL: Small dispensary exists under control of Medical Officer. Qualified extensive medical facilities available at Morbi which is 44 km. away or Rajkot about 109 km. Health Officer comes from Morbi to attend vessels, if required.
DENSITY: 1025.
FRESH WATER: Supplied only in small quantities. 1 barge with carrying capacity of about 49 tons a trip. Due to very low pressure in pipelines, minimum 12 hours to fill barge.
FUEL: Not available. Can be arranged by Agents.
CONSULS: None.
REPAIRS: Workshop for repairs to port equipment and urgent repairs of minor nature can be carried out.
DRY DOCKS: Dry dock for repairs to port service units is under construction.
GANGWAY/DECK WATCHMEN: Necessary to appoint watchmen on board to avoid possible thefts.
OPENING/CLOSING HATCHES: Depends upon terms of working. Local stevedores generally attend to this operation but charge to vessel (Owners) in case these operations are vessel's account.
CERTIFICATES:
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Ship's Register.
Derat Certificate.

REPATRIATION: Crew being repatriated from this port would be sent to Jamnagar or Rajkot (after Customs examination) where facilities are available.
AIRPORT: Navlakhi not connected by air. In case of emergency, Jamnagar or Rajkot nearest airports.
TIME: GMT plus 5.5 hours.
HOLIDAYS: The port holidays are taken as office holidays and non-working days as Charter Party Holidays. Except for non-working days, overtime work will be carried out on payment of overtime.
POLICE/AMBULANCE/FIRE: Checkpost Police Station without telephone.
TELEPHONES: Few important offices are connected with telephones, and no telephone service can be provided on board vessel.
SHORE LEAVE: The crew members are allowed ashore on showing Identification Cards to Customs and Ports.
IDENTIFICATION CARDS: Customs examine and issue pass to land. But if crew go to suburbs (beyond Morbi which is 30 miles away), identity cards should be carried.
DEVELOPMENTS: A new lighter-wharf measuring 102 m. × 8 m. with three approaches in Sue-Side Creek is under construction so as to work lighters all round the clock.
AUTHORITY: Port Officer, Port Officer's Office, Navlakhi Port.
AGENT: See "Cochin".

NEENDAKARA: 08.56 N. 76.33 E.

SHIPMASTER'S REPORT: July 1985.

Neendakara is a seasonal port and operates only from mid-November to mid-April. About 5 to 6 deep sea vessels load per year. Only export cargo of mineral sands is loaded i.e. (Silliminite, Illuminite and Zircon). The shippers are Indian Rare Earths Limited, which is a Government of India undertaking.
PORT LIMITS: There is no defined port limit as such. For the purpose of Charter Party a vessel is considered as an "arrived ship" from the time of dropping anchor.
DOCUMENTS: See "Cochin".
PILOTAGE: Neendakara is an anchorage port hence no Pilots available.
ANCHORAGE: There is no defined anchorage. We anchored 2.5 miles due West of the breakwater in a depth of 15 m. Holding ground is good. Care should be taken to anchor the vessel in such a position so as to have at least 5 m. under the keel on expected maximum departure draft as sometimes heavy swell can be experienced. Agents, Customs and Port Officer usually board vessel during daylight hours for clearing vessel. Port Officer usually does the draft survey and also hold inspection prior to loading.
RESTRICTIONS: There are no restrictions on arrival/sailing at night, tide or draft.
MAX. SIZE: No limit.
HEALTH: Radio Pratique not possible. A doctor from local Government hospital is empowered to grant Pratique. The doctor does not come on board vessel. Completed Health Declaration and Vaccination List is taken by the Agents to obtain Pratique. Pratique is automatic if coming from another Indian port.
RADIO: It is best to send ETA messages via Mumbai Radio or Madras Radio and Agents kept well informed.

VHF: VHF is installed in the Port Office and watch is usually kept from 0800 hrs. to 2200 hrs. when a ship is loading at anchorage. Also one of 6 harbour tugs is equipped with a VHF set. Port Office keeps watch on Channel 16.

RADAR: No Port Radar.

TUGS: Port has 6 small tugs for towing barges during loading operation of deep sea vessels at anchorage. The tugs are old and some of them are under repair at any one time.

BERTHING: No berths available.

BULK CARGO FACILITIES: Cargo is loaded in bulk and/or bags. It is brought to the ship in bags by barges. The bags are brought on board and emptied into ship's holds. The bags are mostly torn and a lot of cargo is lost overboard or left behind in barges. On completion of loading vessel will usually receive about 6% to 8% less than the shore figures. Hence Master must ask for more cargo.

STEVEDORES: About 100 labourers boarded the vessel and stayed on board throughout the loading except from 2000 hrs. on Saturday to 0800 hrs. on Monday. No work on Sundays. Average rate of loading was about 800 – 1000 tonnes per day. First barge comes alongside the ship at about 0900 hrs. and last barge leaves shore at about 1700 hrs. Loading stops around 2200 hrs. after cargo from last barge has been loaded. Strict watch should be kept on number of bags per sling as the labour tends to overload the slings. Repeated warnings by Ship's Officers made no impact so it became necessary to switch off deck power for about half an hour and only then did they reduce the load per sling.

Vessel must arrive with maximum fresh water and maintain strict rationing during stay at anchorage. Usually overtime work is not possible but to finish the ship they may speed up the loading. While we were loading, there was possibility of strike from a certain date and hence need to complete loading before that date, more labour was placed on board and loading rate went up to about 1,300 tonnes to 1,400 tonnes per day.

MEDICAL: All cases of illness are referred to Benziger Hospital in Quilon. It is preferable to give advance notice to Agents. Dental facilities also available. Cholera inoculations can be arranged.

DENSITY: Salt water.

FRESH WATER: Advance notice to be given to Agents. It is expensive to take fresh water as it is supplied by tugs at the rate of 15 tonnes per trip. There is no water barge available. Approximate cost Rs.100 per tonne.

FUEL: Not available. Nearest port for bunkers is Cochin.

CONSULS: None available.

REPAIRS: No repairs possible.

DRY DOCKS: None.

SURVEYORS: Have to be called from Cochin.

GANGWAY/DECK WATCHMEN: Ship's crew must keep a constant vigil on deck. Keep all stores, accommodation entrances and cabins locked. Try to keep lifeboat gear and fire equipment under lock and key.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: 1 bottle spirits and 200 cigarettes per crew member per week.

CARGO GEAR: Loading by ship's gear only. Ensure that a few gin fall wires and cargo blocks kept ready as same may require changing due to rough handling of cargo gear.

REPATRIATION: Possible. Advance notice should be given to Agents.

AIRPORT: Nearest airports are Trivandrum and Cochin from where domestic flights will connect to Mumbai/Madras for international flights.

TIME: Always GMT plus 5 hours 30 minutes.

HOLIDAYS: Same as "Cochin".

BANKS: Branches of most Indian Banks in Quilon.

STORING: Should be avoided as labour charge too much to transfer stores from truck into tug and then from tug to vessel at anchorage. Labour does not permit stores to be handled by ship's crew when they are working cargo even if one hook idle or even if vessel has special stores derrick. Thus, it is best to get stores alongside at night when labour has completed loading for the day.

No forklift truck available ashore, but truck can go up to about 75 ft. from the barge. At times the tug allocated for stores may not be able to come alongside jetty but may tie up alongside a barge in which case it is extremely difficult to handle heavy packages as there is no crane available and every item must be carried by hand. Even tug's crew and Port Office personnel expect "complementaries" from the vessel and Agents for allowing use of tug for stores. On shore stores are handled by labour only. No attempt should be made to employ cheap labour from outside by any other means as it will lead to stoppage of cargo loading both on vessel as well as ashore. Provisions are supplied to vessel by 0ship chandler from Quilon. He has his own launch and will bring provisions onboard after midnight.

SHORE LEAVE: No restriction on shore leave.

IDENTIFICATION CARDS: Not issued. However, every crew member landing ashore must sign a register in the Port Office, giving his particulars and time landed. On returning from shore he must also sign and put down time of return.

DELAYS: No delays. Usually only one deep sea vessel is loaded per month.

AGENT: See "Cochin".

NEW MANGALORE: 12.57 N. 74.48 E. (See Plan)

LOCATION: New Mangalore port is situated at 9 km. North of the existing minor port of Mangalore.

PORT LIMITS: *Westward Points:*

(a)	Latitude: 12° 53.6' N.	Longitude: 74° 44.4' E.
(b)	Latitude: 13° 00.2' N.	Longitude: 73° 43.1' E.

DOCUMENTS:

Quarantine:

Declaration of Health.
Derat Certificate.
Vaccination Certificate.

Customs:

General Particulars of the vessel.
Declaration of Deck Cargo and same bottom cargo.
*Crew List – (8 copies).
Arrival Report – (2 copies).
Departure Report (2 copies).
General Declaration in Form No. 1 – (3 copies).
Maritime Declaration of Health – (5 copies).
*Cargo Declaration in Form No. H – i.e. Cargo for Discharge – (3 copies).
*Vessel's Stores List in Form No. III – (5 copies).
List of Private Property (Property in possession of Master, Officers and crew of vessel) in Form No. IV – (5 copies).

*These items should be prepared in advance before arrival of the vessel. The other documents can be filled in after arrival.

Port Requirements:

General Particulars of the vessel.
Declaration of Deck Cargo and same bottom cargo.
Arrival and Departure Report on Port's Form – (in duplicate).
Declaration to comply with the Regulations of the Port for granting Certificate.

Immigration:

Crew List – (2 copies).
Passports for scrutinisation.

APPROACHES: The port has been created by carving out of the mainland a 200-acre lagoon 15.1 m. deep. The lagoon is connected to the sea by an approach channel, 5,400 m. long, 245 m. wide, 15.4 m. deep and protected by 2 breakwaters each 770 m. long, constructed one on either side of the channel and extends to the 5 m. contour.

NAVIGATION AIDS: The outer approach channel is marked by a Fairway Buoy and 4 sets of channel marker buoys which are lighted, and in addition there is a set of front and rear transit towers with lights to mark the center-line of the channel.

Obstruction: A visible wreck at Lat. 12° 54.5' N., Long. 74° 46.1' E., about 300 m. S.W. of Buoy No. 1, marked by a wreck buoy. All vessels approaching channel should avoid approach from South and keep clear.

PILOTAGE: Compulsory. ETA must be informed at least 48 hours ahead of arrival. In the message of ETA the following information must be included:

(a) Name.
(b) Nationality.
(c) Call sign of the vessel.
(d) LOA, Draft fore and aft, g.r.t. and n.r.t. of the vessel.

Telegraphic Address of the Pilot Station: New Mangalore Port Control. Tel: 407341/407428.

Pilot Boarding Station:
Latitude: 12° 54' 55" N. Longitude: 74° 45' 24" E.
VHF Channel to be used: Channel 16.
Channel to be used to contact Pilot Boat: Channel 12.
Description of Pilot Boat: Red hull and white superstructure.

Vessels should arrive at the pilot boarding point (0.5 miles North of Fairway Buoy) and await instructions from Pilot, who will, depending on weather conditions, give instructions regarding pilot boarding point.

Berthing and Unberthing:

(a) Berths arranged by the Committee of the Port Trust in advance.
(b) Three tugs available for berthing and unberthing.
(c) Linesmen and boatmen are arranged through Port Trust.
(d) ETD requires minimum 2 hours advance notice to Port Control/ Deputy Conservator/Harbour Master's Office.

ANCHORAGE: Vessels are advised to anchor at least 1 mile North of the Fairway Buoy, distance depending on draft of the vessel. Entry into the channel is made with 3 transit towers with lights.

RESTRICTIONS: No restrictions. Night pilotage available.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: The following radio advice is required:

(a) Name of the vessel and ETA with date.
(b) Request for Radio Pratique.
(c) International Code (ZT).
(d) International Code (ZU).
(e) List of Ports of Call with dates in last 30 days.
(f) Have/Have no monkeys on board.
(g) Have/Have no persons embarked at Aden/Djibouti.
(h) Condition of health of all on board with details of any sickness and whether all vaccinated.

RADIO: Mangalore Radio: Call sign VWL on 500 kHz., 438 kHz. Tel: 411388.

VHF: Communication facilities with Port Control on Channel 16. For Port Operations Channel 12 can be used. On arrival of the vessel general information will be given.

RADAR: No Port Radar Service.

TUGS: 2×32 ton bollard pull V.S.P. tugs and 1×22.5 ton bollard pull V.S.P. tugs available for berthing and unberthing of ships. Normally the tugs meet the vessel that is entering at the base line, which is at the entrance to the lagoon.

BERTHING: The port provides 7 alongside berths for handling general cargo, bulk cargo, break-bulk cargo, liquid cargo and containers, etc. Berth No. 8 is reserved for handling iron ore (mechanised) and handles 60,000 d.w.t. vessels. Berth No. 9 is exclusively for handling POL products, edible oil, Naphtha, LPG, etc.

(a) 1 straight wharf on the Eastern side of the dock arm which is 594 m. in length and consists of 3 berths having maximum permissible drafts of 10.1 m., 10.1 m. and 9.45 m., respective (South to North) of length 198 m. each.

(b) 1 straight wharf on the Western side of the dock arm which is 594 m. in length and consists of 3 berths having maximum permissible drafts of 9.1 m., 7.6 m. and 9.15 m. respectively (South to North) of length 198 m. each.
(c) 1 shallow draft berth of max. draft 6.5 m. and 125 m. in length.
(d) 1 iron ore berth of length 245 m. and max. draft 12.5 m. Effective loader travelling distance 170 m.
(e) Tanker Berth: See "Tankers".

CRANES: The following electric level luffing wharf cranes are positioned at the Straight Wharf: 1×6 ton, 3×3 ton and 4×10 ton.

One iron ore loader situated at the ore berth for loading iron ore, cement, etc., directly to vessels through chutes.

No cranes available in other berths.

Ship has to use her own gear in those berths.

Three tyre-mounted mobile cranes available for shore operations with capacity up to 30 tons. Similar cranes of lesser (5 ton) capacity available from private parties.

BULK CARGO FACILITIES: The Wharf Berths (No. 2, 3, 4, 5, 6 and 7) are reserved for bulk cargo handling. Normally grains, fertilisers, cement, coal, etc., are handled at this berth.

SPECIALISED CARGO HANDLING FACILITIES: This port is not specially equipped for handling containers. Containers are handled by ship's gear and with the limited mobile equipment of the port. Agents are allowed to use private handling equipment inside port.

Liquid chemicals/oils/molasses/LPG can be handled at oil jetty.

Liquid ammonia can be handled at Berth No. 4.

STEVEDORES: Advise before 0400 hrs. for commencing 0600 hrs. shift, and 1200 hrs. for commencing 1400 hrs. shift.

Main commodities loaded:

Coffee – average load rate per gang per shift – 120 tonnes.

Granite stones – average load rate per gang per shift 400 tonnes.

Fruit products and cashew kernels – average load rate per gang per shift – 3,500/4,000 cartons.

Reefer Cargo – average load rate per gang per shift – 3,500/4,000 cases.

Heavy Machinery – average load rate per gang per shift – 120 tonnes.

Iron ore concentrate and pellets through mechanised ship loader – 5,000/6,000 tonnes/hr.

Main Commodities Discharged:

Fertilisers – average discharge rate per gang per shift – 200 tonnes.

Timber – Average per gang per shift – 200 tonnes.

Tanker Oil – various, according to commodity.

MEDICAL: No advance notice except in cases of serious illness to be included in arrival cable. Ample hospital facilities for treatment are available.

TANKERS: The oil jetty is located in the S.W. portion of the lagoon very near to the approach channel. The maximum permissible draft available is 10.1 m., which affords berthing facilities for 30,000 d.w.t. (length 600 ft.) product carriers, molasses and edible oil, chemical and LPG tankers.

A second oil jetty has been constructed South of the first oil jetty by cutting out a dock arm, and it can accommodate crude and product oil tankers up to 12.5 m. maximum permissible draft and 85,000 d.w.t.

DENSITY: 1025. During S.W. Monsoon density varies, may fall to 1010.

FRESH WATER: Available by direct delivery from shore to vessel.

FUEL: Oil delivered by Indian Oil Corporation (a Government of India undertaking) by tank trucks in all berths. Major grades bunker fuel/diesel/marine lubricants can be obtained from them. Pipeline supply of fuel oil at iron ore berth and oil berths.

FIRE PRECAUTIONS: Only normal precautions against fire at berths.

CONSULS: No Consuls at the port.

REPAIRS: Most deck and engine repairs are carried out.

DRY DOCKS: No dry docking facilities at the port.

SURVEYORS:
(a) Qualified Cargo Surveying Agencies are available.
(b) Surveyors available for Lloyd's Register, American Bureau, B.V., etc.

GANGWAY/DECK WATCHMEN: Services are available and compulsory.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CUSTOMS ALLOWANCES: 50 grams of tobacco or 200 cigarettes and 950 ml. wine/spirits per person per week.

CARGO GEAR: Cargo can be handled either by ship's gear or shore cranes. Shore cranes are available up to 10 tonnes capacity.

REPATRIATION: Crew changes and repatriation can be carried out.

AIRPORT: 15 km. from the harbour and 21 km. away from Mangalore City. Air services available to Mumbai and Bangalore to connect with international flights.

TIME: Local time is 5 hours 30 minutes ahead of GMT.

HOLIDAYS: 26th January – Republic Day; 15th August – Independence Day; 2nd October – Gandhi Jayanthi.

No work on these days.

POLICE/AMBULANCE/FIRE: Tel: 100/102/101 respectively.

EMERGENCY CO-ORDINATION CENTRE: Relay information to Port Signal Station on VHF Channels 16/12.

TELEPHONES: Facilities available for local/international calls on all berths.

SERVICES: Services available for tank cleaning, compass adjusting, radio/radar repairs, etc., with prior arrangements.

BANKS: Branches of all nationalised banks.

STORING: See "Prelims".
(1) By truck.
(2) Barges are normally not used for storing.
(3) Trucks can proceed alongside berths.
(4) Forklifts also used on the jetty while handling palletised or heavy stores.
(5) Customs documentation and regulations are in force.
(6) Private labour is to be engaged for loading stores.

SHORE LEAVE: No restrictions – crew members are allowed to go ashore.

IDENTIFICATION CARDS: Shore passes are issued.

GARBAGE DISPOSAL: Available.

WASTE OIL DISPOSAL: Collection facility is available. Ships with their own gear and flexible hoses can discharge up to 500 tonnes of slop or ballast water into a tank constructed near oil jetty.

SEAMAN'S CLUBS: None.

CURRENCY: Indian Rupee (Rs.). U.S.$1.00 = Rs. 34.50 (8.96).

REGULATIONS: Vessel to comply with Major Port Trust Act and New Mangalore Port Trust Rules.

DELAYS: Priority berthing for 24 hours port stay are generally allowable for export and import general cargo ships. Otherwise berths are offered according to priority of arrival for long-duration ships.

DEVELOPMENTS: The size of ships for loading iron ore are to be increased. There is a possibility of handling ships transporting thermal coal for a 2×210 megawatt power generation station to be established in the neighbouring area.

SHIPMASTER'S REPORT: Updated 1987.

Documents: Same as other major Indian ports.

Pilotage: Pilot boards in vicinity of Fairway Buoy. Pilot boat has pilot flag atop its mast.

Restrictions: Regular night pilotage is provided.

Anchorage: North of Fairway Buoy as South of buoy being used as dumping ground for dredgers.

VHF: Channel 16 for calling and listening. Pilots operate on 12 and 16.

Radar: None.

Hospital: Hospital facilities good.

Hatches: Opening/closing by ship's crew.

Drydocks: None.

AUTHORITY: New Mangalore Port Trust, Panambur, Mangalore 575010, India. *Tel:* 407300, 407341 PABX. *Telex:* 0832-220 Ponm In. *Cables:* Portrust. *FAX:* 0824-408390. *Contact:* The Chairman.

AGENT: See "Cochin".

OKHA: 22.28 N. 69.05 E.

DOCUMENTS: 5 copies each of Import Manifest, Crew List. Passenger List, Ship's Stores Manifest, Crew Property List.

PILOTAGE: Compulsory. Pilot station Lat. 22° 30.5′ N., Long. 69° 04.6′ E.; 1.35 miles N.W. of Samiani Light Tower.

ANCHORAGE: Roadstead anchorage near Pilot Station.

MAX. SIZE: 525 ft. LOA during N.E. monsoon and 540 ft. LOA during S.W. monsoon. Max. draft variable, 22 ft. – 27 ft. depending on daily tide.

HEALTH: The Master should cable the Port Health Officer (Quarantine Okha) in International Health Code, requesting Free Pratique. If Radio Pratique is not effected, then Masters should present Maritime Declaration to the Customs Boarding Officer who is authorised to grant Free Pratique. If the vessel is arriving from yellow-fever area, the mosquito control team is arranged from Kandla, where the cable address of the Port Health Officer is "Sangrodh Kandla".

RADIO: Post and Telegraph Department Wireless station call sign VWO can be contacted from 0800 to 2000 hrs. I.S.T. for communication to and from Local Agents.

TUGS: Port-owned tugs join vessel while entering port channel and/or vacating it at time of berthing and/or unberthing.

CRANES: Vessels use own derricks for heavy lifts. There are 2 electric cranes at the Dry cargo berth each 1.5 – 2.0 tons capacity.

BERTHING: Only daylight hours. Vessels should be ready in all respects to move berth 1.5 hours before high water at Pilot Station.

Sayaji Pier – East side 27 ft. draft; West side 20 ft. draft.

Dry cargo berth – 25 ft. draft.

BRIDGES: None.

STEVEDORES: Firm ETA including requirements order avoid delay.

(a) Exports: Mainly cement, bauxite and chemicals and general merchandise, rate 100/125 tons per shift per hook.

(b) Imports: Mineral oils average rate about 300 to 500 t.p.h. according to ship's pumping capacity; general cargo same rate as export.

MEDICAL: Port Health Officer always available. Well-equipped hospital at Mithapur under Tata Chemicals at a distance of about 7 miles from port. Medical aid available throughout day and night.

TANKERS: All dry cargo vessels regulations apply for tankers, particularly size, etc. 1 berth, draft 27 ft. No slop facilities.

DENSITY: 1025.

FRESH WATER: Limited. Port supplying water by barge and shore pipeline. In normal cases 25 tons water supplied per day. In cases of emergency 40 tons water can be supplied per day.

FUEL: Available but arrangement should be made through Indian Oil Corporation; head offices at Mumbai.

FIRE PRECAUTIONS: Port Department maintains a small fire station.

CONSULS: None.

REPAIRS: Only minor repairs.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Vessel to provide own gangway watchmen. Shore-watchman available for employment on shift basis (8 hour shifts).

OPENING/CLOSING HATCHES: To be attended to by ship's crew, if not contracted with stevedores which may cost extra.

CERTIFICATES: Ship's Register, Load Line Certificate, Safety Equipment, Safety Gear, Radio.

CUSTOMS ALLOWANCES: At Customs Preventive Squad's discretion.

CARGO GEAR: Normal gear supplied by stevedores for hire.

REPATRIATION: Necessary formalities to be completed at District Headquarters situated at Jamnagar, a distance of about 110 miles: such as Police, Health (whereas Customs formality can be completed locally).

AIRPORT: Nearest airport Jamnagar about 110 miles connected with Okha by rail and road. Only local service to Mumbai daily operated.
TIME: GMT plus 5.5 hours. (I.S.T.)
HOLIDAYS: As declared by Port Authorities, cargo work can be arranged by paying usual scheduled overtime but labour's observed holidays (about 8 days in a year) completely closed.
TELEPHONES: Only for tankers by respective oil installation.
SERVICE: Tank cleaning by manual labour.
SHIP SUPPLY SERVICE: Off-shore ship supply service operated by J.M. Baxi and Co., Mumbai.
SHORE LEAVE: Crew allowed ashore after vessel cleared by immigration officer who boards vessel on arrival.
IDENTIFICATION CARDS: Necessary.
DELAYS: Delay only encountered if berth or moorings are occupied.
GENERAL: Port governed by Gujarat State and all rules and regulations laid down by them in addition to Central Government rules applicable to this port. Port connected with hinterland by rail, motor transport, 300 miles by sea from Mumbai, 2 tides in 24 hours, mean high water spring rise about 11.5 ft. and mean low water neap rise 9.5 ft.; current in neap tide is 2 to 3.5 knots. Wind force/direction during April/September S.W. 3/5 and in October/March N.W. to N.E. from 2/4.
AUTHORITY: Port Officer – Okha Port and Superintendent of Customs, Okha (Ahmedabad Collectorate).

AGENT: See "Cochin".

PARADIP: 20.14 N. 86.42 E. (See Plan)

PORT LIMITS: When vessel arrives in the Roads, 1 mile S.E. of Fairway Buoy.
DOCUMENTS:
8 copies Crew List.
3 copies Ship's Stores List (Form No. III).
Crew Private Property List (Form. IV) including Foreign Currency Declaration.
3 copies Currency Declaration.
3 copies Passenger List, if any.
3 copies Cargo Manifest.
3 copies Survey Bottom Cargo Manifest, if any.
3 copies Deck Cargo Certificate.
3 copies Hazardous Cargo Certificate.
3 copies "No Opium" Certificate.
3 copies Arrival Pets Abroad.
3 copies Declaration for "No Monkeys on Board".
3 copies Any other Declaration.

The Master of the vessel should deposit the following documents with the Port Authorities through their Agents.
Ship Registration.
International Load Line Certificate.
Safety Radio Certificate.
Light Dues Certificate.
Safety Equipment Certificate.
Last Port Clearance.
International Health Certificate.
Derat Certificate.
Last 3 Ports Certificate.
Cavities Certificate.
Ballast Certificate.
Vaccination/Inoculation Certificate.
Arms and Ammunitions Certificate.

The Agents will return the documents to the Master before sailing of the vessel along with the Port Clearance.
PILOTAGE: Notice of ETA must be intimated to the Harbour Master by Master or Ship's Agent not less than 24 hours before arrival of vessel in the Roads. Telegraphic Address: Harbourmaster, Portrust, Paradip. Telex: 0674-211. Channel 16 VHF is continuously watched. The pilot boat is white and flies Pilot's flag on the mast whenever Pilot is on board. Pilot boards the vessel S.E. of the Fairway Buoy. Vessels required to hoist call letters for identification. A vessel requiring a Pilot for sailing out is required to give minimum 2 hours' notice to Port Control on VHF Channel 16 and hoist "G" Flag one hour in advance.
ANCHORAGE: Vessels can anchor, depending on draft, 3 miles S.E. of Southern Breakwater in the recommended anchorage.
RESTRICTIONS: Pilotage is carried out from 0500 hrs. to 2100 hrs. 24 hours pilotage is under consideration.
MAX. SIZE: Maximum permitted LOA 260 m. and max. draft 12.0 m. Vessels loading iron ore are permitted to sail with 12.8 m. draft in fair weather period. LASH vessels are also entertained as a special case.
HEALTH: Send quarantine message to "Quarantine Paradipport" 24 hours before arrival for Radio Pratique. Pilot gives Free Pratique on boarding vessel subject to no sick person on board. In case of suspected disease or fever on board, Port Medical Officer visits ship at anchorage/berth and cases of contagious disease are isolated and sent to nursing home.
RADIO/VHF: Continuous VHF watch is maintained on Channel 16 at Port Signal Station. Working period 24 hours. Working Channels are 12, 9 and 6.

Vessels are requested to establish contact with the Port Signal Station when within VHF range (approx. 40 to 60 miles) and before entering, moving in or sailing from the port.

When within VHF range, ships are requested to give the following information:
(1) Name of ship.
(2) Last port of call.
(3) ETA.
(4) Vessels gross tonnage, LOA, breadth, draft, d.w.t. and speed.
(5) Number of cases of dangerous and contagious diseases on board.
(6) Type and quantity of cargo.
(7) Name of Agents and requirements.

TUGS: Two tugs of 18 tons bollard pull and 2 tugs of 30 tons bollard pull are available. Tugs join vessel inside breakwater. Ship's lines only used.
BERTHING: Vessels must have maximum ballast for berthing and unberthing.

Iron Ore Berth:	Length from dolphin to dolphin 320 m. Capable of berthing ships of 260 m. LOA with 12.8 m. draft, beam limited to 40 m. for Ore Handling Plant.
General Cargo Berth:	Total quay length 686.65 m. Depths: East Quay No. 1, 2 and 3 – 11.5 m. No. 3 – North: 12.5 m. Shore cranes available for loading and unloading.
South Quay:	Total quay length 265 m. Designed depth 11.5 m. No shore cranes available. Vessel to work with her own gear. Berth also used as a tanker discharge berth.
Mooring Berth:	Length 200 m. Designed depth 11.5 m.
Fertiliser Berth:	(Captive berth for Paradip Phosphates Limited) Quay length 252 m. Designed depth 12.5 m.
Multi-Purpose Berth:	Length 290 m. Designed depth 12.5 m.
West Quay:	Length 347 m. (Additional 50 m. under construction). Designed depth 12.5 m.

CRANES:

Type of Crane	*No.*	*Capacity*
Wharf Cranes	4	13 ton
Mobile Cranes	5	12.5 ton
Mobile Cranes	1	31.75 ton
Cargo Handling Equipment:		
Forklift Trucks	14	3 ton
Front End Loaders	4	2.3 cu.m. to 4 cu.m.
Tractor Trailer	1	5 ton
Shovels	2	3.5 cu.yd.
Bulldozer	1	180 h.p.
Track Shovel	1	1.3 cu.m.

BULK HANDLING FACILITIES: 1 iron ore berth with mechanical loading plants of rated capacity 2,500 t.p.h. Average loading rate 20,000 - 25,000 tons per day.
SPECIALISED CARGO HANDLING FACILITIES: Semi-mechanised handling facilities for coal, chrome and other bulk cargoes are available.

At the Fertiliser Berth facilities exist for fully mechanised unloading of bulk rock phosphate, phospheric acid and ammonia.
Warehouses and Transit Sheds: 4 warehouses are available, having capacity of storage of 22,515 tonnes and Transit Sheds having a space for storage of 48,450 tonnes. There are also a number of private warehouses belonging to Central Warehousing Corporation with a total storage capacity of 20,000 tonnes. At present, 220,300 sq.m. of open stacking area is available inside the Port area for storage of more than 3 million tonnes of different cargoes. These stockyards are connected with rail and road.
Port Railway: Port has its own railway system.
STEVEDORES: Stevedores required for loading/unloading of cargoes at General Cargo Berth and Mooring Berth. A number of stevedoring companies are available in the Port. The Port Trust also undertakes stevedoring. Average loading rates achieved for different cargoes as follows:

Cargo	*Tonnes per day*
Chrome-ore	3,000
Coal	5,000
Iron & Steel	3,000
Foodgrains	1,000
Fertilisers	1,000
Other General Cargo	800
Phospheric Acid	15,000
Ammonia (Liquid)	8,000

MEDICAL: A 50 bed port hospital is available at the port. The crew can also be treated at the Government hospitals at Cuttack and Bhubaneswar which are 98/120 km. respectively from Paradip.
TANKERS: Tankers are being handled regularly at the South Quay and the Iron Ore Berth. Transhipment operation is carried out at Iron Ore Berth and at South Quay, both transhipment and shore discharging are being undertaken. At present only H.S.D. and S.K.O. are handled.

Also see "Shipmaster's Report".
DENSITY: Varies from 1018 to 1024 with average of 1021. Density as low as 1009 is also reported during Winter months.
FRESH WATER: Water supply is available alongside berths and through water barges at the moorings. Water supply is possible in the Roads in fine weather.
FUEL: HSD and furnace oil can only be procured from Cuttack on duty paid oils only. Arrangements will have to be made well in advance. Oil is transported by small road tankers of capacity 11 tons to 12 tons. Port provides berthing facilities for taking bunkers.
CONSULS: Nearest consuls located at Calcutta.
FIRE PRECAUTIONS: There is a fire station situated inside the Port area equipped with one water tender, 4,500 litres capacity and 2 trailer pumps (capacity: 1,000 and 600 litres). One foam tender is being procured during 1988. All tugs are equipped with external fire fighting equipment which is available for use in the event of fire.
REPAIRS: Minor repairs can be undertaken.
DRY DOCKS: A 500-ton slipway available for repairs to port craft. No dry dock available.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Last Port of Clearance.
Derat Certificate.

GANGWAY/DECK WATCHMEN: Gangway watch is required.
OPENING/CLOSING HATCHES: Undertaken by crew only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or Spirit: 1 bottle of 24 ounces per head per week.
CARGO GEAR: Valid cargo gear certificate required. Dock Safety Inspector inspects the cargo gear.
REPATRIATION: Repatriation of foreign personnel is permitted.
AIRPORT: Nearest airport at Bhubaneswar 120 km. Direct flights available to Delhi, Calcutta, Mumbai and Hyderabad.
TIME: Local time GMT plus 5.5 hours.
HOLIDAYS: Charter Party holidays. Normally work carried out on all days.
POLICE/AMBULANCE/FIRE: Police 22027; Ambulance 22041; Fire Station 22385. Also contact Port Signal Station on VHF Channel 16.
TELEPHONE: No facilities for telephones on board. Telephone booths operated privately are available at some berths. Crew can make international calls on payment.
SERVICES: Available.
SHORE LEAVE: Immigration Authority issue shore passes to all foreign nationals and with shore passes crew allowed ashore.
IDENTIFICATION CARDS: Authorities issue landing pass.
GARBAGE DISPOSAL: Collection service not available, can be arranged by agent.
WASTE OIL DISPOSAL: A 100 ton barge is available for the reception of oily waste. The port authorities are to be contacted through the agent.
SEAMAN'S CLUBS: None.
CURRENCY: Indian Rupee (Rs.). U.S.$1.00 = Rs. 35.50 (12.10.96).
DELAYS: Generally no delays. Vessels are allotted berths on "first come first served" basis.
DEVELOPMENTS: Dredging of two mechanised coal berths, North of existing iron ore berth is in progress. Berths are expected to be operational by 1998.

An oil berth for vessels 100,000 d.w.t. is in the design stage.

SHIPMASTER'S REPORT: February 1996.

I.O.C. Paradip has one HSD tank (48,000 cu.m.) already in use, one SKO (48,000 cu.m.) and one MS tank (30,000 cu.m.) (To be commissioned by March 1996). HSD and SKO tanks are fed by a common 24 in. line, and M.S. tank is fed by a 16 in. line from South Quay (multi-purpose jetty).

HSD and SKO tanks are to be used for storage of HSD. MS tank to be used for storage of SKO, as there is no permission for handling high volatile products as yet. I.O.C. Terminal has facility to load tankers at South Quay (SKO and MS).

The above white products farm is 6 km. – 8 km. from South Quay. I.O.C. requests for maximum pressure 4 kg./sq.cm. or 1,500 cu.m./hr. (whichever achieved first). The weakest links in the system are the flexible hoses, which are of indigenous make and not suitably tested. I.O.C. requests to set up Chicksan is pending with the port.

Officially declared draft at this berth is 11.6 m., but ships up to 11.9 m. have berthed.

AUTHORITY: The Chairman, Paradip Port Trust, P.O. Paradip Port, District Jagatsinghpur, (Orissa), India 754 142. *Tel:* 06722-22046, 22127. *Telex:* 0674-211. *Cables:* Portrust, Paradip. *FAX:* 06722-22256. *Contact:* Deputy Conservator (Tel: 06722-22025 (Office), 06722-22194 (Residence)).

AGENT: See "Cochin".

PONDICHERRY: 11.56 N. 79.50 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Stores List with Private Property Declaration in Triplicate.
Crew List (8 copies).
Light Dues Receipt.
Manifest (Import or Export).
Bill of Lading.
PILOTAGE: Not necessary as open roadstead anchorage.
ANCHORAGES: Proper anchorage in line with New Pier. 2 chimneys in line (276°) will provide good transit in day time and at night green/red light in transit with red pier light can be taken.
MAX. SIZE: Anchorage is 7 fathoms within 1 mile from New Pier.
HEALTH: Free Pratique obtained on arrival and Master expected to address message to Port Health Officer, advising that all are well on board. Free Pratique automatic for vessels calling from any Indian ports.
RADIO: Cables routed through Madras Radio (call sign VWM).
TUGS: Tug kept ready at New Pier for towing barges.
BERTHING: Berthing facilities for vessels up to 500 d.w.t.
STEVEDORES: 48 hours notice prior to arrival. Rate of discharge of bagged cargo 800 to 1,000 tons per day.
MEDICAL: No advance notice necessary. General Hospital and Jipmer Hospital available.
TANKERS: Transfer operations are carried out at anchorage 1.5 miles – 2.5 miles offshore.
DENSITY: 1025.
FRESH WATER: Available. Rate 50-60 tonnes per day.
FUEL: Not available.
CONSULS: Only French Consulate General. Tel. 4058.
REPAIRS: Deck and Engine repairs not attended. Special arrangements can be made from Madras. Minor repairs carried out privately.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Services not compulsory, but recommended to avoid pilferage. 3 watchmen day/night.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each Crew member to be held out of bond. Wine and/or Spirit, 1 open quart bottle per Crew member permitted to be held out of bond.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.
AIRPORT: Nearest airport is Meenambakam Airport, Madras, (160 km.).
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Authorities but cargo work arranged on all holidays on payment of overtime, except on Republic Day, Gandhi's Birthday, May Day and Independence Day.
POLICE/AMBULANCE/FIRE: Police 100; Fire 101; Ambulance arranged through hospital doctor on duty, Tel: 6008.
TELEPHONES: No facilities to place on board.
SERVICES: Ship chandling and supply of stores available.
SHORE LEAVE: Crew members permitted ashore but have to remain within town limit.
IDENTIFICATION CARDS: Not needed if furnished with Crew List.
DELAYS: Delays occur only under unavoidable circumstances such as Surf Declaration, Cyclone, etc. Vessels arriving at night, commence discharge operations next morning.
GENERAL: For purposes of crew going ashore, launches arranged between 0600 hrs. and 1800 hrs. weather permitting, hired from private parties. Laundry facilities, supply of fresh vegetables and provisions arranged.
AUTHORITY: Government of Pondicherry, Port Department, Pondicherry. *Contact:* Captain N. Selvaraje, Port Director.
AGENT: See "Cochin".

PORBANDAR: 21.38 N. 69.36 E.

DOCUMENTS:
Crew Lists (6 copies).
Passenger Lists (6 copies).
Customs Documents to be prepared by Agents and signed by Master (4 copies).
Arms and Ammunition Certificate 4 copies duly signed by Master.
Health Documents: All yellow fever and cholera books should be valid on arrival as well as on departure, if they are not valid on departure Port Health Officer should visit ship and give required injection to persons for completing health books before obtaining Bill of Health.
Port Clearance: Port Clearance of last port to be submitted to Boarding Officer of Customs.
Private Property List (6 copies duly signed by Master).
Stores List (4 copies duly prepared by ship's officer).
Currency Declaration (4 copies).
Bills of Lading: Bills of Lading for export cargo generally to be prepared and signed by Agents.
PILOTAGE: Compulsory for inward/outward movements for all vessels and for shifting to and from berths.
ANCHORAGE: Anchor in stream about 1.5 miles off shore. 6 fathoms at low water, with good holding ground.

Outer anchorage is with Rajah's Old Palace, about 1.5 miles South-eastward of lighthouse, bearing 085° and lighthouse bearing 026°, 4.5 fathoms to 5 fathoms sand and rock (or further out as required).
MAX. SIZE: Any size vessel at anchorage. Alongside berth – Max. LOA of vessels up to 177 m. Max. permissible draft 9.00 m. No beam restrictions.

1 mooring buoy – max. draft 7.0 m.

For roadstead, no restrictions on length or breadth.
HEALTH: If arriving from yellow fever area within 30 days a grant of Free Pratique is necessary. Mosquito Party to be deputed from Kandla, which can only be arranged by prior intimation, failing which vessel would have to proceed to either Kandla or Mumbai for Free Pratique.
RADIO: Porbandar call sign VWY, working frequency 462 kHz and watch keeping on 500 kHz.
TUGS: Will join ships for assisting berthing/unberthing.
BERTHING: 1 alongside berth and 1 mooring buoy.
STEVEDORES: 24 hours notice required for Agents to arrange gangs.

Average rate of working – 380 to 400 tons per gang per day for general cargo.

For vessels loading bulk ores 3,000 to 4,000 tons per day with ship's gear.

Export Commodities: G.N. Extraction in bags, bulk ground nut HPS, cotton bales, frozen fish, lime and lime stone, lime powder, abrasive powder, bauxite, white clay, fruits, onion, etc.
MEDICAL: Government hospital available. There are also private hospitals.
TANKERS: Presently no facility for discharging oil.
FRESH WATER: Vessels alongside can be supplied by pipeline and water tanker. Vessels at anchorage supplied by water barge.
FUEL: Fuel can be supplied by road tankers at berth through Indian Oil Corporation at Okha and Rajkot.
CONSULS: None.
REPAIRS/DRY DOCKS: A dry dock of 150 ft.×55 ft. for repairs to port crafts. Also port workshop for repairs to shore and marine equipment.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Charter Party terms.

CERTIFICATES:
(*a*) Load Line Certificate.
(*b*) Safety Equipment Certificate.
(*c*) Safety Radio Certificate, all certificates must be valid before departure of vessel.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship.

Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.

CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.

AIRPORT: 3 miles from town, daily flight to Mumbai.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.

POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.

SHORE LEAVE: Police, port and Customs permission required before landing.

IDENTIFICATION CARDS: Necessary.

GENERAL: The port is an "all weather port".

AUTHORITY: Office of the Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, New Mental Hospital Building, Block No. 0/20, Ahmedabad - 380 016. *Tel:* 66610, 45116, 66270. *Cables:* Princport. *Contact:* The Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, Ahmedabad-16.

The Port Officer, Gujarat Maritime Board, Porbandar – 360 575, Gujarut State, India.

AGENT: See "Cochin".

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS:

Arrival:
- Maritime Declaration of Health Form (in duplicate).
- Port Clearance from last port of call.
- Ship's Stores List (in triplicate).
- Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
- Crew Lists (6 copies).
- Ship's Currency List (in triplicate).
- Arms and Ammunition Declaration.
- Passenger List – if any.
- Through Cargo Manifests.

Departure:
- Medical Inspection or Examination Certificate (Bill of Health).
- Port Clearance.
- Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Mumbai Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.

ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44' N., Long. 73° 39' E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about 0.75 miles S.S.W. and about 0.5 miles Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).

MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.

HEALTH: On arrival, Customs Authorities board and grant Free Pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for Radio Pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants Pratique after boarding vessel with Mosquito Party deputed from Mumbai at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Mumbai and/or Mormugao for Free Pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging Pratique. Vessels transiting through above infected areas for bunkers or water only do not require Mosquito Party for obtaining Pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.

RADIO: Mumbai Radio.

BERTHING: No berths. Open roadstead port.

LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOB terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increased fleet and improvement of shore loading facilities.

MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.

DENSITY: Average 1025.

FRESH WATER/FUEL: Not available.

CONSULS: None.

REPAIRS/DRY DOCKS: None.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.

CERTIFICATES: All certificates, particularly Cargo Gear Certificate to be in order and valid.

CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.

REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.

AiRPORT: Belgaum and/or Vascodagama 90 miles distant.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.

SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, Crew List and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.

IDENTIFICATION CARDS: Necessary.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Indian Rupee (Rs.).

REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.

DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.

GENERAL: Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.

AUTHORITY: Port Officer Vengurla, District Sindhudurg, Maharashtra State, India. *Tel:* Vengurla 177.

AGENT: See "Cochin".

SIKKA: 22.34 N. 69.42 E.

SHIPMASTER'S REPORT: June 1982.

DOCUMENTS: 8 Crew Lists, 6 each Personal Effects and Stores Lists, 4 Vaccination Lists, 5 Currency Lists, (Customs do like all paperwo properly prepared).

On departure 3 Crew Lists if any changes and 3 Personal Effects Lists for those who remained on board.

For personnel leaving, Customs require Currency Form (Foreig Exchange Act 1947) in duplicate (Indian Form) and International Crew Baggage Declaration (Local Form) in duplicate.

Clearance from Last Port, Register, Load Line, Derat, Safcon, Safequip and Safradio all sighted by Agent but not taken from vessel.

All personal belongings to be recorded with makes, models and numbers.

PILOTAGE: Pilot boards vessel at anchor from tug boat using ship's derrick and tug's basket if weather is rough.

ANCHORAGE: Plenty of room for anchoring with good holding ground. Contact Mother Tanker for anchor position. We, berthing on flood tide, were requested to anchor 2 miles – 069° True from Mother Tanker.

Locally the storage vessel is referred to as the Mother Tanker (MT) and own ship (OS).

RESTRICTIONS: Apparently none, plenty of water. Larger vessels (this vessel 149,000 d.w.t.) are loaded from daughter tankers which go alongside OS.

HEALTH: Free Pratique is granted by Customs Officer.

RADIO: To local Agent at Jamnagar via Bedi Radio VUK5. The MT (which was m.t. "Koyali") keeps an R/T watch. Would suggest contacting the MT for any advance information as nobody else would give any.

VHF: Call MT on Channel 16. While anchored/approaching Channel 11 is used after initial contact. While double banked Channel 13 is used between MT and OS. Cargo operations are conducted on UHF using MT walkie-talkies. Contact Shipindia Channel 13, who pass messages to and from Agent.

TUGS: One tug available but not used. Tug used by Pilot and runs lines from OS to MT.

BERTHING: Position off Sikka for cargo operations approximately Lat. 22° 34' N., Long. 69° 42' E. Apparently 140,000 d.w.t tankers are the ideal size. They berth alongside MT and can take up to a full cargo without the MT having to top up from a daughter tanker. Operations off Sikka are temporary and from 1st May to end of monsoon. Consult with Pilot about berthing and obtain all details. Vessels berth alongside when tide is running in daylight hours. Usual Yokohama fenders used, 4 for vessels less than 750 ft. LOA and 6 for vessels over 750 ft. LOA. Fenders are made fast on MT. First 2 floatable headlines from OS to MT at least 220 m. long and may require longer. They do not like using '1st ropes ashore' off reels. In our opinion '1st ropes ashore' would be quite adequate and fast enough. Then 2 floatable stern lines from OS to MT. Final moorings were from OS to MT 3 and 2 each end with no breastlines. From MT to OS 2 headlines leading aft, 2 stern lines leading forward, forward 2 springs leading from forward to aft and 2 springs aft leading from aft to forward.

TANKERS: Loading by 2×10 in. ID hoses of ASA 150 standard, 23 m. long.Their discharge rate is quoted as 12,000 t.p.h and OS receives a letter to this effect with a request for OS loading rate. However, hoses restrict rate to about 2,700 t.p.h. overall. Hoses provided by MT, reducers supplied by OS. Only ropes or wires with rope tails used for mooring. Entire operation is guided by the ICS, OCIMF, ISGOTT. Tankers being loaded by daughter tankers should anchor with port anchor and daughter tanker berths starboard side. OS port side derrick and manifolds used alongside MT. Ballast is pumped overside. Ballast draft on arrival to be such that distance from manifold to water line does not exceed 15 m. Ballast trim not to exceed 3 per cent of LOA at any time. Distance of manifold to water line must never exceed 15 m. EDP is used. Samples are taken to Mumbai for analysis before B/L figures are given together with cargo quality details. API, loading temperature and pourpoint are given prior to loading. Our API was 39.48 at 60°F and loading temperature will normally be around the same as sea temperature of about 86°F (as during 1st week in June). Cargo was Indian High crude, very thin and apparently quite clean. A Loading Master boards to assist with berthing but does not live aboard. Accommodation and victuals required for Pilot, 2 Cargo Surveyors and 1 Indian Oil Representative. MT normally has 9.5 shackles of cable out. MT does COW but not usual with OS of 140,000 d.w.t. tanker.

WATCHMEN: Not necessary. The only boats allowed alongside were official boats and no other small boats were observed in the vicinity. There is no gangway between MT and OS.

CUSTOMS ALLOWANCES: 200 cigarettes. The State of Gujarat is 'dry' and no alcohol allowed ashore, except foreigners being repatriated may take one bottle.

REPATRIATION: Possible. Airport at Jamnagar. The boat journey ashore is about 2 hours but boat can only get to or leave jetty about 2 hours either side of high water. Foreigners require a visa otherwise they may travel in India but are not allowed to stay at hotels. This applies to departing and arriving personnel. Indian crew are not allowed Rupee notes of greater denomination than 20 Rupees.

AIRPORT: About 1.5 hours drive by car.

SHORE LEAVE: Possible, but due to length of journey and tidal restrictions it is not recommended.

GENERAL: In June 1982 "VQ" Buoy Kachchh was missing, shore authorities were advised. A night approach is better than a daytime approach as the buoys are not easy to sight against the discoloured water (on flood tide) although the buoys and Racons show very well on radar.

DEVELOPMENTS: After the end of the SW Monsoon (1982) work will resume on the oil and gas lines to Mumbai from the offshore oil-field. An SPM will probably be positioned off Mumbai and this will be used during the SW Monsoon when vessels cannot load at the oil-field.

OPERATOR: Shipping Corporation of India Limited.

SHIPMASTER'S REPORT: July 1994.

Berth Location: Lat. 22° 27.4' N., Long. 69° 47.8' E. (approx.).

A vessel is considered to have arrived when she is in the vicinity of the pilot boarding ground (Lat. 22° 30' N., Long. 89° 46' E.). As vessels are berthed/unberthed only during daylight hours, ships arriving during hours of darkness will have to anchor. Good holding ground is available about 1 mile North of the pilot boarding ground in 17.0 m. of water. During the months of May to October, crude oil lighterage operations are conducted about 2 miles North of this anchorage area.

The discharge berth at Sikka is owned by Gujrat State Fertiliser Corporation (G.S.F.C.) and managed by the Gujrat Maritime Board. The berth presently has facility for the discharge of ammonia and phosphoric acid, though work is in progress to extend this for LPG imports. Pilot for movements to and from the berth is requisitioned from other neighbouring ports.

There is no radio station at Sikka. However, Bedi Radio (of a neighbouring port) keeps a watch on VHF Channel 16 during daytime hours. Alternatively, the Agent calls the ship on VHF to exchange any information.

Berthing generally takes place just before slack water. Ships berth stemming the tide. Ships with a maximum draft of 8.0 m. are accepted alongside. This ship has berthed prior to low water slack with an aft draft of 7.2 m. The least depth in the approach of the channel as shown on the chart is 8.0 m. However, whilst approaching berth with the ship's head 140° and about 3 cables and also 1 cable from the berth, the ship smelt bottom resulting in sluggish handling and loss of steering with a telltale muddying of water.

Two very low powered tugs are presently available for assisting in berthing. These are also used to take lines ashore. It is best to keep only a shallow bight when the tug is taking lines ashore, so that they are quick to take weight on the bollard.

The berth lies at the end of a causeway with 4 dolphins, two on either side of the berth. The berth is fendered by pneumatic (Yokohama) fenders. The top edge of the berth and dolphins are fendered by tractor/truck tyres. The lay of the berth is about 168°. Ships drawing 8.0 m. and up to 180 m. LOA have been accommodated at the berth. Due to the construction of the berth, the accommodation ladder (gangway) cannot be used and the ship's wharf ladder must be kept ready.

Ammonia is discharged through a hardarm. The ship provides a 300 ASA 8 in. reducer to which the hardarm is connected by shore staff. Phosphoric acid is also discharged at the berth using a 10 in. flexible hose.

The shore line to the tank is about 5 km. long. We discharged at a low rate of about 100 tonnes/hr. for about 6 hours before increasing rate to a maximum of 650 tonnes/hr.

About 4 cables South of the berth lies a disused island berth which was once connected to shore by a ropeway. The supporting pillars of the ropeway still stand. The jetty was in use for the export of cement from the factory located inshore. Cement is presently loaded into ships at the anchorage working with barges.

This vessel picked up fresh provisions at Sikka which are of reasonable price and quality. It is understood that fresh water can be supplied by barges and bunkers can be arranged by trucks. However, adequate notice is required.

Sikka is a small town serving 2 major factories and a thermal power plant located there. Local population consists mostly of fisherfolk. It is connected by a good road to Jamnagar, a mid-sized city about 30 km. away, where all Government offices and Agents are located, as also are an airport and a railroad station which connect Jamnagar to the rest of the country. Mumbai has the closest international airport. International telephone calls can be made from Sikka/Jamnagar. Transportation has to be arranged by the Agent, as no unauthorised vehicle is allowed to approach the berth beyond the security check-point, which itself is about 4 km. away.

Strict prohibiton is in force ashore and an infringement could lead to embarrassment and delays.

The earlier Shipmaster's Report of 1982 in the Guide refers to the required documentation and is still valid. Currency regulations for Indian crew has been amended (R.B.I. Notification No. FERA 153/93 dated 12.7.93), and currency up to Rs. 1,000 may be carried by them in denominations not greater than Rs. 50.

AGENT: See "Cochin".

TUTICORIN: 08.45 N. 78.13 E.

PORT LIMITS: *On the North:* A line drawn due East from the boundary pillar erected to the North at Arasadi along the parallel of Lat. 08° 50' N., to a position in Lat. 08° 50' N., Long. 78° 22' E.

On the East: A line joining a position in Lat. 08° 50' N., Long. 78° 22' E. to a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E.

On the South: A line due West from a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E. to where it meets the point 45.72 m. from the HW mark on the shore.

DOCUMENTS: Required on arrival:

4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Stores List.
2 Health Report Form.

All statutory certificates in respect of vessels in Marine, Traffic, Customs and Immigration.

PILOTAGE: Compulsory within the pilotage zone. At present pilotage is restricted from 0600 hrs. to 1800 hrs. There is no night pilotage. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Tuticorin must report ETA via their Agents at least 72 hours in advance, and again 24 hours in advance of arrival. The ETA must be confirmed or amended not less that 6 hours prior to arrival. Time can be either in GMT or IST. The vessels must contact Port Signal Station on VHF Channels 16/12. In message of ETA, the following information must be included:

1. Name/call sign of the vessel.
2. Nationality.
3. Length, draft and g.r.t.
4. Last port and cargo.
5. Port of origin/destination of cargo.
6. Last Port of call/next port of call.

CERTIFICATES:
(*a*) Load Line Certificate.
(*b*) Safety Equipment Certificate.
(*c*) Safety Radio Certificate, all certificates must be valid before departure of vessel

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship.

Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.

CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.

AIRPORT: 3 miles from town, daily flight to Mumbai.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.

POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.

SHORE LEAVE: Police, port and Customs permission required before landing.

IDENTIFICATION CARDS: Necessary.

GENERAL: The port is an "all weather port".

AUTHORITY: Office of the Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, New Mental Hospital Building, Block No. 0/20, Ahmedabad - 380 016. *Tel:* 66610, 45116, 66270. *Cables:* Princport. *Contact:* The Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, Ahmedabad-16.

The Port Officer, Gujarat Maritime Board, Porbandar – 360 575, Gujarut State, India.

AGENT: See "Cochin".

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS:

Arrival:
- Maritime Declaration of Health Form (in duplicate).
- Port Clearance from last port of call.
- Ship's Stores List (in triplicate).
- Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
- Crew Lists (6 copies).
- Ship's Currency List (in triplicate).
- Arms and Ammunition Declaration.
- Passenger List – if any.
- Through Cargo Manifests.

Departure:
- Medical Inspection or Examination Certificate (Bill of Health).
- Port Clearance.
- Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Mumbai Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.

ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44' N., Long. 73° 39' E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about 0.75 miles S.S.W. and about 0.5 miles Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).

MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.

HEALTH: On arrival, Customs Authorities board and grant Free Pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for Radio Pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants Pratique after boarding vessel with Mosquito Party deputed from Mumbai at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Mumbai and/or Mormugao for Free Pratique. Master and/ or Owners to give Agents prior notice to avoid delay in arranging Pratique. Vessels transiting through above infected areas for bunkers or water only do not require Mosquito Party for obtaining Pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.

RADIO: Mumbai Radio.

BERTHING: No berths. Open roadstead port.

LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOB terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increased fleet and improvement of shore loading facilities.

MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.

DENSITY: Average 1025.

HEALTH: Free Pratique is granted by Customs Officer.

RADIO: To local Agent at Jamnagar via Bedi Radio VUK5. The MT (which was m.t. "Koyali") keeps an R/T watch. Would suggest contacting the MT for any advance information as nobody else would give any.

VHF: Call MT on Channel 16. While anchored/approaching Channel 11 is used after initial contact. While double banked Channel 13 is used between MT and OS. Cargo operations are conducted on UHF using MT walkie-talkies. Contact Shipindia Channel 13, who pass messages to and from Agent.

TUGS: One tug available but not used. Tug used by Pilot and runs lines from OS to MT.

BERTHING: Position off Sikka for cargo operations approximately Lat. 22° 34' N., Long. 69° 42' E. Apparently 140,000 d.w.t tankers are the ideal size. They berth alongside MT and can take up to a full cargo without the MT having to top up from a daughter tanker. Operations off Sikka are temporary and from 1st May to end of monsoon. Consult with Pilot about berthing and obtain all details. Vessels berth alongside when tide is running in daylight hours. Usual Yokohama fenders used, 4 for vessels less than 750 ft. LOA and 6 for vessels over 750 ft. LOA. Fenders are made fast on MT. First 2 floatable headlines from OS to MT at least 220 m. long and may require longer. They do not like using '1st ropes ashore' off reels. In our opinion '1st ropes ashore' would be quite adequate and fast enough. Then 2 floatable stern lines from OS to MT. Final moorings were from OS to MT 3 and 2 each end with no breastlines. From MT to OS 2 headlines leading aft, 2 stern lines leading forward, forward 2 springs leading from forward to aft and 2 springs aft leading from aft to forward.

TANKERS: Loading by 2×10 in. ID hoses of ASA 150 standard, 23 m. long.Their discharge rate is quoted as 12,000 t.p.h and OS receives a letter to this effect with a request for OS loading rate. However, hoses restrict rate to about 2,700 t.p.h. overall. Hoses provided by MT, reducers supplied by OS. Only ropes or wires with rope tails used for mooring. Entire operation is guided by the ICS, OCIMF, ISGOTT. Tankers being loaded by daughter tankers should anchor with port anchor and daughter tanker berths starboard side. OS port side derrick and manifolds used alongside MT. Ballast is pumped overside. Ballast draft on arrival to be such that distance from manifold to water line does not exceed 15 m. Ballast trim not to exceed 3 per cent of LOA at any time. Distance of manifold to water line must never exceed 15 m. EDP is used. Samples are taken to Mumbai for analysis before B/L figures are given together with cargo quality details. API, loading temperature and pourpoint are given prior to loading. Our API was 39.48 at 60°F and loading temperature will normally be around the same as sea temperature of about 86°F (as during 1st week in June). Cargo was Indian High crude, very thin and apparently quite clean. A Loading Master boards to assist with berthing but does not live aboard. Accommodation and victuals required for Pilot, 2 Cargo Surveyors and 1 Indian Oil Representative. MT normally has 9.5 shackles of cable out. MT does COW but not usual with OS of 140,000 d.w.t. tanker.

WATCHMEN: Not necessary. The only boats allowed alongside were official boats and no other small boats were observed in the vicinity. There is no gangway between MT and OS.

CUSTOMS ALLOWANCES: 200 cigarettes. The State of Gujarat is 'dry' and no alcohol allowed ashore, except foreigners being repatriated may take one bottle.

REPATRIATION: Possible. Airport at Jamnagar. The boat journey ashore is about 2 hours but boat can only get to or leave jetty about 2 hours either side of high water. Foreigners require a visa otherwise they may travel in India but are not allowed to stay at hotels. This applies to departing and arriving personnel. Indian crew are not allowed Rupee notes of greater denomination than 20 Rupees.

AIRPORT: About 1.5 hours drive by car.

SHORE LEAVE: Possible, but due to length of journey and tidal restrictions it is not recommended.

GENERAL: In June 1982 "VQ" Buoy Kachchh was missing, shore authorities were advised. A night approach is better than a daytime approach as the buoys are not easy to sight against the discoloured water (on flood tide) although the buoys and Racons show very well on radar.

DEVELOPMENTS: After the end of the SW Monsoon (1982) work will resume on the oil and gas lines to Mumbai from the offshore oil-field. An SPM will probably be positioned off Mumbai and this will be used during the SW Monsoon when vessels cannot load at the oil-field.

OPERATOR: Shipping Corporation of India Limited.

SHIPMASTER'S REPORT: July 1994.

Berth Location: Lat. 22° 27.4' N., Long. 69° 47.8' E. (approx.).

A vessel is considered to have arrived when she is in the vicinity of the pilot boarding ground (Lat. 22° 30' N., Long. 89° 46' E.). As vessels are berthed/unberthed only during daylight hours, ships arriving during hours of darkness will have to anchor. Good holding ground is available about 1 mile North of the pilot boarding ground in 17.0 m. of water. During the months of May to October, crude oil lighterage operations are conducted about 2 miles North of this anchorage area.

The discharge berth at Sikka is owned by Gujrat State Fertiliser Corporation (G.S.F.C.) and managed by the Gujrat Maritime Board. The berth presently has facility for the discharge of ammonia and phosphoric acid, though work is in progress to extend this for LPG imports. Pilot for movements to and from the berth is requisitioned from other neighbouring ports.

There is no radio station at Sikka. However, Bedi Radio (of a neighbouring port) keeps a watch on VHF Channel 16 during daytime hours. Alternatively, the Agent calls the ship on VHF to exchange any information.

Berthing generally takes place just before slack water. Ships berth stemming the tide. Ships with a maximum draft of 8.0 m. are accepted alongside. This ship has berthed prior to low water slack with an aft draft of 7.2 m. The least depth in the approach of the channel as shown on the chart is 8.0 m. However, whilst approaching berth with the ship's head 140° and about 3 cables and also 1 cable from the berth, the ship smelt bottom resulting in sluggish handling and loss of steering with a telltale muddying of water.

Two very low powered tugs are presently available for assisting in berthing. These are also used to take lines ashore. It is best to keep only a shallow bight when the tug is taking lines ashore, so that they are quick to take weight on the bollard.

The berth lies at the end of a causeway with 4 dolphins, two on either side of the berth. The berth is fendered by pneumatic (Yokohama) fenders. The top edge of the berth and dolphins are fendered by tractor/truck tyres. The lay of the berth is about 168°. Ships drawing 8.0 m. and up to 180 m. LOA have been accommodated at the berth. Due to the construction of the berth, the accommodation ladder (gangway) cannot be used and the ship's wharf ladder must be kept ready.

Ammonia is discharged through a hardarm. The ship provides a 300 ASA 8 in. reducer to which the hardarm is connected by shore staff. Phosphoric acid is also discharged at the berth using a 10 in. flexible hose.

The shore line to the tank is about 5 km. long. We discharged at a low rate of about 100 tonnes/hr. for about 6 hours before increasing rate to a maximum of 650 tonnes/hr.

About 4 cables South of the berth lies a disused island berth which was once connected to shore by a ropeway. The supporting pillars of the ropeway still stand. The jetty was in use for the export of cement from the factory located inshore. Cement is presently loaded into ships at the anchorage working with barges.

This vessel picked up fresh provisions at Sikka which are of reasonable price and quality. It is understood that fresh water can be supplied by barges and bunkers can be arranged by trucks. However, adequate notice is required.

Sikka is a small town serving 2 major factories and a thermal power plant located there. Local population consists mostly of fisherfolk. It is connected by a good road to Jamnagar, a mid-sized city about 30 km. away, where all Government offices and Agents are located, as also are an airport and a railroad station which connect Jamnagar to the rest of the country. Mumbai has the closest international airport. International telephone calls can be made from Sikka/Jamnagar. Transportation has to be arranged by the Agent, as no unauthorised vehicle is allowed to approach the berth beyond the security check-point, which itself is about 4 km. away.

Strict prohibiton is in force ashore and an infringement could lead to embarrassment and delays.

The earlier Shipmaster's Report of 1982 in the Guide refers to the required documentation and is still valid. Currency regulations for Indian crew has been amended (R.B.I. Notification No. FERA 153/93 dated 12.7.93), and currency up to Rs. 1,000 may be carried by them in denominations not greater than Rs. 50.

AGENT: See "Cochin".

TUTICORIN: 08.45 N. 78.13 E.

PORT LIMITS: *On the North:* A line drawn due East from the boundary pillar erected to the North at Arasadi along the parallel of Lat. 08° 50' N., to a position in Lat. 08° 50' N., Long. 78° 22' E.

On the East: A line joining a position in Lat. 08° 50' N., Long. 78° 22' E. to a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E.

On the South: A line due West from a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E. to where it meets the point 45.72 m. from the HW mark on the shore.

DOCUMENTS: Required on arrival:

4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Stores List.
2 Health Report Form.

All statutory certificates in respect of vessels in Marine, Traffic, Customs and Immigration.

PILOTAGE: Compulsory within the pilotage zone. At present pilotage is restricted from 0600 hrs. to 1800 hrs. There is no night pilotage. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Tuticorin must report ETA via their Agents at least 72 hours in advance, and again 24 hours in advance of arrival. The ETA must be confirmed or amended not less that 6 hours prior to arrival. Time can be either in GMT or IST. The vessels must contact Port Signal Station on VHF Channels 16/12. In message of ETA, the following information must be included:

1. Name/call sign of the vessel.
2. Nationality.
3. Length, draft and g.r.t.
4. Last port and cargo.
5. Port of origin/destination of cargo.
6. Last Port of call/next port of call.

CERTIFICATES:
(a) Load Line Certificate.
(b) Safety Equipment Certificate.
(c) Safety Radio Certificate, all certificates must be valid before departure of vessel
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship.

Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.
CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.
AIRPORT: 3 miles from town, daily flight to Mumbai.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.
POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.
SHORE LEAVE: Police, port and Customs permission required before landing.
IDENTIFICATION CARDS: Necessary.
GENERAL: The port is an "all weather port".
AUTHORITY: Office of the Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, New Mental Hospital Building, Block No. 0/20, Ahmedabad - 380 016. *Tel:* 66610, 45116, 66270. *Cables:* Princport. *Contact:* The Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, Ahmedabad-16.

The Port Officer, Gujarat Maritime Board, Porbandar – 360 575, Gujarut State, India.
AGENT: See "Cochin".

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS:
Arrival:
- Maritime Declaration of Health Form (in duplicate).
- Port Clearance from last port of call.
- Ship's Stores List (in triplicate).
- Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
- Crew Lists (6 copies).
- Ship's Currency List (in triplicate).
- Arms and Ammunition Declaration.
- Passenger List – if any.
- Through Cargo Manifests.

Departure:
- Medical Inspection or Examination Certificate (Bill of Health).
- Port Clearance.
- Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Mumbai Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.
ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44' N., Long. 73° 39' E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about 0.75 miles S.S.W. and about 0.5 miles Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).
MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.
HEALTH: On arrival, Customs Authorities board and grant Free Pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for Radio Pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants Pratique after boarding vessel with Mosquito Party deputed from Mumbai at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Mumbai and/or Mormugao for Free Pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging Pratique. Vessels transiting through above infected areas for bunkers or water only do not require Mosquito Party for obtaining Pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.
RADIO: Mumbai Radio.
BERTHING: No berths. Open roadstead port.
LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOB terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increased fleet and improvement of shore loading facilities.
MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.
DENSITY: Average 1025.
FRESH WATER/FUEL: Not available.
CONSULS: None.
REPAIRS/DRY DOCKS: None.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.
CERTIFICATES: All certificates, particularly Cargo Gear Certificate to be in order and valid.
CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.
REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.
AIRPORT: Belgaum and/or Vascodagama 90 miles distant.
TIME: Indian Standard Time GMT plus 5.5 hours.
HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.
SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, Crew List and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.
IDENTIFICATION CARDS: Necessary.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: Indian Rupee (Rs.).
REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.
DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.
GENERAL: Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.
AUTHORITY: Port Officer Vengurla, District Sindhudurg, Maharashtra State, India. *Tel:* Vengurla 177.

AGENT: See "Cochin".

SIKKA: 22.34 N. 69.42 E.

SHIPMASTER'S REPORT: June 1982.

DOCUMENTS: 8 Crew Lists, 6 each Personal Effects and Stores Lists, 4 Vaccination Lists, 5 Currency Lists, (Customs do like all paperwork properly prepared).

On departure 3 Crew Lists if any changes and 3 Personal Effects Lists for those who remained on board.

For personnel leaving, Customs require Currency Form (Foreign Exchange Act 1947) in duplicate (Indian Form) and International Crew Baggage Declaration (Local Form) in duplicate.

Clearance from Last Port, Register, Load Line, Derat, Safcon, Safequip and Safradio all sighted by Agent but not taken from vessel.

All personal belongings to be recorded with makes, models and numbers.

PILOTAGE: Pilot boards vessel at anchor from tug boat using ship's derrick and tug's basket if weather is rough.

ANCHORAGE: Plenty of room for anchoring with good holding ground. Contact Mother Tanker for anchor position. We, berthing on flood tide, were requested to anchor 2 miles – 069° True from Mother Tanker.

Locally the storage vessel is referred to as the Mother Tanker (MT) and own ship (OS).

RESTRICTIONS: Apparently none, plenty of water. Larger vessels (this vessel 149,000 d.w.t.) are loaded from daughter tankers which go alongside OS.

HEALTH: Free Pratique is granted by Customs Officer.

RADIO: To local Agent at Jamnagar via Bedi Radio VUK5. The MT (which was m.t. "Koyali") keeps an R/T watch. Would suggest contacting the MT for any advance information as nobody else would give any.

VHF: Call MT on Channel 16. While anchored/approaching Channel 11 is used after initial contact. While double banked Channel 13 is used between MT and OS. Cargo operations are conducted on UHF using MT walkie-talkies. Contact Shipindia Channel 13, who pass messages to and from Agent.

TUGS: One tug available but not used. Tug used by Pilot and runs lines from OS to MT.

BERTHING: Position off Sikka for cargo operations approximately Lat. 22° 34' N., Long. 69° 42' E. Apparently 140,000 d.w.t tankers are the ideal size. They berth alongside MT and can take up to a full cargo without the MT having to top up from a daughter tanker. Operations off Sikka are temporary and from 1st May to end of monsoon. Consult with Pilot about berthing and obtain all details. Vessels berth alongside when tide is running in daylight hours. Usual Yokohama fenders used, 4 for vessels less than 750 ft. LOA and 6 for vessels over 750 ft. LOA. Fenders are made fast on MT. First 2 floatable headlines from OS to MT at least 220 m. long and may require longer. They do not like using '1st ropes ashore' off reels. In our opinion '1st ropes ashore' would be quite adequate and fast enough. Then 2 floatable stern lines from OS to MT. Final moorings were from OS to MT 3 and 2 each end with no breastlines. From MT to OS 2 headlines leading aft, 2 stern lines leading forward, forward 2 springs leading from forward to aft and 2 springs aft leading from aft to forward.

TANKERS: Loading by 2×10 in. ID hoses of ASA 150 standard, 23 m. long.Their discharge rate is quoted as 12,000 t.p.h and OS receives a letter to this effect with a request for OS loading rate. However, hoses restrict rate to about 2,700 t.p.h. overall. Hoses provided by MT, reducers supplied by OS. Only ropes or wires with rope tails used for mooring. Entire operation is guided by the ICS, OCIMF, ISGOTT. Tankers being loaded by daughter tankers should anchor with port anchor and daughter tanker berths starboard side. OS port side derrick and manifolds used alongside MT. Ballast is pumped overside. Ballast draft on arrival to be such that distance from manifold to water line does not exceed 15 m. Ballast trim not to exceed 3 per cent of LOA at any time. Distance of manifold to water line must never exceed 15 m. EDP is used. Samples are taken to Mumbai for analysis before B/L figures are given together with cargo quality details. API, loading temperature and pourpoint are given prior to loading. Our API was 39.48 at 60°F and loading temperature will normally be around the same as sea temperature of about 86°F (as during 1st week in June). Cargo was Indian High crude, very thin and apparently quite clean. A Loading Master boards to assist with berthing but does not live aboard. Accommodation and victuals required for Pilot, 2 Cargo Surveyors and 1 Indian Oil Representative. MT normally has 9.5 shackles of cable out. MT does COW but not usual with OS of 140,000 d.w.t. tanker.

WATCHMEN: Not necessary. The only boats allowed alongside were official boats and no other small boats were observed in the vicinity. There is no gangway between MT and OS.

CUSTOMS ALLOWANCES: 200 cigarettes. The State of Gujarat is 'dry' and no alcohol allowed ashore, except foreigners being repatriated may take one bottle.

To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Tuticorin must report ETA via their Agents at least 72 hours in advance, and again 24 hours in advance of arrival. The ETA must be confirmed or amended not less that 6 hours prior to arrival. Time can be either in GMT or IST. The vessels must contact Port Signal Station on VHF Channels 16/12. In message of ETA, the following information must be included:

1. Name/call sign of the vessel.
2. Nationality.
3. Length, draft and g.r.t.
4. Last port and cargo.
5. Port of origin/destination of cargo.
6. Last Port of call/next port of call.

CERTIFICATES:
(a) Load Line Certificate.
(b) Safety Equipment Certificate.
(c) Safety Radio Certificate, all certificates must be valid before departure of vessel.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship.

Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.

CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.

AIRPORT: 3 miles from town, daily flight to Mumbai.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.

POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.

SHORE LEAVE: Police, port and Customs permission required before landing.

IDENTIFICATION CARDS: Necessary.

GENERAL: The port is an "all weather port".

AUTHORITY: Office of the Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, New Mental Hospital Building, Block No. 0/20, Ahmedabad - 380 016. *Tel:* 66610, 45116, 66270. *Cables:* Princport. *Contact:* The Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, Ahmedabad-16.

The Port Officer, Gujarat Maritime Board, Porbandar – 360 575, Gujarut State, India.

AGENT: See "Cochin".

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS:

Arrival:
- Maritime Declaration of Health Form (in duplicate).
- Port Clearance from last port of call.
- Ship's Stores List (in triplicate).
- Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
- Crew Lists (6 copies).
- Ship's Currency List (in triplicate).
- Arms and Ammunition Declaration.
- Passenger List – if any.
- Through Cargo Manifests.

Departure:
- Medical Inspection or Examination Certificate (Bill of Health).
- Port Clearance.
- Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Mumbai Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.

ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44' N., Long. 73° 39' E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about 0.75 miles S.S.W. and about 0.5 miles Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).

MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.

HEALTH: On arrival, Customs Authorities board and grant Free Pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for Radio Pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants Pratique after boarding vessel with Mosquito Party deputed from Mumbai at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Mumbai and/or Mormugao for Free Pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging Pratique. Vessels transiting through above infected areas for bunkers or water only do not require Mosquito Party for obtaining Pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.

RADIO: Mumbai Radio.

BERTHING: No berths. Open roadstead port.

LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOB terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increased fleet and improvement of shore loading facilities.

MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.

DENSITY: Average 1025.

FRESH WATER/FUEL: Not available.

CONSULS: None.

REPAIRS/DRY DOCKS: None.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.

CERTIFICATES: All certificates, particularly Cargo Gear Certificate to be in order and valid.

CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.

REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.

AIRPORT: Belgaum and/or Vascodagama 90 miles distant.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.

SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, Crew List and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.

IDENTIFICATION CARDS: Necessary.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Indian Rupee (Rs.).

REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.

DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.

GENERAL: Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.

AUTHORITY: Port Officer Vengurla, District Sindhudurg, Maharashtra State, India. *Tel:* Vengurla 177.

AGENT: See "Cochin".

SIKKA: 22.34 N. 69.42 E.

SHIPMASTER'S REPORT: June 1982.

DOCUMENTS: 8 Crew Lists, 6 each Personal Effects and Stores Lists, 4 Vaccination Lists, 5 Currency Lists, (Customs do like all paperwork properly prepared).

On departure 3 Crew Lists if any changes and 3 Personal Effects Lists for those who remained on board.

For personnel leaving, Customs require Currency Form (Foreign Exchange Act 1947) in duplicate (Indian Form) and International Crew Baggage Declaration (Local Form) in duplicate.

Clearance from Last Port, Register, Load Line, Derat, Safcon, Safequip and Safradio all sighted by Agent but not taken from vessel.

All personal belongings to be recorded with makes, models and numbers.

PILOTAGE: Pilot boards vessel at anchor from tug boat using ship's derrick and tug's basket if weather is rough.

ANCHORAGE: Plenty of room for anchoring with good holding ground. Contact Mother Tanker for anchor position. We, berthing on flood tide, were requested to anchor 2 miles – 069° True from Mother Tanker.

Locally the storage vessel is referred to as the Mother Tanker (MT) and own ship (OS).

RESTRICTIONS: Apparently none, plenty of water. Larger vessels (this vessel 149,000 d.w.t.) are loaded from daughter tankers which go alongside OS.

HEALTH: Free Pratique is granted by Customs Officer.

RADIO: To local Agent at Jamnagar via Bedi Radio VUK5. The MT (which was m.t. "Koyali") keeps an R/T watch. Would suggest contacting the MT for any advance information as nobody else would give any.

VHF: Call MT on Channel 16. While anchored/approaching Channel 11 is used after initial contact. While double banked Channel 13 is used between MT and OS. Cargo operations are conducted on UHF using MT walkie-talkies. Contact Shipindia Channel 13, who pass messages to and from Agent.

TUGS: One tug available but not used. Tug used by Pilot and runs lines from OS to MT.

BERTHING: Position off Sikka for cargo operations approximately Lat. 22° 34' N., Long. 69° 42' E. Apparently 140,000 d.w.t tankers are the ideal size. They berth alongside MT and can take up to a full cargo without the MT having to top up from a daughter tanker. Operations off Sikka are temporary and from 1st May to end of monsoon. Consult with Pilot about berthing and obtain all details. Vessels berth alongside when tide is running in daylight hours. Usual Yokohama fenders used, 4 for vessels less than 750 ft. LOA and 6 for vessels over 750 ft. LOA. Fenders are made fast on MT. First 2 floatable headlines from OS to MT at least 220 m. long and may require longer. They do not like using '1st ropes ashore' off reels. In our opinion '1st ropes ashore' would be quite adequate and fast enough. Then 2 floatable stern lines from OS to MT. Final moorings were from OS to MT 3 and 2 each end with no breastlines. From MT to OS 2 headlines leading aft, 2 stern lines leading forward, forward 2 springs leading from forward to aft and 2 springs aft leading from aft to forward.

TANKERS: Loading by 2×10 in. ID hoses of ASA 150 standard, 23 m. long.Their discharge rate is quoted as 12,000 t.p.h and OS receives a letter to this effect with a request for OS loading rate. However, hoses restrict rate to about 2,700 t.p.h. overall. Hoses provided by MT, reducers supplied by OS. Only ropes or wires with rope tails used for mooring. Entire operation is guided by the ICS, OCIMF, ISGOTT. Tankers being loaded by daughter tankers should anchor with port anchor and daughter tanker berths starboard side. OS port side derrick and manifolds used alongside MT. Ballast is pumped overside. Ballast draft on arrival to be such that distance from manifold to water line does not exceed 15 m. Ballast trim not to exceed 3 per cent of LOA at any time. Distance of manifold to water line must never exceed 15 m. EDP is used. Samples are taken to Mumbai for analysis before B/L figures are given together with cargo quality details. API, loading temperature and pourpoint are given prior to loading. Our API was 39.48 at 60°F and loading temperature will normally be around the same as sea temperature of about 86°F (as during 1st week in June). Cargo was Indian High crude, very thin and apparently quite clean. A Loading Master boards to assist with berthing but does not live aboard. Accommodation and victuals required for Pilot, 2 Cargo Surveyors and 1 Indian Oil Representative. MT normally has 9.5 shackles of cable out. MT does COW but not usual with OS of 140,000 d.w.t. tanker.

WATCHMEN: Not necessary. The only boats allowed alongside were official boats and no other small boats were observed in the vicinity. There is no gangway between MT and OS.

CUSTOMS ALLOWANCES: 200 cigarettes. The State of Gujarat is 'dry' and no alcohol allowed ashore, except foreigners being repatriated may take one bottle.

REPATRIATION: Possible. Airport at Jamnagar. The boat journey ashore is about 2 hours but boat can only get to or leave jetty about 2 hours either side of high water. Foreigners require a visa otherwise they may travel in India but are not allowed to stay at hotels. This applies to departing and arriving personnel. Indian crew are not allowed Rupee notes of greater denomination than 20 Rupees.

AIRPORT: About 1.5 hours drive by car.

SHORE LEAVE: Possible, but due to length of journey and tidal restrictions it is not recommended.

GENERAL: In June 1982 "VQ" Buoy Kachchh was missing, shore authorities were advised. A night approach is better than a daytime approach as the buoys are not easy to sight against the discoloured water (on flood tide) although the buoys and Racons show very well on radar.

DEVELOPMENTS: After the end of the SW Monsoon (1982) work will resume on the oil and gas lines to Mumbai from the offshore oil-field. An SPM will probably be positioned off Mumbai and this will be used during the SW Monsoon when vessels cannot load at the oil-field.

OPERATOR: Shipping Corporation of India Limited.

SHIPMASTER'S REPORT: July 1994.

Berth Location: Lat. 22° 27.4' N., Long. 69° 47.8' E. (approx.).

A vessel is considered to have arrived when she is in the vicinity of the pilot boarding ground (Lat. 22° 30' N., Long. 89° 46' E.). As vessels are berthed/unberthed only during daylight hours, ships arriving during hours of darkness will have to anchor. Good holding ground is available about 1 mile North of the pilot boarding ground in 17.0 m. of water. During the months of May to October, crude oil lighterage operations are conducted about 2 miles North of this anchorage area.

The discharge berth at Sikka is owned by Gujrat State Fertiliser Corporation (G.S.F.C.) and managed by the Gujrat Maritime Board. The berth presently has facility for the discharge of ammonia and phosphoric acid, though work is in progress to extend this for LPG imports. Pilot for movements to and from the berth is requisitioned from other neighbouring ports.

There is no radio station at Sikka. However, Bedi Radio (of a neighbouring port) keeps a watch on VHF Channel 16 during daytime hours. Alternatively, the Agent calls the ship on VHF to exchange any information.

Berthing generally takes place just before slack water. Ships berth stemming the tide. Ships with a maximum draft of 8.0 m. are accepted alongside. This ship has berthed prior to low water slack with an aft draft of 7.2 m. The least depth in the approach of the channel as shown on the chart is 8.0 m. However, whilst approaching berth with the ship's head 140° and about 3 cables and also 1 cable from the berth, the ship smelt bottom resulting in sluggish handling and loss of steering with a telltale muddying of water.

Two very low powered tugs are presently available for assisting in berthing. These are also used to take lines ashore. It is best to keep only a shallow bight when the tug is taking lines ashore, so that they are quick to take weight on the bollard.

The berth lies at the end of a causeway with 4 dolphins, two on either side of the berth. The berth is fendered by pneumatic (Yokohama) fenders. The top edge of the berth and dolphins are fendered by tractor/truck tyres. The lay of the berth is about 168°. Ships drawing 8.0 m. and up to 180 m. LOA have been accommodated at the berth. Due to the construction of the berth, the accommodation ladder (gangway) cannot be used and the ship's wharf ladder must be kept ready.

Ammonia is discharged through a hardarm. The ship provides a 300 ASA 8 in. reducer to which the hardarm is connected by shore staff. Phosphoric acid is also discharged at the berth using a 10 in. flexible hose.

The shore line to the tank is about 5 km. long. We discharged at a low rate of about 100 tonnes/hr. for about 6 hours before increasing rate to a maximum of 650 tonnes/hr.

About 4 cables South of the berth lies a disused island berth which was once connected to shore by a ropeway. The supporting pillars of the ropeway still stand. The jetty was in use for the export of cement from the factory located inshore. Cement is presently loaded into ships at the anchorage working with barges.

This vessel picked up fresh provisions at Sikka which are of reasonable price and quality. It is understood that fresh water can be supplied by barges and bunkers can be arranged by trucks. However, adequate notice is required.

Sikka is a small town serving 2 major factories and a thermal power plant located there. Local population consists mostly of fisherfolk. It is connected by a good road to Jamnagar, a mid-sized city about 30 km. away, where all Government offices and Agents are located, as also are an airport and a railroad station which connect Jamnagar to the rest of the country. Mumbai has the closest international airport. International telephone calls can be made from Sikka/Jamnagar. Transportation has to be arranged by the Agent, as no unauthorised vehicle is allowed to approach the berth beyond the security check-point, which itself is about 4 km. away.

Strict prohibiton is in force ashore and an infringement could lead to embarrassment and delays.

The earlier Shipmaster's Report of 1982 in the Guide refers to the required documentation and is still valid. Currency regulations for Indian crew has been amended (R.B.I. Notification No. FERA 153/93 dated 12.7.93), and currency up to Rs. 1,000 may be carried by them in denominations not greater than Rs. 50.

AGENT: See "Cochin".

TUTICORIN: 08.45 N. 78.13 E.

PORT LIMITS: *On the North:* A line drawn due East from the boundary pillar erected to the North at Arasadi along the parallel of Lat. 08° 50' N., to a position in Lat. 08° 50' N., Long. 78° 22' E.

On the East: A line joining a position in Lat. 08° 50' N., Long. 78° 22' E. to a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E.

On the South: A line due West from a position in Lat. 08° 41' 40" N., Long. 78° 20' 20" E. to where it meets the point 45.72 m. from the HW mark on the shore.

DOCUMENTS: Required on arrival:

4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Stores List.
2 Health Report Form.

All statutory certificates in respect of vessels in Marine, Traffic, Customs and Immigration.

PILOTAGE: Compulsory within the pilotage zone. At present pilotage is restricted from 0600 hrs. to 1800 hrs. There is no night pilotage. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Tuticorin must report ETA via their Agents at least 72 hours in advance, and again 24 hours in advance of arrival. The ETA must be confirmed or amended not less that 6 hours prior to arrival. Time can be either in GMT or IST. The vessels must contact Port Signal Station on VHF Channels 16/12. In message of ETA, the following information must be included:

1. Name/call sign of the vessel.
2. Nationality.
3. Length, draft and g.r.t.
4. Last port and cargo.
5. Port of origin/destination of cargo.
6. Last Port of call/next port of call.

Pilot Boarding Station: Vessels are required to approach the Fairway Buoy and the Pilot will board the vessel about 0.5 nautical miles East of Fairway Buoy while underway. The position is approximately 2.5 km. to 3.0 km. away from the entrance to the port basin.

ANCHORAGE: *Zone A:* There is an Explosives anchorage in position Lat. 8° 44' 48" N., Long. 78° 14' 22" E, in a sector with the Fairway Buoy as centre circumscribed over an arc of 171° from 009° (T) to 180° (T) at a distance of 0.5 miles to 1.0 miles.

Zone B: There is an open roadstead available at Zone 'B'. Vessels of any size and draft can be handled at the open roadstead. The loading and unloading operations are carried out by lighters at the open roadstead throughout the year.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique is issued in normal cases by the Municipal Health Officer, Tuticorin, but in the case of vessels coming from yellow fever area and jigger infection ports within 30 days, it is to be issued by the Port Health Officer, Mandapam Camp.

RADIO: When vessel within 24 hours' distance Tuticorin Radio could be used, call sign VWT. Otherwise according to route followed, vessels use Madras or Mumbai Radio.

VHF: Signal station stands-by throughout 24 hours on Channels 12 and 16.

TUGS: Three tugs (bollard pull 30 tons) available for berthing and unberthing inside the harbour. However, if services are required for any special service, arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.

BERTHING: In Zone 'A' there are at present 6 alongside berths available to handle break-bulk and dry-bulk cargoes. Berths No. 1, 2, 5 and 6 are designed for ships of 168 m. length and 9.14 m. draft and Berths No. 3 and 4 for ships of 192 m. length and 10.67 m. draft. One coal jetty is available at North Breakwater which has been designed for ships of 235 m. length and 10.67 m. draft. Pending completion of dredging in the approach channel, ships with 8.24 m. draft can enter the port at all times. Draft of 9.14 m. will be available on completion of the balance of capital dredging along the approach channel.

The berths are connected with metre gauge railway tracks and roads which are in turn connected with road and railway system to hinterland.

Floating Craft: Sufficient number of tugs and other floating craft are available for pilotage and other operations.

Cargo Handling Facilities:

3×3 ton wharf cranes.
2×6 ton wharf cranes.
4×10/4 ton grab wharf cranes.
1×10 ton hook wharf crane.
7 mobile cranes of 10 tons to 75 tons.
1×36 ton port tower crane.
12×3 ton diesel forklift trucks.
3×2.3 cu.m. capacity bucket front end loaders.
1×3.1/4.6 cu.m. capacity bucket front end loader.
2×500 ton and 2×1,500 ton diesel locomotives.
1×40.0 TR-35.0 CH top lift truck.
1×25 ton top lift truck.
2×600 t.p.h. marine unloading arms.
18×440 V reefer sockets.
6×200 V reefer sockets.

Storage:

2 Transit sheds 150 m.×36 m. each.
3 Warehouses 150 m×36 m. each.
1 Dangerous cargo shed 36.23 m.×20.23 m.
1 Fumigatorium 40.50 m.×18.24 m.

15 Covered transit sheds including combustible cargo shed and dutiable cargo shed with a storage capacity of 25,370 tonnes (in Zone 'B').

One open platform for storage of cargo with a capacity of 61,500 tonnes (in Zone 'B').

Open storage area of 24,000 sq.m. inside the security wall for storing bulk cargo and 30,000 sq.m. outside the security wall at Hare Island for stacking timber logs (in Zone 'A').

Reefer Cargo Handling Facilities: 12 plugs (6×220 volts and 6×440 volts) points. Standby generators provided.

STEVEDORES: Agents require 24 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.

Working hours:

(i) In respect of working of vessels in the Port, period between 0600 hrs. to 1400 hrs. on working day is treated as free time, for levy of night and holiday charges. For periods outside these hours, night and holiday charges are leviable.

(ii) In respect of delivery of import cargo and admission of cargo for shipment, period between 1000 hrs. to 1800 hrs. is treated as free time for levy of night and holiday charges. For periods outside these hours on working days, night and holiday charges are levied.

(iii) On holidays no free time is permissible either for working of vessels or for delivery/admission of cargo for purpose of levy of night and holiday charges.

MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired, arrangements made for re-vaccination/re-inoculation and renewal of certificates.

TANKERS: One permanent oil jetty to accommodate vessels of lengths from 150 m. to 228 m. and 9.14 m. draft is available for handling petroleum products.

Pipelines of 457 mm. diameter for furnace oil and 356 mm. diameter for naphtha, 400 mm. diameter for liquid ammonia, 203 mm. diameter for ethylene di-chloride (EDC) and 250 mm. diameter for vinyl chloride monomer (VCM).

Pending completion of the dredging of the approach channel, only tankers with 8.24 m. draft can enter port.

FRESH WATER: Available from hydrants alongside and by barges at the anchorage when no scarcity of water.

FUEL: Supplied by road tanker.

CONSULS: None.

REPAIRS: Minor repairs possible.

DRY DOCKS: A small dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of port's own small vessels.

GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.

OPENING/CLOSING HATCHES: By ship's crew. If done by stevedores charges extra.

CERTIFICATES:

Ship's Register.
Safety Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio & Telegraphy Certificate.
Derat Certificate.
Cargo-gear Stability Certificate.

REPATRIATION: Could be arranged via Madras.

AIRPORT: Nearest airport is Madurai, distance 100 miles, which could connect Madras.

TIME: GMT plus 5.5 hours.

HOLIDAYS: New Year's Day, Pongal, Mattu Pongal, Republic Day, Tamil New Year's Day, Good Friday, May Day, Ramzan, Bakrid, Independence Day, Gandhi Jayanthi, Dussehra (2 days), Moharrum, Deepavali, Christmas, Meelad-un-nabi.

SERVICES: Fish, meat and all kinds of provisions and stores are generally available.

SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.

IDENTIFICATION CARDS: Identification cards or Seaman's Book required to be presented to Police and Immigration authorities while coming on shore.

REGULATIONS: Usual regulations. All crew members coming onto shore and returning to ship must report to Customs and Port Police on every trip.

AUTHORITY: Tuticorin Port Trust, Administrative Office, Tuticorin 628 004, India. *Tel:* 85-2290 and 85-2299. *Telex:* 0434-243. *Cables:* Portrust. *Contact:* The Chairman.

AGENT: See "Cochin".

VADINAR: 22.31 N. 69.42 E.

LOCATION: Vadinar is in the Gulf of Kachchh about 40 miles S.W. of Kandla Port. The port has 1 Single Buoy Mooring (SBM) for crude oil tankers.

Position of SBM: Lat. 22° 30' 34.48" N., Long. 69° 42' 4.07" E.

The deep water channel from Dwarka to SBM is marked by 9 deep sea lighted marker buoys (refer Chart No. 203).

PILOTAGE: Pilotage is compulsory and the Pilots board the tankers at anchorage (Lat. 22° 33' N., Long. 69° 38' E.). Tanker should communicate ETA Vadinar to Harbour Master Kandla Port and local Agents, Jamnagar 72, 24 and 12 hours in advance.

VHF: Vadinar Control Tower can be contacted on VHF Channel 12 and 16.

TUGS: Port tugs and the launch join ships at the approach to SBM.

RESTRICTIONS/MAX. SIZE: VLCC's of max. 300,000 d.w.t. can be moored at the SBM. At present berthing of tankers is only in daylight hours but night berthing may start soon. Unberthing can be done during hours of darkness.

FRESH WATER: Fresh water can be supplied only by water barge.

DEVELOPMENTS: Deep water berth planned.

AUTHORITY: The Chairman, Kandla Port Trust, A.O. Building, P.O.Box No. 50, Gandhidham (Kachchh), India. *Tel:* 8540. *Telex:* 001-105-208. *Cables:* Portrust. *Contact:* Superintendent Engineer, Offshore Oil Terminal.

VERAVAL: 20.55 N. 70.22 E.

LOCATION: Veraval is an important intermediate lighterage fair weather town port, situated at Lat. 20° 54' 40" N., Long. 70° 22' 12" E., on the South West Coast of Saurashtra Peninsula, facing the Arabian Sea, and nearly 62 miles South of Porbandar and 192 miles North of Mumbai.

DOCUMENTS:

Last Port Clearance.
Ship's Stores Manifest (3 copies).
Crew List (5 copies).
Private Property List of Crew (3 copies).
Same Bottom Cargo (3 copies).
Ship and Crew Currency List (3 copies).
Indian Coast Light Dues Receipt (if vessel arriving from Indian port).
Maritime Declaration of Health.
Customs Arrival Report.
Customs Declaration for arms, ammunition, etc.
Port Arrival Report.

PILOTAGE: Not required. Vessels anchor midstream.

NAVIGATION AIDS: *Veraval Lighthouse:* The lighthouse, in position Lat. 20° 54.6' N., Long. 70° 21.15' E., is a square masonary tower with semi-circular frontage towards the sea side, and rectangular towards land side, painted in alternate black and white bands. Height of tower 33.5 m. Height of light (centre of lantern) about 33.5 m. above NHWS. Range of visibility 26 km. Character of light – occulting white every 15 seconds, i.e. flash 10 seconds and eclipse 5 seconds. A signal horn is also sounded from the lighthouse structure as and when required.

Bhidia Beacon: Located in position Lat. 20° 53.8' N., Long. 70° 22.9' E. The beacon is a square masonary structure, painted with red and white bands. The height of the structure is 20 ft. The range of visibility 4 miles. Character of the light is flash red every 10 seconds.

Both lights are maintained by the Lighthouse Department of the Government of India. In addition there are lights for guiding local movements at (1) Old Lighthouse, (2) Breakwater, and (3) Creek entrance. These local lights are maintained by the Port Department of the State Government.

ANCHORAGES: The port is well protected by a breakwater extending 1,600 ft. into the open sea with fairly deep water of about 8 to 9 fathoms. Deep draft vessels can anchor at a distance about 1.5 km. away from the shore. The holding ground is good, so deep draft vessels can anchor quite close to the port without any specific restrictions. Two anchorage positions are marked on Indian Chart No. 2050. The ships are supposed to wait there for their turn, as only 3 ships are worked at a time. A refer ship is worked at night as a 4th vessel. However, a maximum of 2 import ships only can work at a time.

Port working zones have been prescribed as A, B, C, D and E, and five points A B C D E are marked as under. From Arrival Anchorage Zone, ships have to move to the working zone and select any of the points A B C D or E, as convenient to them. Otherwise ship's work would not commence.

Anchorage	*Point*	*Position Lat./Long.*	*Depth approx.*	*Suggested for a vessel having draft up to*
1	A	20° 53' 27" N. 70° 22' 40" E.	11.50 m.	8.75 m. (28 ft. 00 in.)
2	B	20° 53' 20" N. 70° 22' 20" E.	12.00 m.	9.25 m. (30 ft. 00 in.)
3	C	20° 53' 03" N. 70° 22' 33" E.	12.80 m.	10.00 m. (32 ft. 00 in.)
4	D	20° 53' 14" N. 70° 22' 48" E.	11.00 m	8.25 m. (26 ft. 00 in.)
5	E	20° 53' 16" N. 70° 22' 33" E.	13.00 m.	10.25 m. (33 ft. 00 in.)

Point	*Veraval Lighthouse*	*Bhiria Beacon*	*Somnath Temple*
A	311°	030.5°	101°
B	321°	048°	094.5°
C	321.5°	027°	083.5°
D	312.5°	015.5°	088°
E	317.5°	034.5°	092°

The movement of lighters is constant as the harbour has water at all times, enabling constant cargo working.

Approaches to the port are also directly from the open sea with no tidal difficulties, or cross currents. Tidal rise is quite normal and negligible, from 5 ft. to 8 ft.

RESTRICTIONS: None, day or night anchorage possible.

MAX. SIZE: No restriction.

HEALTH: (a) Bill of Health is being granted by the Resident Medical Officer of the local Hospital.

(b) Free Pratique is granted by the Customs Boarding Officer, on presentation to him of "International Maritime Declaration of Health" by Master.

RADIO: Messages via Mumbai Radio or Kandla Radio.

TUGS: 4 tugs, 1×191 h.p., 1×270 h.p., 1×255 h.p. and 1×360 h.p.

VHF: Channels 16, 11, 12 and 14.

BERTHING: No berths for ocean-going vessels.

There are 4 lighter wharves for vessels working which can provide loading/unloading points, of which 4 have cranage facilities.

Barges: There are 27 barges with 100 tonnes capacity each and one water/cargo barge with capacity 100 tonnes.

Storage Facilities:

4 transit godowns – 1,600 tons capacity.
4 platforms – 4,000 tons capacity.
53 storage godowns – 50,000 tons capacity.

CRANES:

1 × 0.5 tonnes capacity at Wharf A.
1 × 0.5 tonnes capacity at Wharf B.
4 × 12.5 tonnes capacity mobile cranes.
1 × 5.0 tons capacity mobile crane.
1 × 75.0 tonnes capacity diesel crane.
1 × 80.0 tonnes capacity mobile diesel crane.

STEVEDORING: Particulars of ETA and labour gangs required well in advance. Average loading/discharging:

Loading bagged cargo oilcake, etc.	225/250 tons per hook per day
Loading GN oil in drums	150/175 tons per hook per day
Discharging fertiliser (bagged)	150/200 tons per hook per day
General cargo loading/discharging	150/200 tons per hook per day

Working Hours: Port working hours: 0800 – 1200 hrs. and 1300 – 1700 hrs.

Vessel working hours: Throughout 24 hours. Vessels are allowed to work during recess hours and during nights which are 1200 – 1300 hrs. (recess), 1700 – 1800 hrs. (recess), 1800 – 2200 hrs. (night – 1st half), 2300 – 0300 hrs. (night – 2nd half) and 0300 – 0800 hrs. (recess).

MEDICAL: Qualified doctors and hospital facilities.

TANKERS: No tanker berths.

FRESH WATER: Water is required to be obtained from port premises and is transported by port tank truck and being supplied by water barge or by tug to vessel on payment of transportation charges from port premises to shore and from shore to anchorage excluding cost of water.

FUEL: Not available.

CONSULS: None.

REPAIRS: Port is equipped with workshop and dry dock for minor repairs to tugs and barges. Minor repairs are carried out in town.

GANGWAY/DECK WATCHMEN: Not necessary unless required. Can be arranged through Agents.

OPENING/CLOSING HATCHES: Carried out by stevedores. Ships' derricks worked by crew.

CERTIFICATES:

Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-Telegraphy Certificate.
Derat Certificate.
Ship's Registration Certificate.

REPATRIATION: Can be arranged.

AIRPORT: Nearest airport Keshod, 30 miles from Veraval, but motor transport not easily available and advance arrangements have to be made.

TIME: Local Time GMT plus 5.5 hours.

HOLIDAYS: On which work not allowed for loading/discharging: Indian Republic Day, Holi (Second Day), Ramnavami, Mohurram (Ashura or 10th day), Gokulashtami, Dussera Diwali (New Year's Day), Ramzan-Id (Id-ul-Fitr).

POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.

TELEPHONES: No arrangements for placing telephones on board the ship, but calls via VHF are possible.

SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.

DELAYS: 3 ships can work and fourth vessel if for lifting frozen fish can work during night hours only. Fourth vessel other than frozen fish cargo wait in turn.

GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.

Charts: Plans of Kathinwar – Gulf of Kutch to Vijaydurg 2736. Plans of Veraval Port Roads No. 1321 and 2054.

DEVELOPMENTS: Veraval is being developed as an all weather fishery harbour working under the World Bank Project. There will be extensive facilities available at the Port. The existing breakwater is being extended by about 334 m. and another would be erected in opposite direction for about 3,200 ft. A minimum depth of water in the inner breakwater would be 17 ft. 6 in.

AUTHORITY: Office of the Port Officer – Veraval, Gujarat Maritime Board, Junagadh District, Pin. 362265. *Tel:* 20001 (office), 20956 (residence). *Telex:* 163-209 GMBV IN. *Contact:* Port Officer.

AGENT: See "Cochin".

VISAKHAPATNAM: 17.41 N. 83.18 E. (See Plan)

PORT LIMITS: 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel".

DOCUMENTS:

12 copies of Crew List.
3 copies of Stores List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of Watch Lists, giving details of make and value, etc.

The vessel must possess following valid certificates:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy and Telephony Certificates.
Cargo Gear Test Certificate.
Safety and Survey Certificate.
Derat Certificate.
Last Port Clearance.

Also see "Shipmaster's Report" – June 1988.

PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.

ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 nautical miles.

RESTRICTIONS: *Inner Harbour:* The Inner Harbour is open to ships of 193.55 m. LOA, 9.14 m. draft and 30.48 m. beam at all stages of tide and ships of 193.55 m. LOA with a max. draft of 10.05 m. on a minimum rising tide of 0.91 m. for arrival and draft of 10.21 m. for sailing. Vessels of LOA 175.26 m. and above with draft of 9.14 m. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Inner Harbour.

Outer Harbour: Vessels with 270 m. LOA, 42 m. beam, 15.3 m. draft, can sail from the Outer Harbour "OB–1" and "OB–2" berths at all times. The draft for ships entering the Outer Harbour in loaded condition is 14.3 m. No tidal restrictions. The max. permissible draft at oil mooring is 14.3 m., and LOA 260 m.

Vessels of 60,000 d.w.t. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Ore Berths No. I and II.

Mooring and unmooring of vessels at Oil Mooring is restricted to daylight hours only.

Pilot Boarding Station: Vessels are required to approach the Fairway Buoy and the Pilot will board the vessel about 0.5 nautical miles East of Fairway Buoy while underway. The position is approximately 2.5 km. to 3.0 km. away from the entrance to the port basin.

ANCHORAGE: *Zone A:* There is an Explosives anchorage in position Lat. 8° 44' 48" N., Long. 78° 14' 22" E, in a sector with the Fairway Buoy as centre circumscribed over an arc of 171° from 009° (T) to 180° (T) at a distance of 0.5 miles to 1.0 miles.

Zone B: There is an open roadstead available at Zone 'B'. Vessels of any size and draft can be handled at the open roadstead. The loading and unloading operations are carried out by lighters at the open roadstead throughout the year.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique is issued in normal cases by the Municipal Health Officer, Tuticorin, but in the case of vessels coming from yellow fever area and jigger infection ports within 30 days, it is to be issued by the Port Health Officer, Mandapam Camp.

RADIO: When vessel within 24 hours' distance Tuticorin Radio could be used, call sign VWT. Otherwise according to route followed, vessels use Madras or Mumbai Radio.

VHF: Signal station stands-by throughout 24 hours on Channels 12 and 16.

TUGS: Three tugs (bollard pull 30 tons) available for berthing and unberthing inside the harbour. However, if services are required for any special service, arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.

BERTHING: In Zone 'A' there are at present 6 alongside berths available to handle break-bulk and dry-bulk cargoes. Berths No. 1, 2, 5 and 6 are designed for ships of 168 m. length and 9.14 m. draft and Berths No. 3 and 4 for ships of 192 m. length and 10.67 m. draft. One coal jetty is available at North Breakwater which has been designed for ships of 235 m. length and 10.67 m. draft. Pending completion of dredging in the approach channel, ships with 8.24 m. draft can enter the port at all times. Draft of 9.14 m. will be available on completion of the balance of capital dredging along the approach channel.

The berths are connected with metre gauge railway tracks and roads which are in turn connected with road and railway system to hinterland.

Floating Craft: Sufficient number of tugs and other floating craft are available for pilotage and other operations.

Cargo Handling Facilities:

3×3 ton wharf cranes.
2×6 ton wharf cranes.
4×10/4 ton grab wharf cranes.
1×10 ton hook wharf crane.
7 mobile cranes of 10 tons to 75 tons.
1×36 ton port tower crane.
12×3 ton diesel forklift trucks.
3×2.3 cu.m. capacity bucket front end loaders.
1×3.1/4.6 cu.m. capacity bucket front end loader.
2×500 ton and 2×1,500 ton diesel locomotives.
1×40.0 TR-35.0 CH top lift truck.
1×25 ton top lift truck.
2×600 t.p.h. marine unloading arms.
18×440 V reefer sockets.
6×200 V reefer sockets.

Storage:

2 Transit sheds 150 m.×36 m. each.
3 Warehouses 150 m×36 m. each.
1 Dangerous cargo shed 36.23 m.×20.23 m.
1 Fumigatorium 40.50 m.×18.24 m.

15 Covered transit sheds including combustible cargo shed and dutiable cargo shed with a storage capacity of 25,370 tonnes (in Zone 'B').

One open platform for storage of cargo with a capacity of 61,500 tonnes (in Zone 'B').

Open storage area of 24,000 sq.m. inside the security wall for storing bulk cargo and 30,000 sq.m. outside the security wall at Hare Island for stacking timber logs (in Zone 'A').

Reefer Cargo Handling Facilities: 12 plugs (6×220 volts and 6×440 volts) points. Standby generators provided.

STEVEDORES: Agents require 24 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.

Working hours:

(i) In respect of working of vessels in the Port, period between 0600 hrs. to 1400 hrs. on working day is treated as free time, for levy of night and holiday charges. For periods outside these hours, night and holiday charges are leviable.

(ii) In respect of delivery of import cargo and admission of cargo for shipment, period between 1000 hrs. to 1800 hrs. is treated as free time for levy of night and holiday charges. For periods outside these hours on working days, night and holiday charges are levied.

(iii) On holidays no free time is permissible either for working of vessels or for delivery/admission of cargo for purpose of levy of night and holiday charges.

MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired, arrangements made for re-vaccination/re-inoculation and renewal of certificates.

TANKERS: One permanent oil jetty to accommodate vessels of lengths from 150 m. to 228 m. and 9.14 m. draft is available for handling petroleum products.

Pipelines of 457 mm. diameter for furnace oil and 356 mm. diameter for naphtha, 400 mm. diameter for liquid ammonia, 203 mm. diameter for ethylene di-chloride (EDC) and 250 mm. diameter for vinyl chloride monomer (VCM).

Pending completion of the dredging of the approach channel, only tankers with 8.24 m. draft can enter port.

FRESH WATER: Available from hydrants alongside and by barges at the anchorage when no scarcity of water.

FUEL: Supplied by road tanker.

CONSULS: None.

REPAIRS: Minor repairs possible.

DRY DOCKS: A small dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of port's own small vessels.

GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.

OPENING/CLOSING HATCHES: By ship's crew. If done by stevedores charges extra.

CERTIFICATES:

Ship's Register.
Safety Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio & Telegraphy Certificate.
Derat Certificate.
Cargo-gear Stability Certificate.

REPATRIATION: Could be arranged via Madras.

AIRPORT: Nearest airport is Madurai, distance 100 miles, which could connect Madras.

TIME: GMT plus 5.5 hours.

HOLIDAYS: New Year's Day, Pongal, Mattu Pongal, Republic Day, Tamil New Year's Day, Good Friday, May Day, Ramzan, Bakrid, Independence Day, Gandhi Jayanthi, Dussehra (2 days), Moharrum, Deepavali, Christmas, Meelad-un-nabi.

SERVICES: Fish, meat and all kinds of provisions and stores are generally available.

SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.

IDENTIFICATION CARDS: Identification cards or Seaman's Book required to be presented to Police and Immigration authorities while coming on shore.

REGULATIONS: Usual regulations. All crew members coming onto shore and returning to ship must report to Customs and Port Police on every trip.

AUTHORITY: Tuticorin Port Trust, Administrative Office, Tuticorin 628 004, India. *Tel:* 85-2290 and 85-2299. *Telex:* 0434-243. *Cables:* Portrust. *Contact:* The Chairman.

AGENT: See "Cochin".

VADINAR: 22.31 N. 69.42 E.

LOCATION: Vadinar is in the Gulf of Kachchh about 40 miles S.W. of Kandla Port. The port has 1 Single Buoy Mooring (SBM) for crude oil tankers.

Position of SBM: Lat. 22° 30' 34.48" N., Long. 69° 42' 4.07" E.

The deep water channel from Dwarka to SBM is marked by 9 deep sea lighted marker buoys (refer Chart No. 203).

PILOTAGE: Pilotage is compulsory and the Pilots board the tankers at anchorage (Lat. 22° 33' N., Long. 69° 38' E.). Tanker should communicate ETA Vadinar to Harbour Master Kandla Port and local Agents, Jamnagar 72, 24 and 12 hours in advance.

VHF: Vadinar Control Tower can be contacted on VHF Channel 12 and 16.

TUGS: Port tugs and the launch join ships at the approach to SBM.

RESTRICTIONS/MAX. SIZE: VLCC's of max. 300,000 d.w.t. can be moored at the SBM. At present berthing of tankers is only in daylight hours but night berthing may start soon. Unberthing can be done during hours of darkness.

FRESH WATER: Fresh water can be supplied only by water barge.

DEVELOPMENTS: Deep water berth planned.

AUTHORITY: The Chairman, Kandla Port Trust, A.O. Building, P.O.Box No. 50, Gandhidham (Kachchh), India. *Tel:* 8540. *Telex:* 001-105-208. *Cables:* Portrust. *Contact:* Superintendent Engineer, Offshore Oil Terminal.

POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.

TELEPHONES: No arrangements for placing telephones on board the ship, but calls via VHF are possible.

SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.

DELAYS: 3 ships can work and fourth vessel if for lifting frozen fish can work during night hours only. Fourth vessel other than frozen fish cargo wait in turn.

GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.

Charts: Plans of Kathinwar – Gulf of Kutch to Vijaydurg 2736. Plans of Veraval Port Roads No. 1321 and 2054.

DEVELOPMENTS: Veraval is being developed as an all weather fishery harbour working under the World Bank Project. There will be extensive facilities available at the Port. The existing breakwater is being extended by about 334 m. and another would be erected in opposite direction for about 3,200 ft. A minimum depth of water in the inner breakwater would be 17 ft. 6 in.

AUTHORITY: Office of the Port Officer – Veraval, Gujarat Maritime Board, Junagadh District, Pin. 362265. *Tel:* 20001 (office), 20956 (residence). *Telex:* 163-209 GMBV IN. *Contact:* Port Officer.

AGENT: See "Cochin".

VISAKHAPATNAM: 17.41 N. 83.18 E. (See Plan)

PORT LIMITS: 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel".

DOCUMENTS:

12 copies of Crew List.
3 copies of Stores List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of Watch Lists, giving details of make and value, etc.

The vessel must possess following valid certificates:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy and Telephony Certificates.
Cargo Gear Test Certificate.
Safety and Survey Certificate.
Derat Certificate.
Last Port Clearance.

Also see "Shipmaster's Report" – June 1988.

PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.

ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 nautical miles.

RESTRICTIONS: *Inner Harbour:* The Inner Harbour is open to ships of 193.55 m. LOA, 9.14 m. draft and 30.48 m. beam at all stages of tide and ships of 193.55 m. LOA with a max. draft of 10.05 m. on a minimum rising tide of 0.91 m. for arrival and draft of 10.21 m. for sailing. Vessels of LOA 175.26 m. and above with draft of 9.14 m. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Inner Harbour.

Outer Harbour: Vessels with 270 m. LOA, 42 m. beam, 15.3 m. draft, can sail from the Outer Harbour "OB–1" and "OB–2" berths at all times. The draft for ships entering the Outer Harbour in loaded condition is 14.3 m. No tidal restrictions. The max. permissible draft at oil mooring is 14.3 m., and LOA 260 m.

Vessels of 60,000 d.w.t. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Ore Berths No. I and II.

Mooring and unmooring of vessels at Oil Mooring is restricted to daylight hours only.

MAX. SIZE:

Inner Harbour:

Max. permissible LOA	193.55 m.
Max. permissible breadth	30.48 m.
Max. permissible draft	10.21 m.

Outer Harbour:

Max. permissible LOA	270 m.
Max. permissible breadth	42 m.
Max. permissible draft	15.3 m.

HEALTH: A separate radio Free Pratique message addressed "Quarantine Visakhapatnam" must be transmitted by all vessels arriving from foreign port not less than 4 hours and not more than 12 hours prior ETA.

On information furnished therein Port Health Officer grants Free Pratique. Pilot boarding the ship for bringing her into the harbour has superseding power to cancel radio Free Pratique already granted. However based on information contained in Maritime Declaration Pilot also grants Free Pratique. In case of doubt or in case of inspection, if necessary, Quarantine Officer boards ship for granting clearance. No necessity for vessel to obtain Free Pratique when the vessel arrives directly from another Indian Port.

RADIO: Radio station call sign VWV. Working round clock. Range about 600 miles during daytime and 1,000 miles during night. Better to use Madras Radio Station for all communications in respect of vessels arriving from Madras side. Vessels arriving from Calcutta side, use Calcutta Radio Station. Generally Visakhapatnam Radio station is used for vessels anchored at roadstead. VHF Channel 16.

TUGS: Tugs are available. For ships entering the port, the tugs wait in the lee of the breakwater. Ship's lines and/or tug's lines are used, depending upon the mode of making fast.

BERTHING: The Inner Harbour has 15 berths of which 11 are quay berths, 3 jetty berths and 1 mooring berth, while in the Outer Harbour, there are 2 ore berths and an oil mooring berth. No specific requirements of arrival times for berthing.

CONTAINER HANDLING FACILITIES: Container handling facilities are provided at Visakhapatnam Port.

These facilities include:

Priority berthing;

An earmarked regular quay berth with a draft of 10.06 m. and LOA 168 m.;

50,000 sq. m. open storage space;

3,000 sq. m. of covered storage area;

A 150 tonne floating crane with two 150 tonne flat top pontoons for overside operations;

A 50 tonne gantry crane in the container park;

Two 50 tonne crawler mounted mobile cranes;

Four 25 ton mobile cranes;

Fleet of forklift trucks with extended forks up to a capacity of 8 tons and Truck-trailer units.

CRANES: The Port has 6×10 tonne cranes, 6×6 tonne and 18×3 tonne quay cranes, one 30 tonne stationary electric crane and 1×150 tonne self-propelled floating crane in addition to various mobile equipment such as mobile cranes, forklifts, tractors and trailers and front end loaders.

BULK CARGO FACILITIES: Iron ore is loaded through a mechanical ore handling plant having a rated capacity of 8,000 tonnes per hour into ore carriers of 100,000 d.w.t., at the finger type ore jetty (OB-1, OB-2) in the Outer Harbour.

Fertiliser raw materials (i.e.) rock phosphate and sulphur on account of Coromandal Fertilisers are handled at the fertiliser berth in the bulk form by means of grabs and conveyors into a silo.

Grabs are also used for unloading fertilisers and other bulk cargoes at the Port.

SPECIALISED CARGO HANDLING FACILITIES:

Inner Harbour: *Fertiliser berth:* For the import of fertiliser raw materials vis. sulphur and rock phosphate by grab unloading on to a conveyor belt.

OR-1 and OR-2 Berths: For the handling of P.O.L.

EQ-1 and EQ-2 Berths: For the export of Manganese ore and other ores by semi-mechanical means. Portable flat belt conveyor system for handling bag cargoes.

Use of grabs for unloading bulk cargoes. Poclain Hydraulic excavator and front end loaders for handling bulk cargoes.

Outer Harbour: *OB-1 and OB-2 Berths:* For loading iron ore through a mechanical ore handling plant at a rated capacity of 8,000 tonnes per hour.

STEVEDORES: Agents must give proper notice of vessel's arrival to the stevedores not less than 48 hours to make necessary arrangements for working vessel and also to order sufficient gangs, etc.

MEDICAL: All crew and officers must possess individual international vaccination certificates against cholera before leaving this port for any foreign port. Cholera inoculation facilities available with 24 hours notice. Well-equipped hospital facilities available round the clock.

TANKERS: There are 2 berths in the Inner Harbour for discharging and loading oil. The max. permissible draft at these berths is 10.06 m. at HW. In the Outer Harbour, an oil mooring berth is available to accommodate tankers of up to 100,000 d.w.t. with a draft of not exceeding 14.3 m.

DENSITY: Fluctuates from day to day between 1020 and 1023.

FRESH WATER: Normal quantities available and delivery made by Port Trust both from shore and barges.

FUEL: Indian Oil Corporation and Hindustan Petroleum Corporation supply on request either through pipeline in some cases or by barges in other cases.

FIRE PRECAUTIONS: Fire precautions are to be observed in the port area. The Port has fire fighting equipment consisting of a fire float capable of combating fires afloat as well as ashore and 3 shore fire fighting units.

CONSULS: None.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: The Port has a dry dock which is 137.2 m. long and 18.4 m. wide for port craft and small ships. It has a depth of 5.6 m. below the low water.

Hindustan Shipyard Limited's services available generally for major ship repairs. It has a dry dock which is 244 m. long and 38 m. wide. It can take in ships of 70,000 d.w.t.

GANGWAY/DECK WATCHMEN: Necessary according to demands of local labour unions.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or spirit: Asian Crew 2/5 units per 3 days. Non-Asian crew 4/5 units per 3 days. Bottle of liquor equals unit.

CARGO GEAR: Valid cargo gear test certificate must be on board all vessels using ships' gear for loading or discharging.

REPATRIATION: Facilities exist to foreign countries via Madras, Calcutta or Mumbai. About 3 days delay to obtain travel permit.

AIRPORT: Distance 14 km. Regular daily flights to Calcutta and Hyderabad by Indian Airlines Corporation.

SURVEYORS: Available.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Port's closed holidays are: Pongal, Kanumu, Republic Day, Kotha-Amavasya, Vijayadasimi, Independence Day, Gandhi's Birthday and Nagulachaviti, when work not possible even on payment of overtime.

POLICE/AMBULANCE/FIRE: Police Station 62140; Fire Station 64841 – Ext 239; Ambulance 64841 – Ext 213 (Port Hospital), Ext 275 (Ambulance).

TELEPHONES: Arrangements exist for placing telephone on board.

SERVICES: Tank cleaning facilities available.

SHORE LEAVE: Crew members allowed ashore after receiving immigration permits.

IDENTIFICATION CARDS: Not needed if have valid Seaman's Books.

DEVELOPMENTS: A Fishing Harbour was constructed in a 24 hectare area as a by-product of the Outer Harbour. The first stage of the Fishing Harbour provides accommodation to 15 trawlers and 150 mechanised boats. The second stage of the Fishing Harbour can accommodate 56 trawlers and 300 mechanised boats.

A slipway facilitating 6 trawlers or 12 boats at a time for repairs is also constructed at the Fishing Harbour.

Construction of an oil berth to accommodate tankers of 150,000 d.w.t. in the Outer Harbour, provision of facilities for handling of import of coal, provision of facilities for export of Alumina and import of caustic soda, construction of a general/bulk cargo berth in the Outer Harbour to accommodate 60,000 d.w.t. vessels, construction of 2 warehouses of a total capacity of 30,000 tonnes, provision of third wagon tippler for the iron ore handling complex, addition of tugs and other floating craft and cranes and other cargo handling equipment are some of the principal developments.

SHIPMASTER'S REPORT: September 1983.

Documents: On boarding, Pilot hands Master Arrival Report (in duplicate) with 24 questions to be completed and handed back to Pilot before passing Dutch Battery. The questions relate to the vessel, certificates, cargo and voyage just undertaken and it is quite a lengthy document. Recommend copy should be obtained at previous port to have all completed for arrival.

For security reasons, all cameras must be collected prior to arrival and kept in the safe custody of the Master. Pilot gives Master a Declaration to sign that no photographs will be taken of the Port Area on arrival, whilst berthed, or on departure.

The Indian Authorities are presently having meetings to come up with a single Arrival Form for vessels, to end the present duplication of information between Port Authorities, Customs, Immigration, etc.

Pilotage: On departure, Agents make tentative booking of Pilot with Port Trust, vessel then to hoist International Code Flag 'G' 1 hour before departure.

Radio: Visakhapatnam Radio/VWV workable about 1 day out.

Health: Send Free Pratique message stating no persons embarked at Aden or Djibouti and that there are no monkeys on board. Pilot initially grants Pratique with stamp in Deck Log Book.

Tugs: Four tugs of 32 ton bollard pull available; for deeply laden large vessels passing into Inner Harbour, 2 are required, 1 made fast right ahead, the other made fast starboard shoulder. They are necessary for vessels to negotiate the bends in the Cutting. Tugs join in the Outer Harbour and there is little time to make them fast. Therefore, Pilot asks for Aft Mooring Gang to make one of these tugs fast, as they are not required aft until vessel is in the Turning Basin.

Medical: It is recommended that personnel have Cholera and Typhoid inoculations before arrival. Stocks of these vaccinations are not usually held locally unless there is an outbreak of the disease.

Density: Varies from 1018 to 1023 depending on season and recent rainfall.

Fresh Water: Delivered by barge, hoist International Code Flags 'Y' over 'J' 2 days before required.

Repairs: Below average standard of metal work/welding. Very little assistance and spares available in electronic area.

Opening/Closing Hatches: Automatic/hydraulic type are operated by ship's crew.

Surveyors: Lloyd's (exclusive), ABS, GL, NKK, Korean Register, International Cargo Gear Bureau NY (non-exclusive), also Nautical Inspector for Governments of Liberia, The Bahamas and Republic of Panama.

Telephones: No shore telephone was placed on board.

Services: Very few services available.

Shore Leave: Immigration permits/shore passes to be carried at all times issued for limited period initially.

Indian currency in notes of greater value than Rs 10/- (about U.S.$1 not permitted inside Dock Area.

Security: Local Watchmen not particularly effective and pilfering is rife. Make the accommodation block secure with only one controlled entry exit. Keep a strict watch over any items which cannot be removed secured.

SHIPMASTER'S REPORT: November 1984.

We presented Crew List (See Note 1), Passenger List, Stores List (Form 3), a Bonded Stores List (See Note 4), Drugs List (Morphine, etc.), Arms and Ammunitions List, comprehensive Customs List Form IV (See Notes 2, 3, and 5 below), Hidden Cavities Declaration List and Vaccination List.

Note 1: The Crew Lists must show Passport or Discharge Book numbers. Not interested in dates of birth. The Immigration Officials issue passes for all on board who wish to go ashore (or just a few blanks, if only 4 or 5 people want to go ashore). These must be returned to Agent before sailing.

Note 2: Endeavour to obtain correct forms prior departing for first Indian port. A complete set of 4 is required for all subsequent Indian ports visited. Ensure that *all* paper money is declared, whatever the amount. (Undeclared currency, cigarettes, gifts, etc. confiscated). Rummage squads are thorough. Also ensure that the term "Dress materials and personal effects" is entered in Column 12 with other listed items.

Note 3: Currency – it is a fine-carrying offence to take high denomination notes ie. Rupees 20, 50, 100 and above, out of the country. Agents usually supply cash in 10 Rupee notes** or less.

Note 4: It is advisable to carry minimum sufficient bonded and slop chest items.

Note 5: Ensure that vessel sails with "travelling copy" handed to Master prior sailing first port for second port and so on for multi-Indian-port calls.

** Where foreign currency is changed ashore, a proper 'encashment certificate' with serial number must be obtained and details of passport given at time of exchange. The jetty duty Customs Official must be informed on return to ship and a supplementary currency declaration form C.B.R. CUS419 filled out showing amount exchanged and new balance of foreign currency in your possession. Both forms must be retained by exchanging person.

Also on arrival, the Health Officials carry out a "Marpol" inspection. There are many arrival and departure forms to be completed, including comprehensive pilot information forms. Have some detailed prior arrival to complete same as they are time consuming. Obtain blank sets if trading regularly.

Marpol Inspection:

Government of India
Port Health Organisation
Visakhapatnam

Sanitary Inspection of the Ship under Rule 83(i) of the
Indian Port Health Rules, 1955.

Date of inspection: Nationality:
Name of the ship: No. of crew: /Passengers:
1. Yellow Fever Vaccination Certificate Valid/Not Valid
2. Derat/Exemption Certificate Date: Place:
3. Medical Chest Inspection Date: Place:
4. Rat guards affixed Yes/No
5. Probable date of departure Date: Place:
6. Anybody sick/hospitalised Yes/No
7. Nature of sickness Fever/Skin Rash/Diarrhoea
8. Any Provisions taken or likely to be taken from this Port Yes/No
9. Date of last cleaning of Water Tank Date:
10. Last Ports of Call within 30 days

Signature of the Master:
Health Officer
Visakhapatnam.

Regulations: The taking of photographs in the harbour is not permitted. The placing of all cameras in the bond is advised, or a written notice posted.

SHIPMASTER'S REPORT: June 1988.

The Dock Safety Authorities inspect the certificates of each wire rope belonging to the ship's gear, regardless of the validity of the four yearly and one yearly Cargo Gear Inspection Certificates.

The above demand is valid at all Indian ports and if the certificates are not available on board, severe delays may arise with loading and discharging operations.

We also experienced very strict customs regulations. Using U.S. Customs Form 1301 for Ship's Stores Declaration, we had declared all listed items and ship's radios, tape recorders, T.V., video and adding machines.

We did not declare the ship's 4 washing machines and one of them was seized as it was still in its original packing and had not yet been installed in place of the damaged machine. After three days, we managed to obtain release of the machine.

In the past, sextants, binoculars, stop watches, etc., have been seized when they have not been declared.

SHIPMASTER'S REPORT: June 1994.

Iron Ore Berth loads at about 3,000 tonnes per hour.

There is no daylight restriction. Delay on entering/leaving port may occur due to harbour channel being occupied.

A watch for thieves must be maintained, especially at the anchorage. All ship's personal items should be declared in detail, making the list as comprehensive as possible.

At Ore Berths No. 1 and 2, the belt meter is not always reliable, and due to its excessive length, more cargo than ordered may be delivered because once it is loaded it has to be emptied into the ship's holds.

Provisions, laundry services and prices are reasonable.

Repatriation is difficult as there are no direct international connections, and formalities take a long time.

AUTHORITY: Visakhapatnam Port Trust, Visakhapatman 530035. Andhra Pradesh, India. *Tel:* 4841. *Telex:* 0495/235. *Cables:* Portrust. *Contact:* Harbour Master.

AGENT: See "Cochin".

NOTES

Please also advise Shipping Guides Ltd.

Indonesia

GENERAL – TANKERS

INTRODUCTION:

Situation:

The Republic of Indonesia comprises the islands of:

Sumatra : including Riau, Bangka, Belitung, Nias, Mentawai, etc.
Java and Madura
Kalimantan (Borneo) : including Tarakan, Bunyu, Laut, etc.
Sulawesi : including Kabaena, Muna, Buton, Peleng, Banggai, etc.
Maluku : consisting of Halmahera, Bacan, etc.
Bali
West Nusatenggara : consisting of Lombok, Sumbawa, Tanimbar, Buru, Seram, Kai, Aru, Babar, Wetar, etc.
East Nusatenggara : consisting of Sumba, Flores, Solor, Alor, Timor, etc.
Timor Timur
Irian Jaya : including Waigeo, Misool, Salawati, Biak, etc.

Laws:

The Laws of Republic of Indonesia are in force and all personnel, for their own protection, are urged to abide by them.

Languages:

The main language is Indonesian and the second language is English.

Territorial Waters:

The breadth of the sea claimed as territorial waters is 12 miles. Indonesia also claims sovereignty over all waters within the archipelago. Fishing jurisdiction is claimed to extend 200 miles from the base line.

Authority:

All harbours in Indonesia are under supervision of responsibility of the Government, i.e. Directorate General of Sea Communication, and to a great extent established as commercial harbours. Pertamina operate the dedicated oil and gas harbours/terminals on behalf of the Directorate General of Sea Communication under the Mutual Agreement Letter between the Director General of Sea Communication and the President Director of Pertamina.

Currency:

The monetary unit is the Rupiah (Rp) which is divided into 100 sens. Notes are issued in denominations from Rp.100.- to Rp.10,000.- and there are coins of 5, 10, 25, 50 and 100 Rupiahs.

Sailing Directions:

Refer to the "Eastern Archipelago Pilot Book".

Tidal Streams and Current:

The tidal streams and current can be found in "Tidal Stream Tables". These are published annually by the Indonesian Naval Hydro-Oceanographic Office (Jawatan Hidro-oceanografi Angkatan Laut Indonesia), Jl. Gunung Sahari No. 87, Jakarta, Indonesia.

Port Charges:

Company charges and Government charges such as service charges, light and harbour dues, agency fees, also berthing fees, pilotage fees, towage fees, etc., on application and are standard throughout Indonesian harbours.

Advance Payment:

The tanker Owner or Charterer must comply with the "Procedure for Appointing Agent". Pertamina Directorate for Shipping and Telecommunication will acknowledge receipt of cable appointment, and will request an advance deposit, depending on the size of vessel, to cover the Port Charges, not including Corporate Tax. In addition a sum of U.S.$5,000 to U.S.$10,000 is to be paid as advance payment for freight tax.

Advance payment should be made payable to:

"Pertamina Agency",
Account No. 11.51.006.000.0005,
Bank Negara Indonesia 1946, Cabang Gambir,
Jl. Kebon Sirih No. 77A,
Jakarta, Indonesia.

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate for Shipping and Telecommunication" advising Telegram Transfer (T.T.) Number, the name of vessel and the port(s) of call.

In those instances where payment exceeds the actual port charges, the balance will be credited to the Owners/Charterers account or remitted by the Agent.

Neither the Agent nor the Company will be responsible for demurrage or other charges resulting from failure to pre-arrange obligations in this manner. All cash advances required by crew and vessel at arriving port(s) such as ready cash for Master, expenses for repairs, provisions and repatriation will be covered by advance deposit of Owners/Charterers. These advance deposits are the pre-requisite for handling a vessel and should be forwarded to "Pertamina Agency" Account No. 31174, Bank Exim, Jl. Enggano No. 100, Tanjung Priok, Jakarta, Indonesia.

Safety and Fire Regulations:

Safety and Fire Regulations will be strictly adhered to. The Notice "Instructions in Case of Fire" and the Notice "Safety and Fire Regulations" must be posted in prominent positions onboard the vessel by the Master, or by his designated alternate.

Safety Check List:

The purpose of Safety Check List is to emphasise the safety requirements necessary to protect both ship and shore and the personnel involved in cargo operations during the time when the vessel is alongside the waterfront.

To assist all personnel in understanding the total requirement for each item in the Check List, extracts have been taken from the ISGOTT (International Safety Guide for Oil Tankers and Terminals) and the "Safety Guide for Terminal Handling Ships Carrying Liquefied Gases in Bulk" issued by OCIMF. It should be understood that before cargo operations commence, this Safety Check List is jointly checked by ship and shore/terminal personnel. It will nevertheless be necessary to carry out "follow-up inspections" during the vessel's stay alongside. This action is essential to ensure that acceptable safety standards are being maintained.

Prevention of Pollution of the Sea:

Owners, Masters, Agents and the operators of harbours/terminals are responsible to observe International Convention Laws of Indonesian Government Regulations concerning pollution of sea waters.

It is not permitted to pump dirty ballast into the water.

No oil or mixture containing oil shall be discharged into Indonesian waters from any vessel.

No refuse, garbage, waste matter, carcasses, substance of dangerous or obnoxious nature or trade effluent is to be discharged from any vessel into Indonesian waters.

Any fines imposed by governmental authority for pollution shall be for the vessel's account.

Removal of Wrecks:

Should any vessel or craft sink, or become an obstruction in any part of the Port, or approaches or the area of the submarine pipeline thereto, the Company shall be empowered and shall have the right to take steps it may deem necessary to remove the obstruction, without notice to the owners. All expenses of such removal shall be borne by the Owners of the vessel or craft, causing the obstruction, and the Company shall be entitled to reimbursement by them for any such expenses which it may incur.

General Holidays:

New Year's Day
Nyepi Saka Day
Good Friday
Ascension Day of Prophet Muhammad S.A.W.
Buddhist New Year (Waisak)
Ascension Day of Jesus Christ
Idul Fitri
Idul Adha
Independence Day (August 17th)
Islamic New Year (1 Muharram)
Birthday of the Prophet Muhammad S.A.W. (Isra'Mi'raj)
Christmas Day

APPOINTMENT OF AGENT:

General Agent:

Pertamina Direktorat Perkapalan, Kebandaran dan Komunikasi
Jalan Yos Sudarso 32-34, Tanjung Priok,
Jakarta Utara 14320, Indonesia.
Attention : Dinas Operasi Perkapalan/Keagenan
Jl. Merdeka Timur No. 1A,
Pertamina Building, 19th Floor,
Jakarta Pusat, Indonesia.
Mailing address : P.O. Box 327.
Cable address : Pertaminaship – Jakarta.
Telephone number : 3843806, 3816305, 3815397, 3816523.
Facsimile : 3843781.
Telex number : 44450, 45348.

Procedure for Appointing Agent:

Owners should appoint "Pertaminaship – Jakarta" as General Agent by cable or telex 2 weeks prior to attending the vessel at the oil harbour/terminal, (hereinafter referred to as "Shipping Company").

The Agent/Shipping Company will notify the Port Authorities one week prior to vessel's arrival.

Details of Cable/Telex:

The following information should also be given in the cable or telex to obtain Agency Permit for Flag Dispensation from the Directorate General of Sea Communication.

- Name and address of owners.
- Name of vessel and radio call sign.
- Flag.
- Port of Registry.
- DWT, GRT, NRT, LOA of vessel.
- Name of Master.
- Number of Crew.
- Last Port of Call and ETD.
- Quantity and grade to be loaded/discharged.
- Consignee.
- Estimated Time of Arrival (ETA in local standard time).
- Destination(s) after loading/discharging.
- Indonesian Ports of Call.

ARRIVAL PROCEDURE:

Flag Dispensation/Agency Permit:

Each foreign vessel entering Indonesian Ports must have requested and been granted Flag Dispensation/Security Clearance prior to its arrival.

General Agency Certificate:

The General Agency Certificate (Surat Keagenan Umum/S.K.U.) is a document issued by the Directorate General of Sea Communication stating that a certain authorised company in Indonesia has been appointed as the Ship's Agent (as a guarantor) and therefore this document is essential.

Health and Medical:

Vessels destined for an Indonesian port must send application for Provisional Free Pratique to the Quarantine Section, Department of Health, Jakarta, well in advance.

Vessels arriving at an Indonesian port without prior advice must first call at a first class Port of Entry for obtaining Free Pratique. The first class ports are: Belawan (Medan), Tanjung Priok (Jakarta), Tanjung Perak (Surabaya) and Ujung Pandang (Makasar).

Port Health Clearance is issued after vessel's arrival and is also valid for Departure Clearance. If Provisional Pratique is not granted a Port Health Officer will be provided.

Flags and Signals:

In accordance with practice in Indonesian Ports, by day, the Indonesian and the vessel's national flags must be flown as long as the vessel stays in port.

Display of Quarantine, Pilot, Immigration, Call Sign flags and other signals according to the International Code Signal Agreement on approach to the port must be maintained until Pratique is granted.

These signals are as follows:

Quarantine : Flag "Q" (sunrise to sunset). Signal lights red over white (sunset to sunrise). It is to be substituted by flag "QL/QQ" when the Port Health Officer has declared infected or suspected with a quarantinable disease.

Pilot : Flag "G". It is to be substituted by flag "H" when the Pilot/Mooring Master boards your vessel.

Immigration: : Flag "N" should be flown until the Immigration Officer boards your vessel.

Call Sign : To be flown until berthed and again when sailing.

During loading/discharging : During loading/discharging of oil, flag "B" must be displayed (at night, red signal light).

Notice of Readiness:

A tanker will be considered as "arrived" and Notice of Readiness will be accepted provided she is in all respects ready to commence loading/discharging.

Viz:

(a) from the time the Pilot/Mooring Master has boarded the vessel, or
(b) from the time of anchoring, when the vessel has anchored in the designated anchorage and has advised the oil harbour/terminal of the time of anchoring, or
(c) from the time a tanker within the anchorage area, awaiting the Pilot/Mooring Master's arrival, is required "not" to anchor.

Documentation:

Two days before arrival of vessel the ship's agent has to inform Port Authorities by completing appropriate forms. Copies of completed forms must also be submitted to the Port Administration, Harbour Master, Customs, Immigration and Port Health Service for preparation of services.

The Pilot/Mooring Master may berth the vessel on request of the ship's agent only after obtaining clearance from the above Port Officials.

Health Documents:

Maritime Declaration of Health Certificate.
Deratting or Exemption Certificate.
Vaccination Certificates (Cholera).
Health Book or Bill of Health.

Ship's Documents:

If arriving from a foreign port, the following documents may be required for granting Pratique. These documents are:

Certificate of Nationality.
Certificate of Measurement.
Certificate of Registry.
Certificate of Appliances (Cargo Gear Certificate).
Load Line Certificate.
Safety Equipment Certificate.
Ship's Construction Certificate.
Safety Radio/Telegraph Certificate.
Approved Letter of Compliance (International).
Oil Record Book and Certificate of Fitness (in case of gas and chemical carriers).

Harbour Master:

The ship's documents are then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port. The Harbour Master submits a Harbour Report Form for the Master to complete.

The Harbour Master issues a Port Clearance at departure, provided clearance is also granted by the other governmental authorities. A Panamanian Port Clearance for Panamanian Flag vessels is not required at oil harbours/terminals.

Immigration:

The Immigration Officer requires copies of the Crew List and Passenger List (if any) and will check the Ship's Articles and the Passports of the crew.

Each crew member should be in possession of a Passport and Seaman's Book. Crew members having no Passport are required to carry a Seaman Identification Card (S.I.C.).

A re-entry permit from the country concerned is sufficient, if there is no Passport available.

Customs:

Vessels loading/discharging cargo have to get a Customs Permit. Copies of Bill of Lading, Cargo Manifest, Ship's Stores List, Personal Effects List and Crew List should be delivered to Customs and Port Administration.

It is most important that the lists concerning personal effects, stores and crew are completed with great care as the Port Authorities are liable to carry out a detailed check and any discrepancies can lead to heavy fines.

After the vessel is all secure, the Customs Officer will seal the stores. If arriving from a foreign Port, the Agent will prepare the General Cargo Declaration Form stating the cargo onboard the tanker and attaching appropriate Shipping Documents. If arriving from an Indonesian Port, the Form 5-B issued at the last Indonesian Port will be retained by the Customs and the Arrival Clearance is granted.

Ship's bonded stores will be sealed by the Customs Officials on arrival and will remain sealed until the vessel leaves Indonesian waters.

1. Ship's Stores:

Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, firearms, ammunition and possibly some other items have to be locked up under Customs Seal from time of arrival of vessel in Port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars ashore without paying import duty. Special allowances are made for the Master under special circumstances.

2. Contraband:

The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling and trading. Illegal possession of such items as narcotics, liquor, ammunition and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned if action is taken by the authorities. All precautions must be taken to prevent the violation of contraband laws. Masters are requested to inform the Ship's Officers and crews of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

COMMUNICATIONS:

Advice of Arrival:

It is important that all incoming tankers advise the oil harbour/terminal 72 hours and 48 hours before estimated time of arrival, giving the best estimate of ship's arrival at the oil harbour/terminal via cable and or telex. Changes in ETA must be notified thereafter.

Further ETA messages should be sent to the oil harbour/terminal when the tanker is 24 hours and 6 hours distant from the oil harbour/terminal and any other time, if any appreciable change occurs in the original ETA or those subsequent thereto.

Communication for Contacting Agent:

1. Tankers approaching the oil harbour/terminal should make initial contact on VHF Channel 16.

Masters are recommended to use this system on coming within radio range of Port Control, particularly when approaching the port, as if poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the means of avoiding delay in berthing.

During berthing, the ship's radio will be under the sole control of the Master, and the terminal radios will be under the sole control of the Terminal Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain constant listening watch on VHF Channel 16 to receive Terminal instructions. Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

For subsequent inter-ship communications within the oil harbour/terminal a "walkie-talkie" UHF Radio on Frequency 157.725 MHz will be used by the Pilot/Mooring Master. This frequency will not be used for general purposes, unless clearance is obtained by the oil harbour/terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal, i.e. continuous blasts on the ship's whistle will be sounded to notify the oil harbour/terminal of the radio failures. Upon hearing this signal from a tanker, the terminal will immediately stop loading/discharging until communications have again been re-established.

2. In the event incoming tankers are not able to contact the oil harbour/terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta.

Pertamina Jakarta Radio, Call Sign PKI-2, may be contacted on HF/SSB on the following frequencies and during the following service hours:

Frequency (kHz)	*Hours* (GMT)	*Keep Watching* (kHz)
452	H24	500
8626	0200-0400/1000-1200 0500-0600/1400-1600 0700-0800/1700-2000	8363.2-8364.8 8372.8-8373.6
12980	0100-0200/1200-1400 0400-0500/1600-1700 0800-1000/2000-2200	12544.8-12547.2 12559.2-12560.4

VHF Channel 9, 16, 19	H24	Channel 16

Details of Cables:

The following information should be included in the cable:

Name of vessel and Radio Call Sign.
Cargo requirements.
Quantity of ballast loaded on passage/arrival.
Quantity of segregated/dirty ballast on arrival.
Draft on arrival (forward and aft).
Last Port of call.
Flange dimensions of vessel's manifold connection, if not to ASA Series 150 or equivalent.
Maximum loading rate and approximate topping-off rate.
If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
Confirm that vessel has clean Bill of Health.

Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading/discharging or cause pollution.

Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring/unmooring or during operations.

Distance in feet/metres from the bow to vessel's loading manifold.

The following information should be included in the cable by LPG tankers:

Total cargo capacity in cubic metres.

Have any cargoes other than LPG been carried during last 3 loaded voyages.

Gauge pressure, top, bottom and mean temperatures of each cargo tank.

Maximum allowable relief valve settings for all cargo tanks.

Maximum Oxygen content by volume per cent of each inerted cargo system.

If tank purging required specify whether:
(a) Parallel or in Series.
(b) Liquid from shore direct to cargo tanks.
(c) Liquid from shore to deck tank to vaporisers to cargo tanks. State capacity of ship's vaporisers in tons of LPG per hour throughput.

If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hour and maximum temperature differential permitted between any 2 points in cargo tanks.

Available total capacity of ship's reliquefaction plant for each nominated cargo product.

Grade and quantities of any part cargoes or cargo residues and where loaded.

Are part cargoes to be commingled with refinery loadings.

Quantity of purge product required in addition to cargo requirements.

Type of ship's reliquefaction system, i.e. direct, cascade or other.

Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.

For further information contact Pertamina Direktorat Perkapalan dan Telekomunikasi, 32-34 Jalan Yos Sudarso, Tanjung Priok, Jakarta, Indonesia. Attention: Biro Pelabuhan Sub Dit. PMK. Telephone: (Hunting lines): 494309 Ext. 217, 362, 363, 365. (Direct lines): 495402, 490323.

AMAMAPARE: 04.49 S. 136.58 E. (See Plan)

PILOTAGE: Not available. A Freeport Indonesia Master is available on request to assist the ship's Master with entering the channel.

NAVIGATION/APPROACHES:

Chart: B.A. Chart No. 3527.

Fairway Buoy: Buoy 'A' located in position Lat. 04° 55' 17" S., Long. 136° 42' 59" E. is the Fairway Buoy. Light is flashing white Morse 'A'.

Lighthouse: There is a new lighthouse to the West of the port.

Name	Aika
Visibility range	12 miles
Tower colour	White
Height of tower	30 m.
Light colour	White
Light characteristic	Gp.Occ.(2) 10 sec.

Harbour Passage: The distance from Buoy 'A' to the port is approximately 15 km. The channel is well marked by buoy and beacons. Width of channel is 1,000 ft.

Tides: Indonesian Tide Tables. Port used is Sungai Mimika/Muara (04° 43' S., 136° 27' E.). Lowest tide −0.3 m. Highest tide +3.3 m.

Approaches:

There is a sand bar between Buoys No. 3, 4 and 5, approximately 3 km. wide. The depth of water at the Bar is the controlling factor as to whether all of a specific cargo is loaded at the Amamapare Dock or partly offshore at Sea Buoy 'A'. Tides normally rise and fall every 24 hours. At low tide the water on the Bar is about 4.30 m.

If approaching the area on a clear night, lights in the mountains are visible due North of the Port. This is from the Freeport Mines and Tram area at 11,000 ft. elevation and can be seen from about 50 miles offshore.

On approaching the Port/Buoy 'A', call "Port Ampre" on VHF Channel 16 for further information.

MAX. SIZE: Vessels of 38,000 d.w.t. have docked to load concentrates.

Large vessels are normally topped-up outside the Bar at Buoy 'A'.

Also see "Cargo Handling Facilities".

RADIO/VHF: Dock Superintendent's office on VHF Channel 16.

Harbour Master's office on SSB radio – frequency 6215.0 kHz. Ore barge on same frequency when on ocean passage.

Office hours are 0800 – 0930 and 1630 – 1930 (local time).

Tugs on VHF Channel 16 and many SSB frequencies.

TUGS: 1×3,000 h.p. (Bollard pull 45 tons), 2×350 h.p. and 2×1,300 h.p.

Tugs are available throughout 24 hours to assist large vessels docking and undocking and to guide them in and out of the channel.

BERTHING: The wharf is about 600 ft. offshore and is parallel to the shore. It is well fendered with rubber tyres.

Length	942 ft.
Straight face	522 ft.
Height above LW	10 ft.
Depth at LW	9.2 m. (East end) 8.0 m. (West end and over a distance of 750 ft.)

CARGO HANDLING FACILITIES: *Bulk Cargo:* Vessels load copper concentrate from a conveyor and fixed shiploader at an approximate rate of 1,200 tonnes/hr. Weight of concentrate is approximately 175 pounds per cubic foot. Dust is not a problem as it has a 9% moisture content.

The shiploader can be raised and lowered but not moved. Ship's crew are responsible for shifting ship and changing of holds.

A loading plan should be telexed to the port at least 48 hours prior to arrival.

Large vessels are normally topped-off outside the Bar at Buoy 'A'. Cargo is delivered to the vessel by 2×2,500 tonne barges (additional barge of 3,500 tonnes to be delivered in May 1992) and loaded by ship's electric hydraulic grabs at a rate of 200 tonnes/hr. in good weather.

General Cargo: Flat top barges available for transhipment of cargo and fuel. A 100 ton non self-propelled barge crane and 4 ton forklift trucks available for cargo handling. Workboats and speedboats available for transporting workforce throughout 24 hours. General cargo handling rate is approximately 1,000 tonnes/day.

FRESH WATER: Available in emergency cases only.

FUEL: Available in emergency cases only.

TIME: GMT plus 9 hours.

GENERAL: *Immigration:* Rp. 200 per man fee upon docking of ship.

Customs: Inspection and clearance normally takes about 1 hour to 2 hours.

Harbour Master: Available.

Police/Security: Available.

Handling Agents: Not available. Freeport Indonesia handle all general cargo, explosives and fuel. Freeport Indonesia personnel operate general cargo cranes and other equipment.

Stores: Limited stores and provisions are available. They are sold on emergency basis only.

SHIPMASTER'S REPORT: October 1993.

1. Ship's echo sounder confirmed minimum Sea Bar Chart Datum depth of 4.5 m.
   According to local information, the Southern part of buoyed channel within area of Sea Bar is most desirable, so vessel should steer almost in line with Buoys No. 3 and No. 5 when passing bar.
2. General Anchorage (North of Buoy No. 10) with minimum depths 9.0 m. is very large in comparison with other anchorages close to port, and it is best to wait for high tide.
3. After passing Sea Bar, vessel radios this fact to Port Amamapare on VHF Channel 16.
   In case of topping-off outside the bar at Buoy "A", there is a signal for barge(s) to proceed to vessel.
4. There are 3 barges to deliver cargo to the vessel: 2×2,500 tonnes and the new 3,500 tonne barge "Kamora".
   Motor barge "Kamora": Modern, one box-shaped hold barge with bow thruster, well protected with 3 Yokohama fenders, length 71.0 m., breadth 16.0 m., hold 36 m. × 12.5 m. (all data approx.), manned by experienced crew.
5. Rolling of barge due to swell considerably disturbs delivery of the cargo. Because of the very short outreach of cranes (big fenders, breadth of the barge), after discharge "half side of cargo", the barge has to reberth herself.

SHIPMASTER'S REPORT: April 1994.

The following is an update on the Report dated October 1993 (See above).

1. Unlike first time berthing with 6 shackles on port anchor chain, other guider (Pilot) used one shackle on port anchor only for swinging and then heaved it up after all lines fast at the wharf. This method of berthing (with one shackle only) is simple and additionally unberthing without heaving-up long cable is much more convenient.

2. During loading operations at dock, the foreman is always available on VHF Channel 9 (Call "Scale House"). He provides all useful information (e.g. quantity of cargo loaded at given moment).

3. When shifting the vessel at wharf, due to fixed shiploader, it is necessary to change/transfer mooring lines to other bollards, but owing to a lot of hands/stevedores engaged, it is carried out quickly and safely.

There are 2 small pusher tugs (used for swinging when approaching wharf) on stand-by. Tugs on VHF Channels 16/9.

4. New wharf for dry cargo vessels is soon to be ready.

5. Three barges deliver cargo of copper concentrates (topping off-shore):

"Ajkwa"	2,500 tonnes.
"Otomona"	2,500 tonnes.
"Kamora"	3,500 tonnes.

All barges have one box shaped hold.

Dimensions of the hold ("Ajkwa" and "Otomona"): 33 m. × 10 m.

6. Some observations on Amamapare:
   (a) The minimum of depth is observed between Buoy No. 3 and pair of Buoys No. 4 and 5 (Western part of this stretch).
   (b) For safety, all loading calculations and times of passing Sea Bar are checked by Harbour Master and Port Superintendent of Amamapare on the basis of Chart Datum 4.3 m. and Indonesian Tide Tables for Sungai Mimika (Muara), situated 20 miles North-Westerly, but analysis of depth when passing Sea Bar (6 observations – 3 under ballast and 3 when laden) testify that Chart Datum is not less than 4.5 m.
   (c) There is a precise plan for passage of the fairway from Sea Buoy "Alpha" to Amamapare port, distributed to ships by Port Superintendent.
   (d) Due to scale and frequent corrections on B.A. Chart No. 3527 and owing to considerable changes of Chart Datum, predictions of H.W. for Aika (situated 5 miles North-Easterly of Sea Bar) taken from B.A. Tide Tables has no navigational value when passing buoyed fairway from Sea Buoy to Amamapare Dock.

SHIPMASTER'S REPORT: January 1995.

Pilotage: Pilot station position: Lat. 04° 55' S., Long. 136° 40' E. (0.5 miles from 'A' Buoy).

Operator: P.T. Freeport Indonesia Co., Amamapare, Irian Jaya, Indonesia. (P.O.Box 516, Cairns, Queensland 4870, Australia). Tel: (62) 0979 540 7900. Telex: (073) 46703. Fax: (62) 0979 540 7970 or 4470.

Messages should be addressed for attention of Captain S. Rizal.

Communications: Advance notices were given by telex to Agents, and direct to Freeport Indonesia.

The advance loading plan was sent by telex direct to Freeport Indonesia. Communications to the vessel were from the Agents.

On approaching the 'A' Buoy, VHF contact was established with Port Amamapare and anchoring and pilotage information passed to the vessel.

Requests for arrival draft reduction were received from Agent.

Amamapare is a little off the beaten track and although telephone, telex and fax facilities are available, mail will take a long time to arrive.

Approaches: Using B.A. Chart No. 3527, Edition 20.5.88, with corrections to 1993(671), was not easy as the buoys are not in the positions as charted, and also are not correctly described on the chart. For more accurate positions see plan (See "Plan Section").

Tg. Aika Light structure (Lat. 04° 52.45' S., Long. 136° 44.75' E.) is not easily seen by day, and at this time would have been even more difficult to see at night, as it was found to be unlit.

The Racon 'O' on 'A' Buoy was not seen on approach, but on departure was found to give one weak flash on the 3 cm. radar at infrequent intervals.

A band of discoloured water, extending about 7 miles offshore and which looked far more solid than it was subsequently found to be, did not increase confidence in a safe arrival.

All positions on approach, both visual and radar, were checked by G.P.S.

Anchorage: Anchorage recommended was 0.5 miles from 'A' Buoy in about 36 m., and is used for vessels awaiting tides to enter and for vessels topping-off with cargo loaded from barges.

The anchorage is exposed to N.W. and Westerly winds which are prevelant in January (Pilot charts indicate December to February), creating a short swell off the entrance and will cause long delays in topping-off, due to vessels and barges being unable to work.

One vessel topping-off with 2 barges alongside reported that it had dragged anchor and had to cease loading in a N.W.'ly wind with Force 5-6, which had steadily increased from mid-afternoon and died out with the first rain shortly before midnight on 2 successive nights (The swell on the 2nd night was worse than first).

Pilotage: Pilotage is reported not to be available. However, the tug's and barge's Masters join vessels entering and leaving and are referred to as 'Guides'.

The guide on this occasion is reported to attend most of the vessels arriving and sailing, and did an excellent job of piloting and berthing the vessel inwards and outwards, but did not seem to fully appreciate the effects of a strong beam wind on a large vessel at light draft when making a lee for embarking and disembarking.

Largest Vessel: Largest vessel reported to have visited the port was LOA 198.8 m. with beam 32.4 m.

Tides: Heights and times are taken from Indonesian tide tables for Sungai Mimika (Muara) in position Lat. 04° 07' S., Long. 163° 05' E., and reported to have a lowest of −0.3 m. and highest of 3.3 m. above Datum.

Tides are once a day, and high water neaps as low as 1.6 m. have been predicted.

Entrance Bar: There is a sand bar with its shallowest depth between Buoys No. 3 and No. 4/5, about 1 mile. The depth is reported to be 4.3 m. at lowest tide.

Observations with the echo sounder entering and leaving the port are recorded in the following tables.

On both occasions, strong N.W.'ly winds and a short swell were experienced when crossing the bar.

Position	*Date*	*Time*	*Draft* (m.)	*Least UKC* (m.)	*Total Depth* (m.)	*Pred. Tide* (m.)	*Datum Depth* (m.)
Buoy No. 3	25.1.95	2230	5.71	1.0	6.71	2.05	4.66
Buoys No. 4/5	25.1.95	2241					
Buoys No. 4/5	26.1.95	2241	6.22	0.9	7.12	2.20	4.92
Buoy No. 3	26.1.95	2241					

A table of depths on the bar is attached (See "Notice").

Directions for the Marked Channel: (See "Plans").

Buoy 'A' to Concentrate Loading Pier is 11.5 miles. Channel width is 1,000 ft. (304.8 m.).

The guide will call on VHF Channel 16 when approaching the vessel and boards from a small harbour tug which will precede the vessel into port as an extra guide.

Expected time of boarding will be advised on anchoring and will be updated by VHF.

Time of entering depends on the vessel's draft, and this will be confirmed over VHF.

Weigh anchor in sufficient time to manoeuvre to make a lee for the Pilot to board.

Passage over the bar is at dead slow speed, and it is recommended to keep as close as possible to Buoy No. 3. After passing Buoys No. 4/5, speed can be increased as the depth increases.

The instruction to pass close to Buoy No. 3 may have been taken too literally by someone in the past, as on 25th/26th January 1995 the buoy was unlit but was easily picked-out with the Aldis lamp from the bridge.

From Buoys No. 4/5, the range 'A' leading lights mark the mid-channel, and it is advisable to keep close to Buoy No. 6 to avoid the drying patch on the starboard side. A strong set and leeway may be experienced between Buoys No. 4/5 and Beacon No. 8, particularly with N.W.'ly winds.

Beacon No. 8 has been moved from its original position, and the course to Beacon No. 10 is as indicated on the plan.

From Beacon No. 10 to Beacon No. 11, Range 'B' leading lights mark the mid-channel.

From Beacon No. 11 to Beacon No. 13, the course is as per plan.

From Beacon No. 13 to Beacon No. 12, Range 'C' leading lights mark the mid-channel.

The positions of Range 'C' lights are doubtful as they are shown differently on various versions of the plan, but course as shown.

Speed will be reduced from Beacon No. 13 and engines stopped at about Beacon No. 12, and only used after that to maintain steerage way.

If crossing the bar at H.W., the current off the berth will probably be setting to the West and vessels will generally berth port side to.

With a current setting Easterly, vessels will turn on the anchor with tug assistance, off the berth, and go alongside starboard side to. The guide (Pilot) is advised on approach which way the current is setting.

Two tugs will be in attendance from Beacon No. 12, and when stopped level with the berth will push on the starboard bow and quarter to put vessel alongside. The engines only being used to maintain position abreast the berth.

The starboard anchor should be ready and, if used, let go to 2 shackles and slacked if required to get alongside.

Holding ground is reported to be poor. The anchor should be brought home when securely moored.

The tugs will also help to maintain the vessel's heading by pushing if required during the approach.

First line ashore will be a headline lowered to a mooring boat, followed by a stern line using the same boat.

Navigation Marks: Well maintained by Freeport, only Buoy No. 3 light being inoperative and Buoy 'A' Racon poor.

The buoys and beacons are all green with green lights to starboard and red with red lights to port when entering.

Leading beacons are white or orange lights.

Tg. Aika Light, which is not maintained by Freeport, was unlit.

Berth: The mine pier for loading copper concentrate is a 'T' pier on piles with length overall 942 ft. (287.1 m.), with a straight face at the centre of 522 ft. (159.1 m.).

Good fenders of timber with MD rubber absorbers inside and faced with large tyres outside are fitted .

Height above water at LWS is 10 ft. (3.0 m.).

Depth alongside at 0.0 m. tide is 8.0 m. at the far West end and 9.2 m. at the East end.

Tugs: There are 4 tugs available, 2×350 h.p. and 2×1,300 h.p., and they are available 24 hours to assist vessels to and from the dock and to guide vessels in and out through the channels. (Editor's Note: A new tug of 45 tons bollard pull also available – arrived after Master's Report).

All are fitted with VHF Channel 16 for contact.

Clearance: About 10 Officials board with the Agent, and require standard papers for Indonesian ports, as well as some local papers required by Freeport.

A Customs search of accommodation and stores is carried out which will take 2-3 hours.

Electrical equipment and excessive items of personal effects will be removed and put under seal, even though declared.

Access to the Vessel: By an open cage which is available on the pier by the loader and is used on the ship's cranes to bring officials and visitors on and off.

Security: No problems were experienced with theft or unauthorised visitors onboard. Security in the area is good, and this can be considered a safe port.

The precautions of welding up the access to the forecastle stores was taken before arrival which upset the Customs, but they accepted that if they could not get in, it was unlikely that we would be breaking in to dispose of our stores.

Loading Operation: (See "Freeport" instructions, last item in Report).

The copper concentrate weighs 175 lb./cu.ft. or 2.803 tonnes/cu.m. or 0.357 cu.m./tonne.

Loading is on a 24 hour basis and will commence as soon as possible after berthing and hold survey.

Loading at a rate of up to 1,200 tonnes/hr. is from a fixed loader and the vessel has to be shifted between holds by ship's crew.

The airdraft is satisfactory for vessels with side opening hatch covers at ridiculously light draft.

The loader can move in the athwartship's direction to distribute the cargo, but the ship must be moved for fore and aft distribution.

Shifting of the vessel with the loader over the ship is not permitted, so any fore and aft distribution results in stopping loading. The loading arm will be removed and secured before the vessel can be moved. On completion of the shift, loading will resume.

Ship's staff are responsible for distribution of cargo in the holds and for this purpose, communication with the loading personnel is by VHF Channel 9. The ship's staff are also responsible for advising on athwartship's distribution to avoid listing.

No trimming is carried out other than by movement of the vessel and athwartship movement of the loader.

The loading personnel do not come onboard, except for pre-loading hold survey, but are friendly and flexible in their operation.

Moisture Content: Reported to be about 9%.

Certificates for flow moisture point and transportable moisture limit were put onboard on completion of loading in spite of requests through the Charterers before arrival and to the Agent on arrival that a certificate was required before loading.

The certificate, when received, did not give the moisture content but only certified that it did not exceed the limits.

The cargo was quite dusty and at the reported 9% content is well below the TML of 10.65.

Cargo Papers: This vessel completed loading just in time to sail and catch the tide on the bar. The papers were put on board as the vessel left the berth and signed on passage down river. They were checked by the guide who takes the shore copies off with him when he disembarks.

Any discrepancies can be sorted out through the guide over the VHF.

Limiting Draft: Around 6.2 m. (See "Tides and Entrances Bar" tables). Vessel due to load to a deeper draft will be topped-off at the outer anchorage using ship's gear and personnel to load from barges. Three motorised barges are available, 2×2,500 tonnes and 1×3,500 tonnes, to transport the cargo to the anchorage. It is reported to take about 6 hours for an empty barge to go to the dock, load and return to the anchorage.

A loading rate of about 100 tonnes/hr. per crane can be expected, but see remarks in "Anchorage".

It is not clear if grabs can be supplied from ashore, but it would seem that ship's grabs are required.

General Cargo: Flat barges are available for working general cargo, each 150 ft. × 50 ft. × 10 ft., as well as a non-self-propelled barge crane with 100 ton capacity and forklift trucks of 4 ton capacity.

Explosives Anchorage: Any ship loaded with explosives is to anchor only in the Explosive Anchorage Area. Harbour Officials, Immigration and Customs will board explosives ships only in this area.

Stores, Provisions, Fuel and Fresh Water: Only available on an emergency basis and reported to be limited.

Some local produce may be obtained on a barter basis from passing canoes, but no indication was given that this was officially approved.

Notice:

Depth of Bar measured at 00 decimeters lowest low water 15 ft. 01in. or 4.60 m. between Buoy No. 3 and Buoys No. 4/5.

Tide decimeters	*Depth* (ft.)	(in.)	*Depth* (m.)	*Tide* decimeters	*Depth* (ft.)	(in.)	*Depth* (m.)

While the above is believed to be accurate to the best of our knowledge, Freeport Indonesia cannot guarantee the accuracy or continued accuracy of the above table, the accuracy of the following tide charts or the channel information in the Tipoeka River.

Based on Information available. Accuracy not guaranteed.

Loading of Copper Concentrate Procedures for Ore Ship/Dockside Loading:

(A) Master should fill loading plan form prior to commencement of loading.

(B) Master/Officer should supervise stowage of concentrate in the hold during dockside loading, and inform of any change of stowage to Amamapare Office by VHF Channel 16 to confirm with the dockside loading Supervisor. Amamapare Office station on VHF Channel 16 is on stand-by for 24 hours during ship loading progress.

(C) There is no trimming of the ore after completion of loading in the hold.

(D) If any special instruction required from the ship's Master regarding loading plan he should inform Amamapare Office by Channel 16.

(E) For safety reasons, shifting of the ship should commence after the shiploader boom is completely up and in the locked position. The dockside loading Supervisor will inform the ship's Master/Officer on duty when the shiploader boom is completely locked.

(F) To control listing of the ship during loading, it is required that the ship's Master/Officer on duty be fully responsible. The movement of the ship loader's shuttle is ship's port side and starboard side is to be done only under instruction from the ship's Master/Officer on duty.

(G) If any stoppage of loading is required by the ship's Master, he should inform the Amamapare Office, the reason for the stop and duration.

(H) Ship's Master/Officer on duty should control the tightness of the mooring lines at all times, especially on lowest tide to avoid shifting of the ship's position, since it may cause the shiploader boom to make contact with the ship's crane or others.

(I) Ship's Master/Officer should provide suitable gangway or ladder to allow Port Authority to come on board after the ship is moored alongside dock.

(J) Ship's holds should be ready for inspection after the ship is completely alongside dock.

(K) If remaining cargo is to be topped-up offshore, the ship should load on board by ship's crane, 4 sets of Yokohama fenders and two bobcat loaders, which was prepared by shore crew on main jetty.

Port Superintendent.
P.T. Freeport Indonesia Company.

AUTHORITY: Freeport Indonesia Inc., Amamapare, Irian Jaya, Indonesia. *Contact:* Captain S. Rizal, Port Superintendent (Tel. 5260).

New Orleans office: *Telex:* 46703 Freetpe LA. *Fax:* (504) 582-1835.

AMBON: 03.41 S. 128.10 E.

DOCUMENTS:

14 Passenger Lists.
7 Crew Lists.
2 Customs Documents.
2 Health Documents.
7 Cargo Manifests.
7 Bills of Lading.
5 Ship's Papers.
Sailing Permit.

PILOTAGE: Compulsory. Apply for pilot boat by calling Ambon Coast Station (Ambon Radio) or fly "G" Flag. Pilot boat located at Ambon Bay. Entrance in all seasons and weathers. All parts of Ambon Bay suitable for anchorage to await Pilot.

ANCHORAGE: 03° 40' 04" S. 128° 10' 02" E. or 03° 40' 56" S. 128° 10' 48" E. Areas of anchorage can take all sizes of vessel.

RESTRICTIONS: Open 24 hours. Tides do not affect entry. But when entering at night ship must anchor and await orders.

MAX. SIZE: Max. draft 11.0 m.

HEALTH: Port Health Officer boards vessel together with Pilot.

RADIO: Ambon Coast Radio, call sign PKE. Operating 24 hours. Frequencies 500–470 kHz, 8473 and 8472-8799 kHz and 13101 kHz. VHF all Channels used.

TUGS: Normally tugs do not join vessel but when necessary to use tugs call PT "Dock Waijame".

BERTHING: Yos Soedarso Pier: Length 187 m., breadth 35 m., depth 7.5 m. – 12.5 m. Wainitu Pier: Length 100 m., breadth 20 m., depth 8 m. Halong Navy Pier: Length 153 m., depth 11.0 m.

CRANES: Mobile cranes, capacity 5 tons – 40 tons.

STEVEDORES: Agent arranges. 3 stevedore companies: PT. "Gotong Rojong", PT. "Mastra" and PN. "Varuna Tirta Prakarsa".

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: Berth at Wainitu Pier. Type of pipe, 6 in. and 8 in. Discharging capacity, 125 t.p.h.

FRESH WATER: Available only at Yos Soedarso Pier. Loaded by pipeline with 25 t.p.h. capacity.

FUEL: Only diesel and marine fuel.

CONSULS: No consuls available locally.

REPAIRS: Deck and engine repairs available. Floating dock, lifting capacity for 2,000 d.w.t.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Deck watchmen needed, particularly for tankers.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Cannot be held out of bond.

REPATRIATION: Possible. Dealt with by Immigration through Jakarta.

AIRPORT: Distance from airport about 7 miles. Regular airline Garuda Indonesian Airways (GIA). 4 flights per week from Ambon to Jakarta.

TIME: Local time GMT plus 10 hours.

HOLIDAYS: Port open for 24 hours even in holidays.

POLICE/AMBULANCE/FIRE: Police and Port Health at Port. But when necessary to use fire brigade call by connecting to "Burgomaster".

SHORE LEAVE: All crew members allowed ashore with permission of Immigration.

IDENTIFICATION CARDS: Needed by Immigration (landing permit).

DEVELOPMENTS: Plans for future developments dependent on Government expenditure.

AUTHORITY: Ambon Port Administration.

ANOA MARINE TERMINAL: 05.14 N. 105.36 E.

(See Plan)

LOCATION: The Oil Field and Marine Terminal are located in an area of the South China Sea known as the Natuna Sea, about 140 miles North of the Anambas Islands. It is within Indonesian territorial waters but only 2 miles East of the Malaysian/Indonesian border. (Consult relevant Hydrographic Office, Notices to Mariners and Admiralty Chart and publications for exact locations and navigational information).

Description: The Anoa Marine Terminal is a purpose built Floating Production Storage and Offloading vessel (FPSO) the "Anoa Natuna", of 77,292 (M) d.w.t. permanently moored, via a forward turret and swivel assembly and catenary anchor leg mooring chains, to the sea bed. The turret and swivel assembly allows the vessel to weather vane and connects via flexible riser hoses to the subsea PLEM (pipeline end manifold). Produced crude oil and gas from the adjacent production platform flows to the vessel through 8 in. and 6 in. subsea pipelines respectively.

An export tanker is moored in tandem to the stern of the FPSO and cargo is transferred through a single 16 in. floating hose which terminates in a 12 in. ASA quick release manifold connection. Total crude oil storage capacity of the FPSO is 550,000 barrels. The export system is designed to handle parcel sizes up to 400,000 barrels.

Oil Production Platform: The oil production platform is located in 73 m. (250 ft.) of water and receives production from as many as 15 wells. The platform is a four legged, piled structure rising to an elevation of 30 m. above sea level. First stage separation and crude oil stabilisation is carried out in the process train on the platform which accommodates 12 people.

FPSO: The "Anoa Natuna" is located in position Lat. 05° 13.3' N., Long. 105° 36' 22" E., in 73 m. (250 ft.) of water. Crude and produced gas is received from the platform via 8 in. and 6 in. subsea lines respectively. Final processing, stabilization and storage of the crude oil is performed onboard. The FPSO of 77,292 (M) d.w.t. has a length overall of 182 m. and a loaded draft of 14.3 m.

PORT LIMITS: *Terminal Limits:* A prohibited area is established bounded by the following coordinates:

	Latitude	*Longitude*
Point "A"	05° 12' 51" N.	105° 36' 23" E.
"B"	05° 13' 55" N.	105° 35' 16.5" E.
"C"	05° 14' 17.5" N.	105° 35' 39.3" E.
"D"	05° 13' 13" N.	105° 36' 45.5" E.

Restricted Area: A restricted area surrounds the prohibited area, bounded by the following coordinates:

	Latitude	*Longitude*
Point "D"	05° 11' 54.5" N.	105° 36' 23" E.
"E"	05° 13' 55" N.	105° 34' 19" E.
"F"	05° 15' 14.5" N.	105° 35' 38.4" E.
"G"	05° 13' 13" N.	105° 37' 43" E.

Anchoring is forbidden within the restricted area above. Vessels cannot enter the prohibited area without a Company Mooring Master onboard.

DOCUMENTS: *Clearance:* Indonesian Immigration, Customs and Harbour Master officials will board the vessel after arrival to perform Inbound Clearance procedures. Each export tanker must have requested and been granted flag dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, cable advice is sent to the Harbour Authorities. Port Health Clearance is issued prior to vessel's arrival and is also valid for Departure Clearance. If Provisional Pratique is not granted a Port Health Officer will be provided.

All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card. The Agent prepares the ship's Documents Check List Form to check the validity of each document.

These documents are:
Certificate of Registry.
Ship's Safety Construction Certificate.
Load Line Certificate.
Life Saving Equipment Certificate.
Safety Radio/Telegraph Certificate.
Cargo Gear Certificate.
Deratisation Certificate or Deratisation Exemption Certificate.

The list is then delivered to the Harbour Master with the following documents attached:
Port Clearance from last port (original).
8 copies Crew List.
Passports of all crew (originals).
3 copies Personal Effects List.
3 copies Stores List/Bonded Stores List.
3 copies Drugs List.
3 copies Ammunition List.
3 copies Cargo Manifest.
3 copies Ship's Particulars.
Light Dues Receipt if arriving from another Indonesian port.

The Harbour Master issues a Port Clearance at departure provided Clearance is also granted by the other Governmental Authorities.

The Immigration Officer requires 2 copies of the Crew List and will check the ship's articles and the passports of the crew. When these documents are found to be in order, an Arrival Clearance will be marked on the Crew List.

If arriving from another Indonesian port, the Agent will sign a guarantee if the vessel cannot prove that Light Dues have been paid.

Also see "Customs".

PILOTAGE: The Mooring Master will board incoming tankers in the anchorage area or other agreed location.

ANCHORAGE: *Approach to the Anchorage/Mooring Master Boarding Area:* When within VHF communication range, Masters of export tankers should confirm berthing prospects with the Terminal.

Should it be necessary to anchor, then vessel should proceed to the recommended tanker anchorage area which is within a circle 0.75 miles in diameter with its centre located in position Lat. 5° 12' N., Long. 105° 38' E., to the S.E. of the Restricted Area.

Arrival at Pilot Station/Anchorage: Means of access to the vessel by the Amoseas Mooring Master shall be provided in accordance with the requirements of SOLAS, early advice will be given by Amoseas to confirm the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to provide for the approach and boarding of the Mooring Master, Government officials and for Amoseas representatives.

Vessel Anchoring: If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed due to adverse weather conditions, etc.), Master will be advised by radio and requested to anchor in the anchorage mentioned above.

NAVIGATION AIDS:
The FPSO displays the following light signals:
(a) At the bow and stern – white morse (U) light, period 15 seconds, range 5 miles.
(b) At the bow only – red morse (U) light, period 10 seconds, range 3 miles.
(c) In restricted visibility a fog signal (morse "D") is synchronized to sound simultaneously with the light signal.

Note: A 16 in. floating hose lies in the water within 850 ft. (260 m.) of FPSO stern. Yellow lights are established along the length of the hose visible at 2 miles distance.

The Platform displays the following light signals:
(a) White morse (U) lights, one at each corner, synchronized to flash simultaneously, with a 5 miles range of visibility.
(b) In the event of restricted visibility the Platform sounds one prolonged blast followed by two short blasts on the foghorn.

In addition to these prescribed signals both the FPSO and the Platform burn excess produced gas by flaring. The consequent orange/yellow flame is visible at a considerable distance.

RESTRICTIONS: Vessels may berth during daylight hours and unberth at any time (See "Berthing").

Maximum bow to centre line of manifold distance 480 ft.

MAX. SIZE: Vessels in the size range 50,000 d.w.t. – 160,000 d.w.t. can be accommodated in the berth, and there is no draft limitation. Vessels outside this size range may be accommodated, however the envelope of operational conditions will be restricted.

RADIO/VHF: Following receipt of a nomination for a "named export vessel" to load at Anoa Terminal, Amoseas will contact the vessel's Agent, Owner or Charterer giving details of:
(a) Nomination.
(b) Loading API and Temperature (approx.).
(c) Berthing prospects.

On receipt of this message and in any case not less than 72 hours prior to estimated arrival time at Anoa Terminal, Amoseas will transmit the following questionnaire to the export tanker via the vessel's Agent, Owner or Charterer:

1. Vessel's name and Summer d.w.t.
2. ETA in local mean time (G.M.T. + 7 hours).
3. Last port and next port.
4. Cargo requirements: Maximum loading rate via 1 × 12 in. manifold.
5. Quantity of ballast on board. Type of ballast. (SBT, etc.).
6. Vessel able to load and deballast simultaneously maintaining 30% of S.D.W.T. throughout. (N.B. Terminal has no dirty ballast facilities).
7. Estimated arrival and departure drafts, fore and aft.
8. Bow to centre manifold distance.
9. Distance between tanker hose rail and manifold presentation flange, port side.
10. Size of bow fairlead/s. Bow chain stopper or Smit Bracket.
11. Bow chain stopper or Smit Bracket fitted – details and S.W.L.
12. Derrick or crane available port side with minimum 10 tons S.W.L.
13. Vessel has clean Bill of Health, if sickness onboard give details.
14. IGS operational and all cargo tanks inerted to less than 8% oxygen by volume. (Mooring Master will make random check of tanks prior to berthing. Failure to comply with this requirement will result in berthing delays).
15. Closed loading procedure can be followed.
16. Vessel entered in TOVALOP.
17. Vessel's Owner/Operator has a recognised "Drug and Alcohol Control onboard ship" policy in accordance with OCIMF "Guidelines for the control of drugs and alcohol onboard ship (January 1990)". A copy of the Owner's/Operator's policy statement is onboard the vessel and the Master and crew understand and are guided by such policy.
18. Date of last dry dock and date of last special survey.
19. Nationality of officers and crew.
20. Independent cargo surveyor – if appointed.
21. Please note, no bunkers, stores or potable water are available at the terminal.
22. Indonesian Government regulations require that Pertamina Directorate of Shipping & Telecommunications be appointed General Agent for all tankers proceeding to load in Indonesia.

These questions should be answered as completely as possible and a reply transmitted immediately.

Terminal will not be responsible for berthing delays due to lack of information/notification. Delays due to non-compliance with terminal regulations will be for vessel's account.

Amoseas Indonesia Communications address: Notification as above should be sent via Telex: 60555 AMOSEA IA or Fax: (062-21) 520 5588.
Telephone: (062-21) 525-7660, 525-7720, 520-7140.
Mailing address: Amoseas Indonesia Inc., Attn. Marine Operations Dept., Mulia Tower, Suite 1601-1701, Jl. Jend. Gatot Subroto Kav 9-11, Jakarta 12930, P.O. Box 2782, Jakarta 10001, Indonesia.

Vessel shall notify Amoseas of ETA 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Terminal and at any other time when ETA changes more than one hour. The 24 hour and the 12 hour messages should, in addition, be transmitted directly to the "Anoa Natuna" (FPSO).

FPSO Communication Facilities:
(a) VHF/FM Radio Communications:

The Terminal maintains a continuous watch on VHF Channel 16 and Masters of inbound export tankers are recommended to use this when they are within range. The Terminal is able to select any public VHF channel for use as a working channel after initial contact on Channel 16. Attention to VHF communications may be the means of avoiding delay in berthing and vessel turn around time.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain a *constant* listening watch on Channel 16 to receive Terminal instructions.

Any delay due to a failure to maintain a *constant* listening watch on Channel 16 will be for the ship's account.

(b) HF/SSB Telex/Voice Communications:

The "Anoa Natuna" also maintains a continuous watch on the following HF/SSB frequencies:

Watch:	Working:
13,525 kHz.	5,910 kHz.
2,182 kHz.	4,492 kHz.

(c) Satellite Telex/Voice Communications:

Vessels, Owner or Charterer may contact Amoseas Jakarta office by telecommunications satellite using international dialling code 062-21 (380-5655).

(d) Pertamina Control Radio Station:

In the event that incoming tankers are unable to contact Anoa Marine Terminal on the foregoing VHF/FM frequencies or HF/SSB, Masters should request Jakarta Radio to relay the necessary information to Amoseas Indonesia by telex or telephone.

Details of Jakarta Radio:

Name:	Jakarta Radio
Call Sign:	PKX – 2
Operated by:	Pertamina
Nature:	CR
Tax:	50 Centimes
Geographical Position:	06° 30' 00" S. 106° 50' 00" E.

Calling Frequency (kHz)	*Working Frequency* (kHz)	*Power* (kW)	*Class*	*Working Hours* (GMT)

8235.3	8759.2	1.0	A3A/A3J	0100–0300 0400–0500 0700–0800 1100–1200 1500–1600

When the export tanker is at the anchorage, communication between the FPSO and the export tanker will be established on a mutually agreed VHF channel.

When moored to the FPSO, communication between the two vessels will be maintained by VHF equipment, supplimented as necessary by UHF walkie talkies.

ARRIVAL PROCEDURES: Lifting vessels will normally be accepted and berthed in chronological order of arrival, provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast, if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped, manned and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

(a) *Hours of Operation:*

The Anoa Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstancees permitting. In special circumstances and at the sole discretion of the FPSO Superintendent, night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour.

The company will make every effort to moor offtaking vessels upon arrival in daylight, weather permitting.

(b) *Notice of Readiness:*

Arrival time will be considered as the time when the Mooring Master boards the vessel, or the time the vessel arrives in the deep water anchorage, if not berthing immediately.

The Mooring Master will act on behalf of the Company to sign acknowledgement of tanker's Notice of Readiness. Notice of Readiness shall be in English.

Notice of Readiness will be accepted between the hours of 0600 and 1630 (L.M.T.) provided the Mooring Master is satisfied that the export vessel is apparently in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, or when an export vessel arrives prior to, or after firm 3 days date range in which it is accepted to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the export vessel, her tanks and equipment, are in fact, in every respect whatsoever in the proper condition and operational status to receive the cargo.

(c) *Bad Weather Interruption of Loading/Berthing:*

Vessel required to leave the Terminal area on account of bad weather should keep in contact with the Terminal via VHF and or Radio Telephone in order that they may be available when the weather is fit for resumption of operations. Amoseas reserve the right to berth and load vessels out of turn following the return of good weather.

Amoseas reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the Terminal may be open to other vessels.

Should a vessel be rejected for any reason the Terminal will supply the vessel and Owners/Charterers with written reasons for non-acceptance.

The decision of the FPSO Superintendent to permit a vessel to berth shall be final. On receipt of such permission, berthing will be at the discretion of the vessel's Master in agreement with the Company Mooring Master.

TUGS: *Mooring Launches:* The Terminal maintains boats to assist in mooring and unmooring vessels. These boats are directed by the Mooring Master, to whom requests by the lifting vessel for action or assistance must be directed. *Services and facilities provided by the Company including the services of the Mooring Master, riggers, boats or berthing equipment, are at the vessel's risk.*

BERTHING: *Design Export Tanker Operational Conditions:* The Anoa Natuna Marine Terminal is an open unsheltered mooring. On occasions there may be circumstances or a combination of circumstances which may preclude mooring and/or loading/deballasting operations. In these circumstances good judgement should be exercised by the Master, under the Mooring Master's advice, as to precise actions to take (See "Port Conditions" below).

With respect to export tanker operations, the FPSO and mooring system is designed for the following operational condition limits:

(a) Mooring Operational Limit: The FPSO and mooring system is designed to enable the export tanker to moor to the FPSO under the following conditions:

Wave: Significant height of 1.5 m.
Wind: Up to 25 knots.

(b) Offloading Operational Limit: The FPSO and mooring system is designed to enable the FPSO to continue offloading to a moored export tanker under the following conditions:

Wave: Significant height of 3.0 m.
Wind: Up to 35 knots.

Port Conditions: The following table indicates outline conditions covering status of the Terminal. These regulations apply to vessels in the size range 50,000 d.w.t. to 160,000 d.w.t. The Terminal may handle vessels outside this size range but the operational envelope will be limited.

Port Condition	Operational Limitations				
	Wind Speed Knots	Significant Wave Height (m.)	Deballasting	Loading	Berth
Open	< 20	< 1.5	Continue	Continue	Remain/Berthing Ops.
Restricted	20-35	1.5-3.0	Continue	Continue	Remain/Berthing Ops.*
Closed	> 35 and/or	> 3.0	Reballast	Continue Unberth	No Berthing (At Mooring Master/FPSO Superintendent discretion)

*Berthing operations for selected vessels only.

(a) Calm: Extreme still conditions with no surface air movement which may allow the accumulation of hydrocarbon vapours at deck level. Port will close temporarily. Export tanker may berth (or remain in the berth if already berthed). Cargo and ballast operations will cease.

(b) Lightening: In some rain squall conditions severe lightening is experienced. Port will close temporarily. Export tanker may remain in the berth (or undertake berthing operations). All cargo and ballast operations will cease.

(c) Darkness: Port will normally be closed from 1630 hrs. LMT until 0600 hrs. LMT (during the hours of darkness). Export tankers already in the berth by 1630 hrs. LMT continue operations and may also unberth at night.

MOORING: *Mooring Equipment:* Vessel must be equipped with correct mooring equipment relevant to its size as recommended in the "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring". The minimum dimensions of the centre bow fairlead/s is/are 600 mm. wide and 450 mm. deep, in order to accommodate the chafe chain/s.

ANOA TERMINAL STANDARD FOR MOORING EQUIPMENT IS: BOW CHAIN STOPPER/S. AS OUTLINED IN THE OCIMF PUBLICATION "RECOMMENDATIONS FOR EQUIPMENT EMPLOYED IN THE MOORING OF SHIPS AT SINGLE POINT MOORINGS". 2ND EDITION 1988.

VESSELS NOT FITTED WITH BOW CHAIN STOPPER/S WILL BE CONSIDERED "UNSAFE" FOR 'NORMAL MOORING OPERATIONS'.

Vessels which, in the Mooring Master's opinion, do not have a suitable method of attaching the mooring, will be refused permission to berth. Should bitts have to be utilised, or should the bow stopper/Smit Bracket be located at such distance from the fairlead that they are unusable, rope snotters of 14 in. circumference and 15 m. long will be utilised. This is not considered a normal mooring operation and vessels requiring this mooring technique will not be considered suitable for subsequent operations at Anoa Terminal.

Mooring Operations:

(a) The Mooring Master will board incoming tankers at the anchorage area or other agreed location. The Mooring Master will advise the ship's Master on approach to the FPSO, mooring and unmooring, connecting and disconnecting hoses, and all other operations within the Terminal area, including all manoeuvring of the tanker. The Master must be on the bridge at all times while the tanker is being manoeuvered.

(b) The services of a Mooring Master are provided upon the express understanding and conditions that when any Mooring Master furnished by the Company goes aboard a tanker for the purpose of assisting such tanker, he becomes for such purposes the servant of the Owners of the vessel, and the Company shall not be liable for any damage or injury which may result from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of such vessel.

(c) Support vessels assist in mooring tankers. These are under the direct control and supervision of the Mooring Master. Any service and/or facilities provided by the Company including, but not limited to, the services of Mooring Master, support vessels and their crews, or mooring and loading equipment, are at the vessel's risk. The furnishing of a Mooring Master, support vessels or other services and facilities, shall not be construed to be, or give rise to, a personal contract.

(d) Tankers due for mooring must have a pilot ladder or hoist securely rigged on the side requested by the Mooring Master. Vessels with a freeboard of more than 30 ft. shall have an accommodation ladder rigged so that the lower platform is not more than 10 ft. above the water level with a short pilot ladder rigged for access to the platform. Upon the approach of the Mooring Master in the support vessel, the tanker must provide a good lee on the appropriate side. Tanker shall also have the port derrick rigged and crew on deck standing by.

(e) The Mooring Master and his assistants (Assistant Mooring Master plus 2 riggers, who will advise the tanker crew during mooring and hose connection), will normally board tankers from the support vessel which also serves as a stand-by safety boat throughout the loading operation. Immediately the Mooring Master and his assistant have boarded, the support vessel will proceed to the portside derrick area of the tanker where mooring and hose connection equipment will be lifted aboard. Sufficient crew must be available on deck to transfer the mooring equipment from the derrick area to the forecastle.

The following equipment, provided by the export tanker, shall be ready for use when the Mooring Master boards:

On the forecastle head:
(1) 1 buoyant mooring rope of 10 in. circumference.
(2) 2 messenger lines of minimum 3 in. circumference × 300 ft.
(3) A selection of shackles, wire strops and tools (sledge hammer, crowbar, etc.).

On the poop deck:
(1) 2 messenger lines of minimum 3 in. circumference.
(2) 1 buoyant mooring rope of 10 in. circumference.

(f) When the approach to the terminal commences, support vessel will be in attendance to assist if necessary.

(g) *Approach to the FPSO involves manoeuvring at close quarters to the FPSO. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.* Mooring Master will test export tanker engines ahead and astern and full port to starboard rudder movement before commencing his approach run.

(h) A mooring boat will be situated near the stern of the FPSO at the end of the pick-up rope. The pick-up rope is secured to a 54 mm./76 mm. combination chafe chain, which in turn is secured to the main mooring, a 19 in. circumference nylon grommet connected to a 76 mm. chafing chain at the FPSO stern.

(i) During the approach of the tanker towards the stern of the FPSO, the ship's crew, under the advice of the Mooring Master will prepare the forecastle for the mooring operation. This will include passing one or two messenger ropes through the centre bow fairlead, or other fairleads designated by the Mooring Master and lowering the end to sea level; the mooring attachment will also be prepared.

(j) Upon the close approach of the tankers bow, the mooring boat manoeuvres alongside and attaches the mooring pick-up rope to the ship's messenger line. The tanker will then heave up the messenger and pick-up rope, carefully picking up the slack as the tanker approaches the stern of the FPSO.

(k) The pick-up rope should be continually hove in as the tanker nears the FPSO stern. The distance between the vessels will be continuously relayed to the Mooring Master on the bridge from the forecastle and by the support vessel and mooring boat. When the pick-up rope has been brought inboard through the fairlead, it may be necessary to adjust the direction of pull and assist the chafing chain through the fairlead. Action required by the tanker's crew in this respect will be advised by the Mooring Master.

(l) When the chain is inboard, depending upon the method of attachment available, the connection will be made.

(m) On completion of the mooring operation the support vessel will be secured to the stern of the tanker, using its towline, to prevent the tanker from coming into contact with the FPSO. Until the support vessel is secured it may be necessary to use the tanker's engine for this purpose. Once the support vessel is secured, the Mooring Master will then advise "Finished with Engines". *Engines must be maintained in a constant state of readiness and at no time during the tanker's stay at the Terminal may the engines be immobilised.*

(n) Finally, emergency towing wires should be rigged, one on the starboard bow and one on the starboard quarter. These lines must be maintained with the eye 1.0 m. from the waterline and "no slack on deck".

BALLAST: *Deballasting:* Vessels must arrive at the Terminal with clean ballast and be able to deballast concurrently with loading, maintaining 30% of the vessel's S.D.W.T. throughout the operation.

Vessels unable to comply with this requirement will be permitted to load part cargo, then to deballast while loading operations are suspended and to complete loading on completion of deballasting. Vessels will be allowed 6 hours to complete the deballasting operations.

Prolonged deballasting will necessitate either removal from the berth or the commencement of loading. The Terminal will not be responsible for any free water or deadfreight.

Inert Gas System: All vessels must be equipped with an Inert Gas System conforming to the SOLAS Regulations. This must be in service throughout the vessel's operations at Anoa Natuna Terminal, with tanks inerted and maintained under positive pressure. Vessel's crew must ensure that the correct atmosphere is maintained with oxygen content at no time to exceed 8% by volume in any cargo or slop tank.

The Terminal will make random checks to establish the condition of the tanks on arrival and throughout the operation. In the event of failure of the system or, when tank atmospheres depart from industry accepted limits, the vessel will be removed from the berth.

Ballast Operations:

(a) There are no ballast or slop reception facilities at Anoa Natuna Marine Terminal, therefore all vessels must arrive with clean ballast suitable for discharging directly to sea in accordance with the standards set by International Conventions. Vessels arriving with ballast unsuitable for discharge to sea will be rejected for loading. Any tanker rejected because of contaminated ballast or sea pollution will automatically invalidate her Notice of Readiness and will lose any priority of loading. Vessels discharging contaminated ballast overboard will be subject to the anti-pollution laws of Indonesia.

(b) Vessels arriving at Anoa Natuna Marine Terminal should maintain 30% of Summer d.w.t. to ensure safe handling and manoeuverability in the prevailing weather and sea conditions and in accordance with the good practice of seamanship. *Propellers should be immersed.*

(c) Whenever possible, loading procedures should be so arranged as to allow for concurrent deballasting and loading operations, provided that at least a 2 valve separation can be maintained. Permanent ballast should not be discharged before the vessel has loaded at least the equivalent amount of cargo.

(d) The Mooring Master or his assistant may accompany the Independent Cargo Surveyor in witnessing the tank inspection prior to loading, but will not sign certificates attesting to the emptiness or cleanliness of tanks for loading. The ullaging of the slop tank and determination of oil content will also be witnessed.

PENALTIES FOR POLLUTION ARE HARSH.

LOADING: *Hose Connecting Equipment:* Vessel to be equipped with loading manifold in accordance with the "OCIMF Standards for Ships Manifolds". Flange to be prepared to accept a single 12 in. 150 lbs ASA connection. Derrick and rigging to be certified not less than 10 tons SWL. Hose connection will normally be accomplished on the port side.

Loading Rates: Terminal can provide an average loading rate of 20,000 b.p.h. through one 12 in. hose. Vessels which cannot accept this loading rate will be rejected.

Hose Connection:

(a) Upon completion of the mooring operation, the loading hose will be connected to the tanker's port manifold which must be prepared to accept 1×12 in. 150 ASA flange prior to berthing. Hose connection will be made by the ship's crew, assisted by the 2 Amoseas riggers, under the supervision of a responsible deck officer. The Mooring Master's Assistant will advise on the correct procedures to be adopted.

(b) Depending on the freeboard of the tanker, the weight of the hose string to be lifted could approach 10 tonnes. All tankers calling at Anoa Natuna Marine Terminal must have their port derrick rigged to lift at least 10 tons.

(c) The mooring boat will tow the tanker end of the hose to a position below the manifold area and connect the ship's cargo runner to the 'Hose Pick-up Chain'. The hose will then be lifted to a position above the main deck so that the 'Hang-Off Chain' can be made fast to the hose bitts using a snubbing chain, such that the hose flange will closely align with the required manifold flange. The hose end will then be lowered to the deck for the blind flange to be removed. The hose flange will normally be connected to the manifold by a quick release Camlock coupling.

(d) When the hose is connected, the length between the manifold and rail will be supported by a nylon sling to ensure that there is no undue strain on any part of the manifold or hose string.

Loading Operations:

(a) On satisfactory completion of the pre-loading transfer conference and Safety Check List as agreed by the Amoseas Mooring Master and the export tanker officer in charge, the vessel will be declared ready to load, and all the necessary valves will be opened, the hose end butterfly valve will be opened and the Mooring Master will instruct the Terminal to commence loading at a slow rate. The rate will not be increased until the tanker has confirmed that the hose connection is tight, that cargo is being received in the selected tanks only and that no leakage is taking place through the sea valves. Thereafter, the loading rate will be increased, on request by the export tanker, to a maximum of 25,000 b.h.p.

(b) Throughout the loading, a responsible deck officer must be in charge of operations, either on deck, or in the cargo control-room and in continuous contact with the FPSO and Mooring Master via walkie-talkie radio. In addition, an efficient deck watch in constant contact with cargo control-room must be maintained at all times.

Additionally, one Amoseas employee will be stationed on the forecastle at all times to observe and report on the mooring condition, i.e. the state of the mooring and the distance and attitude of the Tanker to the FPSO. The Mooring Hawser is fitted with a load monitor and mooring weight is continuously monitored on the FPSO.

(c) At any time during loading operations, the rates can be reduced on request. Except in an emergency, 10 minutes notice should be given to the Terminal when rate reduction is required. As in normal tanker practice, valves *must not* be closed against the oil flow without permission from the Terminal.

If, for any reason, radio communication between the Tanker and the Terminal is lost, the Terminal will stop the loading until communication is re-established.

In the absence of radio contact, oil flow can also be stopped by sounding the Emergency Flow Stop Signal, consisting of continuous short blasts on the ship's whistle.

(d) The volume of oil loaded is accurately available at all times from the Terminal, and periodic comparisons should be made between Tanker and Terminal.

(e) The question of ship or Terminal responsibility to stop cargo on loading the required quantity will be discussed and agreed before loading commences, during the Pre-Transfer Conference.

Request for the Terminal to stop the flow of cargo at a pre-determined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error, and that in the case of the vessel being overloaded, the excess cargo cannot be pumped back to the FPSO.

Hose Disconnection: On completion of loading, and when the tanker is informed by FPSO Control that all flow has ceased, the hose-end butterfly valve will be closed first, followed by the ship's manifold valve. Once the spool piece has been drained, the hose can be disconnected from the manifold (sufficient drip tray volume must be available to contain any oil remaining in the spool pieces and reducer), and the blind flange will be replaced on the hose. The weight of the hose will be taken on the derrick and pick-up chain, to allow the snubbing chain to be released from the hose bitts. The hose will then be lowered to the water.

Cargo Documentation and Inspection:

(a) Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Time/Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples etc. are prepared at Anoa Natuna Marine Terminal. When the tanker has been loaded, the documents will be completed and taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time as final departure clearance formalities are being carried out.

(b) Immediately upon completion of loading, the official Bill of Lading quantity will be relayed to the Mooring Master by radio. In the event of a dispute, the vessel will be requested to recheck the measurement and calculations of the quantity, the Mooring Master will witness such measurement and calculations. After both ship and shore figures have been verified, should an appreciable difference still exist, receipt of a Letter of Protest will be acknowledged by the Mooring Master.

(c) Notes of Protest if any, should be handed to the Mooring Master for further delivery to Amoseas Indonesia Inc. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only, and is not authorised to signify acceptance of such letters.

(d) From time to time Owners, Charterers, Consignees, or other interested parties may appoint a third party oil inspector to survey the loading operation on their behalf. Any delays caused by such survey/s shall be considered "vessel delays".

DEPARTURE: *Departure Procedures:*

(a) Immediately after the loading hose is disconnected, unmooring of the vessel will commence, The support vessel at the stern of the tanker will be released but will remain on location to assist. On advise from the Mooring Master, the mooring hawser will be heaved in by the tanker and the mooring connection broken. In some cases it may be necessary to briefly ring the engines ahead to relieve the weight on the mooring. As soon as the mooring is released, the engines will be rung astern and the vessel will back away from the FPSO. During the move astern, the mooring hawser will be lowered into the water by easing back on the pick-up rope.

(b) When the vessel is safely clear of the FPSO, the Anoa Natuna Terminal mooring equipment will be taken from the forecastle to the port derrick to be transferred to the support craft together with the hose connection equipment.

(c) Any remaining cargo calculations and paperwork will be completed before the vessel sails. When such paperwork has been completed, the vessel will make a good lee to disembark Terminal Personnel and Government Officials. Upon disembarkation of all such personnel, the vessel must clear the terminal area as directed by the Mooring Master before his departure.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under Custom's seals from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent weight of tobacco or cigars. Special allowances are made for the Master under special circumstances.

After the ship is all secure the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration Form stating the cargo on board the tanker and attaching appropriate Shipping Documents. If the tanker is arriving from an Indonesian port, Form 5-B issued at the last Indonesian port, will be retained by the Customs and the Arrival Clearance at Anoa is granted. The Harbour Master will submit a Harbour Report form for the Master to complete.

CONSULS: Located in Jakarta.

TIME: GMT plus 7 hours throughout the year.

SERVICES/SUPPLIES:

(1) Should it be necessary to supply divers, a boat, materials, equipment or labour, to carry out repair work to enable the vessel to continue loading, any costs involved will be charged to the vessel's account at rates to be established at that time. These services will only be provided in emergencies.

(2) There are no bunkers, no fresh water, no small boat hire, no shore leave nor shore services, and no medical assistance (except in cases of emergency) available at the Terminal. Information on port services in the area should be obtained from the vessel's agents.

(3) Crew members cannot leave the vessel at Anoa Terminal except in cases of emergency. Even in an emergency it should be noted that Seamen's Books may not be valid under local Government Law. A valid passport is required. No crew changes will be permitted during the period a vessel is in the Terminal area.

WEATHER: *Weather Pattern:*

(1) Winter – the N.E. Monsoon Season:

In the Anoa Natuna area, the N.E. Monsoon becomes established during November, although in some years it may not blow regularly until December. During this period the wind direction over the open sea is predominantly North Easterly and the average force, when fully evolved, is about Force 4, South of Latitude 5° N. and Force 5 to the North of this latitude.

The winds tend to blow in successive pulsations, periods of comparatively fresh winds followed by periods when the wind is less strong. At times the wind freshens to Force 6 or 7, while at others it does not exceed Force 3. The frequency of Force 7 winds is estimated to be about 1% in most of the season, probably reaching 2% – 3% during December, the month of greatest frequency.

(2) Summer – the S.W. Monsoon Season:

From about May to October, winds are predominantly South Westerly, mainly Force 3 or 4. Over the open sea, the South Westerly winds can reach Force 6 but nearer the coast they are weaker and more irregular. During October the winds become variable before the onset of the N.E. monsoon.

Although during the Summer monsoon wind speeds of Force 7 are rare, squalls, known locally as "Ribut", in which gale force winds may be experienced temporarily are fairly common. The most dangerous type is the arch squall which is preceded by clouds rising from the horizon in the form of an arch, heavy rain is usual when the arch is passing overhead.

Currents: The surface currents of the Natuna Sea in the Anoa area are wind generated, currents therefore will be in the direction of the prevailing monsoon. These currents will generally exceed one knot and on occasions exceed 2 knots.

Typhoons: The Natuna Sea area is not normally affected by 'typhoons'.

Tidal Streams: Tidal streams can be expected to reach 1.5 knots during spring tides.

Relative Humidity: This is high over the area for most of the year, averaging about 90% – 95% in all months at 0700 hrs. and falling to about 70% – 74% by 1300 hrs.

Temperature: The average air temperature is high throughout the year. April is the warmest month with a mean daily air temperature of about 88°F. January is the coolest month with a mean daily temperature of 86°F.

The average sea temperature typically lags 1 to 2 months behind the air tempurature with warmest mean temperatures in June/July of 85°F and coolest mean temperatures in January of 65°F.

Fog and Visibility: Fog is rare throughout the area, however during rain squalls visibility can be extremely limited.

Rainfall: Average annual rainfall in the Anoa area is about 100 in. Rainfall is most abundant from about October to January, i.e. at the onset and in the early part of the N.E. Monsoon, however thunderstorms and heavy rain squalls occur frequently throughout the S.W. Monsoon.

GENERAL: *Vessels Operations:* Operations will be conducted in accordance with ISGOTT (latest edition) guidelines. Vessels loading at Anoa Terminal must be in compliance with the latest SOLAS and MARPOL conventions and protocols. Vessels found to be deficient or substandard in any safety or pollution control requirement will not be berthed or if already berthed will not be loaded.

The vessel Owner or Bareboat Charterer is to be a party to TOVALOP and have insurance covering the liabilities under the International Convention of Civil Liabilities for Oil Pollution Damage 1978 (C.L.C.).

The cargo to be loaded will be covered by CRISTAL, and/or the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage 1971 (I.O.P.C.).

Tankers are expected to conduct operations using a closed loading method. A vessel which is unable to comply with this requirement will not be loaded.

Vessel Owners/Operators must have a recognised "Drug and Alcohol control policy". Such policy should be in accordance with OCIMF "Guidelines for the Control of Drugs and Alcohol on board Ship (January 1990)". A written copy of the Owners/Operators policy statement must be onboard. The vessel's Master and crew must understand and be guided by such policy.

Time taken to correct any unsatisfactory condition and/or to bring the vessel into an acceptable state to commence or continue loading or berthing operations shall not count as used laytime. Any unsatisfactory condition not corrected or unable to be corrected will result in the vessel being denied berthing and loading facilities. Costs and delays so incurred will be for the Charterer/Owner's account.

Air-Conditioning: Due to the climatic conditions of the area, vessels not fitted with a working air-conditioning system pose a threat to the safety of loading operations. Only in exceptional circumstances, when a vessel has demonstrated its ability to comply with all conditions of the ISGOTT Safety Check List, will a vessel without air-conditioning be accepted for loading.

Crew: Vessel's crew must be qualified to the requirements of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers 1978. If any infringement of safety regulations or the inability of ship's crew to operate safely and efficiently is noticed then the vessel will be removed from the berth.

Certification of Deratisation and General Cleanliness: Vessel to be in possession of a valid Derat Certificate and other deinfestation measures as appropriate. Should the vessel be infested with rats, vermin or other insects which could be a threat to the health or well being of Terminal personnel then the vessel will not be accepted.

Indonesia Flag: The national flag of the Republic of Indonesia shall be prominently displayed by the vessel at all times whilst at the Anoa Natuna Marine Terminal.

Indonesian Government Regulations:

Masters are informed that the following Indonesian Government Regulations are strictly enforced.

In accordance with practice in Indonesian Ports, Quarantine, Immigration, Pilot and Call Sign flags must be displayed by all vessels approaching Anoa Natuna Marine Terminal. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

(1) The Quarantine flag 'Q'.
(2) The 'N' flag should be flown until the Immigration Officer boards.
(3) The 'G' flag (request for Pilot) should be flown until the Mooring Master boards. As soon as the Mooring Master boards the 'G' flag should be replaced by the 'H' flag which signifies that the Pilot is aboard.

During the hours of darkness the appropriate International light signals should be substituted for the flags.

(4) During loading the International Code flag 'B' shall be displayed from the top-mast signal halyard during daylight hours.

During hours of darkness a red light shall be displayed; visible at a distance of at least 2 miles and show an unbroken light all around the horizon.

AGENCY: *Procedure for Appointing Agent:*

(a) Indonesian Government Regulations require that Pertamina Directorate of Shipping and Telecommunications be appointed General Agent for all tankers proceeding to load in Indonesia.

Address:
Pertamina Directorate of Shipping and Telecommunication,
Attention: Agency Department
19th floor, Pertamina Building,
Jl. Medan Merdeka Timur IA,
Jakarta, Indonesia.
Cable address: PTM JKT IA.
Telex: 44450 and 45348.
Tel: 343 806, 303 3356, 303 3307, 303 3305.

For vessels arriving in Indonesian waters, Owners or Charterers are requested to appoint Pertamina Directorate of Shipping and Telecommunication Agency Department as General Agent to attend the vessel at "Anoa Natuna Marine Terminal" by Letter of Appointment. This Letter of Appointment must be sent at least 2 weeks prior to ship's first arrival. The above also applies to vessels which may have changed their name and vessels for whom a Letter of Appointment has expired.

Owners or Charterers can attach a list of vessels under their management/control which are scheduled for operating in Indonesian waters, in such case the single Letter of Appointment will be valid for all ships named in the Letter. Letters of Appointment have a validity of one year after which they must be renewed. It is vital that the General Agent receives the following information 2 weeks before a vessel's first arrival to enable the necessary permits to be obtained from the Government Directorate General of Sea Communications:

(1) Name and full address of Owner.
(2) Name of tanker and call sign.
(3) Deadweight tonnage, Gross Register Tonnage and Length Overall.
(4) Flag and Port of Registry.
(5) Certificate of Registration Number.
(6) Name of Master.
(7) Number of Crew.
(8) ETA at Anoa Natuna Terminal. (Lat. 05° 13' N., Long. 105° 36' E.).
(9) Last Port of Call.
(10) Intended Indonesian Ports of Call.
(11) Destination after loading.
(12) Quantity and type of crude oil to be loaded.

(b) Pertamina Directorate of Shipping and Telecommunication will acknowledge receipt of telex or cable appointment and will request an advance deposit, depending on the size of the vessel, to cover the Agency and Government Charges. In addition, for a vessel registered in a country that has no Tax Treaty Agreement with Indonesia, Owner shall make advance payment of freight tax (approximately 2.4% × U.S.$5.00 × Cargo loaded long tons) for the exported crude (see section (c) (2)).

List of countries with Tax Treaty status:
Austria, Belgium, Canada, France, Germany, India, Japan, Netherlands, New Zealand, Sweden, Switzerland and United Kingdom.
Note: Thailand 50% tax due; Philippines 1.5% tax due.

(c) Government charges will consist of Port Charges and Outgoing Freight Tax.

(1) Port Charges are in accordance with the Decree of Minister of Communication No. KM 92/Phb/85 dated 1st April, 1985, which normally consist of Pilotage Fee, Towage Fee, Harbour dues, Tonnage dues, etc.
(2) Outgoing Freight Tax: For a tanker registered in a country that has no Tax Treaty with Indonesia, Owners are required to pay the "Outgoing Freight Tax" for the exported cargo.

(d) Advance Payment for Agency and Government Charges should be made to:
"Pertamina Agency", Account No. 0089-690 384 020.
Bank Negara Indonesia, Cabang Gambir, Jl. Kebon Sirih 77A, Jakarta, Indonesia. Telex: 44450, 45348.

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate of Shipping and Telecommunication" advising Telegraphic Transfer (T.T.) Number, the name of the vessel for which the T.T. is made and Indonesian Ports of call. In those instances where advance payment exceeds the actual Port Charges and disbursements, the balance will be credited to the Owner's/Charterer's accounts or remitted by the agent. Neither Pertamina or Amoseas Indonesia Inc. will be responsible for demurrage expenses, or other charges resulting from failure to pre-arrange obligations in this manner.

OPERATOR: Amoseas Indonesia Inc., Mulia Tower, Suite 1601-1701, Jl. Gatot Subroto Kav 9-11, Jakarta 12930. Postal Address: P.O.Box 2782, Jakarta 10001, Indonesia. *Tel:* (062-21) 525-7660, 525-7720, 520-7140. *Telex:* 60555 Amosea IA. *FAX:* (062-21) 520-5588.
Contact: Captain A. Santoso, Operations Coordinator.

ANYER: 06.02 S. 105.56 E. (See Plan)

(A) CHANDRA ASRI PETRO-CHEMICAL CENTRE
(B) TRIPOLITA TERMINAL

(A) CHANDRA ASRI PETRO-CHEMICAL CENTRE

LOCATION: The Chandra Asri Petrochemical Centre (CAPC) at Anyer is located in position Lat. 06° 1.7' S., Long. 105° 56.1' E.

Charts: B.A. Chart No. 198 and Indonesian Charts No. 71 and 95.

FLAG: The Indonesian national flag should be hoisted at sea within Indonesian Territorial Waters.

DOCUMENTS: The following documents are required for Port Clearance:

Registry Certificate.
Sea Worthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate.
Safety Radio and Radio Telegraphy Certificates.
Certificate of Approval (Ship's Radio Station).
Health Book.
Vaccination Certificate.
Last Port Clearance.
Crew List.
Ship's Article.
List of Crews Personal Effects.
Medicine List.

PILOTAGE: Compulsory for all ships. There are 6 Pilots available at the station. The pilot station is on VHF Channel 12, call sign "Kilo Bravo". The pilot boats can also be contacted on Channel 12, call sign "Pilot Boat 32" or "Pilot Boat 40".

APPROACHES: *Approach to Chandra Asri Petrochemical Centre:* P. Ular (Lat. 06° 01.7' S., Long. 105° 55.6' E.) is a good navigation mark point, height is 47 m., covered with trees. A lighthouse with character: Fl.W. 5 sec., 8 miles, could be helpful to approach the anchorage area.

Caution:

(1) Volcanic activity has been reported in the area between Rakata Island and Sebesi Island. Ships are advised to avoid this area.
(2) Small fishing craft operate in the vicinity of Sunda Strait.

ANCHORAGE: *Anchorage – Waiting Area:* Position Lat. 06° 01.5' S., Long. 105° 54.0' E. or 2 nautical miles S.W. of P. Ular. Depth is 20 m. up to 30 m., with coral/sand bottom. This place is considered to be safe for anchoring.

Approaching the Anchorage Area: Consult Admiralty Sailing Directions.

MAX. SIZE: Berth A: 80,000 d.w.t., max. draft 13.0 m.
Also see "Berthing".

HEALTH: *Quarantine:*

Request for Free Pratique – hoist "Q" flag.

If quarantineable disease declared by Master or if Medical Officer suspects a quarantineable disease onboard – hoist "QL" or "QQ" flags.

RADIO: *Ship's Arrival and Departure:* ETA has to be sent to the Agent 2 days prior to arrival.

With this ETA information, Agent will be able to commence paper work for port clearance. Agent will have to fill in an appropriate form which will be sent to Harbour Master, Port Health Service, Immigration, Customs and Security. This will obviously avoid unnecessary delays.

The vessel's ETA will have to be updated at intervals of 24 hours, 12 hours and 6 hours prior to arrival.

VHF: Vessels are to listen to Channels 16 and 12.

Vessels are to contact Banten Pilot (Call sign "Kilo Bravo") as early as possible to obtain arrival information.

Also see "Pilotage".

TUGS: There are 4 tugs available. "Katalia I" 3,300 h.p., "Dumai I" 3,200 h.p., "Melati" 2,000 h.p. and "Bintang Jaya" 1,300 h.p.

BERTHING:

Berth	*Depth* (m.)	*Max. Draft* (m.)	*Capacity* (tonnes)
A	15.0	13.0	10,000 – 80,000
B	12.0	10.0	1,000 – 3,000
C	7.6 *8.3	6.5 *7.0	10,000

* After dredging.

Berthing: The ship will normally be berthed in daylight hours. Berthing might be suspended in the following circumstances:
(a) Storm warning issued.
(b) Wind velocity over 13 m./sec.
(c) Harbour Master Suspension Order is issued.
(d) Electrical storm, or electrical storm is approaching.

Unberthing: Could be carried out at any time.

Emergency Unberthing: Emergency unberthing might be executed in the following cases:
(a) Harbour Master's orders.
(b) Emergency situation at another berth or another ship in order to avoid a secondary disaster.
(c) Terminal representative or Master considers that the ship shall leave the jetty due to unfavourable situation occurring.

Notice:

To: Master
Ship's Owner
Ship's Operator

SAFETY MEASURE AT CAPC TERMINAL

We request you to perform the following safety measures to prevent accidents:

(A) Berthing Speed and Angle:

A.1 Jetty A:
Ships with d.w.t. 50,000 up to 80,000 tons.
Berthing speed shall be less than 10 cm./sec.
Berthing angle shall be 0° – 6° and as parallel as possible.
Ships with d.w.t. below 50,000 tons
Berthing speed shall be less than 15 cm./sec.
Berthing angle shall be 0° – 6° and as parallel as possible.

A.2 Jetty B:
Berthing speed shall be less than 15 cm./sec.
Berthing angle shall be 0° – 6° and as parallel as possible.

A.3 Jetty C:
Berthing speed shall be less than 25 cm./sec.
Berthing angle shall be 0° – 6° and as parallel as possible.

(B) Safe Manoeuvring:

Master shall perform the safe manoeuvring in consideration of ship's condition and circumstances (Sea current, wind, weather, etc.).

Please pay special attention to berthing speed and angle and also unberthing is parallel with jetty.

(C) Tug:

We request you to arrange tug(s) on berthing and unberthing for safe manoeuvring. The account is to the ship's Owner/Operator.

LOADING/UNLOADING:

No.	*No. of Arm/Hose*	*Product*	*Diameter/ Line No.*	*Appr. Length to the Tank (m.)*	*Max. Pressure (kg./sq.cm.)*	*Max. Rate (cu.m./hr.)*
Jetty A:

MEDICAL: Hospital available at Krakatau Steel.

FRESH WATER: Available from Tripolyta at cost of 12,000 Rp/tonne (1994).

FUEL: Not available.

CUSTOMS ALLOWANCE: 200 cigarettes; 50 cigars or 100 grams of tobacco.

It is necessary to produce the crew's personal effects to avoid smuggling and to protect crews possessions.

TIME: GMT plus 7 hours.

SHORE LEAVE: Bus service or car service arrangable via Agent. Shore pass and I.D. card are required.

Master has to inform the crew of the latest time to be onboard the ship.

Master has to satisfy himself that the total number of crew staying onboard is sufficient to handle the ship in case of an emergency.

GENERAL: *Publications:* Admiralty Tide Tables Volume No. 3 and Admiralty Sailing Directions.

Also see "Location".

Immigration: Vessels arriving from other countries must hoist "N" (November) flag.

Master has to produce the Passenger List and
(a) Disembarking Passenger List.
(b) Transiting Passenger List.
(c) Through Passenger List.

Passports and Seaman's Books will be checked.

SHIPMASTER'S REPORT: August 1995.

We dropped anchor at 1900 hrs., 0.8 miles off the coast and 1.3 miles off Ular Island (Leneng) on bearing 030° in position Lat. 06° 01.6' S., Long. 105° 55.2' E.

Luckily arrival time was shortly after high water, so there was only a little current observed, whereas an hour later with full ebb tide running, current rate increased to about 3 knots. We payed out chain until 7th shackle at the water line. Good holding ground, no dragging of anchor observed. Water depth 22 m. – 25 m. Both hawsepipes were made "robbersave" by means of steel gratings and lashings. Double watch was kept, and it appeared to be necessary as there were some boats in the vicinity.

Pilot boarded next morning at 0710 hrs., and vessel was moored at 0845 hrs. port side alongside (3-2-2). One low powered tug assisted aft. Starboard anchor was lowered when approaching the jetty. In laden condition, vessel was resting against all four fenders, but in light ballast condition the forward fender was off the vessel by more than 1 m. and the aft one by about 0.15 m., but was still working when vessel was swinging towards the jetty. Low swell was encountered during the whole stay alongside, coming from S.W.'ly direction. We had slight breeze and fine weather.

Discharging was done in 19 hours (including draining) via 1×16 in. Chicksan arm. There was also 1×8 in. flexible hose, which will be used in higher swell conditions.

Parallel body was never discussed with jetty representatives, but was closely watched by ourselves. Due to favourable weather conditions, it was not necessary to take ballast before all cargo was discharged.

Unfortunately, the jetty is not equipped with shore gangway. Berthing normally in daylight only, but jetty operators will make exception in urgent cases. Pilots will berth day or night. Unmooring no restrictions.

Jetty and loading/discharging installation was clean and in very good condition, all looked new.

Unmooring was done next morning at 0930 hrs. and again one tug assisting, but this one was more powerful. The Pilot left when vessel was about 100 m. of the jetty and at 1000 hrs. was F.A.O.P.

AUTHORITY: *Operators:* Pt. Chandra Asri.

Office: Wisma Barito Pacific Tower A, 7th and 8th Floor, Jl. Let, Jend. S. Parman Kav. 62-63, Jakarta 11410, Indonesia. *Tel:* (021) 5307950 (Hunting). *Telex:* 65701 CAPC IA. *FAX:* (021) 5308930.

Plant: Jl. Raya Anyer Km. 123, Ciwandan, Cilegon, West Java 42447, Indonesia. *Tel:* (021) 5212887, (0254) 601501. *FAX:* (0254) 601505.

(B) TRIPOLITA TERMINAL

SHIPMASTER'S REPORT: February 1996.

APPROACHES: The Terminal is new and is South of the terminal shown on Chart No. 918, which is the Asahimas Terminal for chemicals. To the South, close inshore, is another berth. Approach is straightforward. Area is well charted and navigation is not a particular problem.

PILOTAGE: Pilots were contacted on VHF Channel 16 and 12 at 25 miles, but reception was poor until 20 miles off.

We were due to discharge a cargo of Naphtha at the Anyer Terminal which had been loaded in Kuwait so we were approaching from S.W.

Pilots requested us to approach to 0.5 – 1.0 miles off Pu. Ular and he met the ship a little further out.

Pilot boarded from a small nondescript boat and 2 large tugs joined shortly afterwards.

BERTHING: Tide was running South fairly strongly and approach to berth was taken easily. Port anchor was used. Small launch took ropes. Tie-up was straightforward – 3-2-2. Linesmen were slow.

New modern berth, well designed and equipped and well fendered. Well provided with hooks and line winches.

A little exposed and during the discharge we were moving to a swell from the Indian Ocean.

LOADING: Berth has 2 loading arms, 1×12 in. for Naphtha and 1×6 in. for diesel oil.

Discharge was no problem – shore tanks are close.

The area is under development and there are extensive tank farms, factories and berths nearby.

Further North up the Strait are more developments at Cicadang and Merak.

FRESH WATER: Available on request.

GENERAL: *Charts:* B.A. Charts No. 918 and 2056.

Sailing Directions: NP 36, 2.14, 2.16. Supplement No. 11, 1994.

Guide to Port Entry 1995/96 Edition.

Light List: NP 83 – Vol. K, 1050 – 1051.58.

Radio Signals: NP 286(2) – Vol. 6, Part 2, E4790 – Cicading.

General: Agent, Quarantine and others boarded with Agent.

The Loading Master was surprised to see that we had no Certificate of Quality as we had used Early Departure Procedure at Kuwait, and it took a long time to convince him that "To follow by airmail" noted on my receipt for documents meant that I did not have it.

Stores: Chandler came on board immediately and took laundry away, which was returned in 10 hours.

Small order of fresh vegetables taken – good quality and reasonable prices.

Fresh fish prices very good.

Chandlers were obliging and efficient.

ARDJUNA: 05.54 S. 107.44 E. (See Plan)

LOCATION: Ardjuna Marine Terminal is an open, unsheltered mooring in the Java Sea, about 18.5 miles from the nearest point on the North Coast of Java.

The Terminal is approximately North 72° East distant 59 nautical miles from Jakarta.

There are 5 standard type single buoy moorings and 1 rigid arm single buoy mooring situated as follows:

1. Crude oil storage barge "Arco Ardjuna" SBM (Buoy No. 1).
   Lat. 5° 54' 15" S., Long. 107° 44' 22" E.
2. Crude oil export SBM for tankers loading from "Arco Ardjuna" or chartered crude oil storage tanker (Buoy No. 2).
   Lat. 5° 53' 19" S., Long. 107° 45' 18" E.
3. Crude oil storage vessel "Cempaka Nusantara" SBM (Buoy No. 3).
   Lat. 5° 54' 10.6" S., Long. 107° 43' 45" E.
4. Crude oil export SBM for loading from "Cempaka Nusantara" (Buoy No. 4).
   Lat. 5° 53' 29" S., Long. 107° 43' 20" E.
5. Liquefied Petroleum Gas Storage Barge "Ardjuna Sakti" rigid-arm type SBM. (Buoy No. 5).
   Lat. 5° 53' 10" S., Long. 107° 44' 13" E.
6. Butane SBM for butane export tankers (Buoy No. 6).
   Lat. 5° 52' 19" S., Long. 107° 45' 18" E.

THE FOLLOWING ITEMS ARE OF PARTICULAR IMPORTANCE:

1. No dirty ballast.
   Tankers with dirty ballast will be rejected and will have to tender a new Notice of Readiness upon second arrival.
2. No shore leave.
3. No crew changes.
   If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.
4. No stores available.
5. No clinic is available.
6. The laws of Indonesia govern this Terminal and all personnel are urged to abide by them.
7. During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.
8. Ardjuna time is GMT plus 7 hours throughout the year.
9. No bunkers are available.
10. Pertamina Directorate of Shipping and Telecommunications Jakarta, handles all Agency matters for tankers.
11. The Unit of Currency is the Indonesian Rupiah.
    The rate of exchange varies from time to time. The Master can obtain the current exchange rate from the Agent.
12. There are no Consulates available at Ardjuna Marine Terminal. However, there are many Embassies and Consulates represented in Jakarta 59 nautical miles S.W. of the Terminal.
13. Language of the port is English and Indonesian.
14. Only authorised personnel or visitors are permitted on the Storage Barges and/or Export Tanker.
15. No fresh water is available.
16. No slop tanks are available.
17. The Crude Oil testing laboratory is equipped to perform the following tests:
    API Gravity, B.S. & W., Pour Point and R.V.P.
    Any additional tests that may be required will be performed in Jakarta.
18. For convenience, mail for personnel on incoming tankers may be sent to the Jakarta Office of The Company for delivery to the tanker when it arrives at Ardjuna Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

DOCUMENTS:

8 copies Crew List.
8 copies Passenger List.
3 copies Ships Stores List.
3 copies Crew Personal Effects List.
Last Port Clearance.
Health Declaration.
Ship's Certificates.

The Harbour Master submits a Harbour Report Form for the Master to complete.

The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Life Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate; Derat Certificate or Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and light dues receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian port clearance for Panamanian flag vessels is not required at Ardjuna.

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the Crew List.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Cargo Documentation: Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Certificate, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Ardjuna Marine Terminal. When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only and is not authorized to accept such letters.

Departure Procedure:

Prior to the vessel's departure, the Immigration Official requires 6 copies of the Crew List to be marked for *"Departure Immigration Clearance"*, and duly signed, it will be distributed as follows:

Master of the vessel	1 copy
Harbour Master	1 copy
Customs	1 copy
Pertamina Agent	1 copy
Immigration	2 copies
Total	6 copies

The Customs Official on duty will issue the Customs 5-B Form which serves as Customs Departure Clearance.

Upon presentation of the Crew List which is signed and marked for Departure Immigration Clearance and Customs Clearance, the Harbour Master will issue the *Port Clearance.*

Final Clearance formalities will be carried out aboard the tanker, either at the Export SBM or alongside the storage barge "Ardjuna Sakti" or in the Anchorage Area, as circumstances dictate.

Before leaving the Terminal Area, the Master should advise the Terminal, the vessel's ETA at destination through the Mooring Master.

PILOTAGE: Under normal conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the vicinity of the mooring area.

Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the Terminal using the International Marine Calling and Safety Channel 16 for Terminal instructions.

The Mooring Master will act on behalf of the company to sign acknowledgement of tankers' Notice of Readiness. Such notice will not be accepted for a time earlier than:

(a) the Master has received the Mooring Master onboard or
(b) the tanker shall have dropped anchor within the recommended anchorage area, and has advised the Terminal the time of anchoring.

Exception to (a) and (b) will be if the tanker is within the anchorage area awaiting arrival of the Mooring Master and has been requested by the Terminal not to anchor.

In this case N.O.R. will be accepted from the time the Terminal requested the ship not to anchor.

The company reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the berth may be open to other tankers.

The decision of the Atlantic Richfield Indonesia Terminal Superintendent or his designated alternate to berth or not to berth a vessel shall be final.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area Northwestward from the Single Buoy Moorings enclosed by a line drawn through the following positions.

Lat. 5° 52' 36" S.,	Long. 107° 41' 36" E.
Lat. 5° 50' 57" S.,	Long. 107° 40' 57" E.
Lat. 5° 50' 06" S.,	Long. 107° 42' 40" E.
Lat. 5° 51' 24" S.,	Long. 107° 43' 19.5" E.

Prior to their arrival Masters of tankers should contact the Terminal for instructions concerning anchorage positions.

Under no circumstances should the export tanker enter the Restricted Area around the structures without a Mooring Master aboard.

The attention of Masters is drawn to the existence of underwater pipelines in the Restricted Area (See "Plan").

NAVIGATION AIDS:

Approaches: Approach information can be obtained by radio from the terminal. Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

In addition to the single buoy mooring points for export tankers and the storage barges, various oil wells and production structures are located in the immediate vicinity and the areas extending East, South and Westerly from the storage barges which constitute a hazard to navigation for mariners.

SBMs, storage barges and structures within Ardjuna Marine Terminal area display the following visual characteristics:

Export Single Buoy Moorings (Buoy No. 2, No. 4 and No. 6): A white light flashing every second, visibility 5 miles, mounted on the rotating deck of each SBM. Buoy No. 4 and No. 6 are fitted with radar reflectors.

Storage Barges "Arco Ardjuna" and "Ardjuna Sakti" and "Cempaka Nusantara": By day, the black ball as required by the Regulations for Preventing Collisions at Sea. The 2 storage barges at night display the lights for tankers at anchor as required by the Regulations for Preventing Collisions at Sea and are equipped with automatic fog signals at the bow and at the stern.

Each barge has a bell forward as required by the Collision Regulations and gong aft, under the same rules. When visibility is restricted the Fog Signals are continuously sounded.

The SBM to which the "Cempaka Nusantara" is moored, is fitted with a radar reflector and a white light flashing every second visibility 5 miles.

The "Arco Ardjuna" SBM (SBM No. 1) shows a white light flashing every second, visibility 5 miles.

The SBM to which "Ardjuna Sakti" is moored, shows a white light flashing alternately for a 3-second period and a 1-second period every 12 seconds, visibility 5 miles.

Crude Oil Production Platforms and Natural Gas Liquids Processing Facilities: There are 9 crude oil production platforms, 110 well platforms, 1 junction platform, 1 natural gas processing facility platform and 1 quarters platform for the natural gas facility within the Ardjuna Marine Terminal area.

"B" (Bravo) Flow Station, situated approximately 0.5 nautical miles South of the "Cempaka Nusantara" Barge. Indicated as BB.

"E" (Echo) Flow Station, situated 12 nautical miles Eastward of Bravo. Indicated as platform EA.

"K" (Kilo) Flow Station, located 8 nautical miles S.S.W. of Bravo. Indicated as platform KA.

"L" (Lima) Flow Station, situated 15 nautical miles West of Bravo. Indicated as platform LA.

"U" (Uniform) Flow Station, located 13 nautical miles S.S.E. of Bravo. Indicated as platform UB.

"M" (Mike) Flow Station, located 33 nautical miles West of Bravo. Indicated as platform MX.

"F" (Foxtrot) Flow Station, located 28 nautical miles E.S.E. of Bravo. Indicated as platform FC.

"NGL" The natural gas facility and quarters platforms are joined by a bridge. Their position is: Lat. 5° 54' 36" S., Long. 107° 44' 01" E.

New Platforms: "BL" in position Lat. 5° 52' 14" S., Long. 107° 41' 35" E. and "BNA" in position Lat. 5° 51' 23" S., Long. 107° 43' 37" E.

In addition to the above specified obstructions and navigational aids, all platforms display interrupted quick flashing white lights. The storage barges, flow stations, LNG facility and quarters platforms will brightly illuminate the areas around them at night through the use of lights for normal working purposes.

MAX. SIZE: SBMs No. 2 and No. 4 up to 100,000 d.w.t. and 200,000 d.w.t. respectively (for crude oil). Max. draft 30.20 m.

SBM No. 6 up to 50,000 d.w.t. (for butane liquids). Depth of water approximately 135 ft. below mean sea level.

RADIO: *Advice of Arrival by Cable or Telex:* It is important that incoming tankers advise Ardjuna Marine Terminal 72 hours and 48 hours before estimated time of arrival, giving the best estimate of ship's arrival at the Terminal, via:

Cable address: ARDJAK, Terminal Section, Jakarta
Telex number: 011-47390 Jakarta.

Time to be used for ETA is "GOLF" Time Zone of GMT plus 7 hours throughout the year.

The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time. (Note: If a separate/permanent ballast system is fitted on board, ability of ship to load crude oil and discharge ballast simultaneously must be stated.)
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation required. If so, number required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Ardjuna Marine Terminal via above cable address and Telex Number when the tanker is 24 hours and 12 hours distant from the Terminal and any other time, if any appreciable change occurs in the original ETA or those subsequent thereto.

RADIO COMMUNICATIONS:

(1) VHF/FM Radio Telephone: (International Marine Calling & Safety Channel 16, 156.800 MHz).

Masters are recommended to use this system when they arrive within radio range of the Ardjuna Marine Terminal, particularly when approaching the port. If poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the means of avoiding delay in berthing.

During berthing the ship's radio will be under the sole control of the Master, and the storage barge radios will be under the sole control of the Terminal Marine Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, *it is their responsibility to maintain constant listening watch on VHF Channel 16* to receive Terminal instructions.

Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

The Ardjuna Marine Terminal is equipped with VHF/FM Radio Telephone Sets and continuous watch is maintained on Channel 16 (156.800 MHz) and 157.725 MHz.

Tankers approaching the Terminal should make initial contact on Channel 16. For subsequent inter-ship communications within the Terminal a "Handie Talkie" UHF Radio Freq. 157.725 MHz will be used by the Mooring Master.

This frequency will not be used for general purpose, unless clearance is obtained by the Terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the Terminal of the radio failures. Upon hearing this signal from a loading tanker the storage barges will immediately stop loading to the Export Tanker until communications have again been established.

(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is inter-connected to the Ardjuna Marine Terminal via local communications system and maintain a continuous watch on HF Frequency 7320 kHz (Upper Side Band A3J Mode, 100 Watts, Vertical Whip Antenna, Call Sign 8GJ9).

(3) Pertamina Control Radio Stations – HF/SSB: In the event incoming tankers are not able to contact the Ardjuna Marine Terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, Call Sign PKI 2 may be contacted on HF/SSB per following frequencies and during the following service hours:

Frequency/kHz	*Hours/GMT*	*Keep Watch/kHz*
452	0000–2400	500

VHF		
Ch. 9/16/19	0000–2400	Channel 16

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta attention "Terminal Section" by telephone number: 737474 (18 lines) or by Pertamina Internal Telex System number 18 which is the designated number of Atlantic Richfield Indonesia Inc., Jakarta.

Also see "General" before first port.

HEALTH/IMMIGRATION/CUSTOMS: In accordance with practice in Indonesian ports, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Ardjuna. These signals shall be displayed continuously until clearance is granted. The signals are as follows: Sunrise to sunset: quarantine flag "Q". Sunset to sunrise: signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Harbour Master Officials will board the vessel after arrival to grant clearance.

Each tanker entering the port of Ardjuna must have requested and been granted Flag Dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the Harbour Authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance.

If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each Crew member should be in possession of an International Vaccination Card.

After the tanker is all secured, the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration Form stating the cargo onboard the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B Form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Ardjuna is granted.

TUGS: There is 1 tug available to assist mooring/unmooring. When berthing at an SBM 1 mooring launch will be used to pass the line to the tanker.

The following mooring launches will be available for running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker.

Name and description	*Length*	*Rated HP*
(1) *Arco Ardjuna V*	40 ft.	275
(2) Chartered boat		600
(3) Chartered boat		1,200

TERMINAL FACILITIES: For Crude Oil Tankers:

Export SBMs No. 2 and No. 4 are designed, during reasonable weather conditions, to handle tankers up to 100,000 d.w.t. and 200,000 d.w.t. respectively; each SBM is equipped with dual 170 ft./18 in. circumference floating braidline mooring ropes with 22 ft. long anti-chafe chains fitted, so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy.

The crude oil loading hoses are connected to the ship's manifold on the port side of the Export Tanker. Tankers arriving are requested to have the derrick on the port side raised and rigged, ready to lift aboard the Terminal equipment.

Crude oil tankers are loaded through 2 strings of 16 in. I.D. floating hoses extending from the Export SBMs No. 2 and No. 4, connected to the tanker's port side manifold at the ends by means of the rail hoses of 12 in. I.D. All crude oil tankers not having 12 in. hose connection should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On SBMs No. 2 and No. 4 the length of the hose strings is 825 ft.

For crude oil tankers intending to load in the Ardjuna Marine Terminal, the distance from the bow to the loading manifold should not exceed 490 ft.

The minimum loading rate at the Ardjuna Marine Terminal for crude oil tankers is 15,000 bbls./p.h.. Any tanker arriving unable to receive crude oil at the above rate may be rejected. Tankers loading crude oil at the SBMs No. 2 and No. 4 can accomplish a maximum loading rate of approximately 35,000 bbls/p.h. through meters.

In order to save time as well as to make the berth available for others, it is requested that ships receive crude oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons, it is advisable to have the ship half loaded as quickly as possible. Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of crude oil flow is almost immediate.

Masters are also advised that the minimum quantity tankers can load in the Ardjuna Marine Terminal is 60,000 barrels and maximum 715,000 barrels. Nominations in excess of 715,000 barrels can be accepted on the condition that offtanker/ship's Owners agree to issue a written statement to waive any demurrage incurred due to waiting on berth and/or cargo.

Storage Barge "Arco Ardjuna": The company marine administrative offices, storage and laboratory for testing crude oil stock are located on board storage barge "Arco Ardjuna".

Overall length of the barge is 467 ft., and total crude oil capacity 1,022,000 gross barrels. Crude oil from the "Arco Ardjuna" is delivered to tankers through 4×16 in. diameter, size A.O., Smith Positive Displacement Meters, each having a maximum capacity of 12,500 barrels per hour.

"Arco Ardjuna" barge is moored on the SBM No. 1, Lat. 5° 54' 15" S., Long. 107° 44' 22" E.

Storage Vessel "Cempaka Nusantara": The second storage vessel "Cempaka Nusantara" is moored to SBM No. 3, Lat. 5° 54' 10.6" S., Long. 107° 43' 45" E. Total crude oil capacity is 1,719,000 gross barrels. Loading of crude oil to the tankers, like that from the "Arco Ardjuna", is done through 4 each A.O. Smith Positive Displacement Meters. There are 3 cargo pumps capable of delivering crude up to a maximum of 35,000 barrels per hour through meters.

Export tankers loading Ardjuna Crude Oil of approximately 36° API at 60°F will be moored to SBM No. 4, Lat. 05° 53' 29" S., Long. 107° 43' 20" E.

This vessel is also equipped with a laboratory to test crude oil stocks and crude loaded into export tankers at SBM No. 4.

Ardjuna Crude Specifications:

API gravity at 60° F	:	37.0 – 35.0
Reid Vapour Pressure	:	6.0 – 8.0 p.s.i.g.
Sulphur, % Wt.	:	0.06 – 0.13
Kinematic, Viscosity at 100°F	:	1.20 – 6.00 cST
Pour Point, °F	:	75+
Carbon Residue, % Wt.	:	0.50 – 1.45
B.S. & W, % Vol.	:	0.05 – 0.45
Flash (TCC), °F	:	Below room temperature

For LPG Refrigerated Vessels:

Storage Barge "Ardjuna Sakti":

1. The LPG storage facility is a prestressed concrete barge, measuring 461 ft. in length, 136 ft. in width and having a depth of 56.4 ft. The barge carries 12 tanks each of which has a capacity of 31,528 barrels giving a total of 378,336 barrels.
   A pumping rate of 3,180 cu.m. (20,000 barrels or 1,600 metric tons) per hour at a maximum rail pressure of 10 p.s.i.g. can be achieved. The following operating rules have been adopted which shall apply to the lifting of products from the "Ardjuna Sakti".
2. Refrigerated LPG vessels *will not be considered ready for loading* at Ardjuna Marine Terminal *unless and until all LPG tanks contain LPG vapours and are cooled down sufficiently* to permit loading of products nominated.
3. Vessels receiving fully refrigerated products will only be acceptable for loading provided they are capable of receiving the products at a pressure up to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all vapours coming from vessels tanks resulting from loading at an average rate of 3,120 cu.m.p.h., and including those vapours formed as a result of heat gained by the vessel's tanks.
4. The "Ardjuna Sakti" is equipped with a vapour compressor and condensing facilities for liquefying vapours, however, no liability of any kind whatsoever, to provide the compressor and or condensing facilities for vessels use is accepted.
5. Provided a vessel has the capabilities described in paragraph (3), at the sole discretion of the Terminal Superintendent or his designated representative, in the event the vessel has difficulties with her refrigeration system, the facilities available on the "Ardjuna Sakti" may be made available to assist the vessel, provided they are operational. There is *no obligation* implied or accepted to continue to assist the vessel with chill down, even if assistance is commenced. In the event that assistance is requested and is provided all charges and expenses incurred shall be paid for by the consignee. Such charges shall include any amount payable in demurrage for all the time that chill down operations causes the vessel to exceed the allowed laytime. The conditions set out in this paragraph (5) for assisting in chill down operations shall apply to purging operations.
6. Ardjuna Marine Terminal has no facilities for inerting arriving LPG tankers. It is imperative that arriving vessels do not arrive with tanks designated to receive product "in air". Vessels arriving to load LPG will not be accepted for loading product if the oxygen in the tanks exceeds 8.0 mole per cent.
7. Loading lines and vapour return lines at the Ardjuna Marine Terminal are fitted with quick release Camlock flanges which are 12 in. ASA 150. Arriving vessels must be able to connect to these flanges. The terminal will have a limited number of spool pieces and reducers available but will accept no obligation or liability to provide them. It is the vessel's responsibility to provide a connection suitable to connect with the Camlock flanges described above. Failure of the loading vessel to present the required 12 in. ASA 150 flange for connection will result in rejection of the vessel for loading and cancellation of her Notice of Readiness. All costs, charges and expenses incurred due to rejection will be for vessel's account.
8. Venting of product while the vessel is within the Ardjuna Marine Terminal is not allowed. Failure to comply with this requirement may result in delay or cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply will be for the account of the buyer.

For Butane Tankers:

1. Vessels arriving in the Ardjuna Marine Terminal to load Butane Plus will be berthed at the SBM No. 6 which is designed, weather permitting, to handle tankers up to to 50,000 d.w.t. Small butane tankers can be accepted to load, provided they meet all terminal operating requirements.

2. Butane Plus tankers are loaded through 1×6 in. I.D. floating hose extending from the SBM and connected to the tanker's port side manifold. Present length of hose is 520 ft. When required, the length can be increased up to 720 ft. to accommodate tankers up to 50,000 d.w.t. and in this case, the tanker's distance from bow to manifold (B/Cm) is not to exceed 400 ft. Ship's Owner planning to load a tanker of the above size should notify Terminal Operator at least 15 days in advance. The floating hose is equipped with ANSI 150, quick release Camlock flange size 4 in. Tankers must provide a 4 in. manifold connection to permit the loading. Failure to carry out this obligation may result in rejection of the tanker for loading and nullification of her Notice of Readiness. All costs, charges and expenses incurred therefrom will be for the ship's account.

On arrival at the terminal area, Butane Plus tankers are required to have the port derrick ready to lift the equipment necessary for berthing and loading. Weight of hose to be lifted is approximately 1,500 lbs.

3. Small Butane Plus tankers of up to 3,500 d.w.t. capacity intending to load at SBM No. 6 will not be accepted if the bow to manifold distance exceeds 250 ft.

4. The quantity of Butane Plus delivered will be determined by the metering system consisting of 2×3 in. A.O. Smith Positive Displacement Meters. These meters are located on the NGL Plant situated approximately 3 miles S.W. of the SBM No. 6.

5. An arriving Butane Plus tanker will not be accepted for loading product if:

a. Oxygen in the tanks exceeds 8.0 mole per cent.

b. Vessel is not adequately equipped with boil-off liquefaction unit capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 115 cu.m./hr.

There is no facility for inerting butane tankers on SBM No. 6, nor is there a ship's vapour return line facility.

Masters of vessels are strongly reminded to ensure that ship's vapour compressors are in good running condition.

Failure to observe such requirement may result in cessation of the loading and any delay so caused will be for the ship's account.

6. During the extended loading period of the Butane Plus tanker at the SBM No. 6 it is the responsibility of the vessel to ensure that all mooring lines and loading hoses are properly tended.

The Terminal Mooring Masters may at any time request the ship's securing lines to be tightened or slackened under the direction of a responsible ship's officer. This may be necessary to avoid the ship overriding the buoy. Failure to comply with such a request may result in cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply, will be for the account of the buyer. See also "Mooring/Unmooring".

7. Masters of Butane Plus tankers are advised that raising, lowering connecting and disconnecting of Butane Plus loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed BY THE SHIP'S CREW DIRECTED BY A RESPONSIBLE OFFICER as required by the Mooring Master.

MOORING/LOADING/UNMOORING: The Ardjuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances at the sole discretion of the Company Terminal Superintendent night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour.

Tankers to be moored or manoeuvred at the Ardjuna Marine Terminal will be boarded by the Company Mooring Master within the anchorage area.

Under normal weather conditions if a tanker is scheduled to berth on arrival, the Mooring Master will board such vessel in the close vicinity of the mooring area.

All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the tanker being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of his vessel.

The ship's Master, or one of his *designated and qualified deck officers, must* be on the navigating bridge at all times while the vessel is being manoeuvred.

The Mooring Master will report unsatisfactory conditions to the company Terminal Superintendent who may in turn, reject the tanker until corrections are fully made. All costs accruing therefrom will be for the vessel's account. The services of the Mooring Master are provided upon the express understanding and conditions that when any Mooring Master provided goes on board a vessel for the purpose of assisting such vessel, he becomes for such purpose the servant of the owners of the vessel and the company shall not be liable for any damage, or injury resulting from any advice, or assistance, or actions directed, or made, by such Mooring Master while on, or in the vicinity of the assisted vessel.

Before loading, the tanker's cargo tanks are to be inspected and if suitable for loading crude oil, or LPG, as the case may be, a notation signed by both the Terminal Representative and vessel's Master to this effect will be made on the Company Dry Certificate.

The Company Terminal Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Ardjuna Marine Terminal. All these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Ardjuna Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

Request for the terminal to stop the flow of oil at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master, that the company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage barge. The ship's Master will also be held responsible for any oil spills caused by this request.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area.

Unauthorised radio communications will be cause for cessation of all operations, except clearing of the berth, and the vessel's Notice of Readiness will be immediately nullified.

The Master of each tanker will be given a copy of the Conditions of Use of Port of Ardjuna Marine Terminal which he will be required to sign before the vessel proceeds to berth.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the products being handled, weather conditions and any other circumstances requiring special care or caution.

Ships are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch.

A combination of pilot ladder and ship's accommodation ladder, so arranged that the personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large tankers. A light line should be ready to take aboard the Mooring Master's equipment.

Tankers will provide a broad lee for the Mooring Master both when boarding and leaving the ship. Adequate explosion proof lighting at night must be provided near the pilot ladder, and manifold connection area. During loading overside lighting must be provided in the vicinity of sea valves and floating hoses.

During a tanker's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern on each quarter of the vessel. These wires shall be secured on the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

Butane tankers moored to SBM No. 6 shall at all times have a suitable towing rope hung over the tanker's stern in such a way that the towing rope can be fastened to the company tug, thereby enabling the tug to assist in preventing the tanker from riding up on the SBM, should the need arise.

Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted.

It is absolutely essential that extremely careful supervision be exercised by officers of all tankers while loading operations are in progress. A responsible ship's officer is required to be on duty continuously while the tanker is being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended on loading tankers. The Mooring Master at any time, may direct an additional ship's line to be secured to the buoy and this line to be hove up or slackened off under the supervision of a responsible ship's officer so as to prevent the vessel overriding the buoy. *At all times sufficient crew must be available* to carry out under the supervision of a responsible officer, instructions given by the Mooring Master.

Masters of loading tankers are advised that raising, lowering, connecting and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed *by the ship's crew directed by a responsible officer* as required by the Mooring Master. Loading of crude oil tankers is through 2×12 in. I.D. hoses with 150 ASA flange rating. The weight of each hose is approximately 2.5 tons. All tankers loading crude oil at Ardjuna Marine Terminal must be able to connect their manifolds to the 12 in. hoses. Masters are strongly reminded, it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 12 in.

Preparations for mooring will be advised by the terminal through VHF communication prior to tanker's arrival or by the Mooring Master before the mooring operation commences.

Crude oil tankers are required to have ready:

1. On the portside: a derrick of at least 5 tons safe working load, rigged, and ready to pick up the mooring and hose connecting gear from the Mooring Master's launch.
   This derrick subsequently will be used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.
2. On the forecastle: at least 6 good ship's mooring lines shall be required. Two of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM.
   The 4 remaining ship's lines will be laid out 2 and 2 on either side of the foc'sle deck, eyes about 3.5 m distant from the fairleads as advised by the Mooring Master. When the terminal mooring lines have been hove up and anti-chafe chains have been hove about halfway inboard through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain, so arranged that in the final position of mooring, the tanker is tied to the SBM using the terminal mooring lines/chains and made fast to the ship's bollards by means of the ship's own lines. This will be backed up by 2 lengths of wire strops each 30 ft. in length and 2 in. diameter. These wires will be provided by the terminal to be used as preventer wires. These 2 wire strops will not be used as the permanent mooring system.
   Their purpose is to hold the ship safely moored in the event one or more of the ship's lines part until the crew can replace such lines.
3. Tanker loading Butane Plus at SBM No. 6 will moor in the same manner as crude oil tankers referred to in para. 2 above.

Refrigerated LPG tankers will berth alongside the starboard side of the LPG storage barge "Ardjuna Sakti". The "Ardjuna Sakti" is secured to a Rigid Arm Single Buoy Mooring System which allows the storage barge to rotate according to direction of wind and tide. There are 5 large Yokohama type rubber fenders aboard the storage barge 4 of which are supported on davits. The fenders are lowered to the water prior to the berthing operation. Each fender is 6.5 m. in length the diameter of the fenders is 3.3 m. Line running launches are available to pass the mooring lines between the barge and the ship.

When secured in position the moorings will be as follows:

5 lines on the forecastle.
4 lines on the poop.
2 springs on the maindeck forward leading aft.
2 springs on the maindeck aft leading forward.

Each LPG tanker loading at Ardjuna Marine Terminal will be required to provide the above ropes. Where tension winches are available they will only be used if they can be locked in a fixed position.

EQUIPMENT: A ship may be rejected if, upon inspection, it is not properly equipped, or if it is not suitably manned, or tanks unsuitable for the cargo, or if in the case of crude oil tankers the ballast is dirty.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in a sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships or partly inoperative ships will be rejected. Should a ship become inoperative or partly inoperative while berthed alongside the storage barge "Ardjuna Sakti" or while secured to a crude oil export single buoy mooring, it will be removed at the ship's expense.

No repairs to main engines or other essential equipment or machinery while alongside the storage barge "Ardjuna Sakti" or while secured to an export SBM may be carried out, unless with the permission of the Terminal Superintendent or his designated alternate.

Crude oil and butane tankers must lift the export hoses from the water to connect with the ship's manifold by means of its *own derricks and using its own crew.*

A vessel must have both bow anchors in good working condition. Both bow anchors and anchor cable must be of a size and standard to meet either "Lloyds" or "A.B.S." requirements, even though they may in fact, be classified by other societies.

All vessels must have ready on deck suitable stoppers for manila, synthetic lines and wires used for mooring purposes.

All vessels must have suitable winches or capstans in good working order.

Such winches or capstans must have sufficient power to heave the ship to the position required by the Terminal Mooring Master.

Tankers must have the capacity to heave on the 12 in. and 18 in. braid lines used to secure them to the export SBMs. Power supply to all deck machinery must be maintained throughout the period the ship is secured alongside the storage barge "Ardjuna Sakti" or to the export SBM. Failure to comply with this requirement will result in cessation of loading and delay, and expense so caused will be for the ship's account.

To assist in vessel's turn around, ships should have all necessary gear ready on arrival.

Crude oil and butane tankers must have the cargo boom on the port side raised with the cargo gear rigged and ready before the ship is boarded by the Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

Masters of crude oil tankers are reminded that the hose connecting operation will normally be carried out while the ship is deballasting.

The cargo derrick required to raise the hose from the water, must have a sufficient length of strong lifting wire rope on the winch drum to enable the cargo hook to reach the water and still have adequate turns of wire left on the drum to ensure safety.

BALLAST: Owners and Masters are responsible for observance of International Convention Laws and Indonesia Government Regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

No facilities are available for disposal of dirty ballast.

It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

As soon as practical after arrival, all tankers will be inspected by an Ardjuna Marine Terminal Official for dirty ballast. During discharge of ballast, similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection, or during progress of loading, it is revealed that the ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading unless satisfactory evidence of repair duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors is submitted. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, sand, dispersant etc. should be used at all times especially when disconnecting hoses in order to avoid any spillage of oil overboard.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his Notice of Readiness and will lose any priority of position for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum safe ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the company Terminal Superintendent or his alternate.

Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on shipboard and treating these washings with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of lifting companies, the terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea.

Masters are required to certify in writing the quantity of slops remaining on board (if any). If they intend to load crude oil on top of the slops, it must be clearly stated. The Mooring Master will confirm the amount stated in writing by ullaging and calculating the slops to ensure the amount declared is correct.

Provided agreement is reached on the amount of slops the Mooring Master will confirm the amount of slops on the Dry Certificate.

Note: Separate "Slop Certificate" signed by Chief Officer and witnessed by the Mooring Master is required to substantiate calculation.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately and not be resumed until the oil is cleaned up and removed from the decks of the vessel and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Ardjuna Cargo Controller will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer – in charge of loading.

All spillages of oil must be reported immediately to the Ardjuna Terminal Superintendent, or his alternate, and subsequently a detailed report in writing submitted by the Master of the vessel concerned giving all relevant details.

MEDICAL: First aid is available.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

CONSULS: There are no consulates available at Ardjuna Terminal. However, there are many embassies and consulates represented in Jakarta about 59 miles S.W. of the Terminal.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs' seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars.

Special allowances are made for the Master under special circumstances.

REPATRIATION: No crew changes. If emergency conditions prevail, for humanitarian reasons exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

AIRPORT: Nearest airport at Jakarta.

TIME: Ardjuna time is GMT plus 7 hours throughout the year.

SHORE LEAVE: Not allowed.

SAFETY/FIRE REGULATIONS: Safety and Fire Regulations will be strictly adhered to.

The notice "Instructions In Case Of Fire", and the notice "Safety And Fire Regulations" must be posted in prominent positions on board the export tanker by the Master, or by his designated alternate.

The Safety Check List must be jointly completed by a ship's officer designated by the Master, together with the Terminal Marine Supervisor/Mooring Master. After completing and signing the Check List both the ship's officer and Marine Supervisor/Mooring Master will retain copies.

Terminal Safety and Fire Inspections: It is the duty of the Mooring Master to make periodical inspections on board vessels in respect of any breach of the Terminal Safety and Fire Regulations.

For this purpose he must be allowed free access to all parts of the vessel at all times and must be accompanied by a responsible ship's officer to assist him in carrying out such inspections. The Mooring Master will advise the ship's Master when he wishes to make a safety inspection. It is the responsibility of the ship's Master to ensure that the Mooring Master is given every assistance to carry out this duty.

AGENCY: See "General" before first port.

Deminex Java Oel GmbH, Setiabudi Building, 2nd Floor, Jln. H.R. Rasuna Said 62, Jakarta, Indonesia.

Deminex Java Oel GmbH, P.O.Box 100944, Dorotheenstrasse 1, 4300 Essen 1, Germany. Att: P-1.

Nominations: Tanker nominations for liftings of either Ardjuna Crude Oil or liquefied natural gas are co-ordinated through Atlantic Richfield Company, Los Angeles, California and Atlantic Richfield Indonesia Inc., Jakarta.

All crude oil and liquefied petroleum gas sales, also tanker chartering are arranged by the following parties in each of their respective locations. Pertamina, ARCO International Oil and Gas Co., Maxus Northwest Java Inc., c/o Maxus Energy Trading Co., Repsol (Java) Exploration and Production Ltd., Inpex Java Ltd., Warrior Minyak Inc., Deminex Java Oel GmbH and C. Itoh Energy Development Co.Ltd.

Tanker scheduling is co-ordinated for all of the partners through Atlantic Richfield Company, Plano, Texas, and arranged through Atlantic Richfield Indonesia Inc., Jakarta.

BALIKPAPAN: 01.16 S. 116.48 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

- Nationality (Registry) Certificate.
- Seaworthiness Certificate.
- Measurement (Tonnage) Certificate.
- Derat (Exemption) Certificate.
- International Loading Line Certificate and SOLAS Classification (Hull and Machinery).
- Safety Construction Certificate.
- Safety Certificate (passengers ships).
- Safety Equipment Certificate (cargo ships).
- Safety Radio and Radiotelephony Certificate (cargo ships).
- Certificate of Approval (ship's radio station).
- Civil Liability Convention Certificate.
- International Oil Pollution Prevention Certificate.
- Health Book or Bill of Health.
- Last Port Clearance.
- 10 Crew Lists and Passenger's Lists.
- 2 Stores Lists.

PILOTAGE: Pilotage service available 24 hours. Master should signal their ETA at the Fairway Buoy to the Harbour Authorities at least 48 hours in advance, and confirm ETA 24 hours before arrival, and contact pilot station 1 hour before Fairway Buoy on VHF Channel 12.

Berthing and unberthing services are 24 hours. Request for pilotage should be arranged 4 hours before arrival and 3 hours before departure.

APPROACHES: The surrounding land is in general low with few conspicuous hill rows as background. Only the high spit on which Balikpapan is built can be used as a landmark with the regular cone-shaped hill Tokong.

RESTRICTIONS: Vessels with a draft of 12.0 m. are handled anytime, weather permitting. Vessels with draft of less than 11.5 m. are handled at anytime, weather permitting.

Bar Channel: Length (Buoy No. 1 to Buoy No. 12) 9 miles. Width 150 m. Depth 13.0 m. at LW.

MAX. SIZE: *Tankers:* Shell normally permit max. LOA of 215 m., draft 12.0 m. and max. d.w.t. 35,000 tons. Drafts are restricted by the bar where the depth below chart datum is 25 ft. 3 in. Minimum keel clearance required is 1 ft. 3 in. Sailing drafts depending on rise of tide up to a max. of 33 ft. salt water.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO/VHF: Balikpapan Radio. Call sign "PKN-2" on 500, 448 and 8437 kHz. and VHF Channels 16, 12 and 14.

TUGS: 3 tugs. 870 h.p., 1,700 h.p. and 2,400 h.p.

Vessels over 100 m. LOA must use 2 tugs.

BERTHING:

Jetty No. 0: Length 269 m. Width 21 m. Depth alongside 9.0 m.
Jetty No. 6: Length 185 m. Width 12 m. Depth alongside 12.0 m.
Jetty No. 7: Length 235 m. Width 28 m. Depth alongside 12.0 m.
Jetty No. 7A: Length 175 m. Width 15 m. Depth alongside 10.0 m.

Also see "Tankers".

BULK HANDLING FACILITIES: *Coal Terminal:* The Terminal is operated by PT Dermaga Perkasapratama, and is situated on a 33 hectare area in Teluk Tebang, a sheltered deep water inlet, about 6 km. North of Balikpapan and about 28 km. from the mouth of the dredged approach channel.

The Terminal is designed to handle up to five million tonnes of coal per annum and the loading of ocean-going vessels ranging from 15,000 d.w.t. to 80,000 d.w.t.

The Terminal will serve various mines in South and East Kalimantan. The coal will be transported to the Terminal by barge and unloaded at the receiving jetty by 2 grab unloading cranes with a maximum discharge capacity of 1,520 tonnes per hour.

The Terminal is the biggest "common" Indonesian coal loading facility, and a large share of the South and East Kalimantan coal will now be loaded at this Terminal instead of at anchorage off Samarinda, Banjarmasin. This will provide a much quicker loading rate and also enable gearless vessels to load these Samarinda coal cargoes. In the past, vessels had to be geared and, in many cases, equipped with grabs.

Wharf:

Acceptable vessel size:	15,000 d.w.t. – 80,000 d.w.t.
Length of Wharf:	235 m.
Number of mooring dolphins:	2
Distance between mooring dolphins:	276.5 m.
Berth depth:	15 m. lwd (UKC 1.0 m.).
Depth of turning basin:	20 m. lwd (UKC 6.0 m.).

Shiploader:

Type:	One luffing travelling.
Loading rate:	Max. 2,800 t.p.h. Ave. 2,200 t.p.h.
Max. throw of coal from fenderline:	43 m.
Longitudinal travelling distance:	180 m.
Highest boom working angle:	+17°
Lowest boom working angle:	−8°
Max. ship airdraft:	+19 m. lwd.

Channel:

Channel depth:	13 m. lwd (UKC 10% of fully laden draft).
Width of channel:	Approx. 150 m.
Length of channel:	14,000 m. (Straight section: 12,000 m.) (Bends: 200 m.).

CRANES: 4×15 tons – 25 tons.

MEDICAL: Hospital facilities available.

TANKERS:

Loading Arms: 8 in. – 10 in. diameter.
Hoses: 6 in. – 10 in. diameter.

STEVEDORES: Working hours: 0700 – 2000 hrs. Monday to Friday. 0700 – 1500 hrs. Saturdays. Sundays work possible at overtime rates.

DENSITY: 1012 – 1020.

FRESH WATER: Available in limited quantity. Rate 10 t.p.h. – 15 t.p.h.

FUEL: Fuel oil and diesel oil available at Berth No. 1 to No. 5C (except No. 5A). Pumping rate 150 t.p.h. – 650 t.p.h.

PORT SECURITY: Maintained by Port Security Unit (KPLP) and Police (KP.3). Crew members should be in possession of a shore-pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS ALLOWANCES: Indonesian currency from vessels arriving from overseas must be inspected. Foreign currency may be taken ashore. It is recommended that Masters consult the Agents with the local prevailing Customs Laws with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: Sepinggan Airport, distance 8 km.

GENERAL:

Provisions: Available.
Current: Flows North/South at up to 3 knots.
Nature of Bottom: Mud and sand.
Telephone Numbers:

SHIPMASTER'S REPORT: July 1995.

Vessel: 41,000 d.w.t.
Berth: Jetty No. 5 C.
Operations: Vessel loaded white products through hard arms.

Shore gangway fitted, but inoperative. Ship's accommodation ladder not suitable. D.o.T. gangway used to Chicksan Operating Platform, but not very satisfactory.

Note of Protest issued by ship.

Large difference in ship/shore figures.

AUTHORITY: Balikpapan Port Administration, Jl. Raya Pelabuhan No. 1, P.O.Box 35, Balikpapan, East Kalimantan, Indonesia. *Tel:* 22872, 22096. *Telex:* 37105. *Cables:* Adpel Balikpapan. *Contact:* Dr. Eddi Hidayat, Port Administrator.

BALONGAN: 06.21 S. 108.23 E.

PILOTAGE: The Mooring Master boards in the vicinity of the SBMs and requires 4 hours notice.

ANCHORAGES: The anchorage position is 3 miles North of the SBM (export) for awaiting pilot, or 1 mile North of the SBM (domestic) for awaiting berth. If vessel is not scheduled to berth on arrival, Master will be advised by radio and requested to anchor.

RESTRICTIONS: Berthing in daylight hours only. Unberthing at anytime.

MAX. SIZE: 150,000 d.w.t. Max. LOA 290 m.

Also see "Berthing".

RADIO/VHF: Balongan Coastal Radio Station, call sign PKQ-2, on VHF Channels 9, 16 and 19.

TUGS: 3 tugs, 1,200 h.p. – 1,700 h.p.

Vessels take hose on the port side at the offshore berths.

Vessels may berth either side alongside at the inshore berths.

CONSULS: None.

MEDICAL: Hospital and clinic available.

FRESH WATER: Available.

FUEL: Not available.

AIRPORT: Penggung Airport at Cirebon.

TIME: GMT plus 7 hours.

GENERAL: *Charts:* Indonesian: No. 79.
British: 1066, 1653A.

Dirty Ballast: No facilities.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: June 1995.

Vessel: 41,000 d.w.t.

Berth: SBM No. 2.

Loading: Vessel loaded white products through 10 in. hose.

Vessel had to stop loading and sail short of cargo due to leak in submarine pipeline to SBM. Large ship/shore difference in cargo figures. Note of Protest issued by ship.

AUTHORITY: *Operator:* Pertamina, Pertamina P&T UEP-111, Jl. Patra Raya, Klayan, P.O.Box 15, Cirebon, Indonesia. *Tel:* (0231) 4629, 5051, 5054. *Telex:* 44451 Pert-Crb. *FAX:* (0231) 26536.

BANJARMASIN: 03.18 S. 114.35 E.

PILOTAGE: Compulsory. Sea pilot boards the vessel in the anchorage area.

ANCHORAGE: Vessels anchor in position 03° 38.5' S., 114° 30' E.

RESTRICTIONS: The bar is silting excessively and continuous dredging is necessary to keep the shallowest part at 5.0 m. depth.

Vessels will proceed when the height of tide enables the vessel to pass through the channel. The channel is approximately 20 miles long and has a depth of 6.0 m. – 8.0 m.

RADIO: Banjarmasin Radio, call sign "PKG"

Frequencies:	456 kHz.
	2,080 kHz.
	8,457 kHz.

VHF: Banjarmasin Radio on VHF Channel 16.

TUGS: 5×215 h.p. – 800 h.p.

BERTHING: The inner harbour is located in position Lat. 03° 20' S., Long. 114° 30' E.

There is one quay with a length of 200 m. and the depth alongside is 8.0 m. at LWS.

Storage: There is a godown with an area of 7,500 sq.m. and open storage area of 11,500 sq.m.

CRANES: 1×25 ton mobile crane. 9 forklifts with capacity 2.5 tons – 7.5 tons.

MEDICAL: Medical and hospital facilities available.

STEVEDORES: Available from the labour pool (U.K.A.).

FRESH WATER: Fresh water is available alongside the quay.

FUEL: Not available.

REPAIRS: Minor repairs only.

SHIPMASTER'S REPORT: November 1995.

Documents:
- Crew List.
- List of Ports of Call.
- Stores List.
- Provisions List.
- Bonded Stores List.
- Personal Effects Declaration.
- Cargo Manifest.
- Vaccination List.
- Last Port Clearance.
- Arms and Ammunition List.
- Passenger List.
- Narcotics List.

All officials board the vessel at the anchorage. Bonded store was not sealed.

Pilotage: Pilotage is compulsory. Pilot boards in position Lat. 03° 39.8' S., Long. 114° 25.2' E.

When vessels carry out loading operations at anchorage, Pilot is not compulsory.

Anchorage: Open anchorage, open to the weather from East, South and West. Holding ground is good. Available depth is about 22.0 m.

Approaches: B.A. Charts No. 3029 and 3015.

As it is an open anchorage, approaches are very easy. There are good land marks and sufficient lighthouses for position plotting.

Approaching vessel should first pick-up T. Selatan Lighthouse, and when S.W. of it, proceed Northerly, keeping the vessel outside the 20.0 m. sounding contour.

At anchorage, there is ample room for all sized vessels.

When approaching, caution is to be exercised, as tugs towing barges may be encountered.

Restrictions: The draft available for the inner harbour is 5.0 m. at the top of high water. Due to excessive silting in the river, it requires continuous dredging. Cargo operations for larger vessels are performed at the anchorage.

Health: Free Pratique is granted at the anchorage.

VHF: Port Control operate on Channel 16.

Tugs: In the inner harbour, there are 3 tugs available to assist in the berthing/unberthing operations. There are also several tugs for towing the barges. Tugs up to 3,000 h.p. are available.

Berthing: In the inner harbour, there is one quay with length 500 m. and 4 vessels can be accommodated at a time.

Trade: Main trade of the port is export of coal. Lumber, plywood and rubber also handled. Petroleum, petroleum products and containers are handled in the inner harbour.

Draft Survey: Cargo quantity is ascertained by draft survey, which is jointly carried out by ship's staff and surveyor, appointed by shipper.

Loading: Loading operations of larger vessels are carried out at the anchorage by the barges. We loaded 42,500 tonnes of coal. Ship's cranes and grabs are mostly used for loading. However, for gearless vessels, there are 2 floating cranes fitted with grabs of 15 tonnes capacity. Loading rate depends on the availability of barges. A 40,000 tonne cargo loading usually takes about 7 days.

Stevedores: Available from the local pool. Hatch opening and closing is carried out by the ship's crew.

Medical: Medical attention and hospitalisation possible.

Density: Density in the river is 1000 and at the anchorage 1020.

Fresh Water: Available at anchorage by barges. Cost is about U.S.$15.00/ton.

Fuel: All grades of fuel available alongside or at the anchorage.

Repairs: Only small repairs are possible locally. However, workshops can be arranged from Jakarta, Surabaja and Singapore.

Gangway/Deck Watchmen: Not required.

Customs Allowances: Spirits 0.75 litre, beer 24 cans and cigarettes 200.

Repatriation: Possible.

Airport: There are flights to Jakarta and Surabaja, where international flights are available.

Time: GMT plus 8 hours.

Shore Leave: Permitted. It takes about 2 hours to reach the shore by speed boat from the anchorage.

Identity Cards: Not required. Crew should carry passports duly stamped by Immigration Officer.

General:

Supplies: Only fresh provisions and seasonal fruits are available. The Agent acts as ship chandler.

Services: Thre are no facilities for tank cleaning, garbage disposal or compass adjusting.

Weather: Since most of the cargo operations are carried out at the open anchorage, the weather is a limiting factor. Quite often, there is a strong S.W.'ly wind in the afternoon of about 20 knots – 25 knots, which creates swell of up to 2.0 m. – 3.0 m., but the weather subsides in the evening. However, dragging of vessel's anchors is rarely reported.

Agency: PT Arpinebathera Adhignua, Jalan Kapten Piere Tendean No. 78, Banjarmasin, Indonesia. Tel: (0511) 252075, (0511) 251744. Fax: (0511) 256757. Telex: 39345 Apolbm Ia.

BANYUWANGI: 08.13 S. 114.23 E.

OLD PORT NOW PRACTICALLY CLOSED FOR SHIPS.
(OPENED FOR BOATS AND FISHING BOATS ONLY).

DOCUMENTS: Customs and Harbour Master requires:
- Crew List.
- Passenger List.
- Customs Documents.
- Health Certificate.
- Port Clearance.
- Harbour Report.
- Derat Certificate.
- Radio Certificate.
- Certificate of Registry.

PILOTAGE: Not necessary because anchorage open.

ANCHORAGE: Position: Lat. 8° 12' S., Long. 114° 23' 16" E. Depth 25 m. – 30 m.

MAX. SIZE: No restrictions, vessels must be anchored outside harbour.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: None, moved to Meneng Port.

TUGS: 2 tug boats belong to P.T. Jakarta Lloyd, Banyuwangi Branch.

BERTHING: Distance 500 m. to 750 m. from lighthouse. Anchorage berths only.

STEVEDORES: 6 gangs available. P.T. Jakarta Lloyd, Banyuwangi Branch. 1 gang consists of 13 labourers, 1 gang boss, 1 tallyman, 2 winch drivers and 1 commander.
MEDICAL: Arranged by Department of Health.
FRESH WATER: None available.
FUEL: None available.
CONSULS: No local representation.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: None available from shore.
OPENING/CLOSING HATCHES: Arranged by stevedores.
CUSTOMS ALLOWANCES: 50 cigarettes each crew member. Packs or tins of tobacco must be open before going ashore. Wine and/or spirits: Enough for own use, if more required must pay import duties.
CARGO GEAR: Ship's gear used. Cargo loading on board by lighter.
REPATRIATION: Not possible.
TIME: GMT plus 7 hours.
HOLIDAYS: On Sundays and holidays no work carried out, but if necessary, can be arranged. No work when raining.
POLICE/FIRE/AMBULANCE: Police and ambulance available. Fire brigades belong to District and Paper Mill. Phone Nos. 352, 653, 353 and 503.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
DELAYS: Possible during loading if it rains.
AUTHORITY: Kepala Pelabuhan (Port Administration).

BANYUWANGI (Tanjungwangi Port): 08.07 S. 114.23 E. (See Plan)

PORT FOR LARGE VESSELS.

DOCUMENTS: Customs and Harbour Master require:
Crew List.
Passenger List.
Customs Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Derat Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.
PILOTAGE: Compulsory pilotage for vessels over 150 g.r.t. Pilots must be ordered by respective Agent at least 48 hours in advance of the time their service is required.
ANCHORAGE: Lat. 8° 07' 20" S., Long. 114° 24' 14" E.
For vessels over LOA 150 m.:
1. Lat. 08° 20' 00" S., Long. 114° 24' 00" E.
2. Lat. 08° 24' 10" S., Long. 114° 24' 50" E.
RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only for tankers.
MAX. SIZE: Draft alongside quay max. 40 ft. Present quay permits max. LOA of 500 ft. Bar 200 m. East of quay, depth below chart datum is 27 ft. Max. size 20,000 d.w.t.
HEALTH: All vessels boarded by Harbour Quarantine on arrival.
RADIO: Name: Meneng Coastal Radio Station. Call sign: PKD 22 with 2182/2690 kHz, 6215/6209 kHz and 8270/8794 kHz.

Tanjungwangi Pilot Station: Channels 8, 12, 14 and 16.
Pertamina Tanker/Shipping: Channels 16 and 9.
TUGS: 1 tug × 1,400 h.p. owned by Pelindo III Meneng. 2 tugs × 850 h.p. owned by Pertamina.
BERTHING: Present berth length 388 m. Depth alongside 40 ft.
New Port: Located about 0.4 miles South of the Pertamina Oil Jetty. Port operated and owned by DMK (Dhisa Manunggal Karya) for all off-loading and discharging purposes. Max. LOA 110 m., max. draft 8.0 m.
Note:
Max. safe capacity for the jetty:
Cargo jetty No. I max. capacity 3 tons/sq.m.
Cargo jetty No. II max. capacity 3 tons/sq.m.
Cargo jetty No. III max. capacity 3 tons/sq.m.
STEVEDORES: 12 gangs available.
One gang consists of 1 gang boss, 2 winch drivers, 1 Pilot and 13 labourers.
Working Hours: 0800 – 1600, 1600 – 2400 and 2400 – 0800.
Rest Time: 1200 – 1300, 1800 – 1900 and 0300 – 0400.
FACILITIES: *Godowns:*
(a) 2 transit godowns, max. capacity 1,000 sq.m./2,000 tons.
1 transit godown, max. capacity 1,250 sq.m./2,500 tons.
1 transit godown, max. capacity 1,800 sq.m./3,600 tons.
1 transit godown, max. capacity 3,000 sq.m./6,000 tons.
Owned by PT (Persero) Pelindo III Tanjungwangi.
(b) 2 transit godowns, max. capacity 10,000 tons.
Owned by PT Djakarta Lloyd Tanjungwangi.
Equipment: 1 mobile crane of 25 tons capacity. 2 forklifts of 3 tons capacity. 3 forklifts of 2 tons capacity.
MEDICAL: Arranged by Department of Health.
TANKERS: One berth operated by Pertamina. Max. LOA 155 m. Max. draft 8.00 m. Max. d.w.t. 20,000 tons.
FRESH WATER: Available. Handled by Harbour Board, with a loading capacity of about 50 t.p.h.
FUEL: Available.
CONSULS: No local representation.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Normally by stevedores.
CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wines and/or spirits enough for own use. If more required must pay import duties.
CARGO GEAR: Ship's gear used.
REPATRIATION: Foreign crew members must go to Immigration Office at Jember City for clearance. Facilities will be available at Banyuwangi in near future.
TIME: GMT plus 7 hours.
AIRPORT: Ngurah Rai Airport 60 miles. Juanda Airport (Surabaya) 125 miles.
HOLIDAYS: On Sunday and holidays no workers available, but if necessary work can be arranged, except Independence Day (17th August) and 1st Sjawal (Idul Fitri/Moslem Holiday).
POLICE/FIRE/AMBULANCE: Police and Ambulance available. Fire Brigade owned by P.T. Pelindo III Tanjungwangi.
Police: 110 or 2110. Fire: 113. Ambulance: 118 or 2118.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed, shore pass required from Pelindo III. Tel: (0333) 21638 – 24636.
IDENTIFICATION CARDS: Required.
DELAYS: Possible during loading if it rains.
AUTHORITY: PT (Persero) Pelabuhan Indonesia III Port Tanjungwangi Branch, Raya Situbondo Street, Tanjungwangi, Banyuwangi, Indonesia. *Tel:* (0333) 21638, (0333) 24636. *Contact:* H.Suwandhy Sarlan, Port Manager.

BATU AMPAR: 01.10 N. 104.00 E.

PILOTAGE: No pilot available.
RESTRICTIONS: Entrance channel has a width of 80.0 m. and a depth of 6.0 m. – 8.0 m.
RADIO: Sekupang Radio. Call sign PKJ 20. Frequencies 500/452 kHz.
VHF: Sekupang Radio on VHF Channels 16, 9 and 19.
TUGS: There are 5 tugs and 1 mooring boat available.
BERTHING: New concrete wharf, length 1,000 m., depth alongside 6.0 m. at LWS.
Storage: There is a shed of 9,000 sq.m. and open storage area of 27,000 sq.m.
Fork Lifts: There are 8 fork lifts with capacity 2 tons – 5 tons.
CRANES: 6×10 tons – 25 tons mobile cranes and 1×150 tons capacity mobile crane.
STEVEDORES: Local labour available.
FRESH WATER: Available.
FUEL: Not available.
GENERAL: *Barges:* 5 barges available, each with capacity 400 tons.

BELAWAN: 03.47 N. 98.41 E. (See Plan)

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
2 Stores Lists.
PILOTAGE: Pilotage for vessels over 150 g.r.t. is compulsory. Location of anchorage for vessels awaiting a Pilot is Lat. 03° 54' 50" N., Long. 98° 45' 50" E., near Light Buoy No. 0 (Lat. 03° 54' 14" N., Long. 98° 44' 40" E.).

The new lighthouse at Tg. Nipa Larangan (Lat. 03° 54' 12" N., Long. 98° 40' 20" E.) with characteristic Gp. Fl (3) 20 sec. 17M 40m., will assist Masters to approach the anchorage. Before arrival Masters have to contact their Agents via Belawan Radio (PKB) and give Information about: ETA, cargo, LOA, draft etc.

To receive information, Masters may use the VHF radio on Channel 12 calling "Belawan Pilot" or "Pilot Boat".

Pilot's service available 24 hours a day.

Pilot must be ordered by the Agent at least 6 hours in advance of the time their service is required.

A Sea Pilot and Harbour Pilot embark at anchorage when berth has been allotted.

Vessels will proceed when the draft enables vessels to pass through the channel.

The channel is approximately 9 miles in length, 100 m. width and 8.5 m. depth at LWS with a tidal range about 2 m. and is provided with 9 light buoys and 5 light beacons.

Basin 1,350 m. length. 220 m. width.

Pilot boat is located in the harbour.

When the Pilot is on pilot vessel, "H" flag will be flown in daylight and quick flashing white light at night.

RESTRICTIONS: Bar is silting excessively and continuous dredging is necessary to keep the shallowest part at 8 m. at LWS. Narrowest part of channel is 50 m. wide. Also see "Developments".

Outer Roads about 600 m. square marked by light buoy. No pilot light vessel. This roadstead is approx. 600 m. wide, the centre of which is the range-line of the swept channel. This channel is provided with buoys and beacons.

MAX. SIZE: LOA 200 m. Max. draft 10.0 m.

RADIO: Belawan Coastal Radio Station: Call sign PKB; Class A1, Frequency 500 kHz, 6,215 kHz, 2,182 kHz (emergency) 17,239.7 kHz, 12,970 kHz, 5 MHz (long). 8,686 kHz (middle). 4,295 kHz (short). Channels 16, 20, 22 Port Area (VHF). 8,746 kHz telephony. Telex: 51320, 52534.

TUGS: 1×800 h.p., 2×1,700 h.p., 1×1,500 h.p. and 1×2,400 h.p. Join the vessels at Buoy No. 9 about 2 miles from harbour. Ship's line to be used for towing line.

Port Authority Regulation:

(a) Vessels with LOA less than 70 m., tug assistance not required.
(b) Vessels with LOA from 71 m. up to 100 m., assisted by minimum 1 tug with total power 600 h.p. up to 1,200 h.p.
(c) Vessels with LOA over 101 m. up to 150 m., assisted by minimum 2 tugs with total power 1,700 h.p. up to 3,400 h.p.
(d) Vessels with LOA 151 m. up to 200 m., assisted by minimum 2 tugs with total power 3,400 h.p. up to 5,000 h.p.
(e) Vessels with LOA 201 m. up to 300 m., assisted by minimum 3 tugs with total power 5,000 h.p. up to 10,000 h.p.
(f) Vessels 301 m. or more, assisted by minimum 4 tugs with total power not less than 10,000 h.p.

BERTHING:

Dock or Quay	*Berth No.*	*Nominal Depth below Chart Datum* (m.)	(ft.)	*Length of Quay* (m.)

STEVEDORES: Working hours: Monday-Thursday 0800 – 1200 hrs., 1300 – 1600 hrs. Friday 0800 – 1100 hrs., 1400 – 1600 hrs. Saturday 0800 – 1200 hrs., 1300 – 1600 hrs. Overtime to be applied for from authorities concerned and is usually granted: on working-days during meal-hours, from 1600 – 2000 hrs. and occasionally till 0400 hrs.; on Sundays and holidays, except Independence Day, 1st Ramadhan, Christmas and 1st January.

CRANES: Floating crane 40 tons capacity and 5 front lifters (top loader 1×10 tons capacity and 1×40 tons capacity).

4 travellifts, capacity 3.5 tons each.
2 gantry cranes, capacity 40 tons each under the spreader.
5 forklifts, capacity 2.5 tons.
1 forklift, capacity 3 tons.
1 forklift, capacity 5 tons.
1 forklift, capacity 2.5 tons.
2 forklifts, capacity 7.6 tons.
1 forklift, capacity 15 tons.
2 mobile cranes, capacity 15 tons.
1 mobile crane, capacity 25 tons.
1 mobile crane, capacity 35 tons.
1 mobile crane, capacity 40 tons.

MEDICAL: Hospital facilities available.

FRESH WATER: Handled by the Harbour Board. Artesian wells all along the Ocean Quay with a loading capacity of about 40 t.p.h. The water is regularly laboratory checked and declared drinkable but boiling before use remains recommended. Barge with 150 tons capacity also available.

FUEL: MFO and MDO available from Pertamina, advance notice required. Pumping capacity about 60 t.p.h.

REPAIRS: Slipways available for small craft only. Machine-shops available for minor repairs. Radio repairs available, viz. the Post Telegraph and Telephone Office. Electronic repairs available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Coast Guard. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Local currency restrictions may apply to shore-going crew members. It is recommended that Masters consult the Agents for the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

DEVELOPMENTS: New Quay, length 851 m. and width 25 m. has been completed (See "Berthing"). 2 container cranes with capacity of 40 tons, outreach 36 m. and backreach 15 m. available. The berths will handle vessels up to 35,000 d.w.t.

To be constructed: 1 wharf, 175 m. long and 11.5 m. depth. 1 wharf, 490 m. long and depth 8.0 m. 1 wharf, 500 m. long (extension) and depth 8.0 m. 1 Fuel Oil Terminal.

Dredging: The Belawan Harbour Master has issued the following guidelines in connection with dredging work being carried out:

Commencing as of September 24th, 1984, the sailing channel of the Belawan Harbour shall be dredged for the length of about 14,000 m. with a depth of 10 m. LWS. The dredger to be used is the mud sucker 'Irian Jaya'. The location of the mud to be deposited 03° 55' 14" N., 98° 44' 48" E.

All ships passing by the dredger are requested to observe all signals shown.

At the time of passing each other, the manoeuvre should be carefully conducted, or passing each other in the middle of the channel should be avoided .

SHIPMASTER'S REPORT: December 1985 (Updated 1988).

Channel: Pilot advised controlling section now reduced to 40 m. wide and 8.0 m. depth at zero tide or chart datum. Constant silting taking place. Underkeel clearance 1.0 m. required.

One vessel per tide can pass at 7.0 m. plus the predicted height of tide. Imperative to obtain information from Pilot inward, as simply not available from Agents, Port Radio, etc.

Gabion Wharf: This new project has been completed. The Northern portion will be for containers, and the Southern end for general or direct delivery cargoes. However, this wharf appears to be already suffering from silting, and the S.W. berth was found to have a minimum of 7.1 m., increasing to 9.3 m. and 9.1 m. to the N.E. (Any ship visiting an Indonesian port must take soundings immediately on berthing to establish the safety of the berth, and not immobilise until this is done). This wharf extends S.W. from beacon (F.1364) Fl. Y. 3 secs.

Density: 1015 on flood tide, 1012 on ebb tide.

Entry Formalities: The vessel used:

7 Crew Lists, (checked in detail against I.D. Cards).
1 Manifest "Nil" cargo.
5 Bonded Stores Lists.
5 Personal Effects Lists.
5 Deck, Engine, Bond, Provisions Stores Lists.
5 Animals Lists.
5 Parcel Lists.
5 Arms and Ammunition Lists.
5 Ports of Call Last Voyage.

Inspection Team: (1) 2 Immigration Officers, 1 Port Health Officer, 1 Harbour Master, (all conveyed by Agent's minibus).

(2) 5 Customs Officers arrived separately.

Departure inspection may be similar. Agent attends with both inspection teams.

Thefts: Forecastle store broken into twice while alongside, padlocks being no deterrent. 2 shore watchmen employed throughout. Shackles stolen from hatch operating gear.

Transport: Normal mode is to ride pillion on a small motorcycle! 4.5 km. to shopping street.

Postage: A letter from Medan post office to Hong Kong reported to take 3 weeks.

Telex: Communications are poor.

SHIPMASTER'S REPORT: January 1992 (Updated 1994).

Charts: B.A. Charts No. 1353 and 3584.

Documents:

8 copies Crew List.
2 copies Crew Manifest.
2 copies Stores List.
2 copies Cargo Manifest, in transit and for discharge (or 'nil' if no cargo to discharge).
1 copy Dangerous Drugs List (checked by customs).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Pilotage: Pilot boards at Buoy No. 2 and departs at Buoy No. 1 from a black hulled cutter with white superstructure. Pilot can be contacted on VHF Channel 12 throughout 24 hours, working channels are 10 or 11.

Vessel berthed at Ocean Wharf with 50 m. to spare between two other vessels. This operation was carried out without the use of tugs.

The Pilot Station will link the vessel with the agent's office which is located in the passenger terminal at the East end of Ocean Wharf. The pilot's office is located in the same position.

Anchorage: Vessel anchored with Nipa Larangan Light bearing 262°×6.8 miles and Buoy No. 2 bearing 250°×2.5 miles.

Vessels are well spread out to the East of the channel over a distance of up to 2.5 miles.

Whilst at the anchorage a careful watch should be kept for small boats, boarders and pilferage. Constant patrols are necessary at night when all lights should be on and total security maintained.

Approaches: Nipa Larangan Light is conspicuous and has a Racon 'M'.

The wreck buoy in postion Lat. 03° 54.1' N., Long. 98° 44.2' E. no longer exists. The pilot reported that the wreck close East sank into the mud and is no longer a hazard to navigation.

The channel buoys are in position and are lit and the leading lights are good.

Channel: The channel is dredged to 8.5 m. MLWS from the West end of the Ocean Wharf to Buoy No. 2.

Continuous dredging is in progress by dredger 'Iran Jaya'.

Restrictions: Berthing and unberthing throughout 24 hours.

Max.Size: Maximum permitted draft in channel with suitable tide is 9.6 m.

Radio/VHF: Belawan Radio can be contacted on VHF Channel 16, working on Channel 20, and on W/T during normal working hours. We heard vessels calling at night on VHF and they received no reply.

International calls through VHF are connected very quickly.

Tugs: There are 5 tugs available. Two of the tugs are large modern fire fighting tugs of 2,400 h.p. and they also serve the offshore oil discharge berth. The three smaller tugs are approximately 1,700 h.p.

Berths: There are 6 berths on the Ocean Wharf for vessels of average length. Official depth alongside is 8.3 m. at MLWS. Vessels generally berth head in, port side to.

The quay wall is concrete and has good modern rubber fenders along the face. All berths are served by sheds.

Cargo: Latex and vegetable oils are loaded at Berths No. 106 and 107 (3rd and 2nd berths from the Western end).

Latex is piped from numerous small storage tanks behind the sheds into a central manifold between the berths and then by portable pipes laid to the ship's rail, two manifolds used.

Vegetable oils can be loaded through the central manifold between the sheds or directly from tank trucks.

Latex is loaded through 2×6 in. hoses straight into the tank hatches. Rate per hose is approximately 65 t.p.h.

Shore labour tended the hoses throughout.

Surveyor entered all tanks (with gas mask) and made inspection.

Fumigation Certificate required.

Fresh Water: Fresh water is available at any time. Loading is by shore hoses through a meter at a good rate. Waterman in attendance.

Watchmen: The agent provides two watchmen. One is in attendance at the gangway at all times and the other patrols the vessel. They are fairly good at keeping unwanted guests away.

The latex gangs also have two armed watchmen in attendance.

Chandlers: Numerous chandlers will visit the vessel. The watchmen can obtain fish and fresh produce at prices lower than the chandlers.

General: It is not advisable for Europeans to go ashore after dark or on their own during day time. Watches and jewellery should not be worn on shore.

We received spares from Japan and it took 10 days for clearance through customs.

There is an airport at Medan which is 10 miles from the port. There are flights to Singapore. It takes 3 days to arrange tickets.

Developments: There is a new coastal tanker berth in Citra Basin with a reported depth of 7.0 m. at MLWS. There are storage tanks close East of the berth.

Both the container quay and the tanker berth have good fenders.

The offshore oil discharge terminal is as indicated on B.A. Chart No. 3584. The mooring buoys do not have lights.

SHIPMASTER'S REPORT: November 1995.

Indonesia – General: The Port Authorities take all the ship's Certificates and the Seaman's Books ashore, and they keep them until ship's sailing time.

They also require the so-called "Indonesian Health Book", a green book for which they charge the vessel U.S.$200.00.

On ship's sailing, Agents bring to the Master various receipts for signing and stamping, some of them are unacceptable (e.g. U.S.$150.00 as representation to the Pilot for berthing alongside during darkness hours, or for berthing the vessel in a specific dock). Very poor international communications.

Belawan Port: This vessel, a 45,000 d.w.t. double hull tanker, berthed at the new commercial jetty between two ships to load vegetable oils. Pilot tried, even at the last steps of berthing when the vessel was already alongside, to use the main engine for arranging the vessel's position (to shift the vessel 3 m. – 5 m. forward or astern) without taking into consideration the possibility of causing damage to the mooring lines of the next ship. I ordered the shift to be done by the vessel's ropes and the tugs' assistance.

The anchorage is not safe, so all anti-pirate measures have to be taken while at anchor. The vessel is surrounded by small boats day and night.

Whilst alongside berth, some people try to come on board and everybody must be very cautious. There is a rumour that local thieves have master keys for ships' cabins, especially of Japanese and Korean built ships.

Customs are very strict. They inspect vessels' drugs and count pill by pill. If they do not find anything, they then proceed to search the medicine chest. It is very easy for them to find some cough syrup containing codeine or something else or some pill containing something.

The vessel's Agent/P&I Club advise that large "fines" and delay to vessels' departure can occur if all is not in order.

AUTHORITY: PT (Persero) Pelabuhan Indonesia I Branch, Port of Belawan, Jln. Sumatera No. 1, Belawan 20411. Indonesia. *Tel:* (061) 641919. *Telex:* 51695 PPC BLW IA. *FAX:* (061) 641300. *Contact:* Branch Manager.

BELIDA MARINE TERMINAL: 04.08 N. 105.08 E.

(See Plan)

LOCATION: The Terminal is an open unsheltered mooring in the Natuna Sea, about 150 km. W.N.W. of the Matak Island in the Anambas archipelago. It is in Indonesian territorial waters about 15 miles East of the Malaysian/Indonesian border.

Description: The Belida Marine Terminal consists of a floating storage and offloading facility (FSO) named "Intan", soft moored to a conventional catenary anchor leg mooring buoy (CALM). The "Intan" is a converted tanker of 178,000 m.d.w.t., 300 m. LOA, with a storage capacity of 1,250,000 barrels. Crude oil is produced from the Drilling and Production Platform A (DPPA) located approximately 8,000 ft. from the FSO. There is a bridge connected flare tripod connected to DPPA, which gives an orange light, often visible at great distances from the Terminal. The average sea water depth in this area is about 250 ft. The FSO is moored to the CALM by 1×21 in. circumference nylon with OCIMF recommended hardware, including a load cell. Crude oil is pumped from DPPA along the subsea pipeline, the PLEM to flexible risers, CALM, floating hoses and into the FSO for storage. At the stern, the FSO has been fitted to act as a mooring and offloading point for export tankers moored in tandem. The discharging pumps have been re-routed to direct the flow through a metering system and extended to the port side of the poop deck, where it terminates in a string of 20 in. diameter floating hoses, 1,200 ft. long. On the FSO centerline at the after end of the poop deck, a twin 17 in. circumference nylon mooring line, 70 m. long, with OCIMF recommended hardware and load cell, is fitted. The export tanker is secured in tandem with the FSO.

Terminal Limits: The oil field facilities are in the following coordinates:

DPPA (wellhead platform)	
Latitude:	4° 08' 38.19" N.
Longitude:	105° 06' 30.27" E.
CALM/FSO	
Latitude:	4° 07' 57.30" N.
Longitude:	105° 07' 43.09" E.

A prohibited area is established, bounded within a radius of 500 m. from a line joining the above positions. Vessels shall not enter this area without a Conoco Mooring Master on board. In an area within a radius of 1 nautical mile, from a line joining these points, anchoring of vessels is strictly prohibited.

DOCUMENTS: *Customs and Health Requirements:*

Clearance: Indonesian Immigration, Customs and Harbour Master Officials will board the vessel after arrival to perform inbound clearance procedures. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and if granted, cable advice is sent to the Harbour Authorities. Port Health Clearance is issued prior to vessel's arrival, and is also valid for departure clearance. If Provisional Pratique is not granted, a Port Health Officer will be provided.

All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card.

The Agent prepares the Ship's Documents Check List Form to check the validity of each document.

These documents are:

Certificate of Registry.
Ship's Safety Construction Certificate.
Load Line Certificate.
Life Saving Equipment Certificate.
Safety Radio/Telegraph Certificate.
Cargo Gear Certificate.
Derat Certificate or Derat Exemption Certificate.

The list is then delivered to the Harbour Master with the following documents attached:

1 copy (original) Port Clearance from Last Port.
8 copies Crew List.
Passports of all crew members.
3 copies Personal Effects List.
3 copies Stores List/Bonded Stores List.
3 copies Drug List/Ammunition List.
3 copies Cargo Manifest.
3 copies Ship's Particulars.
Light Dues Receipt, if arriving from another Indonesian port.

The Harbour Master issues a Port Clearance at departure, provided clearance is also granted by the Governmental Authorities.

The Immigration Officer requires 2 copies of the Crew List, and will check the ship's articles and the passports of the crew. When these documents are found to be in order, an Arrival Clearance will be marked on the Crew List.

If arriving from another Indonesian port, the Agent will sign a Guarantee if the vessel cannot prove that Light Dues have been paid.

MINIMUM STANDARDS OF ACCEPTANCE: MINIMUM STANDARDS OF ACCEPTANCE FOR TANKERS LOADING AT BELIDA MARINE TERMINAL:

1. *Size:* Vessels in the size range 50,000 d.w.t. to 230,000 d.w.t. can be accommodated in the berth, and there is no draft limitation. Vessels below this size range may be accommodated, however, the envelope of operational conditions will be restricted.
2. *Vessel's Operations:* Operations will be conducted in accordance with ISGOTT (latest edition) guidelines. Vessels loading at the Belida Terminal must be in compliance with the latest SOLAS and MARPOL conventions and protocols. Vessels, found to be deficient or substandard in any safety or pollution control requirement, will not be berthed or if already berthed, will not be loaded.
3. *Deballasting:* Vessels must arrive at the Terminal with clean ballast and be able to deballast concurrently, maintaining 30% of the vessel's Summer d.w.t. throughout the operation.

Vessels, unable to comply with this requirement, will be permitted to load part cargo, then to discharge ballast while loading operations are suspended, and to complete loading on completion of deballasting. Vessels will be allowed 6 hours to complete the deballasting operation.

Prolonged deballasting will necessitate either removal from the berth or the commencement of loading. The Terminal will not be responsible for any free water or deadfreight.

4. *Inert Gas System:* All vessels must be equipped with an Inert Gas System conforming to the SOLAS Regulations. This must be in service throughout the vessel's operations at Belida Terminal, with tanks inerted and maintained under positive pressure. Vessel's crew must ensure that the correct atmosphere is maintained, with oxygen content at no time to exceed 8% by volume in any cargo or slop tank.

   The Terminal will make random checks to establish the condition of the tanks on arrival and throughout the operation. In the event of failure of the system or, when tank atmospheres depart from industry accepted limits, the vessel will be removed from the berth.

5. *Mooring Equipment:* Vessel must be equipped with correct mooring equipment, relevant to its size, as recommended in the "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring". The minimum dimensions of the centre bow fairlead/s is/are 600 mm. wide and 450 mm. deep in order to accommodate the chafe chain/s.

   Equipment employed at Belida Terminal for Mooring Vessels:

   Bow chain stopper/s, as outlined in the OCIMF publication "Recommendations for Equipment Employed in the Mooring of Ships at Single Point Moorings", 2nd Edition 1988.

   Vessels not fitted with bow chain stopper/s will be considered "Unsafe" for "Normal Mooring Operations".

   Vessels which, in the Mooring Master's opinion, do not have a suitable method of attaching the mooring, will be refused permission to berth. Should bitts have to be utilised, or should the bow stopper or Smit Bracket be located at such distance from the fairlead that they are unusable, rope snotters of 14 in. circumference and 15 m. long will be utilised. This is not considered a normal mooring operation, and vessels requiring this mooring technique will not be considered suitable for subsequent operation at Belida Terminal.

6. *Hose Connecting Equipment:* Vessel to be equipped with loading manifold in accordance with the "OCIMF Standards for Ships Manifolds". Flange to be prepared to accept a single 16 in. 150 lb. ASA connection. Derrick and rigging to be certified not less than 10 tons S.W.L. Hose connection will normally be accomplished on the port side.
7. *Loading Rates:* Terminal can provide an average loading rate of 32,000 b.p.h. through 1×16 in. hose. Vessels which cannot accept this loading rate will be rejected.
8. *Air-Conditioning:* Due to the climate conditions of the area, vessels not fitted with a working air-conditioning system pose a threat to the safety of loading operations. Only in exceptional circumstances, when a vessel has demonstrated its ability to comply with all conditions of the ISGOTT Safety Check List, will a vessel without air-conditioning be accepted for loading.
9. *Crew:* Vessel's crew must be qualified to the requirements of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers 1978. If any infringement of safety regulations, or any inability of ship's crew to operate safely and efficiently is observed, then the vessel will be removed from the berth.
10. The vessel's Owner or Bareboat Charterer is to be a party to TOVALOP, and have insurance covering the liabilities under the International Convention of Civil Liabilities for Oil Pollution Damage 1978 (C.L.C.).

    The cargo to be loaded will be covered by CRISTAL, and/or the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage 1971 (I.O.P.C.).
11. Tankers are required to conduct operations using a closed loading method. A vessel, which is unable to comply with this requirement, will not be loaded.
12. Vessel Owners/Operators must have a recognised "Drug and Alcohol Control Policy". Such policy should be in accordance with OCIMF "Guidelines for the Control of Drugs and Alcohol Onboard Ship (January 1990)". A written copy of the Owners/Operators policy statement must be onboard the vessel. Master and crew must understand and be guided by such policy.
13. *Certificate of Deratisation and General Cleanliness:* Vessel to be in possession of a valid Certificate of Deratisation and other de-infestation measures as appropriate. Should the vessel be infested with rats, vermin or other insects, which could be a threat to the health or well-being of Terminal personnel, then the vessel will not be accepted.

ARRIVAL: ARRIVAL PROCEDURES: Vessels will normally be accepted and berthed in chronological order of arrival, provided such vessels have a current nomination for cargo valid at the time of tender, carry clean ballast, if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped, manned and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

1. *Hours of Operation:* The Belida Marine Terminal operates 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances and at the sole discretion of the FSO Superintendent, night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour. The company will make every effort to moor vessels upon arrival in daylight, weather permitting.
2. *Notice of Readiness:* Arrival time will be considered as the time when the Mooring Master boards the vessel, or the time the vessel arrives in the deep water anchorage, if not berthing immediately (The anchorage area is shown in the "Plan Section".).

   The Mooring Master will act on behalf of the Company to sign acknowledgement of tanker's Notice of Readiness. Notice of Readiness shall be in the English language.

   Notice of Readiness will be accepted between the hours of 0600 and 1630 LMT, provided the Mooring Master is satisfied that the export vessel is in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather.
3. *Approach to the Anchorage/Mooring Master Boarding Area:* When within VHF communication range, Masters of export tankers should confirm berthing prospects with the Terminal.

   Should it be necessary to anchor, the vessel should proceed to the recommended tanker anchorage area which is within a circle 1 mile in diameter, and with its centre located in position Lat. 04° 11' 15.0" N., Long. 105° 05' 47.0" E.
4. *Arrival at Pilot Station/Anchorage:* Means of access to the vessel by the Conoco Mooring Master shall be provided in accordance with the requirements of SOLAS. Early advice will be given by Conoco to confirm the side of the vessel that access should be provided.

   At night, the access area shall be adequately illuminated to provide for the approach and boarding of the Mooring Master, Government Officials and other Conoco representatives.
5. *Vessel Anchoring:* If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed due to adverse weather conditions, etc.), the Master will be advised by radio and requested to anchor in the area shown in the "Plan Section".
6. *Port Closed – Bad Weather Interruption of Loading/Berthing:* Vessels, required to leave the Terminal area on account of bad weather, should keep in contact with the Terminal via VHF and/or Radiotelephone, in order that they may be available when the weather is fit for resumption of operations. Conoco reserve the right to berth and load vessels out-of-turn following the return of good weather.

   The Terminal reserves the right to decline to moor a specific vessel, if its condition or facilities are unsafe for mooring or loading, even though the Terminal may be open to other vessels.

   Should a vessel be rejected for any reason, the Terminal will supply the vessel and Owners/Charterers with written reasons for non-acceptance.

   The decision of the FSO Superintendent to permit a vessel to berth shall be final. On receipt of such permission, berthing will be at the discretion of the vessel's Master in agreement with the Company Mooring Master.
7. *Indonesia Flag:* The national flag of the Republic of Indonesia shall be prominently displayed by the vessel at all times whilst at Belida Marine Terminal.
8. *Indonesian Government Regulations:* Masters are informed that the following Indonesian Government Regulations are strictly enforced.

   Signals to be Displayed on Arrival: In accordance with regulations for Indonesian ports, Quarantine, Immigration, Pilot and Call Sign flag must be displayed by all vessels approaching Belida Marine Terminal. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

   Sunrise to sunset: Quarantine flag "Q".

   The "N" flag should be flown until the Immigration Officer boards the ship.

   The "G" flag (request for Pilot) should be flown until the Mooring Master boards.

   As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag, which signifies that the Pilot is aboard. During the hours of darkness, the appropriate international lights should be substituted for the flags.

NAVIGATION AIDS: The CALM, FSO and platform and flare tripod within the Belida Marine Terminal restricted areas display the following visual navigational aids and characteristics. During restricted visibility, the following sound signals will also be given:

CALM:	Light	(1) white "U" flash, vis. 5 miles.
	Sound	"U" morse.
FSO:	Light	(2) white "U" flash (bridge wing) vis. 10 miles. (1) red "U" flash (stern) vis. 10 miles.
	Sound	"U" morse, 2 miles during fog or poor visibility.
Platform and Flare Tripod:		
	Light	White and red "U" flash on each side of platform vis. 10 miles. (2) red "U" flash on flare bridge vis. 10 miles.
	Sound	"U" morse.

PILOTAGE: See "Arrival".

Boarding by Helicopter: When, due to the weather conditions, boarding of the Mooring Master and his Assistant is not possible by boat, helicopter embarkation may be used to vessels suitably equipped. Masters should inform the Terminal in their initial message if helicopter landing facilities exist on their vessel.

ANCHORAGE: For tankers requested to anchor, the recommended area is located N.W. of the Production Platform (DPPA), and is centered on position Lat. 04° 11' 15.0" N., Long. 105° 05' 47.0" E.

This position represents the centre of a circle with a radius of 1 nautical mile.

Holding ground is considered good.

Anchoring within the Terminal limits is strictly prohibited.

The sea water depth around the area is about 250 ft., and there are no draft restrictions at Belida.

RESTRICTIONS: *Design Export Tanker Operational Conditions:* On occasions, there may be circumstances or a combination of circumstances which may preclude mooring and/or loading/deballasting operations. In these circumstances, good judgement should be exercised by the Master, under the Mooring Master's advice, as to the precise action to take.

With respect to export tanker operations, the FSO and mooring system is designed for the following operational condition limits:

(a) Mooring Operational Limit:

The FSO and mooring system are designed to enable the export tanker to moor to the FSO under the following conditions:

Wave: Significant height of 1.5 m.

Wind: Up to 25 knots.

(b) Offloading Operational Limit:

The FSO and mooring system are designed to enable the FSO to continue offloading to a moored export tanker under the following conditions:

Wave: Significant height of 3.0 m.

Wind: Up to 35 knots.

Port Conditions:

(a) Calm: Extreme still conditions with no surface air movement which may allow the accumulation of hydrocarbon vapours at deck level. Port will close temporarily. Export tanker may berth (or remain in the berth if already berthed). Cargo and ballast operations may be suspended.

(b) Lightning: In some rain squall conditions, severe lightning is experienced. Port will close temporarily - export tanker may remain in the berth (or undertake berthing operations). All cargo and ballast operations will cease.

(c) Darkness: Port will normally be closed from 1630 hrs. LMT until 0600 hrs. LMT during the hours of darkness. Export tankers, already in the berth by 1630 hrs. LMT, continue operations and may also unberth at night.

MAX. SIZE: 230,000 d.w.t. There is no draft restriction at the Terminal.

HEALTH: See "Documents".

RADIO: *Communications:*

1. Following receipt of a nomination for a "named export vessel" to load at Belida Terminal, Conoco will contact the vessel's Agent, Owner or Charterer giving details of:
    Nomination.
    Loading API and Temperature (approx.).
    Berthing prospects.
2. On receipt of this message and in any case not less than 72 hours prior to estimated arrival time at Belida Terminal, Conoco will transmit the following questionnaire to the export tanker via the vessel's Agent, Owner or Charterer:
    1. Vessel's name and Summer d.w.t.
    2. ETA in local mean time (GMT + 7 hours).
    3. Last port: Next port.
    4. Cargo requirements: Maximum loading rate via 1×16 in. manifold.
    5. Quantity ballast on board. Type of ballast (SBT, etc.).
    6. Vessel able to load and deballast simultaneously, maintaining 30% of S.d.w.t. throughout. (N.B. Terminal has no dirty ballast facilities).
    7. Estimated arrival and departure drafts (fore and aft).
    8. Bow to centre manifold distance.
    9. Distance between tanker hose rail and manifold presentation flange, port side.
    10. Size of bow fairlead/s.
    11. Bow chain stopper or Smit Bracket fitted detail and S.W.L.
    12. Derrick or crane available port side with minimum 10 tons S.W.L.
    13. Vessel has clean Bill of Health: If sickness onboard, give details.
    14. IGS operational and all cargo tanks inerted to less than 8% oxygen by volume (Mooring Master will make random check of tanks prior to berthing. Failure to comply with this requirement will result in berthing delays).
    15. Closed loading procedure can be followed.
    16. Vessel entered in TOVALOP.
    17. Vessel Owners/Operator have a recognised "Drug and Alcohol Control On Board Ship" policy in accordance with OCIMF "Guidelines for the Control of Drugs and Alcohol Onboard Ship (January 1990)". A copy of the Owners/Operator policy statement is onboard the vessel, and Master and crew understand and are guided by such policy.
    18. Date last dry dock and date of last special survey.
    19. Nationality of officers and crew.
    20. Independent cargo surveyor – if appointed.
    21. Please note, no bunkers, stores or potable water are available at the Terminal.
    22. Indonesian government regulations require that Pertamina Directorate of Shipping and Telecommunications be appointed General Agent for all tankers proceeding to load in Indonesia.

These questions should be answered as completely as possible and a reply transmitted immediately. Terminal will not be responsible for berthing delays due to lack of information/notification. Delays due to non-compliance with Terminal regulations will be for vessel's account.

3. *Conoco Indonesia Communications Address:* Notification as above should be sent via:

Telex No. : 60560, 60561 CONOCO IA.
Fax No. : (62) (021) 2500050, 5204600.
Telephone No. : (62) (021) 5210100, 5222525.

Mailing address:
Conoco Indonesia Inc.
Attn. Marine Operations Department
Menara Mulia, 3rd–5th Floor,
Jl. Jend. Gatot Subroto, Kav. 9-11,
Jakarta 12930
P.O.Box 1367, Jakarta 10013, Indonesia.

Vessel shall notify Conoco of ETA 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Terminal, and at any other time when ETA changes more than one hour. The 24 hours message and the 12 hours message should, in addition, be transmitted directly to the Belida FSO.

4. *FSO Communication Facilities:*

(a) VHF/FM Radio Communications: The Terminal maintains a continuous watch on VHF Channel 16 (156.8 MHz) and Masters of in-bound export tankers are recommended to use this when they are within range. The Terminal is able to select any public VHF channel for use as a working channel after initial contact on Channel 16. Attention to early VHF communication will assist in avoiding delays in berthing and vessel turnaround time.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain a *constant* listening watch on Channel 16 to receive Terminal instructions.

Any delay due to a failure to maintain a constant listening watch on Channel 16 will be for the ship's account.

(b) HV/SSB Telex/Voice Communications: The Belida Marine Terminal also maintains a continuous watch on the following HF/SSB frequencies:

Watch: 13525 kHz.
2182 kHz.
Working: 5910 kHz.
4492 kHz.

(c) Satellite Telex/Voice Communications: Vessels, Owners or Charterers may contact Conoco Jakarta office by Telecommunications Satellite using International Dialling Code 062-21 (5210100).

(d) Pertamina Control Radio Station: In the event that incoming tankers are unable to contact Belida Marine Terminal on the foregoing VHF/FM frequencies or HF/SSB, Masters should request Jakarta Radio to relay the necessary information to Conoco Indonesia by telex or telephone.

(e) Details of Jakarta Radio:

Name : Jakarta Radio
Call Sign : PKX-2
Operated by : Pertamina
Nature : CR
Tax : 50 Centimes
Geographical position : 06° 30' 00" S.
106° 50' 00" E.

Calling Frequency (kHz)	*Working Frequency (kHz)*	*Power*	*Class (GMT)*	*Working Hours*

When the export tanker is at the anchorage, communication between the FSO and the export tanker will be established on a mutually agreed VHF channel.

When moored to the FSO, communication between the two vessels will be maintained by VHF equipment, supplemented as necessary by UHF walkie-talkies, provided by the Conoco Mooring Master.

TUGS: *Mooring Launches:* The Terminal maintains boats to assist in mooring and unmooring vessels. These boats are directed by the Mooring Master, to whom requests by the tanker for action or assistance must be directed.

BERTHING FACILITIES: See "Location – Description".

MOORING: *Mooring Operations:*

1. The Mooring Master will board incoming tankers at the anchorage area or other agreed location. The Mooring Master will advise the ship's Master on approach to the FSO, mooring and unmooring, connection and disconnection of hoses, and all other operations within the Terminal area, including all manoeuvring of the tanker. The Master must be on the bridge at all times while the tanker is being manoeuvred.
2. The services of a Mooring Master are provided upon the express understanding and conditions that, when any Mooring Master, furnished by the Company, goes aboard a tanker for the purpose of assisting such tanker, he becomes for such purposes the servant of the Owners of the vessel, and the Company shall not be liable for any damage or injury which may result from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of such vessel.
3. Support vessels assist in tanker mooring. These are under the direct control and supervision of the Mooring Master. Any service and/or facilities provided by the Company including, but not limited to, the services of Mooring Master, support vessels and their crews, or mooring and loading equipment, are at the vessel's risk. The furnishing of a Mooring Master, support vessels or other services and facilities, shall not be construed to be, or given rise to, a personal contract.
4. Tankers due for mooring must have a pilot ladder or hoist securely rigged on the side requested by the Mooring Master. Vessels with a freeboard of more than 30 ft. shall have an accommodation ladder rigged so that the lower platform is not more than 10 ft. above the water level with a short pilot ladder for access to the platform. Upon the approach of the Mooring Master in the support vessel, the tanker must provide a good lee on the appropriate side. Tankers shall also have their port derrick rigged and crew on deck standing by.
5. The Mooring Master and his assistants, if any, who will advise the tanker crew during mooring and hose connection, will normally board tankers from the support vessel, which also serves as stand-by safety boat throughout the loading operation. Immediately the Mooring Master and his assistant have boarded, the support vessel will proceed to the port side derrick area of the tanker where mooring and hose connection equipment will be lifted aboard. Sufficient crew must be available on deck to transfer the mooring equipment from the derrick area to the forecastle.

   The following equipment, provided by the tanker, shall be ready for use when the Mooring Master boards:

   On the forecastle head:
   (1) 1 buoyant mooring rope, 10 in. circumference.
   (2) 2 messenger lines, minimum 3 in. circumference × 300 ft.
   (3) A selection of shackles, wire strops and tools (sledge hammer, crowbar, etc.).

   On the poop deck:
   (1) 2 messenger lines, minimum 3 in. circumference.
   (2) 1 buoyant mooring rope, 10 in. circumference.

   When the approach to the Terminal commences, the support vessel will be in attendance to assist if necessary.

   Approach to the FSO involves manoeuvring at close quarters to the FSO. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres. The Mooring Master will test the tanker engines ahead and astern and full port to starboard rudder movement before commencing the approach run. Ship's anchors are not to be used in connection with mooring to the FSO.
6. A mooring boat will be situated near the stern of the FSO at the end of the pick-up ropes. The pick-up ropes are secured to 76 mm. chafing chains, which in turn are secured to the main mooring of dual 17 in. circumference nylon ropes connected to a 76 mm. chafing chain at the FSO stern.
7. During the approach of the tanker towards the stern of the FSO, the ship's crew, under the advice of the Mooring Master will prepare the forecastle for the mooring operation. This will include passing 2 messenger ropes through the centre bow fairlead, or other fairleads designated by the Mooring Master, and lowering the ends to sea level. The mooring attachments will also be prepared. Sufficient crew members must be present to handle the 2 mooring lines simultaneously.
8. Upon the close approach of the tanker's bow, the mooring boat manoeuvres alongside and attaches the mooring pick-up ropes to the ship's messenger lines. The tanker will then heave up the messengers and pick-up ropes, carefully picking up the slack as the tanker approaches the stern of the FSO.
9. The pick-up ropes should be continually hove in as the tanker nears the FSO stern. The distance between the vessels will be continuously relayed to the Mooring Master on the bridge from the forecastle and by the support vessel and mooring boat. When the pick-up ropes have been brought inboard of the fairlead, it may be necessary to adjust the direction of pull to assist the chafing chains through the fairlead. Action required of the tanker crew in this respect will be advised by the Mooring Master.
10. When the chains are inboard, depending upon the method of attachment available, the connection will be made.
11. Upon completion of the mooring operation, the support vessel will be secured to the stern of the tanker, using a ship's line, to prevent the tanker from coming into contact with the FSO. Until the support vessel is secured, it may be necessary to use the tanker's engine for this purpose. Once the support vessel is secured, the Mooring Master will then advise "Finished with Engines".

    Engines must be maintained in a constant state of readiness, and at no time during the tanker's stay at the Terminal may the engines be immobilised.

    In cases when there is a failure of a tanker's main propulsion machinery or steering gear, which renders the vessel incapable of instant manoeuvrability, the Mooring Master shall be informed immediately. Loading operations will be suspended, and the tanker will be removed from the berth. All charges incurred shall be for the Owner's account.
12. Emergency towing wires should be rigged, one on the starboard bow and one on the starboard quarter. These lines must be maintained with the eye 1.0 m. above the water line with "no slack on deck".

LOADING: *Loading Operations:*

1. On satisfactory completion of the Pre-Loading Transfer Conference and Safety Check List as agreed by the Belida Mooring Master and the export tanker officer-in-charge, the vessel will be declared ready to load. All necessary valves will be opened, the hose end butterfly valve will be opened and the Mooring Master will instruct the Terminal to commence loading at a slow rate. The rate will not be increased until the tanker has confirmed that the hose connection is tight, that cargo is being received in the selected tanks only, and that no leakage is taking place through the sea valves. Thereafter, the loading rate will be increased, on request by the export tanker, to a maximum of 50,000 b.p.h.
2. Throughout the loading, a responsible deck officer must be in charge of operations, either on deck or in the cargo control-room and in continuous contact with the FSO and Mooring Master via walkie-talkie radio. In addition, an efficient deck watch in constant contact with the cargo control-room must be maintained at all times. *Additionally, one ship's crew will be stationed on the forecastle at all times to observe and report on the mooring condition, i.e. the state of the mooring and the distance and attitude of the tanker to the FSO. The mooring hawser assembly is fitted with a load monitor and mooring weight is continuously monitored on the FSO.*
3. At any time during loading operations, the rates can be reduced on request. Except in an emergency, 10 minutes notice should be given to the Terminal when rate reduction is required. As in normal tanker practice, valves must not be closed or throttled back against the oil flow without permission from the Terminal.

   Masters are specifically warned of the severe consequences of this practice which could result in damage to Terminal equipment and serious oil pollution, for which the Owner will be held responsible.

   If for any reason, radio communication between the tanker and the Terminal is lost, the Terminal will stop the loading until communication is re-established.

   In the absence of radio contact, oil flow can also be stopped by sounding the Emergency Flow Stop Signal, consisting of continuous short blasts on the ship's whistle.
4. The volume of oil loaded is accurately available at all times from the Terminal, and periodic comparisons should be made between the tanker and Terminal figures.
5. The question of ship or Terminal responsibility to stop cargo on loading the required quantity will be discussed and agreed before loading commences, during the Pre-Transfer Conference.

   Request for the Terminal to stop the flow of cargo at pre-determined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error, and that in the case of the vessel being overloaded, the excess cargo cannot be pumped back to the FSO.

Hose Connection:

1. Upon completion of the mooring operation, the loading hose will be connected to the tanker port manifold which must be prepared to accept 1×16 in. 150 ASA flange prior to berthing. Hose connection will be made by the ship's crew under the supervision of a responsible deck officer. The Mooring Master or his assistant will advise on the correct procedures to be adopted.
2. Depending on the freeboard of the tanker, the weight of the hose string to be lifted could approach 10 tons. All tankers calling at Belida Marine Terminal must have their port derrick rigged to lift at least 10 tons.
3. The mooring boat will tow the tanker end of the hose to a position below the manifold area and connect the ship's cargo runner to the "Hose Pick-Up Chain". The hose will then be lifted to a position above the main deck, so that the "Hang-Off Chain" can be made fast to the hose bitts using a snubbing chain, such that the hose flange will closely align with the required manifold flange. The hose end will then be lowered to the deck and the blind flange will be removed. The hose flange will normally be connected to the manifold by a quick release Camlock coupling.
4. When the hose is connected, the length between the manifold and rail will be supported by a nylon sling to ensure that there is no undue strain on any part of the manifold or hose string.

High Flow Rates: Masters are provided with, and asked to acknowledge receipt of a letter warning of the serious consequences of totally or partially closing valves against the flow of oil from the Terminal. Should damage to the Terminal equipment result from such malpractice, costs of all direct and consequential damage shall be for the account of vessel's Owners, and any persistantly offending vessel will not be subsequently accepted for loading.

Hose Disconnection: Immediately prior to completion of loading, the ship's crew and one deck officer should be placed on stand-by at the cargo manifold, ready for hose disconnection. When the tanker is informed by the FSO Control that all flow has ceased, the hose end butterfly valve will be closed, followed by the tanker's manifold valve. Once the spool piece has been drained into the tanker drip tray, the hose will be disconnected from the manifold (sufficient drip tray volume must be available to contain any oil remaining in the spool piece and reducer). The hose support slings will be removed, and the blind flange will be replaced on the hose. The weight of the hose will be taken by the derrick on the pick-up chain, to allow the snubbing chain to be released from the hose bitts. The hose will then be lowered to the water, where the mooring boat will disconnect the cargo runner.

Belida Crude Oil Specification:

Gravity at 60°F	Approx. 45.0
Salt Content	N/A
B.S. & W.	N/A
Sulphur	0.02% WT
Pour Point	Approx. 60°F
Viscosity	5.64 cst. at 80°F
Reid Vapour Pressure	N/A

Cargo Documentation and Inspection:

1. Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Time/Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples, etc., are prepared at Belida Marine Terminal. When the tanker has completed loading, the document will be completed and taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time as the final departure clearance formalities are being carried out.
2. Immediately upon completion of loading, the official Bill of Lading quantity will be relayed to the Mooring Master by radio. In the event of a dispute, the vessel will then be requested to re-check the measurement and calculations of the quantity, and the Mooring Master will witness such measurement and calculations. After both ship and shore figures have been verified, should an appreciable difference still exist, receipt of a Letter of Protest will be acknowledged by the Mooring Master. To maintain "Clean Documents", Masters are not to put any notes or protest on the prepared Cargo Documents.
3. Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Conoco Indonesia Inc. The Mooring Master will acknowledge receipt of the Note of Protest only, and is not authorised to signify acceptance of such letters.
4. From time to time Owners, Charterers, Consignees, or other interested parties may appoint third party oil inspectors to survey the loading operation on their behalf. Any delays caused by such survey/s shall be considered "vessel delays".

Departure Procedures:

1. Immediately after the loading hose is disconnected, unmooring of the vessel will commence. The support vessel at the stern of the tanker will be released, but will remain on location to assist. Upon advice from the Mooring Master, the mooring hawsers will be heaved in by the tanker, and the mooring connections will be released. In some cases it may be necessary to briefly ring the engines ahead to relieve the weight on the moorings. As soon as the moorings are released, the engines will be rung astern, and the vessel will back away from the FSO. During the move astern, the mooring hawsers will be lowered into the water by easing back on the pick-up ropes.
2. When the vessel is safety clear of the FSO, the Belida Terminal mooring equipment will be taken from the forecastle to the port derrick, to be transferred to the support craft together with the hose connection equipment.
3. Any remaining cargo calculations and paperwork will be completed prior to the disembarkation of the Mooring Master. Upon completion of all formalities, the vessel will make a good lee to disembark Terminal personnel and Government Officials. Upon disembarkation of all such personnel, the vessel must clear the Terminal area as directed by the Mooring Master before his departure.

BALLAST: *Ballast Operation:* There are no ballast or slop reception facilities at Belida Marine Terminal, therefore all vessels must arrive with clean ballast suitable for discharging directly to sea in accordance with the standards set by International Conventions. Vessels arriving with ballast unsuitable for discharge to sea will be rejected for loading. Any tanker rejected because of contaminated ballast or sea pollution will automatically invalidate her Notice of Readiness, and will lose any priority of loading. Vessels discharging contaminated ballast overboard will be subject to the anti-pollution laws of Indonesia. *Penalties for Pollution are Severe.*

Vessels arriving at Belida Marine Terminal should maintain 30% of Summer d.w.t., to ensure safe handling and manoeuvrability in the prevailing weather and sea conditions and in accordance with the good practice of seamanship. *Propellers must be Immersed.*

Whenever possible, loading procedures should be so arranged as to allow for concurrent deballasting and loading operations, provided that at least 2 valve separations can be maintained. Permanent ballast should not be discharged before the vessel has loaded at least the equivalent amount of cargo.

The Mooring Master or his assistant may accompany the Independent Cargo Surveyor in witnessing the tank inspection prior to loading, but will not sign certificates attesting to the emptiness or cleanliness of tanks for loading. The ullaging of the slop tank and determination of oil content will also be witnessed.

MEDICAL: No facilities available.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: *Bonded Stores:* Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under Custom Seals from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent weight of tobacco or cigars. Special allowance is made for the Master under special circumstances. After the ship is all secured, the Customs Officer will seal the stores.

If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo onboard the tanker and attaching appropriate shipping documents.

If the tanker is arriving from an Indonesian port, Form 5-P issued at the last Indonesian port, will be retained by the Customs, and Pre-Arrival Clearance at Belida is granted. The Harbour Master will submit a Harbour Report form for the Master to complete.

GENERAL:

Services: Should it be necessary to supply divers, boats, materials, equipment or labour, to carry out repair work to enable the vessel to continue loading, any costs involved will be charged to the vessel's account at rate to be established at that time. These services will only be provided in emergencies.

Supplies: There are no bunkers, no fresh water, no small boat hire, no shore leave or shore services, and no medical assistance (except in cases of emergency) available at the Terminal. Information on port services in the area should be obtained from the vessel's Agent.

Crew Leaving: Crew members cannot leave the vessel at Belida Terminal, except in cases of emergency. Even in an emergency it should be noted that Seamen's Books may not be valid under local Government Law, and a valid passport may be required. No crew change will be permitted during the period a vessel is in the Terminal Area.

Swimming: Swimming in the sea around the Terminal is prohibited.

Alcoholic Drinks: Masters are advised that offering alcohol is strictly forbidden, and are warned of the serious consequences of offering such drinks to the Terminal staff and Government Officials who may board their vessels.

Accommodation: Members of the Terminal staff, the Mooring Master and/or his assistant, if any, will require accommodation throughout the vessel's stay in port. The Mooring Master shall be accommodated in the officers quarters, and his assistant in the crew's quarters. Meals will be taken in the appropriate mess room.

WEATHER/WIND/TIDE: *Weather Pattern:*

1. Winter – The Northeast Monsoon Season: In the Belida Oil Field area, the Northeast Monsoon becomes established during November, although in some years it may not blow regularly until December. During this period, the wind direction over the average force, when fully evolved, is about Force 4 South of Latitude 5° North and Force 5 to the North of this latitude. The wind tends to blow in successive pulsations, periods of comparatively fresh wind, followed by periods when the wind is less strong. At times the wind freshens to Force 6 or 7, while at other times it does not exceed Force 3. The frequency of Force 7 winds is estimated to be about 1% in most of this season, probably reaching 2% – 3% during December, the month of greatest frequency.
2. Summer – The Southwest Monsoon Season: From about May to October, winds are predominantly Southwesterly, mainly Force 3 or 4. Over the open sea, the Southwesterly winds can reach Force 6, but nearer the coast they are weaker and more irregular. During October, the winds become variable before the onset of the Northeast monsoon.

   Although during the Summer, monsoon wind speeds of Force 7 are rare, squalls, known locally as Ribut, in which gale force winds may be experienced temporarily are fairly common. The most dangerous type is the arch squall, which is preceded by clouds rising from the horizon in the form of an arch, heavy rain is usual when the arch is passing overhead.

Currents: The surface currents of the Natuna Sea in the Belida Oil Field area are wind generated, and currents therefore will be in the direction of the prevailing monsoon. These currents will generally exceed one knot and on occasions exceed two knots.

Typhoons: The Natuna Sea area is not normally affected by typhoons.

Tidal Streams: Tidal streams can be expected to reach 1.5 knots during Spring tides.

Relative Humidity: This is high over the area for most of the year, averaging about 90% – 95% in all months at 0700 hrs., and falling to about 70% – 74% by 1300 hrs.

Temperature: The average air temperature is high throughout the year. April is the warmest month with a mean daily air temperature of about 88°F. January is the coolest month with a mean daily temperature of 68°F.

The average sea temperature typically lags 1 to 2 months behind the air temperature with warmest mean temperatures in June/July of 85°F and coolest mean temperatures in January of 65°F.

Fog and Visibility: Fog is rare throughout the area. However, during rain squalls visibility can be extremely limited.

Rainfall: Average annual rainfall in the Belida area is about 100 in. Rainfall is most abundant from about October to January, i.e. at the onset and in the early part of the N.E. Monsoon. However, thunderstorms and heavy rain squalls occur frequently throughout the S.W. Monsoon.

AGENCY: *Procedure for Appointing Agent:* Indonesian Government Regulations require that Pertamina Directorate of Shipping and Telecommunication be appointed General Agent for all tankers proceeding to load in Indonesia.

Address : Pertamina Directorate of Shipping and
Telecommunication
Attention: Agency Department
19th Floor, Pertamina Building
Jl. Medan Merdeka Timur 1A
Jakarta, Indonesia
Cable address : Pertaminaship 1A
Telex No. : 44450 and 45348
Telephone No. : 3816305, 3816358, 3815157, 3816317.

For vessels arriving for the first time in Indonesian waters, Owners and Charterers are requested to appoint Pertamina Directorate of Shipping and Telecommunication Agency Department as General Agent to attend the vessel at Belida Marine Terminal by Letter of Appointment. This Letter of Appointment must be endorsed by the nearest Indonesian Consulate to point of dispatch of the letter, and must be sent at least 2 weeks prior to ship's arrival. The above applies also to vessels which may have changed their name and vessels from whom the Letter of Appointment has expired. Owners or Charterers can attach a list of vessels under their management/control which are scheduled for operating in Indonesian waters. In such cases, the single Letter of Appointment will be valid for all ships named in the letter.

Letters of Appointment have a validity of one year, after which they must be renewed. Each tanker entering Belida Marine Terminal must have requested and been granted an entry or agency permit prior to its arrival. It is vital that the General Agent received the following information 2 weeks before vessel's arrival, to enable the necessary permits to be obtained from the Government Directorate General of Sea Communications:

(a) Name and full address of Owners.
(b) Name of tanker and call sign.
(c) Deadweight tonnage and length overall.
(d) Flag and Port of Registry.
(e) Certificate of Registration Number.
(f) Name of Master.
(g) Number of crew.
(h) ETA at Belida Terminal Anchorage Area
(Lat. 04° 11' 15.0" N., Long. 105° 05' 47.0" E.).
(i) Last Port of Call.
(j) Intended Indonesian Ports of Call.
(k) Destination after loading.
(l) Quantity and types of Crude Oil to be loaded.

Advance Payment: Advance payment for Agency and Government Charges should be made to:

"Pertamina Agency"
Account No. 0089-690 384 020
Bank Negara Indonesia
Cabang Gambir
Jl. Kebon Sirih 77A
Jakarta – Indonesia
Telex: 44450-45348

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate of Shipping and Telecommunication", advising Telegraphic Transfer (T.T.) Number, the name of the vessel for which the T.T. is made and Indonesian Port of Call. In those instances, where advance payments exceed the actual Port Charges and disbursements, the balance will be credited to the Owners/Charterers' accounts or remitted by the Agent. Neither Pertamina nor Conoco Indonesia Inc. will be responsible for demurrage, expenses, or other charges resulting from failure to pre-arrange obligations in this manner.

SHIPMASTER'S REPORT: February 1993.

Operator: Conoco Indonesia Inc.

Cargo: Specifications of Belida Crude Oil at date of loading:

API at 60°F.: 46.2.
Salt Content: N/A.
B.S. and W.: 0.
Sulphur: 0.02% WT.
Pour Point: 50°F.
Viscosity: 5.64 cst. at 80°F.
Reid Vapour Pressure: N/A.
Loading Temperature: 38.5°C.

Terminal Limits: DPPA (Wellhead Platform):
Lat. 04° 08' 38.19" N., Long. 105° 06' 30.27" E.
Calm/FSO:
Lat. 04° 07' 57.30" N., Long. 105° 07' 43.09" E.

A prohibited area is established – bounded within a radius of 500 m. from a line joining the above positions. Vessels shall not enter this area without a Conoco Mooring Master on board. In an area within a radius of one nautical mile from a line joining these points, anchoring of vessels is strictly prohibited.

Terminal: Belida Terminal presently consists of a Drilling and Production Platform A (DPPA). There is a flare on the DPPA, which is visible from a great distance. It has a helipad. There are plans for installation of 3 more platforms.

Radio: Initial communication is on VHF Channel 16, call sign "Belida Terminal". Working channel is VHF Channel 9.

Anchorage: Anchorage area is centered in the following position:
Lat. 4° 11' 15.0" N., Long. 105° 05' 47.0" E., which is the centre of a circle with radius 1.0 miles. Holding ground is good. Water depth approximately 250 ft.

FSO: The floating storage and offloading facility (FSO), named "Intan", is a converted 178,000 d.w.t. tanker, LOA 300 m., storage capacity 1,250,000 bbls.

The "Intan" has a helicopter platform at her stern. A Racon (U) is fitted on the bridge on the vessel and the vessel is moored to an SPM. Water depth in the area is approximately 250 ft.

At the stern of the "Intan" are the mooring ropes and floating cargo line.

2×17 in. circumference nylon mooring lines, 70 m. long, and to OCIMF standard, with a load cell are fitted. For vessels of our size (83,000 d.w.t.), only one mooring rope is used, made fast on the AKD stopper.

The oil from the "Intan" flows through a metering system before reaching the 20 in. diameter floating string (total length of 1,200 ft.).

Mooring to the "Intan" is done in tandem. Messenger line from the approaching vessel is made fast to the end of the pick-up line, which is held in a launch/dinghy. Mooring is done in the normal SPM way.

A tug makes fast at the stern of the vessel by means of a ship's line.

Restrictions: No berthing between 1600 hrs. and 0600 hrs. local time (approx.). No restrictions on unberthing.

Time: GMT plus 7 hours.

Max. Size: 50,000 d.w.t. – 230,000 d.w.t.

Deballasting: Maintain 30% deadweight throughout the operation.

Manifold Size: 16 in.

Max. Loading Rate: Through 1×16 in. hose – 32,000 bbls/hr.

Pilot: Pilot boards close to anchorage after anchor is aweigh. One of the available supply vessels acts as pilot vessel.

Authorities: Customs, Immigration, Health, Harbour Master and Agent all board the vessel after she is moored.

"Q" flag and "N" flag (Immigration) should be displayed till clearance is granted.

Documents:

1 copy Declaration of Health.
10 copies Crew List.
1 copy Vaccination List.
5 copies Personal Effects List.
5 copies Bonded Stores List.
5 copies Stores List.
2 copies Ship's Particulars.
5 copies List of Narcotics.
5 copies Cargo Manifest.
1 copy Outward Clearance from Last Port.

The Outward Clearance is received during the visit of the Authorities.

During the loading operation, only the Loading Master/Mooring Master remains on board.

Documents are received approximately 30 minutes after completion of ship's calculations. They are prepared on board the "Intan".

After completion of documents the vessel can sail.

AUTHORITY:

Conoco Indonesia Inc. – Conoco Indonesia Inc. is a wholly owned subsidiary of Conoco International Inc., Houston, Texas, and the operator for a group of oil companies having a working interest in the contract area designated as the Belida Oil Field (Block "B") in the Natuna Sea, which is held by the group together with Pertamina, the State Owned Oil Company, under a Production Sharing Contract. The group consists of the following companies:

1. Pertamina,
No. 1, Jalan Medan Merdeka Timur,
Jakarta, Indonesia.
2. Conoco Indonesia Inc.,
Menara Mulia 3rd–5th Floor,
Jalan Jenderal Gatot Subroto, Kav. 9-11,
Jakarta 12930, Indonesia.
3. Conoco International Inc.
P.O.Box 2197,
Houston,
Texas 77252, USA.
4. Texaco Block B South China Sea Inc.,
2000 Westchester Avenue,
White Plains,
NY 10650, USA.
5. Inpex Natuna Ltd.,
No. 8-10, 2-chome,
Toramon, Minota-ku,
Tokyo 105, Japan.

Conoco Indonesia Inc., as the operator of the group, produces crude oil from the Belida Field, Natuna Sea, known as "Belida Crude Oil", and delivers the crude oil to tankers for export to world markets.

Nomination: Tanker nominations for Belida Crude Oil liftings are coordinated through Conoco International Inc. (Singapore Branch), Singapore (Telex: RS 50645 CII. Fax: (65) 3450792) and Conoco Indonesia Inc., Jakarta.

Tanker scheduling is coordinated for all the partners by Conoco International Inc., Singapore and Conoco Indonesia Inc., Jakarta.

BENGKULU (Pulau Baai): 03.46 S. 102.16 E.

(See Plan)

LOCATION: The Port of Pulau Baai is located approximately 20 km. South of Bengkulu.
PILOTAGE: Compulsory.
ANCHORAGE: Vessels anchor in position 03° 47.5' S., 102° 11.5' E.
RESTRICTIONS: The fairway is 800 m. in length and 400 m. wide. Depth of fairway 10.0 m. at LWS.
MAX. SIZE: 12,000 d.w.t. Max. draft 9.0 m.
RADIO: Bengkulu Coastal Radio Station, call sign PKC 53.
VHF: Bengkulu Coastal Radio Station on Channels 16 and 12 (24 hours).
TUGS: 1×250 h.p. tug.
BERTHING: There is a concrete wharf for ocean going vessels. Length of wharf 165 m. Depth alongside 10.0 m. at LWS.

There is a domestic wharf for small vessels. Length of wharf 124 m. Depth alongside 4.0 m. at LWS.

Storage: There is a godown at the ocean going wharf of 2,450 sq.m. and a godown at the domestic wharf of 1,750 sq.m. There is also an open storage area of 5,413 sq.m.

CRANES: 2×4 – 25 tons mobile cranes. 5×3 tons fork lifts.
STEVEDORES: Available from the labour pool (YUCA).
MEDICAL: Hospital available.
FRESH WATER: Fresh water is available in limited quantities.
FUEL: Available.
REPAIRS: No facilities for repairs.
GENERAL: There is a barge with capacity 150 tons.
AUTHORITY: Harbour Master. *Tel:* 31344/31409.

BENOA: 08.45 S. 115.13 E. (See Plan)

PILOTAGE: Compulsory. Pilot boards at the anchorage and during daylight only.

ANCHORAGE: Vessels anchor in position 08° 46' 20" S., 115° 14' 30" E. Depth of water in the anchorage 12.0 m.

RADIO: Benoa Coastal Radio Station. Call sign PKD-5.
Frequencies: 6,945 kHz. and 500/487.5 kHz.
Class emission: A1 – 0.05 Kw.

TUGS: There are 2 tugs available but they are used for cargo operations only.

BERTHING: There is one pier with a length of 206 m. and a depth of 6.0 m. at LWS. There is also a wooden pier with a length of 22.5 m. and a depth of 6.0 m. at LWS.
Storage: There is a godown with an area of 1,128 sq.m.
Fork Lifts: 2×3 ton capacity fork lifts available.

STEVEDORES: Stevedores are available from the labour pool.

MEDICAL: Hospital facilities available.

TANKERS: Tankers for Pertamina berth at the wooden pier.

FRESH WATER: Available.

FUEL: High speed diesel available in limited quantities.

REPAIRS: There are no facilities available for repairs.

GENERAL: No barges available locally.

BIAK: 01.10 S. 136.05 E. (See Plan)

PILOTAGE: Compulsory. Pilot boards vessel at the anchorage. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.

ANCHORAGE: Vessels anchor in position 01° 12' 12" S., 136° 05' E.

RESTRICTIONS: Maximum draft for entering channel is 11.0 m.

RADIO: Biak Coastal Radio Station. Call sign: PKY2.
Frequencies: 2,182 kHz and 6,215 kHz (J3E) and 8,366 kHz (A1).

VHF: Biak Radio (8 ATZ) on Channels 16, 12 and 14.

TUGS: Available.

BERTHING: There is a concrete wharf, length 142.0 m., breadth 15.0 m. and depth alongside 12.0 m. at LWS. There are mooring buoys off the East end of the wharf.
Storage: There is a godown of 3,800 sq.m. and open storage area of 2,625 sq.m.
Fork Lifts: 3 fork lifts with capacity 1.5 tons – 3.5 tons.

CRANES: 1×12 ton mobile crane.

STEVEDORES: Stevedores are available from labour pool U.K.A., this is arranged by Agent.

MEDICAL: Hospital facilities available.

FRESH WATER: Fresh water available alongside the wharf. Pumping rate 4 t.p.h.

FUEL: Limited supplies of high speed diesel available.

REPAIRS: There are no facilities for repairs.

BIMA: 08.25 S. 118.42 E.

DOCUMENTS:
6 Crew Lists.
6 Vaccination Lists.
6 Stores Lists.
6 Passenger Lists.

PILOTAGE: None available.

ANCHORAGE: 300 m. off the quay in depth of 16 m.

RESTRICTIONS: None, vessel may enter harbour day or night.

MAX. SIZE: Not limited at anchorage.

RADIO: Coastal Radio Station, cable address "Pelni Bima" by Post Office.

TUGS: No tugs available.

BERTHING: Entering and sailing allowed after dark. No berthing facilities except for very small ships.

STEVEDORES: Ordered by Agent. No work allowed on Muslim holidays, New Year and 17th August.

MEDICAL: 1 government hospital available.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: None available, Police and Customs officers posted on board.

OPENING/CLOSING HATCHES: Carried out by stevedores.

AIRPORT: Flights from Bima to Sumbawa, Ampenan and Bali by AOA Zamrud (Dakota) every Sunday, Tuesday, Thursday and Saturday.

TIME: GMT plus 8 hours.

HOLIDAYS: Muslim holidays, New Year, 17th August.

TELEPHONES: No phone connections between ship and shore available.

SHORE LEAVE: Crew members are allowed to go ashore and arranged by Agents.

GENERAL: 1 motor-boat, 4 lighters each of 15 tons and 1 lighter of 25 tons. Loading general cargo, live buffaloes and fodder. For heavy cargo max. 7 tons each lift can be handled through lighters.

BIMA MARINE TERMINAL: 05.46 S. 107.04 E. (See Plan)

LOCATION: Bima Marine Terminal is an open, unsheltered mooring in the Java Sea, located approximately 020°×24 nautical miles from Jakarta.

There are 3 standard type Single Buoy Moorings situated as follows:

1. "Citra Ayu" SBM (Buoy No. 7, Storage Tanker Buoy).
   Lat. 05° 46' 02" S., Long. 107° 04' 14" E.
2. Storage/Export SBM (Buoy No. 8, as standby SBM).
   Lat. 05° 45' 25" S., Long. 107° 04' 52" E.

This SBM can be used either as a storage tanker buoy or as the export tanker buoy whenever required.

3. Export SBM for tankers loading from "Citra Ayu" (Buoy No. 9).
   Lat. 05° 44' 49" S., Long. 107° 05' 29" E.

"Citra Ayu" is a chartered storage tanker used as the main floating storage and export facility at Bima Terminal.

THE FOLLOWING ITEMS ARE OF PARTICULAR IMPORTANCE:

1. No dirty ballast.
   Tankers with dirty ballast will be rejected and will have to tender a new Notice of Readiness upon second arrival.
2. No shore leave.
3. No crew changes. If emergency conditions prevail, for humanitarian reasons, exception to the foregoing may be permitted. All expenses incurred will be for ship's account.
4. No stores available.
5. No clinic available.
6. The laws of Indonesia govern this terminal and all personnel are urged to abide by them.
7. During daylight hours the Indonesian Flag must be flown throughout the vessel's stay in port.
8. Bima Terminal time is GMT plus 7 hours throughout the year.
9. *No bunkers are available.*
10. Pertamina Directorate of Shipping and Telecommunications Jakarta handles all Agency matters for tankers.
11. The unit of currency is the Indonesian Rupiah.
    The rate of exchange varies from time to time. The Master can obtain the current exchange rate from the Agent.
12. There are no Consulates available at Bima Marine Terminal. However, there are many Embassies and Consulates represented in Jakarata.
13. Language of the port is English and Indonesian.
14. Only authorised personnel or visitors are permitted on the storage barge and/or export tanker.
15. No fresh water is available.
16. No slop tanks are available.
17. The crude oil testing laboratory is equipped to perform the following tests: API Gravity, B.S. & W, Pour Point and RVP. Any additional tests that may be required will be performed in Jakarta.
18. For convenience, mail for personnel on incoming tankers may be sent to the Pertamina Agency Jakarta Office for delivery to the tanker when it arrives at the Bima Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

DOCUMENTS: The Agent prepares the Ship's Documents Check List Form to check the validity of each document.

These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telegraphy Certificate, Cargo Gear Certificate and Derat Certificate or Derat Exemption Certificate. This List is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port.

The Harbour Master issues a Port Clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian Port Clearance for Panamanian Flag vessels is not required at Bima Terminal.

The Immigration Officer requires 2 copies of the Crew List and will check the ship's articles and the passports of the crew. When these documents are found to be in order, an Arrival Clearance will be marked on the Crew List.

Cargo Documentation: Documents such as Bills of Lading, Certificate of Quality, Certificate of Quantity, Dry Certificate, Ullage Certificate, Loading Time Report, Certificate of Origin, Cargo Manifest and Master's Receipt of Documents/Samples, etc., are prepared at the Terminal.

When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta.

Please note that the Mooring Master will *acknowledge receipt of the Note of Protest only and is not authorised to accept such letters.*

Departure Procedure: Prior to the vessel's departure, the Immigration Officials require 6 copies of the Crew List to be marked for "Departure Immigration Clearance", and duly signed, it will be distributed as follows:

Master of the vessel	1 copy
Harbour Master	1 copy
Customs	1 copy
Pertamina Agent	1 copy
Immigration	2 copies

Upon presentation of the Crew List which is signed and marked for Departure Immigration Clearance the Harbour Master will issue the Port Clearance.

Final clearance formalities will be carried out aboard the tanker after completion of loading.

Before leaving the terminal area the Master should advise the terminal the vessel's ETA at destination through the Mooring Master.

APPROACHES: Approach information can be obtained by radio from the terminal. Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in close vicinity of the mooring area.

In addition to the 3 single point mooring buoys for export tankers and the storage tanker, oil wells and production structures are located South from the storage barge which constitute a hazard to navigation for mariners.

SBMs, Storage Barge and Structures within Bima Marine Terminal area display the following characteristics:

(1) *Storage: "Citra Ayu" and SBM (Buoy No. 7):*
By day, the black ball as required by Rule 30, paragraph A of the Regulations for Preventing Collisions at Sea. Storage barge at night displays the lights for a tanker at anchor as required by the Regulations for Preventing Collisions at Sea and is equipped with automatic fog signals at the bow and at the stern.
The "Citra Ayu" SBM (Buoy No. 7) shows a white light flashing every second, visibility 5 miles.

(2) *Standby Storage/Export SBM and Export SBM (Buoys No. 8 and 9):*
(a) A white light flashing every second, visibility 5 miles, mounted on the rotating deck of each SBM. All Export SBMs are fitted with radar reflectors.
(b) 1 yellow coloured light buoy marked with yellow cross on top and yellow coloured light flashing period 2 seconds (0.5 second flash + 1.5 dark), 4 miles visibility equipped with radar reflector.
Position of the light buoy: Lat. 05° 41' 10" S., Long. 107° 07' 20" E.

(3) *Crude Oil Production Platforms Facilities:*
There are 5 crude oil production platforms, 32 wells, 1 processing platform and 1 quarters platform within the Bima Marine Terminal Area.
P.A. Lat. 05° 47' 15.0" S., Long. 107° 04' 00.0" E.
P.B. Lat. 05° 47' 42.5" S., Long. 107° 02' 28.0" E.
P.D. Lat. 05° 46' 39.8" S., Long. 107° 02' 12.5" E.
P.E. Lat. 05° 47' 16.0" S., Long. 107° 02' 04.0" E.
P.F. Lat. 05° 48' 07.0" S., Long. 107° 01' 48.0" E.
PCP (Process Platform)
Lat. 05° 47' 17.0" S., Long. 107° 03' 02.0" E.
PCS (Quarters Platform)
Lat. 05° 47' 19.0" S., Long. 107° 03' 04.0" E.

In addition to the above specified obstructions and navigational aids, all platforms display interrupted quick flashing white lights.

The storage barge, flow stations, and quarters platform will brightly illuminate the areas around them at night through the use of normal working lights.

PILOTAGE: Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the terminal using the International Marine Calling and Safety Channel 16 (156.8 MHz) for terminal instructions.

The Mooring Master will act on behalf of the company to acknowledge receipt of tanker's Notice of Readiness.

Masters of tankers are reminded that due to operational reasons, ship's Notice of Readiness (N.O.R.) will not be accepted between the hours of 1630 and 0530 unless the company, in order to accelerate ship's turn-around time, is willing to accept same. In any case, N.O.R. will not be accepted for a time earlier than when;

(a) The Master has received the Mooring Master onboard.
or
(b) The tanker has anchored within the recommended anchorage area, and has advised the terminal the time of anchoring.

Exception to (a) and (b) above will be if the tanker is within the anchorage area awaiting arrival of the Mooring Master and has been requested by the terminal not to anchor. In this case N.O.R. will be accepted from the time the terminal requested the ship not to anchor.

In order to meet safe and efficient marine operations, tankers are recommended to arrive during daylight hours. However, if on ship's arrival the required Loading Clearance is not yet received at Bima Marine Terminal then, in this case, the acceptance of N.O.R. will be the time when such clearance is received on the storage tanker "Citra Ayu" or whenever the tanker is secured.

The Company reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading even though the berth may be open to other tankers.

The decision of Atlantic Richfield Indonesia Inc.'s Terminal Section Manager or his designated assistant to berth or not to berth a tanker shall be final.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area Northeastward from the single point mooring buoys enclosed by a line drawn through the following positions:

A. Lat. 05° 43' 00" S., Long. 107° 06' 00" E.
B. Lat. 05° 41' 30" S., Long. 107° 07' 10" E.
C. Lat. 05° 42' 50" S., Long. 107° 08' 37" E.
D. Lat. 05° 44' 20" S., Long. 107° 07' 28" E.

Prior to arrival Masters of tankers should contact the terminal for instructions concerning anchorage positions.

Refer to "Radio" for further instructions.

Under no circumstances should an export tanker enter the Restricted Area without a company Mooring Master aboard.

The attention of Masters is drawn to the existence of underwater pipelines in the Restricted Area.

RESTRICTIONS: Berthing during daylight hours only. Maximum distance bow to manifold is 500 ft.

MAX. SIZE: 250,000 d.w.t. Depth of water in approaches and at buoys is 110 ft.

HEALTH/IMMIGRATION/CUSTOMS: See "General" before first port.

RADIO: *Advice of Arrival by Cable or Telex:* It is important that all incoming tankers advise Bima Marine Terminal 72 hours and 48 hours before ETA, giving the best estimate of ship's arrival at the terminal, via:

Cable Address: Ardjak, Terminal Section, Jakarta
Telex: 011-47390 Jakarta.

Time to be used for ETA is "Golf" (local) Time Zone of GMT plus 7 hours throughout the year. The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time. (Note: if a separate/permanent ballast system is fitted, ability of ship to load crude oil and discharge ballast simultaneously must be stated.
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation required, advise number required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Bima Marine Terminal via the above cable address or telex number when the tanker is 24 hours and 12 hours distant from the terminal and any other time, if any appreciable change occurs in the original ETA or subsequent ETA's.

RADIO COMMUNICATIONS:

(1) VHF/FM Radio Telephone: (International Marine Calling and Safety Channel 16. Frequency 156.8 MHz).

Masters are recommended to use this system when they arrive within radio range of Bima Marine Terminal, particularly when approaching the port, if poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the only means of avoiding delay in berthing.

During berthing, the ship's radio will be under the sole control of the Master, and the storage barge radio will be under the sole control of the Terminal Superintendent or his assistant. Masters are reminded that if tankers are requested to anchor to await berthing, *it is their responsibility to maintain constant listening watch on VHF Channel 16* to receive terminal instructions.

Any delay due to failure to maintain a constant watch on Channel 16 will be for the ship's account, and will not be included in Calculation of Lay Time.

Bima Marine Terminal is equipped with VHF/FM Radio-telephone sets and continuous watch is maintained on Channel 16 (156.8 MHz) and frequency 157.725 MHz.

Tankers approaching the terminal should make initial contact on Channel 16. For subsequent inter-ship communication within the terminal a "Handie Talkie" VHF radio frequency 157.725 MHz will be used by the Mooring Master. This frequency will not be for general purpose use, unless clearance is obtained by the terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the terminal of the radio failures. Upon hearing this signal from a loading tanker, the storage barge will immediately stop loading to the Export Tanker until communications have again been established.

(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is inter-connected to Bima Marine Terminal via local communications system and maintains a continuous watch on HF frequency 7320 kHz (upper side band A3J mode. 100 watts, vertical whip antenna, call sign "8GJ9").

(3) Pertamina Control Radio Stations – HF/SSB: In the event incoming tankers are not able to contact Bima Marine Terminal on the foregoing VHF/FM frequencies or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, call sign "PKI 2" may be contacted on HF/SSB using the following frequencies and during the following service hours:

Frequency (kHz)	*Hours (GMT)*	*Keep Watch (kHz)*
452	0000 – 2400	500

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta, c/o Terminal Section during office hours and radio operator after office hours, by Tel: 737474 (18 lines), or by Pertamina internal telex system number 18 which is the designated number for Atlantic Richfield Indonesia Inc.

Also see "General" before first port.

TUGS: *Mooring Launches:* For running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker, 1 suitable mooring launch will be available.

There is also 1 tug available to assist mooring/unmooring and to transport Government Officials to and from the export tanker as required.

BERTHING FACILITIES: *Single Buoy Mooring for Export of Crude Oil:* SBM No. 8 is designed with double function capability i.e. as a storage SBM and an Export SBM. SBM No. 8 is designed, during reasonable weather conditions, to handle export tankers up to 250,000 d.w.t. Export SBM No. 9 is designed to handle tankers up to 250,000 d.w.t., weather permitting. Each of the above loading buoys is equipped with a dual 24 in. circumference floating braidline mooring rope together with anti-chafe chains (length 26 ft.), so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy.

The crude oil loading hoses are to be connected to the ship's manifold on the port side of the export tanker. Tankers arriving are requested to have the derrick on the port side raised and rigged, ready to lift aboard the terminal equipment.

Crude oil tankers are loaded through 2 strings of 20 in. I.D. floating hoses extending from each Export SBM, connected to the tanker's manifolds by rail hoses of 16 in. I.D. All crude oil tankers not having 16 in. hose connections should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On Export SBM's No. 8 and No. 9 the length of the hose strings is 900 ft.

For crude oil tankers intending to load at Bima Marine Terminal, the distance from the bow to the loading manifold should not exceed 500 ft.

The minimum loading rate at Bima Marine Terminal for crude oil tanker is 15,000 bbls.p.h. Any tanker arriving unable to receive crude oil at the above rate may be rejected. The storage barge loading to tankers on SBM No. 8 or No. 9 can accomplish a maximum loading rate of approximately 35,000 bbls.p.h. through meters.

In order to save time as well as to make the berth available for others, it is requested that ships receive crude oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons, it is advisable to have the ship half loaded as soon as possible. Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of crude oil flow is almost immediate.

Masters are also advised that the minimum quantity tankers can load at Bima Marine Terminal is 100,000 bbls. and the maximum is 1,200,000 bbls. At the sole discretion of the Terminal Manager or his designated assistants and based on written request from the Master/Offtakers, tankers may be allowed to load up to 1,500,000 bbls. 45%. However, if the quantity to be loaded exceeds 1,200,000 bbls., Offtaker/Shipowner(s) will be required to state that they waive any demurrage incurred due to waiting on cargo and/or berth for loading.

Storage Tanker "Citra Ayu": The Company's Main Offshore Terminal Administrative Office, Storage and Laboratory for testing crude oil stock at Bima Terminal is a 236,000 d.w.t. storage tanker named "Citra Ayu" of Bahamian registry.

Overall length of the barge is 1,067 ft., and total crude oil capacity 1,608,000 gross barrels.

Crude oil from the "Citra Ayu" is delivered to tankers through Positive Displacement Meters, of which there are 4, each having a maximum capacity of 12,500 bbls.p.h.

The "Citra Ayu" is moored to SBM No. 7 in position Lat. 05° 46' 02" S., Long. 107° 04' 14" E.

Export tanker loading crude oil from "Citra Ayu" will be moored to SBM No. 9 or SBM No. 8.

Position of SBM No. 9: Lat. 05° 44' 49" S., Long. 107° 05' 29" E.
Position of SBM No. 8: Lat. 05° 45' 25" S., Long. 107° 04' 52" E.

Zu-Bima Crude Specifications:
API Gravity at 60°F: 20.4 – 18.5
Reid Vapor Pressure: 0.7 – 0.9
Sulphur, % Wt.: 0.10 – 0.14
Kinematic, Viscosity at 100°F: 218.7 – 692.1
Pour Point: 30°F – 50°F
Carbon Residue, % Wt.: 4.75 – 8.29
B.S. & W, % Vol.: 0.10 – 0.60
Flash (TCC): 12.6°F – 144°F

MOORING/LOADING/UNMOORING: Bima Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances at the sole discretion of the Company Terminal Superintendent, night berthing may be allowed if all conditions are favourable.

Unmooring will be carried out at any hour.

Tankers to be moored or manoeuvred at Bima Marine Terminal will be boarded within the anchorage area by the Company Mooring Master. Under normal weather conditions if a tanker is scheduled to berth on arrival, the Mooring Master will board such vessel in close vicinity of the mooring area.

All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the tanker being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safe and proper manoeuvring of his vessel.

The ship's Master or one of his designated and qualified deck officers, must be on the navigating bridge at all times while the vessel is being manoeuvred.

The Mooring Master will report unsatisfactory conditions to the Company Terminal Superintendent who may in turn, reject the tanker until corrections are fully made. All costs accruing therefrom will be for the vessel's account.

Before loading, the tanker's cargo tanks are to be inspected and if suitable for loading crude oil, a notation signed by both the Terminal Representative and Vessel's Master to this effect will be made on the Company Dry Certificate.

The Company Terminal Superintendent or his designated assistant, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions.

Various combinations of wind, sea and tidal conditions also the size, length, ballasted trim and handling qualities of a vessel can affect the decision to berth a vessel at Bima Marine Terminal. All these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Bima Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used Lay Time when compiling vessel's turn around time.

Request for the terminal to stop the flow of cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage barge. The ship's Master will also be held responsible for any spills caused by this request.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area.

Unauthorised radio communications will cause cessation of all operations except clearing of the berth, and the vessel's Notice of Readiness will be immediately nullified.

The Master of each tanker will be given a copy of the *Conditions of Port Use of Bima Marine Terminal* which he will be required to sign before the vessel proceeds to berth.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the products being handled, weather conditions and any other circumstances requiring special care or caution.

Ships are requested to have a pilot ladder safely and securely rigged ready for immediate use and long enough to reach the Mooring Master's launch.

A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel, boarding the vessel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large tankers.

A light line should be ready to take aboard the Mooring Master's equipment.

Tanker will provide a broad lee for the Mooring Master both when boarding and leaving the ship. Adequate explosion proof lighting at night must be provided near the pilot ladder and manifold connection area. During loading, overside lighting must be provided in the vicinity of sea valves and floating hoses.

During a tanker's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern on each quarter of the vessel. These wires shall be secured on the inboard bitts to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted.

It is absolutely essential that extremely careful supervision be exercised by officers of all tankers while loading operations are in progress.

A responsible ship's officer is required to be on duty continuously while the tanker is being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended on loading tankers. The Mooring Master at any time, may direct an additional ship's line to be secured to the buoy and this line to be hove up or slackened off under the supervision of a responsible ship's officer so as to prevent the vessel overriding the buoy. *At all times sufficient crew must be available* to carry out under the supervision of a responsible officer instructions given by the Mooring Master.

Masters of loading tankers are advised that raising, lowering, connecting and disconnecting of oil loading hoses as well as other labours and duties on board connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed *by the ship's crew directed by a responsible officer* as required by the Mooring Master. Loading of crude oil tankers is through 2×20 in. I.D. hoses with 150 A.S.A. flange rating. The weight of each hose is approximately 4 tons.

All tankers loading crude oil at Bima Marine Terminal must be able to connect the 16 in. hoses to their manifolds. Masters are strongly reminded, that it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 16 in.

Preparations for mooring will be advised by the terminal through VHF communication prior to tanker's arrival or by the Mooring Master before the mooring operation commences.

Crude oil tankers are required to have ready:

1. On the port side: a derrick of a least 10 tons safe working load rigged with a second topping lift ready to pick up the mooring and hose connecting gear from the Mooring Master's launch. This derrick will be subsequently used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.

2. On the forecastle: at least 6 good ship's mooring lines shall be required. 2 of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM. The 4 remaining ship's lines will be laid out 2 on either side of the foc'sle deck, eyes about 3.5 m.

distant from the fairleads as advised by the Mooring Master. When the terminal mooring lines have been hove up and anti-chafe chains are about halfway through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain so that in the final position of mooring, the tanker is tied to the SBM using the terminal mooring lines/chains made fast to the ship's bitts by means of the ship's own lines. This will be backed up by 2 wire strops each 30 ft. in length and 2 in. diameter.

These wires will be provided by the terminal to be used as preventer wires. These two wire strops will not be used as the permanent mooring system.

Their purpose is to hold the ship safely moored in the event one or more of the ship's lines parting until the crew can replace such lines.

EQUIPMENT: *Export Tanker Gear and Equipment:* A ship may be rejected, if upon inspection, it is not properly equipped, or if it is not suitably manned, or if its tanks are not suitable for the cargo, or if in the case of crude oil tankers the ballast is dirty.

A vessel is suitably manned if it has a full complement of qualified officers and crew all of whom are sober, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships or partly inoperative ships will be rejected. Should a ship become inoperative or partly inoperative while secured to a single point mooring buoy, it will be removed at the ship's expense.

No repairs to main engines or other essential equipment or machinery while secured to an Export SBM may be carried out, unless with the permission of the Terminal Superintendent or his designated assistant.

Crude oil tankers must lift the export hoses from the water to connect with the ships manifold by means of their own derricks and using their own crew.

A vessel must have both bow anchors in good working condition. Both bow anchors and anchor cable must be of a size and standard to meet either "Lloyds" or "A.B.S." requirements, even though they may in fact, be classified by other societies.

All vessels must have ready on deck suitable stoppers for, manila, synthetic lines and wires used for mooring purposes.

All vessels must have suitable winches/capstans in good working order.

Such winches or capstans must have sufficient power to heave in the 18 in. terminal mooring lines as required by the Terminal Mooring Master. Tankers must have the capacity to heave up the 24 in. braid lines used to secure them to the Export SBM's. Power supply to all deck machinery must be maintained throughout the period the ship is secured to the Export SBM. Failure to comply with this requirement will result in cessation of loading and delay and expense so caused will be for the ship's account. To assist in vessel's turn around, ships should have all necessary gear ready on arrival. Crude oil tankers must have the cargo derrick on the port side raised with cargo gear rigged and ready before the ship is boarded by the Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom. Masters of crude oil tankers are reminded that the hose connecting operation will normally be carried out while the ship is deballasting.

The cargo derrick required to raise the hose from the water, must have sufficient length of strong lifting wire runner on the winch drum to enable the cargo hook to reach the water and still have adequate turns of wire left on the drum.

BALLAST: *Disposal of Ballast:* Owners and Masters are responsible to observe International Convention Laws and Indonesian Government Regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

No facilities are available for disposal of dirty ballast.

It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

The categories of pollution include oily water from bilges, crude residue from previous voyages or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

As soon as practical after arrival, all tankers will be inspected by a Bima Marine Terminal Official for dirty ballast. During discharge of ballast, similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection or during loading it is found that the ship's tanks are not tight or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking it will not be accepted for loading unless satisfactory evidence of repair, duly certified by Lloyd's or A.B.S. Surveyors or other recognised Surveyors, is submitted. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from ship. Drip pans, sawdust, dispersent, etc., should be ready for use at all times especially when disconnecting hoses in order to avoid any spillage of oil overboard.

Notice of Readiness will automatically be nullified for any tanker rejected because of dirty ballast or sea pollution and such tanker will lose priority of position for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal and by a knowledge of the behaviour of his own ship, a Master may come to the terminal with minimum safe ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the Company Terminal Superintendent or his assistant.

Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on board and treating these washings with chemicals.

The result is that no oil is discharged into the sea and the separated oil is collected in a slop tank. With the written permission of lifting companies, the terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea. Masters are required to certify in writing the quantity of slops remaining on board (if any). If they intend to load crude oil on top of the slops, it must be clearly stated. The Mooring Master will confirm the amount stated in writing by ullaging and calculating the slops to ensure the amount declared is correct.

Provided agreement is reached on the amount of slops the Mooring Master will confirm the amount of slops on the Dry Certificate.

Note: Separate "Slop Certificate" signed by Chief Officer witnessed by the Mooring Master is required to substantiate calculation.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be immediately suspended and will not be resumed until the oil is cleaned up and removed from the decks of the vessels and/or from the surface of the sea and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Bima Cargo Controller will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer in charge of loading.

All spillages of oil must be reported immediately to the Bima Terminal Superintendent or his assistant and subsequently a detailed report in writing submitted by the Master of the vessel concerned giving all relevant details.

MEDICAL: No facilities available.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not possible.

TIME: GMT plus 7 hours.

SHORE LEAVE: Not Possible.

GENERAL: *Wind and Tides:* Refer to Eastern Archipelago Pilot Vol. II. Water depth approximately 110 ft. below mean sea level.

Charts: Admiralty Chart No. 1653A. Java – Western portion including Straat Sunda.

Sailing Directions: Eastern Archipelago Pilot Vol. II.

AGENCY: See "General" before first port.

OPERATOR: Atlantic Richfield Indonesia Inc.

Principal Offices:

Pertamina, Jalan Medan Merdeka Timur No. 1 A, Jakarta, Indonesia.

Deminex Java Oel GmbH, Attn: P4, P.O.Box 10 09 44, Dorotheenstr. 1, 4300 Essen 1, Federal Republic of Germany.

Nominations: Tanker nominations for lifting of Bima Crude Oil are co-ordinated through Arco International Oil and Gas Company, Los Angeles, California and Atlantic Richfield Indonesia Inc., Jakarta.

All crude oil sales, also tanker chartering are arranged by the following parties in each of their respective locations:

Pertamina,
Arco International Oil and Gas Company,
Iiapco, Inc., c/o Natomas Trading Co.,
Inpex Java, Ltd.,
Tidewater N.W. Java Inc.,
Warrior Minyak Inc.,
Deminex Java Oel GmbH,
C. Itoh Energy Development Co. Ltd.

Tanker scheduling is co-ordinated for all of the partners through Arco International Oil and Gas Company, Los Angeles, California, and arranged through Atlantic Richfield Indonesia Inc., Jakarta.

BIRINGKASI: 04.49 S. 119.29 E.

LOCATION: The Port of Biringkasi is 28 miles from Ujung Pandang.

PILOTAGE: Pilotage is not compulsory. However, vessels that are not familiar with the port may request pilotage assistance from Ujung Pandang/Macassar.

ANCHORAGE: Depth of water in anchorage 10.0 m.

RADIO: All communications are via Ujung Pandang Coastal Radio Station.

TUGS: There is 1 tug of 500 h.p. and 1 mooring boat of 75 h.p.

BERTHING: Concrete Pier No. 1: Length 209 m., breadth 27 m. and depth alongside 7.0 m.

Concrete Pier No. 2: Length 20 m., breadth 40 m., depth alongside 2.4 m.

This port is a private port with a cement factory operated by P.T. Semen Tonasa. The port is equipped with a conveyor/shiploader for loading cement in bags.

Storage: Storage facilities available.

CRANES: 4×5 ton – 40 ton mobile cranes.

MEDICAL: Hospital facilities available.

STEVEDORES: Labour available from the cement factory.

FRESH WATER: Fresh water available in limited quantities.

FUEL: Not available.

REPAIRS: No facilities for undertaking repairs.

GENERAL: *Barges:* 4 barges available with capacity of 700 – 900 tons each.

Clearance: Biringkasi is an outport and therefore all vessels entering this port have to clear inward and outward at Ujung Pandang.

BITUNG: 01.26 N. 125.12 E. (See Plan)

DOCUMENTS:

4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
3 Cargo Lists.
3 Provisions Lists.
List of Articles new and Customs-barred in possession of each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Ship's Register.
International Vaccination Certificate for Crew and Passengers.
(Especially for International Travellers.)
Health Book/Maritime Declaration of Health.
Derat Exemption Certificate.

PILOTAGE: Contact Coastal Radio Station Bitung (call sign PKM), telegram address: Bitung Port Administration; advance notice of ETA 24 hours. Pilot boats: 100 h.p. and 350 h.p. light grey. Requiring a Pilot: flag, sound and Morse Signal: "G".

Anchorage for vessel awaiting a Pilot: the area between Southern part of the Lembeh Street at: Lat. 1° 25' 00" N., and Lat. 1° 30' 35" N. at the Northern part of the street.

Ships have to anchor outside the mentioned Latitude above.

ANCHORAGE: The area between coast of Lembeh Island and coast of Sulawesi: Lat. 01° 27' N., Long. 125° 12.3' E.; Lat. 01° 26.2' N., Long. 125° 13.5' E. and Lat. 01° 26.3' N., Long. 125° 10' E.; Lat. 01° 25' N., Long. 125° 10.8' E. Depths: 42 ft. to 114 ft.

RESTRICTIONS: No restrictions on night entry.

Shipmaster's Report: Numerous fishing boats at the port entrance especially at night-time, also fishing sticks, and small fishermen's houses on bamboo sticks built at sea, without lights, dangerous to navigation. Approaching or sailing from port at night-time should not be attempted.

MAX. SIZE: Draft alongside pier, max. 32 ft. L.O.A. 760 ft. or 100,000 B.R.T. (60,000 d.w.t.).

HEALTH: Vessels coming direct from other countries or coming from infected port: "Q" flag to be flown. Pratique procedure and action necessary to obtain Pratique according to the International Sanitary Regulations.

RADIO: Bitung Radio (Call sign P.K.M.) for vessels to route ETA cables to Agents, Receivers, etc.

(MF-Working frequency 438 and 500 kHz, listening frequency 500 kHz, emission A.1., A.2.).

Time Schedule: 0000 – 0100
0400 – 0500 } G.M.T.
0800 – 0900

VHF: Bitung Radio on Channels 16 and 26.

TUGS: 1 tug, 1,160 h.p. also 2 motor launches of 115 h.p.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Ocean Quay 1	423	4.5 – 11.0
Ocean Quay 2	150	4.5 – 11.0
Ocean Quay 3	146	4.5 – 11.0
Coastal Quay	505	5.0

CRANES: 3×15-35 tons mobile cranes.

STEVEDORES: Arranged by handling Agent.

Handling Rates:

Bulk cargo: 13–18 tons/gang/hour.
Bagged Cargo: 20–35 tons/gang/hour.
General Cargo: 12–15 tons/gang/hour.

MEDICAL: Hospital facilities available. Masters to advise by radio prior to arrival if medical attendance required aboard. Vaccination/fever certificates required, 3 copies.

TANKERS: 1 oil jetty for domestic tankers (not general use). With 7 bunkering points alongside the 582 m. Ocean Going wharf, of which 3 are presently used. Bunker fuel is supplied directly by P.N. Pertamina (state oil company).

DENSITY: About 1030.

FRESH WATER: Available from hose connections on the pier, at a rate of 30 t.p.h., also 1 fresh water barge with the capacity of 200 tons.

FUEL: Not all grades fuel available. Diesel and marine lubricants can be supplied. 48 hours notice required. Rate 50–150 t.p.h.

REPAIRS: Some deck and minor engine repairs are possible at Bitung dockyard. Radar and electronic repair available, but not for big repairs.

CONSULS: Philippines only.

DOCKYARD: P.T. IKI and P.T. Dock Surya.

GANGWAY/DECK WATCHMEN: Not needed.

OPENING/CLOSING HATCHES: Normally by crew/stevedores, otherwise according charter party.

SHIP'S CERTIFICATES: Registered Tonnage Certificate and all certificates normally required to be on board.

CUSTOMS ALLOWANCES: 100 cigarettes or 20 cigars or 100 gram. tobacco each crew member; 1 bottle wine or spirits for each crew member.

Passengers: Articles to the value of U.S.$25 per person or U.S.$100 per family.

CARGO GEAR: Loading and discharging by ship's own derricks. Shore crane capacity up to 15 tons.

REPATRIATION: Facilities available.

AIRPORT: About 50 km. from port of Bitung. Regular airlines: Garuda Indonesian Airways (G.I.A.), Bouraq, Merpati and Mandala. All have daily flights to Makassar and Jakarta.

TIME: GMT plus 9 hours, permanent.

HOLIDAYS: New Year's Day; Idul Adha, 1st Muharam; Ascension Day; Birthday of Prophet Mohammad S.A.W.; Good Friday; Proclamation Day (August 17th); Idul Fitri, Waisak and Christmas Day.

POLICE/AMBULANCE/FIRE: Dial 111, 27, 60, 106 and 108.

SHORE LEAVE: Crew members are allowed ashore with a shore pass issued by the Immigration Office.

IDENTIFICATION CARDS: Shore pass issued by the Immigration Office for crew members at Agent's request.

DEVELOPMENTS: A container quay is to be built.

SHIPMASTER'S REPORT: February 1980.

There is a 300 m. concrete wharf in approx. position Lat. 01° 26.2' N., Long. 125° 11.6' E and a naval wharf in approximate position Lat. 01° 26.5' N., Long. 125° 12.1' E. Fuel by road tanker is available.

AUTHORITY: Port Administrator of Bitung, Jalan Makassar, Bitung, Indonesia. *Tel:* 60, 106, 27, 105, 108, 56 and 111. *Contact:* Iljas Sudikto, Port Administrator.

BONTANG (Loktuan): 00.11 N. 117.12 E.

PILOTAGE: Pilotage compulsory for all vessels entering the inner harbour at Loktuan. Pilot boards at Bontang LNG Pilot Station. Contact should be made prior to arrival with Bontang Radio on VHF Channel 16.

ANCHORAGE: Vessels anchor in position 00° 08' 30" N., 117° 34' 50" E. The holding ground in the anchorage is good. Depth of water 13.0 m.

RESTRICTIONS: Depth of water in channel is 13.0 m. – 20.0 m. The turning circle off the terminal has a diameter of 750 m. and depth of 14.0 m.

RADIO: Bontang Coastal Radio Station – Call sign PKN 7.

VHF: Bontang Radio on Channels 16, 9 and 19.

TUGS: 1 tug available.

BERTHING: Concrete wharf with length 152 m., breadth 32 m. and depth 13.0 m. The berth can accept vessels up to 20,000 d.w.t.

Fork Lifts: Fork lifts with capacity 2.5 tons – 8 tons available.

CRANES: 2×150 tons mobile cranes.

STEVEDORES: Available from Samarinda labour pool and arranged by Agent.

TANKERS: LNG Facilities.

Operator: Pt. Badak NGL Co., Jl. M.H. Thamrin 59, Jakarta. Telex: 44261.
P.O.Box 216, Balikpapan. Telex: 37211.

Location: Lat. 00° 05' 51" N., Long. 117° 28' 47" E.

Max. Size: 125,000 cu.m. LOA 300 m.

Depths at L.W.: Alongside: 13.5 m. Outer bar: 49 m. Entrance: 25 m. Inner bar: 15.0 m.

Anchorage: Awaiting Pilot: Lat. 00° 02' 05" N., Long. 117° 34' 00" E. Awaiting berth: Lat. 00° 01' 00" N., Long. 117° 35' 30" E.

Radio: Bontang Radio – "PKN-7" or Balikpapan Radio "PKN-2".

Pilot: Compulsory. Request Pilot 6 hours prior to arrival and 3 hours prior to departure.

Documents: Health Declaration, Last Port Clearance, 10 copies Crew List, 10 copies Passenger List, 5 copies Cargo Manifest, 5 copies Ship's Stores List, 3 copies Crew Effects List.

Cargo: LNG loading rate: 10,000 cu.m.p.h.

Loading lines: 5 loading lines with 16 in. loading arms.
Vapour return: 1 line with 16 in. arm.
Storage capacity: 487,000 cu.m.
Liquid nitrogen facility: Max. quantity: 50 cu.m. Line size: 2 in. I.D.
Pressure at ship's rail: 112 p.s.i.

LNG characteristics:

Explosion limits:	5.3 – 14.0 % Vol.
Flammable:	Yes
Boiling Point:	−161°C.
Flash Point:	−175°C.
Critical Pressure:	45.6 kg./sq.cm.
Critical Temperature:	−82.5°C.
Reactive with:	Steel, Polythene.
Chemical compatibility:	Chlorine (dry).
Condensing ratio:	0.8023 dm³

Also see "Shipmaster's Report".

FRESH WATER: Available.

FUEL: Available.

CONSULS: None.

REPAIRS: No repair facilities at the port.

AIRPORT: Samarinda Airport.
GENERAL: This port has been constructed to serve the fertiliser factory of P.T. Pupuk Kalimantan Timur.
Barges: There are 2 flat top barges. Each with a capacity of 1,000 tons.

SHIPMASTER'S REPORT: February 1991.
Berth: LNG/LPG facility.
Position: Lat. 00° 11' N., Long. 117° 12' E.
Radio/VHF: Telex sent to Pkk.LNG.Badak. Telex No. 38283 and 37211 via radio station "PKN – 7".
VHF: Terminal on Channels 16 and 19, Pilots on Channel 9.
Anchorage: Lat. 00° 02' 07" N., Long. 117° 36' 44" E.
Pilotage: Pilot boards at Fairway Buoy.
Tugs: 4×4,000 s.h.p. available.
Berth: LPG/LNG Berth No. 2 is fitted with an electronic berthing aid. The dolphin berth is fitted with quick release hooks. Vessels always berth port side alongside. Shore gangway used.

Moorings: Forward – 2 long headlines, 2 short headlines, 2 breastlines and 2 springs. Aft – 2 long sternlines, 2 short sternlines, 2 breastlines and 2 springs.

Depth at berth: 12.5 m.
Loading: Manifold presentation, from forward:

Propane vapour	8 in. 150 ASA
Propane liquid	12 in. 150 ASA
Butane liquid	12 in. 150 ASA
Butane vapour	8 in. 150 ASA

Note: Lines are not interchangeable.

Loading rates up to 5,000 cu.m./hr.
Vapour return: Only to flare.
Shore line: 500 m. × 22 in.
Bill of Lading: In vacuum, raised from Customs sealed in-line meters.
Surveyor: No independent surveyor available.
Documents:
10 copies Crew List.
2 copies Personal Effects List.
3 copies Ship's Stores List.
2 copies Cargo Manifest.
2 copies Passenger List.
1 copy Maritime Declaration of Health.
3 copies List of Ports Visited.
Last Port Clearance.
General: All vessel's information, ETA's, etc., sent to agent in Jakarta. They must also be sent direct to Terminal as communications between Jakarta and Bontang take several days.

Landfall very poor when coming from the East. Rigs to the North of the port assist with position fixing.

Channel marked by excellent leads for entering port. Night departure is not as good due to numerous fishing boats at edges of channel.
AUTHORITY: *LNG Facilities:* Operated by Pertamina/Pt. Badak LNG Co., under supervision of P & T Bontang.

Pt.Badak LNG Co., Nusuntara Building, 9th Floor, Jl.M.H.Thamrin 59, P.O.Box 216BPP, Jakarta, Indonesia. *Tel:* 335231, 330243, 330265, 375223 (P & T Bontang). *Telex:* 44261 Bdklng Ia, 37211 Bdklng Bpp.

AGENT: See "Jakarta".

BUATAN: 00.45 N. 101.50 E.

PILOTAGE: Compulsory. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.
ANCHORAGE: The anchorage whilst awaiting sea pilot is in Morong Strait in position Lat. 01° 56' 30" N., Long. 101° 50' 30" E.

The anchorage whilst awaiting the harbour pilot is in Siak Sri Indrapura in position Lat. 01° 23' 00" N., Long. 102° 10' 00" E.
RESTRICTIONS: Berthing and unberthing during daylight hours only.
Approach Channels: Depths at LWS.

Outer bar	4.2 m.
Entrance	4.8 m.
Inner bar	13.0 m.
Harbour/Turning Basin	6.5 m.

MAX. SIZE: 5,000 d.w.t. Max. LOA 110 m.
VHF: Sungai Pakning Coastal Radio Station operated by Pertamina, call sign PKP-5.
BERTHING: The jetty is located in position Lat. 00° 44' 50" N., Long. 101° 49' 35" E. Depth at LWS 6.5 m.

Crude oil is loaded at a rate of 6,000 bbls.p.h. through 3×8 in. hoses.
Shore Storage Tanks:

Oil Products	Total Safe Capacity
Crude Oil	285,000 bbls.
Slop Oil	10,000 bbls.

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	35
B.S. & W.	:	0.2 % vol.
Pour Point	:	110°F.

MEDICAL: Clinic available.
DENSITY: 1000-1010.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
AIRPORT: Simpang Tiga Airport at Pekanbaru.
TIME: GMT plus 7 hours.

GENERAL: The water in the vicinity of the berth is shallow and the channels are liable to shift.

A good look-out should be kept for fish traps, nets, logs and floating debris.
Charts: Indonesian Charts No. 14, 14A and 24. British Admiralty Charts No. 3933 and 3947.
AGENCY: See "General" before first port.
AUTHORITY: *Operator:* Pertamina U.EP-II, Lirik.

BUNYU (Banyu): 03.28 N. 117.50 E. (See Plan)

PILOTAGE: Mooring Master boards at the anchorage.
ANCHORAGE: Vessels awaiting berth anchor in position Lat. 03° 25' 30" N., Long. 117° 51' 45" E.
RESTRICTIONS: Daylight berthing and unberthing only.
MAX. SIZE: *CBM:* 21,000 d.w.t. Max. LOA 175 m.
Platform: 30,000 d.w.t. Max. LOA 185 m.

Also see "Berthing".
RADIO: Tarakan Radio (PKO).
VHF: Bunyu Coastal Radio Station, call sign PKO-3, operated by Pertamina on Channels 16 and 19 (24 hours).
TUGS: 1×120 h.p.
BERTHING: *CBM:* Vessel moors to 4 buoys in position Lat. 03° 26' 12" N., Long. 117° 50' 50" E. Depth of water 15.3 m. at LWS. Hose connects on starboard side. Crude oil loaded at rate of 2,500 t.p.h. through 1×8 in. hose.
Jetty: There is a jetty for small vessels in position Lat. 03° 27' 30" N., Long. 117° 50' 03" E. Depth alongside 5.0 m. at LWS. Max. size 1,000 d.w.t. Max. LOA 60 m. Vessels berth starboard side to. General cargo handled at this berth.
Platform (Methanol): A platform for handling of methanol is located in position Lat. 03° 27' 24.8" N., Long. 117° 50' 39.7" E. Depth of water 14.5 m. at LWS. Max. size 30,000 d.w.t. Max. LOA 185 m. Methanol is loaded at a rate of 1,000 cu.m.p.h. through 1×10 in. arm.
Barge Platform: There is a platform for barges in position Lat. 03° 27' 27" N., Long. 117° 50' 09" E. with a depth alongside 6.0 m. at LWS. Max. size 3,500 d.w.t. Max. LOA 90 m. Premium gas is handled at this platform with 1×8 in. hose.
Shore Storage Tanks:

Oil Products	Total Safe Capacity
Crude Oil	309,068 bbls.
Methanol	45,000 cu.m.

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	32.2 – 31.1
Sulphur Content	:	0.09% wt.
B.S. & W.	:	0.10 – 0.15 % vol.
Flash Point (PMCC)	:	Below 66°F.
Pour Point	:	45 – 50°F.

DENSITY: 1020-1025.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
AIRPORT: Tarakan Airport.
TIME: GMT plus 8 hours.
AGENCY: See 'General' before first port.
AUTHORITY: Operated by Pertamina, under supervision of Pertamina Dak Kalimantan, Pertamina P & T Dak, Jl.Minyak, Balikpapan, Indonesia. *Tel:* (021) 37177, 371010, 372184. (0542) 21453, 22500. (0511) 21327. *Telex:* 37161 Ptamina Bpp. *FAX:* (0542) 22638.

CAMAR MARINE TERMINAL: 06.18 S. 113.00 E. (See Plan)

LOCATION: The Camar Oil Field consists of a storage vessel and 2 oil production platforms. These platforms are situated in Lat. 06° 19' 15.22" S., Long. 113° 00' 21.9" E. and Lat. 06° 14' 40.5" S., Long. 113° 03' 32.4" E. Each platform has a gas flare which gives off an orange light and can normally be seen from great distances.

The platforms are connected by a 6 in. subsea pipeline and from the closest platform to the storage vessel there is a connecting 8 in. diameter subsea pipeline.

The Marine Terminal consists of one floating storage vessel of 106,239 d.w.t. It is situated approximately 30 miles S.E. of the Indonesian island of Bawean in position Lat. 6° 18' S., Long. 113° 00' E. The storage vessel, "Camar Nusantara", is moored to the seabed by 6 chains secured to a turret system so that it will weathervane to the prevailing conditions. Crude oil from the 2 production platforms flows from the subsea pipeline into the turret then through a swivel on to the storage vessel.
PILOTAGE: Mooring Master boards in the anchorage or an agreed location.
MINIMUM STANDARDS OF ACCEPTANCE:
Size: Export tankers are to be not larger than the storage vessel, which is 106,239 d.w.t. and 853 ft. in length, except with the prior written consent of the Marine Terminal.
Vessel Loading: Export tankers loading at the Camar Terminal must comply with the latest SOLAS and MARPOL conventions and protocols. Vessels found to be seriously deficient or substandard in any safety and pollution control requirements will not be permitted to moor and load.
De-ballasting: Export tankers must arrive at the Terminal with clean ballast. Vessels with contaminated ballast will not be permitted to discharge ballast. Vessels should be able to deballast concurrently with loading. The Terminal is not responsible for any free water or deadfreight.

Inert Gas System: All export tankers must be equipped with an inert gas system conforming to the current SOLAS regulations. This must be operable throughout the vessel's operations at Camar Terminal. Tanks are to be monitored by vessel's crew throughout the loading to ensure correct oxygen content is maintained.

Mooring Equipment: Export tanker equipment must be in good working order and should remain ready for use at all times.

Hose Connecting Equipment: Export tankers are to be equipped with 2 loading manifolds in accordance with OCIMF standards for ships manifolds. Flanges should be prepared to accept 12 in. 150 ASA connections. Derricks must be not less than 5 tons SWL.

Crew: Export tankers crews must be qualified to the requirements of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers 1978. Any infringement of safety regulations or the inability of ship's crew to operate safely and efficiently will cause the vessel to be removed from the berth.

TOVALOP: The vessel's owner or bareboat charterer is to be a party to TOVALOP and have insurance covering the liabilities under the International Convention of Civil Liabilities for Oil Pollution Damage 1969 (C.L.C.). The cargo to be loaded will be covered by Cristal and or the International Convention on the Establishment of International Fund for Compensation for Oil Pollution Damage 1971 (C.L.C.).

Loading: Vessels are required to load using the closed loading system.

Note: Failure by Enterprise to reject an export tanker does not constitute a warranty of its suitability for loading at the Camar Terminal.

ARRIVAL PROCEDURE:

Order of Berthing: Export tankers will normally berth in order of arrival with due regard to nominated date ranges, etc., unless to do so would result in an unacceptable stock position.

Hours of Operation: The Camar Marine Terminal will operate 24 hours a day, seven days a week. Export tankers will normally be berthed during daylight hours, weather permitting. Unmooring is carried out at any hour.

Vessels Anchoring: If an export tanker is not scheduled to berth on arrival the Master will be advised by radio and requested to anchor.

Notice of Readiness: The Mooring Master will act on behalf of the company to sign acknowledgement of export tanker's Notice of Readiness which should be tendered at the time of arrival at the anchorage or berth, provided no de-ballasting time is required.

Port Closed: Notice of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth or remain alongside the storage tanker. Notice of Readiness need not be accepted by the Terminal between the hours of 1630 and 0600 local time, at the Mooring Master's discretion. Any decision regarding the opening and closing of the port will be made solely at the discretion of the Terminal. In such a case the Terminal will provide the export tanker's Master with written notice of the times during which the port was closed and the reasons for it.

Indonesian Flag: The national flag of the Republic of Indonesia shall be prominently displayed by the export tanker at all times between sunrise and sunset.

Indonesian Government Regulations: Masters are informed that the following Indonesian Government Regulations are strictly enforced:

(a) Signals to be displayed on arrival: In accordance with practice in Indonesian Ports, quarantine, immigration and pilot signal flags should be displayed.

(b) The quarantine flag should be flown until health clearance is granted. The 'G' flag requesting a pilot should be flown until the Mooring Master boards. As soon as the Mooring Master boards the flag is to be replaced with flag 'H'. These flags are to be flown from sunrise to sunset.

NAVIGATIONAL AIDS: The storage vessel is fitted with two 360° white lights with a visibility range of 5 miles, one forward and one aft. It is equipped with a fog horn with an accoustic range of 0.5 miles.

Each platform has 4 white lights situated one on each corner. The range of each light is 10 miles and the characteristic is the Morse code signal 'U' every 15 seconds. On two of the corners there are red lights with a range of 3 miles also flashing the Morse code signal 'U' every 15 seconds.

APPROACHES: *Restricted and Prohibited Areas:* It is prohibited to pass closer than 500 m. to the oil platforms and the storage vessel without an Enterprise Oil Mooring Master on board, or pass between the storage vessel and the nearest platform.

The following are the platform and storage vessel locations where it is prohibited to anchor within a radius of:

1,750 m. with a centre at Lat. 06° 18' 23" S., Long. 113° 00' 27" E.
1,750 m. with a centre at Lat. 06° 14' 40.5" S., Long. 113° 03' 32.4" E.
1,750 m. with a centre at Lat. 06° 19' 15.2" S., Long. 113° 00' 21.9" E.

It is also prohibited to anchor between the 2 platforms in a corridor extending 1,250 m. either side of the centre line. This is where the oil pipeline runs along the seabed.

Finally, it is prohibited to anchor in the following areas where there are subsea wellheads, in a radius of 1,250 m. with the centre at:

Lat. 6° 16' 21.65" S., Long. 113° 03' 05.62' E.
Lat. 6° 17' 11.00" S., Long. 113° 02' 57.48" E.
Lat. 6° 17' 48.39" S., Long. 113° 01' 11.87" E.
Lat. 6° 19' 09.20" S., Long. 113° 01' 12.50" E.
Lat. 6° 15' 51.41" S., Long. 113° 02' 21.82" E.

ANCHORAGE: There is an anchorage 3 nautical miles N.W. of the storage vessel with the centre at Lat. 6° 16' S., Long. 112° 58' E. It has a radius of one nautical mile.

RESTRICTIONS: Berthing normally during daylight hours only, unberthing at anytime.

Maximum distance bow to manifold is 425 ft.

MAX. SIZE: 106,239 d.w.t. 853 ft. LOA.

RADIO/VHF: All incoming tankers must advise Camar Marine Terminal of best estimated time of arrival when departing from their last port of call and 72 hours, 48 hours and 24 hours before arrival. Any appreciable change of ETA should be advised accordingly. Vessels may contact Camar Marine Terminal directly on:

SSB	4,638 kHz	Night.
	9,984 kHz	24 Hours.
	10,282 kHz	Day (0700 hrs. – 1900 hrs.).
	12,252 kHz	Day.
VHF	Channel 16	

Time to be used for ETA is local time which is G.M.T. + 7 hours throughout the year.

Initial Message:

In addition to the ETA, the first message should include:

(a) Name of tanker and radio call sign.
(b) Cargo requirements.
(c) Deballast time.
(d) Maximum loading rate.
(e) Arrival draft, fore and aft.
(f) Last port of call.
(g) Confirmation that vessel has clean Bill of Health.
(h) Is there any sickness on board, give all available information as to possible type of sickness.
(i) Distance in feet from the bow to the tankers loading manifold (max. allowable distance is 425 ft.).
(j) Confirmation that the minimum standards of acceptance have been complied with.

Addresses: The above communications with Camar Marine Terminal should be made via:

Enterprise Oil (Bawean) Ltd., Landmark Center, 21st Floor, Jl. Jend. Sudirman No. 1, Jakarta 12910, Indonesia. P.O.Box 97/JKWK. Telephone: 0062-21-571-2707, 0062-21-520-9551. Telex: 62912 Eprise IA. Fax: 0062-21-571-2755, 0062-21-570-0385.

In the absence of direct telex or telephone link to the above numbers, messages may be relayed to Enterprise for onward transmission to Camar Marine Terminal through the Pertamina Coastal Radio Station at Jakarta.

VHF/FM Radio Communications: The Terminal maintains a continuous watch on VHF Channel 16 (156.8 MHz) and Masters are recommended to use this when they are in range. The Terminal is able to select any marine VHF channel for use as a working channel after initial contact.

Masters are reminded that if export tankers are requested to anchor before berthing, it is their responsibility to maintain a constant listening watch on Channel 16 to receive Terminal instructions.

Any delays due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account and will not be included in calculation of the laytime.

Pertamina Control Radio Station:

In the event that incoming export tankers are unable to contact Camar Marine Terminal on the above mentioned frequencies, Masters should request Jakarta Radio to relay the necessary information to Enterprise by telex. Details of Jakarta Radio are:

Name	Jakarta Radio.
Call sign	PK1 – 2
Operated by	Pertamina.
Nature	Coastal Radio Station.
Geographical Position	06° 50' 00" S. 106° 50' 00" E.

Calling Channel	*Working Channels*	*Working Hours*
16	6 – 19	Continuous

MOORING: *Mooring Operations:* Mooring Master will board the incoming export tanker at either the anchorage area or an agreed location. The Mooring Master will advise the ship's Master on approach to the storage vessel, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the export tanker. The Master, or one of his qualified deck officers must be on the bridge at all times while the export tanker is being manoeuvred.

Support vessels assisting in mooring export tankers are under the direct control and supervision of the Mooring Master.

Export tankers due for mooring must have a pilot ladder or hoist securely rigged on the starboard side. Vessels with a freeboard of more than 30 ft. shall have an accommodation ladder rigged so that the lower platform is not more than 10 ft. above the water level with a short pilot ladder rigged for access to the platform. Upon the approach of the Mooring Master the export tanker is to provide a good lee. Export tankers are to have the port derrick rigged.

The Mooring Master will bring with him 2 × 4.5 in. circumference polypropylene messenger lines approximately 720 ft. long. These are to be lifted on board and one taken to the bow and one to the stern of the tanker.

When the export tanker is off the storage vessel 2 support vessels with heavily fendered bows will push the export tanker closer to the storage vessel. A small support vessel will take the messenger lines to the storage vessel. The export tanker will then slowly winch closer to the storage vessel, making sure not to bring the two vessels out of parallel. Normally 6 mooring ropes either end will be used.

Engines on the export tanker must at all times be ready for immediate use.

BALLAST: *Ballast Operations:* There are no ballast or slop reception facilities at Camar Marine Terminal, therefore all export tankers must arrive with clean ballast suitable to be discharged into the sea. Indonesian Government Regulations forbid discharge of water containing more than 15 ppm. of oil. Rejection of any tanker because of contaminated ballast will automatically invalidate a Notice of Readiness and may change priority of loading. Vessels discharging contaminated ballast overboard shall be subject to the laws of Indonesia.

Vessels arriving at Camar Marine Terminal should have sufficient ballast to ensure safe handling and manoeuvrability in the prevailing weather and sea condition and in accordance with good seamanship.

Whenever possible loading should be so arranged as to run concurrently with deballasting, provided that there is a 2 valve separation maintained between ballast and cargo. Permanent ballast should not be discharged before the export tanker has loaded an equivalent amount of cargo.

The Mooring Master will be present and observe the tank inspection prior to loading but will not sign certificates attesting to the emptiness, cleanliness or suitability of the cargo tanks. The ullaging of the slop tank and determination of oil content will also be observed by the Mooring Master.

TUGS: Two tugs and one line boat will be available to assist berthing/unberthing operations.

HOSES: *Hose Connection:* Upon completion of mooring, the loading hoses will be connected to the export tanker's port manifold. This must have 2×12 in. 150 ASA flanges. The storage vessel's hoses will have quick disconnects on the ends of them. The export tanker's derrick will be used to transfer the hose end on to its deck and to align the quick connect flange of the loading hose on to its loading manifold. Each hose string has a support chain connected to the second-to-last flange. This is to be made fast on to the "crucifix" or "bitts" to support the weight of the hose string. Each hose string will weigh approximately 4.5 tons.

Hose Disconnection: On completion of loading and when the export tanker has been informed by the storage vessel that all flow has ceased, the hose end butterfly valves will be closed, followed by the export tanker's manifold valve. Sufficient drip trays must be provided on the export tanker to prevent pollution by any oil from the reducing pieces and spool pieces. Any clean-up costs shall be to the Owner/Charterer's account. The butterfly valves on the hose ends will be sealed by a representative of Customs and Excise. The hoses will be disconnected from the ship's manifold and a blind flange put on the ends of both of them. The derrick wire of the storage vessel will be connected in turn to each of the hoses and the string will be lifted onto the deck of the storage vessel.

LOADING: The export of crude oil is carried out by ship-to-ship alongside transfer. The storage vessel has 4 Yokohama pneumatic fenders (size 2.5 m. diameter × 5.5 m. long), spaced 120 ft. apart. These are on the starboard side of the storage vessel. The storage vessel is equipped with a metering and proving system which is certified by the Indonesian Government.

Loading Operations: When the Officer-in-Charge on board the export tanker has declared the vessel ready to load, with all necessary valves open, the representative of Customs and Excise will break the seal on the butterfly valve at the loading hose end. The butterfly valve will then be opened. The Mooring Master will instruct the storage vessel to commence loading at a slow rate. When the export tanker has confirmed that everything is operating in good order, then the rate will be increased. The export tanker may request a loading rate up to a maximum of 30,000 bbls./hr.

Throughout the loading, a responsible Deck Officer shall be in charge of export tanker operations, either on deck or in the cargo control room. In addition an efficient Deck Watch in constant contact with the cargo control room must be maintained at all times.

At any time during loading, transfer rates can be reduced on request. Except in emergency, 10 minutes notice should be given to the storage vessel when rate reduction is required. Valves must not be closed against incoming oil.

If for any reason radio communication between export tanker and the storage vessel is lost, the storage vessel will stop loading until radio communication is re-established.

The volume of oil loaded is accurately available at all times from the storage vessel and periodic comparisons can be made.

The volume of oil to be loaded shall be agreed between the export tanker's Master and the Mooring Master with due regard to any written instructions received by the Mooring Master in advance. In the event of any conflict, the export tanker Master's requirements shall prevail and Enterprise Oil will not be held responsible for any failure to comply with the Owner/Charterer's requirements.

Subject always to considerations of safety, the export tanker will normally stop the loading once the volume of oil agreed to be loaded has been loaded. Any advance arrangement for the storage vessel to stop the cargo must be made in writing. The request must include the statement by the export tanker's Master that Enterprise Oil will not be held responsible for any error, and that in case of the export tanker being overloaded, the excess cargo cannot be pumped back to the storage vessel.

The export tanker's Master will also be held responsible for any spills caused by this request.

Cargo Documentation and Inspection: Documents such as Bills of Lading, Quality Certificates, Quantity Certificates, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt of Documents/Samples, etc. are prepared at Camar Marine Terminal. When the export tanker has been loaded, the documents will be completed and taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Immediately upon completion of loading, the official Bill of Lading quantity will be relayed to the Mooring Master by radio. In the event of a dispute, the export tanker will be requested to recheck the measurement and calculations of the quantity. The Mooring Master will not witness such measurement and calculations of the quantity. After both ship and shore figures have been verified, should an appreciable difference still exist, receipt of a Letter of Protest will be acknowledged by the Mooring Master.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Enterprise Oil (Bawean) Ltd. The Mooring Master is only authorised to acknowledge receipt and not to accept such letters as correct.

From time to time owners, charterers, consignees and other interested parties may appoint third party cargo surveyors to survey the loading operation on their behalf. Any delays caused by the cargo surveyors shall be considered "vessel delays".

Notwithstanding any provisions contained elsewhere herein, Camar Marine Terminal Certificates shall be final and binding save for fraud or manifest error.

Departure Procedures: Immediately after the loading hose is disconnected and stored on the storage vessel and all cargo documentation has been completed, the export tanker will be unmoored. The export tanker will single up to one breast line and one spring line each end. The two tugs will be made fast at either end of the export tanker. All mooring lines will be released and the tugs will pull the export tanker away from the storage vessel. When the export tanker is safely clear the tugs will be released.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Crew changes not allowed.

SHORE LEAVE: Not allowed.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL/SEAMAN'S CLUBS: No facilities (Off-Shore Terminal).

CURRENCY: Rupiah.

SERVICES: No stores available. No crew mail can be received or sent.

WEATHER: The Camar Marine Terminal is an open unsheltered mooring. Weather conditions may preclude mooring operations or require the export tanker to unmoor before completing loading. In these circumstances good judgement should be used by the export tanker's Master, under the Mooring Master's advice as to what action to take.

Currents: In general these are up to 1.5 knots but can on occasion run to 2.5 knots.

Wave Heights: December to February (N.W. Monsoon season): The wave direction is predominantly West and N.W. and the wave height exceeds 6 ft. for 20% of the time.

March to May: Wave height exceeds 6 ft. for only 5% of the time. Wave direction is from the East and S.E.

June to October: (S.E. Monsoon season): The wave direction is predominantly East, S.E. and South and the wave height exceeds 6 ft. for 33% of the time. This is the roughest season.

November: Wave direction is predominantly East, S.E. and South and the wave height exceeds 6 ft. 2% of the time. This is the calmest period.

Air Temperatures: This averages about 82° F. and varies between 70° F. to 95° F. with occasional maximum temperature over 100° F.

Rainfall: Maximum occurs during the N.W. Monsoon season. The average rainfall is approximately 113 in. per year.

Humidity: The relative humidity is often in the range of 70% – 100%.

Sea Temperature: On the surface approximately 84° F. – 86° F.

GENERAL:

Responsible Officers: The man in overall control of the Marine Terminal and associated facilities is the Production Superintendent. The man co-ordinating marine activities and acting as "Mooring Master" is the Marine Superintendent.

Safety/Environmental Requirements: As for all tanker terminal operations, vessels visiting Camar Marine Terminal must comply with the minimum safety requirements specified in the "International Safety Guide for Oil Tankers and Terminals" (I.S.G.O.T.T.) and the O.C.I.M.F. "Recommendations for Ship to Ship Transfers". Vessels must also comply with the current SOLAS and MARPOL requirements.

When the Mooring Master boards the export tanker, he will present the Master with a safety booklet containing details of the safety and fire regulations and safety check list. When fully checked and understood, the regulations will be signed by both the Mooring Master and the ship's Master.

Safety and Fire Regulations will be strictly adhered to and the Mooring Master will make periodic checks to ensure that they are being enforced. If any infringements of these safety or environmental regulations are observed, they will be brought to the attention of the Master for corrective action. If no action is taken immediately, the Mooring Master will take such action that would appear to be most appropriate and shall advise the Master accordingly.

Inert Gas System: All export tankers must be equipped with an inert gas system conforming to the current SOLAS regulations. This must be operable throughout the vessel's operations at Camar Terminal. Tanks are to be monitored by vessel's crew throughout the loading to ensure correct oxygen content is maintained.

Mooring Equipment: Export tanker equipment must be in good working order and should remain ready for use at all times.

Hose Connecting Equipment: Export tankers are to be equipped with 2 loading manifolds in accordance with OCIMF standards for ships manifolds. Flanges should be prepared to accept 12 in. 150 ASA connections. Derricks must be not less than 5 tons SWL.

Crew: Export tankers crews must be qualified to the requirements of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers 1978. Any infringement of safety regulations or the inability of ship's crew to operate safely and efficiently will cause the vessel to be removed from the berth.

TOVALOP: The vessel's owner or bareboat charterer is to be a party to TOVALOP and have insurance covering the liabilities under the International Convention of Civil Liabilities for Oil Pollution Damage 1969 (C.L.C.). The cargo to be loaded will be covered by Cristal and or the International Convention on the Establishment of International Fund for Compensation for Oil Pollution Damage 1971 (C.L.C.).

Loading: Vessels are required to load using the closed loading system.

Note: Failure by Enterprise to reject an export tanker does not constitute a warranty of its suitability for loading at the Camar Terminal.

ARRIVAL PROCEDURE:

Order of Berthing: Export tankers will normally berth in order of arrival with due regard to nominated date ranges, etc., unless to do so would result in an unacceptable stock position.

Hours of Operation: The Camar Marine Terminal will operate 24 hours a day, seven days a week. Export tankers will normally be berthed during daylight hours, weather permitting. Unmooring is carried out at any hour.

Vessels Anchoring: If an export tanker is not scheduled to berth on arrival the Master will be advised by radio and requested to anchor.

Notice of Readiness: The Mooring Master will act on behalf of the company to sign acknowledgement of export tanker's Notice of Readiness which should be tendered at the time of arrival at the anchorage or berth, provided no de-ballasting time is required.

Port Closed: Notice of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth or remain alongside the storage tanker. Notice of Readiness need not be accepted by the Terminal between the hours of 1630 and 0600 local time, at the Mooring Master's discretion. Any decision regarding the opening and closing of the port will be made solely at the discretion of the Terminal. In such a case the Terminal will provide the export tanker's Master with written notice of the times during which the port was closed and the reasons for it.

Indonesian Flag: The national flag of the Republic of Indonesia shall be prominently displayed by the export tanker at all times between sunrise and sunset.

Indonesian Government Regulations: Masters are informed that the following Indonesian Government Regulations are strictly enforced:

(a) Signals to be displayed on arrival: In accordance with practice in Indonesian Ports, quarantine, immigration and pilot signal flags should be displayed.

(b) The quarantine flag should be flown until health clearance is granted. The 'G' flag requesting a pilot should be flown until the Mooring Master boards. As soon as the Mooring Master boards the flag is to be replaced with flag 'H'. These flags are to be flown from sunrise to sunset.

NAVIGATIONAL AIDS: The storage vessel is fitted with two 360° white lights with a visibility range of 5 miles, one forward and one aft. It is equipped with a fog horn with an accoustic range of 0.5 miles.

Each platform has 4 white lights situated one on each corner. The range of each light is 10 miles and the characteristic is the Morse code signal 'U' every 15 seconds. On two of the corners there are red lights with a range of 3 miles also flashing the Morse code signal 'U' every 15 seconds.

APPROACHES: *Restricted and Prohibited Areas:* It is prohibited to pass closer than 500 m. to the oil platforms and the storage vessel without an Enterprise Oil Mooring Master on board, or pass between the storage vessel and the nearest platform.

The following are the platform and storage vessel locations where it is prohibited to anchor within a radius of:

1,750 m. with a centre at Lat. 06° 18' 23" S., Long. 113° 00' 27" E.
1,750 m. with a centre at Lat. 06° 14' 40.5" S., Long. 113° 03' 32.4" E.
1,750 m. with a centre at Lat. 06° 19' 15.2" S., Long. 113° 00' 21.9" E.

It is also prohibited to anchor between the 2 platforms in a corridor extending 1,250 m. either side of the centre line. This is where the oil pipeline runs along the seabed.

Finally, it is prohibited to anchor in the following areas where there are subsea wellheads, in a radius of 1,250 m. with the centre at:

Lat. 6° 16' 21.65" S., Long. 113° 03' 05.62' E.
Lat. 6° 17' 11.00" S., Long. 113° 02' 57.48" E.
Lat. 6° 17' 48.39" S., Long. 113° 01' 11.87" E.
Lat. 6° 19' 09.20" S., Long. 113° 01' 12.50" E.
Lat. 6° 15' 51.41" S., Long. 113° 02' 21.82" E.

ANCHORAGE: There is an anchorage 3 nautical miles N.W. of the storage vessel with the centre at Lat. 6° 16' S., Long. 112° 58' E. It has a radius of one nautical mile.

RESTRICTIONS: Berthing normally during daylight hours only, unberthing at anytime.

Maximum distance bow to manifold is 425 ft.

MAX. SIZE: 106,239 d.w.t. 853 ft. LOA.

RADIO/VHF: All incoming tankers must advise Camar Marine Terminal of best estimated time of arrival when departing from their last port of call and 72 hours, 48 hours and 24 hours before arrival. Any appreciable change of ETA should be advised accordingly. Vessels may contact Camar Marine Terminal directly on:

SSB	4,638 kHz	Night.
	9,984 kHz	24 Hours.
	10,282 kHz	Day (0700 hrs. – 1900 hrs.).
	12,252 kHz	Day.
VHF	Channel 16	

Time to be used for ETA is local time which is G.M.T. + 7 hours throughout the year.

Initial Message:

In addition to the ETA, the first message should include:

(a) Name of tanker and radio call sign.
(b) Cargo requirements.
(c) Deballast time.
(d) Maximum loading rate.
(e) Arrival draft, fore and aft.
(f) Last port of call.
(g) Confirmation that vessel has clean Bill of Health.
(h) Is there any sickness on board, give all available information as to possible type of sickness.
(i) Distance in feet from the bow to the tankers loading manifold (max. allowable distance is 425 ft.).
(j) Confirmation that the minimum standards of acceptance have been complied with.

Addresses: The above communications with Camar Marine Terminal should be made via:

Enterprise Oil (Bawean) Ltd., Landmark Center, 21st Floor, Jl. Jend. Sudirman No. 1, Jakarta 12910, Indonesia. P.O.Box 97/JKWK. Telephone: 0062-21-571-2707, 0062-21-520-9551. Telex: 62912 Eprise IA. Fax: 0062-21-571-2755, 0062-21-570-0385.

In the absence of direct telex or telephone link to the above numbers, messages may be relayed to Enterprise for onward transmission to Camar Marine Terminal through the Pertamina Coastal Radio Station at Jakarta.

VHF/FM Radio Communications: The Terminal maintains a continuous watch on VHF Channel 16 (156.8 MHz) and Masters are recommended to use this when they are in range. The Terminal is able to select any marine VHF channel for use as a working channel after initial contact.

Masters are reminded that if export tankers are requested to anchor before berthing, it is their responsibility to maintain a constant listening watch on Channel 16 to receive Terminal instructions.

Any delays due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account and will not be included in calculation of the laytime.

Pertamina Control Radio Station:

In the event that incoming export tankers are unable to contact Camar Marine Terminal on the above mentioned frequencies, Masters should request Jakarta Radio to relay the necessary information to Enterprise by telex. Details of Jakarta Radio are:

Name	Jakarta Radio.
Call sign	PK1 – 2
Operated by	Pertamina.
Nature	Coastal Radio Station.
Geographical Position	06° 50' 00" S. 106° 50' 00" E.

Calling Channel	*Working Channels*	*Working Hours*
16	6 – 19	Continuous

MOORING: *Mooring Operations:* Mooring Master will board the incoming export tanker at either the anchorage area or an agreed location. The Mooring Master will advise the ship's Master on approach to the storage vessel, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the export tanker. The Master, or one of his qualified deck officers must be on the bridge at all times while the export tanker is being manoeuvred.

Support vessels assisting in mooring export tankers are under the direct control and supervision of the Mooring Master.

Export tankers due for mooring must have a pilot ladder or hoist securely rigged on the starboard side. Vessels with a freeboard of more than 30 ft. shall have an accommodation ladder rigged so that the lower platform is not more than 10 ft. above the water level with a short pilot ladder rigged for access to the platform. Upon the approach of the Mooring Master the export tanker is to provide a good lee. Export tankers are to have the port derrick rigged.

The Mooring Master will bring with him 2 × 4.5 in. circumference polypropylene messenger lines approximately 720 ft. long. These are to be lifted on board and one taken to the bow and one to the stern of the tanker.

When the export tanker is off the storage vessel 2 support vessels with heavily fendered bows will push the export tanker closer to the storage vessel. A small support vessel will take the messenger lines to the storage vessel. The export tanker will then slowly winch closer to the storage vessel, making sure not to bring the two vessels out of parallel. Normally 6 mooring ropes either end will be used.

Engines on the export tanker must at all times be ready for immediate use.

BALLAST: *Ballast Operations:* There are no ballast or slop reception facilities at Camar Marine Terminal, therefore all export tankers must arrive with clean ballast suitable to be discharged into the sea. Indonesian Government Regulations forbid discharge of water containing more than 15 ppm. of oil. Rejection of any tanker because of contaminated ballast will automatically invalidate a Notice of Readiness and may change priority of loading. Vessels discharging contaminated ballast overboard shall be subject to the laws of Indonesia.

Vessels arriving at Camar Marine Terminal should have sufficient ballast to ensure safe handling and manoeuvrability in the prevailing weather and sea condition and in accordance with good seamanship.

Whenever possible loading should be so arranged as to run concurrently with deballasting, provided that there is a 2 valve separation maintained between ballast and cargo. Permanent ballast should not be discharged before the export tanker has loaded an equivalent amount of cargo.

The Mooring Master will be present and observe the tank inspection prior to loading but will not sign certificates attesting to the emptiness, cleanliness or suitability of the cargo tanks. The ullaging of the slop tank and determination of oil content will also be observed by the Mooring Master.

TUGS: Two tugs and one line boat will be available to assist berthing/unberthing operations.

HOSES: *Hose Connection:* Upon completion of mooring, the loading hoses will be connected to the export tanker's port manifold. This must have 2×12 in. 150 ASA flanges. The storage vessel's hoses will have quick disconnects on the ends of them. The export tanker's derrick will be used to transfer the hose end on to its deck and to align the quick connect flange of the loading hose on to its loading manifold. Each hose string has a support chain connected to the second-to-last flange. This is to be made fast on to the "crucifix" or "bitts" to support the weight of the hose string. Each hose string will weigh approximately 4.5 tons.

Hose Disconnection: On completion of loading and when the export tanker has been informed by the storage vessel that all flow has ceased, the hose end butterfly valves will be closed, followed by the export tanker's manifold valve. Sufficient drip trays must be provided on the export tanker to prevent pollution by any oil from the reducing pieces and spool pieces. Any clean-up costs shall be to the Owner/Charterer's account. The butterfly valves on the hose ends will be sealed by a representative of Customs and Excise. The hoses will be disconnected from the ship's manifold and a blind flange put on the ends of both of them. The derrick wire of the storage vessel will be connected in turn to each of the hoses and the string will be lifted onto the deck of the storage vessel.

LOADING: The export of crude oil is carried out by ship-to-ship alongside transfer. The storage vessel has 4 Yokohama pneumatic fenders (size 2.5 m. diameter × 5.5 m. long), spaced 120 ft. apart. These are on the starboard side of the storage vessel. The storage vessel is equipped with a metering and proving system which is certified by the Indonesian Government.

Loading Operations: When the Officer-in-Charge on board the export tanker has declared the vessel ready to load, with all necessary valves open, the representative of Customs and Excise will break the seal on the butterfly valve at the loading hose end. The butterfly valve will then be opened. The Mooring Master will instruct the storage vessel to commence loading at a slow rate. When the export tanker has confirmed that everything is operating in good order, then the rate will be increased. The export tanker may request a loading rate up to a maximum of 30,000 bbls./hr.

Throughout the loading, a responsible Deck Officer shall be in charge of export tanker operations, either on deck or in the cargo control room. In addition an efficient Deck Watch in constant contact with the cargo control room must be maintained at all times.

At any time during loading, transfer rates can be reduced on request. Except in emergency, 10 minutes notice should be given to the storage vessel when rate reduction is required. Valves must not be closed against incoming oil.

If for any reason radio communication between export tanker and the storage vessel is lost, the storage vessel will stop loading until radio communication is re-established.

The volume of oil loaded is accurately available at all times from the storage vessel and periodic comparisons can be made.

The volume of oil to be loaded shall be agreed between the export tanker's Master and the Mooring Master with due regard to any written instructions received by the Mooring Master in advance. In the event of any conflict, the export tanker Master's requirements shall prevail and Enterprise Oil will not be held responsible for any failure to comply with the Owner/Charterer's requirements.

Subject always to considerations of safety, the export tanker will normally stop the loading once the volume of oil agreed to be loaded has been loaded. Any advance arrangement for the storage vessel to stop the cargo must be made in writing. The request must include the statement by the export tanker's Master that Enterprise Oil will not be held responsible for any error, and that in case of the export tanker being overloaded, the excess cargo cannot be pumped back to the storage vessel.

The export tanker's Master will also be held responsible for any spills caused by this request.

Cargo Documentation and Inspection: Documents such as Bills of Lading, Quality Certificates, Quantity Certificates, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt of Documents/Samples, etc. are prepared at Camar Marine Terminal. When the export tanker has been loaded, the documents will be completed and taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Immediately upon completion of loading, the official Bill of Lading quantity will be relayed to the Mooring Master by radio. In the event of a dispute, the export tanker will be requested to recheck the measurement and calculations of the quantity. The Mooring Master will not witness such measurement and calculations of the quantity. After both ship and shore figures have been verified, should an appreciable difference still exist, receipt of a Letter of Protest will be acknowledged by the Mooring Master.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Enterprise Oil (Bawean) Ltd. The Mooring Master is only authorised to acknowledge receipt and not to accept such letters as correct.

From time to time owners, charterers, consignees and other interested parties may appoint third party cargo surveyors to survey the loading operation on their behalf. Any delays caused by the cargo surveyors shall be considered "vessel delays".

Notwithstanding any provisions contained elsewhere herein, Camar Marine Terminal Certificates shall be final and binding save for fraud or manifest error.

Departure Procedures: Immediately after the loading hose is disconnected and stored on the storage vessel and all cargo documentation has been completed, the export tanker will be unmoored. The export tanker will single up to one breast line and one spring line each end. The two tugs will be made fast at either end of the export tanker. All mooring lines will be released and the tugs will pull the export tanker away from the storage vessel. When the export tanker is safely clear the tugs will be released.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Crew changes not allowed.

SHORE LEAVE: Not allowed.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL/SEAMAN'S CLUBS: No facilities (Off-Shore Terminal).

CURRENCY: Rupiah.

SERVICES: No stores available. No crew mail can be received or sent.

WEATHER: The Camar Marine Terminal is an open unsheltered mooring. Weather conditions may preclude mooring operations or require the export tanker to unmoor before completing loading. In these circumstances good judgement should be used by the export tanker's Master, under the Mooring Master's advice as to what action to take.

Currents: In general these are up to 1.5 knots but can on occasion run to 2.5 knots.

Wave Heights: December to February (N.W. Monsoon season): The wave direction is predominantly West and N.W. and the wave height exceeds 6 ft. for 20% of the time.

March to May: Wave height exceeds 6 ft. for only 5% of the time. Wave direction is from the East and S.E.

June to October: (S.E. Monsoon season): The wave direction is predominantly East, S.E. and South and the wave height exceeds 6 ft. for 33% of the time. This is the roughest season.

November: Wave direction is predominantly East, S.E. and South and the wave height exceeds 6 ft. 2% of the time. This is the calmest period.

Air Temperatures: This averages about 82° F. and varies between 70° F. to 95° F. with occasional maximum temperature over 100° F.

Rainfall: Maximum occurs during the N.W. Monsoon season. The average rainfall is approximately 113 in. per year.

Humidity: The relative humidity is often in the range of 70% – 100%.

Sea Temperature: On the surface approximately 84° F. – 86° F.

GENERAL:

Responsible Officers: The man in overall control of the Marine Terminal and associated facilities is the Production Superintendent. The man co-ordinating marine activities and acting as "Mooring Master" is the Marine Superintendent.

Safety/Environmental Requirements: As for all tanker terminal operations, vessels visiting Camar Marine Terminal must comply with the minimum safety requirements specified in the "International Safety Guide for Oil Tankers and Terminals" (I.S.G.O.T.T.) and the O.C.I.M.F. "Recommendations for Ship to Ship Transfers". Vessels must also comply with the current SOLAS and MARPOL requirements.

When the Mooring Master boards the export tanker, he will present the Master with a safety booklet containing details of the safety and fire regulations and safety check list. When fully checked and understood, the regulations will be signed by both the Mooring Master and the ship's Master.

Safety and Fire Regulations will be strictly adhered to and the Mooring Master will make periodic checks to ensure that they are being enforced. If any infringements of these safety or environmental regulations are observed, they will be brought to the attention of the Master for corrective action. If no action is taken immediately, the Mooring Master will take such action that would appear to be most appropriate and shall advise the Master accordingly.

AGENCY:
Procedure for Appointing Agent: Indonesian Government Regulations require that Pertamina Directorate of Shipping and Telecommunications be appointed General Agent for all tankers proceeding to load in Indonesia.
Address: Pertamina Directorate of Shipping and Telecommunication, Attention: Agency Department, 19th Floor, Pertamina Building, Jl. Medan Merdeka Timur 1A, Jakarta, Indonesia. Cable address: Pertaminaship IA. Telex: 44450, 45348. Tel: 343 806, 303 3356, 303 3307, 303 3305.

For vessels arriving for the first time in Indonesian waters, owners or charterers are required to appoint Pertamina Directorate of Shipping and Telecommunication Agency Department as general agent to attend the vessel at Camar Marine Terminal by Letter of Appointment. This Letter of Appointment must be endorsed by the nearest Indonesian Consulate to point of dispatch of the letter, and this must be sent at least 2 weeks prior to the vessel's arrival. The above applies also to vessels which may have changed their name and vessels for whom the Letter of Appointment has expired. Owners or charterers can attach a list of vessels under their management which are scheduled to operate in Indonesian waters. In such cases, the single Letter of Appointment will be valid for all ships named in the letter. Letters of Appointment have a validity of one year after which they must be renewed. Each tanker entering tha Camar Marine Terminal must have been granted an entry or agency permit prior to its arrival. It is vital that the general agent receives the following information 2 weeks before the vessel's arrival, to enable the necessary permits to be obtained from the Government Directorate General of Sea Communications:

(a) Name and full address of owner.
(b) Name of tanker and call sign.
(c) Deadweight tonnage and length overall.
(d) Flag and port of registry.
(e) Certificate of Registration number.
(f) Name of Master.
(g) Number of crew.
(h) ETA at Camar Marine Terminal.
(i) Last port of call.
(j) Intended Indonesian ports of call.
(k) Destination after loading.
(l) Quantity and type of crude oil to be loaded.

Owners or Charterers of vessels loading at the Camar Terminal are deemed to warrant that an agent has been appointed and that all permits required from time to time have been obtained. Owners and Charterers shall hold Enterprise harmless from any and all consequence of any failure of the vessel to comply with Indonesian Government Regulations.
Advance Payment: Advance payment for Government and port charges should be sent to:
Pertamina Agency, (account No. 11.51.006.000.0005), Bank Negara Indonesia, Cabang Gambir, Jl. Kebon Sirih 77A, Jakarta, Indonesia.

To facilitate handling preparation, owners/charterers are required to telex "Pertamina Directorate of Shipping and Telecommunication" advising Telegraphic Transfer (T.T.) number, the name of the vessel for which the T.T. is made and the Indonesian Ports of call. Telex numbers are 44450 and 45348. In those instances where advance payment exceeds the actual port charges and disbursements the balance will be credited to the owners/charterers accounts or remitted by the agent. Neither Pertamina nor Enterprise will be responsible for demurrage, expenses or other charges resulting from failure to pre-arrange obligations in this manner.

AUTHORITY:
Operator: Enterprise Oil (Bawean) Ltd., P.O.Box 97/JKWK, Landmark Center, 21st Floor, Jl. Jend. Sudirman No. 1, Jakarta 12910, Indonesia. *Tel:* 0062-21-571-2707, 0062-21-520-9551. *Telex:* 62912 Eprise IA. *FAX:* 0062-21-571-2755, 0062-21-570-0385. *Contact:* Captain M.E.Hancock, Marine Adviser.

CIGADING: 06.00 S. 105.57 E.

SHIPMASTER'S REPORT: January 1986.

LOCATION: The Port of Cigading is situated in position: Lat. 06° 00.3' S., Long. 105° 57.5' E. and about 45 nautical miles N.E. of the entrance to Sunda Strait. The port is under the control of Port Merak, which is approximately 15 km. – 18 km. N.E. of Port Cigading.

DOCUMENTS: Crew Personal Effects Declaration, Provisions List, Bonded Stores List, Crew List, Currency List, Seaman's Books, Passports.

APPROACHES: Vessels can approach this port any time during day or night. But no berthing possible after sunset.

PILOTAGE: Pilot station located at Merak. Pilot station on VHF Channel 12. Call sign "Kilo Bravo". Station also guards Channel 16, with working Channels 13 and 14. Pilot boat guards Channel 12.
Ports attended by Pilot at Banten area:

1. Brown & Root Terminal.
2. Port of Banten.
3. Cigading Terminal.
4. Unggul Indan Corp. Jetty.
5. Dover Chemical Jetty.
6. Prointal Chemical Jetty.
7. Depot Pertamina Terminal.
8. Merak/Ferry Terminal.
9. I.P.I/Tg. Serong Terminal.
10. Suralaya PLTU Coal/Oil Jetty.
11. Polychem Lindon Jetty.

Also see "Radio".

ANCHORAGES: Vessels awaiting berth can safely anchor 4 cables N.E. of the berth in a depth of 22 m. – 24 m. The currents are very strong in this area. The vessel experienced 3–4 knots of current from Northeasterly and Southwesterly directions, changing every 12 hours, depending upon the tide. Vessels are advised to pay out substantial amounts of cable in order to retain the anchor position.

HEALTH: The Health Authorities board the vessel for Pratique. All international health regulations are followed. The officer checks all the vaccination books for inoculations. Ships arriving from African or South American ports are required to have yellow fever certificates. Pratique is granted only after the officials check all the papers and complete formalities.

RADIO: Radio Jakarta 500 kHz. Call sign JKI.
Arrival Advice: 48 hours before arrival at Cigading, it is essential to cable the local Agents, the full details of the vessel and ETA, including the requirements of pilot service for berthing the vessel. The Pilot is stationed at Merak, as and when any vessel calls at Cigading, the Pilot is arranged from Merak. There is only one Pilot supplied from Jakarta for Merak, Cigading and other minor ports. Pilotage is maintained by the pilotage division of the port of Banten.

Chief Pilot/Harbour Pilot: Sukendear Hadi Utomo. Office: 105 Pulorida Street, Merak-West of Java, Indonesia. Tel: 367808/367594, ext. 194 via P&T. Residence: Jl Raya Anyer No. 03, Komplek B.P.P., Tegal Ratu Cigading, West of Java, Indonesia.

24 hour service is available. Masters or Agents are requested to advise the Pilot whenever there is a change in an ETA.

TUGS: There are 4 small tugs, stationed at Cigading, each approximately 800 b.h.p. These tugs are generally used for towing barges and also utilised for ships berthing at Cigading. Vessels are unberthed at any time during day or night.

BERTHING: There is only 1 long berth extending well into the sea, running in a N.E./S.W. direction. The length of the berth is 550 m. and the breadth approximately 55 m. The outer portion of the berth is utilised for discharging iron ore and has 2 unloading arms. It is mobile and rail mounted. Maximum outreach of unloader from fender face is 24 m. The unloader has grabs, each with capacity of 10 tons. Minimum air-draft to be be maintained at berth, 15.9 m. during maximum high tide in ballast condition. The S.W. portion of the berth is utilised for loading sponge iron, and has one loader. During our stay the loader was not operational. Ships were loaded by truck loads. 2 small vessels of 4,000–5,000 d.w.t. capacity can be berthed alongside simultaneously. The inner portion of the berth, particularly the Northeasterly portion, is utilised by general cargo ships of lesser draft and length. The depth of water at the inner berth is said to be 11 m. plus tide. The depth of water at the outer berth is about 14.5 m. plus rise of tide. The inner portion of the berth is angled in the mid-section. The closed conveyor belts and necessary installations running overhead, almost in a Southeasterly direction. A wide road runs below.

The iron ore discharge from the vessel is fed solely through the conveyor to the steel plant. The steel plant is directly connected by the said conveyor. The "Karakatu Steel Plant" or works, (government owned) is situated approximately 7 km. N.E. of the berth.

The discharging rate at the berth is 700 tonnes/h., allowing for the breakdown of the conveyor at times.

Our vessel: LOA 245 m. Beam 32 m. Max. arrival draft 13.70 m. D.W.T.: 76,900 tonnes. Discharged 71,500 tonnes of iron ore pellets from Brazil in 6 days.

MEDICAL: Hospital, doctor and inoculations are available at Cilegon and Merak. Serious cases to be attended to at Jakarta.

DENSITY: 1022.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Not compulsory.

CUSTOMS ALLOWANCES: Allowances are as per Jakarta requirements. Personal declaration forms are essential. All electronic goods and currency must be declared on the personal property declaration. Beside this, Provisions List and Bond Statement is also essential (1 copy each), along with the Crew List (1 copy).

REPATRIATION: Possible. During repatriation crew baggage is thoroughly checked by the Customs. Any electronic goods in possession of crew are entered in the individual passports.

AIRPORT: Jakarta, 3 hours by road.

BANKS: Banking facilities available at Cilegon. Several Indonesian National Banks have branches at Cilegon. Travellers' cheques are honoured in the shopping complexes.

SHORE LEAVE: No restrictions.

Immigration authorities take away all Seamen's Books/Passports into their custody. Identity Cards are issued to each crew member. Seamen's Books/Passports are returned to the vessel prior departure.

Shore leave passes to be carried by the crew member when going ashore.

GENERAL:
Provisions: Available.
Agency: Karana Line are the recommended Agents at Cigading. They have an office situated at nearest town – Cilegon. Karana Line have long-term contracts with the Indonesian Government for supply of iron ore to the existing steel works near Cigading.
Head Office: Address. Jl. Kali Besar Timur 30 Jkt. Tel: 679103 (5 lines). Telex: (011) 42727, 42895. Cable Address: Karana Line. P.O.Box 81. Office: Jl. Raya Cilegon No. 31. Tel: 157-7.6378 (K S) Cilegon.
Karana Line have representation on board throughout the ship's stay. Hence communication was excellent and smooth. All other appointed Agents have to come from Jakarta, which is about 130 km. from Cigading. No other Agency has an office near the port.

SHIPMASTER'S REPORT: June 1988.

DOCUMENTS:
8 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.

The following documents are taken ashore and returned with the clearance outward:
Certificate of Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Derat Exemption Certificate.
Health Book.
Last Port Clearance.

PILOTAGE: Pilot boards from a launch which is equipped with VHF. I was advised that pilotage was only available during daylight hours.

ANCHORAGE: The anchorage is about 4 cables N.W. of the Northern end of the jetty, in position 6° 00.4' N., 105° 57.2' E. Depth of water is about 20 m.

RADIO: Communications were via Agent in Jakarta as the port is not equipped with facilities. The Agent should be given 10 days, 5 days, 3 days, 2 days and 1 days Notice of Arrival.

TUGS: 2×3,000 h.p. tugs available.

BERTHING: There are 4 berths available with a depth alongside of 14.0 m. In addition, 2 cargo wharves and a timber terminal are being developed nearby.

The vessel loaded a cargo of steel products and the approximate loading rate is 6,000 tonnes per day, but this is subject to supply of trucks and reliability of fork lifts.

There is no shore gear for working general cargo. There are two unloaders for ore and coal imports and a bulk loader which is used for turnings and other mill waste.

STEVEDORES: Work throughout 24 hours.

MEDICAL: Facilities available.

FRESH WATER: Available at jetty.

CONSULS: At Jakarta.

REPAIRS: No facilities available.

SURVEYORS: Based in Jakarta.

REPATRIATION: Can be arranged via Jakarta.

GENERAL: *Stores:* Provisions and some stores can be obtained.

Communications: Communications are poor as Agent has no telephone or telex links. Krakatau Steel Company will allow use of their telephone and telex. Vessel was permitted to use her radio to send daily cargo reports.

Travel/Accommodation: Jakarta is about 110 km. by road. The Merak Beach Hotel is about 16 km. from the berth.

Shippers: P.T. Krakatau Steel and P.T. Cold Rolling Mill Indonesia Utama.

Agent: Vessel's Agent based at Cilegon.

Chart: B.A. Chart No. 918.

SHIPMASTER'S REPORT: November 1992.

TANKERS: Vessel ties between 4 buoys, with 3 small hose marking buoys on starboard side. After the vessel is secured between 4 buoys, the divers pick-up 2 under water hoses for connecting to ship's manifold.

Maximum Size of Vessel : 220 m.

Depth at the berth is approximately 18.0 m.

Pilot uses 3 tugs for berthing/unberthing, which are necessary for positioning the vessel and keeping it away from hose marking buoys.

Hoses are 2 × 10 in., although I received conflicting information regarding the sizes of hoses until the time of berthing, Agents and Cabot Chemicals kept insisting that the hoses were 8 in. each.

The vessel has to connect both hoses as they are part of the same line ashore.

Maximum pressure permitted is 4.0 kg. at the ship's manifold. Vessels must not increase this pressure as it causes leaks in underwater hoses and unnecessary delay to the vessel.

Wind is normally from the S.W., hence it is necessary to pass 4 good ropes to buoys on port side (forward and aft), and 3 ropes to buoys on starboard side.

Berthing/unberthing only in daylight, although I received conflicting information about it as well, until the time of departure.

The berth and the pipelines are owned by the steel factory and they receive a fuel oil tanker every 14/15 days. My ship was discharging Carbon Black for P.T. Cabot Chemicals, who normally hire the berth and pipeline facilities from steel factory to fill up their tanks once every 6 months.

CILACAP (Tjilatjap): 07.44 S. 109.00 E. **(See Plan)**

(a) CILACAP PORT.
(b) CILACAP – IRON SAND PORT.

(a) CILACAP PORT.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Passports and Seaman's Books.
Stowage Plan.
Personal Effects List.
Bills of Lading.
Ship's Articles.
Ship's Stores List.
Other certificates and documents as required.

PILOTAGE: Compulsory. 8 Harbour Pilots available. 6 hours notice required for berthing and 3 hours notice required for unberthing. Pilot available 24 hours for vessels up to 150 m. LOA and tankers under 36,000 d.w.t. and daytime only up to 1800 hrs. for vessels over 150 m. LOA and tankers over 36,000 d.w.t.

Pilot station on VHF Channels 12, 14 and 16.

Pilot station position: Lat. 07° 44' 30" S., Long. 108° 59' 46" E.

ANCHORAGES:

Cargo Ships:	07° 45' 25.0" S. 109° 02' 50.0" E.	and	07° 46' 26.8" S. 109° 03' 07.0" E.
	To		
	07° 45' 34.0" S. 109° 03' 12.2" E.	and	07° 46' 22.5" S. 109° 03' 37.0" E.
Tankers:	07° 45' 38.0" S. 109° 03' 12.2" E.	and	07° 46' 22.5" S. 109° 04' 28.5" E.
	To		
	07° 45' 38.0" S. 109° 03' 48.5" E.	and	07° 46' 10.0" S. 109° 04' 28.5" E.

RESTRICTIONS: Least depths at the bar and in the channel are 70 dm. at LWS.

Current: Semi-diurnal. By the influence of the Donan River, especially during the rainy season, the duration of the outgoing current is longer than that of the ingoing. In the rainy season the outgoing current can reach 5 knots.

Channel Depths: Depths in metres at LWS.

	Crude Island Berths	Area 70	Area 60	Barge Dock
Outer Channel	17.0	17.0	17.0	7.0
Entrance Channel	16.0	14.5	12.1	4.0
Inner Channel	14.5	12.1	7.0	4.0
Berth/Port Basin	17.0	13.0	8.0	4.0
Turning Basin	14.5	13.0	8.0	–

Minimum Underkeel Clearance:

Outer Channel	2.64 m. or 20% draft
Entrance Channel	2.00 m. or 15% draft
Inner Channel	1.32 m. or 10% draft
Turning Basin (Crude Island Berth)	1.32 m. or 10% draft
Channel/Basin of Area 70	1.10 m. or 10% draft
Channel/Basin of Area 60	0.55 m. or 10% draft

MAX. SIZE:
Cargo Vessels: Max. LOA 186 m. Max. draft at HW 9.5 m.
Tankers: Max. d.w.t. 85,000. Max. LOA 250 m. Max draft 12.0 m.

Also see "Tankers".

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a Provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The Provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further Provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO: Cilacap Coastal Radio Station. Call sign PKR-3. Frequencies: 500, 474 and 8714 kHz. Station also on VHF Channel 16.

Tankers: Cilacap Radio (PKR-6) is owned and operated by Pertamina. The station keeps 24 hour watch on 500 kHz and works on 542 kHz with power of 1 kW. See "Radio Signals" for other working frequencies.

Advice of Arrival: The Master of a vessel shall advise "Pertaminaship" 72 hours prior to arrival at Cilacap Port regarding the ETA and other requirements by cable/telex via Pertamina's Coastal Radio Station (call sign PKR-6) or via Cilacap Radio (PKR-3) or Jakarta Radio (PKX-2). The ETA advice to be confirmed 48 hours and 24 hours before arrival.

Details of arrival cable/telex: The following information shall be included in the Master's cable:
Name of vessel, call sign and Nationality.
ETA and date in local time (GMT + 7 hours).
Any ballast on board (type and quantity).
Deballasting time.
Maximum loading rate.
Clean Bill of Health.
Flange sizes of vessel's manifold.
Last port of call.

VHF: Pilot on Channels 16 and 20. Pertamina on Channels 16, 9 and 19.

Tankers: Masters of vessels arriving at Cilacap are requested to contact "Pertamina Shipping" either through Coastal Radio Station (PKR-6) on VHF Channel 16 and 19 or direct by VHF Channel 16.

TUGS: 1×870 h.p., 1×1,700 h.p. (twin-screw).

Tankers: Pertamina: 4 tugs. 3×3,000 h.p. ("Z" peller) and 1×1,740 h.p. (twin-screw).

Tug Requirements: Tankers require the following under normal conditions for berthing and unberthing.

LOA up 100 m.	1 tug.
LOA 101 m. – 150 m.	2 tugs.
LOA 151 m. – 200 m.	3 tugs.
LOA over 200 m.	4 tugs.

BERTHING: Outer Roads while waiting for the Pilot during the West monsoon a safe anchorage in 12 m. water. During the S.E. monsoon not a safe anchorage. Inner Roads, under all circumstances a safe anchorage in 9 m. water in the vicinity of Nusa Kambangan opposite the quays for small crafts and East of Tg. Sodong. Vessels over 80 m. length have to moor due to limited swinging space, current and winds.

Notice of Readiness: Upon arrival in the anchorage area and if the vessel is ready in every respect to load/unload, the Master may tender his Notice of Readiness.

Notice of Readiness will be accepted by Loading Master/Oil Inspector once the vessel is alongside the jetty.

Hoses/Loading Arm Connections: The loading hoses will be hoisted individually by the vessel's gear. The hoses/loading arms will be connected/disconnected by shore personnel under direction of the Loading Master. Assistance is required from the vessel's personnel to operate crane, boom, winches, etc. Unused cargo and bunker connections to be blanked off. The Master will inspect and ensure to his satisfaction that cargo loading hoses/arms between shore and ship are in good condition.

Equipment: Vessel must be equipped with the necessary lifting gear, i.e. derrick, blocks, tackle, gaskets, wrenches, bolts and nuts, deck hose stand and adaptors.

Pre-Loading Notification: One hour's notice shall be given by the vessel to the Loading Master before her cargo tanks are completely empty or ready to be inspected.

Before Loading: Before loading commences, the Master will check that International and Port Regulations pertaining to the safety of the vessel and terminal have been complied with, that the vessel is manned and in all respects ready to receive cargo and that all precautions required by circumstances have been taken.

Agreed Communications During Loading: The Terminal's personnel will be at the jetty at all times during the loading operation.

All communications related to the loading of the vessel must be passed to the Loading Master, who will remain in contact with the control room constantly.

Failure of Communications: If communications with the control room fail, operations will be stopped until communications have been re-established.

Loading Rate: Loading is commenced by gravity and when the vessel informs that oil is flowing into the tank the loading rate will be increased up to the required rate. A responsible member of the crew will be stationed on the main deck all the time and will maintain communication and remain in visual contact with the shore operator during loading.

He will advise the operator when changes are required in loading rate and in the event of an oil spill he will notify the Loading Master immediately.

The Loading Master will coordinate the cleaning of the oil in the water.

Topping-Off: The vessel must give 4 hours notice to the Loading Master before starting to "TOP-OFF" and must advise if decrease in loading rate is desired.

Completion of Loading: The vessel must give one hour's notice to the Loading Master before completion of loading.

On completion of loading, all pumps will be stopped and the 2 butterfly valves on the loading arm will be closed and the loading arm will be disconnected before being lowered. There should be no leakages and all cargo tank openings on the tanker must be closed immediately after samples have been taken by shore laboratory personnel.

Leaking Oil Tankers: If during loading it is noticed that oil is leaking from the tanker, loading must stop and the tanker may have to leave the berth at the discretion of the Senior Terminal Representative. Loading will be resumed if repairs have been carried out to the tanker to the satisfaction of the Senior Terminal Representative.

Cargo Documents: All documents to be completed as soon as possible after loading is completed. Signing of these documents, by the Master, is at the same time final departure clearance formalities are being carried out.

Loading documents such as Bill of Lading, Quality and Quantity Certificate, Dry Certificate, Ullage Report, Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at the terminal.

Before Discharging: Before discharging commences the Loading Master will inspect the ullages and sealed overboard and sea valves. Cargo in each tank will be sampled by shore laboratory's personnel. The ship's discharge pumps can be started after the shore pipelines and tanks are stated ready to receive cargo from the tanker.

Discharge Rate: Discharge should be started at slow rate and be increased to the agreed rate (as itemised in agreed discharge plan) once both parties are satisfied that the flow of oil to and from designated tanks is confirmed. During discharge the flow of cargo should be controlled by ship's crew in accordance with the arrival agreement. The discharge rate should not be substantially changed without informing the shore.

Stripping and Draining of Cargo Tanks: If a slop tank or other selected tank is being used to receive the drainings of tanks being stripped, the ship's personnel should be alerted and aware that the oil level in the receiving tank will be increased. Special care should be taken to avoid an overflow and oil spill.

Completion of Discharge: As soon as discharge is completed the Master and Loading Master will inspect the cargo tanks to ensure that all tanks are in a dry condition. They will then sign the Dry Certificate at the same time.

Hose Disconnection: Before hoses or arms are disconnected the drain cocks at the ship's manifold should be opened into a drain tank or drip pan.

Cargo manifolds and hoses or arms should be blanked-off after disconnection.

Outward Clearance Report: The Master of a vessel is requested to report to Pertaminaship agent once vessel has crossed the outer bar (Buoy No. 'O').

Oil Pollution by Tanker: The Master of the vessel shall be responsible for any oil pollution caused by his vessel or crew.

He should sign the oil pollution statement for P&I Club (insurance) purposes.

Authority: Pertamina P&T UP – IV, Area 70 Benteng Pendem, Cilacap 53221, Indonesia. Tel: (0282) 22276. Telex: 22380 PEKC CP. Fax: (0282) 22853, 21710.

Also see "Shipmaster's Reports" and "General" before first port.

PORT EQUIPMENT:
Cranes: 1 mobile crane with lifting capacity of 15 tons.
Forklifts: 1×10 ton, 1×7.5 ton, 2×5 ton, 2×3.5 ton, 4×3 ton and 3×2 ton.

DENSITY: 1012 – 1020.

FRESH WATER: Water is supplied through pipelines to the wharves, capacity 10 t.p.h. – 15 t.p.h.

FUEL: Bunkers (M.D.F., M.F.O., H.S.D.) available alongside by pipeline. Supplier is State Corporation Pertamina. Rate 60 t.p.h.

CONSULS: None.

AIRPORT: Tunggul Wulung Airport. Distance from port 14 km. Served by Merpati Nusantara Airline with daily flights to and from Jakarta.

TIME: GMT plus 7 hours.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

Ship's Inspection Team: Consisting of members of the Port Authority. This team will search the vessel, after the ship is cleared by the Port Medical Officer. Prior to mentioned search no Cargo handling is allowed. This Team will search the Store Rooms and Cargo hatches, and subsequently seals the Bonded Stores and Radio Transmitter. Careful attention should be given in making up the Store Lists, as any difference found in the items declared and discovered during the search may lead to difficulties.

SHORE LEAVE: When leaving and entering the Custom's Area the crew is checked on the basis of the Crew List and Identification Cards and searched.

GENERAL: *Charts:* Indonesian Charts No. 69 and 108. British Admiralty Charts No. 912 and 1653B.

DEVELOPMENTS: Dockyard for ship repairs under construction.

Pusri Jetty for fertiliser under construction.

SHIPMASTER'S REPORT: August 1985.

Vessel (31,000 d.w.t.) entered Cilacap to load a cargo of gas oil for discharge at Bukom (Singapore). Unfamiliarity together with no chart for the port onboard created some difficulties, but in fact, it is quite an open approach to the port. However, entry into the dredged channel should not be attempted without guidance if the Pilot cannot board the vessel due to strong Southeasterly winds and heavy swell.

Port Limits: Not clearly defined, but assumed to start in area of the Channel Entrance Buoy.

Documents: All officials board after berthing.

Customs were satisfied with 3 detailed copies of Personal Effects and Currency Declarations, plus 3 copies of Bonded and Ship's Provisions Stores.

Immigration require 3 Crew Lists, Agents 2 copies and Customs 2 copies. Port Health also require 2 copies. Immigration also require all Passports (or Discharge Books where Passport not available) to stamp entry and issue Shore Passes. Passports are re-stamped with exit stamp prior to departure and Shore Passes must be returned, before sailing.

2 Officials board from Port Health and require Master to complete and sign Health Declaration and they check Yellow Fever/Cholera Vaccination Certificates (all up to date). If onboard, they also require the Indonesian Health Book.

For the Harbour Master, the Agent will collect the following documents for sighting ashore on signed receipt: Last Port Clearance, Certificate of Registry, Load Line Certificate, Safety Construction Certificate, Safety Equipment Certificate, Radio Safety Certificate, Derat Certificate, Tonnage Certificate, Certificates of Class, Hull and Machinery (both new building and completion of Survey Cycle), I.O.P.P., TOVALOP and Safe Manning Certificate.

Agent also presents cargo manifests for signing for Customs. Bills of Lading for petroleum cargoes are issued on Pertamina Bills of Lading and others cannot be used or Pertamina's endorsed. Issue usual protests as per Charter Party instructions.

Radio/VHF: W/T as per Vol. 6. Station PKR6, very helpful, with good English will contact Agent for vessel – no charges for service. Closer to port, Pilots work Channel 12 and Agents (Pertamina Agency) works on Channel 19.

Pilotage: Refer Pilot Book 34 Vol. II, page 50, Chapter 3.25 – the details re. Tg. Cimiring Lighthouse not applicable to deep draft vessels as too far offshore to see any signals (6 – 8 miles). The lighthouse is also very difficult to spot during the day due to trees. Call on VHF Channels 19/12 as indicated above. Chart coverage of the area is very poor. Tg. Cimiring should not be approached closer than 5 – 6 miles and the headland rounded at this distance, unless local knowledge available. Good depths of water available if Pilot Book directions followed to Channel Entance Buoy shown on B.A. Chart 912. However, B.A. Chart 912 (issued March 1985) is full of inaccuracies. Namely:

1. The buoyed channel has a dredged depth of approximately 11 m. which is not indicated.
2. Some leading line beacon lights are in the incorrect position on the chart, or if correctly charted, do not show the present correct direction of approach.
3. Existing leading beacons bear no relationship to present channel.
4. Several buoys are not shown or position is doubtful. Characteristics, shape and topmarks also vary to those shown on B.A. Chart 912. However, the Approach Channel is reasonably well marked and vessels should experience no difficulties as channel buoys follow IALA system.

Comments in the Pilot Book Chapter 3.26 concerning a black No. 1 Buoy (1.60) and the light beacons (L36-50) should be disregarded. However, the caution re. tidal streams heeded. (L36-50). Our vessel experienced a strong Southeasterly set onto the Channel Entrance Buoy at half ebb despite Southeasterly winds Force 4 – 5. Considerable wallowing in the swell was experienced and a good underkeel clearance should be maintained at all times.

Comments in the Pilot Book re. Pilots boarding in the S.E. monsoon season are correct (R23-28). During the Southeasterly monsoon, the combined wind and seas/swell make boarding in the Outer Roads hazardous and transit via the dredged channel to more sheltered waters between Buoy Nos. 5 and 7 (abeam of Kg. Rempak) is required. However, Shipmasters with little or no local knowledge should request the tug to meet them at the Entrance Buoy and then act as lead boat along the channel (imperative if no local chart onboard). Local Pilots and tugs very competent as Cilacap is quite a busy oil port. The Outer Buoy referred to in Chaper 3.28 on page 51 (lines L27-29) does not exist, but directions given are sound.

Anchorages: Covered in Appendix of 34, Volume II. Several tankers observed at anchor in S.E. Force 5 – 6 winds with swells of 2 m. – 3 m. – no shelter afforded in Southeasterly monsoon weather, but reported as secure anchorage. Mined areas still exist.

Restrictions: Max. permissible draft is 10.5 m. (SW). However, always check. No written information re. depths was available to the Master or table of Tidal Predictions (appeared to have been produced locally) offered, although latter printed. Shipmasters should insist on a copy being placed onboard. Caution is also required on receiving sailing times. We refused to sail on falling tide when instructed and chose to depart at 1 hour before HW. Echo sounder trace indicated a minimum depth average of 4 m. recorded throughout passage to channel, except for one shoal patch abeam of the Ore Jetty, showing 0.3 – 0.6 m. UKC. The predicted tidal range at the times in question was approximately 1.3 m. So on LW, likely UKC would have been 2.5 m. However, the Pilot indicated that the actual depths of water available on the West side of the river are not really known and as vessel has to be swung prior to sailing, it seemed prudent to have as much water as possible. If berthed starboard side to at Cilacap Berths (East side of river), vessel turns bow to jetty on last of flood or bow out on ebb tide. Daylight sailing only if vessel requires to swing prior to sailing. Otherwise, vessel can sail any time. Those vessels berthed on S.W. side of the river (on Nusa Kambangan) appear to berth laden facing upstream and swing in the turning basin S.E. of the Ore Jetty in ballast.

Tugs: 3 vertical screw tugs of 3,500 h.p. plus a smaller unit. Tugs adopt push/pull practice. Very efficient.

Berths: At Cilacap, 3 modern 'T' head jetties with Chicksan loading arms and a storing crane. Use ship's gangway. Terminal security is very good with a Security Guard and shore jetty man in attendance at all times. Entry to the terminal is by pass or written authorisation only. Jetties are designed for vessels in 150 m. – 200 m. length range. There are 2 similar jetties in the S.W. corner of the river downstream in the first bend for larger vessels. There was one vessel of 230 m. length alongside during our visit. Again, modern 'T' head construction with dolphins.

Tankers: Shore present 4×10 in. Chicksan arms. High loading rates achieveable. 1,800 cu.m.p.h. until hastily slowed down as was vessels max. loading rate on one line. Cargo papers take about 4 – 5 hours. Independent Surveyor appointed who was very efficient. No lab available for final density, so it more than 2 shore tanks loaded, surveyor takes mean of 4 – 5 samples drawn from ship's tanks to establish Bill of Lading Relative Density. No final density given by shore.

Density: Lowest recorded was 1022 at half tide flood, but probably lower in the rainy season.

Fire Precautions: Good check list procedures and detailed tank preparation/loading and discharge instructions given by Terminal Representative.

Surveyors: See "Tankers".

Gangway/Watchmen: See "Berthing".

Customs Allowances: 200 cigarettes and 1 case of beer and 1 bottle of spirits. No rummaging took place.

Time: GMT plus 7 hours all year round.

Storing: (See "Prelims"). Several chandlers available, Pertamina vessels store locally. Believe locally supplied fresh vegetables and fruits of good value. All meats butchered locally.

1. Truck.
2. Not available.
3. Goods would have to be brought to vessel on handcart (nearly 0.5 miles on Jetty 3).
4. Would imagine shipchandler would provide labour.

Shore Leave: Passes essential. Currency regulations not strictly enforced. Local trishaw costs about Sing.$10.00 per person return to town. Locals very friendly. Area best described as rural. Jakarta is 1 hours flight, 4 hours by car and 6 hours by train from Cilacap.

SHIPMASTER'S REPORT: August 1992.

Pilotage: Boat reluctant to come outside, but channel clearly marked and easy approach, except for heavy swell.

Anchorage: Best to anchor well out to avoid swell.

Restrictions: Channel showed 16.0 m. depth throughout approach to Crude Oil Terminal.

No draft restrictions given by Pilot (vessel was 12.2 m. draft).

Berth: Crude Oil Terminal. All ships berth port side to in daylight hours only.

Vessel discharged through 2×12 in. hoses.

No access to shore, except by Pertamina launch, which is irregular and unreliable.

AUTHORITY: Department Perhubungan, Perusahaan Umum Pelabuhan 111, Cabang, Cilacap, Jalan Laut Jawa, Pelabuhan Cilacap. *Tel:* (0282) 21334, 22651, 22652, 22653. *Contact:* Soeroso Prawirosiswojo, Branch Manager. Sojoto Prawirodirjo, Harbour Master.

(b) CILACAP – IRON SAND PORT.

LOCATION: Iron Sand Jetty (loading installation) is situated at the Port of Cilacap, South coast of Central Java, in position: Lat. 07° 45' 03" S., Long. 109° 00' 51" E.

FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessel's Number; Quarantine & Immigration Flag.

PILOTAGE: Pilotage is compulsory. Two Government Pilots are available.

There is one Pilot Station in position Lat. 07° 44' 08" S., Long.108° 59' 34" E. If vessel wishes to be piloted to Iron Sand Jetty on day of arrival vessel must arrive at the Pilot Station before 1500 hrs. local time at the latest provided the Pilot is available (information of which will be confirmed by Sub-Agent).

DOCUMENTS: To be produced upon vessel's arrival:

15 Crew Lists.
10 Passenger Lists.
5 Parcel Lists.
8 Stores Lists.
8 Cargo Manifests.
3 Narcotic Lists.
5 General Information (if any).
5 Personal Effects Lists.
5 Vaccination Lists.
Last Port Clearance.
10 Firearms & Ammunition Certificates.
10 Harbour Reports.
5 Crew's Radio and Camera Lists.
International Loadline Certificate.
Maritime Declaration of Health Certificate.
Safety Radio Certificate.
Health Book or Bill of Health.
Derat Certificate.
Safety Equipment Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.

Inspection Team: This team consists of the Port Health Officer, Custom Officer, Harbour Master, Immigration Officer and Police.

After the vessel is granted Free Pratique, the Immigration Officer will check Passports, Seaman's Books and Crew List and issue shore passes.

RESTRICTIONS: Vessels served on first come, first served basis. Vessels berth between 0600 hrs. and 1500 hrs. and leave during daylight hours on high water. The depths at LWS are: Alongside wharf, 13.0 m.; Channel Bar 11.30 m.

Vessel's Conditions: The height of vessel from water line to top of hatchcoaming or railing must not exceed 15 m. Each side deck breadth from bulwark to hatchcoaming must be preferably 7 m. minimum and 9 m. maximum.

MAX. SIZE: LOA 186 m. Max. draft 10.40 m. Deeper possible but it depends on depth at the time of passing bar and after consultation with the Harbour Master.

RADIO: Messages to Pasirbesi Cilacap can be sent through Cilacap Coastal Radio Station, call sign PKR 3.

Arrival Notice – Information Required:

Owner's Advice: Owner or Agent to advise by cable to Anekatambang Jakarta and Pasirbesi Cilacap at least 10 working days before vessel's expected arrival at the loading port.

Master's Advice: At least 48 hours before vessel's arrival at Cilacap Pilot Station, the ship's Master or Agent shall give the following information to Anekatambang Jakarta and Pasirbesi Cilacap: Last port of call, draft on arrival, quantity of iron sand to be loaded, stowage plan (hatch division for iron sand cargo) and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Pasirbesi Cilacap waits for the Master's telegram in order to make necessary preparation such as ordering Pilot etc.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING:

Mooring: Vessels are moored alongside 1 jetty and 6 dolphins with 4 bollards with good nylon ropes, 4 fore, 4 aft, 1 fore breastline and 1 after breastline. Distance between the two extreme dolphins is 160 m.

Loading Facilities: Loading installation consists of one boom (stacker), iron sand is loaded into the hold of the vessel by means of conveyor belt. Boom can be hoisted vertically from 00° to 60° but the maximum position for proper operation is only up to 15° inclination angle and can swing 26.85 m. (60°) to each side. The length of boom is 33.33 m. The maximum outreach is about 16.33 m. from jetty to seaward.

Loading Capacity: About 400 – 500 t.p.h., however, it depends on the type of vessel, cargo space and size of hatches available.

Weighing: The iron sand is automatically weighed during loading by means of weightometer. The specific gravity of iron sand is around 2.60.

Unloading: Cargo for Aneka Tambang only.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's Crew members.

STEVEDORES: Loading is performed by shipper's personnel. Loading equipment to be furnished by the vessel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Idulfitri (the fixed 2 consecutive days of the year; Idul Adha (the fixed day of the year); Independence Day (the fixed day of the year); Maulid Day (the fixed day of the year); Easter (the fixed day of the year; Waisyak (the fixed day of the year); Nyepi (the fixed day of the year); Ascension (the fixed day of the year); the first Muharram (the fixed day of the year) and Christmas Day (December 25th). For definite dates consult Port Administrator.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Cilacap Port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

TIME: GMT plus 7 hours.

REPATRIATION: Can be arranged. Repatriant to be guarded by Immigration Officer from Cilacap to Jakarta until his departure from Jakarta to the destined country.

SHORE LEAVE:

General: Crew members are permitted only to go to Cilacap. Shore pass must be carried by crew during shore visit.

Going beyond Cilacap is prohibited without special landing permit, which can be issued by the local Immigration Officer through Agents.

Visitors: Crew members are not allowed to invite friends, hawkers from shore aboard the vessel. It is also prohibited to lower lifeboats or rafts for purpose of fishing, sailing, visits to nearby islands, etc.

At Anchorage: While lying at anchor awaiting berth, no one is allowed to go ashore until vessel cleared.

Shore Leave Hours: From 0600 hrs. to 2300 hrs. local time.

GENERAL:

Fumigation: No facilities.

Nature of Bottom: Sand and hard materials.

Currents: Direction: at high tide, from East to West; at ebb tide, from West to East. Velocity: around 3-5 knots.

Chart: Indonesian Sea Chart No. 108.

AUTHORITY: *Shipper's Local Office:* P.T. Aneka Tambang (Persero), Unit Pertambangan Pasir Besi, Cilacap. Jalan Penyu, P.O.Box 123, Cilacap Central Java. *Cable Address:* Pasirbesi Cilacap. *Tel:* 22142, 22143. *Telex:* 22457. *FAX:* (0282) 22217.

CINTA TERMINAL: 05.27 S. 106.15 E. (See Plan)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:

Maritime International Declaration of Health.
Valid Derat or Exemption Certificate.
6 copies of Crew Lists.
Passenger List, if any.
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seaman's Books for all Crew members or passengers.
Notice of Readiness.
Indonesian Consular Clearance.
1 Crew Declaration of Personal Belongings.
1 Ship's Stores Inventory.
6 copies of Cargo Manifest for Cinta Terminal loading.
1 Copy of Cargo Manifest for Transit Cargo with a Summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyd's" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all manila or synthetic lines for mooring use. Vessels must also have 2 chain stoppers of 3 in. diameter chain, 3.0 m. from the Panama Lead, or fairlead with minimum 20 in. diameter opening.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is Lat. 5° 25' 25" S., Long. 106° 11' 09" E. with a radius of 1 mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The holding area is West of the Export SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTED AREA: The limits of the restricted area is covered by lines between points of the following positions:

AA.	Lat. 04° 48' S.,	Long. 106° 12' E.
BB.	Lat. 04° 48' S.,	Long. 106° 14' E.
CC.	Lat. 05° 04' S.,	Long. 106° 22' E.
DD.	Lat. 05° 04' S.,	Long. 106° 27' E.
EE.	Lat. 04° 56.5' S.,	Long. 106° 27' E.
FF.	Lat. 04° 56.5' S.,	Long. 106° 34' E.
GG.	Lat. 05° 00' S.,	Long. 106° 34' E.
HH.	Lat. 05° 00' S.,	Long. 106° 30' E.
JJ.	Lat. 05° 07' S.,	Long. 106° 30' E.
KK.	Lat. 05° 10' S.,	Long. 106° 26' E.
LL.	Lat. 05° 10' S.,	Long. 106° 25' E.
MM.	Lat. 05° 26' S.,	Long. 106° 28' E.
NN.	Lat. 05° 33' S.,	Long. 106° 18' E.
PP.	Lat. 05° 33' S.,	Long. 106° 14' E.
RR.	Lat. 05° 37' S.,	Long. 106° 14' E.
SS.	Lat. 05° 37' S.,	Long. 106° 09' E.
TT.	Lat. 05° 15' S.,	Long. 106° 09' E.
XX.	Lat. 05° 15' S.,	Long. 106° 04' E.
YY.	Lat. 05° 06' S.,	Long. 106° 04' E.
ZZ.	Lat. 05° 06' S.,	Long. 106° 10' E.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.

MAX. SIZE: *Minimum Size Tanker Acceptable:* The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. Size Tanker Acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 175,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to Maxus for any delays.

NAVIGATION AIDS: There are 2 SBMs, each fitted with 5 nautical mile white flashing light, flashing Morse code (U) at 15 second intervals.

The positions are as follows:

No. 1 Storage SBM: Lat. 05° 26' 40" S., Long. 106° 14' 42" E.

Permanently secured to this SBM is a large 602 ft. long barge "Cinta Natomas" used for storage of crude oil and accommodation, (headquarters of Cinta Terminal personnel). The barge shows lights and shapes as prescribed in the International Regulation for Preventing Collisions at Sea for vessels engaged in underwater operations. The barge is also equipped with a foghorn 5 second on, 55 second off, 5 second on, 10 second apart.

No. 1 Export SBM: Lat. 05° 25' 25" S., Long. 106° 14' 09" E.

Platform Co-ordinates:

Cinta-A	Lat. 05° 26' 24.46" S., Long. 106° 15' 44.73" E.
Cinta-B	Lat. 05° 27' 00.34" S., Long. 106° 15' 17.72" E.
Cinta-C	Lat. 05° 27' 00.33" S., Long. 106° 15' 19.57" E.
Cinta-D	Lat. 05° 28' 04.07" S., Long. 106° 14' 34.37" E.
Cinta-E	Lat. 05° 27' 44.93" S., Long. 106° 15' 23.22" E.
Cinta-F	Lat. 05° 27' 17.29" S., Long. 106° 14' 20.81" E.
Cinta-G	Lat. 05° 26' 49.77" S., Long. 106° 16' 11.19" E.
Cinta-H	Lat. 05° 25' 24.61" S., Long. 106° 16' 26.63" E.
Cinta-P	Lat. 05° 27' 02.51" S., Long. 106° 15' 19.25" E.
Cinta-P1	Lat. 05° 27' 04.63" S., Long. 106° 15' 19.25" E.
Duma-A	Lat. 05° 25' 37.59" S., Long. 106° 27' 46.26" E.
Farida-A	Lat. 05° 10' 52.30" S., Long. 106° 19' 44.70" E.
Farida-B	Lat. 05° 10' 36.50" S., Long. 106° 18' 41.60" E.
Farida-C	Lat. 05° 10' 36.50" S., Long. 106° 18' 41.60" E.
Gita-A	Lat. 05° 22' 11.38" S., Long. 106° 22' 45.00" E.

RADIO/VHF: *Cable Address:* "Maxus S.E.S. Jakarta". *Telex:* 44221-1A.

Operating Schedules and Frequencies: Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2, 4, 8 and 12 MHz bands and by International Marine VHF Channel 13.

Cinta Terminal (call sign: 6ZFT) particulars are as follows: Operated by Maxus South East Sumatra.

Position: Lat. 5° 26' 40" S., Long. 106° 14' 42" E.

Hours of operation: 24.

Frequencies	*Class*	*Power*	*Mode*
4456.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 – 156.30 MHz	Simplex		
12 – 156.60 MHz	Simplex		
13 – 156.65 MHz	Simplex		
14 – 156.70 MHz	Simplex		
16 – 156.80 MHz	Simplex		
20 – 157.00 MHz	Receive	161.60 MHz	Duplex
26 – 157.30 MHz	Receive	161.90 MHz	Duplex
28 – 157.40 MHz	Receive	162.00 MHz	Duplex

Notes: 6ZFT keeps continuous watch on 4456 kHz. 6ZFT keeps continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will be way of this station except should a vessel be unable to contact 6ZFT, she should send messages through: Singapore Radio/9VG or Pertamina Radio/PKI-2.

Initial Communications: It is most important that ships establish communications with the Cinta Terminal (6ZFT) not less than 72 hours prior to arrival at the Terminal, giving estimated time of arrival. Further ETA information should be sent when the vessel is 48 hours, 24 hours, 12 hours and 4 hours distant or any time a change of one hour in original ETA occurs. These messages should specifically state whether ETA is given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) will transmit a message to her giving preliminary requirements and details as to Terminal. Masters are urged to comply with this in all details in order to facilitate vessel turn-around and Government formalities.

Communications Within 4 Hours of Terminal: Once ships are within the 4 hours distance of Cinta Terminal (6ZFT) communication, valid radio-telephone communications on International marine VHF may be established on Channel 16. This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation will be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the Terminal.

Communication in Terminal: The Mooring Master will be in direct control of all ship communications while in the Terminal Area. Any unauthorised communications will be cause for cessation of all operations excepting clearing the berth, and the vessel's Notice of Readiness will be nullified immediately.

PRATIQUE: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Cinta Terminal area. These signals shall be displayed continuously until Pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port. The boarding officials will attend the incoming vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and when the tanker is in every respect ready to load, the Master may tender his Notice of Readiness. Notice of Readiness will not be accepted during periods when the Terminal is closed. The Terminal is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the Terminal will rest with the Terminal Superintendent. Tenders by vessels to load crude oil cargo will be normally accepted and berth assigned to vessels in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast (if any), and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These are under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administrative Offices are located on board the 143,391 d.w.t. crude storage barge *Cinta Natomas* permanently moored approximately 8,500 ft. on a line bearing 164° from the First Export SBM. The nearest port with facilities is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 13.5 m. in diameter, and designed to handle tankers in the 175,000 d.w.t. class. The buoy is equipped with dual 12 inch floating hose with ASA 150 lb. flanged connections. Both strings must be taken aboard. Loading rates will be from 11,000 to 20,000 barrels per hour range. The SBM is also provided with two permanently attached 15 inch circumference synthetic fibre floating mooring lines. These lines should be held under tension by the vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle head the following:

(a) Messenger lines on the forecastle head for bringing 2 mooring lines aboard from the SBM (mininum 6 in. circumference).
(b) Mooring winches on forecastle head for handling two 12 in. circumference synthetic fibre floating mooring lines from the SBM.
(c) Adequate chafing gear to prevent damage to mooring lines.
(d) Derrick rigged and ready to pick up from launch, mooring shackles, nylon strops and hose connection gear on the port side midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon strop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring Master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons minimum hoist size required.) Vessel's loading manifolds should be prepared for two 12 in. ASA 150 lb. Camlock flanged hose connections prior to vessel's arrival at Terminal. Vessel should have adaptors available if their flanges do not correspond to the loading hoses' flanges. For details of Camlock flanges see "Plan". Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8 in. hose connections to be removed; also, if necessary, "Y" pieces removed so that maximum flow through the 12 in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 17,000 b.p.h. (2,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyd's or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is the responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging Ballast at Night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Jakarta. All expenses will be charged to the ship owner.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed 1 litre of beer or 0.5 litres of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Indonesian Rupiah (Rp.).

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: July 1987.

The storage barge is moored to its own SBM.

After connecting the first line to the SBM, the Pilot goes forward and communicates with the bridge on VHF Channel 13.

CIREBON (Tjirebon): 06.41 S. 108.33 E. **(See Plan)**

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Compulsory. Applications made through Agent or to Port Administrator via Cirebon Radio.

ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35' 30" E. and the parallels of 06° 42' 15" S. and 06° 43' 40" S.

A light buoy on the position of Lat. 06° 42' 10" S., Long. 108° 36' 20" E. is placed on the guidance line to the entrance of the harbour.

RESTRICTIONS: Cirebon Roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong Light Buoy at port hand. Only ships with 5 m. max. draft can enter Inner Harbour and moor alongside wharves.

All other ships anchor at outer roads.

HEALTH: Usual international procedures.

RADIO: Cirebon Coastal Radio Station. Call sign PKZ-2. Working freq. 6491.5 kHz and 8799.5 kHz, watching freq. 6265 – 6285 kHz and 8204 – 8249 kHz. Working time 0030 – 0130 hrs. and 0600 – 0700 hrs. GMT.

VHF: Port on Channels 16, 12 and 14.

TUGS: Tug services available. Order through Agents.

BERTHING: Muarajati II Wharf: Length 238 m. Depth at LWS – 5.0 m.

Linggarjati Wharf: Length 131 m. Depth at LWS – 4.5 m.

STEVEDORES: Arranged by Agent.

MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.

TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.

DENSITY: 1025.

FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.

FUEL: Not available.

CONSULS: At Djakarta, 280 km. from Tjirebon.

REPAIRS: Light repairs only by local dockyard.

DRY DOCK: Graving dock of 600 d.w.t. capacity.

GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.

CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.

CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.

REPATRIATION: Can be arranged by Agents.

AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.

TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August); Maulud, Mir'adj and Idul Fitir determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitir (2 days) not guaranteed due to labour shortage.

POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.

SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.

IDENTIFICATION CARDS: Preferably Passports, Seamen's ID Cards (issued by maritime authorities; vessel's country).

DELAYS: Bad weather (mostly rain).

DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.

AUTHORITY: Port Administrator. *Tel:* (0231) 2697, 3688. *Telex:* 28292.

CIWANDAN: 06.01 S. 105.57 E. (See Plan)

SHIPMASTER'S REPORT: May 1995.

VESSEL:

LOA : 143.4 m.
Beam : 19.8 m.
Summer Draft : 9.06 m.
Max. Draft (Aft) : 9.29 m.
G.R.T. : 9,073 tons.
D.W.T. : 15,077 tonnes.
Cargo : 14,000 tonnes (Sugar).

LOCATION: Lat. 06° 01.05' S., Long. 105° 57.07' E., about 2.5 cables S.W. of Cigading Jetty.

DOCUMENTS: See "Cigading".

APPROACHES: The vessel approaches on a course of 061°(T) from West of Pulau Ular Island. When the island bore 180° at a distance of 1.3 miles, the course was altered to 128°(T) to approach the anchorage, 4 – 7 cables N.W. of Cigading Jetty. Vessel anchored at position Lat. 06° 00.2' S., Long. 105° 56.9' E. at 1600 hrs.

Charts: B.A. Charts No. 918 and 2056.

PILOTAGE: Port is controlled by Merak Pilot Station at Lat. 05° 56' S., Long. 105° 59.6' E. Call sign is "Kilo Bravo". Station listens on VHF Channels 12 and 16. No radar available. Pilot boat equipped with VHF. Berthing possible only during daytime. Pilot boarded the vessel at 0630 hrs., and 2 tugs were used for berthing vessel portside alongside. Vessel secured alongside at 0800 hrs.

HEALTH: The Health Authorities board the vessel for Pratique. The Officer checks all vaccination books. Cholera vaccination to the crew were provided.

BERTHING: There is a single berth, about 120 m. long (See "Plan"), extending into the open sea and running approximately 230° – 050°. The berth has extended dolphins on either ends for mooring. The berth is made of concrete and has wooden spars as fenders.

The vessel experienced slight rolling and surging alongside, due to ground swell reflected from shore.

The minimum depth along the berth by hand lead sounding was 10.0 m., plus the height of tide. The bottom is soft mud.

CARGO HANDLING: The berth does not have any cargo gear. Ship's derricks were used for discharging bagged sugar in slings onto trucks. Stevedores worked around the clock.

MEDICAL: Nearest hospital is at Cilegon. Serious cases have to be referred to Jakarta.

DENSITY: 1025.

FRESH WATER: Not available by pipeline. It was supplied by water tanker lorry of 12 tons capacity, on request through the Agent.

FUEL: Not available.

CONSULS: At Jakarta. Survey visit may be arranged through Agent.

REPAIRS: No facilities available.

REPATRIATION: Possible. Arriving crew must have valid transit visa.

AIRPORT: Nearest airport at Jakarta, 2 hours by road.

TIME: GMT plus 7 hours.

TELEPHONE: Nearest telephone on highway outside Cigading port.

SHORE LEAVE: No restrictions. Shore passes are issued by the Immigration Authorities.

GARBAGE DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.$ 1.00 = 2210 Rupiah (May 1995).

GENERAL: Provisions and stores available.

Nearest town is Cilegon, which is about 12 km. by road; it has facilities such as telephone, post office, hotels and shopping complexes.

DILLI: 08.33 S. 125.31 E. (See Plan)

PILOTAGE: Compulsory.

RESTRICTIONS: All foreign vessels calling at this port should obtain the Special Security Clearance, this is arranged by the vessel's Agent.

MAX. SIZE: Maximum LOA 120 m.

RADIO: Kupang Radio. Call sign PKK.

Frequencies: 2,182 kHz and 6,115 kHz.

VHF: Kupang Radio on VHF Channel 16.

TUGS: 1 tug of 240 h.p. and 1 mooring boat.

BERTHING: Length of wharf 180 m., breadth 20 m., depth alongside 7.0 m.

Storage: There is a godown with 1,600 sq.m.

Fork Lifts: 4×2 tons – 3 tons.

CRANES: 1×7 tons capacity.

STEVEDORES: Available.

FRESH WATER: Available alongside in small quantities.

FUEL: Not available.

DUMAI: 01.41 N. 101.27 E. (See Plan)

IMPORTANT FEATURES:

1. There are 4 CPI Oil Loading Berths, 2 Government Cargo Wharves and 2 Pertamina Refinery Wharves (6 berths) at Dumai. The CPI Oil Loading Berth No. 4 can be utilised for handling refined oil product, Oil Berth No. 4 can also be utilised for discharging crude oil. The Pertamina Refinery Wharves are for sole use of the Refinery. The Government Dry Cargo Wharf No. 1 can handle a vessel with a draft of 8 m. and 20,000 g.r.t., whilst No. 2, which can also be utilised for handling palm oil, is for handling dry cargo vessels with a capacity of 10,000 g.r.t. and a draft of 6 m.

2. Government Pilots moor and unmoor all vessels at Dumai Harbour. CPI supervises the movements of all vessels at the CPI loading berths.

3. Safety rules are strictly enforced. The safety requirements are based upon the provisions of the Codes of Safe Practice currently accepted by the Oil and Tanker Industries.

4. The Indonesian Government maintains a radio station (call letters "PKP") at Dumai. All incoming vessels should establish early contact with this station, in order to transmit ETA data, etc.

5. Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by Harbour Authorities on a 24 hour basis (subject to change).

6. The laws of the Republic of Indonesia are in force at Dumai; and all personnel, for their own protection, are urged to abide by them.

7. Display of quarantine signals on approach to Dumai must be maintained, until Pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port.

PORT LIMITS: See "Pilotage" – "Harbour Pilot Area".

DOCUMENTS:

Copy of Agency Agreement Letter of Appointment (SIT LKP).
International Maritime Declaration of Health.
Valid Derat or Derat Exemption Certificate.
13 Crew Lists.
13 Passenger Lists (if passengers carried).
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seamen's Certificates for all crew members and passengers.
Harbour Report/Last Port Clearance.
Load Line, Ship's Registry, Safety Radio, Construction and Equipment Certificates.
International Certificate on the Prevention of Pollution from Oil and Poisonous liquids.
For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copies Stores List.

APPROACHES: The Dumai Port installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessels must make a turn of approximately 180° to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait Fairways have been wire-dragged clear to a depth of 24 m. and 18.3 m. LWS respectively.

Last survey was carried out from April to June 1982. Based on that survey, Dumai Sea Communication imposed the maximum draft of vessels passing Rupat Strait in/out bound Dumai Port is 17 m. (55.77 ft.) and LOA of 315 m. (1,033 ft.)

Vessels which have an LOA more than the above should have and obtain special guidance and permit from Government Harbour Master.

PILOTAGE: Harbour pilotage is performed by Government Pilots. The Harbour Pilot will board a vessel at anchorage for berthing or immediately on arrival at Buoy No. 18 when berth is available.

Harbour Pilot Area is:

Lat. 01° 44' 00" N., Long. 101° 22' 50" E.
Lat. 01° 44' 00" N., Long. 101° 26' 50" E.
Lat. 01° 42' 35" N., Long. 101° 30' 00" E.
Lat. 01° 40' 00" N., Long. 101° 30' 00" E.

Sea Pilots: Sea piloting for the Rupat and Bengkalis Straits is provided by the Department of Sea Communication.

According to the Dumai Port Authority's letter dated June 25, 1974, there are 2 piloting areas for Sea Pilot.

1. Bengkalis Strait and Rupat Strait from Fairway Buoy or Eastern part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30' 00" E.).

2. Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30' 00" E.) to Northern limit of Sungai Pakning Harbour Pilot Area.

Pilotage is compulsory for vessels with a capacity exceeding 105 g.r.t. 6 hours prior to arrival Dumai Harbour area, all vessels should contact CPI through VHF Radio Channels 10 or 16 and 69. At Fairway Buoy all vessels should hoist International Code Flag "I require a Pilot" and contact Morong Pilot Station via Channel 16 for a "request for Pilot".

According to the Dumai Port Authority's memo dated May, 1972, effective on 1st June, 1972, all vessels proceeding to Dumai should hoist the International code flags "H" or "PT" when passing Buoy No. 17 as "requesting for Pilot" and call CPI's radio telephone (VHF) on Channel 12. You will be informed whether or not Pilots are available, if not you may then proceed directly to Dumai Harbour Anchorage Area.

The practice of berthing and unberthing vessels utilising CPI Mooring Masters has been discontinued.

Shipmaster's Report: 1977. Sea pilotage for the Rupat and Bengkalis Straits is now compulsory. The Sea Pilot will board vessels at Fairway Buoy, position Lat. 01° 54.5' N., Long. 101° 51.5' E.

Contact with the Pilot Station "Morong" is allowed on Channel 16.

In case the Pilot is not available, the recommended anchorage area is 0.5 miles N.N.E. from Fairway Buoy.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instructed by the Dumai Port Control Radio to berth on arrival, it is suggested that they proceed to the recommended anchorage area.

Cargo Ships:

Lat. 01° 43' 20" N.	Lat. 01° 42' 50" N.
Long. 101° 25' 30" E.	Long. 101° 27' 00" E.
Lat. 01° 42' 50" N.	Lat. 01° 42' 10" N.
Long. 101° 25' 30" E.	Long. 101° 27' 00" E.

Ballasted Tankers:

Lat. 01° 44' 20" N.	Lat. 01° 43' 34" N.
Long. 101° 24' 30" E.	Long. 101° 27' 00" E.
Lat. 01° 43' 36" N.	Lat. 01° 42' 46" N.
Long. 101° 24' 30" E.	Long. 101° 27' 00" E.

For Deep Draft or Loaded Tankers:

Lat. 01° 43' 34" N.	Lat. 01° 42' 46" N.
Long. 101° 27' 00" E.	Long. 101° 29' 50" E.
Lat. 01° 42' 50" N.	Lat. 01° 42' 00" N.
Long. 101° 27' 00" E.	Long. 101° 29' 50" E.

Prohibited Area:

Lat. 01° 42' 50" N.	Lat. 01° 42' 16" N.
Long. 101° 27' 00" E.	Long. 101° 28' 46" E.
Lat. 01° 41' 12" N.	Lat. 01° 40' 58" N.
Long. 101° 27' 00" E.	Long. 101° 28' 46" E.

RESTRICTIONS: *Requirements for Entering Restricted Maritime Zone of Sumatra:* For some years, the Rupat-Bengkalis Straits area has been designated a Restricted Maritime Zone by decree of the Government of Indonesia.

A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this Zone has been granted by the Indonesian Navy to tanker vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable. All vessels inbound to Dumai from the time abreast Raleigh Bank Light Buoy until anchored off Dumai Terminal must display the following recognised signals:

By Day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.

By Night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian Naval Patrol Crafts.

The foregoing is subject to change.

MAX. SIZE: Length 315 m., draft 17.7 m. Vessels over 315 m. have to have a special permit.

Also see "Approaches" and "Shipmaster's Report" dated October, 1983 – "Circular".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until Pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not Free Pratique).

RADIO/VHF:

1. *Means of Communications:* The following communication systems are available for vessels proceeding to Dumai:
(a) Dumai Radio Call Letters "PKP" (Government Coastal Radio).
(b) VHF Station Channel 16 (CPI and Pertamina operated).
(c) Telex CPI No. 44386 Jakarta or 56271 Dumai.
(d) Telex Pertamina No. 45348 Perta Jakarta or 49285 Perta Jakarta.

2. *ETA Messages:* Vessels proceeding to Dumai shall send ETA Dumai message as follows:

2.1. When proceeding direct from any port other than Palembang and Singapore:
(a) 96 hours prior to arrival at Dumai, transmit ETA Dumai message by vessel's radio to "Caldum" Dumai and "Pertaminaship" Dumai through Dumai Radio Station Call Letters "PKP".
(b) Should ETA Dumai change by 3 hours, send an amended ETA message immediately to "Caldum" Dumai and "Pertaminaship" Dumai.
(c) 24 hours before arrival at Dumai, *confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai regardless of any change in last ETA message sent.

2.2. When proceeding from Singapore:
(a) 96 hours prior to arrival at Singapore, cable ETA Dumai and estimated time of stay in Singapore to "Caldum" Dumai and "Pertaminaship" Dumai. Include words "From Singapore" in ETA message.
(b) At Singapore, when departure time from Singapore is known, *confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai through vessel's Agent in Singapore.
(c) Immediately upon departure from Singapore, and when vessel's radio can be used legally, re-*confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai.

2.3. When proceeding from Palembang:
(a) At Palembang, when departure time from Palembang is known, cable ETA Dumai to "Pertaminaship" Dumai through vessel's agent in Palembang.
(b) Immediately upon departure from Palembang, and when vessel's radio can be used legally, *confirm* or *amend* ETA Dumai to "Pertaminaship" Dumai.

3. *Operating Schedule and Frequencies:* There is a Government Coastal radio station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name : Dumai Radio
Call Letters : "PKP"

Time (GMT)	*Transmits*	*Listens On*
0000 – 0030	448 kHz	500 kHz
0400 – 0500	448 kHz	500 kHz
0800 – 0900	448 kHz	500 kHz
1200 – 1300	448 kHz	500 kHz
1300 – 1400	8726 kHz	8726 kHz
0030 – 0130	8726 kHz	8726 kHz
0230 – 0330	13101 kHz	13101 kHz
0630 – 0730	17184 kHz	17184 kHz
0130 – 0200	2182 kHz	2182 kHz

If contact cannot be made with Dumai Radio, contact Singapore Radio, Call Sign "9VG" and forward ETA message to Amoseas Singapore "RS-21349".

4. *Radio Telephone (VHF):* A CPI operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities.

The following channels are available:

Channel 10 with Frequency : 156.500
Channel 16 with Frequency : 156.800
Channel 69 with Frequency : 156.475

Also see "General" before first port.

TUGS: At present mooring and unmooring assistance is provided by 5 Government 3200 h.p. diesel tugs which are stationed in the immediate vicinity of the wharves. Tugs lines used. While rendering assistance the tugboats are under orders of the Pilot on duty.

Number of tugs required is based on vessel's length.

71 m. – 100 m. length	1 tug
101 m. – 150 m. length	2 tugs
151 m. – 200 m. length	2 tugs
201 m. – 300 m. length	3 tugs
Over 301 m. length	4 tugs

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 8 wharves. 2 wharves are Government-owned and operated cargo wharves. One wharf is Pertamina owned and consists of 2 berths. A new wharf is Pertamina owned and consists of 4 berths. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading/unloading of crude oil. These oil wharves are equipped with docking sonar for monitoring speed and distance of approaching vessels to be berthed at the wharves.

Terminal Official will relay the indicated speed and distance by walkie-talkie radio to the Pilot or Master on board vessel.

(a) C.P.I. Oil Wharf No. 1, located in approx. position: Lat. 01° 41' 14" N., Long. 101° 28' 07" E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 61 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 285 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow.

(b) C.P.I. Oil Wharf No. 2, located in approx. position: Lat. 01° 41' 14" N., Long. 101° 27' 52" E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,424 ft. 8 in. Least depth at face of wharf 59 ft. (LWS). In terms of vessel's size and design this would be an LOA of approx. 350 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow. Under certain circumstances in favourable weather conditions, slack tide during day time, this wharf is capable of receiving a VLCC with special arrangements.

(c) C.P.I. Oil Wharf No. 3, located in approx. position: Lat. 01° 41' 14" N., Long. 101° 27' 42" E. Design capacity 100,000 d.w.t. Length between outer dolphins 1,170 ft. In terms of vessel's size and design this would be an LOA of approx. 260 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow at 095° – 275° true.

(d) C.P.I. Oil Wharf No. 4, located in approximate position: Lat. 01° 41' 14" N., Long. 101° 27' 31" E. Design capacity 55,000 d.w.t. Length between outer dolphins 1,005 ft. 6 in. In terms of vessel's size and design, this would be an LOA of approx. 210 m., and a draft of 15.3 m. Orientation of the wharf parallels the current flow.

(e) Government Cargo Wharf No. 2, located in approx. position: Lat. 01° 41' 14" N., Long. 101° 27' 04" E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (LWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of 5 tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

(f) Government Cargo Wharf No. 1, located next to Cargo Wharf No. 1, has designed capacity of 10,000 d.w.t.

(g) Pertamina Wharf Nos. 1 – 6.

1. Approximate Location:
   Berth Nos. 1 – 2: Lat. 01° 41' 12" N., Long. 101° 28' 16" E.
   Berth Nos. 3 – 6: Lat. 01° 41' 12" N., Long. 101° 28' 39" E.
2. All 6 berths are utilised for loading/unloading refined products, residue, Coke (Berth No. 4 only) and LPG.
3. Design Capacity:

Berth No.	*Max. d.w.t.* (tonnes)	*LOA* (m.)	*Draft* (m.)	*Least Depth at face of wharf at LWS* (m.)
1	100,000	275	17.2	18
2	10,500	135	13.0	15
3	35,000	200	16.4	16
4	25,000	154	16.0	15
5	35,000	200	15.6	16
6	3,000	90	16.1	15

4. Orientation of the berths parallel to the current flow.
5. Put into service:
   Berth Nos. 1 – 2 in 1971, Berth Nos. 3 – 6 in 1984.
6. Wharf Facilities:

Berth No.	*No. of Chiksans*	*Size* (in.)	*Capacity*	*Bunker*	*Fresh Water*	*Deballast Facility*
1	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	16	2,500 l.t.p.h.			
	1	8	600 l.t.p.h.			
2	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	8	600 l.t.p.h.			
3	3	12	1,500 l.t.p.h.	N/A	Available	N/A
4	1	—	600 t.p.h. 500 t.p.h. (coke)	N/A	Available	N/A
5	3	12	1,500 l.t.p.h.	N/A	Available	N/A
6	1	4	280 cu.m./hr.	N/A	Available	N/A

Notes: Berth Nos. 1 and 2:

Terminal: Also known as Putritujuh (Seven Sisters), Pertamina Terminal (Berth Nos. 1 and 2) consists of a finger shaped oil jetty with 2 loading berths (Outer and Inner) which are utilised for refined products. A barge pier lies immediately Westward of the oil jetty. All are owned and operated by Pertamina.

At the Outer Berth (Berth No. 1) 3,200 h.p. tugs are being used to berth/unberth vessels at any time and any stage of the tide by using the minimum vessels' engine and working in "lock" position nosing vessel at forward, midship and aft. Mooring boats assist in bringing lines to mooring dolphins. Head and stern lines are sent first.

The Jetty is a steel/concrete piling system with a concrete slab paving. The fendering is very efficient and in good condition and consists of 4 steel framed pads with springs and rubber bumpers chained to the jetty. Ordinary mooring equipment (ropes and/or wires) is requested from the vessel. No shore moorings are provided. Minimum vessel size for this berth is 13,000 d.w.t.

At the Inner Berth (Berth No. 2) mooring and unmooring is restricted to tide flooding current (Eastward), vessels always to berth with starboard side to 2 fendering pads similar to those at the Outer Berth ensure a good berthing. Vessels to provide only the ordinary mooring equipment existing on board. No additional moorings are provided by shore.

(h) General Wharves

Berth	*Length* (m.)	*Width of Apron* (m.)	*Depth* (m.)
Barges Wharf	40	16	9.0
Pilot Wharf	34	6	7.0
Domestic Wharf	60	6	6.0
Domestic Wharf	40	7	6.0
Palm Oil Dolphin			12.0

CARGO: There are 3 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API gravity 36° approximate. Pour point 100°F. Solid point ±85°F.

2. Duri Crude with API gravity 22° approximate. Pour point ±60°F. Solid point ±55°F.

3. Pedada Crude. This crude is classified as Sumatran Light Crude.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

C.P.I. Oil Wharf	*Size of arms* (in.)	*No. of arms*	*Size of flanges* (in.)	*Sumatra Light and Medium Crude Peak Capacity*	*Average Capacity*
No. 1	12	4	12	50,000	35,000
No. 2	16 – 12	3	12	75,000	40,000
No. 3	12	4	12	50,000	35,000
No. 4	12	2	12	25,000	15,000

All the loading arms flanges are designed to U.S. standard flanges, faced and drilled. All these wharves have Chicksan loading arms. The above peak and average capacity rates are for Sumatran Light Crude. For Duri Crude the above rate should be reduced to approximately 70%.

In case of low stock position, the average capacity may be reduced to approximately 50%.

Responsibility for Loading Arrangements: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by a ship's Officer, and sufficient personnel should be on deck at all times to handle the loading and/or unloading operation.

Upon completion of loading and/or unloading, the vessel will be required to leave the wharf immediately after disconnecting hoses to await clearance at the anchorage.

Hose Handling: Wharf crews are on duty to handle loading arms and/or oil hoses on the wharf. Any required reducers and/or elbows to be fixed to ship's manifolds should be handled by ship's personnel (will not be handled by CPI personnel).

Cargo Loading Procedures: Before the loading is begun, the Master will assure that Terminal and Port Regulations pertaining to readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive cargo, and that all precautions required by the circumstances have been taken. When the vessel is in all respects ready, the following loading procedure will apply:

(a) The Chicksan arms and/or cargo hoses will be swung on board by lifting gear located on the wharves and also with the assistance of the vessel's gear if required.
    The required reducers and elbows to fit vessel's manifold must be connected and disconnected and taken from or to shore by ship's personnel.

(b) Notice must be given by the vessel to the Head Wharfman 90 minutes before the vessel completed deballasting.

(c) Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradually be increased until the desired rate has been reached.

(d) The vessel must give 30 minutes notice to the wharf before starting to "top off", and shall advise if a decrease in loading rate is desired.

(e) The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the Head Wharfman may reduce to 1 pump.

(f) Ship's valves shall not be closed against loading pump pressure.

(g) On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

(h) All cargo tanks openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

The vessel will be unmoored immediately after completion of loading as tide and weather condition permit.

Suspension of Oil Handling Operations: Terminal personnel are authorised to suspend oil handling operations in the event any of the safety rules mentioned under "Safety Regulations" are not observed, or in the event of non-compliance with safety rules generally observed by competent tanker personnel. Oil handling operations may also be suspended if any other danger is believed to exist.

Oil Inspectors: There is no independent agency providing oil inspection service at Dumai.

Vessel's Gangways: Vessels shall supply safe gangway from ship to shore, which shall be adequately illuminated during the hours of darkness.

BALLAST: *Pollution of Sea by Oil:* The discharge of dirty ballast within the territorial waters of Dumai Port and entrance passage (Rupat and Bengkalis Straits) is strictly prohibited. Shore facilities for disposal of dirty oily ballast water is available at Dumai, however only for domestic tankers. For safe manoeuvring purposes, it is therefore compulsory that tankers arrive with sufficient clean ballast water on board to meet the requirement for minimum safe manoeuvring draft. All ballast water on board tankers other than domestic tankers loading at Dumai Wharves must be pumped overboard after arrival at berth and prior to loading. If after arriving alongside, a vessel is found to have dirty ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. Such action will be on the vessel's expense and C.P.I. will not accept responsibility for the resulting delay to the vessel or any claims of the result thereof. A new Notice of Readiness to load must therefore be tendered. "Load-on-Top" procedure is expected to be carried out by each vessel loading at Dumai.

Ballast Requirements: Vessels should arrive with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. The accepted standard of deballasting time is 6 hours.

Deballasting Facility: Deballasting facilities have been constructed in Dumai and connected to all 4 C.P.I. Wharves.

However, this facility is only for domestic sailing tankers. Oceangoing tankers are expected to arrive with sufficient clean ballast water.

Minimum Draft: Minimum draft schedule recommended for various tonnage tankers are as follows:

	d.w.t	*Forward*	*Aft*
a.	12,000 – 22,000	12 ft.	20 ft.
b.	22,000 – 32,000	16 ft.	24 ft.
c.	32,000 – 45,000	18 ft.	26 ft.
d.	45,000 – 60,000	19 ft.	27 ft.
e.	60,000 and over	22 ft.	28 ft.

The above is a recommendation only and the Master should use his own discretion in order to have safe manoeuvrable draft on arrival and while berthing.

READINESS: *Notice of Readiness:* The Master or his representative is required to hand to C.P.I. or its Agent at loading port, a written Notice of Readiness to load during business hours (24 hours everyday). Receipt of such Notice of Readiness by C.P.I. does not necessarily imply acceptance.

Every effort will be made to berth and load vessels on arrival in port. Arrival means anchoring or arrival at anchorage area in Dumai Harbour, see "Anchorage".

Readiness to Load or Unload: The following will apply in regard to Notice of Readiness to Load or Unload.

Notice of Readiness to Load or Unload is a warranty on the part of the Master that the vessel is in all respects ready to load or unload and that all tanks, pumps, pipelines and appurtenances of the vessel are fit to receive the cargo to be loaded or unloaded.

CRANES: 1×13 tonnes. 1×18 tonnes used for small ships and barges.

STEVEDORES: ETA should be sent to Agency or stevedoring company 2 days before arrival in order that necessary gangs may be arranged. Main commodity rates: Palm oil 200 tonnes/p.h. Sawn timber 25 cu.m.p.h. and bagged cargo 20 – 25 t.p.h.

MEDICAL: The Port Health Doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the Port Health Doctor might refer such cases to C.P.I. hospital facilities or Pertamina Hospital. Dental facilities available. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

DENSITY: 1020.

FRESH WATER: Fresh water is available in limited quantities at all wharves. A request statement must be submitted to the Port Authority through the vessel's Agent.

FUEL: Not available.

FIRE PRECAUTIONS: Perumpel I Dumai Co., Tel: 2469. Caltex, Tel: 261. Pertamina, Tel: 272.

CONSULS: There are no Consuls or other foreign Government Representatives located at Dumai, or in the immediate vicinity.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessel's main propulsion machinery shall be in readiness for instantaneous use on short notice. No repair facilities ashore.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs Officials on arrival and will remain sealed until the vessels leave Indonesian waters.

CARGO GEAR:

Forklifts: 3×2 tonnes.
2×3 tonnes.
1×5.5 tonnes.
Head Truck: 2×40 tonnes.
Trailers: 2×40 tonnes.
4×20 tonnes.
Top Loader: 1×40 tonnes.

REPATRIATION: Due to transportation difficulties and shortage of accommodation, normally no crew members from any vessel are allowed to disembark for repatriation purposes.

In emergency cases such as sickness and accident, however, C.P.I. may at its own discretion and upon request of the Master of the vessel concerned, assist in the repatriation process.

AIRPORT: Distance to airport 10 km. Jakarta: 3 flights weekly served by Merpati Pelita. Medan: 4 flights weekly served by Merpati Pelita. Batam: 3 flights weekly served by Merpati Pelita.

TIME: GMT plus 7 hours all year round.

HOLIDAYS: 12 religious and national holidays.

POLICE/AMBULANCE/FIRE: Tel: 21351 or 381 or 266.

EMERGENCY CO-ORDINATION CENTRE: Tel: 21437 (Coast Guard).

BANKS: 5 National Banks available.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. Shipmaster to inform Agency who will contact Company.
3. Distance 4 km.
4. Yes.
5. Contact Agent.
6. Riggers can be employed to assist with storing.

SHORE LEAVE: Shore liberty may normally be granted to ship's Officers and crew after clearance of the vessel by Harbour Authorities. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the C.P.I. compound is out of bounds with the exception of the road from the wharves to the village road. Penalties imposed for violation of Harbour Regulations or local laws have been severe and C.P.I. can not intervene in such cases.

IDENTIFICATION CARDS: I.D. Cards and Passports required.

PROVISIONS: There are very limited facilities to handle ship's laundry and supply ship's provisions.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during Spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.E. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 hrs. and 0200 hrs.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70% – 90%).

SAFETY: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

Emergency Facilities: The following shore fire fighting facilities are available at each wharf to assist a vessel in the initial stages of a fire at wharf.

(a) C.P.I. Oil Wharf Nos. 1 – 4:

1 fire pump capacity 750 g.p.m.
1 fire fighting monitor.
6 fire hydrants.
2 fog spray hydrants.
2 revolving nozzles underneath wharf.
1,000 ft. fire hoses of 2.5 in.
16 cans foam compound.
6×20 lbs. safety meter dry chemical powder.
1 set booster hose.
1 set foam equipment.
2×150 lbs. Yamato dry chemical powder fire extinguisher.

(b) Tugboats: Under instructions of Port Authority, equipped with fire fighting equipment and remote controlled nozzles.

Emergency Signal:

(a) The ship should sound an emergency station's signal consisting of a continuous ringing of the ship's alarm bells supplemented by a series of short blasts of the ship's whistle or siren. C.P.I. will then take such action as is necessary.

(b) A telephone is fitted on each wharf. C.P.I. personnel should be telephoned for assistance.

If no C.P.I. personnel are available, ship's personnel may call for emergency assistance by dialling telephone number 222 from each wharf.

After dialling, state the following:

1. Your name and name of vessel.
2. The exact location of the fire.
3. The nature of the fire if possible.

(c) Assistance can be summoned on VHF Radio if necessary. Use International Channel 12 or 16 on VHF. Given location and extent of assistance required.

(d) Refer to Fire Instructions Pamphlet as usually given to all vessels alongside the wharves.

(e) The shore signal in the event of an emergency is a fire siren or an alarm.

GENERAL: *Charts and Publications:* Masters of vessels proceeding to Dumai should obtain the latest sailing directions, charts and Hydrographic bulletins for the area.

In this respect attention is invited to the latest editions:

(a) U.S. Hydrographic Office Publication 162, Sailing Directions for Malacca Strait, Cape Rachado to Singapore;
(b) U.S. Hydrographic Office Chart No. 3764, Bengkalis and Rupat Straits;
(c) Netherlands Hydrographic Office Chart No. 18 (East Coast of Sumatra);
(d) British Admiralty Chart No. 795 (Cape Rachado to Singapore);
(e) The Indonesian Hydrographic Office Chart No. 18 covering Bengkalis and Rupat Straits.

Boarding on Arrival: A Government Pilot will board vessel on arrival if Wharf is available and will advise and assist in proceeding to wharves. A representative of the ship's Agent will also board the vessel at anchorage or alongside one of the wharves to deliver publications and forms and will make the necessary arrangements for vessel to load.

Port Officials: The Indonesian Government Port Authorities are located in the Government building situated along Jalan Laksamana (Laksamana Street).

General Cargo: General cargo consigned to C.P.I. is handled at the Government Cargo Wharf at Dumai. Only mobile cranes with a maximum lifting capacity of five tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear. *Compulsory Sea Pilot Area:* Bengkalis Strait and Rupat Strait from Fairway Buoy or Eastern port of Morong Pilot Station to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30' 00" E.).

Other Areas Requiring Sea Pilot: Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot area (Long. 101° 30' 00" E.) to Northern limit of Sungai Pakning Harbour Pilot Area. (Applicable to vessels bound for Sungai Pakning from Dumai or v.v.).

General: While vessels are at anchor, no physical communication is allowed with shore except in emergency cases and/or with prior approval from the Harbour Authorities.

Lowering of ship's boats is prohibited without the prior approval from the Harbour Authorities.

Pilferage has taken place recently on board tankers at Dumai anchorages and wharves. C.P.I. of course regrets this practice, and strongly suggests that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside, the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated. C.P.I. also wishes to draw all Masters' attention to the practice of trading with local sampans at the anchorage, which is also a fire hazard, and will not be tolerated by C.P.I. C.P.I. request that all possible steps be taken by ship's personnel to keep sampans away from the vessels while alongside, as loading may be stopped until this hazard has been cleared.

It should be noted that Harbour Authorities prohibited the presence of sampans near alongside vessels.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, precious stones and metals, fire arms, ammunition, sheath knives and similar weapons, or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws. C.P.I. employees are prohibited from bringing firearms, knives, liquor, cigarettes, food stuffs or other articles ashore and shipboard personnel must not offer such items to them. Commissions for the importation of goods from other countries are not to be solicited or accepted.

Compliance: Masters are requested to inform ship's Officers and crews of the foregoing regulations pertaining to contraband, shore liberty, etc., to assure that they are completely understood, and to require the full compliance of all hands.

DEVELOPMENTS: One new berth for palm oil under construction, also 3 berths for sawn timber, fertiliser, palm kernels, rubber and general cargo.

SHIPMASTER'S REPORT: October, 1983.

Documents: 14 Crew Lists required and all ship's personnel require passes. Immigration stamp all Discharge Books and/or Passports on arrival and Agent will take them ashore about 1 hour before unberthing for stamping again, when all passes also returned.

Pertamina, as vessel's Agents, have own forms for N.O.R., and Dry Certificates.

Cargo Inspector has his own forms.

Berthing: Vessel (140,000 d.w.t.) berthed at No. 2 Berth, stemming the tide. 3 tugs used, 1 forward, 1 aft and 1 midships with tugs' lines. Moorings 3, 3, 2 each end. Forward headlines first then breasts then springs and aft springs first, then breasts then sternlines. 2 watchmen on board all the time and they are very efficient.

After loading and if on maximum permissible draft, (See "Circular") then vessel unberths and anchors off berth to await HW.

Density: Density varied between 1008 and 1015 depending on state of tide.

Services: Ship Chandler will arrange for a barber to come on board and will also bring on board items for sale such as batik.

A telex message sent through Agents took 51 hours to reach Singapore. *Identification Cards:* All visitors to vessel require a pass issued by Texaco. Also see "Documents".

Circular: To All Agency Tankers Calling at Port of Dumai:

Based on the Circular of Dumai Harbour Master dated 14th January, 1982, Ref. No. S.DMI.AL.14/1/1982 regarding the draft limitation for vessels passing Dumai-Morong route, based on the result of the survey carried out by the Sea Communication Team, we herewith inform you that for the sake of your vessel's safety, your vessel's draft should not be more than 17 m. (max. LOA 315 m.) when passing the above mentioned route. Please be advised too, that you are recommended to pass this route during the high tide only.

Dumai, 20th January, 1982,
Pertamina of Shipping Dumai.

SHIPMASTER'S REPORT: January 1992.

Vessel: 113,528 d.w.t.; 15.62 draft; 265.18 m. LOA.

Approaches: The approaches to this port are quite straightforward, but when coming from the East, it is necessary to cross the S.E. bound traffic in Malacca Strait, and that can be a problem if it is congested. Traffic was not heavy when we crossed.

Communications can be awkward because of accents, but English is fairly well understood.

Pilotage: The Pilot boat is a slow and heavy launch which could manage only about 4.5 knots into the wind. At best, it is probably capable of making about 8 knots in smooth water.

The Pilot Station is on Rupat Island, with only sea transport available for the Pilots. As there is no launch available with any speed, the Pilots bring a ship out, then wait at the Station for another ship to take in. If extra Pilots are needed at either end, they travel on a ship along with the Pilot who is piloting the vessel. The pilotage is about 60 miles, and takes from 4 hours to 6 hours; the tidal streams being very strong.

Sea Pilots are now compulsory, and Harbour Pilots berth the ships. All the Pilots are Indonesian.

They seem to operate quite well, although they are reluctant, or unable, to discuss "passage planning", and did not seem to understand why we were questioning them.

Channel: The channel is a natural one, with good deep water nearly all the way. The shallower section, between Buoys 15, 17 and 19, is still quite deep, and we never had a UKC of less than 4.0 m., but mostly the ship had more than 8.0 m. UKC, at full speed.

The "hair pin bend" section seems to have been extended to the East to find deeper water, and that new part is the only really narrow part of the whole channel. On the inward passage, being less than 10.0 m. draft, we did not use the new channel, and crossed over at Buoy No. 9, rounding the buoy.

The navigation is straightforward, with buoys marking all the bends, and 4 sets of leads – 2 inward, 2 outward – to assist.

It was completely dark (a moonless, overcast night) both inwards and outwards, and we were not able to assess any of the channel in daylight.

Some of the buoys were unlit, as was a rear lead on one of the inward leads, but we had no advance notice about them. We just noted that they were out. The rear lead had been lit again when we sailed. From what the Pilots said, our ship is about the maximum size they handle in the port.

Dumai Port: There are 3 tanker berths (at least) and several dry cargo berths. There is also a ship repair section, to the West, with 2 medium size floating docks. They have LPG tanks and a coking plant.

The port seems to work round the clock, and ships (ranging from 3,000 to 30,000 tonnes) were coming and going all the time we were there. 3 large tugs are available, and they are normally all used when handling a large tanker. One was out of action when we berthed, but we used all 3 on departure.

The berthing procedure is simply to stem the tide and push onto the berth, sideways, with the tugs, who then hold her up while the back springs are sent out, using heaving lines and shore messengers. 3 head/stern lines are then sent, by lauch, then 3 breast lines. The tugs are not dismissed until mooring is complete.

Loading booms are used, and their rates seem to match up to their promises.

From completion of loading till sailing takes about 4 hours, but the Loading Master does not return to the ship with the Bills of Lading. Any Letters of Protest have to be given to the Agent, who will not sign for anything.

General comments: A large and varied amount of requests were made for presents, but we only gave out cigarettes, beer, soft drinks and coffee.

Customs made a full check on the contents of the Bond Store and the Beer Room, and picked up one or two small discrepancies. I explained that we had spent longer than expected in Singapore, and that we had to prepare the documents before arriving at Dumai. No big fuss was made, but they were amazed that we did not experience such a check at every port we visited.

Shore leave is avaiable, and proved to be very popular. All the Passports are taken ashore by Immigration, with no receipt being signed, and paper passes, made up on board on paper supplied by the ship, are issued. These passes *must* be returned to the authorities before sailing.

SHIPMASTER'S REPORT: November 1995.

Indonesia – General: See "Belawan – Shipmaster's Report, dated November 1995".

Dumai Port: Dumai is a refinery town with poor quality of living.

This vessel (45,000 d.w.t., double hull tanker) berthed alongside the new jetty. Although we had information for maximum allowable draft of 10.00 m. during Low Water, we sounded by sounding lead and found only 9.20 m. of water.

For an independent survey, stating and recording only the depth soundings we were taking, we paid U.S.$500.00.

We required ratguards on all our mooring lines.

Sometimes we did not see the Agent for 3 days, and this was the only form of contact.

AGENCY: See "General" before first port.

AUTHORITY: Port Administration of Dumai, JL. Datuk Laksamana, Dumai. *Tel:* 21469, 21369, 21325, 21442. *Telex:* 56290. *Cables:* Adpel Dum. *Contact:* H. Simanjuntak, Port Administrator. Tel: 21162.

Note: Pilot Station, 21442-278-372, contact 24 hours.

C.P.I.: 434-261-278. Pertamina: 272-372.

P. T. Caltex Pacific Indonesia. (Head Office), Kebon Sirih 52, Jakarta 10110, Indonesia. *Tel:* 376908. *Telex:* 44386 Caltex IA. *Cables:* Calpacem, Jakarta.

Operating Office: Rumbai, Pekanbaru 28271, Sumatra. *Tel:* 21377. *Telex:* 56112 Caltex PBR, 56271 Caltex DUM (Dumai Terminal Office). *Cables:* Calpacem Pekanbaru.

GEBE ISLAND: 00.03 S. 129.23 E. (See Plan)

LOCATION: Port of Gebe Island is situated in the Halmahera Sea, North Maluku in position Lat. 00° 03' 50" S., Long. 129° 22' 44" E.

DOCUMENTS: *Documents to be produced upon vessel's arrival:*

14 copies Crew List.
11 copies Passengers List (if any).
4 copies Parcel List (if any).
5 copies Stores List.
5 copies Cargo Manifest.
5 copies Narcotic List.
6 copies General Information.
4 copies Personnel Effects List.
3 copies Vaccination List.
5 copies Fire Arms & Ammunition List.
7 copies Voyage Memorandum.
Ship's Register.
Certificate of Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
International Load Line Certificate.
Maritime Declaration of Health Certificate.

Derat Certificate.
Last Port Clearance.
Safety Radio Certificate.
Harbour Report.

Ship's Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel has been granted Free Pratique, the Immigration Officer checks Passports, Seamen's Books and Crew List and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Gebe Island.

Use of ship's radio transmitter is prohibited while lying in port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

PILOTAGE: Pilotage not compulsory. There is no Pilot at Gebe Island.

ANCHORAGE: Anchorage position for ore loading at Gebe Island is Lat. 00° 03' 50" S., Long. 129° 22' 33" E. Depth 65 m. LWS.

Chart: Indonesian Sea Chart No. 388.

RESTRICTIONS: Vessels may berth/unberth at any time between 0600 hrs. and 2400 hrs.

Vessel may leave the loading point between 0600 hrs. and 2200 hrs.

RADIO: Local Radio Station at Gebe:
Name/Call Sign 6HN 26/GEBE. Power 100 Watts.
Class 2.8/J3EJN.
Frequencies: 14,490 kHz, 7,395 kHz, 16,726 kHz.
Antenna Position: 00° 02' 08" S., 129° 33' 30" E.

Cables to Adhiguna Jakarta, Antam Jakarta and Antam Ternate can be sent through Jakarta Coastal Radio Station, call sign PKE and Ternate Coastal Radio Station, call sign PKE 5.

Arrival Notice: *Owner's Advice:* Owner to advise by cable to Adhiguna Jakarta and Antam Ternate, with copy to Antam Jakarta, at least 8 working days notice of vessel's ETA at loading port.

Master's Advice: At least 48 hours before vessel's arrival at Port of Loading, Master shall give the following information to Adhiguna Jakarta and Antam Ternate, with copy to Antam Jakarta; Last port of call, draft on arrival, quantity of nickel ore to be loaded, stowage plan, quantity and kind of commodity to be discharged and other necessary information.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience has shown that one cannot rely on telegrams regarding ETA sent by Agents at last port of call to arrive on time, therefore Antam Ternate will wait for the Master's telegram before making the necessary preparations.

TUGS: Available and compulsory.

CARGO HANDLING:

Lighters: A number of lighters of 120 d.w.t. to 600 d.w.t. are available.

Wharves: No facilities.

Loading/Unloading Facilities for General Cargo: No facilities.

Loading Facilities for Ore Carriers: Loading of nickel ore at Gebe loading point is done by means of ore barges from 3 jetties.

Number of Gangs: 4 gangs are usually used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading Capacity: Average 5,000 tons/24 hours, depending on the type of vessel, vessel's cargo gear, weather conditions, etc.

Ore Carriers: All types of fully loaded draft ore carriers are acceptable. (Steep bottom sea around the loading point).

Vessels without cranes or derricks, including buckets, are not acceptable.

Minimum capacity of cranes or derricks must be 5 tons.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Loading is performed by Shipper's personnel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and holidays are excepted:
New Year, 1st January.
Idhul Fitri, fixed – 2 consecutive days of the year.
Idhul Adha, fixed day of the year.
Independence Day, 17th August.
Maulid Day, fixed day of the year.
Easter, fixed day of the year.
Waisyak, fixed day of the year.
Nyepi, fixed day of the year.
Ascention, fixed day of the year.
The First Muharram, fixed day of the year.
Christmas, 25th December.

Despatch/Demurrage money to be settled in accordance with the related contract.

Labourers: First Shift: 0600 hrs. – 1400 hrs. Second Shift: 1400 hrs. – 2200 hrs. Third Shift: 2200 hrs. – 0600 hrs.

Labourers will be supplied by Aneka Tambang. Making the vessel ready for loading to be done by vessel's crew members.

MEDICAL: Hospital not available, doctor and inoculations are available.

DENSITY: 1020.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

SURVEYORS: On/Off Hire surveys can be arranged.

OPENING/CLOSING HATCHES: The first opening and the last closing as well as removing and reinstalling of hatch beams to be done by vessel's crew.

REPATRIATION: Can be arranged.

AIRPORT: There are 3 flights per week between Ternate and Gebe and vice-versa, served by Aneka Tambang Charter Flight. Flying time is about 60 minutes.

TIME: GMT plus 9 hours.

HOLIDAYS: See "Stevedores".

SHORE LEAVE: Shore pass must be carried by the crew during shore visit.

Invitation: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Leaving for Ternate: The crew members are prohibited to leave Gebe for Ternate, except Master and Officers who must be guided by Agents.

Local leave in Gebe is permitted as a concession.

GENERAL: *Priority:* First come first served.

Flags to be flown by incoming vessels: Vessel's National flag, Indonesian flag, Vessel's numbers, Quarantine and Immigration flag.

Ship Chandler: None. In emergency cases, for a limited quantity, Agents can act as ship's chandler.

Fumigation: No facilities.

Vessel's Disbursement Accounts: All vessel's disbursement accounts will be charged to the related principals through the General Agents.

Despatch/Demurrage: To be settled in accordance with the related contract.

Cash in Rupiah: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Facilities: There are 3 jetties to load nickel ore to the barges. General facilities available ashore include lawn tennis, football, badminton, basket ball, golf course, swimming pool and local beach, but no restaurant. All belong to the Company.

Delays: No delays unless bad weather (rain, strong winds, rough seas, etc.).

Entrance: Please go direct to loading position.

Fire Fighting: No facilities.

Ice: No facilities.

Slop Reception: No facilities.

Tides and Currents: As per Tide Tables of Indonesian Archipelago.

Customs: Kapaleo Town, Gebe Island. Crews are not allowed to bring alcohol to the shore (whisky, wine, beer and other similar, etc.).

Wind and Sea: No prevailing winds observed.

Watchmen: No watchmen from ashore.

Garbage Removal: No facilities. Never throw away your garbages.

AGENCY:

General Agents: P.T. Pelayaran Bahtera Adhiguna, Jakarta, 10 – 12 Jl. Kalibesar Timur, P.O.Box 1315, Jakarta, Indonesia. Cable Address: Adhiguna Jakarta. Telex: 42854 Adhiguna JKT. Tel: 676547, 672613.

Local Agents (Head Office): P.T. Aneka Tambang, 24–26 Jl. Bungur Besar, Jakarta, Indonesia. Cable Address: Aneka Tambang JKT. Telex: 49147 Antam JKT. Tel: 410108 (Hunting system).

Local Agents at Loading Port: P.T. Aneka Tambang, Unit Pertambangan Nikel Gebe, Jl. Batu Angus No. 11, P.O.Box 37, Ternate, North Maluku, Indonesia. Cable Address: Antam Ternate. Telex: 73153 ATKTTE IA. Tel: (0921) 21686, 22221.

GRESIK: 07.09 S. 112.40 E. **(See Plan)**

BERTHING: Main jetty with length 284.5 m. and berthing dolphin 50 m. from jetty. Depth of water 15 m. – 18 m. Vessels up to 30,000 d.w.t. able to berth off seaward side and 10,000 d.w.t. on shore side.

CARGO FACILITIES: *Discharge Facilities:* 15 ton grab Kangaroo crane with normal operating capacity of 300 t.p.h. and max. 550 t.p.h.

Multi-purpose conveyor to transport materials from the jetty to TSP plant – 600 t.p.h. capacity.

Pumping system for phosphoric acid from vessel to TSP plant tanks, complete with pump – 300 t.p.h. capacity.

Pumping system for ammonia –33°C from vessel to TSP plant complete with pump – 150 t.p.h. capacity.

FRESH WATER: Available.

SHIPMASTER'S REPORT: July 1984.

Location: Lat. 07° 08.4' S., Long. 112° 39.6' E., about 4.8 nautical miles N.W. of Sourabaja.

Documents:
Ship's Register.
Derat Certificate.
Load Line Certificate.
Radiotelegraphy Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Seamen's Books.

These documents will be kept ashore during the vessel's stay at Gresik.

For Gresik:
2 Crew Lists.
2 Stores Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
1 Cargo Manifest and/or 1 Bill of Lading.

In addition for Sourabaja:
9 Crew Lists.
2 Stores Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
2 Cargo Manifests and/or 2 Bills of Lading.

Customs: The Customs will not seal the bonded stores, but strictly controls the said quantity of narcotics.

Pilotage: Compulsory, same Pilots as for Sourabaja. ETA to be sent at least 24 hours in advance. Normally the Pilot boards the vessel when passing the Karang Jamuang Island (Pilot Station), but if required specially for deep draft vessels, the Pilot will board the vessel at the Outer Anchorage.

Anchorage: Position Lat. 06° 51' S., Long. 112° 45' E., depth of water between 35 m. and 40 m.

Gresik Anchorage: Position: Lat. 07° 05.7' S., 112° 39.8' E., 2.5 cables off the Petro Kimia Jetty. Sandy ground, no safe anchorage.

Restrictions: Maximum depth of water 33 ft. Maximum breadth of channel: 90 m. Official allowed sea water draft 32 ft., but Pilots accept 32 ft. 06 in.

Berth: Petro Kimia Jetty (private berth). Length of berth 320 m. approx., equipped with large rubber fenders every 40 m. Depth of water between 12 m. and 15 m. Height of tide about 2.5 m.

VHF: Call "Sourabaja Pilots" on Channel 12 or Channel 16 if no reply.

If vessel enters the channel without Pilot, a second call before passing Buoy No. 5 is required.

Tugs: Same tugs as for Sourabaja.

Vessel with a length of more than 150 m. has to take 3 tugs, (one of them only for stand by).

Cranes: 2 cranes, but only one used for discharging sulphur. This crane has a discharging capacity of 300 tonnes/hr.

Working Hours: Day and night, even during "Ramadan".

Times: 0800 – 1200
1300 – 1800
1900 – 2400
0100 – 0600

Fresh Water: Available from the jetty.

Fuel: Available by barge at Sourabaja Anchorage only.

Repairs: From Sourabaja.

Medical: In Sourabaja only.

Shore Passes: Given by Agent, to be returned before departure.

General: No Immigration and Port Health board the vessel at this berth. No foreign currency declaration necessary. Crew changes not allowed.

AUTHORITY: Harbour Master.

JAKARTA (Tanjung Priok): 06.10 S. 106.50 E.

(See Plan)

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's Arrival and Departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Certificates: The Ship's Certificates should be delivered to the Harbour Master through the Agent. These certificates will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

Also see "Radio Officer's Report".

APPROACHES: *Navigable Channel:* Length 8,000 m. Minimum width 250 m. – 350 m. Minimum depth 11.0 m. – 12.0 m. (Chart datum).

PILOTAGE: Compulsory and available throughout 24 hours. Pilot boards 1 mile North of harbour entrance (Master has reported that pilots like to board inside the breakwater, with engines stopped).

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of 156.600 MHz is used for communication between the pilot boats and the Pilot Station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater (Position Lat. 6° 04' S., Long. 106° 53.2'E.).

RESTRICTIONS: Max. draft is approximately 11 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	225	9.50
2nd	195	9.50
3rd	220	11.00
Oil	220	11.00
Bogasari (wheat)	230	9.60
DKP (chemicals)	230	9.00

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose Master has declared that a quarantineable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantineable disease (QL/QQ).

The concerned vessel is free from quarantine measures when Free Pratique has been obtained. The Free Pratique becomes invalid when a vessel is in quarantine as stated above or a quarantineable disease occurs during the validity of Free Pratique.

The Port of Tanjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "Provisional Pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "Provisional Pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "Free Pratique".

Accordingly vessels enjoying "Provisional Pratique" are still required to hoist the quarantine flag.

Vaccination/Immunisation: Vaccination and immunisation against cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

Port Operations	Channel 14
Public Service	Channel 16

TUGS: Tugs are operated by PT (Persero) Pelabuhan Indonesia II. Vessels of 100 m. LOA and over have to use 2 tugs. 10 tugs available from 900 h.p. to 2,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth (Chart Datum)* (m.)
Coaster Harbour	510	5.0
1st Inner Harbour	2,540	5.0 – 9.5
2nd Inner Harbour	1,800	5.0 – 9.5
3rd Inner Harbour	1,155	6.0 – 11.0
Container Wharf 1	980	12.0
Container Wharf 2	360	12.0
Mineral Oil Harbour		
Oil Jetty	100	6.0 – 13.0
Bulk Wharf (Bogasari)	162	10.0
Liquid Chemical Wharf	276	9.0
Buoys	*Number*	*Capacity* (tons)
West Buoys	8	15,000
East Buoys	27	5,000

SPECIALISED CARGO-HANDLING FACILITIES:

Conventional Terminal :

18	forklifts	2 – 10	ton capacity
4	mobile cranes	18 – 35	ton capacity
1	head truck	40	ton capacity
1	top loader	40	ton capacity

Container Terminal :

10	Container cranes	30 – 40	ton capacity
41	Transtainers	35 – 40	ton capacity
28	Forklifts	2 – 40	ton capacity
55	Head Trucks	40	ton capacity
100	Chassis	40	ton capacity

Container yard has a capacity of 24,701 TEU.

CRANES:

	No.	*Capacity* Tonnes
Mobile Cranes	4	5 – 95
Floating Cranes	1	100
Quay Cranes	10	30 – 40
Transtainers	41	35 – 40

STEVEDORES:

Working hours: The working hours at the harbour are 24 hours, 7 days a week.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipeline or barge, rate 50 – 100 t.p.h. Barge capacity 200 – 300 tons.

FUEL: Available by pipeline or barge, (3×400 tonnes), supplier is Pertamina. Rate: 65 t.p.h. – 80 t.p.h. by pipeline, and 45 t.p.h. – 60 t.p.h. from barge.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CERTIFICATES: See "Documents".

CUSTOMS ALLOWANCES: No crew allowance for tobacco, alcohol and other commodities.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available. Joining crew must hold an Indonesian Transit Visa.

AIRPORT: Soekarno-Hatta International Airport is approximately 26 km. from Tanjung Priok, and Halim International Airport is approximately 25 km.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire Tel: 4301080, Ext. 2222; Police Tel: 4301080, Ext. 6400; Ambulance Tel: 4403026, Ext. 199, 194.

SHIP SUPPLY SERVICE:

P.T. Harapan Insani, 25 Jalan Imam Bonjol, Jakarta. Tel: 334-032, 334-084, 334-180, 334-214, 349-971. Telex: 44912 Incate Jkt, 46855 Insani Jkt. Branch: Balikpapan (East Kalimantan).

P.T. Patra Supplies & Services, No. 3 Gedung Patra, Jalan Gatot Subroto, P.O.Box 377/KBY, Jakarta. Tel: 513-955, 511-356. Telex: 44976 Cater Ia. Branches: Balikpapan (East Kalimantan) and Singapore.

P.T. Tata Wisata, Jalan Iskandarsyah Raya No. 1, Kebayoran Baru. Tel: 713-707 (3 lines). Telex: 47331 Tata Ia.

P.T. The First Trijaya, Jalan Tanah Abang II/97, Jakarta. Telex: 45965 Fitric Jkt. Cable: Fitricate.

P.T. Nesitor, Jln. Senen Raya No. 54, Jakarta. Tel: 375515. Fax: 3865165, 493675.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CREW IDENTIFICATION CARD: Crew members having no Passport are required to carry a Seamen Identification Card (S.I.C.).

GARBAGE DISPOSAL: Agent must apply for a permit from Port Corporation before any garbage can be disposed of.

WASTE OIL DISPOSAL: Two barges of 185-190 ton capacity are provided by the PT. (Persero) Pelabuhan Indonesia II and are located at Nusantara Berth.

SEAMAN'S CLUBS: None.

CURRENCY: Indonesian Rupiah (Rp.).

RADIO OFFICER'S REPORT: September 1990.

Documents:

Agent:

8 copies Crew List.
1 copy Personal Effects List.
1 copy Stores List.
Ship's Certificates.
Oil Record Book.
Health Book (supplied on first visit to Jakarta).

Customs:

1 copy Personal Effects List.
1 copy Stores List.
1 copy Crew List.
1 copy Ports of Call List.
1 copy "Nil" Return of Mail/Parcels/Passengers/Arms and Ammunition/Animals.

Amount cargo for Jakarta and next port.
Manifests.
Bonded Store will not be sealed.
Agent will handle Immigration and Quarantine matters.

Shore Leave: If no shore passes are issued, Passport will suffice when going ashore.

AUTHORITY: Tanjung Priok Port Administration, P.O.Box 98, Jalan Palmas No. 1, Tanjung Priok, Indonesia. *Tel:* 491132, 491207, 491233, 491364, 492208. *Telex:* 49282. *Contact:* Port Administrator.

AGENT: P.T. Jardine Tama Transport Services, Jalan Pemuda No. 66, Jakarta 13220, Indonesia. Tel: (62-21) 4722237, 4711469. Telex: 48868 JSA IA. Fax: (62-21) 4722237, 4711469.

JAMBI: 01.35 S. 103.38 E.

PILOTAGE: Compulsory. Pilot station at Muara Sabak.

RESTRICTIONS: The port is located approximately 90 miles from the outer bar of Batanghari River.

Maximum depth at the outer bar at high water is 4.0 m.

RADIO: Jambi Coastal Radio Station. Call sign PKC-3.

Frequencies: 6,491.5 kHz (A1), 3,825 kHz (A3).

VHF: Jambi Coastal Radio Station on Channel 16.

BERTHING: Concrete wharf with length 72 m. and depth alongside 2.0 m.

Storage: There is a godown with 700 sq.m.

Fork Lifts: 2×2 tons – 5 tons.

CRANES: 2×5 tons – 10 tons mobile cranes.

STEVEDORES: Available from the labour pool.

MEDICAL: Medical assistance available.

FRESH WATER: Available in limited quantities.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Barges available with capacity 300 tons.

JAYAPURA: 02.37 S. 140.39 E.

PILOTAGE: Pilotage is compulsory. Pilot boards vessel at the anchorage.

ANCHORAGE: Vessels anchor in position 02° 32' 12" S., 140° 43' 24" E.

RADIO: Jayapura Coastal Radio Station. Call sign PKN.

Frequencies: 8,694 kHz. (A1)
13,101 kHz. (A1)
17,074.4 kHz. (A1)

TUGS: No tugs available.

BERTHING: Concrete wharf length 132 m., depth alongside 8.8 m.

Storage: There is a godown with 4,100 sq.m. and an open storage area with 2,000 sq.m.

Fork Lifts: 4×2.5 tons – 3.5 tons.

CRANES: 1×5 ton mobile crane.

TANKERS: There is an oil jetty for small tankers. Length of jetty 33 m.

STEVEDORES: Available from labour pool.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No facilities available.

KAKAP NATUNA MARINE TERMINAL:
05.01 N. 105.57 E. **(See Plan)**

LOCATION: The Kakap Natuna Marine Terminal is located about 120 nautical miles North from the nearest land, in a group of Indonesian islands called the Anambas Islands.

Position of SPM Buoy: Lat. 05° 01' 28" N.
Long. 105° 57' 02" E.
Position of Wellhead Platform: Lat. 05° 01' 44" N.
(The nearest wellhead platform) Long. 105° 55' 55" E.

Charts for the area as follows: British Admiralty Charts No. 2660/A, 3573, 1311 and 1371.

Description: The Marine Terminal consists of a floating production, storage and offloading facility (FPSO). The FPSO, a converted tanker of 137,160 Summer d.w.t. tonnes, is permanently moored to a catenary anchor leg mooring buoy (SPM). The FPSO and buoy are connected by a rigid 'Delta' frame yoke. To accommodate motion, the yoke is hinged to the FPSO stern and the arm is attached to the buoy turntable allowing the FPSO and export tanker to rotate 360° around the mooring in response to current, wind and wave conditions. The export tanker is moored in tandem and loaded by means of a floating hose from the bow of the FPSO to the midship manifold of the tanker. Total crude oil storage capacity of the FPSO is 750,000 barrels. The greatest single lift available to an export tanker is approximately 500,000 barrels.

The fluids from wells, located on a wellhead platforms, flow through subsea pipelines, through the flexible risers, the fluid swivel on the buoy, and then through rigid piping on the arm of the yoke to the processing equipment on the deck of the FPSO.

There is a flare located on a self-standing tripod connected by a bridge to the KH wellhead platform. The flare gives an orange light, often visible at a great distance from the terminal.

PORT LIMITS: *Terminal Limits:* The area within a radius of 1,750 m. from the SPM buoy and 500 m. from the wellhead platform is a prohibited area and must not be entered without a Company Mooring Master on board.

The area within the operational map as delineated or bounded by the coordinates, HH, II, JJ, KK, LL, is a restricted area and anchoring is prohibited:

Coordinates	*Latitude*	*Longitude*
HH	05° 07' 00" N.	105° 52' 40" E.
II	05° 06' 28" N.	106° 00' 13" E.
JJ	05° 04' 45" N.	106° 03' 40" E.
KK	04° 56' 53" N.	106° 11' 09" E.
LL	04° 51' 45" N.	105° 59' 17" E.

MINIMUM STANDARDS OF ACCEPTANCE: *For tankers loading at Kakap Natuna Marine Terminal:*

1. *Size:* Vessel size not to be more than 100,000 tons Summer d.w.t.
2. *Vessels Loading:* Vessels loading at the Kakap Terminal must comply with the latest SOLAS and MARPOL Conventions and Protocols. Vessels found to be seriously deficient or substandard in any safety requirements will be refused mooring and loading.

3. *De-Ballasting:* Vessels must arrive at the Terminal with clean ballast. Vessels should be able to deballast concurrently with loading. Vessels unable to do so will be allowed 6 hours to complete this operation. Prolonged deballasting will necessitate either removal from the berth or to commence loading. The Terminal is not responsible for any free water or deadfreight.
4. *Inert Gas System:* All vessels must be equipped with an Inert Gas System conforming to the SOLAS Regulations. This must be operable throughout the vessel's operations at Kakap Natuna Terminal. Tanks to be monitored by vessel's crew to ensure the correct atmosphere is maintained.

   In turn, the Terminal reserves the right to check the condition of the tanks on arrival and throughout the operation.

   In the event of prolonged failure of the system or, when tank atmospheres depart from industry accepted limits, the vessel will be removed from the berth.
5. *Mooring Equipment:* Vessel to be equipped with correct mooring equipment relevant to its size as laid down in the "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring". The minimum dimensions of the centre bow fairlead are 600 mm. wide and 450 mm. deep, in order to accommodate the chafe chains.
6. *Hose Connecting Equipment:* Vessel to be equipped with loading manifold in accordance with the "OCIMF Standards for Ships Manifold". Flanges to be prepared to accept 12 in. 150 ASA connections. Derricks and rigging to be not less than 10 tons SWL and certified.
7. *Certificate of Deratisation and General Cleanliness:* Vessel to be in possession of a valid Certificate of Deratisation and other deinfestation measures as appropriate. Should the vessel be infested with rats, vermin or other insects which could be a threat to the health or well being of Terminal personnel, then the vessel will not be accepted.
8. *Loading Rates:* Terminal can load at a maximum rate of 24,000 bbls./hr. through 1 × 12 in. hose. Vessels which cannot accept this loading rate will be rejected.
9. *Air-Conditioning:* Due to the climatic conditions of the area, vessels not fitted with a working air conditioning system pose a threat to the safety of loading operations. Only in exceptional circumstances when a vessel has demonstrated its ability to comply with all conditions of the I.S.G.O.T.T. Safety Check List, will a vessel without air conditioning be accepted for loading.
10. *Crew:* Vessel's crew must be qualified to the requirements of the International Convention on Standards of Training Certification and Watchkeeping for Seafarers 1978. If any infringement of safety regulations or the inability of ship's crew to operate safety and efficiently is noticed, then the vessel will be removed from the berth.
11. The vessel's owner or bareboat charterer is to be a party to TOVALOP and have insurance covering the liabilities under the international convention of Civil Liabilities for Oil Pollution Damage 1969 (C.L.C.).

    The cargo to be loaded will be covered by CRISTAL, and/or the International Convention of the Establishment of an International Fund for Compensation for Oil Pollution Damage 1971 (C.L.C.).
12. Tankers are expected to conduct operations using a closed loading method. The loading of any vessel which is unable to comply, will be at the discretion of the Mooring Master.

ARRIVAL PROCEDURE:

1. *Order of Berthing:* Vessels will normally berth in order of arrival, with due regard to nominated date ranges, etc.
2. *Hours of Operation:* The Kakap Natuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances, at the sole discretion of the Company Operations Superintendent, night berthing may to allowed if all conditions are favourable.

   Unmooring will be carried out at any hour.
3. *Vessel Anchoring:* If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed due to adverse weather conditions, etc.), Master will be advised by radio and requested to anchor (See "Anchorage").
4. *Notice of Readiness:* The Mooring Master will act on behalf of the Company to sign acknowledgement of tanker's Notice of Readiness, which should be tendered at time of arrival at the anchorage.
5. *Port Closed:* Notice of Readiness will not be accepted during periods when the Port is closed. The Port is closed when the weather is such that it is too rough for incoming tankers to berth or remain safely moored to the FPSO. Any decision regarding the opening and closing of the Port will be made solely at the discretion of the Kakap Natuna Operations Superintendent. In such a case the Terminal will provide the Master with a written notice of the times during which the port was closed due to adverse weather.
